Mr. HEFLIN. I do. That is the way I feel about it.

Mr. DIAL. Mr. President—

Mr. HEFLIN. I yield.

Mr. DIAL. The Secretary of War would not dispose of it except temporarily, and that would be very expensive, for companies would not bid for it. They could not afford to develop it by installing transformers, building transmission lines, and so forth, because Congress might act then and force a different disposition. The delay would be very unfortunate.

Mr. HEFLIN. Of course, it would be unfortunate, and as I was just going to remark, we find ourselves in a situation here for which we are not responsible. Mr. Ford withdrew his offer, and, as I have said, we had to do something other than consider his offer. Those of us who supported his offer naturally felt that we would like to embody in a bill the principal provisions of his offer, and we have done that. I am not entirely satisfied with either one of the pending bills, but I am going to vote for the bill of my colleague [Mr. UNDERWOOD] because it has in it the Ford provision for making fertilizer.

I think I find myself somewhat in the predicament that Congressman Cushman, of the State of Washington, said he was in when he and I were Members of the House. There were two measures before the House, and he favored some of the provisions of both bills and was opposed to some of the provisions of both, but the proponents of each plan failed to get together, so he was not entirely satisfied with either. He said that his predicament reminded him of the fellow who had stolen a horse out in Washington. Out there they usually hanged the horse thief upon the roadside, with a placard on his back saying, "Profit by his example." They caught one fellow who had stolen a horse and took him out into the woods on a moonlight night. While they had a plow line tied to his wrists and were discussing what disposition they would make of him, some of the citizens who had gathered in the mob suggested that they hang him. Others said it would be preferable to shoot him. Still others expressed the desire to hang

him, while others insisted that he should be shot. Finally one tender-hearted gentleman, who had some consideration for the feelings of the prisoner, turned and said, "Gentlemen, let us consult him, and get his 'rathers' about it." They asked him which plan he would prefer—shooting or hanging? And he said, "I am more interested than any of you in the outcome of this thing, but to tell you the truth, I can't enthuse over any one of the plans you have suggested." [Laughter.]

So, Mr. President, it is not a matter of enthusing over and going into ecstasies over the propositions before us. It is a matter of getting the best legislation possible out of the situation that confronts us.

Mr. McKELLAR. Mr. President—

Mr. HEFLIN. Congress is going to adjourn in less than three months and we will be in vacation probably until next December, and nothing will have been done by Congress with Muscle Shoals; the dam will be completed and the power going to waste, and the Secretary of War will no doubt dispose of it himself during the adjournment of Congress.

I yield to my friend from Tennessee.

Mr. McKELLAR. Suppose the Senator from Nebraska were willing to accept as an amendment to his bill the proposal for the Government corporation to manufacture nitrogen as provided in the Underwood amendment, would not that appeal to the Senator from Alabama now addressing the Senate as being consonant with the views he just expressed? In other words, would it not take the good features of both bills and make a bill that those who believe as the Senator does and as I do and as many others do could get behind?

Mr. HEFLIN. The bill of the Senator from Nebraska proposes Government operation. His bill proposes a limited amount of horsepower to be used for making fertilizer. The whole thing is in confusion and in doubt and uncertainty. I am opposed to putting the Government into any sort of business in opposition to private enterprise. Wherever private enterprise can be controlled I believe in encouraging it and controlling it in the interest of justice and fair play. I do not believe any business ought ever to be permitted to get bigger than the Government. Whenever they get so big we can not control them and they become so powerful and meddlesome politically that they become a menace and a danger, that presents quite another question as to what should be done. But I am in favor, so far as it can be done, of keeping the Government out of competition with the citizens of the Government and I am opposed to the bill of the Senator from Nebraska on that ground. I like some of the features in his bill. I like the flood-control features of his bill, and there are some other improvements on the Tennessee River that I hope to bring about later on unless they are put in some legislation at this session.

But as I was about to say, it is up to the Congress to act at this short session. I repeat, we are not responsible for the parliamentary situation in which we find ourselves. Mr. Ford, having withdrawn his offer, left us in this situation. The other bids before the committee are not before the Congress. There is no way to consider those bids now. We have to act on either one of these propositions, either that of my colleague, the senior Senator from Alabama, or that of the Senator from Nebraska.

We have amended the bill until it seems to me it is a workable measure. I am in favor of placing some more amendments upon it. I have voted for amendments that have been placed upon it, and I have voted for some that were not adopted. I will support some other amendments, but I do not know whether they will be adopted or not. I am not responsible for that. Let me say in a spirit of good humor to my friend from Tennessee that we are dealing with this subject in a Republican Congress. We have a Republican House, a Republican Senate, and a Republican President, and I want to say to him that under these circumstances I shall feel very thankful to get anything of value for the farmers out of this deplorable and unfortunate situation.

I am reminded of the old nigger parson who was preaching around the country and making his way by taking up collections wherever he preached. One night after he finished his sermon he asked one of the brethren sitting in the front seat to pass his hat through the congregation. He passed it all around and no one contributed anything. Not a cent was deposited in the hat. When the empty hat was handed back to the parson he felt in it to be sure if any contribution had been made, and then said with considerable feeling: "Well, there is always something to be thankful for, and I am indeed thankful to get my hat back out of this congregation." [Laughter.]

Mr. McKELLAR. Does the Senator think, then, that about all the Government will get out of it, if under this administration it is turned over to the Alabama Power Co., will be its hat back?

Mr. HEFLIN. Let me again remind my friend from Tennessee that we are operating under a Republican administration, and I do not know who is going to get this Muscle Shoals project. The Senator from Tennessee said yesterday that we all know the Alabama Power Co. is going to get it. That is not so, so far as I am concerned. I do not know anything of the sort, and the senior Senator from Alabama [Mr. UNDERWOOD] says that situation is not true—that the Alabama Power Co. said they were not even going to bid for it. I want to say to the Senator from Tennessee that the Alabama Power Co. is doing business in my State, and so long as it conducts itself as it should and conforms to the law, I wish it well in all its operations in my State; and that statement applies to any other industry that may hereafter come into my State. I want to say to the Senator from Tennessee that if the Alabama Power Co. does get it, or if the Tennessee Power Co. gets it, or any other power company gets it, I want to fix the law so that they will have to make fertilizer, just as Ford agreed to make it. I am not responsible for what the President or the Secretary of War will do in the matter of selecting a company to operate the project at Muscle Shoals. I do not know whose bid will be accepted; but it is up to me to help fix the law so that the farmers of the country shall have legislation that will benefit them in the way of compelling the manufacture of fertilizers at Muscle Shoals.

I want to say, moreover, to my friend from Tennessee in the friendliest spirit that his suggestion reminds me of the fellow who is sick and nigh unto death, and they have had one doctor with him who has been physicking him. They have sent for another doctor, and he urges an operation. While one says, "Continue to give him medicine," and the other says, "Only an operation will save him," they call in Doctor McKELLAR, and he says, "I am against giving him any more medicine and I am opposed to an operation." "Well," they say, "what do you suggest, Doctor?" "Nothing." [Laughter.] That would not be very comforting to the patient. The situation here calls for constructive action. Again I want to say that if I had my choice I would turn this property over to Henry Ford. I would bring him back at this minute and urge the acceptance of his offer. But Henry Ford is out and gone. I am now dealing with questions that are before me, and I am trying to get the very best out of this legislative situation that I can for the great agricultural army of America.

I am going to continue to fight for them. I want to say to my friend from Tennessee, who is the true and tried friend of the farmer, that whoever gets the Muscle Shoals project, I will be here as he will and if they do not track the law, if they do not manufacture fertilizer as we direct them to do, I will be here and he will be here urging that the law be carried out. I will be here as he will undertaking to make them comply with the law or cancel their contract.

Mr. DILL. Mr. President—

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Alabama yield to the Senator from Washington?

Mr. HEFLIN. With pleasure.

Mr. DILL. I would like to ask the Senator how much more advantageous Mr. Ford's offer was than the plan proposed by the senior Senator from Alabama [Mr. UNDERWOOD]?

Mr. HEFLIN. Well, it is different in some particulars, but the Underwood bill contains the same provision on fertilizer that the Ford offer contained, and that is the main reason why I am supporting it.

Mr. DILL. It has not the provision that would give the money back to the Government, has it?

Mr. HEFLIN. I can not inform the Senator as to that.

Mr. UNDERWOOD. Mr. President, if my colleague will permit me—

Mr. HEFLIN. Certainly.

Mr. UNDERWOOD. I will say that of course the Ford provision about returning the value of the dams to the Government and the dams themselves at the end of 50 years represented that much money out of the farmers of America, because the fertilizer had to pay it. In the proposed provision in the bill the rental of the property to the lessee is to be higher than Mr. Ford intended to pay. The fertilizer proposition was identical with Mr. Ford's proposition until yesterday, when some words were struck out which Senators thought left some doubt about the manufacture of 40,000 tons of nitrogen.

Mr. HEFLIN. That amendment, in my judgment, makes it stronger, because it says they shall make the amount of fertilizer named in the Ford offer.

To come back to the suggestion submitted by my good friend from Tennessee—and I want to say candidly that there is not a more faithful friend of the people in this body than

he—if he ever makes a mistake and goes wrong, as I think he has in this instance, it is an error of the head and not of the heart. We are up against a condition and not a theory. We have got to act or show ourselves incompetent to act, and I am not ready to make a confession of that character, so far as I am concerned. If permitted to do so at this minute I would vote for the Ford offer.

Mr. CARAWAY. Those people who are in favor of the Ford offer could perhaps persuade him, if they insisted, to make even a better offer than this or at least to come in and bid under the provisions of this bill.

Mr. HEFLIN. Precisely.

Mr. CARAWAY. There is no provision against that. Even the Senator from Tennessee has not offered an amendment to prevent Ford bidding again.

Mr. HEFLIN. I suppose Ford could do that, and I would like to see him come in and bid under the terms of this bill.

Mr. President, this is a grave situation with which we have to deal. If we vote down the Underwood bill and vote down the Norris bill, Congress will adjourn on the 4th of March with nothing done for the utilization of Muscle Shoals. The dam will soon be completed, and that power will be lost to the Government and lost to the people of the United States unless something is done, unless the Secretary of War should go ahead and dispose of it. Suppose he should do that? I want to say in reply to the suggestion, which I thank my friend [Mr. DILL] from Washington for making, suppose the Secretary of War were to say: "You had an opportunity to act, but you did not act. You left it to me. Power was going to waste and I decided to utilize it to the best interests of the country. I have done so, and in order to do it I had to tell these people that I thought the lease would be made permanent. They have gone there and gone to work, and I feel that we ought not to disturb the contract that I have made with them." Then we would perhaps have the power of the administration backing Mr. Weeks, the Secretary of War, and then the Senate would have thrown away its right to act. That is the serious situation that might arise.

In conclusion, Mr. President, the farmers of the United States have a right to look, and they are looking, for some action to be taken upon this matter at this session of Congress. I think they have a right to expect that action will be taken. I want to say for the benefit of my friend from Tennessee that I have not had a single protest from anybody in our section of the State against the bill presented by my colleague. So far as I know, the people who supported the Ford offer in my section, believing that the Underwood bill carries its provisions regarding fertilizer, are supporting his measure. Why should I not support that proposition when it seems to me that it is more in accord with the Ford proposition than anything else that is before me?

Why was I for the Ford offer? It was because I thought he made it certain that the farmers would get fertilizers and get them at half price. As Mr. Mayo in his testimony said to us, he thought they could produce it at half price, and Mr. Waldo said he thought they could produce it at half price, and other witnesses representing companies having bids for Muscle Shoals stated it could be produced at half price. I want to call to the attention of the Senate what Mr. Mayo said. He said they thought they had a new process for making fertilizer, and thought they could make cheaper fertilizer. Mr. Mayo, Mr. Ford's chief man, said before our committee in response to a question that I asked him, that they thought they had a new process and could make fertilizers at half price. There will be new processes discovered until the manufacture of fertilizers will be brought down in price and the farmers will not have to pay such exorbitant prices for Chilean nitrates.

I saw a one-horse farmer pulling a ton of fertilizer through my town this year, and I asked, "What did you pay for that?" I believe he said the price was \$70 per ton. Was not that the price it was bringing, I will ask my friend from South Carolina [Mr. SMITH]?

Mr. SMITH. That was the price during the World War, but the price now is about \$55 per ton.

Mr. HEFLIN. So this Chilean nitrate is now about \$55 a ton, as stated by my friend the Senator from South Carolina, but farmers have paid in the past \$60 and \$70 a ton for it. We are told that there can be made at Muscle Shoals for 5 cents a pound the ingredients that go into fertilizer for which the farmer is now paying 25 cents more per pound, making the price to him 30 cents per pound. We will produce these ingredients, we are assured, for 5 cents a pound and they now cost the farmer 30 cents a pound.

Senators, I do not think it is too much to ask that this Muscle Shoals project be devoted to the fertilizer interests

of our farmers in time of peace. We now have the Keokuk Dam devoted to other interests, with perpetual rights; we have got the aluminum factory of Mr. Mellon, on the Little Tennessee River, with perpetual rights.

Mr. BROOKHART. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Iowa?

Mr. HEFLIN. I yield to the Senator from Iowa.

Mr. BROOKHART. The Senator from Alabama has truly stated that we have the Keokuk Dam dedicated to private interests of some kind; and his proposition here is to dedicate the Muscle Shoals plant in the same way. I, of course, know that the power from the Keokuk Dam has done the farmers of Iowa and of Illinois and of Missouri no good, for it went right on past them, and the same thing will happen in this situation as to nearly all of the power at Muscle Shoals if it is turned over to private interests; I do not care whether to Ford or to the Alabama Power Co., or who it may be. They all go the same road.

Mr. HEFLIN. I recall that the Senator from Iowa was bitterly opposed to the Ford offer. With all the persuasive power that we could bring to bear upon him in order to get him to vote with us to turn that project over to Ford to benefit the farmers of the country we could not change him; he stood steadfast against us to the last.

Mr. BROOKHART. I was ready to vote and I am now ready to vote for any kind of a nitrate plant, but I am not ready to vote it to Ford or the Alabama Power Co. or to any other private interest. I can not understand the Senator's position when he picks out Ford as something divine in the way of a private interest and then wants to stamp on everybody else who represents a private interest. No; the Government has put nearly \$150,000,000 into this project, or it will have done so by the time it shall have been completed.

Whether it ought to have done so or not, it has done it; the money is there; it is the money of the people of the United States. It seems to me it would be the part of merely ordinary good sense that we find out what that great plant will do before we turn it over to any private interest on any terms. The Senator from Alabama does not know what it is worth in a lease; the Secretary of War does not know what it is worth in a lease; nobody at this stage knows what it is worth in a lease; and yet the Senator proposes that we jump in the dark and lease the property on some 4 per cent terms or other, which may do the greatest of injustice to the farmers of the United States after all.

The other proposition is that we hold it, that we develop it fully until we find out what it is worth, and then, after that shall have been done, that we dispose of it by lease, if that shall be decided to be the best thing to do.

Mr. HEFLIN. I have just undertaken to point out to the Senator that unless this Congress acts the plant will be disposed of by the Secretary of War in some way.

Mr. BROOKHART. The Secretary of War claims no authority to sell it or to dispose of it in any way, although he does claim authority to sell the power under laws that now exist. I think that is true.

Mr. HEFLIN. If that is true, Mr. President—and it is—suppose the Secretary of War sells the power when Congress is not in session, and we come back here and propose some disposition of it, and we are confronted with a contract such as I referred to a moment ago. Somebody else has the property; they have gone to work in good faith and gone to work because the Congress failed to act. What would we say, then, those of us who opposed action at this session of Congress?

As I said before, if I were permitted to write this bill outright I would have a different situation, but that is not the situation which confronts me. I have sought to get the best I can out of the existing legislative situation. So when we have a distinct provision in the Underwood substitute for the Ford bill, to the effect that any company—I do not know what company it may be since Ford has withdrawn his offer—shall make fertilizer, as Ford agreed to make it, what more can I do? Such a company would have to comply with the law; and if it did not comply with the law it could not operate and we would endeavor to take the property from them. In that way we shall protect the interests of the farmer.

Mr. BROOKHART. Even at that, there is no assurance that the price of fertilizer will be any less than it now is. The private lessee can join with the present Fertilizer Trust and go ahead selling fertilizer at the same old price and as a part of the same combination. This proposed law will not control that in any way. It is proposed to provide an 8 per cent profit limit on the turnover, not on the investment in the enterprise or anything of that kind.

Here will come a lessee, perhaps with a small amount of capital invested, who will get 8 per cent profit on his turnover, which may be 100 or 1,000 per cent profit on his actual investment.

I see no cheap fertilizer in this proposition in any way.

Mr. HEFLIN. The Senator was not in the Chamber when I was discussing that situation. I cited the testimony before our committee of all the competent witnesses that fertilizer could be made at Muscle Shoals for half the present price.

Mr. COPELAND. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from New York?

Mr. HEFLIN. I yield.

Mr. COPELAND. If I understood the Senator correctly, I think he said that if he could write a bill it would not be exactly like the bill now before us. May I ask what sort of a bill would the Senator propose if he could have his way?

Mr. HEFLIN. Mr. President, I have not the time to go into the details as to what I would write into a bill. I would provide several things in that situation. I would make arrangements for the disposition of the power that would not be used for the production of fertilizer; but I am not going to take up the time of the Senate to go into that now. There is no use for me to do so, because it will not help the situation here. I am going to act as best I can with the light that is before me under the peculiar parliamentary situation that binds me. I repeat that I had nothing to do with bringing that situation about. I want the Senate to act wisely and in the interest of the Government and the farmers of the country.

I wish to say to my friend from Iowa, who comes from a great farming State, that I am willing to take a chance as to whether or not the proposal now before us will benefit the farmers. I have seen one measure after another go through Congress to benefit other interests in this country, and I am getting weary of having objection made when we are seeking to accomplish something that will benefit the farmers of the country. Let us try it, and if it fails we can say, some of us, that we made an honest effort in their behalf.

What can we do if the lessees fail to comply with the law? In that event we can upset the contract and oust the lessees. The bill is so written now that I am convinced the lessees will have to make fertilizer and we will have a way of knowing whether they make it cheaply or not after we let them make 8 per cent profit and no more.

The farmers of my section were in favor of the Ford offer. Those who favored the Ford offer from that section are in favor of this bill, mainly, because it contains the provision that the Ford offer contained regarding the production of fertilizer. I wish to say, Mr. President, that I would rather take my stand in support of a measure that has written in it such a provision as that to which I have referred than to support various impossible theories suggested by Senators that go into the CONGRESSIONAL RECORD, but that can not get into the bill which is going to be passed by this body.

I know that one of these measures is going to be passed, and, in my judgment, it will be the Underwood bill. Let us improve it and perfect it as nearly as we can. If it is not in the proper form, let us put it in the proper form, and then pass it on to the House and get final action on this subject. Let the Congress express its judgment on it and not leave it up to the Secretary of War and the President, because they must finally act in the matter.

Mr. SMITH. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from South Carolina?

Mr. HEFLIN. I yield to my friend from South Carolina.

Mr. SMITH. Mr. President, I wish to follow up the idea suggested by the Senator from Iowa. I do not say it as just a mere formal expression but I say it sincerely, that the Senator from Alabama, I believe, is as zealous and earnest in his desire to help the farmers of this country as is any man in this body.

Now, the situation that confronts us is an alternative between the two plans incorporated in the bill to which the Senator has referred; namely, that there shall be an effort made to secure a lessee, and, failing that, then there is provision made and the terms are set forth, for a Government corporation which is to proceed with the development and operation of this plant. Both the Government and the private lessee are to be under identically the same prohibitions and restrictions. Does not the Senator believe that it would infinitely strengthen this proposition if at this stage of the development at Muscle Shoals we would strike from this bill all provisions looking toward a lease and provide merely for the Government corporation as it is now contemplated by the bill, until such time

at least as that corporation, which will be absolutely under our control, with the terms of its operation subject to modification and change by Congress at any time we see fit, may develop and perfect the production of the thing to which the project was consecrated in the first bill that was introduced here and which I myself had the honor of introducing; namely, fertilizer for the farmers during times of peace and munitions during time of war?

We have now a plant there, and, under the contract, although the Government does not own the patents, nevertheless the Government may use them. That plant is not a theory, but it is a fact. It will produce 40,000 tons of fixed nitrogen beginning to-morrow, if the testimony of those who have had it in charge amount to anything. Along with it is nitrate plant No. 1, which the Government is continuously using for experimental purposes to see if they can not cheapen the process.

Mr. BROOKHART. Mr. President, in connection with that is it not true that the Government can not assign the right to use the patents to a lessee?

Mr. SMITH. I think that is true; and that question was discussed here the other day on the floor; but, taking the situation as it stands, the Government has the right to use the patents and it has a plant there which will produce 40,000 tons of nitrogen to be available for the farmers of the State of the Senator from Alabama and of my State and of all the other farmers of the country. The process, however, has not yet reached that stage of development which the airplane, the submarine, the steam engine, and the automobile have reached. The principle is there; we know that nitrogen can be produced from the air. When Wright first made his little tentative flight science knew that it was possible for man to navigate the air, but there was a vast difference between the plane used in that initial attempt and the present perfected airplane.

Does not the Senator from Alabama believe that Congress, appointing its own agent and that agent acting under its direction, can go there and determine what can or can not be done, and then when that fact has been demonstrated would we not be in a better position to know what we were turning over, if we desired to turn it over, than to give it up now in the very inception of what I believe to be the revolutionizing of all fertilizer production in this country?

Mr. HEFLIN. Mr. President, I think it is for the best interest of the farmers of the country to enact a law now which has the Ford provision in it for making fertilizer at Muscle Shoals, and the quicker we can get that production started the better it will be for hundreds of thousands of the farmers of the country. We are already providing in this bill that time shall be given before they shall be required to reach the maximum, but, as I recall, the production of 40,000 tons of fixed nitrogen will be required in the fourth year. I fear that any kind of delay will postpone the day when I believe we can deliver the farmers of America from the Fertilizer Trust. I want to hasten, as I know my friend from South Carolina does, the day of their deliverance. We have got to act on one of these bills before us; and if we fail to take decisive action, I think action will be taken by the War Department during the adjournment of Congress. So far as I am concerned, I want to see some action taken by Congress before we adjourn.

The Senator from Iowa [Mr. BROOKHART] said that we have spent about \$150,000,000 at Muscle Shoals. Let me say to him that we are paying to Chile for nitrates just about \$150,000,000 every 12 years. Four times 12 is 48. We are giving to Chile four times one hundred and fifty millions in the 50 years that we would lease this plant to somebody that would make fertilizer to help bring down the price of nitrates to the farmers of the country, and I do not think that is asking so very much. With the Keokuk Dam in Iowa, the Senator's own State, with perpetual rights to a company up there, and with the dams in other places with perpetual rights, I do not think we are going too far to permit this great project to be used in the interest of the Government in time of war and in the interest of the farmers in time of peace.

Mr. COPELAND. Mr. President, if I were in my home city of New York I should not have to say what I want to say now, and that is, that I hold no brief for the New York World. While I feel a degree of thankfulness for the support it gave me during my campaign to come to this honorable body, we frequently differ on questions of policy. I should like to say to the Senator from Mississippi, however—I am sorry he is not here—that there are no "editorial novices" on that paper.

It is true that there are some technical errors in the editorial printed in the World this morning, but the spirit of this

editorial—what is known in the newspaper world as the "lead" of the editorial—is entirely correct.

I want to review, just a little, what the editorial says:

If the Underwood Muscle Shoals bill comes to a vote in its present form, the World hopes that the Senate will vote it down.

If the bill passes and goes to the House, the World hopes that the House will amend it. This bill is wrong.

It is wrong because its authors insist upon treating the Shoals as a nitrate plant rather than a power source and thereafter fail to protect the public interest in that power.

No one can read the Underwood bill without recognizing the correctness of the statement of the New York World. On page 4 of the bill, where the price is fixed upon fertilizer, in line 12, it is distinctly stated that the price "shall be limited to a maximum net profit which may be made not to exceed 8 per cent of the fair annual cost of the production thereof"; but when it comes to the sale of surplus electric power, as provided for on the next page of the bill, there is no provision for fixing the profit on the power sale.

Mr. UNDERWOOD. Mr. President, if the Senator will allow me to interrupt him, I challenge his statement.

Mr. COPELAND. I shall be very happy if the Senator from Alabama will point out at this time, if he so prefers, where such essential protection is given. To this end I have introduced an amendment, which I hope to have adopted—

Mr. UNDERWOOD. I do not know whether the sale of power is regulated in New York State or not. I know they do regulate the price that you shall pay to ride on a street car or a railroad, and I suppose they regulate the sale of power. In Alabama and Mississippi and Georgia and Tennessee, the adjacent States where this power is likely to be sold, there is regulation of power and prices of power by State commissions in the interests of their people, and this bill very distinctly provides, in section 10, that—

The surplus power not required under the terms of this act for the manufacture of nitrogen or fertilizer, when sold or used shall be subject to the laws, rules, and regulations relating to the sale and use of electric power in the several States in which said power is used.

Of course, I belong to the Jeffersonian school. If the Senator prefers to join the Hamiltonian school and have the regulation of power in Washington instead of in the several States that is another matter. This bill does not regulate it from Washington, but it could not be more clearly expressed than it is in the bill that the States in which the power is used under their State laws shall regulate its sale, and they do regulate its sale; and I must say that in the State of Alabama we have very reasonable power, the sale of which and the price of which is regulated by the Public Service Commission of Alabama.

Mr. BRUCE. Mr. President, may I interrupt the Senator?

The PRESIDING OFFICER (Mr. Fess in the chair). Does the Senator from New York yield to the Senator from Maryland?

Mr. COPELAND. I yield.

Mr. BRUCE. Does the power of the Public Service Commission of Alabama apply to power originating outside of the State and simply distributed within the State, or only to power originating in the State?

Mr. UNDERWOOD. It applies to any power used in the State; but, of course, so far as this particular bill is concerned the power would originate in the State.

Mr. BRUCE. Yes; I know it would. I am just asking for illumination. Now, how about Tennessee?

Mr. UNDERWOOD. My understanding of the law is that it applies to all power used and sold; but, so far as my knowledge goes, there is no power used or sold in Alabama that is not created in the State.

Mr. BRUCE. Precisely. There is usually, of course, a provision in connection with these public-service commissions giving the commission power to regulate rates for power originating outside of the State and distributed in the State as well as power originating in and distributed in the State.

Mr. UNDERWOOD. Undoubtedly.

Mr. BRUCE. I suppose that is true of Tennessee, and probably of Mississippi.

Mr. UNDERWOOD. But if there is any State where there is additional regulation needed it is within the power of the State to do it within the terms of this bill. So I say that I challenge the statement that the Senator from New York commends in the World editorial that the sale of this power is not protected. It is protected if you believe that people in the States have a right to protect themselves. Of course, if the New York World, which is generally conceded to be a Democratic paper, has gone to the other school and thinks that we

should regulate these matters from Washington and not from New York or Alabama then I yield and say that the bill does not regulate them from Washington, but that there is ample provision to protect the people of the several States in which this power shall be used—there is not any question about it—if they want to use it in that way.

Mr. GEORGE. Mr. President—

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Georgia?

Mr. COPELAND. I yield.

Mr. GEORGE. At this point I should like to make this statement to the Senator from New York, and also in the hearing of the Senator from Alabama:

I propose to offer—I do not know, of course, what fate the amendment will meet with—I propose to offer an amendment to this bill, at appropriate places in the bill, providing for the distribution of the surplus power, and to commend that statement to the Senator in connection with what the Senator from Alabama has said—

Mr. COPELAND. Will the Senator repeat what his amendment will be?

Mr. GEORGE. I propose to offer an amendment at the appropriate places in this bill—one at least, possibly two places—dealing with the surplus electric power in language that shall require the distribution of the surplus electric power. I have no disposition, of course, to interfere at all with the use of the power for the primary purposes set out in this bill; and that, in connection with the statement made by the Senator from Alabama, would bring about this situation:

There would be a regulation as to the surplus power. The manner of its disposition would be indicated in the bill—at least the general policy would be fixed—as well as the bodies in the several States that would have jurisdiction over fixing the prices of this power. I myself regard it as vital that there shall be a distribution of the surplus power, and that it shall be distributed by the lessee or sold for distribution; and I myself would have no objection to a further provision that in its sale preference should be given to States, counties, municipalities, or other political subdivisions, to the end that the people themselves might have the full benefit of this Muscle Shoals development. But at least I shall offer the amendment providing for the distribution of the surplus electric energy or power, and that this distribution shall be made by the lessee, or he must sell for the purpose of distribution; and then I think the Senator from Alabama has very correctly said that that power thus disposed of does become subject to the rules of the utilities commissions in the several States where sold or used, and it therefore could not be correctly said that no protection is given to the public.

Mr. COPELAND. Mr. President, I thank the Senators for their comments and questions. I think perhaps the Senator from Alabama and I have both wandered from the Jeffersonian school when we provide for any sort of governmental ownership; but the bill of the Senator from Alabama in its second section strikes me as a very strong Hamiltonian document. I may be mistaken about that.

Mr. UNDERWOOD. I call the attention of the Senator from New York to the fact that Mr. Jefferson himself favored and proposed a national militia for the defense of the country and repeatedly in his public documents sustained a national militia for the defense of the country, and I take it that guns and powder go with a national militia. So I thoroughly agree with the Senator. I never have been a public-ownership man. My record is against it, except when it becomes a problem where the national defense is involved; and I have even gone so far in this bill—which is objected to by some of my colleagues for that reason—as to try to get a lessee first and have this matter of national defense in the hands of a private citizen of the United States rather than the Government; and under this bill I only go to Government operation in order that there may be powder to keep a foreign fleet from blowing the city of New York off the map. In that event, as the last resort, I am willing to try to save the Senator's own constituency from that disastrous result by allowing the Government to make the nitrogen.

Mr. COPELAND. Mr. President, I desire, in the name of my constituents, to thank the Senator from Alabama for the consideration he has for the great group living in the city of New York. But I suppose after all it does not matter much what Hamilton or Jefferson might have thought of a plan of this sort. The question is, What can the Congress do under these immediate circumstances?

If we possibly could avoid Government operation of a great utility I should certainly vote in harmony with the Senator from Alabama on that particular matter, because on general

principles I oppose Government ownership and operation. If we were considering this matter de novo I doubt exceedingly if at this time the Senate would vote large sums of money like \$150,000,000 to develop a plant if a private operator could be found to do that very thing. However, we have the property, and it has been very clearly pointed out, I think by the chairman of the Committee on Agriculture and Forestry, that there would be a tremendous amount of surplus power, even after the 40,000 tons of fixed nitrogen had been developed. There is no question about that, is there? There is no question that there will be this surplus power which must be disposed of.

It would seem a very wise thing to me, regardless of whether it is Jeffersonian doctrine or Hamiltonian, to make clear that in the sale of that surplus power there would not be the possibility of excessive profits. I have offered two amendments, which will be brought up in due time, to limit the profit from the sale of this surplus power to 8 per cent, just the same as the Senator from Alabama, in preparing his substitute, limited the profit on the fertilizer to that amount. But perhaps this is a matter which can be disposed of when the amendments come before us.

It is my judgment there is no difference of opinion in this chamber as to the desirability and the necessity of making use of the power at Muscle Shoals for the development of nitrates in time of war, and of fertilizer in time of peace. There is no doubt that we all want to accomplish that end; but the question is, what is the wise thing to do at this moment?

If I have learned anything from this debate, I have learned that all those who would bid for this property, all those who have any personal interest in its acquisition, have consulted with Doctor Cottrell and the other experts of the Agriculture Department about the progress of the science of chemistry as it relates to the making of fertilizer. Our Government has applied scientific knowledge to the determination of the best method of making fertilizer, and if I am rightly advised, the methods which are now used are largely American; at least, the modifications which have been made to make the fertilizer cheaper and better have been the result of American genius.

Is it not a wise thing to continue that work of experimentation? It is certainly important to the farmers of the country, because the fertilizer must be developed at some lower price. But is it not important to the farmers of the country that this experimentation should go along, in order that we may find better ways and cheaper ways of making fertilizers?

Mr. UNDERWOOD. Mr. President, the Senator does not think there is anything in this substitute that interferes with Doctor Cottrell's bureau and his experimentation, does he?

Mr. COPELAND. I think this, Mr. President—

Mr. UNDERWOOD. I know of nothing in the substitute that affects his bureau at all.

Mr. COPELAND. I want to say this, that as compared with the Norris bill I would say the Underwood substitute is very weak on that subject. The Norris bill specifically provides that the Department of Agriculture shall take over plants Nos. 1 and 2 and continue their work of the development of the science of fertilizer production, and at the same time it makes certain that the needs of the Government as regards national defense are served. Distinct provision is made that the amount made at plant No. 2 must not be less than 40,000 tons per year. Am I right in that?

Mr. NORRIS. No; the committee bill does not provide for the making of any specific amount. It does provide, just as the Senator has said, that nitrate plant No. 1 shall be used on a larger scale than they are able in their laboratories to carry out their laboratory tests, and if they will work out, to work them out until the articles can be produced in commercial quantities.

Mr. COPELAND. Is there not a provision, too, that plant No. 2 must not be dismantled or changed until some better method is developed?

Mr. NORRIS. Yes.

Mr. COPELAND. In other words, then, under the Norris bill there would be some certainty of the production of 40,000 tons.

Mr. UNDERWOOD. Not at all. There is nothing in the bill of my friend from Nebraska that requires the operation of either of these plants. It is true that he does say that this experimental bureau in Washington can run plant No. 1. He turns it over to it. But, according to the terms of his bill, he leaves plant No. 2 without an appropriation, lying obsolescent, but provides that it must not be disturbed. My substitute provides for its operation and the production of nitrogen. Up to this time, as the bill stands now, there is no direction or compulsion for the manufacture of fertilizer for commercial use.

Mr. NORRIS. If the Senator from New York will permit—
Mr. COPELAND. I yield to the Senator.

Mr. NORRIS. It turns over both the nitrate plants to the department. They can both be operated. But it is not assumed that they will operate nitrate plant No. 2 and make nitrates at a loss. It is not assumed that they are going to make a lot of nitrates, except it be in time of war, unless they can make them at a price which will cheapen the commercial price of fertilizer. In other words, the bill goes on the theory that it would mean only a loss of power and a loss of money to operate nitrate plant No. 2 now to its capacity, when there would be no opportunity to sell the product unless we sold it at a loss. The Underwood substitute provides that it must be operated, and that it must produce, even if at a loss. We think that is not economically sound, and that it will not redound to the benefit of anybody.

As the Senator who is now addressing the Senate knows better than the rest of us, a laboratory test may show some operation to be perfect, as far as the laboratory test is concerned, but when it is tried on a commercial scale it may be a failure, and it is often more difficult, after the laboratory test is made, to put it on a commercial basis than it was to make the discovery in the laboratory. That is well known to scientific men.

Our idea was to turn over nitrate plant No. 2 as an experimental plant. It is sufficiently large for that. It will be the largest of that kind in the world used for that purpose. Then, when the laboratory test had been worked out, the idea was to give it a practical application in nitrate plant No. 1, and if the product were cheapened, let the entire world use it; and they could use it also in nitrate plant No. 2. But until the process shall have been cheapened, as a matter of national defense, the bill provides that nitrate plant No. 2 must not be disturbed, the idea being that if, in the meantime, we got into a war, we would need nitrate plant No. 2 to produce explosives, regardless of the cost. It can produce now 40,000 tons a year, but at a price that would not justify them in making a commercial fertilizer out of it.

Mr. COPELAND. Mr. President, I thank the Senator for his comments. I do think that there is one very weak point in the Norris bill, which I think the author himself admits. I do not like the limitation to 100,000 horsepower, of which not more than 25,000 should be primary power. It seems to me that in the development of this experimental work and of the manufacture of fertilizer at these plants, the Secretary of Agriculture should be free to call upon the War Department for just as much power as is necessary. We are all agreed here that in the last analysis the purpose of this enterprise is the development of fixed nitrogen, and it might well happen that in this experimentation a very much larger quantity of power would be required than would be given by 25,000 primary horsepower out of a total of 100,000.

Mr. SMITH. With the permission of the Senator from New York, I would like to ask the chairman of the committee a question. He said a moment ago that in the form in which the fixed nitrogen was obtained at plant No. 1 it was not now produced at such a price as to be available for use in the ordinary commercial fertilizer. Has the Senator official figures to sustain that?

Mr. NORRIS. Oh, yes, Mr. President, if the Senator from New York will permit. I want to say that, as far as I know, without any exception, all of those familiar with the operation say that is true. Major Burns says that you could not do it if you were not charged a cent for your power. If you got it operated for absolutely nothing you still could not make fertilizer cheap enough at the nitrate plant now to lower the price of commercial fertilizer on the market.

Mr. SMITH. I did not go into the particulars with the scientists here; but my impression, from both of our scientific men at the head of this department, was to the effect that it was commercially available. I think the cyanamide plant at Niagara is making a profit.

Mr. NORRIS. Yes; but it is not making fertilizer as a chief product. That is simply a by-product.

Mr. SMITH. But it is making an ingredient that the fertilizer manufacturers readily avail themselves of as one of the sources of nitrogen. It comes in competition with Chilean nitrate, with ammonium sulphate, with blood and tankage and the other forms, from whatever derivative the ammonium, which is another form of nitrogen, is obtained. Doctor Whitney told me that they put the cyanamide, which contains the nitrogen, in a matrix of lime and treat it with steam, and they get, of course, ammonium gas, which is readily converted into the sulphate of ammonia by another process which

the fertilizer people have. It may not be directly available for the farmer in the present form. It would be if he wanted to put it on as a top dressing, where the soil was not all alkali, because the lime would alkali the soil. But it is available, and, my information is, available in competition with other sources of nitrogen. However, I am not in a position to state that officially, but I will be before this debate is over.

Mr. NORRIS. Mr. President, if the Senator will permit another interruption—

Mr. COPELAND. I yield to the Senator.

Mr. NORRIS. I am well satisfied, and I think even the Senator from Alabama is also well satisfied, that nitrate plant No. 2, with the knowledge we have now of the cyanamide process, is not a commercial proposition in the manufacture of fertilizer, and I have no doubt whatever about that. The scientific men all, with unanimity, I think, agree to that. With the Cyanamid Co. of Canada, which is making and selling cyanamide, the fertilizer proposition is a secondary consideration. I understand they make no fertilizer. They make other products, various kinds of things that are used in various kinds of industries—in medicines, and so forth—and they have a by-product, the cyanamide, that is sold and used in small quantities by manufacturers of fertilizer. It is just an incident to their business, as I understand it.

But I rose to make a statement to the Senator from New York as to his criticism of the committee bill in its limitation of power. I want to tell the Senator how that came in. Of course, the committee had the bill before it was reported by me. This is one of the committee modifications. That limit was put in after the committee had put in an amendment which gave to the Secretary of Agriculture the power to lease nitrate plants No. 1 and No. 2 and all the scientific operations there if he could improve agriculture, in his judgment, in that way.

It was not in my bill originally, but when the committee put that provision in it became evident at once that it might happen that somebody, some power interest, or some subsidiary of a power company might obtain that lease, not so much for the purpose of cheapening the manufacture of fertilizer as to interfere with the distribution and sale of power. They would be willing to lose something in one way if they could keep that power out of competition with the power companies which are now operating there. So it was said that if that kind of a corporation gets in here they will demand that the Government corporation have control of all of the power when they do not need it.

We assumed that if the Secretary of Agriculture was doing it, being a Government officer, of course he could not ask for any more than he needed. We were informed by our experts that in all their experimentations and in the operation of plant No. 1 for the purpose of trying out their laboratory tests they never would need as much as 25,000 horsepower. In fact, we all became convinced from the statements of chemists who have testified that the tendency of improvement now and for years in the cheapening of fertilizer has been to use less and less power. The cyanamide process down there to operate that plant for explosives will take between 80,000 and 100,000 horsepower. The same work could probably be done by modification of the Haber process with 25,000 horsepower. But we thought that in the limitation we were very liberal.

If the Senate wants to take out of the committee bill the leasing proposition, giving the Secretary of Agriculture the power to lease, then I think we ought to take that matter all out of the bill. If they want to leave the leasing power in there, then there is danger if we take it out, as I think the Senator can see, that some sinister motive may be brought about by some interested parties if they should succeed in getting such a lease that might cripple the power end of it.

Mr. COPELAND. I think the explanation is entirely satisfactory. It explains, of course, why the limitation was placed there.

Mr. SMITH. Mr. President—

Mr. COPELAND. I will yield to the Senator from South Carolina in just a moment. Personally, I am opposed to the leasing because that ties up the project, and so I would hitch to the provision to strike out the limitation on the amount of power the removal of the clause permitting the leasing, and then we would be entirely agreed, I am sure.

Mr. NORRIS. If the Senator will permit me to interrupt him again, I hope the Senator will proceed by the other route and let the Senate settle whether we are going to lease or not. If we do, it will follow that the other will be stricken out, I think, as a matter of form. Personally I agree with the Sen-

ator on the leasing proposition. The committee thought otherwise, and it was put in. I might say that at a subsequent meeting during this session of Congress for an hour or an hour and a half the question was discussed. We took no action. The committee members were not all there, but there was a good attendance. So far as any opinion was expressed at that meeting, every member expressed the opinion that he thought we ought to take out the leasing provision and also the limitation of power. So I am inclined to think a majority of the committee, after listening to the debate, are rather convinced upon that subject.

Mr. EDGE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from New Jersey?

Mr. COPELAND. I will yield to the Senator from New Jersey in just a moment. I promised the Senator from South Carolina to yield to him in order that he might answer a question, and I will then gladly yield to the Senator from New Jersey.

Mr. SMITH. I did not care to assume, with the knowledge I had of this matter, to contend with the Senator about plant No. 2, at Muscle Shoals, now ready for full capacity of the plant, so I went into the telephone booth and called up the Bureau of Soils. I am loath always to repeat both my question and the answer over the telephone. I would rather prefer to have submitted my question in writing and had the answer in writing, but I am sure the officer there understood what my question meant.

I said, "A question has arisen on the floor of the Senate as to whether the nitrogen produced in cyanamide form at Muscle Shoals as a source of nitrogen for commercial purposes to be mixed in our ordinary commercial plant is on a competitive basis with other sources of nitrogen." He said, "Yes; more than competitive. It is cheaper than other sources of nitrogen." I think he will repeat that over his signature.

Mr. NORRIS. But that does not demonstrate still that we could make it cheaper than anybody could make fertilizer.

Mr. SMITH. They use it to make fertilizer, of course.

Mr. NORRIS. There are many other sources of nitrogen that are conceded to be much more expensive.

Mr. SMITH. Let me say this, if the Senator from New York will allow me, and then I am through. There are comparatively few sources of nitrogen available for fertilizer purposes or any other purpose. I asked if the 40,000 tons of fixed nitrogen that could be produced right now at plant No. 2 was in a form that could compete with other sources of nitrogen. He said, "Yes; more than compete. It is cheaper than any other source." That is from the department itself.

Mr. EDGE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from New Jersey?

Mr. COPELAND. I am glad to yield to the Senator from New Jersey.

RECLASSIFICATION OF POSTAL SALARIES—VETO MESSAGE

Mr. EDGE. May I ask the Senator from New York if he will permit me to present a unanimous-consent agreement in relation to a vote upon the veto on the postal salary bill? In order to do so, it will be necessary to call for a quorum in the usual way, but I am going to make an effort to secure unanimous consent. I have a proposition to make, and if the Senator will indulge me so that the roll may be called, I will take advantage of that opportunity.

Mr. COPELAND. The matter is so important that I certainly should not want to interfere with it at all. I yield to the Senator from New Jersey for that purpose.

Mr. EDGE. Mr. President, I suggest the absence of a quorum.

Mr. CURTIS. I suggest that the unanimous consent be presented first.

The PRESIDENT pro tempore. If the Clerk calls the roll first, it may be it will require another roll call in order to decide on the unanimous-consent request.

Mr. ROBINSON. I suggest that the proposal be read and then it will not be necessary to call the roll a second time.

Mr. EDGE. Following the suggestion of the President pro tempore I will present the unanimous-consent request, which I ask may be read at the desk.

The PRESIDENT pro tempore. Does the Senator from New York yield for that purpose?

Mr. COPELAND. I do.

The PRESIDENT pro tempore. The unanimous-consent request presented by the Senator from New Jersey will be read.

The reading clerk read as follows:

UNANIMOUS-CONSENT AGREEMENT

It is agreed by unanimous consent that at the conclusion of the routine morning business on the calendar day of February 2, 1925, the Senate will proceed to the reconsideration and final disposition of the bill (S. 1898) reclassifying salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes, heretofore returned by the President of the United States without his approval; that no Senator shall speak longer than one hour on the bill, and that, if the bill is not finally disposed of on that calendar day, thereafter no Senator shall speak more than once or longer than 10 minutes upon the bill.

The PRESIDENT pro tempore. The Clerk will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ball	Ferris	McKinley	Sheppard
Bayard	Foss	McNary	Shipstead
Borah	Frazier	Mayfield	Simmons
Brookhart	George	Means	Smith
Broussard	Glass	Metcalf	Smoot
Bruce	Hale	Moses	Stanfield
Bursum	Harrell	Neely	Sterling
Butler	Harris	Norbeck	Swanson
Capper	Harrison	Norris	Trammell
Caraway	Hedlin	Oddie	Underwood
Copeland	Howell	Overman	Wadsworth
Couzens	Johnson, Calh.	Pepper	Walsh, Mont.
Cummings	Jones, N. Mex.	Phillips	Watson
Curtis	Kendrick	Randall	Weller
Dial	Keyes	Reed, Mo.	Willis
Dill	Ladd	Reed, Pa.	
Edge	McKellar	Robinson	
Fernald			

The PRESIDENT pro tempore. Sixty-nine Senators have answered to the roll call. There is a quorum present. The Secretary will again read the proposed unanimous-consent agreement.

The reading clerk read as follows:

It is agreed by unanimous consent that at the conclusion of the routine morning business on the calendar day of February 2, 1925, the Senate will proceed to the reconsideration and final disposition of the bill (S. 1898) reclassifying salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes, heretofore returned by the President of the United States without his approval; that no Senator shall speak longer than one hour on the bill, and that, if the bill is not finally disposed of on that day, thereafter no Senator shall speak more than once or longer than 10 minutes upon the bill.

Mr. EDGE. Mr. President, the object of the proposed unanimous-consent agreement is, I am sure, obvious. Since the present session of Congress convened we have received a report on the ascertainment of the costs of handling the various classes of mail matter. That cost ascertainment has disclosed rather astonishing facts. The Post Office Department reports a loss of \$132,000,000 in the handling of various classes of mail matter as against a profit in the handling of first-class mail matter of \$80,000,000, with other items, making a net loss of \$39,000,000 in handling the various classes of mail matter. That presents to Congress, in my judgment, a problem which should be given careful consideration.

I am firmly of the opinion, and have expressed it on many occasions, that the salary bill which passed almost unanimously at the last session of Congress is an entirely fair and justified measure and should become a law; but in view of the fact of this additional information demonstrating, in my judgment, that the revenues should be increased, it seems to me it is our duty to make every effort to try to meet that situation.

I have suggested in the proposed unanimous-consent agreement a vote on February 2, for the purpose of giving Congress somewhat over a month, in order to try to give consideration at least to the subject of increasing the revenue of the Post Office Department.

Mr. McKELLAR. Mr. President—

Mr. EDGE. I shall be glad to yield in just a moment if the Senator will permit me to conclude my observations.

It will not in any way prejudice the salary bill should Congress vote February 2. The measure is retroactive in its terms; the salaries are payable, going back to July 1, if the bill becomes a law, and if this agreement is entered into it simply gives Congress the additional opportunity of considering this very important problem of increasing revenues in the Postal Service. It is further perfectly obvious if this bill remains the unfinished business, which it will do under the unanimous-consent agreement if entered into, and be taken up and finally disposed of on the date mentioned, it will in the meantime have some helpful effect on the enactment of revenue-

increasing legislation. In my judgment salary-increasing legislation and revenue-increasing legislation as well are accomplishments much to be desired.

Mr. DILL. Mr. President—

Mr. SWANSON. Mr. President, will the Senator from New Jersey yield to me?

Mr. EDGE. I yield first to the Senator from Washington [Mr. DILL], who first addressed the Chair.

Mr. DILL. I yield to the Senator from Virginia.

Mr. SWANSON. How can the Senator from New Jersey expect to get this bill through if he delays its consideration until the 2d of February and it shall on that date be merely the unfinished business? Any appropriation bill can then displace it, and when it shall have been displaced the Senator will have accomplished nothing except a delay until the 2d of February, and then a further delay from day to day.

Mr. EDGE. But this is a highly privileged matter, as the Senator from Virginia well knows, and nothing could displace it under the unanimous-consent agreement. It must be disposed of, so far as the Senate is concerned, under any ordinary estimate, in two days.

Mr. SWANSON. No; the proposed unanimous-consent agreement does not say the bill must be disposed of in two days. It seems to me that should the Senate consent to the unanimous-consent agreement it will be invited into a situation where we shall not secure a vote on the bill.

Mr. EDGE. I am not in the slightest degree worried about that. If the Senator from Virginia will review the history of the Senate under such agreements, he will find that a limitation of debate to 10 minutes for each Senator and permitting a Senator to speak but once on the subject has always resulted in a final disposition of a measure within a reasonable time.

Mr. SWANSON. But, as the Senator will note, the proposed unanimous-consent agreement, to which he has apparently consented, does not prevent a Senator from speaking on other matters. If this bill shall be laid aside, and an appropriation bill shall be taken up, it will lose its position as the unfinished business.

Senators can talk for hours and hours on an appropriation bill. If the Senator should insert a provision that at the end of three days the bill shall be disposed of, it would be effective, but it seems to me that all we should get under this proposed unanimous-consent agreement would be a delay in action on the bill until the 2d of February.

The proposed unanimous-consent agreement contains a limitation of debate on the bill which it is designed to cover, but not upon other matters.

Mr. EDGE. I have not the slightest objection to putting in a limitation of three days, but I can not agree at all with the construction of the Senator from Virginia as to the result of the unanimous-consent agreement as it now reads. If the measure can not command the vote of a majority of the Senate in order to keep it from being displaced, it is perfectly obvious it can not command a two-thirds vote of the Senate to pass it over a veto. Once under consideration as the business of the Senate, as is provided in the proposed unanimous-consent agreement, the limitation of speeches is clearly set forth, and I can not conceive why there should be any question as to there being a final vote upon the measure in two days at the outside. I do not want the bill to be put in such a position that any possible question, however remote, could be raised. I am perfectly ready to add a limitation of three days.

Mr. SWANSON. The Senator from New Jersey has charge of the bill and it is a measure for the passage of which he seems to have taken the responsibility; but under this proposed unanimous-consent agreement as it will finally operate on the 2d of February, with all the legislation then pending, and no agreement to keep the bill before the Senate until disposed of, I am simply going to prophesy—and I hope he has assurances on the other side of the Chamber that the prophecy will not be realized—that he will not secure the enactment of this bill into legislation before Congress adjourns on the 4th of March next.

Mr. EDGE. Then, how does the Senator construe the words "final disposition"?

Mr. ROBINSON. Mr. President, will the Senator from New Jersey yield to me?

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from Arkansas?

Mr. EDGE. I yield.

Mr. ROBINSON. I do not think the proposal of the Senator from New Jersey is open to the criticism that it will not provide with practical certainty for a vote on the bill at this session. The provision of the proposed unanimous-consent agreement is that during the first day, which is the 2d of February, on which the bill is considered, debate is limited; that is, that no Senator

shall speak longer than one hour; and at the end of that day another limitation goes into effect, to wit, that no Senator shall speak longer than 10 minutes. It is distinctly provided in the proposed agreement that the bill shall be finally disposed of.

If it is not disposed of by the end of the 2d day of February, on the 3d day of February or on any day thereafter that it may be considered no Senator shall speak longer than 10 minutes nor more than once. The total length of time to be consumed in debate, if every Senator availed himself of the privilege of debate provided for in the unanimous-consent agreement, would be 10 minutes each for 96 Senators, if every seat in the Senate were filled. So I believe the unanimous-consent agreement, if entered into, will make it certain that the bill will be voted on and finally disposed of. If it has virtue, that is the virtue of the proposal.

Mr. REED of Missouri. Mr. President—

Mr. ROBINSON. I yield to the Senator from Missouri, if the Senator from New Jersey will permit me.

Mr. EDGE. I yield.

Mr. REED of Missouri. The Senator has a copy of the agreement before him. I will ask does it say calendar day or legislative day? It should say calendar day, because there might be no legislative day of February 2.

Mr. ROBINSON. It says on the calendar day—

Mr. REED of Missouri. Very well.

Mr. ROBINSON. Which makes certain that no legislative fiction can prevent the bill from being proceeded with on the second day of February.

Under this agreement, which is just as specific, I think, as an agreement could be made, on the second day of February the bill will be taken up; any Senator who can get the floor may speak an hour on it, but no longer; and at the end of that day, which would mean midnight on the second day of February, if debate should be continued and the bill is not disposed of by that time, the limitation of 10 minutes goes into effect, and no Senator may speak more than once.

Mr. SWANSON. Mr. President, I should like to ask the Senator for his view of such a situation as this which might arise: Suppose a motion is made to proceed to the consideration of some other measure, which, if agreed to, would displace this bill as the unfinished business. Is there any limitation of debate on such a motion?

Mr. EDGE. Mr. President, I have already suggested that if a majority of the Senate is prepared to consider other business at any time there will be no use of proceeding further with the measure. So far as I know a unanimous-consent agreement couched in similar language has never operated to prevent debate on any subject in the world that Senators see fit to debate.

Mr. SWANSON. So the Senator is in this attitude if this agreement shall be entered into, that when the debate is commenced under the 10-minute rule a motion may be made to proceed to the consideration of any other measure, for filibustering purposes or otherwise, and there will be no limitation on the debate on the second motion which, if agreed to, would displace this measure as the order of business.

Mr. EDGE. Will the Senator from Virginia point out any previous unanimous-consent agreement that has prevented a Senator from speaking on any subject upon which he desired to speak?

Mr. SWANSON. The only way to make it effective is to provide that at 3 o'clock on a certain day the Senate shall proceed to vote and that the roll shall be called. Then there can be no filibustering. Senators can talk up to that time, and then the Chair will order the roll to be called. There is no such provision included in this proposed agreement.

Mr. EDGE. As I have indicated several times, I thought this proposed unanimous-consent agreement was double-barreled. It says "until final disposition" in one place and "until finally disposed of" in another.

Now, if there can be any successful question raised, I do not want that question to exist. I am giving two days' opportunity for debate, or more, using the word "thereafter." I am entirely satisfied to have the unanimous-consent agreement perfected by stating that a vote shall be taken not later than February 4 at 12 o'clock.

Mr. ROBINSON. I make no objection to that modification. The difficulty, if it is regarded as a difficulty, suggested by the Senator from Virginia, can be obviated by providing that the bill shall be kept before the Senate until finally disposed of.

Mr. EDGE. The simpler the language the better.

Mr. DILL. Mr. President, I want to know whether this unanimous-consent agreement as drawn shuts out a motion to refer this bill back to the committee, such as the Senator from South Dakota is said to have intended to make.

Mr. EDGE. My impression is that there are no unanimous-consent agreements that would shut out a motion to do almost anything.

Mr. DILL. Why does the Senator postpone this matter until the 2d of February, which is within a month of the date of adjournment? Why could it not be advanced to the 2d of January? I raised the question here on Wednesday, before the Muscle Shoals matter came before the Senate, about getting a vote on this question, and I was assured that we would have a chance to vote. A few days ago the Senator tried to get a unanimous-consent agreement for a vote to-day, I think, or to-morrow, and that was denied, and he announced that he would move to take up the question at the earliest opportunity. Now he comes here with a proposition for unanimous consent to postpone it until 30 days before the end of the session.

Mr. EDGE. Mr. President, I make that proposition in the interest of the final success of the bill. I might say that in considering this unanimous-consent agreement I have gone to the trouble—very properly so, I think—of consulting many men who are interested in this legislation.

Mr. ROBINSON. Mr. President, may I ask the Senator a question?

Mr. EDGE. The Senator may.

Mr. ROBINSON. It would be interesting to know whether the legislative representatives of the postal employees who are here are in sympathy with the proposal which the Senator submits.

Mr. EDGE. So far as I have been able to ascertain—and I think I know most of them—they are unanimously in sympathy with the proposition. I do not want any thought or inference to exist that if this unanimous-consent agreement is denied, so far as I am concerned, there will be any unavoidable delay in calling for a vote. Just as I said a few days ago, I shall call for a vote as soon as the rules of the Senate will permit; but in the interest of the legislation, in the interest of trying to solve two big problems, in the interest of trying to meet a situation which I recognize should be met, I believe that this unanimous-consent agreement serves a double purpose, and serves it well.

Mr. DILL. What assurance can the Senator give us that legislation to raise this revenue will be passed to remove the objection?

Mr. CURTIS. Mr. President—

Mr. EDGE. I yield to the Senator.

Mr. CURTIS. The bill is now being prepared and will be introduced no later than day after to-morrow, and we hope it will be introduced to-morrow.

Mr. SWANSON. Introduced where?

Mr. CURTIS. Here in the Senate.

Mr. SWANSON. A bill raising revenue can not originate in the Senate. It must originate in the House.

Mr. CURTIS. If the bill is so worded that it can not originate here, arrangements will be made for its introduction in the House of Representatives.

Mr. SWANSON. The Senator knows full well that there is a constitutional inhibition against a bill to provide revenue originating in the Senate. Then you are arranging this matter under the idea that something will occur in the House and the bill will come over here?

Mr. CURTIS. The Senator from Kansas is well aware of the fact that revenue bills must originate in the House; but the Senator has said that if the bill is so worded that it can not originate in the Senate it will be introduced in the House and every effort will be made to get it through before the 2d day of February.

Mr. ROBINSON. Mr. President, I think I ought to say, with the permission of the Senator who has the floor, that the subject matter of the legislation which has just been mentioned by the Senator from Kansas, and to which the Senator from New Jersey referred, is a very large one; and I have not the slightest idea that such a measure can be considered and disposed of by either or both Houses of Congress prior to the date upon which it is proposed that this final vote shall be taken. In all justice to every interest and issue involved in this matter it can not be expected that legislation revising the postal rates on second-class mail matter—a subject bitterly controverted and occasioning intense dispute—can be acted upon between now and the 2d of February.

Mr. EDGE. But, Mr. President, at least we can make the effort, and practically, I think, we will have just a little more stimulus in making the effort by adopting this course.

Mr. ROBINSON. May I ask the Senator, then, this question? If on the 2d of February it appears that little or no progress has been made with the bill to which he has referred,

providing for revision of the rates on second-class mail matter, what effect would that have on the vote on the postal employees' salary bill?

Mr. EDGE. Mr. President, of course, I can not answer the question of the Senator from Arkansas, so far as effect is concerned, but under the unanimous-consent agreement the vote on the salary bill must be taken.

Mr. ROBINSON. May I ask the Senator another question?

Mr. EDGE. The Senator may.

Mr. ROBINSON. In the Senator's opinion and the opinion of others interested in the final disposition of this veto message and the bill involved in it, is it true that the fate of the bill is intimately associated with the enactment of additional legislation prior to the passage of the postal employees' salary bill?

Mr. EDGE. I would not put it just that way, because I do not know. I am not prepared to answer the question directly. I can only repeat what I have said before, that the two are so intimately related that I assume, and I am sure the Senator would assume, that some Senators and some Members of the House—many, perhaps—would feel better satisfied if the revenue was produced with which to meet this additional salary or at least an effort made to produce it.

Mr. ROBINSON. Does not the Senator agree with me that it is practically certain that the bill to which he has referred as raising additional revenue in the Postal Service will not be passed by the 2d of February?

Mr. EDGE. I feel very doubtful as to whether it will be passed or not; but if the effort has been made, we will be certainly moving in the direction of trying to solve that problem. I, of course, can not tell whether it will be passed or not.

Mr. ROBINSON. It may be suggested as worthy of consideration that if the bill is to be postponed in order to give an opportunity to pass other legislation, and that legislation is not passed, its failure may be urged as a reason for the final defeat of the legislation. I make that suggestion.

Mr. DILL. Mr. President, if the motion is made to take up the bill for consideration at the earliest opportunity and the bill is passed over the President's veto there will be an added incentive to pass the bill to raise revenue. Is not that a fact?

Mr. EDGE. Does the Senator want to assume the responsibility of having a vote at an early date?

Mr. DILL. The Senator, if he had his way, would have had a vote on the second day of this session. The Senator is not in favor of postponing this thing until the administration can line up enough men against it to defeat it.

Mr. EDGE. The Senator, who as the sponsor of the bill has been given the mistaken title of assuming charge of the bill, wants to see the bill a law, and he believes that this method is the surest way of reaching that result.

I hope the unanimous-consent agreement will receive the approval of the Senate.

Mr. McKELLAR. Mr. President, will the Senator yield for a question before he takes his seat? The Senator from New Jersey and the Senator from Kansas have both said that a bill was going to be introduced, either here or in the House, to increase the revenue, based upon a report recently received from the department. As we all know, that means second-class mail matter. Are the Senator from New Jersey and the Senator from Kansas going to advocate an increase in the rates on second-class mail matter?

Mr. CURTIS. Mr. President, the Senator from Kansas will pass upon the measure when it is presented.

Mr. McKELLAR. I did not think the Senator would say that, and I do not believe either Senator is going to vote in favor of increasing the rates on second-class mail matter; so we are doing a useless thing in postponing the matter.

Mr. EDGE. I might observe that however the Senator from Kansas or the Senator from New Jersey may vote, it does not in the slightest degree change the status of this veto message. The vote through this agreement is definitely provided for, and the Senators will have an opportunity to vote for or against it. As it is to-day, it is not definitely provided for. I can make my motion and will make my motion, and what will happen to the motion I, of course, do not know.

Mr. CARAWAY. Mr. President, may I ask the Senator from New Jersey a question?

Mr. EDGE. The Senator may.

Mr. CARAWAY. I think the Senator is perfectly within his rights in refusing to commit himself on what he will do when certain legislation comes before the Senate; but I want to ask the Senator if the legislation contemplates increasing the rate on newspapers? Is that the bill that is in contemplation?

Mr. EDGE. I have not seen a copy of the contemplated bill, and have not the slightest knowledge of its provisions. I can answer the Senator only from general recollection of the recommendations made to our committee last spring, when we were considering this general subject. At that time there was, as I recall, provision made for a gradual increase in practically all of the classes provided for, except first class.

Mr. CARAWAY. May I just add that I certainly hope the Senator will be in charge of the legislation. I presume he will be.

Mr. EDGE. No; the Senator will not be in charge of the legislation. He has retired from the Post Office Committee and is busy in other directions.

Mr. CARAWAY. I am expressing the hope that there will be no attempt to make it impossible for people who happen to live a bit remote from the places of publication of newspapers to have an opportunity to read them. I hope there will be no contemplation of trying to make it more expensive to get daily papers. They have become not a luxury but a necessity.

Mr. EDGE. I might point out to the Senator from Arkansas, in connection with his observation in regard to the rates, that the Post Office Department reports a profit of over \$80,000,000 in handling first-class matter; so that can be given careful consideration by the committee in considering revenue-increasing measures.

Mr. COUZENS and Mr. REED of Missouri addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from New Jersey yield; and if so, to whom?

Mr. EDGE. I yield to the Senator from Michigan.

Mr. COUZENS. Mr. President, I want to say to the Senator that I think this matter may as well be disposed of now, because I shall object to this unanimous-consent agreement until I know something about how the revenue is proposed to be raised. I am heartily in favor of the revenue being raised from the increase in rates on second-class matter before agreeing to postpone the consideration of this bill until February 2, and I shall object.

Mr. DILL. We have no assurance that there will be any legislation.

The PRESIDENT pro tempore. Objection is made to the proposed unanimous-consent agreement. There is nothing before the Senate. The Senator from New York is entitled to the floor.

Mr. REED of Missouri. Mr. President—

Mr. COPELAND. I yield to the Senator from Missouri.

Mr. REED of Missouri. Mr. President, with the indulgence of the Senator from New York, as the matter just under discussion may come up again, I should like to say just a word about it. I think it is not hard to see through it.

To-day, if we are called on to vote, we will vote on the plain question whether the veto shall be sustained or not sustained. If you postpone it 30 days and hook it up with a proposition to raise the rates of postage upon second-class matter, when the veto message comes before us with that other bill not yet disposed of you will have every, or nearly every, newspaper in the country here fighting the proposition, because it will be proposed to make them pay, by increased postage, for the increases in the salary. Now, if I wanted to sustain the President's veto, the first thing I would do would be to get with me in that fight a lot of men who would be financially interested and who would be put in the position of saying, "In order to raise this revenue you are going to tax us unjustly," and inject into the question the whole problem of whether the rates on second-class matter ought to be raised, and debate that question. It is perfectly plain to me that this is a very fine way to get a great force at work to sustain the President's veto.

Mr. STERLING. Mr. President, if the Senator will permit, I do not quite understand the argument in that regard.

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from South Dakota?

Mr. COPELAND. I yield.

Mr. STERLING. It would seem to follow logically that if we propose an increase of rates on certain classes of mail matter for the purpose of raising revenue then these very interests of which the Senator speaks would be in favor of passing the bill over the veto so that there would be no necessity for increasing the rates in order to raise the revenue.

Mr. REED of Missouri. If we raise the wages of these men by the bill which has been vetoed, we must have more revenue, so it is stated. Now it is proposed that we shall postpone action upon the veto until the bill has been introduced to raise the revenue; it will not have been passed by the 2d day of

February. When you will have that situation, every man who is opposed to paying the increased revenue for hauling his papers or his magazines will want to see the veto of the President sustained, so that there will be no necessity for him to pay an additional rate. I think that ought to be plain enough to be understood. Under those circumstances the friends of this measure ask to have a consent of this kind granted.

Moreover, while my friend the Senator from Kansas [Mr. CURTIS] very properly says that he will not commit himself upon a bill until he has seen it, he is nevertheless asking us to commit ourselves on this bill in consideration of the fact that a bill which he says he does not know whether he will support or not is going to be introduced and passed; when it will not be passed in the Senate by the 2d of February, with the opposition of the Senator from Kansas, who is the leader on the other side of the Chamber.

Mr. EDGE. Will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from New Jersey?

Mr. COPELAND. I am still yielding.

Mr. REED of Missouri. I will be through in a moment.

Mr. EDGE. How does the Senator from Missouri figure out that there would be less of a vote to override the veto on February 2 if the suggested revenue bill fails? How could it in the slightest degree, according to his logic—

Mr. REED of Missouri. It is not going to fail; it is going to be pending right here.

Mr. EDGE. Assuming that it fails, or that it shall not have passed, how would it change the mind of a Senator who felt that the salary increase was justified and had so recorded himself at the last session of Congress? How would it in the slightest degree influence him to vote against the veto? He would vote against it to-day, would he not, just as much as he would February 2? Conditions are the same to-day as they would be then, according to the Senator's statement.

Mr. REED of Missouri. If he votes on it to-day, he votes to increase the salaries, and the money will have to be obtained from some place, if it is not already available here. I strongly suspect it is already available. I strongly suspect this is a mere subterfuge somebody got up for the purpose of killing this measure. But we can vote on the measure now on its merits. Then we can fight out the question hereafter of where the money is to come from. But I will answer the Senator's question in this way; the moment you say that we are going to take it out of the publisher of second-class matter, that moment the second-class matter publisher will be here. He is going to see Senators, and he is going to say, "You propose to penalize the press of this country for the purpose of paying this increase and we protest against it," and the result of it will be that the newspaper man will have his friends and his influence here. If you leave him out of the question by voting on this thing now, he will not be here, in all probability.

Mr. EDGE. Where does the Senator propose to secure the income?

Mr. REED of Missouri. I propose to pass on that question when we get to it. Here we have this singular situation. We are blandly asked to put this proposition over in order that a bill may be introduced here, and introduced in the House if necessary, and then the Senator from Kansas, the distinguished leader on the Republican side, tells us that he does not know whether he is going to support it or not. That is not the kind of an assurance on which I propose to submit to the delay in voting upon this bill.

More than that, I have been in the Senate long enough to know what presidential influence means, when you can have about 30 days in which to work on the sensibilities of Members, and we must not forget that we have had a recent example of disciplinary methods being employed for Members of the Senate who have had the temerity to differ from an administration. It can not be forgotten that for failure to support the President in the election two or three very distinguished Republicans have been led by the ear to the door and incontinently kicked out of the Republican holy of holies.

So I am wondering now what is going to be the fate of the distinguished Senator from New Jersey. I believe he was one of the leaders in the expulsion movement of these men. Because they voted against the President in the election, they are excommunicated and can sit no longer with the brothers. Yet here is my friend from New Jersey, who voted for that action and supported it, so I am informed, who proposes to tell us now that he is strong enough to stand steadfast for 30 days in his purpose to vote against his President upon a veto here in the Senate. I am astounded at his courage and temerity.

Mr. DILL. Does not the Senator think there is a twilight zone into which some of these Senators might be placed, instead of being cast into outer darkness?

Mr. EDGE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from New Jersey?

Mr. COPELAND. I think I will continue my short speech.

The PRESIDENT pro tempore. The Senator from New York declines to yield.

Mr. EDGE. If I may have the indulgence of the Senator—

The PRESIDENT pro tempore. The Senator from New York declines to yield.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. COPELAND. Mr. President, my speech really has not amounted to much this afternoon, but at least my possession of the floor, and my yielding spirit, have made it possible for my colleagues to carry on considerable debate. I am disposed now to finish my remarks relating to Muscle Shoals. I think that was the subject under consideration when we broke off to take up the debate on other matters.

The discussion of the chemistry involved in the making of fertilizer, and the interruptions of various Senators to express opinions on this particular subject, indicate to me more than ever the fact that we need more time to consider this great project.

I think it would be most unfortunate, Mr. President, simply because we do not know what else to do with Muscle Shoals, to lease it for 50 years. It is possible that out of that plant there might grow some development of the fertilizer project, that out of that plant might grow a guaranty of sufficient fixed nitrogen to make explosives. But if this property were to go into private hands any research carried on for the cheapening of fertilizer would be the property of some private corporation. It would not belong to the Government.

So, Mr. President, I hope that out of this discussion may come some agreement in the Senate, not necessarily to adopt the bill presented by the chairman of the committee but either to accept that bill, with such provisos as are necessary to make it a workable bill from every standpoint, or else to strike from the substitute offered by the Senator from Alabama the section which provides for leasing the property.

We have made progress in the development of the fertilizer business and we will continue to make progress. The country needs cheap fertilizer. Everybody agrees that it can be made at Muscle Shoals. Both the bills provide for the making of it there, but I think we ought to proceed under some plan which will make certain that all the progress which is made, all the inventions which grow out of the operation of this property, shall be owned by the citizens of our country. It is necessary for the development of the farm lands that we shall have this cheap fertilizer. We do not want to put this in private hands so that ultimately there may be some question as to the price which may be charged for it.

Mr. McKELLAR. Mr. President—

Mr. COPELAND. I yield.

Mr. McKELLAR. Suppose the Underwood substitute shall be agreed to and the public utilities commission of the State of Alabama should fix a rate which would make it profitable for the Alabama Power Co. to use all of the power in the State of Alabama, assuming the Alabama Power Co. should get the plant. How much power to regulate would the State utilities commission of any other State have? In other words, if the amendment is agreed to as it is now the only public utilities commission in the Union with power to regulate prices would be the Alabama State utilities commission, of course. It could not be regulated by other commissions until the power actually got into other States. So what we would be doing would be to take this great national asset and turn it over to

the State of Alabama, and then, if the company ever wanted to use it outside of Alabama, the other State commissions would have some power over it, but until it was used out of the State of Alabama no other commission would have any power to regulate, of course. That would follow, certainly. So that what we would be doing by this amendment, if we agreed to it, would be to turn over this great national project to the State of Alabama first, and if all of the power were used in that State no other State would have any right to it at all.

Mr. COPELAND. In reply to the Senator from Tennessee I can only speak for myself. I am here to say that so far as I am concerned I shall never vote for the bill until there is inserted in it a proviso that the rates shall be fixed, no matter whether the power is used in Alabama or somewhere else, and at present we have no such assurance.

Mr. McKELLAR. The Senator means by the United States Government?

Mr. COPELAND. Yes; and written into the bill.

Mr. McKELLAR. Why, of course.

Mr. COPELAND. These questions all indicate what I have referred to time and time again, that the Senate has not determined, has not crystallized its thought, is not ready to settle the question. So I say, let us go ahead, let the War Department finish the property, finish the dam and develop these plants. Let the Agricultural Department go on with its experimentations, and then two or three years from now or five years from now we will not be tied up with a lease running for 50 years, taking out of the hands of our people the benefits to be derived from the operation of the plant, and will be free then to make suitable disposition of the property. I hope that the Senate will exercise wisdom in dealing with the project. Let it be completed by the Government, for the time being let it be operated by the Government, and in that way we will be guaranteed a supply of power, we will be guaranteed a supply of fertilizer, we will be guaranteed a supply of nitrogen for the purpose of making explosives. The Government and the people will be protected. We will not be tied up with a lease which we may regret six months after the contract is entered into. For my part I beg the Senate not to take any hasty action which would result in a lease for a long period of time to private interests and the deprivation on the part of the people of their rights in the matter of this great project at Muscle Shoals.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Mississippi.

Mr. WADSWORTH. May we have the amendments stated again?

The PRESIDENT pro tempore. The Clerk will state the amendments proposed by the Senator from Mississippi.

The reading clerk read as follows:

On page 2 strike out lines 3 to 5, inclusive, and insert in lieu thereof "also Dams Nos. 2 and 3, located in the Tennessee River at Muscle Shoals, power plants, auxiliary steam plants, all hydroelectric and operating appurtenances."

On page 4, after line 14, transpose section 8 of the substitute.

On page 4, line 20, strike out "being" and insert in lieu thereof "shall be."

On page 4 strike out line 25, and through the period in line 6 on page 5, and insert in lieu thereof "The lessee shall pay as the annual rental for use of such properties an amount not less than 4 per cent of the total amount expended by the United States in acquisition, construction, and completion of Dams Nos. 2 and 3, and the purchase and emplacement of all machinery, gates, or other metal parts or material used in the construction of locks, dams, and power houses."

On page 5, line 10, strike out "said Dam No. 2 and," and insert in lieu thereof "Dams Nos. 2 and 3 and for."

On page 5, line 14, strike out "Dam No. 2" and insert in lieu thereof "as soon as practicable Dams Nos. 2 and 3."

On page 5, line 17, after "into," strike out through "lease," in line 18, and insert "and such property is turned over to the lessee in accordance with the terms of the lease, the lessee shall maintain such property."

On page 9, line 7, strike out "Dam No. 2" and insert in lieu thereof "Dams Nos. 2 and 3."

On page 9, line 8, strike out "plant" and insert in lieu thereof "plants."

On page 12, line 10, strike out all after the period through the period in line 14.

Mr. HARRISON. Mr. President, I merely desire to say that the amendments were drawn in collaboration with the draftsmen and are merely for the purpose of adding Dam No. 3 to the scheme. The 4 per cent interest is not to be figured on Dam No. 3 until Dam No. 3 is delivered to the lessee. I have sub-

mitted the amendments to the Senator from Alabama [Mr. UNDERWOOD], and I think they meet his approval.

Mr. UNDERWOOD. I will say that I understand the Senator's main amendment; he merely transposes my provision in reference to Dam No. 3 from the latter part of the bill to page 4 of the bill. There is one amendment I want to ask him about, however. I do not think there is any question that the provision just referred to where it stands relates to the lessee just as well as it does to the corporation, but some Senators have raised the question that if it is in the latter part of the bill it may relate only to the corporation and not to the lessee. I do not care to have any doubt about that proposition. I intend that it should relate both to the lessee and to the corporation, and therefore I have no objection to that amendment. That is merely a technical proposition.

The real proposition is that, although I provide for the authorization and not the appropriation for the building of Dam No. 3, I did not provide for its cooperation with Dam No. 2, because if it was not built I merely provided that Congress should hereafter provide the necessary legislation. The Senator from Mississippi in his amendment seeks to provide that when completed it shall cooperate with the same work, whether lessee or corporation, on Dam No. 2. Personally I have no objection to that. I did not put it in my amendment because I did not want to overload the bill. I thought it might create some objection, but if the Senate wants it in there is no objection on my part at all. I have never had any objection to that provision. It is merely a question as to whether we shall act now or later on, and I am perfectly willing to act now.

The question I desire to propound is as to the amendment proposed on page 5. The balance of the amendments are merely changing where it reads "Dam No. 2" to read "Dams Nos. 2 and 3" throughout the bill, to make the main amendment of the Senator conform to the language of the bill. However, on page 5, line 17, it now reads:

That after the lease is entered into the lessee shall maintain the property covered by lease in good repair and working condition for the term of the contract.

I do not exactly understand what change the Senator desires to make at that point.

Mr. HARRISON. It strikes out after the word "into" down to the word "lease," in line 18, which would be striking out the words "the lessee shall maintain the property covered by the lease," and inserts the words "and such property is turned over to the lessee in accordance with the terms of the lease, the lessee shall maintain such property."

Mr. UNDERWOOD. Without saying anything about "in good repair and working condition"?

Mr. HARRISON. It leaves that language in. That is left just as it is now. I put in the words "and such property is turned over to the lessee in accordance with the terms of the lease," and so forth. I have not omitted the part the Senator wanted in there.

Mr. UNDERWOOD. That is all right, then.

Mr. SMOOT. The Senator simply adds the words "in accordance with the terms of the lease."

Mr. HARRISON. That is all.

Mr. HOWELL. Mr. President, the proviso that is added on page 2 of the amendment offered by the Senator from Mississippi, having reference to page 4 of the amendment offered by the Senator from Alabama [Mr. UNDERWOOD], would strike out line 25 thereof, and so forth. Then it will be noticed that, beginning with line 18 of the amendment offered by the Senator from Mississippi, there are certain lines stricken out and this language substituted therefor:

Provided, That the rental for said dams, or either of them, hereinbefore provided for shall become operative upon their delivery to the lessee ready for operation.

Mr. HARRISON. If the Senator will permit me, I have modified my amendment, and the words "ready for operation" are stricken out. I did it in the hope that it might remove the objection the Senator has. It now reads:

Provided, That the rental for said dams, or either of them, heretofore provided for shall become operative upon their delivery to the lessee.

Mr. HOWELL. But the question is, What is the condition of the dams to be when turned over? Let us consider Dam No. 2. There is a provision in the design for 18 penstocks, with turbines and the electrical generators in connection therewith. Only eight power units are being installed. However, the eight that are being provided will generate 200,000 hydroelectric horsepower. Remember, that the primary power of this dam

is only 100,000 horsepower. It might occur that the lessee would not want to accept Dam No. 2 until it was entirely completed, with each of the 18 penstocks provided with turbines and electrical machinery. I can see very plainly how the contract might be so drawn that the lessees could refuse to accept the property until such a time, and would not be responsible for the rental until then.

I think it ought to be made very clear that what we are turning over to the lessee is what Congress has thus far made provision for; that is, a combined water power and steam plant capable of producing 200,000 primary horsepower. The Muscle Shoals enterprise has cost about \$150,000,000 and I feel, inasmuch as we are to turn over this much property at the outset to the lessee, there ought to be nothing in the lease contract that would bind the United States to put another dollar into the property unless Congress should subsequently see fit to do so. We ought not now to tie the hands of Congress in any contract to construct Dam No. 3 and equip Dam No. 2 with the additional 10 power units until we see what the lessee will proceed to do with the dam equipped for the development of 260,000 horsepower.

This is a mere business proposition. Congress can not justify itself in handling the matter any differently from the way in which any Member of the Senate would handle it if he as owner were dealing with a prospective lessee. Under the amended amendment as now proposed by the Senator from Alabama [Mr. UNDERWOOD] it is provided that no fertilizer need be made for two years. In the third year 10,000 tons of fixed nitrogen must be made; in the fourth year 20,000 tons of fixed nitrogen; in the fifth year 30,000 tons; and in the sixth year and annually thereafter 40,000 tons. If we turn over this property that has cost \$150,000,000, with 200,000 primary horsepower, sufficient time will elapse before more power is needed for fertilizer purposes to enable Congress to determine whether the lessee is carrying out the contract in the spirit in which Congress expects it to be carried out. I am sure that if any one of the Senators here present owned this great plant and was about to lease it, he would not put a provision into the contract that bound him to expend \$40,000,000 or \$50,000,000 more when he did not know exactly what would be necessary, and could not know until after the contractor had the plant in operation for four or five years.

To meet this situation I have provided an amendment as follows:

That nothing in this contract shall bind the United States Government to construct Dam No. 3.

We ought to have our hands free. The contractor ought not to be in a position to stand back and say to us, irrespective of how he fulfills his contract, "You must build Dam No. 3."

Do the Senators realize that this proposal does not provide under what conditions the proposed lease would be forfeited or terminated? If the contractor fails to carry out the terms of the lease, what is the remedy of the United States Government? A suit at law for damages under the provisions of the contract as stipulated in the substitute offered by the Senator from Alabama. The Senator from Alabama, nor I, would not make such a contract as that for ourselves.

Mr. UNDERWOOD. If the Senator will allow me to interrupt him for just a moment, I will say that there is no provision in regard to the forfeiture of the lease in my substitute, except that the lease is to be forfeited if, under the terms of the contract, the contractor does not make the nitrogen and fertilizer. I take it that when the Secretary of War and the President make the lease they will provide the proper terms for its forfeiture.

Mr. HOWELL. Mr. President, I remember that Congress passed an amendment to an act that made a grave impression upon my mind when first I came upon the floor of the Senate last session, and that was for the lease of the naval oil reserves. Senators here admitted, when they reread that amendment, that proper safeguards had not been inserted; that the Secretary of the Navy probably had the authority to lease those oil reserves as he did; and criticism of the Senate was expressed by Members of this body because of the fact that such a loosely drawn law had been enacted. Should the Senate of the United States after so short a period forget that lesson?

We are nothing but a board of directors, and when we lay down premises respecting a lease to be made, and limit those premises, what can we expect that an administrative officer will understand? That we intended that the lease should be on such terms, if he could do no better? If we should turn this matter over to the President with power to act, and not limit

him as to how he should act, then the responsibility would lie wholly on the President. He would then be on his guard to make such a lease as could not be criticized. We are dividing responsibility in partially indicating how this lease should be drawn. If we prescribe any provisions whatever, we should incorporate all that are vital and which can be introduced in this measure without the slightest trouble or complication.

Mr. UNDERWOOD. Mr. President, will the Senator yield to me?

Mr. HOWELL. I will.

Mr. UNDERWOOD. As the substitute is now written, as I stated a while ago, there is an authorization for the building of Dam No. 3, but it is not in any way whatever tied up with this lease. If the Senator will observe the provision in reference to it it is a mere authorization. Probably, in order to make it entirely clear, I had myself better read the paragraph to the Senator. It is on page 15, and reads:

SEC. 8. That the Secretary of War is hereby authorized and directed to complete the construction of Dam No. 3 in the Tennessee River at or near Muscle Shoals, Ala., in accordance with report submitted in House Document 1242, Sixty-fourth Congress, first session: *Provided*, That the Secretary of War may in his discretion make such modifications in the plans presented in such report as he may deem advisable in the interest of power or navigation.

SEC. 9. That upon the completion of Dam No. 3 by the United States, the dam, power plants, machinery, and appurtenances thereto shall be leased or operated in conjunction with Dam No. 2 as provided for in this act on such terms as Congress shall hereafter provide.

So that there is no power, as the substitute now stands, for the President to include Dam No. 3 in the contract which he is authorized to make.

Mr. HOWELL. Mr. President—

Mr. UNDERWOOD. Just a moment. The proposal of the Senator from Mississippi [Mr. HARRISON] is to put Dam No. 3 in the contract. The measure as it stands has that question guarded, because it is still in the power of the Congress.

Mr. HOWELL. I am speaking of the amendment of the Senator from Mississippi.

Mr. UNDERWOOD. Of course, if we should put Dam No. 3 in, then it would come within the terms of the contract; there is no doubt about that.

Mr. HOWELL. I should like to ask the Senator from Alabama if he would be willing to accept an amendment as follows. On page 16, line 5, after the word "provide" to insert the following:

But no contract herein provided for shall bind the United States to construct said Dam No. 3.

Would the Senator from Alabama be willing to accept this amendment?

Mr. UNDERWOOD. I should very much prefer not to have the amendment of the Senator from Mississippi go in on those terms, because those terms are not necessary as the substitute now stands. I think it would leave the whole matter in so nebulous a state that a contractor would not under those circumstances know as to whether or not he was going to get Dam No. 3, and he could not, therefore, make a bid; in other words, he might make a bid that was not commensurate with the value of Dam No. 3. That would leave the situation open where the lessee would be entirely at sea as to what he was bidding for, because it would be left for the future action of Congress.

Mr. HOWELL. Then, as I understand, if the amendment of the Senator from Mississippi is not adopted in the form offered, the amendment of the Senator from Alabama would not bind the United States Government to construct Dam No. 3?

Mr. UNDERWOOD. No; I do not mean that; but in my amendment Dam No. 3 has nothing to do with the contract; there is a mere authorization looking to the future. In other words, the contract which is provided for in the substitute has nothing to do with Dam No. 3.

Mr. HOWELL. Would the Senator from Alabama object to putting in the words:

But no contract herein provided for shall bind the United States to construct Dam No. 3?

Mr. UNDERWOOD. Of course, I am trying to put in an authorization which will require the coming back here to get the money. Then, if the money is provided and Dam No. 3 is completed, I provide that it shall be put in operation with Dam No. 2 only on such terms as Congress shall hereafter provide. If my substitute stands as it is, there will be no necessity whatever for the language which the Senator seeks to have inserted.

Mr. HOWELL. Assuming there is no necessity, would it do any harm?

Mr. UNDERWOOD. If the Senator wants to provide, if the substitute stands as it is, that Dam No. 3 is not to be within the terms of the contract, it would make no difference, but I see no reason for it, because when the substitute provides "on such terms as Congress hereafter shall provide," it makes it perfectly clear that nothing can be done, not with its building, but with its operation, until Congress shall so provide. The language the Senator would use would negative the question of authorization.

Mr. HOWELL. I beg pardon; not at all. All that I propose by my amendment is that no contractor can come forward and urge that he understood that under the terms of this statute when enacted he was also to have Dam No. 3; in other words, that he could call upon Congress to construct Dam No. 3. I believe that we ought not to bind ourselves in any way to do it. We can later go ahead and do it if we want to.

Mr. UNDERWOOD. The Senator means as far as the contractor is concerned?

Mr. HOWELL. As far as the contractor is concerned.

Mr. UNDERWOOD. There is nothing in my bill as it stands now that would authorize a contract to be made with anybody about Dam No. 3. Of course, if the Senator's provision is adopted, then there would be authority. That is the reason why he is putting it in—because mine does not. My provisions do not authorize the consideration of Dam No. 3 in the contract. The Senator from Mississippi [Mr. HARRISON] is proposing to put it in, so that it will come within the terms of the contract; but if it does come within the terms of the contract I do not think you would get a contract if you said to the lessee, "You may make a contract about this, but you do not know whether you are going to get Dam No. 3 or not." I do not think that could be done effectively.

Mr. HOWELL. But the Senator's bill provides that if Dam No. 3 is constructed the contractor shall have Dam No. 3.

Mr. UNDERWOOD. No; it does not; and if there is any doubt in the Senator's mind in regard to section 9 I should very much prefer to have him move to strike out section 9 and just let the authorization stand, which does not dispose of it at all, rather than to put in language which may be confusing.

That upon the completion of Dam No. 3 by the United States the dam, power plants, machinery, and appurtenances thereto shall be leased—

Not now, but after their completion; it contemplates a future lease.

Mr. HOWELL. But it is to the same contractor.

Mr. UNDERWOOD. It provides that they—

shall be leased or operated in conjunction with Dam No. 2 as provided for in this act on such terms as Congress shall hereafter provide.

The contractor can not get anything out of that or can not contract in reference to it until Congress hereafter passes a law.

Mr. HOWELL. I understand that; but suppose Congress built the dam and the contractor said, "We will not agree with the provisions that you make." Are you going to let the dam stand idle and do nothing with it?

Mr. UNDERWOOD. No; then Congress could provide for its sale or operation in some other manner.

Mr. HOWELL. The contractor might go into court and say, "Under this contract I understood that I was to have Dam No. 3, and now Congress makes the terms so onerous that I can not take it over."

Mr. UNDERWOOD. I will say to the Senator that I am not wedded to section 9. If the amendment of the Senator from Mississippi [Mr. HARRISON] goes through, then, of course, I think his amendment would destroy what the Senator is trying to do.

If it does not go through and the Senator is desirous of having section 9 stricken out, I do not object to it. I only want the authorization. If he thinks that stands in the way, I should prefer to strike it out than to put in the language that he has.

Mr. HOWELL. As this particular feature is not before the Senate now I should like to have an opportunity to consider this matter and take it up later.

Mr. President, it seems to me that the Senate ought to consider particularly what this property is, its present condition, and the arrangements that have been made for its completion, so that there may be nothing in this measure that could in any way bind the United States to install the 10 additional power units in connection with Dam No. 2, because the units already provided for can develop 240,000 horsepower. Therefore we should be extremely careful about adopting an amendment of this kind, offered by the Senator from Mississippi

[Mr. HARRISON], which might defer the time when a lessee would begin to pay for the use of this property on the ground that these additional 10 power units had not been installed.

The PRESIDENT pro tempore. The question is upon the amendment offered by the Senator from Mississippi [Mr. HARRISON] to the substitute offered by the Senator from Alabama [Mr. UNDERWOOD].

Mr. HARRISON obtained the floor.

Mr. McKINLEY. Mr. President—

Mr. HARRISON. I yield to the Senator from Illinois.

Mr. McKINLEY. I ask the Senator from Mississippi if he will accept and add to his amendment the words which I send to the desk.

Mr. HARRISON. Let the language be read.

The PRESIDENT pro tempore. The Secretary will read the matter referred to.

The READING CLERK. It is proposed to insert a new section, as section 6, to read as follows:

In order to provide for a larger amount of primary power to be developed on the Tennessee River, if a suitable site or sites can be found upon investigation where practical storage reservoirs can be obtained at reasonable cost, the Secretary of War is directed to take the necessary steps to secure such sites and to build the necessary dams for the impounding of water therein. If the Secretary of War, under authority of this act, constructs one or more dams for the purpose of impounding the waters of said river, he shall give due consideration in the construction of such dams to the development of hydroelectric power, to the necessities of navigation, and flood control.

The PRESIDENT pro tempore. Does the Senator from Mississippi modify his amendment as suggested?

Mr. HARRISON. Mr. President, I am so vitally interested in the other amendment that I am perfectly willing to accept this proposition. I believe it is carrying out a general scheme that should be carried out; but if there are some objections to it, and if it should complicate my amendment, I should not want to modify my amendment to that effect.

Mr. WADSWORTH. Mr. President, I think the Senator had better disagree to the suggestion. I think we ought to have some limit to this thing.

Mr. HARRISON. If there is objection, very well.

Now, Mr. President, I should like to take just a few moments upon my amendment.

I thought the objection of the Senator from Nebraska was to the wording of the proviso with respect to turning over these dams to the lessee; but I find that his objection goes to the root of the proposition, and what he is objecting to is incorporating Dam No. 3 with Dam No. 2 in making the lease. So I differ absolutely with the Senator on that proposition, and therefore I was a little surprised at what he said. Now let us see about this proposition.

Every bid that has been made to the Secretary of War to carry on this development, except that of the Union Carbide people, has incorporated Dam No. 2 and Dam No. 3. Ford, the Alabama Power Co., the Hooker and Atterbury people, all the bidders except the Union Carbide Co. have incorporated Dam No. 2 with Dam No. 3. I think the Senator from Nebraska [Mr. NORRIS] would agree that the two propositions should be incorporated.

May I say that if you are going to obligate a lessee, according to the Underwood proposal, to manufacture 40,000 tons of fixed nitrogen annually, and you do not place Dam No. 3 in this contract, it will be absolutely impossible for them to carry out the terms of the proposition. They can not mix the nitrogen and the phosphoric acid on the amount of power that would be developed from Dam No. 2 alone.

Mr. HOWELL. Mr. President—

Mr. HARRISON. If the Senator will just let me proceed for a few minutes to make myself clear, I shall appreciate it.

There is the map, drawn by the experts and not contradicted, showing that in order to develop 241,000 primary horsepower at Dam No. 2 and Dam No. 3 you must employ at least two steam plants—the steam plant that was located at the Gorgas plant, which has now been sold, and the steam plant at nitrate plant No. 2. Indeed, there is 120,000 horsepower that is developed from steam power; and if you take Dam No. 2 and Dam No. 3 together, excluding the steam power developed, you get only 121,000 primary horsepower. The experts say that in order to make 40,000 tons of fixed nitrogen annually, fertilizers of every kind, mixing it with the phosphoric acid and the various other elements according to the Underwood proposal—because it says you have to furnish fertilizers, mixed and unmixed, of every kind—it will take 257,000 primary horsepower. If you do not incorporate in this proposition Dam No. 3, it will be impossible for a person who bids upon the proposition to carry out the

terms of the proposal. So I submit that whatever is done in this legislation, Dam No. 3 should be incorporated in it.

I do not change the wording of this proposal one iota from the provisions that are embodied in Dam No. 2 by incorporating Dam No. 3. The rentals of 4 per cent annually are not to apply until the dam is delivered to the particular lessee, if a lease shall be made. So I submit, Mr. President, that this amendment should be adopted if we want to make this thing a success at all.

Mr. JONES of Washington obtained the floor.

Mr. HOWELL. Mr. President—

Mr. JONES of Washington. I yield to the Senator from Nebraska. I understand that he desires to ask unanimous consent for a reprint.

Mr. HOWELL. I do desire to ask for a reprint of the amendment of the Senator from Mississippi [Mr. HARRISON]; and, in addition, I should like to ask a question of the Senator from Mississippi. Does the Senator understand that under the terms of the amendment of the Senator from Alabama [Mr. UNDERWOOD] it will be incumbent upon the lessee to manufacture phosphoric acid?

Mr. HARRISON. Yes; fertilizers of every kind, mixed and unmixed.

Mr. HOWELL. I am talking about phosphoric acid.

Mr. HARRISON. If the Senator will just permit me, I have no doubt in the world that if we had left in the wording which was stricken out yesterday, "according to demand," it would have incorporated phosphoric acid, because the words were put in there at the instance of the Committee on Agriculture of the House on request of Mr. Ford to meet that very situation—that whatever the farmers demanded in fertilizer up to that which might be made out of 40,000 tons of fixed nitrogen, whether it was phosphoric acid or sulphate of ammonia or what not, it should be made—and I think yet that the words "according to demand" should be reincorporated in this bill, and then there would be no question in the world about it. I do not think there is any question about it now, and I know you will not have any phosphoric acid if Dam No. 3 is not incorporated.

Mr. SMITH. Mr. President, I think that if the word "demand" had been transposed and made to refer to what the Senator from Mississippi has just said—that on demand of the farmers for certain kinds, it should be furnished—it would be all right; but where it was placed it left doubt as to what was meant.

Mr. HARRISON. It may be that the language was ambiguous.

Mr. SMITH. Yes.

Mr. HARRISON. But the idea, the intention of it, was that it should meet the demands of the farmers for the kind of fertilizer that they demanded and required.

Mr. SMITH. Yes; but the word was unfortunately placed in the sentence, and I think it ought to be restored at the proper place, so as to carry out the idea that it should be on demand of the farmer.

Mr. HOWELL. Mr. President, I would like further to ask the Senator from Mississippi respecting phosphoric acid. Unless compelled to make phosphoric acid a lessee will not require the amount of horsepower which the Senator has just suggested.

Mr. HARRISON. That is quite true. The figures I gave—257,000 primary horsepower—included the question of producing phosphoric acid.

Mr. HOWELL. The Senator thinks they ought to make phosphoric acid?

Mr. HARRISON. I do.

Mr. HOWELL. I intend to offer an amendment, and would like to have the Senator's support. I propose to offer an amendment providing that phosphoric acid shall be produced equal to at least two and one-half times the tonnage of fixed nitrogen provided for. That would provide merely for 3-8-3 fertilizer.

Mr. HARRISON. I would want to look into that proposition, because that might not be enough phosphoric acid.

Mr. HOWELL. I am willing to increase the amount of phosphoric acid. Of course, if it were 2-8-2, it would have to be 4 tons of phosphoric acid to 1 ton of fixed nitrogen.

Mr. HARRISON. The Senator and myself are driving toward the same goal.

Mr. HOWELL. We certainly are; but I do not think this substitute, as now worded, requires the lessee to make phosphoric acid.

Mr. HARRISON. Will the Senator wait and hold that question, and allow this amendment to be adopted? Then

we can fight out that question, and I for one shall certainly join with him in the proposition. I want to see phosphoric acid made there, and if the words "according to demand" had not been stricken out, I have no doubt in the world that it would have been.

Mr. HOWELL. I would agree with the Senator respecting Dam No. 3 if it were not for this fact: The manager of the Alabama Power Co. has testified that when the Muscle Shoals project is completed, and ready to deliver 200,000 primary horsepower, steam-electric and hydroelectric, that this development on the Tennessee River combined with the development on the Tallapoosa River, each supplementing the other, that the primary horsepower of Muscle Shoals will be increased 150,000 horsepower; furthermore, that the primary horsepower on the Tallapoosa River will be increased 64,000 horsepower.

It must be very apparent that it is not necessary to build Dam No. 3 in order to get 257,000 horsepower, because the plant on the Tallapoosa River is to be finished in 1926. With the primary power now provided for at Muscle Shoals, and the 75 per cent increase due to the combination of this development with the Tallapoosa project, the primary power at Muscle Shoals would be increased from 200,000 to 350,000 horsepower. That is why I do not think it is necessary for Congress to bind itself at this time in this contract to build Dam No. 3, until we find out what the lessee will do with this 350,000 horsepower that will be available in the next two years.

Mr. HARRISON. Will not the Senator allow us to take a vote on my amendment to-night?

Mr. HOWELL. I have asked that my amendment be printed.

Mr. JONES of Washington. Let me say to the Senator from Mississippi that the Senator from Tennessee [Mr. McKellar] stated that he desired to speak at some length on the amendment. So it is evident that the Senate can not dispose of this amendment to-night. Has the order for a reprint of the amendment, asked for by the Senator from Nebraska, been made?

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JONES of Washington. I ask unanimous consent that when the Senate concludes its business to-day, it take a recess until 12 o'clock to-morrow.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

EXECUTIVE SESSION

Mr. JONES of Washington. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 4 o'clock and 55 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Friday, December 12, 1924, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 11 (legislative day of December 10), 1924

GOVERNOR OF THE PANAMA CANAL

Col. Meriwether L. Walker to be Governor of the Panama Canal.

MEMBER OF THE FEDERAL FARM LOAN BOARD

Albert Calvin Williams to be a member of the Federal Farm Loan Board.

POSTMASTERS

LOUISIANA

Estelle S. Keller, Collinston.
Edna Byrd, Glenmora.
William C. Reynolds, Ida.
Edith E. Steckler, Jeanerette.
Octave H. Deshotels, Kaplan.
Albert A. Thoman, Monroe.
Ophelia L. Willis, Pearl River.
Frank G. Rieger, Scotlandville.
Lillie Schexnaider, Sellers.
Charles W. Page, Shreveport.
George M. Tannehill, Urdania.
Thomas C. Reagan, sr., Winnsboro.

MISSOURI

William Vogel, De Soto.
Carl W. Hutchison, Leeds.

John F. Burrell, Mountain View.
Albert L. Brady, Oran.
Lizzie A. Rademaker, Parma.

NEBRASKA

Arthur F. Jarman, Ashland.
Eugene V. Hickok, Atkinson.
Laura M. Baird, Cairo.
Earl J. Hughes, Concord.
Alexander E. Etting, David City.
Henry L. Nichols, Lebanon.
William Mankin, Lisco.
Mamie Mathews, Marsland.
George W. Whitehead, Mason City.
Walter I. Farnham, Merna.
Henry D. Grady, O'Neill.
Etta H. Bartlett, Potter.
Margaret Bolan, St. Columbans.
Olaf H. Larson, Shickley.
Mabel E. Bigelow, Ulysses.
Sara I. Barritt, Union.
George E. Barto, Wakefield.
Murry K. Holley, Waverly.
Lillian A. Elliott, Westpoint.
George H. Holdeman, York.

NEW YORK

Richard J. Higgins, East Rockaway.
Clarence J. Weyant, Fort Montgomery.
Roy M. Hackett, Hornell.
Edwin W. Cushman, Kenka Park.
James Agnew, Lake Ronkonkoma.
Edith L. Kent, Tuxedo Park.
Anna M. Smith, West Albany.
Loie C. Husted, Woodhull.

SOUTH DAKOTA

Matilda Peterson, Agar.
Dana N. Bonesteel, Artesian.
Nellie M. Sullivan, Athol.
Ezra J. F. Lamkee, Avon.
Loretta M. Stromme, Garretson.
Robert H. Benner, Gary.
Adam F. Glaser, Herrick.
Harry O. Starksen, Hetland.
Harry K. Sanborn, Hurley.
Oscar D. Hansen, Irene.
Leland K. Stoddard, Parker.
Fred Chesley, Platte.
Joseph W. Gibson, Salem.

VERMONT

Hiram E. Rowe, Barnet.
William H. C. Whitcomb, Forest Dale.
Ethel E. Churchill, Quechee.
Irwin Mattison, South Shaftsbury.
Otis B. Dauchy, Townshend.
Kenneth A. Foster, Wolcott.

HOUSE OF REPRESENTATIVES

THURSDAY, December 11, 1924

The House met at 12 o'clock noon.
The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O God of wisdom, God of love, Thou art the way, the truth, the life. Do Thou unite us in knowledge and in purpose that our service to our country may be full of thoughtful consideration. Always keep us in sympathetic touch with human relationships and human needs. Meet us in the way of duty and make it plain and sure. In all the best demands of life may we take our pledge to live and to labor for the good. May we pass through these days with hearts of gladness and with spirits that serve, and thus may we lift some burden, lighten some load, and brighten some way. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, one of its clerks, announced that the Senate had passed without amendment bills of the following titles:

H. R. 7052. An act for the relief of Geston P. Hunt; and
H. R. 8687. An act to authorize alterations to certain naval vessels and to provide for the construction of additional vessels.

AGRICULTURAL APPROPRIATION BILL

Mr. MAGEE of New York. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 10404) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1926, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 10404, with Mr. TREADWAY in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the Agricultural appropriation bill. When the committee rose on Tuesday it had completed the reading of the bill down to and including page 30. The Clerk will resume the reading at page 31.

The Clerk read as follows:

FOREST SERVICE

SALARIES

For the Chief Forester and other personal services in the District of Columbia in accordance with the classification act of 1923, and for personal services in the field, \$3,825,003.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that I may proceed out of order for five minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to proceed out of order for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. ANDERSON. Mr. Chairman, I rise to say what I had intended to say during the general debate. I was unavoidably absent on Tuesday.

As most of the Members of the House know, March 4 will end my public service and this will probably be the last time I shall have the privilege of cooperating in the passage of an Agricultural appropriation bill. I do not want to let this occasion pass without expressing my appreciation of the generous and kindly cooperation which I have received at all times from the members of the subcommittee, the members of the Committee on Appropriations, and the Members of the House in general on both sides of the aisle. I particularly want to express my appreciation to the gentleman from New York [Mr. MAGEE], who has taken charge of this bill last year and this year. I appreciate the fact that he has done this under rather difficult circumstances, especially last year, because he had no opportunity for prior preparation, which is so desirable, if not necessary, in conducting a bill through this body.

I should deprive myself of a very great pleasure and my colleagues of a tribute which is due them if I did not say that my contacts and associations with the Members of the committee and the House have been of the most kindly and cordial character. I can not say I leave public life entirely without regrets. I have enjoyed my public service beyond measure, but my chief regret will be in severing the ties and the relationships which I have had with the Members of the committee and the House, and the memory of these relationships and friendships will be among the most treasured memories of my life as I leave this place on March 4. [Applause.]

Mr. BUCHANAN. I ask unanimous consent to proceed out of order for three minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed out of order for three minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BUCHANAN. Mr. Chairman and gentlemen, it is with profound regret that I contemplate the loss to the public service of the invaluable services of the gentleman from Minnesota [Mr. ANDERSON]. It has been my pleasure to have been associated with him in subcommittee work on this bill, and it has been my observation that on every measure he considered only the merits of that measure and the good to result to the country at large from any appropriation made to carry it into effect. In his deliberations upon the committee I can truthfully say that he regarded not sections, he regarded not party, but responded to the impulse of what he conceived to be his duty to act for the best interests of the Nation. The agricultural interests of this country suffer a great loss by reason of his retirement from this House. [Applause.]

Mr. WASON. Mr. Chairman, I ask unanimous consent to proceed out of order for three minutes.

The CHAIRMAN. The gentleman from New Hampshire asks unanimous consent to proceed out of order for three minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. WASON. Mr. Chairman, it was my good fortune during the early days of my membership in this body to be assigned to a committee of which my friend and colleague SYDNEY ANDERSON was a member. From that time until this date circumstances have kept us close together in committee work.

I rise at this time to emphasize every word of praise that has been spoken by Mr. MAGEE of New York and Mr. BUCHANAN of Texas, in behalf of the public service of Mr. ANDERSON. As a member of the committees where I have served with him and under him, I have always found him a genial, courteous, and capable advocate of the best interests of the agricultural development of this country.

He possessed a clear mind, a keen intellect, and it is rarely discovered that any Member of this body understands more clearly the pressing needs and demands of agricultural development than the gentleman from Minnesota [Mr. ANDERSON].

I personally am sorry that he is to leave us. I regret to think of the day when my friend will not go with us further in helping legislation and providing appropriations in the interests of agricultural development. In his new vocation I know we all wish him the marked success that he has enjoyed during his service in this House and hope that his new activities may be as pleasant and successful as his service here. God speed him in his new work. He leaves with our sincere regrets and our highest esteem and appreciation. [Applause.]

The Clerk read as follows:

GENERAL EXPENSES, FOREST SERVICE

To enable the Secretary of Agriculture to experiment and to make and continue investigations and report on forestry, national forests, forest fires, and lumbering, but no part of this appropriation shall be used for any experiment or test made outside the jurisdiction of the United States; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for the treeless regions; to erect necessary buildings: *Provided*, That the cost of any building purchased, erected, or as improved shall not exceed \$1,500; to pay all expenses necessary to protect, administer, and improve the national forests, including tree planting in the forest reserves to prevent erosion, drift, surface wash, and soil waste, and the formation of floods, and including the payment of rewards under regulations of the Secretary of Agriculture for information leading to the arrest and conviction for violation of the laws and regulations relating to fires in or near national forests, or for the unlawful taking of, or injury to, Government property; to ascertain the natural conditions upon and utilize the national forests, and the Secretary of Agriculture may, in his discretion, permit timber and other forest products cut or removed from the national forests to be exported from the State or Territory in which said forests are respectively situated; to transport and care for fish and game supplied to stock the national forests or the waters therein; to employ agents, clerks, assistants, and other labor required in practical forestry and in the administration of national forests in the city of Washington and elsewhere; to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service; to purchase necessary supplies, apparatus, office fixtures, law books, and technical books and technical journals for officers of the Forest Service stationed outside of Washington, and for medical supplies and services and other assistance necessary for the immediate relief of artisans, laborers, and other employees engaged in any hazardous work under the Forest Service; to pay freight, express, telephone, and telegraph charges; for electric light and power, fuel, gas, ice, and washing towels, and official travelling, and other necessary expenses, including traveling expenses for legal and fiscal officers while performing Forest Service work; and for rent outside of the District of Columbia, as follows:

Mr. FISHER. Mr. Chairman, I move to strike out the last word. I ask unanimous consent to extend my remarks, and also to insert a brief article by Doctor Coville on experiments in rododendron culture, which I think is very interesting and relates to the blueberry culture.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD and insert an article by Doctor Coville. Is there objection?

There was no objection.

Mr. FISHER. Mr. Chairman, in the hearings before the committee there is some discussion relative to the blueberry industry. It is shown that in one State the value of the crop from the blueberry fields where they grow wild is over \$2,000,000. There is the same situation in other States where the

profuse fruiting of the bushes brings about an interesting and paying industry. There is probably no other wild fruit in our country which grows so freely and produces so abundantly such a delicious fruit. Throughout the South there is the huckleberry, while not of the same plant family is close kin and the fruit is much alike.

It is a matter of serious consideration if a pest has been found which if let alone would destroy this source of food. The hearings before the committee show that a fly is attacking the fruit of the blueberry in certain sections of Maine. It is gratifying to know that the committee has responded to the call of the Department of Agriculture and inserted a provision under which an investigation will be made as well as efforts to destroy this attack.

The blueberry industry, which extends into a great many sections, has been investigated by the Department of Agriculture, and for many years they have experimented with both the blueberry and huckleberry. The results have been most successful. The bulletins published by the Department of Agriculture give details of the series of experiments with blueberry seedlings brought about by hybridization. It will be seen that in the early efforts of experimentation back in 1906, in the limited quarters, there was evidence of great improvement. There were made discoveries of the soil requirements. It was proven that a much larger and more attractive berry could be produced. The work in Washington in the restricted quarters demonstrated there was a promising field for development. The Government expanded the work by leasing a field in New Jersey where, with outdoor space of many acres and favorable soil conditions, there was an opportunity for great development. Different varieties of hybrids were grown and larger berries produced. A group of varieties was produced with favorable bearing qualities. The berries had been increased to a much larger size which can be appreciated when it is stated that they are about the same size as the familiar Concord grape. This was a great accomplishment.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for three minutes. This is the most eloquent speech I ever heard on the subject of blueberries. [Applause.]

Mr. FISHER. From a wild, fruit-bearing bush our Government experts produced a beautiful, luscious fruit, which will mean much to our markets. Commercial growers are planting orchards to fill a demand which will await them. There is one farm in New Jersey where 50 acres are under cultivation, and a good part of this is producing large quantities of berries which are quickly sold to markets in neighboring cities.

This would indicate the development of a big, paying industry. These experiments resulting in so fine an accomplishment were conducted by Dr. Frederick Coville, of the Bureau of Plant Industry, together with colleagues from other branches of the department, particularly of the Bureau of Soils.

Important and interesting as this valuable contribution is, produced by rare skill in hybridization, it means much to the development of all plant industry, for there was also discovered much knowledge relating to soil requirements. These experiments produced facts which extend to many other interesting plants. For instance, it was found that the blueberry and huckleberry require an acid soil, and that other valuable plants, much prized in the field of horticulture, have the same requirements. In sections of our country where the soil is either neutral or alkali in reaction, the many efforts by gardeners to grow such plants as azaleas, rhododendrons, and kalmia latifolia or mountain laurel have failed. That is a familiar condition in many parts of our country, and the efforts to raise these attractive shrubs have been abandoned.

THE DIFFERENCE BETWEEN A HALF-ROTTED AND A FULL-ROTTED OAK LEAF

Many of these unfortunate experiments are personally known to me, both in my garden as well as my neighbors'. This problem of how to make blueberry, huckleberry, azaleas, and other such plants grow in a soil which is apparently hostile seems to have been solved through these experiments. If acid soil can not be obtained to substitute for the soil with the alkali reaction, then there is recommended the removal of the soil and the substitution of a mixture partly of half-rotted oak leaves (the red oak preferred) with sand at given proportions with the native soil; also other things are suggested to continue and increase the amount of acidity in the soil. These plants when planted according to the directions and well cared for seem to thrive, where theretofore they withered and died. There are also experiments being made

in the use of a chemical. The processes and methods of use are clearly presented in a number of articles written by Dr. Edgar T. Wherry, of the Bureau of Soils, who has been a party to the investigations of the soil needs of the blueberry.

And the most interesting feature of the findings was the discovery that the red oak leaf is a source of help in keeping a naturally nonacid soil in a more nearly acid condition. Everybody is familiar with the red oak. The good fortune is mine to live in a neighborhood where there are many grand red oak trees—in my own yard there is a wonderful twin red oak. The leaf of this tree in the fall is large, brown, and has a leathery look. It is slower to rot than other leaves, and through the process of degenerating, which takes from one to two years, unless aided by different methods, it retains an acid condition which is transmitted to the soil where it is rotting. When the rotting leaf reaches a stage called leaf mold it has somehow changed to an alkali reaction and no longer would it be of value to the plants described, unless mixed with leaves at an earlier stage of decomposition, which is accomplished by adding new leaves from time to time. It is to be understood that there are many beautiful plants which would revel in a supply of any kind of leaf mold and do not require a special soil. All of this adds great interest to those who would welcome a new and attractive fruit and the knowledge given in the findings as to methods of overcoming soil difficulties which have hitherto been almost a bar to the cultivation of many plants in different sections of our country. [Applause.]

Under the leave to extend I insert the following article by Doctor Coville:

EXPERIMENTS IN RHODODENDRON CULTURE
(By Frederick V. Coville, March 20, 1923)

In the course of a series of experiments with blueberry seedlings, 1906 to 1910, it was found that these plants require an acid soil. (Experiments in blueberry culture, 1910, published as Bulletin 193, Bureau of Plant Industry, United States Department of Agriculture, 100 pages of text, 18 plates, 31 text figures. Now out of print.) The experiments have since been extended to many other plants and it has been shown conclusively that a very large number of species in ornamental horticulture have the same requirement. Lack of success is due to failure to provide them with the acid soil they demand. This is true especially of rhododendrons and nearly all other plants of the heather family, such as azalea, mountain laurel (*Kalmia latifolia*), trailing arbutus (*Epigaea repens*), and heather (*Calluna vulgaris*).

In nature acid nourishment is provided by the accumulation on the surface of the ground of a layer of half-rotted leaves, twigs, and rootlets. Such an accumulation, when it occurs in a sphagnum bog, is called bog peat, or simply peat. On well-drained sandy or gravelly soils it is called upland peat. Under good conditions upland peat is laced into a tenacious mat, a few inches in thickness, by the roots of the ericaceous plants that accompany it, and this mat persists year after year, continually renewing itself through each year's leaf fall and the penetration of new roots into the decaying mass. Upland peat is normally brown, but is often blackened by ground fires.

On limestone soils or on soils which for any reason have an alkaline chemical reaction upland peat does not form. The lime and other alkaline substances in the soil greatly hasten the decomposition of the leaves. Each year's leaf fall is decomposed, much of it passing in liquid form into the underlying soil prior to the leaf fall of the following year. Fully decomposed leaves form a true leaf mold, black in color and neutral or alkaline in reaction, in which rhododendrons and other acid-soil plants will not grow.

The continuation of acidity in upland peat is due to the arrest of decomposition before it has progressed to the alkaline stage, and the chief factor in the arrest is the lack of lime in the soil that underlies the leaves. When an upland peat mat is once established its own acidity is fatal to the life of the organisms that as agents of rapid decay would soon destroy its acidity.

In soils derived from granite, sandstone, sand, and gravel acid conditions are usually maintained with little difficulty by the addition of upland peat, half-rotted oak leaves, or decayed wood or bark.

Sawdust and spent tanbark are acid materials useful as mulch for acid-soil plants. They should be applied experimentally at first, however, to test the safety and suitability of the particular kind that is available. Some kinds of sawdust, notably red cedar and pitch pine, contain, when fresh, substances that are directly injurious. Other kinds, such as basswood, maple, and birch, are free from these substances. In general it is best to use sawdust that is weathered and somewhat decayed.

When an attempt is to be made to grow rhododendrons or other acid-soil plants in a place in which the soil is neutral or alkaline, such as a limestone soil, the bottom land of a river valley, the ordinary fer-

tile garden, or a prairie or arid-region soil, it is necessary to prepare holes or trenches and make up a special soil mixture. This should consist of one part of clean sand to one or two, or even four, parts of upland peat or its equivalent. To keep earthworms from bringing up the underlying soil the bottom of the hole should be lined with a 2-inch layer of soft-coal cinders. The depth of the peat and sand mixture need not be more than 8 to 12 inches. A permanent mulch of oak leaves will help maintain a proper degree of moisture, and by decomposition will add to the peat supply. If the materials for the mixture are available in quantity, a bed may be laid down over the whole surface of the ground.

A sharp distinction should be made between half-rotted oak leaves and the ordinary compost of leaves with manure, garden soil, and garden trash. Such a compost is neutral or alkaline in reaction and should not be used on acid-soil plants. Sugar maple, elm, and linden leaves rot rapidly and so soon reach the alkaline stage that they also are not desirable for application to an acid-soil planting. Oak leaves, especially red-oak leaves, rot slowly, and in two or three years, if the pile is turned over several times, make a good substitute for upland peat. (For a more extended discussion of the decay of leaves and its relation to acid soils see "The formation of leaf mold," Smithsonian Report for 1913, pp. 323 to 343.)

No manure, lime, or wood ashes should be applied to rhododendrons or other plants that require an acid soil, for all these substances tend to neutralize the necessary acidity. Cottonseed meal, ground soy beans, and spent malt, all of which contain a large amount of nitrogen in organic and acid form, are excellent fertilizers for acid-soil plants. In very sandy soils for which so little peat is available that the plants suffer for nourishment the following special acid fertilizer devised for blueberries and cranberries would probably do well for rhododendrons, applied at the rate of an eighth to a fourth of a pound per square yard. (From p. 20 of "Directions for blueberry culture, 1921," Bulletin 974, United States Department of Agriculture, 24 pp. and 29 pls.)

	Pounds
Nitrate of soda	17
Dried blood	23
Steamed bone	34
Phosphate rock	34
Potash	17

A series of greenhouse experiments in the last two years has shown that an ordinary fertile garden or greenhouse soil well suited to roses but fatal to rhododendrons can be acidified by the application of crude aluminum sulphate, and will then nourish rhododendron seedlings almost as well as peat and sand. (For a detailed account of these experiments see "The effect of aluminum sulphate on rhododendron seedlings," 1923, Bulletin 1, American Horticultural Society, 6 pages and 5 plates.)

Those experiments will be extended during the coming season to larger rhododendron and other acid-soil plants in the deeper soil of outdoor plantings. For such situations, it is believed, amounts of aluminum sulphate up to half a pound per square yard may be applied advantageously and safely if the soil is of the ordinary fertile type, the application being repeated if the soil is not made acid by the first application.

Outdoor experiments with aluminum sulphate should not be tried in mixed plantings unless it is known that all the plants are suited to a strongly acid soil, because the ordinary plants of horticulture, which thrive best in a neutral or alkaline situation, are likely to be severely injured or killed by the aluminum sulphate.

For the present the aluminum-sulphate treatment should be regarded as experimental. Those desiring to try it on sickly rhododendrons should apply it to only a portion of a planting, always leaving another portion untreated for comparison.

Limestone water, which is alkaline in reaction, will ultimately injure an acid-soil planting. Rain water or some other water that is neutral or even acid in reaction should be used if practicable. If only alkaline water is available for sprinkling purposes, it can be made neutral or slightly acid by dissolving in it a suitable amount of aluminum sulphate. The proper amount can be determined by adding to a teaspoonful of the treated water in a white dish a fraction of a drop of the dye known as bromthymol blue. If the amount of aluminum sulphate added to the water was just sufficient to make it neutral, its color under this test will be green; if it has become acid, yellow; if it is still alkaline, blue. (For an account of the method of determining the degree of soil acidity see Edgar T. Wherry, 1922, "Soil acidity—its nature, measurement, and relation to plant distribution," Smithsonian Report for 1920, pages 247 to 268, with 1 plate and 1 color chart.)

Ornamental plants vary in the degree of soil acidity or alkalinity to which they are best adapted. The preparation of authentic lists of species on this basis will necessarily be a slow procedure, the outcome of careful experimentation, but fortunately a general though not infallible guide to the need of soil acidity for a particular species is already in existence in such well-known works on gardening as Nicholson's Illustrated Dictionary of Gardening and Bailey's Standard Cyclopedia of Horticulture. European gardeners have learned from long and cumulative experience that certain plants thrive best when

supplied with peat, and this knowledge has been handed down to us in garden literature and in garden practice when conducted intelligently, but never apparently with any suggestion that the essential quality of the peat was its acidity. The statement in any reliable work on gardening that a particular species requires peat may be taken as good evidence that this species is an acid-soil plant. In very many cases, however, especially in American works, even this evidence is lacking.

Mr. CRAMTON. Mr. Chairman, I move to strike out the last word. A year ago on the way to the north rim of the Grand Canyon, traveling through the Kaibab National Forest in a late afternoon, we were treated with the sight of some hundreds of wild deer that had come down into the open spaces or parks to graze. That is one of the great attractions to the public. Those who visit the national park seem to be more interested in the wild life than they are in the spectacles of inanimate nature. Dave Rust has provided a camp in V. T. or Demott Park, one of the open spaces in the Kaibab where people are accommodated over night who desire to watch the deer that come down in the open spaces and after many years of protection from the hunter have become so tame.

The Department of Agriculture has been agitating the question of the destruction of a large number of these deer in the Kaibab Forest, alleging that the number had become so great that there was not forage enough for them. Of course, nature has been taking care of a problem like that in the wilds for a good many centuries, but the department feels that it is necessary to permit men with guns to go in and kill off the surplus of those deer. There has been some question about the working out of the plan. I have a letter from the Acting Secretary of Agriculture, under the date of December 10, dealing with the situation which I shall ask to put in the Record:

DEPARTMENT OF AGRICULTURE,
Washington, December 10, 1924.

Hon. LOUIS C. CRAMTON,
House of Representatives.

DEAR MR. CRAMTON: The department is in receipt of your letter of November 29.

It is assumed from your question that you are familiar with the efforts which have been made in the last two months to remove from this area some 15,000 surplus deer. Several plans for accomplishing this have been worked out. For your information there is inclosed a copy of the special report to the department by the committee of experts who examined the area.

There have been several news dispatches from Flagstaff, Ariz., relative to the killing of the surplus deer on the Grand Canyon National Game Preserve. The first was to the effect that hunters were being allowed to kill not to exceed three head of deer each under a cooperative permit issued by authority of the late Secretary Wallace, who approved the plan prior to his death. This plan for removing surplus animals by hunting was put into effect only after we were satisfied that the first plan, namely, the giving away of the surplus deer, was a failure.

Despite the fact that a news item offering these deer free to any one who would pay the cost of crating and hauling to the railroad was published in almost every paper in the United States, we received orders for less than 300 deer, coming from about 50 separate individuals. About November 15 heavy snows over the Kaibab region made it impossible to continue the trapping and shipment of the animals, rendering it necessary to abandon that plan for the rest of the winter.

Under the Secretary's authority, the district forester at Ogden, Utah, was authorized to open the area to hunting, as stated. This went into effect early in November and continued for several days until stopped through the action of the sheriff of Coconino County, Ariz., who, under orders from the Governor of the State of Arizona, arrested three hunters from the neighboring State of Utah for having in their possession deer meat in violation of State law. This, of course, put an end to the issuance of further permits, as hunters naturally would not apply for permit with a prospect of being arrested. During the few days hunting was carried on approximately 388 deer were killed by 151 hunters. None of the deer were fat or even in fair condition. A five-point buck, called the "monarch of the herd," weighed, dressed, 153 pounds, showing the state of flesh of most of these animals.

In the meantime on application from the State game warden a permit was issued to the Governor of Arizona by the Secretary of Agriculture, early in November, for driving a large number of the deer ranging on the east side of the Kaibab Mountain but north of the canyon across the canyon and out on the south side. It should be understood that this drive necessitates the rounding up and driving of the deer—the contract calling for not more than 5,000 head—down a steep side canyon several miles in length, along and down one of the lower branches of the canyon for about 10 miles, swimming the river, and then climbing out over a 10 to 12 mile trail to the plateau on the south side of the canyon. The department has been doubtful whether

this plan is a practicable one, feeling that with the deer in a half-starved condition the drive would be very hard on them and would result in many losses through exhaustion, drowning, etc. It would also leave those that might reach the south plateau in poor condition to take care of themselves in a strange range during the coming winter. The plan was approved, however, in the hope that it would be more successful than we anticipated, and also to a certain extent being a direct but rather drastic means of reducing the surplus numbers in the herd.

Owing to complications in financing this drive, it has not yet been put in operation, although the permit was issued by wire on November 8.

In order to expedite matters and clear up several rather complicated situations the district forester in charge of this rather intricate problem of the distribution of the surplus deer proceeded to Phoenix, where he met in conferences Governor Hunt and the State game warden of Arizona. The result of these discussions was that the governor receded apparently from his position in arresting the Utah hunters for violation of State game laws and approved the continuation of hunting under the cooperative permit plan during a season from December 1 to January 5. This decision was also announced in Associated Press dispatches within the last few days and may be the one to which you refer.

We have not as yet received full information as to the result of the district forester's conferences with the Governor of Arizona. Apparently an understanding has been reached with the State authorities which will allow the department to continue to carry out its plans for reducing this herd of deer as rapidly as is possible. We are sincerely hoping the proposed drive will be carried out successfully. Everything which the department can do has been done and will continue to be done to assist the governor and the men in charge of the drive in putting it through.

I may say further that under this cooperative plan of hunting each cooperator contributes on the basis of \$5 for each deer killed, with a maximum of three deer to each hunter. One-fourth of the amount goes to the State and three-fourths to the Federal Government to cover the cost of supervising the hunting, the State not being put to any expense whatever in handling this matter.

Sincerely yours,

C. F. MARVIN,
Acting Secretary.

Mr. CRAMTON. I have also the following letter from the department, giving data as to cattle grazing in the Kaibab:

(Fish and game, deer herd, cattle grazing)

KAIBAB, November 14, 1924.

Hon. LOUIS C. CRAMTON,
House of Representatives.

DEAR MR. CRAMTON: The department has received your letter of November 7.

I am very glad indeed to furnish you the following information regarding the grazing of livestock on the Kaibab National Forest in Arizona, together with the receipts from grazing fees for the five-year period 1919 to 1923, inclusive. The table given here shows the grazing receipts for the period covered:

Year	Cattle and horses	Sheep and goats	Total
1919.....	\$7,325.32	\$659.37	\$8,984.69
1920.....	7,361.64	524.53	8,086.17
1921.....	7,054.67	647.68	7,702.35
1922.....	3,228.97	214.24	3,443.21
1923.....	5,375.91	457.40	5,833.31
Total.....	30,745.91	2,503.22	33,249.13

The following tabulation shows the number of stock grazed from and including the year 1912 to 1923, and also the estimated number of deer using the range with the livestock:

Year	Cattle and horses	Sheep and goats	Deer
1912.....	14,000	5,000	9,000
1913.....	13,000	5,000	12,000
1914.....	12,500	5,000	(1)
1915.....	15,000	5,000	(1)
1916.....	8,947	5,000	10,000
1917.....	8,364	5,000	15,000
1918.....	9,099	5,000	15,000
1919.....	6,200	5,000	15,000
1920.....	6,260	5,000	15,000
1921.....	7,464	4,225	20,000
1922.....	7,008	2,664	20,000
1923.....	5,085	3,060	25,000

¹ No estimate.

For the grazing season of 1924, just closed, the number of stock grazed was 3,339 cattle and 3,508 head of sheep, of which 1,000 were grazed for a short period due to drought emergency. These figures cover the stock grazed by a number of near-by settlers who are absolutely dependent upon the range within the Kaibab National Forest for grazing the stock on which they depend for a livelihood. There has never been but one large company operating on the Kaibab Forest, namely, the Grand Canyon Cattle Co., a California corporation, which purchased prior rights from old established settlers who used the range many years ago before either the game preserve or the national forest was created.

When the question of competition between the deer and the livestock became acute, reductions in the numbers grazed by the Grand Canyon Cattle Co. were at once begun, until from about 15,000, which they were grazing in 1906, they have been wholly eliminated from the forest. The company has not grazed any livestock on the forest during the season of 1924, and hereafter they will not be permittees. The rest of the permittees number approximately 67 individuals. Many of them graze not more than 20 head of cattle and several as low as 10 or 12 head. Only four of their number are grazing more than 200 head.

In considering the advisability of still further reducing the number of livestock using this forest the special committee of experts who recently investigated the conditions on the Kaibab reported that the stock now being grazed there are the property of numerous small stockmen wholly dependent upon this range for the support of themselves and families and the development of their farms and that "we have not the heart to recommend that the small cattle owner be entirely eliminated." It was the unanimous opinion of the committee in discussing the question of cattle grazing on this game preserve that while there was some competition between the two classes of animals, nevertheless, a total elimination of the cattle would not be more than a temporary relief, as the rapid increase of the deer herd would soon take up the slack gained by eliminating the cattle. The committee felt that the number of deer which this herd should properly contain should be about 15,000 head, which, if handled along proper lines of game management, could be grazed on the area with safety and at the same time take care of the stock belonging to these small settlers numbering approximately 3,000 head.

Very sincerely yours,

HOWARD M. GORE,
Acting Secretary.

There is just as much sport in killing one of these deer, after so many years of protection of game in the Kaibab—just as much sport about it as there would be to go into a barnyard and kill a cow.

Mr. COLTON. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. COLTON. Is it not a fact that in that forest there has been an unusually heavy drought and the attitude of the department is that it would be better to permit some deer to be used as food than to have them die of starvation?

Mr. CRAMTON. The attitude of the department is not based on any unusual occasion in the past year, for the reason that I visited the locality in June, 1923, before these conditions came into being that the gentleman mentions, and the matter was then being agitated. It is not based on unusual conditions but it is based on their claim that there is not enough food for them. I say there is no sport in killing these deer. They have, however, in their regulations limited it and surrounded it with conditions as they would surround sport. They limit each hunter to the killing of three deer. If it is sport it should be so limited. But if the hunter is performing a public service or a service to the deer in killing the deer there is no reason for limiting each of them to three. Why let every Tom, Dick, and Harry loose at these deer, frightening all while a few hundred are killed? In authorizing this they came into conflict with the State of Arizona, which had at first refused to permit the slaughter and threatened to enforce the State law, which would result in the arrest of the hunters. That seems to have been adjusted, as the concluding paragraph of the letter of the department states. They charge each hunter a fee of \$5 for each deer that is killed; that is, with a maximum of three deer he is charged \$15.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. CRAMTON. I ask for five additional minutes.

The CHAIRMAN. Is there objection?

Mr. BLANTON. Reserving the right to object, I would like to ask the gentleman a question. I was wondering whether on the visit that the gentleman made in June he had any venison on the table?

Mr. CRAMTON. I did not. At that time they were not being killed, and I hoped then, and I hope yet, in some way there can be some arrangement by which they will not be

killed. The concluding paragraph of the letter sets forth that there has been an agreement arrived at between the department and the State of Arizona by which three-fourths of the \$5 goes to the United States and one-fourth to the State of Arizona. I do not know whether it is because the State of Arizona is to get a dollar and a quarter on each deer killed that has caused it to withdraw its opposition, but it appeals to me as a paltry financial mess. I do not know of anything that we can do to-day, but I hope the department will yet find a way to save this slaughter of 15,000 wild animals in a game preserve through so-called sportsmen. I ask leave to extend my remarks in the Record by inserting a letter from the department and some comment with reference to the situation by Mr. Mather, the director of the National Park Service, President Ivens, and others.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the Record in the manner indicated. Is there objection?

There was no objection.

Mr. CRAMTON. These gentlemen emphasize what a shame it will be to again drive these deer away from contact with man, as will result if they are hunted and find that the open spaces where they have so many years been safe have again become to them places of danger.

ARE KAIBAB DEER DOOMED?

In a recent issue of Outdoor America Stephen T. Mather, Director of the National Park Service, gave the following survey of the situation in the Kaibab, which he has frequently visited:

Fifteen thousand mule deer in the Grand Canyon National Game Preserve of northern Arizona must be removed or destroyed without delay if recommendations made by a committee appointed by the Secretary of Agriculture to investigate the conditions affecting the Kaibab deer herd are carried out. No more drastic measure in the history of game conservation in America than this has ever been proposed.

The Grand Canyon National Game Preserve was established by President Theodore Roosevelt November 28, 1906, under an act of Congress approved June 29, 1906, for the protection of wild animals in the Grand Canyon Forest Reserve. This act authorized the President of the United States to set aside areas within the Grand Canyon Forest Reserve for the protection of game animals and to be recognized as a sanctuary and breeding place. For 18 years the deer on this preserve have been protected, although the region formerly was a great Indian hunting ground. When the preserve was first established the herd comprised about 3,000 deer which had survived the hunters and predatory animals owing to favorable geographical conditions. With the protection that the deer have had, not only from man but through the killing off of predatory animals within the preserve, the estimated number of deer in 1923 made by forest officers and experts of the Biological Survey placed the number at 20,000. It was also estimated that the fawn crop had then reached the birth rate of from 5,000 to 8,000 a year, of which about one-half might be assumed to survive.

Using the estimate of 1923 of 20,000, with the survival of the 1924 fawn crop, the number of mule deer now in the forest would number about 26,000. Local people place the number at not less than 50,000.

While the game preserve includes approximately 800,000 acres, it is maintained that because of lines of natural drift only a small part of the area is utilized by the deer, and that range conditions, due to overutilization, are so poor that the deer are actually facing starvation.

The increasing number of deer is not alone responsible for depleted range conditions. The entire area has for years been intensively grazed by livestock owned by cattle companies and local settlers, the latter being partly dependent upon this range for a livelihood in that industry.

While some effort has been made to adjust competition between cattle, horses, and sheep and the increasing wild life, reductions in the number of livestock permitted to graze having been made from time to time, the range has been poorly managed. While it is maintained that cattle and horses are not competitors of the deer for forage, as the deer feed largely on browse in preference to grass, the grass within the so-called drift limits has been so badly overgrazed that it is a question whether the cattle and horses, in addition to the sheep, have not long been serious competitors with the deer for their natural forage and vice versa. Since settlement of the West began there has been constant conflict between domestic livestock and wild life for existence and wild life has steadily lost. Fortunately a new attitude toward wild life has been developed by game conservationists and despite the drastic measures proposed by the Kaibab deer committee I am confident that they approached the problem with utmost sincerity and with the welfare of the deer paramount in their thoughts.

I am not, however, ready to agree that it is necessary to carry out their recommendations relating to the killing of large numbers of the deer. Another thing that should be mentioned in connection with handling of the Grand Canyon game preserve is man's mistake in de-

staying nature's own means of balance. If the cougars or mountain lions had not been so systematically thinned out, they would have kept the increase of the deer down to a safe margin that the preserve could have carried, but the cougars were also destructive to the cattle and horses.

Referring again to the recommendations of the deer committee, it is stated that they are made solely for the purpose (1) of preserving the Kaibab deer herd for all time with the maximum number of deer that the area will support, and (2) of providing certain remedial measures in the existing emergency so that the range may recuperate. In view of the existing emergency, due to the severe overutilization of the range, it is recommended that stock should at once be removed from the forest, excepting the limited numbers belonging to local settlers, and the Grand Canyon Cattle Co., the largest users of the range, have been requested to remove the balance of their cattle at once and have agreed to do so under certain conditions. In view of the present situation the committee believes that no reduction of less than 50 per cent of the existing herd would be effective and recommends that one-half be removed as quickly as possible. This means a reduction of from 13,000 to 25,000 deer, depending upon the accuracy of estimates that have been made.

Three methods of reduction are suggested, and it is stated the committee is of one mind in the belief that "the proper and logical method to be followed in reducing the Kaibab deer herd is to ship the deer alive to other localities. By this means other areas where deer are not native or from which they have been exterminated may be restocked. In certain places in the Kaibab preserve it should be a comparatively easy matter to trap deer in considerable numbers. These could then be crated and shipped to other forests, preserves, parks, or private estates where conditions are suitable for their propagation and where proper care would be given them."

The second method of reduction is that the preserve be opened to hunting under careful regulations to be prescribed by the Secretary of Agriculture, such hunting as may be necessary to be carried on along the lines of modern and approved principles of game management. It is recognized that to this there is one important practical difficulty in the administration and management of hunting—the price charged by the State of Arizona for a nonresident hunter's license. The fee is \$20 with a limit of one deer. There are few Arizonians north of the Grand Canyon, most of the people local to this section living across an imaginary line in Utah.

The third method, which is recommended only as a last resort, is for the Government officially to destroy as many of the deer as may be necessary. Here also many practical difficulties are admitted.

Regarding the first recommendation for the reduction of the deer, it is to my mind logical, sane, humane, and the one that should be completely tried out within reasonable limits of time and expense before any consideration is given to the opening of the preserve to hunting. The Kaibab Plateau is practically isolated by almost impassable natural barriers, although possible permanent lines of drift to the north and west are admitted. One is northeast across the desert valley between the Kaibab Plateau and the higher country of Utah to the north. In my four trips, the first in 1920, through this section of the country, I have talked with many of the local people regarding the possible drift of deer into the mountains of Utah, and have been informed by reliable persons that an increasing number of deer in Utah is reported. These have undoubtedly followed this route, although it was freely admitted that any considerable drift is largely prevented by hunters along the route. However, so far as I am advised, no attempt has been made that would encourage such a drift by educational work among the Utah people as to the advantages to be accrued in permitting this drift to freely take place.

Another route is westward toward the Mount Trumbull district. President Anthony W. Ivins, of the Mormon Church, has known this country for the past 50 or 60 years and has gained from his own personal observation information that deer from the Kaibab Plateau work into the surrounding district. It is reported, however, that this year forage conditions are extremely bad on and around Mount Trumbull, due to overutilization of range by domestic livestock. While the Kaibab deer situation has been studied for several years, no attempts have been made to induce drifts artificially from the Kaibab Plateau, and the only suggestions put forth in this connection have been that shooting would accomplish this. The local people are vitally interested in the deer, and yet, except superficially, the local people have not been consulted, although a few of the local people who appeared at the conference held by the committee at V. T. Park in August had some very intelligent thoughts on the subject which might well be given careful consideration. The local cattle industry is not a paying proposition, yet no effort has been made to have the local people undertake the capturing of the deer fawn for raising and shipment to other localities for propagating purposes. It is my belief that a profitable local industry could be built up in this connection with proper encouragement.

To my mind the greatest evil that would result in opening the preserve to hunting, no matter how strict the regulations placed into

effect, or from an unthinkable wholesale slaughter undertaken officially, would be the disturbance of the present tame condition of the deer herd that would wipe out the work of 18 years in protecting them.

I do not believe that proper realization is had of what a valuable asset this section has in this tame herd, which attracts a golden stream of tourist travel. Nowhere else in this country is it possible for tourists to see with so little effort the sight of wild game in such numbers, living peacefully in their native habitat. As a tourist attraction alone the Kaibab deer herd represents an asset to the States of Arizona and Utah that will result in hundreds of thousands of dollars annually being brought into this section, and to disturb their condition by hunting or slaughtering them would be nothing short of a crime. My view is shared by President Ivins, long familiar with this section, who writes:

"I held the exclusive right for the ranging of cattle in the Kaibab Forest for a number of years, and in 1895 sold these interests to other stockmen. During that period there was no protection for the deer, and while they existed in considerable numbers, the constant inroads made upon them by Indians and white hunters kept them in a state of terror, so that they were rarely seen and hard to approach. Since protection has been provided for them the deer have become gentle and have increased until there are a great number in the forest.

"One of the most interesting features of the trip to the north rim of the Grand Canyon is the great number of deer which are nearly always visible from the road. If the hunting of these deer were permitted, they would again become wild, would retire from the traveled road and be rarely seen by tourists who visit the forest. Because of these and for other reasons I sincerely hope that no step will be taken which will allow the killing of deer, at least in the forest. If it is to be allowed at all, it should only be upon the ranges adjacent to the mountains to which they naturally drift when the mountain itself becomes overcrowded."

These same views are held by many others who have known conditions before the preserve was created and who realize what a valuable asset these deer are now in their tame condition. So far as hunting itself would be concerned, there would be no more sportsmanship in killing these tame deer than there would be in approaching a herd of tame cattle and shooting them.

During the past several years immense strides forward have been made in opening southern Utah and northern Arizona to tourist travel. Only a few years ago this section was practically unknown, but since the creation of Zion National Park in southwestern Utah, Bryce Canyon National Monument in Utah, almost due north of the Kaibab, and the improvement of the road across the Kaibab forest to the north rim of the Grand Canyon National Park the attention of the traveling public has been directed there and already thousands of people annually are bringing new life and development into this country through the dollars they are leaving.

It now only requires a motor trip of five or six days to view all of these outstanding features, and with the improved road conditions which are steadily being accomplished it will be as comparatively easy to cover this section as it is now to tour Yellowstone National Park.

More than 140,000 people have toured Yellowstone Park this season in about a three months' period, and here the season will be longer. With the magnificent scenery and the picturesque wild life to attract tourists there will be an annual stream going through this country, 200,000 visitors who at the most conservative estimates will leave \$10,000,000. Disturbing the condition of the deer by killing them off would, it is believed, reduce the annual flow of tourist gold through lessened travel by \$2,000,000 or more. Even by the wildest calculations this loss could not be made up through the sale of hunting licenses or directly from hunters who would come in for no other purpose than to hunt. As a practical dollars-and-cents proposition, the killing of the deer should not be permitted.

If the deer herd ought to be reduced to help in bringing the range and forage conditions back to normal, let us not be stampeded, but give more time and thought to putting into effect corrective measures that do not sacrifice the deer utterly. A thorough and exhaustive study, extending over a period of a year if necessary, should be made into every factor of the problem and the actual number of deer should be determined. This should be definitely undertaken before the Kaibab deer are doomed.

Myron Hunt has emphasized the folly of indiscriminate hunting in the preserve when he said:

Their second suggestion is, as I understand it, that hunters be allowed to reduce the number of deer, and a third, that if this proves to be insufficient, the forest rangers be empowered to reduce the number of deer. It is these last two suggestions that I wish could be reversed. We all noticed many old and poorly conditioned deer. If the Forest Service were instructed to use rifles with silencers on them and to shoot particularly old bucks and to a large extent old does, part of the problem would be taken care of. The suggestion that they use silencers is the crux of the whole thing. Those of us who are interested in the Kaibab Forest as a game preserve and who have

enjoyed the tameness of the game, know what will happen once the hunters are allowed in the forest for a season, even though they are allowed in it for the purpose of saving the deer from starving.

My report from Washington, giving me a digest of the committee's statement, does not state what I assume the report itself will have stated, that the recommendation that hunters only be allowed on the perimeter of the mountain and that they be distributed in such a manner as to drive the deer to those portions of the mountain that they have for some unknown reason seemed least to frequent. If this is intelligently carried out, it is just possible that the deer will make of the center of the mountain a place of refuge and will at that point be comparatively tame as they are in the national parks, not more than a mile inside of the limits which they shortly come to understand as the limits beyond which hunters may not come.

The forest rangers spoke of their intention to use such methods, and if hunters are allowed in there, it is to be hoped that these methods will be carried out. I am sorry, and I think a large portion of the public will be sorry, to feel that there is not some method of reducing this herd that would not make the remaining deer so wild as to take away from them that tameness which is their present charm.

It will be noted the department makes no mention of any such safeguards as Mr. Hunt has suggested.

Gov. George W. P. Hunt, of Arizona, recently said:

I am very much opposed to the slaughter of these deer. There could be no sport in killing them, as they are almost as tame as cows in the field. I saw no evidence that the deer were in danger of starving, although I am advised that the lower plateau range is dangerously overstocked.

I have read the report in which the committee appointed by the Secretary of Agriculture has recommended the herd be reduced one-half, and I believe this to be unwarranted, as I do not think any such emergency exists.

It may be necessary to reduce the herd to some extent, and in doing so, I believe sufficient interest could be aroused among sportsmen to provide for the transporting of a part of the herd for restocking other areas.

The slaughter of these partially tamed animals should not be permitted.

A vigorous view has been that of the Phoenix Gazette in this editorial:

Sportsmen, real sportsmen, throughout the Nation will see red if the order is issued for the slaughter of half the Kaibab deer herd, as recommended in the preliminary report of the Forest Service committee to Secretary of Agriculture Wallace.

It is hard to conceive in this age that the Government would sanction the murdering of 15,000 deer, and murder is what it will amount to. The deer of Kaibab preserve have been the wards of the Government since 1906. There will be no sport involved in the killing of them, because they are as tame as calves. Hunters who will hunt the Kaibab deer will butcher them, will shoot them down with the lust of blood as their only incentive—shoot while the betrayed deer stand gazing at them with the great hazel eyes that have paralyzed the trigger finger of many a real sportsman.

The only excuse offered for the slaughter of the deer in Kaibab is the threatened destruction of the herd because of poor range conditions. The authorities are afraid to let nature take its course, or so they argue.

Nature is a grand old nurse to wild life. In the history of the great game herds of the West, man and not nature has destroyed them, just as man would now destroy the last remaining great deer herd of the Nation.

If nature is permitted to do its own thinning in the Kaibab forest, she will destroy the weaklings. If man slaughters, he will take only the strong and leave the weaklings to impoverish the future generations of this great herd.

Range conditions change yearly. There is every possibility this coming winter and spring will completely change the status of conditions in the Kaibab forest. Unless a deliberate and ruthless slaughter of the animals is engaged in man can not change the conditions sooner.

This is a matter of great importance in our program of game conservation and park development, and I believe should be worked out with more care and less haste than the letter from the department indicates now obtains.

Mr. COLTON. Mr. Chairman, I rise in opposition to the pro forma amendment. I do not rise to-day to defend any policy of slaughtering wild animals needlessly, but I do say that this is a practical question. In that section of our country where the Kaibab is situated during the last few years, and particularly during the season just closed, there has been an unusual drought. The cattle grazing upon the ranges are in poor condition and some of the States have taken means of assisting the owners to get them through the winter. It will be impossible for much of this stock to graze upon the

public lands as they have in the past during the winter. I understand that the policy of the department is really one actuated by humane purposes, that a survey of the forage on the forest and immediate vicinities discloses that it can not graze or browse the number of wild deer now found there, and they are permitting certain hunters to go into these isolated sections for the purpose of killing a few of these deer, knowing full well that they will die if that is not done, and thereby saving a food supply to the people of that section of the country. It is simply a question of letting them die or killing them for food. I do not believe there is any attempt on the part of the department to spoil the pleasure of those who visit this forest. These few deer that are killed will not make the rest of them so wild in my opinion that they can not be seen. It is really a humane act. Unless something is done they will starve. Is it more humane to let them starve or shoot them?

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. COLTON. Yes.

Mr. CRAMTON. Does the gentleman understand that the department has in mind the killing of some ten or fifteen thousand deer? I have not the figures at hand, but it is some such large number.

Mr. COLTON. I do not know the number it is intended to have killed. I did not understand that it was anything like so large a number; but the purpose is to reduce the number to a point where the forage of the forest will maintain them.

Mr. KINDRED. Mr. Chairman, will the gentleman yield?

Mr. COLTON. Yes.

Mr. KINDRED. The gentleman has spoken of the desirability of driving these animals back to the wilds and hunting and killing them for food purposes. Can they not be killed by humane means to save the forage without driving them back into the wilds and pursuing them?

Mr. COLTON. I think the gentleman is quite right. If there is a more humane way of killing than shooting, then use it. I would be in favor of a policy of that kind, but my understanding is that it is still a question of letting them die for lack of food or saving a part of them by reducing the number and using the number killed for food purposes. It will not necessarily drive them back to the wilds—they are already there.

Mr. KINDRED. Would it not be more economical to kill them humanely in their present state of tameness than to drive them back into the wilds and hunt them?

Mr. COLTON. That is correct, probably, if there is some practical way of doing it.

Mr. CRAMTON. Mr. Chairman, will the gentleman again yield?

Mr. COLTON. Yes.

Mr. CRAMTON. I have here the report of the survey made at the request of the department. They say:

The committee believes that as an immediate remedy for the present situation no reduction of less than 50 per cent of the existing deer herd would be effective. We therefore recommend that one-half of the existing herd be removed, and that its removal be accomplished as speedily as possible.

And it has been estimated that there are something like 50,000 deer there. I am not accurate as to the amount, but it is something like that, so that somewhere between fifteen and twenty-five thousand deer are to be killed.

Mr. COLTON. I think the gentleman's estimate is too high. I do not believe there are 50,000 head of deer in the Kaibab Forest.

The gentleman from Georgia [Mr. LARSEN] has just called my attention to the fact that deer are scarce in his State. He states they could pasture and feed a part of these deer. If the freight and express rates were not so high, these deer might be shipped to other States, where they could be cared for. I would like to see them taken to other States where the forage would sustain them; but if that can not be done, they ought not to be exterminated by starvation.

The CHAIRMAN. The time of the gentleman from Utah has expired.

The Clerk read as follows:

For the construction of sanitary facilities and for fire-preventive measures on public camp grounds within the national forests when necessary for the protection of the public health or the prevention of forest fires, \$25,000.

Mr. RAGON. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. RAGON: Page 36, line 7, after the word "ares" strike out "\$25,000" and insert in lieu thereof "\$50,000."

Mr. RAGON. Mr. Chairman, this is a matter in which I think every Representative here should be vitally interested. The improved road conditions of the national forests at this time have given rise to another condition, which provides one of the great perils of forestry in this country. I wish I could recall the exact figures that the Forestry Bureau gives us as the number of visitors that visited our national forests 6 or 8 or 10 years ago and the number that visit them to-day. Suffice it to say that in the year 1922 there were over 6,000,000 people who visited the national forests of the United States; and in 1924, the present year, I am advised by the forestry officials that over 10,000,000 people have gone through the 147 national forests in this country. That brings the condition about which I desire to speak. There are over 1,500 camping spots. This appropriation seeks to construct these camping spots so as to reduce the fire hazard, as well as to build up the recreational features of them. We have this great influx of annual visitors brought about through the improved highways that go through these forests, and we have not any place to take care of them. These tourists, hikers, campers, naturalists—a great many of them—go in there without any primary knowledge of good forestry, and as a result of their ignorance our forests are left to their mercy. These recreational features are worth a great deal to the forestry of this country. As the good roads have attracted millions of people to the national forests, the establishment of these recreational camps will naturally educate great numbers of tourists and health seekers in proper forest practice.

It is interesting to know that of the millions of dollars that have been given to the national parks, so far as I am advised an unremunerative enterprise to the Government, we have for the purpose of establishing recreational camp grounds in our national forests expended the pany sum in the last two years of \$25,000. The figures, as Mr. Greeley, chief forester, gives them, to put one of these camps in a proper condition with proper facilities and the proper requirements to make it the kind of camp ground we ought to have in these national forests, is based upon an estimate of 900 camps—I believe it was in the year 1922 from which they took the figures—and the estimate of these 900 camp grounds there were over 1,300,000 people who availed themselves of those camp grounds. The forestry people based an estimate of the requirements properly to handle these 1,300,000 people, that 2 cents per person could be expended in preparing these camps with proper facilities with reference to the starting of fires and sanitary conditions around the camps, and that as a result of this 2 cents of expenditure upon the people who went into these camp grounds in 1922 it would amount to \$122,000. In other words—

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAGON. I ask unanimous consent to continue for five additional minutes.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. RAGON. In other words, in these 900 camp grounds upon which the Forestry Bureau base their statistics, it requires \$122,000 in order properly to care for them. Now, it is perhaps a sad commentary upon our Government that these recreational camp grounds in the national forests of this country have been built up and sustained by civic organizations to a greater extent in the communities that surround our national forests. The Wichita Forest, in Oklahoma, which is one of the most attractive forests, has many recreational features built up and established by the industrious and enterprising people surrounding the forest. The same is true, if I am correctly advised, as to the Colorado recreational camp grounds. I say to you that the Government can not afford not to keep step with the enterprising civic organizations of the community that surround these national forests and for good reasons, so far as the Government is concerned. First, our national forests this year, if I am correctly advised—and I get the information from the Bureau of Forestry—our national forests brought in over \$5,300,000, and for administration and fire-prevention measures there was expended \$5,100,000. But the monetary value of our national forests is not the only thing. There is an educational value. As I pointed out in an address the other day the men of New England and the men of New York and the men of the Central States of this Union, are as much interested in the forests of Oregon and Washington and Arkansas and Louisiana as the people who live in those respective States. Why? Because every time you construct a frame building you take into consideration the forests of these Western and Southern States, and I say to you it behooves every man in the United States, with our lumber

supply rapidly diminishing and the price of lumber rapidly rising—it behooves everyone to take a particular interest in our forests, and we can not do anything better than to teach from your recreational camp grounds everyone of these men, women, and children who come into those grounds what a disastrous result can occur by leaving a smoldering fire in the camp grounds, and educate them in the primary principles of good forestry. The recreational value of our forests is great in the precaution which goes in the introduction of proper forest methods to the people who live outside the forests where the greatest amount of our timber products really is. Then it has another value.

The gentleman from Michigan [Mr. CRAMTON] here has just called the attention of the House to the condition which exists, I believe, in Arizona. I want to say to you I believe the Arkansas forests, which are the largest in the South or East, could take care of every surplus deer we have in the State of Arizona. If I am properly informed, however, we can not handle them in the East and South because they are not properly acclimated.

Mr. COLTON. If the gentleman will yield, we think that could properly be handled if freight and express rates were not so high to bring them back.

Mr. RAGON. That is just one of the purposes I have in mind in introducing this amendment. If these deer can be raised and kept and maintained in the climates of Arkansas and Pisgah forests, North Carolina—if they are to be destroyed out there—why not let them go there or to the Ozarks forest, where we have not now 40 deer?

The CHAIRMAN. The time of the gentleman from Arkansas has again expired.

Mr. MAGEE of New York. Mr. Chairman, I am opposed to the amendment. I am not opposed to recreation. Everybody knows the benefits that can be derived from proper recreation. But the Government is not in a position where it can create a recreational park system. This appropriation is not for such a purpose. I assume that this appropriation is more for the purpose of having some person representing the Government look generally after these forest camp grounds. The first appropriation was made in 1923, \$10,000. Then it was increased in 1924 to \$15,000, and last year we increased that amount to \$25,000.

The purpose of this appropriation, as I understand, is not, generally speaking, to prevent forest fires. There are other appropriations for that purpose carried in the bill. On page 35 is an appropriation of \$283,000. Further on in the bill, on page 70, we have a further appropriation under miscellaneous items of \$660,000.

Mr. RAGON. Mr. Chairman, will the gentleman yield right there for a question?

Mr. MAGEE of New York. Let me make my statement first. The gentleman had the floor and was not interrupted. When I get through I will be glad to yield. The gentleman states that at one of these parks there were a million visitors, and he estimates that at the rate of 2 cents each, or \$20,000, they probably could lay out a recreational park. With such sum, perhaps, they could provide an athletic field, a gymnasium, tennis courts, baseball and football grounds, and perhaps a complete system of sewerage. I do not know about that. It would all be extremely idealistic. There is no question about that. But up to date we have about 1,500 camp grounds in our national forests, and they are increasing all the while. If you take the case of the gentleman's camp ground as an illustration, and, of course, if you are going to provide these idealistic recreational features in one park, you would eventually have to provide them in all the others, instead of this service costing \$15,000 or \$20,000 per year it would cost annually \$30,000,000.

That is all I have to say.

Mr. RAGON. Mr. Chairman, will the gentleman yield?

Mr. MAGEE of New York. Yes.

Mr. RAGON. In this particular item the money is not for the prevention of forest fires generally, but in specific camp grounds. I have not any idea of one penny going into my State. I am interested in the matter in a general way.

Mr. MAGEE of New York. The gentleman would not advocate what he contemplates in one park and then deny it in another park?

Mr. RAGON. Oh, no.

Mr. MAGEE of New York. Then I will ask the gentleman if he is in favor of starting out on a program that will ultimately entail an annual expenditure of \$30,000,000?

Mr. RAGON. No; it would not take that.

Mr. CRAMTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Michigan moves to strike out the last word.

Mr. CRAMTON. The particular amendment is only for \$20,000. I hope no one is misled by that innocent amount. The program of the gentleman from Arkansas [Mr. RAGON] seems to me to be based upon an erroneous conception of the relative fields of the national parks and the national forests. When he first presented this amendment to the House last Tuesday he said:

Notwithstanding the Government spent millions of dollars last year and will continue to spend for the proper maintenance of our national parks, which have only an educational value, with an incidental recreational value, yet we spent the small sum of \$15,000 for development of the recreational features of our national forests, which not only carry with them an educational, recreational, and a health value but also carry a monetary value to our Government.

It needs to be emphasized that the national forest system is primarily for the preservation of the forests and the forestry experiments, and not to provide recreation. Any recreation provided in our national forests is absolutely incidental, and we should not engage in a different program from that. There are many places where towns have contributed money to maintain what is practically a municipal park in a national forest. It is very proper that they should contribute money under those conditions. But when it comes to considering them—the great park system in this country—not only for education but for recreation, that is a different proposition. Of the thousands and thousands that now go into our national parks the great annual increase is from those who go in automobiles. They camp; they patronize the camps in those parks. It is a matter of recreation and health to them. That is not incidental; it is one of the main purposes of national parks.

I hope that whatever national parks we have in this country will be maintained as one park system, will be kept in one bureau and not scattered in half a dozen competing bureaus.

I am not going to argue the particular amendment offered by the gentleman from Arkansas in so far as it is incidental to the main idea of forestry, but I do dissent from the idea that these forests as the field of recreation do a greater and more valuable work than the national parks. He is putting the cart before the horse. I hope, therefore, the amendment will not pass.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Arkansas.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the purchase of tree seed, cones, and nursery stock, for seeding and tree planting within national forests, and for experiments and investigations necessary for such seeding and tree planting, \$131,705: *Provided*, That from the nurseries on the Nebraska National Forest the Secretary of Agriculture, under such rules and regulations as he may prescribe, may furnish young trees free, so far as they may be spared, to residents of the territory covered by "An act increasing the area of homesteads in a portion of Nebraska," approved April 28, 1904: *Provided further*, That additional land may be purchased at a total cost of not to exceed \$900 adjacent to the present Beal Nursery, in East Tawas, Mich.;

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For investigations of insects affecting cereal and forage crops, including a special investigation of the Hessian fly, grasshopper, alfalfa weevil, and the chinch bug, \$197,700;

Mr. HUDSPETH. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HUDSPETH: Page 45, line 15, after the word "bug," strike out "\$197,700" and insert "\$397,700."

Mr. HUDSPETH. Mr. Chairman, I understand a number of gentlemen on this side would like to discuss this amendment. I wonder if I can get an agreement with the chairman for 15 minutes to a side, 30 minutes on this amendment?

Mr. MAGEE of New York. What is the special purpose of the appropriation? Has it any particular purpose?

Mr. HUDSPETH. We ask for an appropriation so that we may destroy the grasshoppers that have been infesting the Southwest for a number of years.

Mr. MAGEE of New York. Mr. Chairman, I want to do what is fair and I will accept the proposition made by the gentleman from Texas of 15 minutes on a side.

Mr. HUDSPETH. That is reasonable. Mr. Chairman, I want to consume but five minutes—

Mr. MAGEE of New York. Just a moment, please. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 30 minutes.

Mr. BLANTON. I want five minutes.

Mr. MAGEE of New York. Will the gentleman from Texas [Mr. HUDSPETH] give it to you?

Mr. HUDSPETH. Yes; I will give the gentleman from Texas five minutes.

Mr. BLANTON. If the gentleman from Texas [Mr. HUDSPETH] is to control the time and will give me five minutes that will be all right.

Mr. HUDSPETH. Several gentlemen have asked for time on this side, because this is in the interest of the farmer.

Mr. BLANTON. This is a very important item in the bill and we ought to have some time on it.

Mr. MAGEE of New York. The gentleman from Texas says he will give you five minutes.

The CHAIRMAN. The gentleman from New York [Mr. MAGEE] asks unanimous consent that all debate on this paragraph and all amendments thereto close in 30 minutes. Is there objection?

There was no objection.

Mr. HUDSPETH. Mr. Chairman and gentlemen of the House: I trust that the farmer Representative from Kansas [Mr. TINGHEE] will not leave because, gentlemen, this is an amendment in the interest of the farmer, and those who are the friends of the farmer ought to vote for this amendment.

For the past several years, and especially last year, it has been estimated by the Agricultural Department that the grasshopper, which infested Texas very largely, destroyed 1,000,000 bales of cotton. I want to state to my friend from New York [Mr. MAGEE], who does not live in a cotton section, that he can estimate how much revenue was taken by this pest which infested the great Southwest. Why, gentlemen, in Kansas, in Texas, and I understand in Oklahoma, the grasshopper swooped down and did not leave even a leaf upon a tree and not a vestige of vegetation upon the ground; they not only destroyed crops throughout the West, but they destroyed the grass, and in many places the ranges were absolutely denuded of grass.

I have read the hearings with regard to the various subjects about which the committee held exhaustive hearings, and right here I want to state to my friend from Texas [Mr. BUCHANAN], who is a farmer and who is the ranking Democrat on this side, that the bill carries \$368,000 for eradicating the corn borer. I take it you gentlemen throughout the Northwest, around Lake Erie and Lake Huron, are interested in the eradication of the corn borer, yet you give the measly sum of \$197,000 for the eradication of the grasshopper and other insects, and I do not find a single line in the hearings—and I am not criticizing the committee—relative to the destruction by the grasshopper. Every man in Texas and throughout the Southwest is familiar with the devastation of the grasshopper and how he has denuded the ranges and crops. Why, he will take every leaf off the corn, every leaf off a stalk of cotton, and leave the ground as bare as this floor. Yet I do not find, gentlemen, in these hearings where there was any information sought as to how this pest could be eradicated. It is not a new proposition; it has been going on for years, but last year it was more destructive than in any previous year, as far as my information goes. And I would like for my farmer friends from Oklahoma to give me their attention, because they are interested in this thing. I am talking for the farmer, and I want those who represent him to give heed, because he is interested.

We are only asking that a sufficient sum be allowed in this bill to eradicate the grasshopper. Every man who is familiar with the destruction of this pest knows how it swoops down from the north, across the plains of Kansas and Oklahoma, and destroys everything in its wake. If you will give the matter any consideration at all, I think you will appreciate the importance of raising this sum only \$200,000, so we can eradicate the grasshopper, and with sufficient funds it can be eradicated.

Mr. ROMJUE. Will the gentleman yield?

Mr. HUDSPETH. Yes.

Mr. ROMJUE. President Coolidge tells us the trouble with the farmer now is that he is overproduced already. Does not the gentleman think that if that contention is true, it would be a good thing to save this appropriation and let the grasshoppers eat up what the farmer has?

Mr. HUDSPETH. Does the gentleman think that with cotton selling at 30 cents a pound and alfalfa hay selling at 83¢ a ton throughout the West that the farmer is overproduced?

Mr. ROMJUE. No; I disagree with that.

Mr. HUDSPETH. The old ranchmen out there would take serious issue with that statement when they are compelled to pay \$62 a ton for cottonseed cake to feed their cattle, because the grasshopper destroyed their grass in many instances.

Mr. ROMJUE. I totally disagree with the President.

Mr. HUDSPETH. I disagree with the President on that, although I agree with him on some things, but not on that.

Mr. ROMJUE. If that contention is true I think the farmer would be better off if we saved this appropriation and let the grasshopper eat up what he has.

Mr. HUDSPETH. I do not think the farmer is overproduced, and I do not think, when we get from 25 to 30 cents a pound for cotton, we are overproduced. [Applause.]

Now, gentlemen, this amendment is in the interest of the farmer and stock raiser and it ought to be adopted.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. Mr. Chairman, usually I back up the committee and the Budget in their estimates of expenses. It is rarely the case that I ever vote for an item of increase over the Budget. But the amendment offered by my colleague [Mr. HUDSPETH] vitally affects a great portion of the State of Kansas, a great portion of the State of Oklahoma, a great portion of the States of Colorado and Arizona, as well as a great portion of the State of Texas.

I went through a part of the district of my colleague [Mr. JONES] this summer and saw orchards, 10 and 15 years old, with the bark stripped off of the trees by grasshoppers and the trees dead. I saw in his district crops of corn that were absolutely stripped to the stalk, not a vestige of anything left except the mere stalk, where it meant everything to the farmer and his family. I want to say it affects thousands and thousands of farmers through the destruction of their crops, which means the yearly income of the whole family. That being the case, I take it this amendment will meet with the serious consideration of this committee.

It is a menace which affects the production of the whole country. My colleague [Mr. HUDSPETH] told you it meant the loss of \$1,000,000 of cotton in Texas; if it means that loss, it means a loss of wearing apparel to greater extent for the people of the country; it means an increase in the cost of production which must be borne by the consumers of the country; and in food products alone, I dare say, it means a loss of millions of dollars to the United States Government and its people each year.

Why should not this amendment be adopted? What part of the \$70,000,000 we have been spending annually in the name of agriculture is more important than this particular subject which deals with the entire year's income of whole families, thousands of them, scattered throughout many States?

Mr. REED of New York. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. REED of New York. What success have they met with in fighting these insects?

Mr. BLANTON. Very little within the practical reach of ordinary farmers. They have been spending, as I say, from \$50,000,000 to \$70,000,000 each year in the name of agriculture, and yet these expert scientists in this Bureau of Entomology have not yet discovered a means whereby the problem may be met successfully by the ordinary farmer.

The farmer plants his crop, he borrows the money to get his feed, he borrows the money to get his seed, and then he plants a crop. He is under contract in many instances to pay a large rental. His whole family helps him to prepare his land and to plant it. The crop comes up and he cultivates it. It gives promise of great production, and when the harvest is almost ready to begin the grasshoppers swoop down on him and leave him not a thing for his whole year's work. It is entirely too expensive for him to poison them. They come out of adjoining pastures in swarms. It is too late to cope with them then, for the proper solution is to find means to prevent them from being hatched out.

Mr. REED of New York. Will the gentleman again yield?

Mr. BLANTON. Certainly.

Mr. REED of New York. Then this is for the purpose of studying the proposition to see if they can find some way of eradicating these insects?

Mr. BLANTON. Certainly; and for no other purpose. Not a dollar will be spent except in research work.

Mr. REED of New York. Have they met with any success so far?

Mr. BLANTON. Very little, substantially, for poisoning is too expensive. The people all over these States I have mentioned—Kansas, Oklahoma, Arizona, Colorado, Texas, and

other places—will write to the Secretary of Agriculture and say, "For God's sake, send us some relief," and he will answer them and say they have not the money and that Congress will not furnish it to them. This amendment will keep them from passing the buck.

Mr. BUCHANAN. Mr. Chairman and gentlemen of the committee, if the \$100,000, by which amount they seek to increase this item, would do any good, there might be some grounds for advocating it; but the grasshopper problem is 50 years or more old. They have given it strict attention in the Department of Agriculture year after year, with a yearly sum for research work to find remedies for the situation brought about by these grasshoppers. They have found a remedy and it has proven successful. My friend the gentleman from Texas [Mr. HUDSPETH] said he had looked all through the hearings and had found nothing in them about the grasshopper. There is no use repeating in each annual hearing problems that have been solved and problems that have been settled. Had the gentleman gone back one year or two years he would have found the grasshopper situation discussed. He would have found the remedy set out. He would have found where the department officials had taught them how to successfully apply the remedy.

Therefore this appropriation will do no good. We still carry an allotment of \$24,000 for research work to study this problem.

Mr. JONES. Will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. JONES. The solution to which the gentleman refers is rather expensive when it is applied, is it not?

Mr. BUCHANAN. Oh, no; it is not.

Mr. JONES. I know that when they undertook to kill the grasshoppers in the quantities found out in certain sections of the Southwest this year it was rather expensive to follow the method which the department set out.

Mr. BUCHANAN. Let me read from the hearings of last year:

The method of control is using poison bran mash. This poison bran mash is prepared with white arsenic.

This is sown—it depending upon what particular district—at certain times in the day. In some districts it may be sown early in the morning, or perhaps not until 10 or 11 o'clock, while in other places it may be in the afternoon or evening. These are problems that have to be worked out by research, because the proper time for the distribution of this poison may vary in different localities.

The proper time depends upon when the grasshopper gets warm. In the morning, as soon as he gets warm, he commences to feed, and when he commences to feed is the proper time to distribute the bran mash.

Bran mash is not very expensive, and neither is white arsenic.

Mr. JONES. According to the hearings, though, the problem must be worked out further and the solution is not complete. According to the statement you have just given us, he says these are problems that have to be worked out by research. As I understand it, the solution they have already obtained is a very expensive one, and one that is not known as fully as it might be, and has not been worked out in perhaps as economical a way as it could be if they devoted more attention to it. I am not as familiar with it as I might be, but that is my understanding.

Mr. BUCHANAN. The department states in this hearing, "the cost would run from 25 to 30 cents an acre." Is that expensive? Of course, it would vary according as the price of bran mash might be a little higher or a little lower, or the price of white arsenic might be a little higher or a little lower, but I contend that 25 or 30 cents an acre to kill grasshoppers is a cheap remedy, and as cheap as any they will ever find.

Mr. JONES. The trouble is, that is the cost of one application, and one application will not do the work. It has to be applied from time to time. If one application would do the work that would be an inexpensive method, but as I understand it, the remedy which they suggest has to be applied time after time.

Mr. GARRETT of Texas. Will my colleague yield?

Mr. BUCHANAN. Yes.

Mr. GARRETT of Texas. Do I understand my colleague to say that the Department of Agriculture has found that in the application of arsenic on a fiber plant such as cotton, it can be applied for 30 cents an acre?

Mr. BUCHANAN. I will say to my colleague from Texas that this is poisoned bran and you scatter the bran where the grasshoppers are at about the time they feed, and they eat the bran and die from it.

Mr. GARRETT of Texas. I do not know so much about that proposition, but my colleague will realize that we have had some pretty expensive experiments down in Texas in the application of white arsenic to kill the pink boll worm and the boll weevil.

Mr. BUCHANAN. That is calcium arsenate. I think the gentleman is mistaken about the remedy.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, the committee will notice that this appropriation is only for making investigations for the purpose of finding causes and, if possible, remedies. That is why it is limited in amount. If it was for the purpose of applying a remedy, for doing the physical work and paying the expense of it, the amount would have to be very much larger. Gentlemen who ask for a large increase of this item evidently believe that if the appropriation were increased as they wish the Secretary of Agriculture would organize and carry on a campaign of extermination, and pay all the cost of it, to be waged against grasshoppers and similar plagues. No; the money in this item is altogether for investigation to find preventive or corrective methods of relieving the farms of grasshoppers. The fact is that each year for many years there has been an appropriation for this and similar work, and the Department of Agriculture, through its investigational force, has worked out remedies. The trouble is that some of the people for whose benefit they have been worked out refuse to apply them and wish money from the Federal Treasury for the employment of experts, laborers, and machines to go out and do the physical work necessary to apply those remedies.

In my judgment that is not a part of the duty of the Agricultural Department. It is not a duty which the Federal Government ought to perform. Investigational work ought to be pursued, and the Congress ought to furnish abundant money to enable the department to discover or work out remedies; but when remedies are found and their application requires only physical labor and effort, they ought to be applied by those for whose benefit the work is to be done.

Now, as was clearly and ably stated by the gentleman from Texas [Mr. BUCHANAN], a remedy has been worked out as far as possible by the department. It is well known and those whose crops are attacked or threatened should apply it. They should at least try to protect their own property.

Mr. COLTON. Will the gentleman yield?

Mr. McLAUGHLIN of Michigan. I will.

Mr. COLTON. Is it a fact that where the remedy has been applied it has been effective?

Mr. McLAUGHLIN of Michigan. I believe it has been quite successful; very helpful, at least.

Mr. COLTON. I will say that in my own district we had a large number of crickets that invaded a part of my State. The people applied this same remedy that was recommended by the department which it had worked out, and it has been very effective in the last year or two.

Mr. JOHNSON of Texas. Mr. Chairman, I favor economy and, as a rule, am inclined to decrease rather than increase appropriation bills passed by the House. I am constrained, however, to favor the amendment offered by my colleague from Texas [Mr. HUDSPETH]. His district is about 700 miles from the one I represent, and yet the pest of grasshoppers mentioned by him and also spoken of by my other colleague from Texas [Mr. BLANTON] penetrated my district during the present year.

This past summer, in company with my predecessor, Judge Rufus Hardy, I made a trip from Navarro County to Freestone County, and we witnessed the ravages of the grasshopper. On a number of farms it appeared as though an invading army had marched across the fields of cotton and corn and left them bare as the floor.

This is the first year that the grasshopper has been of any serious consequence in my section of the State, and it indicates that the pest, instead of being checked, is on the increase. The opponents of this amendment claim that the Government has already solved the problem of discovering a remedy, but if such has been discovered it must not be in a perfected state. If so, why does this bill make any appropriation whatever for the purpose of investigating means to destroy the grasshopper and other insects therein mentioned. This bill seems exceedingly generous in discovering means to eliminate other pests not known in the great Southwest. The sum of \$280,000 is provided for the investigation and prevention of the spread of the Japanese beetle; \$383,630 to prevent the spread of the corn borer; and \$740,000 to prevent the spread of moths. The increase in the appropriation proposed by my colleague's amendment is infinitesimally small when compared with the value of the crops sought to be protected. The sixth congressional district, which I have the honor to represent, produced in 1923 over 400,000 bales of cotton, and

the increase in the appropriation proposed by my colleague [Mr. HUDSPETH] represents less than one-half of 1 per cent of the value of the cotton crop in that district alone.

The destruction wrought by the grasshopper in one county in my district during the present year is many times larger than the entire sum of money involved in this amendment. I trust it will be adopted. [Applause.]

Mr. TINCHER. Mr. Chairman, I regard the gentleman from Texas [Mr. HUDSPETH] as highly as any man on the floor. This is not a new question. The bill carries an appropriation of \$24,000 for research work to find a way to get rid of the grasshopper. To add to that appropriation money to conduct further research work would not in any way help the American farmer. The department has all the money it wants for that use. They have been investigating a way to get rid of the grasshopper for a good many years. They have a remedy. There is a plan you can use that will prevent the grasshopper from taking the crop.

The old question comes back, Will the Government administer the remedy or will it confine its activity to research work and finding the remedy? If we are going to administer the remedy, we would need two or three million dollars, because \$200,000 would not be a drop in the bucket.

In Kansas, where the grasshopper has been prevalent this year, our people have been spending from their own fund for years in fighting the pest. If the Government is going to make a fight in one locality, it should make the fight in other localities. I want to vote for everything for the farmer, but I do not want to be put in the foolish attitude of voting a lot of money for the department to conduct its investigation when I know that the department will not use it. [Applause.]

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. TINCHER. Yes.

Mr. JOHNSON of Texas. If the question has been already solved successfully, why appropriate this amount that is included in the bill for the investigation of insects doing this damage?

Mr. TINCHER. Oh, no one claims that the last word on the question has been said. It is absolutely all right to continue the investigation, and I am not saying that I would not, if there is a real emergency, vote for an appropriation for the Government to make the fight; but that is the question. Men talk on this amendment as though, if you would increase the appropriation by \$200,000, Uncle Reuben, as you call him, could expect that that \$200,000 would be used in wiping out the grasshoppers in his fields, and nothing could be more deceptive to the American farmer than to pass an amendment with that representation.

Mr. HUDSPETH. Mr. Chairman, will the gentleman yield?

Mr. TINCHER. Yes.

Mr. HUDSPETH. If, as my colleague from Texas has stated, you have an effective remedy now, why is the grasshopper increasing by millions each year and extending over a vast territory last year which it had not touched before?

Mr. TINCHER. All I say about the effective remedy is that we have an effective remedy whereby, if you spend enough money, you can eradicate the grasshopper from your fields. Such an occurrence as has been described—grasshoppers coming in in swarms—we have not had in Kansas since 1873. I did not know that they were visiting Texas in that way. However, I am not in favor of abolishing the research work and if \$24,000 is not enough I would vote to increase it. But, as a friend of the American farmer, I do not want to be put in the attitude of voting to increase this \$200,000 upon the theory that the money will be used to eradicate grasshoppers. I was on this committee for years, when we had hearings. It is an old question with some of us. You vote to appropriate money for research work, and they use so much as they want of it, and I understand that they have asked for only \$24,000, and that is perhaps all that they can successfully spend in conducting this investigation, and it will perhaps pay all of the men qualified to make the investigation that are now in the department.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. TINCHER. Yes.

Mr. BLANTON. The gentleman ought to know that every grasshopper that is in Texas now has a Kansas brand upon it. They all came from Kansas.

Mr. TINCHER. I am thankful for the fact that Kansas did not furnish Texas all her pests. There are other sorts of pests in Texas that did not come from Kansas. [Laughter and applause.]

The CHAIRMAN. The time of the gentleman from Kansas has expired. All time has expired. The question is on the amendment offered by the gentleman from Texas.

The question was taken: and on a division (demanded by Mr. HUDSPETH) there were—ayes 34, noes 43.

So the amendment was rejected.

The Clerk read as follows:

For investigations of insects affecting southern field crops, including insects affecting cotton, tobacco, rice, sugar cane, etc., and the cigarette beetle and Argentine ant, \$255,440.

Mr. BUCHANAN. Mr. Chairman, I move to strike out the last word. For the benefit of those here who represent the cotton districts I rise to state that this is an increase in this appropriation of \$15,000; \$7,500 is for the eradication of the cotton flea and the other \$7,500 of this increase is to investigate what is known as the Arizona boll weevil. It is a new pest or a new species of boll weevil, although it belongs to the same family. This pest has fed for years upon the wild cotton that grows in the mountains of Arizona. It prospers and flourishes and multiplies in dry weather. That is where the danger lies. If it should gain entrance into the plains of Texas and other States where the old boll weevil does not affect the cotton on the high and dry lands, it would be very disastrous. If this pest should get an entrance into Texas from Tucson, Ariz., and then into Oklahoma and on over the Cotton Belt, you would have the old boll weevil that destroys the cotton in a wet year and you would have also a weevil that flourishes and destroys the cotton in a dry year. It is important to the people of the Cotton Belt that we take every step, quarantine and otherwise, to prevent the immigration of this dry-weather weevil into the Cotton Belt of Texas, Oklahoma, or any other States. Of course, it can not be handled. It seems as though this bug has even challenged the science and knowledge and ingenuity and intellect of man. I have always had an abiding faith that man's intellect could control any insect that ever existed upon the earth, but I am about convinced that even with the best scientific men in the world in our Bureau of Entomology that that one little insect is their superior and that it survives in spite of their ingenuity and poison.

I want at this point to read a little doggerel:

TWO KINDS OF BOLL WEEVILS

Boll weevils are two kinds

That live on cotton bolls;

Each feasts on what he finds—

Whether dry, wet, or cold.

The new bug is a hummer;

A kind of bug that's dry,

He lives his best in summer

When rain has passed him by.

That old boll-weevil bug

Feasts when the showers fall,

But when its dry the plug

Will never make a call.

Just as the weather man

Directs the sun and rain,

These bugs stick to a plan

And watch the weather vane.

Like old Jack Sprat and wife,

Who licked the platter clean,

These bugs sustain bug life—

The farmer's left between.

And thus the farmer's way

Toward the river Styx

Is pestered every day—

He's in "one hell of a fix."

Insects new and insects old;

Insects shrewd and insects bold;

Insects wet and insects dry;

Insects tame and insects shy;

Insects rough and insects tough—

God knows we've had insects enough.

The Clerk read as follows:

For the maintenance of the Montana national bison range and other reservations and for the maintenance of game introduced into suitable localities on public lands, under supervision of the Biological Survey, including construction of fencing, wardens' quarters, shelters for animals, landings, roads, trails, bridges, ditches, telephone lines, rockwork, bulkheads, and other improvements necessary for the economical administration and protection of the reservations, and for the enforcement of section 54 of the act approved March 4, 1900, entitled

"An act to codify, revise, and amend the penal laws of the United States," \$48,215: *Provided*, That \$2,500 may be used for the purchase, capture, and transportation of game for national reservations.

Mr. ANDERSON. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Amendment by Mr. ANDERSON: Page 50, line 11, after the words "United States," strike out the figures "\$48,215" and insert in lieu thereof the figures "\$58,215"; and at the end of the section, line 13, add the following: "Provided further, That \$12,000 may be used for the construction of a highway through Sullys Hill National Park, and in the construction thereof the Chief of the Bureau of Biological Survey may cooperate with the Bureau of Public Roads."

Mr. ANDERSON. Mr. Chairman, the object of this amendment is to provide for the construction of a road through Sullys Hill National Park. The State of North Dakota, in cooperation with the Federal Government, has provided for the construction of a road between two county seats, Devils Lake and Minnewaukan. As this road is laid out it runs through the Sullys Hill National Park. The Federal Government could now provide \$6,000, or one-half of the sum necessary for the construction of this road, under the general road fund, but, obviously, as this is Federal land, the State can not provide the other half of the expenditure. Therefore this road stands in the position of having two ends and no middle, because the portion of road running directly through this park will not be improved under Federal or State funds and constitutes a link of unimproved road.

Now, as a matter of fact, while it is not possible of mathematical demonstration, the construction of this road through this park would represent a real economy. The road leads from the Narrows, a small station on the railroad to Fort Totten, on an Indian reservation, and practically all of the supplies on this reservation have to be hauled over this road, which ordinarily is in a very bad condition, and a very considerable saving would be made in the facility with which these supplies could be transported if the road is completely improved. But that is not the feature of it in which I am particularly interested. As a matter of fact, this national park conducted by the Biological Survey is the only thing of its kind in a stretch of many hundreds of miles, and to one who appreciates the great distances out there, who knows of the everlasting sameness of the landscape, it is easy enough to appreciate the recreational value of a park of this kind. The recreational facilities offered by this park are the only thing of the kind in this section of the country. Some 11,000 people visited there last year, part of the time under very great difficulties because of the poor character of road leading there. All this would do would be to apply to this park under the Biological Survey exactly the same policy pursued in the national parks and national forests. And I want to appeal to my friend from New York that if he will be good enough to accept this amendment it would be not only a recognition of its essential fairness, but an act of amity and grace.

Mr. MAGEE of New York. Mr. Chairman, I would be very glad to accept the amendment offered by the gentleman. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

The question was taken, and the amendment was agreed to. Mr. MAGEE of New York. Mr. Chairman, I ask unanimous consent that the clerk of the committee be authorized to change any and all totals to conform with amendments made by the committee during the consideration of the bill.

The CHAIRMAN. Without objection the clerk will be authorized to change the totals as requested.

There was no objection.

The CHAIRMAN. The time of the gentleman from Texas has again expired. Without objection, the pro forma amendment is withdrawn. The Clerk will read:

The Clerk read as follows:

For investigating the food habits of North American birds and other animals in relation to agriculture, horticulture, and forestry; for investigations, experiments, and demonstrations in connection with rearing fur-bearing animals; for experiments, demonstrations, and cooperation in destroying mountain lions, wolves, coyotes, bobcats, prairie dogs, gophers, ground squirrels, jack rabbits, and other animals injurious to agriculture, horticulture, forestry, animal husbandry and wild game; and for the protection of stock and other domestic animals through the suppression of rabies in predatory wild animals, \$533,290.

Mr. HUDSPETH. Mr. Chairman, I move to strike out, in line 24, page 50, the figures "\$533,290" and insert in lieu thereof the figures "\$633,290."

The CHAIRMAN (Mr. MAPES). The Clerk will report the amendment offered by the gentleman from Texas.

The Clerk read as follows:

Amendment offered by Mr. HUDSPETH: Page 50, line 24, strike out "\$633,200" and insert "\$633,290."

Mr. HUDSPETH. Mr. Chairman and gentlemen of the committee, if you have the hearings before you and will turn to page 408 you will find that Mr. Henderson, in testifying before the subcommittee, stated that the appropriation—and it is the same this year as it was last year—to save the livestock growers and farmers of the United States from great losses from these pests should be \$662,000. That was brought out by a question propounded by my colleague from Texas [Mr. BUCHANAN].

Now, this is one of the most important works inaugurated by the Department of Agriculture. The late and very much lamented Secretary of Agriculture, Mr. Wallace, who now sleeps beneath his native soil in Iowa, requested of the Budget Committee the very sum that I am asking you to incorporate in this bill to-day, \$633,000. I am going to ask gentlemen, and particularly my friend from New York [Mr. MAGEE] and my friend from Texas [Mr. BUCHANAN], this question: Who is in a better position to know of the work of the Biological Survey and the work done in eradicating these predatory animals—the prairie dog and other pests? Is it the Budget Committee or the Secretary of Agriculture? Is it the gentlemen down there who have it under their supervision or the chiefs of the Budget? I will ask you in all fairness who is in the better position to estimate the amount required for this important work? In a conversation I had with Secretary Wallace about a year ago he stated to me it was one of the most important of any of the works in his department.

What has been done, gentlemen? I am talking to you gentlemen of the Northwest. This does not affect my State. We have eradicated the wolf, except as it is replenished from the plains of New Mexico. What has it done? It has enhanced the value of every acre of grazing land in the West all the way from \$1 to \$10 an acre through governmental instrumentality.

You may say, "Why not let the ranchmen destroy their own wolves?" I answer, they do form clubs and they have paid bounties for the destruction of the coyotes and wolves. You gentlemen who have public lands, you gentlemen who represent the public-land States that are now affected, should be interested in this. I recently made a trip through the State of New Mexico with my friend the Representative from that State [Mr. Morrow], and I saw scalps of these predatory animals hung upon almost every barn. I want to say to the chairman of the committee that I understand that after a very exhaustive hearing on this matter you found that this was an important work.

Mr. MAGEE of New York. We find that it is an important work, and I think we have made a very liberal appropriation for it.

Mr. HUDSPETH. I disagree with the gentleman on that, because the gentleman's committee did not give the amount requested by the Secretary of Agriculture, \$633,000. I contend that the man who had the work under his immediate eye was in a better position than this Budget Bureau down here to judge of what was required to rid the country of predatory animals. It is not only predatory animals, but other pests as well. Throughout the West the prairie dog has been exterminated. He has been known to destroy whole sections of land, and the rat and other rodents are also destructive.

I say to you, gentlemen, in all seriousness that this appropriation should be voted because it is the same amount as that which Mr. Wallace, the late Secretary of Agriculture, after mature deliberation said should be incorporated in this bill. I sincerely trust that you gentlemen who are interested throughout the Northwest will state whether or not it has been a benefit to the livestock grower in your section in the last 10 years. Sheep throughout the United States have increased in number from 37,000,000 to 47,000,000, largely due to the fact that the predatory animals which preyed upon them have been eradicated.

Mr. MAGEE of New York. Mr. Chairman, I have five requests for five minutes each and I want five minutes myself. I ask unanimous consent, Mr. Chairman, that all debate on this amendment and all amendments thereto close in 32 minutes and that those Members who have indicated that they want time be permitted to speak.

The CHAIRMAN. The gentleman from New York asks unanimous consent that the debate on this paragraph and all

amendments thereto be limited to 32 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Utah [Mr. COLTON] is recognized.

Mr. COLTON. Mr. Chairman and gentlemen, the Department of Agriculture is contemplating an increase in the fees to be charged grazers upon the forests which will approximate 75 per cent and in some cases 100 per cent.

Of course, personally I do not agree with that policy. I earnestly hope that the department will not put into effect this proposed increase in the fees. If that policy is carried out, it will work an additional hardship upon the stock growers of this country, and I am sure, speaking particularly of the cattle raisers, that they can not bear much more expense. But if the Government is to increase the fees, as is now contemplated by the department, surely it ought to help in so far as it is possible in eradicating the predatory animals which now infest these forests. But whether the grazing fees are increased or not, this good work should go on. As has been pointed out, it is conservatively estimated that the Government saved to the country over \$7,000,000 last year. This work is now progressing rapidly. In many sections of the country these animals have been eradicated. It has been shown that in many cases when left to the trapper locally the work is not done as well as it is done under the supervision of the Biological Survey. They send their trapper into a given section and try, as far as they can, to completely clear it of these predatory animals. They can profitably use more money. They have the men in the field. It is economy to continue the work with the force they now have and to increase it. They need this additional \$100,000. They will more than give it back, many times more, through a decrease in the number of animals killed. If their present plans are carried out and the grazing fees are increased—which I hope will not be done—then it is the duty of the Government to fight these pests. If we are going to require our stock raisers to pay an additional fee, amounting in some cases to 100 per cent increase, we ought to adopt a broader policy of making the ranges as safe as we possibly can.

Gentlemen, this means much to the stock growers of the West; it means much to those who have permits upon the forests of this country, and I feel it would be adopting a penny-wise and pound-foolish policy now, while the field force is at work, if we handicapped them and prevented them from clearing up these forests and grazing lands from the predatory animals. Let us finish the work as soon as we can and give the department every dollar it needs.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. WILLIAMSON. There is not a movement to curtail the service any further than it is now being carried on, is there?

Mr. COLTON. This item as it now stands will prevent the department from having the amount of money which it requested to do this work. Those who know best have asked for more. While they are doing such effective work, why limit them?

Mr. WILLIAMSON. But they will have as much as they had before.

Mr. COLTON. Yes; but they need more, and can effectively use it.

The CHAIRMAN. The time of the gentleman from Utah has expired.

Mr. BLANTON. Mr. Chairman, there are no Government trappers in my district, hence it is little affected by this amendment, but I happen to know that in several districts in the State of Texas, in that of Mr. GARNER, in that of Mr. WURZBACH, and in that of my colleague, Mr. HUDSPETH, this is a very much-needed appropriation. There are not only many coyotes there but there are many timber wolves still left there, which not only kill young calves but sometimes yearlings and colts. There are still some panthers and mountain lions left in parts of those districts and there are still some of these big catamounts left that prey upon flocks. They need some protection. I think it is money well spent along that line to increase this appropriation. As has been said, there was \$11,000,000 worth of property saved through the expenditure of the small sum that the Agricultural Department used last year. I think that is quite a return from throwing bread on the waters by Congress; quite a return for the Nation.

I am in hopes the committee will see fit not to fight this proposition. It does not mean anything to New York. There are not any timber wolves left up there. It does not mean anything to some of the other States, but to the States of New

Mexico, Arizona, Colorado, and Texas—to the cattlemen of those four States, at least—it means much, and while it affects my district very little, it affects vitally many other districts in the United States. I hope the extra money will be allowed.

Mr. LEAVITT. Mr. Chairman and gentlemen of the House, I do not wish to appear in the position of being a looter of the Treasury when things come up that have to do with the western part of the United States. This is a matter, however, about which I have, I think, more than the ordinary amount of information. I was for a good many years in the Forest Service, being first a ranger and later having charge of some of the national forests of the West and cooperating in work of the nature provided for here. The work was carried on by the Biological Survey, but to some extent under the cooperation of the Forest Service.

There are certain things in connection with it which we ought to bear in mind. We learned during the war that very often after preliminary work leading up to the final stroke of attack it was necessary to mass forces to take a position and thus finish the thing, while if we held back we were likely to lose an advantage already gained. Here is an exactly similar situation. I could tell you personally, if I had the time, of different places in my State of Montana and the West where great progress has already been made, where the work has been brought up to the point where, if there can be a more intensive drive covering the next few years, the predatory animals can be put out of existence.

Mr. Chairman, the West is full of instances in which predatory animal extermination has been brought up to a certain point through the offering of bounties by the stockmen themselves, and then because of a slump in the cattle business or otherwise they found it impossible to continue to pay these bounties, so that they stopped the work or slacked up on it. When they have done that, even for a year or two, the predatory animals make back as an increase in a year or two all that has been gained against them over a period of 5 or 10 years.

The Secretary of Agriculture, who has recently passed away, asked for more money than is put in this bill in order that the work already done might be consolidated and that the final stroke might be delivered to bring an end to this problem.

It would be a matter of economy to the United States to add the \$100,000 being asked for now rather than let the work extend over a greater period of years.

Something has been said to the effect that the stockmen themselves might be able to finish this work on their own initiative. The man who goes out as a private trapper finds it to his advantage, as you will readily see, to leave the young of the wolves and other animals so that there will be something for him to trap again the next year. His interest is not in entirely wiping out these predatory animals. But when the Government trapper is sent in he gets his salary and he does not get any more or less if he does a fine job of it than he does if he does a partial job, but his reputation with his department is that he gets great results. As a result of that spirit I could tell you personally of places in the West where these animals have been pretty well eradicated by Government trappers.

As has been said, predatory animals largely originate on the public lands and in the national forests, so that it is a national duty to help meet the situation adequately until they have been eliminated.

Keep in mind that the elimination of one old wolf saves to the stockmen an average of \$1,000 to \$1,500 a year. It is known that that much damage will be done by an average one of these old wolves. Thus we are doing something here, I repeat, which will be of national importance while we have great areas of public lands until the work is done. We are doing something not only to carry on our stock business but to build up the western country. I hope this amendment will prevail.

Mr. WILLIAMSON. Mr. Chairman, recently I was out in the Bad Lands in South Dakota, nearly all of which to-day constitute and has constituted Government land, and while standing upon the brink of the prairie and looking over into the Bad Lands I saw not less than six coyotes making their way out of a small wooded ravine some 75 or 100 feet below me. In our State we have made large appropriations out of the State treasury for the eradication of predatory animals, and are working in cooperation with the trappers in the Agricultural Department who are there doing this work, and the stockmen of our State have also made very large subscriptions toward a fund having for its purpose the eradication of these predatory animals.

Thousands of dollars worth of damage is being done out in my State every year by coyotes, wildcats, and wolves in the killing of sheep and young cattle. One big gray wolf alone

during the last four or five years is known to have committed damage to the extent of more than \$10,000. A Government trapper got him early last fall.

We have hundreds of thousands of acres of public and of national forest lands in South Dakota. These public lands and national forests are the breeding grounds of the predatory animals in our State, and I believe the additional appropriation asked for ought to be granted at this time. If this service can be prosecuted as vigorously as it has been during the past two or three years we can very largely rid our State of these animals in the next three or four years, provided the Government will do its part in killing off the destructive animals that are now rapidly multiplying on the public domain.

Mr. BUCHANAN. Mr. Chairman, I was glad to hear the gentleman make that last statement, that if this service can be followed up for the next three or four years, just as it has been conducted in the past, this problem can be solved. I hope the gentleman is right, and that is exactly what this committee is trying to do—to follow up the service as it has been conducted, giving the same amount of appropriation from year to year, keeping the same perfected organization as a going concern, and doing efficient work.

Two years ago the Bureau of the Budget cut this appropriation \$30,000. Your subcommittee put it back at just what it had been before. A year ago the Budget Bureau again cut the appropriation and your subcommittee put it back to just what it was. For what purpose? To keep the efficient organization this bureau now has operating as it has operated in the past.

What are the facts? The gentleman talks about traps. Traps have practically been abandoned by the department as impracticable and too expensive. But what have they done? They have rendered a great service. They have discovered a poison or have made a poison that is tasteless. For years wolves would not eat poisoned meat because it was bitter, but now they have discovered a process by which you can poison meat with strychnine and make it tasteless, and the wolves readily eat this meat. Therefore the Government has performed its function in evolving an efficient remedy which the citizens of the country can avail themselves of.

There is nothing complicated about putting out poisoned meat. There is nothing complicated about poison so long as you get the proper brand of poison from the Government, and they can do that. So that it strikes me that if each individual ranchman would conduct a systematic poisoning campaign and have his ranch hands, who are familiar with his ranch, and who are familiar with the resorts of the wolves and other predatory animals, put out this poison at such places, they can do a thousand times more good than the 250 men that the bureau has in the field all the time.

Mr. LEAVITT. Will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. LEAVITT. There are no ranches in the national forests, and the national forests are the breeding grounds of these predatory animals.

Mr. BUCHANAN. I concede that in the national forests the Government should kill out the predatory animals of its own accord and at its own expense, and we have ample money for that purpose. We can not kill them all in one year or two years. We have plenty of money to buy the poison, and we have 250 men scattered throughout these Western States to put out this poison, and they are succeeding admirably. The department states right here in the hearings that the wolves have been practically eliminated. Where they used to go in droves they can hardly find one, and that in many sections coyotes have practically been cleaned out. In other sections that is not true. But as they decrease the number of these animals you want to increase the appropriation. It looks to me as though a decrease of the animals ought to call for a decrease in the appropriation, or certainly not an increase in the appropriation.

This work was commenced in 1916 with an initial appropriation of \$134,825 for that year. This year we have increased the appropriation until they have \$283,993 for this work. That is sufficient. Oh, what has become of the self-reliance, the individual initiative, of the American pioneer? The Government has evolved an efficient remedy by which you can kill these wolves by the thousand. They estimate that last year they killed 100,000 coyotes by poison alone. What has become of the initiative and individual freedom of action of men in protecting their own property and attending to their own business? Are they coming to the point where they are relying upon the Federal Government to hire men and send them out there to trap animals on their private ranch lands? On the

Government land we are carrying sufficient funds to meet this situation. Let the private ranchmen protect their own interests after the Government furnishes them a proper remedy. [Applause.]

Mr. ANDERSON. Mr. Chairman, it is never particularly a satisfying or gracious experience to oppose an amendment increasing an appropriation where good work is being done. The committee recognizes that the work done under this item is very efficiently done and that it is a very valuable piece of work. That fact has been demonstrated not by words but by acts. In the last 10 years the appropriation in the aggregate has been increased from \$110,000 to something over \$500,000. It is a very clear demonstration of the fact that the committee has approved of the work that has been done for the last few years as efficient work that should be continued. The only question now is whether the work shall be continued on the basis on which it has proceeded so satisfactorily for the last few years or whether the time has come when we ought to increase the work. In view of the great progress that has been made, the large number of animals that have been killed, it seems to me we ought to be satisfied to continue the work on the basis that it has proceeded upon for the last two or three years. It has been argued that because the Secretary of Agriculture proposes an increase of \$100,000 in this appropriation that that ought to prevail with the House in determining the amount appropriated. If we were to proceed on that theory, if we were to appropriate in the bill the amount estimated by the various heads of the bureaus in the Department of Agriculture, we should add not \$100,000 but \$4,500,000.

The fact of the matter is what you have here is the judgment of the Budget officer, the judgment of the subcommittee that considered the bill, that the amount here proposed is adequate for the purposes for which it is proposed. As I said, there is no particular satisfaction in opposing an increase of an appropriation under which good work is being done, but if we are to preserve a reasonable proportion between this work and other work done by the department we ought to appropriate the amount recommended by the subcommittee. [Applause.]

Mr. MAGEE of New York. Mr. Chairman, I wish to call the attention of the committee to some facts bearing on the paragraph wherein we have appropriated all that the Director of the Budget recommended. In this bill we appropriate \$533,200.

The first appropriation made under this paragraph was in 1912, \$35,000. The sums appropriated for the various years since that time are as follows:

1913	\$43,000
1914	60,000
1915	110,000
1916	280,000
1917	400,540
1918	395,540
1919	394,820
1920	464,440
1921	456,040
1922	477,240
1923	502,240
1924	502,240
1925	508,880

What has been the result? As stated by my distinguished colleague the gentleman from Texas [Mr. BUCHANAN] the result obtained by the Department of Agriculture has been very satisfactory. Here is a question which I put to Mr. Henderson, a representative of the department, at the hearings:

Mr. MAGEE of New York. Do the depredations of these animals appear to be decreasing?

Mr. HENDERSON. With respect to the wolves and the mountain lions, there can be little doubt but that that is true. We have reduced the numbers of these larger predatory animals, and in some sections wolves are no longer seen where they used to run in packs, and mountain lions are getting scarcer. Their numbers have been reduced in some regions until they are no longer a serious source of damage. Then coyotes, however, are very abundant in the West. They have very large litters, and they have acquired the ability of taking care of themselves in spite of civilization. They have even extended their range into the eastern part of the country as far as Indiana, Michigan, and, I think, some places in Ohio. We have been able in many parts of the country, where we have been working, to reduce the damage, so that, where the damage to the livestock used to be very serious, it is now quite negligible.

Now you practically get down to the question of eliminating the rodents. When you undertake to destroy the coyotes and all the rats and squirrels of different species, rodents of every name and nature, that is a proposition entirely beyond the province or power of the Government.

Mr. COLTON. Will the gentleman yield?

Mr. MAGEE of New York. The gentleman has had his time and I have only a few minutes. The one idea I wish to convey to the committee is that when you get to rodents the communities and localities infested must take some of the responsibility in their elimination. The Government, if it is going into that business, as suggested by my friend from Minnesota [Mr. ANDERSON] would need an appropriation of millions. I think that it is high time that this rapid pace toward paternalism should stop and that we ought to conduct business along business lines. We ought to ask the communities and localities affected to cooperate with the Government. Let them expend some of their money in protection of their own private and individual interests.

The CHAIRMAN. The time of the gentleman from New York has expired. All time has expired, and the question is on the amendment of the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. HUDSPETH) there were 27 ayes and 54 noes.

So the amendment was rejected.

The Clerk read as follows:

For biological investigations, including the relations, habits, geographic distribution, and migration of animals and plants, and the preparation of maps of the life zones, \$29,455.

Mr. JONES. Mr. Chairman, I move to strike out the last word. As I read this bill there are about \$48,000,000 appropriated for the Department of Agriculture outside of the amount appropriated for roads.

Mr. MAGEE of New York. I think \$44,200,000.

Mr. JONES. Then let us say \$44,000,000. The Department of Agriculture has done some very fine work, but as a matter of fact nearly everything in this bill strikes at the problem of production. That is not the real problem that confronts agriculture to-day. It has been said over and over again, until it has become almost trite, that the real problem of the farmer is that of distribution, and I believe that as between the two things it would be wiser if we took the entire \$44,000,000 and turned it over to the Agricultural Department with instructions to organize some clearing houses in the centers of population for the purpose of getting the producer and the consumer closer together. I do not know that it would be wise to abolish the things that the Department of Agriculture is doing now, but I do believe that as between the two the far more important thing would be to have a route established around the present method of distributing the products as between the producer and the consumer. I received a letter from a man in Texas in which he told me a few years ago that there was the finest potato crop in his vicinity that he had ever known, that the potatoes were literally there by carloads, that there was no market for them, and that they could not be sold. A local merchant said that there had not been a call for potatoes for a month. I went down the street in Washington and the retailers were selling them at that time at 32 cents for a quarter of a peck, or nearly \$5 per bushel.

Of course, it is of some service to have these pests killed, to have things known that are in the interest of production, but as a matter of fact I think it would be better to have the Agricultural Department so organized that it could, through methods of standardization or some similar means, put in touch the consumer and the producer. I do not believe it would be necessary to have the department go into business. I do not believe it would be necessary to have that department handle many, and perhaps not any, of the products of the farm; but if there were a short cut established by which those who produce, or organizations of those who produce, could get in direct touch when necessary with those who consume, or organizations of those who consume, the products it would act as a check to keep these middlemen in line. I believe if you would take the \$44,000,000, or even \$25,000,000, and establish in various centers of the country marketing agencies for the purpose of getting in touch the producing organizations with the ultimate purchasers furnishing market news, it would be more nearly a proper governmental activity than most of the things colated in this bill. In this way we would do much more to advance the real interests of agriculture, because if the producers of this country could secure a reasonable portion of the prices which the consumer is now paying, agriculture would be on a much more profitable basis than it is to-day.

The CHAIRMAN (Mr. SNYDER). The time of the gentleman from Texas has expired.

Mr. LAGUARDIA. Mr. Chairman, I am very glad that the gentleman from Texas [Mr. JONES], who comes from a producing district, has seen fit to take into consideration the conditions in the consuming districts. It is rather discouraging

to housekeepers and the tenement dwellers in my district to read cheerful reports from the Department of Agriculture or to hear that crops are plentiful and that food is abundant, and then when they go marketing in the morning to buy food for their families for the day to find prices so prohibitive that people are unable to give their families proper and sufficient nourishment.

Mr. HUDSPETH. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. HUDSPETH. It is not very cheerful to them when they have to pay 55 cents a pound for round steak to learn that I sell my beef for 4 cents a pound.

Mr. LAGUARDIA. Just think of it; and we do not get much steak for 55 cents per pound; it costs nearer about 90 or 75 cents.

Mr. HUDSPETH. It is not very cheerful for them to know that fact.

Mr. LAGUARDIA. No; I should say not. New York City is now building large terminal markets. The cornerstone for a large market in the Bronx district was laid a short time ago. We will also have an enormous terminal market in Brooklyn and one also in Manhattan. These markets will have enormous floor space, storage and refrigerating facilities, and intended for wholesale and retail marketing. If your farmers or your organizations of farmers will take advantage of New York City's terminal markets before the middlemen and speculators get all of the space and monopolize the benefit of those markets, we will be able to establish in one city of the country at least a direct communication between the producer in the rural districts and the consumers in the city of New York. The trouble is in the channels of communication and the many parasitical middlemen between the farmer and the consumer. For instance, you ship to New York to a middleman onions from Texas or potatoes from some other State, or other perishable goods.

They permit those goods to remain in the cars for a day or two in hot weather and then telegraph that they are compelled to sell them because they are deteriorating. Very often they are sold to themselves for a price not sufficient to pay the freight rates. If you can arrange through your cooperative organizations to have space in our new terminal markets, costing millions of dollars, with storage facilities of all kinds, cold and otherwise, it will go a long way toward doing away with the difficulties now confronting us. Under the agricultural laws of our State a farmer shipping into the State is guaranteed his payment, because every commission merchant is under bond, and that law is working out nicely.

Mr. BLANTON. In order to help out the farmers, the merchants of Pauls Valley, Okla., recently pledged the citizens to buy a few turkeys each at 15 cents a pound. Would not the gentleman's constituency in New York like to have some of them at that price?

Mr. LAGUARDIA. We would like to have turkeys, but in New York we could not have them running around in our tenement houses. However, we can take all of the turkeys you can send us for 15 cents a pound, if you can only get them there. I hope you gentlemen who have real agricultural problems will look into our market situation in New York, and I am sure Mayor Hylan and the Board of Estimates of New York City will cooperate with you. I was on the board of estimates when we first appropriated for and approved the plan for these terminal markets, and the purpose was to establish this direct contact. You will have the facilities there, you will have the space there, and any time any of the cooperative organizations are ready to confer with the city authorities, I am sure the mayor, Mr. Hylan, will meet you more than half way.

I believe the plans adopted by my city will work out to our fullest expectation. If your farm organizations or cooperatives will give our plan some study and consideration, I feel certain we have something real in our New York City project.

But let us start now, before the space is taken by the speculating middleman, and establish a direct contact between the agricultural centers and the consuming centers.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn and the Clerk will read.

The Clerk read as follows:

For investigations, experiments, and demonstrations for the welfare, improvement, and increase of the reindeer industry in Alaska, including the erection of necessary buildings and other structures and cooperation with the Bureau of Education, and for the enforcement of section 1956 of the Revised Statutes as amended so far as it relates to the protection of land fur-bearing animals in Alaska,

including necessary investigations in connection therewith, and for carrying into effect the act entitled "An act for the protection of game in Alaska, and for other purposes," approved May 11, 1908, as amended by the act approved June 7, 1924 (Pub. Res. 34, 68th Cong.), \$85,095.

Mr. BUCHANAN. Mr. Chairman, I just want to call the attention of the membership of the committee to the importance of passing some character of bill to give either the Department of Agriculture or the Department of the Interior the right to allot or lease pasture land in Alaska. As it now stands neither department has any right to lease any land. The reindeer business or the breeding of reindeer has grown enormously in Alaska. The climate suits them, the pasture suits them, and a vast private enterprise has developed there in the raising of reindeer. They are being shipped in enormous quantities to the United States and used as beef, but the Government can receive no rental from any pasture or forest land in Alaska. Not only that, the stockmen themselves engaged in this business do not know what to depend upon. They can not get a lease, and they know not how long they will be permitted to graze there, and it is to the Government's interest, and to the interest of the industry of Alaska and this country, that this Congress pass some bill authorizing some conditions under which leases may be made.

Mr. MOORE of Virginia. How much of that sort of land is there in Alaska?

Mr. BUCHANAN. A great portion of Alaska. That same statement applies to fur-bearing animals. These people who engage in that industry and who are occupying a piece of land ought to have the right to know how long they will be permitted to occupy it so as to know whether their investment will be justified by the length of time they will be permitted to use the land. I just wanted to call the attention of the committee to that.

Mr. BLANTON. Mr. Chairman, I ask leave to revise and extend the remarks I made on this bill.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

For acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing, handling, utilization, grading, transportation, and distributing of farm and non-manufactured food products and the purchasing of farm supplies, including the demonstration and promotion of the use of uniform standards of classification of American farm products throughout the world, independently and in cooperation with other branches of the department, State agencies, purchasing and consuming organizations, and persons engaged in the marketing, handling, utilization, grading, transportation, and distributing of farm and food products, and for investigation of the economic costs of retail marketing of meat and meat products, \$539,107.

Mr. MOORE of Virginia. Mr. Chairman, I move to strike out the last line for the purpose of asking my friend who is in charge of the bill for some information. I suppose the gentleman has followed the reading of the bill. We are on page 58, the paragraph at the head of the page. The appropriation in that paragraph is \$539,107. I wish to ascertain why the appropriation for the coming fiscal year is less than the appropriation for the present fiscal year. The appropriation for the present fiscal year is \$550,988.

Mr. MAGEE of New York. That is a decrease made by the Director of the Budget, as I understand it.

Mr. MOORE of Virginia. That being the case, I offer the following amendment, Mr. Chairman.

The CHAIRMAN. The gentleman from Virginia offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. MOORE of Virginia. On page 58, line 14, strike out the figures \$539,107 and insert in lieu thereof \$550,988.

Mr. MOORE of Virginia. Mr. Chairman, the paragraph relates to the subject of acquiring and diffusing among the people of the United States useful information on subjects connected with the marketing, and so forth, of farm and manufactured food products. It is generally recognized that this service and the similar service provided a little further on, have proved of very great and growing value, and although the reduction is not large it seems to me that it should not be made. A reduction to any extent will operate to discourage the work that is going on in the States which are cooperating with the Federal Government.

If a reduction, however small, is made, there will be more difficulty in addition to that which is already being experienced by some of the States in doing what they are doing in the interest of the farmers. Again, while I am not a critic of the Bureau of the Budget, having voted for the budget system, I do not believe in the policy of horizontal or arbitrary reductions. I think a reduction ought to be made when there is a reason for it, but where there is no reason for it there is false economy in making it. That should not be the practice. Some of us have been endeavoring to ascertain why this particular appropriation should be cut down to the extent of about \$12,000. If I am to vote for this bill, and of course I shall vote for it, I must cast my vote in the dark so far as this item is concerned, and I do not think that is a course that should be expected of Members of the House of Representatives in the discharge of the obligations resting upon them. I have looked in vain through the hearings for any word from anybody to justify the action that the committee has taken, and in the absence of any information I submit respectfully to my friend from New York and to his colleagues—and I want to get the attention as far as I can of the Members of the House who represent agricultural districts—that we ought at least to maintain the appropriation at the same amount that was appropriated when provision was made for the needs of the Agricultural Department during the present fiscal year.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. MOORE of Virginia. Just before I yield, Mr. Chairman, I would like permission to couple with my remarks an extract from a letter from the chief of the bureau of markets of my own State and a very brief newspaper clipping which accompanied the letter.

The CHAIRMAN. The gentleman from Virginia [Mr. Moore] asks unanimous consent to revise and extend his remarks in the Record in the manner indicated. Is there objection?

There was no objection.

The extract from the letter follows:

COMMONWEALTH OF VIRGINIA,
DEPARTMENT OF AGRICULTURE AND IMMIGRATION,
DIVISION OF MARKETS,
Richmond, Va., December 9, 1924.

Hon. R. WALTON MOORE,
House of Representatives, Washington, D. C.

DEAR MR. MOORE: The market news on agricultural products has been carried on cooperatively by the United States Department of Agriculture through the Bureau of Agricultural Economics and the Division of Markets of the Virginia State Department of Agriculture for a little more than a year.

Attached is a copy of our report for to-day and a clipping from to-day's Richmond Times-Dispatch, carrying yesterday's report and editorial comment on our market news service, which shows how it is being used by that paper. It is now being printed by practically every other large morning paper in the State regularly, either in full or in part, and many of the smaller papers and some evening papers are printing part of it.

We are supplying agricultural teachers with this information, which they are using to great advantage in their classrooms, and we have supplied telegraphic service of several hundred words to shippers who have paid all expense of same.

Because of a reduction in the amount received by the United States Department of Agriculture for market news service during the present fiscal year we were called upon last July to assume an additional amount of the expense of this service, although we had been paying about half the cost, and we are now putting all the money into this we can afford to from State funds.

I am informed by good authority that the present Budget before Congress of the Department of Agriculture provides for a reduction in the amount for market news service of the Bureau of Agricultural Economics of about \$10,000. If this reduction is made it will probably seriously cripple the service we have just gotten well started, and which meets not only the approval but the demand of farmers, agricultural leaders, the press, and many consumers of our State. In fact the Federal department considered curtailing the service in the South for a few months in the fall when the reduction was made last year, but I frankly told them that if the curtailment were made at the period suggested by them, which is our busiest marketing season—but which might easily be done for some other Southern States—we did not feel that the service should continue periodically.

Very truly yours,

J. H. MEEK, Director Division of Markets.

Mr. MOORE of Virginia. The following is an extract from an editorial by Richmond Maury, agricultural editor of the Richmond Times-Dispatch:

The State division of markets, cooperating with the Federal department, are giving to the farmers of the State a real service in their daily market news report. This report contains the prices for the day on various markets of the country on products that are of interest to Virginia and South. The service was started in August, 1923, and carries this information throughout the South by leased wires.

At present the State division sends this list daily to 486 addresses, having recently, for economy, reduced the list from 793 persons. In addition to all of the papers of the State, the market report is sent to those persons who can make the most use of it. By means of the papers, this daily market information as collected by an uninterested agency is carried to the producers of the State.

Difficulties in the Federal Budget for 1924 threatened the discontinuance of this service for a part of the year to the southern farmers. Through close cooperation on the part of the State the gap was filled. The Budget for 1925 is now coming under consideration. Means should be provided in the appropriations for the Federal Government to carry its portion of the expense for the full continuance of this service to the South. The service has been developing slowly; it was something new and its worth is just becoming fully appreciated.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Virginia. Mr. Chairman, I ask unanimous consent for two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. LAGUARDIA. This appropriation provides, among other things, for the publication of information as to the economic cost of retail marketing of meat and meat products. Has the gentleman's experience been that we have had any benefit from this source along those lines?

Mr. MOORE of Virginia. I can not detail what have been the activities of the Department of Agriculture in that direction. I would like to see something done in the direction indicated by the gentleman. I listened with interest to the remarks the gentleman made earlier in the day with reference to the willingness of the authorities of New York to furnish market space to those who are trying to reduce the city prices to consumers. I would like to ask the gentleman whether if a State should apply to the authorities in New York for space to carry on such work it would be furnished? A Member told me the other day that a State itself was contemplating an effort to supervise the final marketing of some of its perishable products.

Mr. LAGUARDIA. I think the authorities of the State of New York would be only too willing to cooperate and do that very thing.

Mr. MAGEE of New York. I will say to the members of the committee that this is an actual decrease from the appropriation for the year 1925, and is largely due to a reduction of \$8,123 in the attempt on the part of the Government to reduce the personnel in the department. We hear in the House frequent criticisms to the effect that there are so many employees in these different departments that one can hardly get around; that they are so numerous they are falling over each other. The officials of the Budget are endeavoring to reduce the personnel in this department to the extent of probably two or three or perhaps five. It will not affect the efficiency of the work. This important work will be carried on with the same effectiveness as heretofore.

I do not care a copper cent whether the House restores this item or not. If our Democratic friends want to go on record as saying that when we attempt to reduce the personnel of the department they will try to put it back, on them will be the responsibility.

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

Mr. MAGEE of New York. Yes.

Mr. WATKINS. Will the gentleman please tell us what the department asked for on this item?

Mr. MAGEE of New York. I only know what the Budget Bureau recommended.

Mr. WATKINS. Have they cut it?

Mr. MAGEE of New York. It is cut only about \$8,000 in reducing the personnel of the department. That reduction is in harmony with the idea you will find carried out in other paragraphs of the bill, an attempt on the part of the Director of the Budget to reduce the number of employees in the various departments.

Mr. WATKINS. The gentleman does not know, however, what the department asked for this particular item?

Mr. MAGEE of New York. The gentleman means what the Department of Agriculture requested?

Mr. WATKINS. Yes.

Mr. MAGEE of New York. I do not know.

Mr. MOORE of Virginia. I understand from the hearings that the Department of Agriculture asked for what they got last year. We do not get anything very explicit in the hearings.

Mr. MAGEE of New York. Oh, yes, we do. I will refer the gentleman to the hearings on page 498. I read:

Mr. MAGEE. Now, can we go back to this item, which we passed over, Doctor—marketing and distributing of farm products, 1923, appropriation \$549,628, and this year \$539,107, an apparent decrease of \$10,521. How much increase is due to classification?

Miss CLARK. \$1,360.

Mr. MAGEE. So that you have an actual decrease?

Miss CLARK. An actual decrease of \$11,881.

Mr. MAGEE. How does this amount which may be expended for personal services in the District of Columbia, \$321,606, compare with what you are spending now?

Miss CLARK. It is \$8,123 less than we are spending now.

I do not know how to make it clearer.

Mr. MOORE of Virginia. That is certainly not a very clarifying statement. From what was said a while ago I understood that \$1,000 of this proposed reduction would be on account of salaries, but beyond that there is a reduction of eight or nine or ten thousand dollars in the item.

The gentleman from New York says he does not care a copper what is done with it. Does not the gentleman think it better to encourage the great work of assisting the farmers in this important matter of marketing their products than to cut down the appropriation and to that extent discourage the work?

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. MOORE of Virginia. Mr. Chairman, may I have two minutes more?

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. MAGEE of New York. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Virginia. Yes.

Mr. MAGEE of New York. There is no question as to the merit of this paragraph. Everybody agrees to that. I agree with the gentleman from Virginia on this proposition, so that the gentleman from Virginia is not talking to anyone who disagrees with him. The result here is obtained by reducing the number of employees in the department. If he is not in favor of that reduction, I have no objection; but I simply want the House to know what the bone of contention is.

Mr. LANHAM. There is to be no curtailment of the activities?

Mr. MAGEE of New York. No. The idea is just to get rid of a few unnecessary employees. If you are in favor of not reducing the personnel we can not help it. I think the number of employees ought to be reduced in all the departments of the Government. We have made an honest effort to do it.

Mr. MOORE of Virginia. Mr. Chairman, I will ask for three minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. MOORE of Virginia. I want to say to my friend that I am not making any unfriendly attack upon the bill.

Mr. MAGEE of New York. I do not want to be misunderstood. I do not complain of anything that the gentleman from Virginia has said. I only say that I have no contention with the gentleman on the merit of this work. I thoroughly agree with the gentleman. I was only explaining how this reduction came about.

Mr. MOORE of Virginia. I would like to refer to what the gentleman said awhile ago of the Democrats taking responsibility for increases in appropriations that are proposed. As to that, when we come to consider matters of this kind and any matter which relates generally to the success of the administration of the Government, I for one lay aside partisanship and endeavor simply to do what seems to me my duty as a Representative.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas.

Mr. BUCHANAN. The Members of the House will understand that this bill carries, as to every bureau, a limitation on the amount that can be expended for personal services in the District of Columbia.

That limitation runs all through the bill and results in a saving in departmental service of over \$100,000.

Mr. MAGEE of New York. I think materially above that.

Mr. BUCHANAN. The estimate showed \$110,000, but we gave them a little leeway in each bureau and made up for the \$10,000. The estimate showed a saving of \$110,000. In this one bureau that cut in the personal services in the District of Columbia saves \$8,123, so that by subtracting that \$8,123 from \$11,881 you leave this item on its merit decreased \$3,758.

Mr. MOORE of Virginia. I may say to my friend that I can not contest his arithmetic, but that he leaves me, even assuming the correctness of his figures, at a loss to determine why the Bureau of the Budget should have made a cut of between \$3,000 and \$4,000.

Mr. BUCHANAN. I will state to the gentleman that the Bureau of the Budget has been guilty of that practice in many paragraphs throughout this bill; and this committee, whenever it noticed them, generally or sometimes overrode that practice, because we do not believe in making a little cut and disorganizing a well-organized and efficient service. So far as I am concerned, if the gentleman will vote to make his amendment \$3,758, I will vote for it, so it will leave the department exactly as it is; otherwise I would vote against it, because it is wrong to reduce the personnel in one department in the interest of economy and not reduce it in other departments where it can be reduced and ought to be reduced.

Mr. WATKINS. Will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. WATKINS. The testimony discloses this:

How much increase is due to classification?

Miss CLARK. \$1,360.

Mr. MAGEE. So that you have an actual decrease.

Miss CLARK. An actual decrease of \$11,881.

Mr. MAGEE. How does this amount which may be expended for personal services in the District of Columbia, \$321,606, compare with what you are spending now?

Miss CLARK. It is \$8,123 less than we are spending now.

Eight thousand one hundred and twenty-three dollars plus \$1,360 amounts to \$9,480 instead of \$11,000.

Mr. BUCHANAN. The gentleman should keep in mind that the reference is to an actual decrease and excludes the classification.

Mr. WATKINS. Then the classification decrease will be the difference between \$11,881 and \$9,480?

Mr. BUCHANAN. When reference is made to the actual decrease it means it has been decreased that much, and not counting the classification.

Mr. WATKINS. What I am trying to get is what is due to a decrease in the personnel here.

Mr. BUCHANAN. Only \$8,123 is due to the personnel, and they have actually decreased the appropriation on its merits \$3,758, so that if you want to put it back where it was and not decrease the departmental service the amount should be \$3,758.

Mr. KETCHAM. Mr. Chairman, I move to strike out the last two words. I do this for the purpose of calling the attention of the committee to what this paragraph really has in it and what we may expect if this policy is to be followed up. The great address made by the President of the United States in Chicago a few days ago contained no more important feature than that in which he gave emphasis to the matter of extending the markets of the farmers of the country. In going over this whole bill I find that here is practically the only paragraph and the only language which has any connection with the development of foreign markets. Now, if we indicate what we propose to do with reference to the markets of the world by the language that is carried here, it seems to me our policy is hardly in line with the suggestions offered in that splendid address. If it is to be a policy merely of cutting down the employees in the District for the purpose of saving money, I have no quarrel with it. I do want to express my disapproval of decreasing the appropriations made for extending our foreign markets for farm crops. I do not believe either the President or the country desires our work in extending our markets of either agricultural or industrial products curtailed. Here is one place where the flat percentage plan of reduction suggested by the Budget should not be carried out. We ought not to pass this item without having our attention called to the oversight we are making with respect to one very important feature of our great farm-marketing problem, and I have simply risen to call that to the attention of the committee.

Mr. WASON. Will the gentleman yield?

Mr. KETCHAM. Yes.

Mr. WASON. Does the gentleman know that the amount carried in this bill is identical with the President's signed Budget to Congress with respect to this particular item?

Mr. KETCHAM. My understanding is that there is a decrease of a few thousand dollars, the principal decrease being in the amounts provided for employees in the District.

Mr. WASON. This is the exact amount of the Budget.

Mr. MAGEE of New York. Will the gentleman yield to me?

Mr. KETCHAM. Yes.

Mr. MAGEE of New York. We have not cut it at all. We have acted in accordance with the direction of the Budget.

Mr. KETCHAM. May I say this? I am finding fault with making the horizontal cut apply to this very important item in this bill. There is not a more important one in the whole bill than this, and here we are quibbling over a few thousand dollars in connection with it.

Mr. MAGEE of New York. Will the gentleman yield further for a question?

Mr. KETCHAM. Certainly.

Mr. MAGEE of New York. You were talking about the suggestion which the President has made. We have done what the President has directed. That is the only point I am making.

Mr. KETCHAM. Has the gentleman any means of knowing whether the same policy is to be followed in connection with the subcommittee having in charge the appropriation for the Department of Commerce?

Mr. MAGEE of New York. I do not know anything about the work of that subcommittee, because I am not a member of it.

Mr. JONES. Will the gentleman yield?

Mr. KETCHAM. I will be glad to yield.

Mr. JONES. I might suggest that maybe they are trying to save enough money to build another battleship to sink.

Mr. KETCHAM. Of course that is facetious and is immaterial to this matter.

At the same time, I do insist, Mr. Chairman and gentlemen of the committee, that we are passing over a most important item in this bill with a lack of appreciation of the value of this great feature of the work of the Department of Agriculture. I most heartily approve of the amendment that has been offered by the gentleman from Virginia, making the amount equal to that being expended this year for actual field work in extending our foreign markets for farm products.

Mr. SUMNERS of Texas. Mr. Chairman, I rise in opposition to the pro forma amendment.

Gentlemen of the committee, we have been reading a good deal in the papers recently, and there has been a good deal of agitation with reference to what is to be done for the betterment of agriculture. I ask the indulgence of the House for making a few observations. This I deem the proper place in the bill.

In so far as providing credit I think every student of the economic problems of the farmers must agree that that need has been pretty well taken care of. Besides while proper credit is necessary, its value, what may be expected therefrom, has been much misunderstood, much overestimated. In so far as the marketing of those commodities with regard to which the farmer produces a large exportable surplus and what determines the general price, I believe that every student of these problems will agree that Mr. Dawes has told the truth. And, by the way, there may have been other important Republican officeholders and politicians who have told the growers who produce soft wheat and the meat growers the truth with regard to what determines their price, but I do not know who they are. He is the only one I know of. I congratulate him. When he said that the domestic price of commodities, of which the farmers produce a considerable exportable surplus, is determined by the price received in the free markets of the world, he told the truth about it.

We come then to this phase of the agriculture problem—the sale and distribution end of agriculture, which is practically the only place, if we are to maintain the existing tariff policy, and it seems we are to do it, where anything can be done for the farmers. That is all there is to it.

Of course, production and preservation of soil fertility are important and never will be overlooked, but the nerve center of agriculture is not located there. I congratulate the President on having arrived at the point where the nerve center of agriculture is located—at the sale and distribution end of agriculture. I congratulate him and the country on that fact. He says there is the place to get results.

In order to induce the farmers of this country properly to preserve their soil and properly to take care of production, it must be made profitable to the farmer to do it. Make two blades of grass worth more than one was, and it will not be so hard to induce farmers to adopt methods which will have that result and preserve the fertility of the soil while they are doing it.

I believe, too, that every student of the economic problems of the farmer will agree that, aside from the assistance which he can get from cooperative marketing associations, we must bring about a condition under which it will be made possible to deal in agricultural commodities on paper. In order to do this they must be standardized, so that they can be bought and sold by their descriptive trade terms. It seems to me clearly a fact that we must bring about a condition under which agricultural commodities will move under prior sale from the point of first or secondary concentration to the point of need in response to the requirement for need. This never will be possible until we standardize agricultural commodities with reference to the requirement for need.

I criticize the present method of standardization. It does not have the right objective. We have a system of standardization intended to meet the requirements of the merchant. We must continue to develop our system of standardization until each considerable quantity of a commodity possessing distinctive characteristics that are determinative of the use to which it is best adapted shall have a trade term of its own, so that it can be bought under that trade term by those who want exactly that grade and quality for a specific use.

We need in America not only this system of standardization, but we need our system of standardization, our warehousing system, our Departments of Agriculture, Federal and State, and our cooperative marketing associations so organized as to make it possible for a man down in the Rio Grande Valley, for instance, in my country, or a group of people who have a marketing unit of a given agricultural commodity, while it is still in the Rio Grande, to put it in trading contact with the general market. In order to do this, of course, there must be a spot produce exchange, a place where these actual commodities may be actually listed for sale and sold by their descriptive grade terms. There is not a thing which I have suggested which has not been proven by actual test to be sound except their coordination. That has not been done. That is the only sensible objective, and it seems to me the only way we have a chance materially to reduce this spread between the producer and the consumer we have heard so much about.

The idea of sending these perishable articles abroad in the land to find a market, sending them into concentration centers and holding them there under refrigeration at great expense and then shipping them back, frequently over the same route they have come, is entirely wrong. We have had commissions and investigations and reports and speeches galore, charts by the mile, and the same old set of threadbare figures over and over showing spreads, and so forth. The thing to do is to attack this spread where it is located. One way to reduce freight charges is to move these commodities under prior sale from the point of production to the point of use. That will stop congested markets at one place and inadequate supply at another. That will afford the merchant a chance to reach the primary market and at the same time will give to consumers and producers a route around the private controlled avenues of distribution by which they can establish trade contact with each other. That is a better safeguard against unnecessary intervening profits than would be any legislative prohibition. That would tend strongly to hold the total of intervening profits to the basis of economic value of the service rendered. I can not discuss this phase further. I want to illustrate what I think can be done. It is my opinion, if I may be pardoned for expressing an opinion, that the time ought not to be far distant when a man who has a feeding pen of standard-bred cattle will be able, while those cattle are still in the feeding pen, to put them in trading contact with the markets of the world to sell them by grade. When that is so then we will have reached the point that we all desire to reach; namely, the point where the farmer when he comes to sell his commodity will have an equal trade advantage with the man who buys.

When he ships his cattle in to the stockyards where they are held at high expense—maintenance, shrinkage, and so forth—he has got to sell soon at whatever price will be offered. That is true with reference to the other agricultural commodities. I would like to discuss some other phases of this general subject. The working out of what I have suggested will be difficult, of course. It is a big thing, one not easily accomplished, but we ought to come in off of these cold trails and tackle the job. I know it can be done.

Of course, I can not discuss this big subject in this brief time, which is now expired. I ask the privilege of extending my remarks.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to revise and extend his remarks. Is there objection? [After a pause.] The Chair hears none.

The pro forma amendment was withdrawn.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. MOORE].

The amendment was rejected.

Mr. MOORE of Virginia. Mr. Chairman, in accordance with the suggestion made by the gentleman from Texas [Mr. BUCHANAN], I offer a further amendment to the paragraph of the bill under consideration which is designed to substitute for the figures in the bill, which are \$539,107, the sum of \$542,865, which, as the gentleman from Texas [Mr. BUCHANAN] has stated, seems to be the amount that ought to appear in the bill unless there is to be an arbitrary reduction.

Mr. MAGEE of New York. I will say to the gentleman from Virginia that I will accept the suggestion of my colleague the gentleman from Texas [Mr. BUCHANAN].

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Virginia: On page 58, line 14, strike out the figures "\$539,107" and insert in lieu thereof the figures "\$542,865."

The amendment was agreed to.

The Clerk read as follows:

For collecting, compiling, abstracting, analyzing, summarizing, interpreting, and publishing data relating to agriculture, including crop and livestock estimates, acreage, yield, grades, stock, and value of farm crops, and numbers, grades, and value of livestock and livestock products on farms, in cooperation with the extension service and other Federal, State, and local agencies, \$472,910: *Provided*, That \$65,360 shall be available for collecting and disseminating to American producers, importers, exporters, and other interested persons information relative to the world supply of and need for American agricultural products, marketing methods, conditions, prices, and other factors, a knowledge of which is necessary to the advantageous disposition of such products in foreign countries, independently and in cooperation with other branches of the Government, State agencies, purchasing and consuming organizations, and persons engaged in the transportation, marketing, and distribution of farm and food products, including the purchase of such books and periodicals as may be necessary in connection with this work: *Provided further*, That no part of the funds herein appropriated shall be available for any expense incident to ascertaining, collating, or publishing a report stating the intentions of farmers as to the acreage to be planted in cotton.

Mr. JONES. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. I noticed a statement in one of the New York papers the other day by a Mr. Callander, who, it seems, has charge of the estimates of cotton production, in which he rather advocated the deferring of making any estimate of cotton production until August 1 or August 15. Did he appear before the committee and make suggestions along that line?

Mr. MAGEE of New York. Mr. Callander appeared before the committee, but I suggest that the gentleman from Texas put his question to his colleague Mr. BUCHANAN, who is a cotton expert.

Mr. JONES. Under the law that exists at the present time the reports begin the 1st of July and are published every two weeks thereafter through the cotton-producing season. Of course, any estimates made before the time that the crop matures are in a great measure matters of conjecture, because the pests that frequently infest the cotton have not yet gotten in their full work. I notice that Mr. Callander made a speech before some cotton organization in New York, in which he said it was the opinion of the department that no estimate should be made before the 1st or probably the 15th of August; that at that time it would become apparent how well the cotton was going to mature and develop. I assumed that he was going to suggest to the Committee on Agriculture that it was unnecessary to make any estimate until that time. He did not say he was going to do so, however.

Mr. BUCHANAN. That question did not come before the committee; if it had, I would not have agreed with it.

Mr. JONES. He, as I am informed, is the man who has charge of giving out the data and final estimates. He is reported to have made this speech in which he advocated doing away with the estimates because of the fact that up to that time it was largely guesswork. In justice to him I will state that he did not take that position absolutely, but, rather, left the impression that that was his idea.

Mr. BUCHANAN. Not altogether guesswork; they have the acreage and they give the condition of the cotton week after week and month after month. Of course, as the gentleman says, it may be destroyed by pests at any time.

Mr. JONES. According to his statement it becomes more apparent about the middle of August and the estimates are more reliable. I am not quoting Mr. Callander but I am giving it in substance as it appeared in the paper. Here is the idea they seem to have: Frequently in July and August the conditions give promise of making a much larger crop than they do about the time the crop matures. The estimates therefore are likely to be larger, and this is just prior to the time when the cotton is to be put on the market, just as the cotton begins to come into the market. Then if the estimates are large, the price will likely start at a lower basis than it would if they waited and gave the estimates later.

Mr. BUCHANAN. As a matter of fact, it might be just the reverse.

Mr. CARTER. If the gentleman will yield, was it not just the reverse this year; was not the estimate in July less than that in August?

Mr. JONES. There have been cotton estimates for nine years, and in seven of those years there has been an overestimate of more than a million bales. In nearly every month of the seven years there was an overestimate. I know, for I put the figures in the RECORD last year and I secured them from the Agricultural Department. In seven out of the nine years prior to the present year there has been an overestimate and frequently as high as 1,000,000 bales. Now, I confess—I do not know whether the prodding they were given in the committee and the panning in the House and the criticism throughout the country had any effect, but they have been much more accurate this year than formerly.

They have a very difficult task to perform, and I am sure they are improving their method of making estimates from year to year. It is perhaps natural that a good many mistakes would be made the first few years. At any rate, I feel sure that their system at the present time enables them to be more accurate than they were able to be the first few years.

Mr. MAGEE of New York. Mr. Chairman, I move to strike out the last word. If the gentleman from Texas will refer to page 487 of the hearings he will find where Mr. Callander made this statement:

The situation is this: We do not make an estimate of the acreage of cotton until the 1st of July. It is not the acreage planted. We estimate the acreage in cultivation. There is usually 1 to 3 per cent of the acreage planted, and sometimes a great deal more, which is plowed up and abandoned by the 1st of July. That is discounted. That is not included in the estimate of acreage in cultivation. Then, in order to avoid overestimating in the early part of the season, until some line on what is likely to be abandoned is obtained, which is usually not very much until later in the season, an allowance is made in making our forecasts for acreage abandonment. If in Texas, for example, acreage abandonment is 3 or 4 per cent, or whatever it is, that is allowed for in the early forecast.

Mr. JONES. That has to do largely with the cotton acreage. They also make an estimate of the number of bales of production, beginning July 1. While they use the acreage report in arriving at the estimate for production, they are two entirely different things.

The pro forma amendment was withdrawn.

The Clerk read as follows:

For collecting, publishing, and distributing, by telegraph, mail, or otherwise, timely information on the market supply and demand, commercial movement, location, disposition, quality, condition, and market prices of livestock, meats, fish, and animal products, dairy and poultry products, fruits and vegetables, peanuts and their products, grain, hay, feeds, and seeds, and other agricultural products, independently and in cooperation with other branches of the Government, State agencies, purchasing and consuming organizations, and persons engaged in the production, transportation, marketing, and distribution of farm and food products, \$709,748.

Mr. LOZIER. Mr. Chairman, I move to strike out the last word, and I ask unanimous consent to extend my remarks in the RECORD on the bill.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD on the bill. Is there objection?

There was no objection.

Mr. LOZIER. Mr. Chairman and gentlemen, since I became a Member of this great legislative body I have to the full extent of my limited ability endeavored to secure legislative action that would, at least to some extent, insure to the agricultural classes equality of opportunity and the social and economic justice so long denied them. I have repeatedly called attention to the alarming condition of American agriculture and I have endeavored to show, and I believe I have conclu-

sively shown, that the economic distress through which agriculture has been passing, and from which it has not yet emerged, is not primarily chargeable to the farmers themselves, but is largely the result of legislative favoritism and an abuse of power and privilege by those who arbitrarily and selfishly control the economic forces of the Nation.

It is not my purpose to discuss in detail the concrete cause of the present nation-wide agricultural anemia further than to say that for several years the American farmer has not been able to sell his commodities at a price that would even return the cost of production, much less afford a profit. The purchasing power of the farmer's dollar is very substantially impaired. There is an alarming and unjustifiable spread between the price at which the farmer sells his commodities and the price he pays for his supplies, and this spread is constantly increasing, to the serious economic injury of agriculture. Indeed, for a number of years the farmer has annually faced a deficit and has been living off of the earnings and accumulations of former years. This encroachment on the farmer's capital stock can not continue indefinitely without irreparable injury to the farmer; and, may I say in passing, the shrinkage in the agricultural wealth of the United States in the last four years has been so stupendous that it is difficult to comprehend how agriculture has been able to stand the economic strain to which it has been subjected.

Unfortunately the farmer has ceased to be a factor in the legislative affairs of the Nation. Other vocational groups easily succeed in impressing their demands and will on Congress and the administration, and as a necessary result, practically all the economic legislation in the last half century has had for its object the enrichment of the manufacturing and commercial groups, obviously at the expense of the agricultural classes. No comprehensive and well-considered legislative program for safeguarding the vital interests of agriculture has ever been enacted. Such legislation as has been enacted for the improvement of agricultural conditions has been tardily and grudgingly granted, and has manifestly been fragmentary and incomplete.

Now, in view of the fact that other favored occupational groups control the legislative and economic forces of the Nation, is it not time for the farmers to "stop, look, and listen," and devise plans by which they may be insured equality of opportunity?

In numerous other addresses I have discussed the condition of agriculture, its needs, its proper relation to other vocations, its claims on the Government, and the duty and necessity of the manufacturing and commercial classes giving agriculture a square deal, and permitting it to enjoy a reasonable share of our national prosperity. I have heretofore discussed the aid that should be afforded by the Government and other external agencies. But to-day, prompted by a desire to be helpful, I shall, in the limited time at my command, suggest some things the farmers can and must do for themselves to improve their economic condition.

Farmers must reach an agreement on great economic policies, the recognition and application of which are conditions precedent to the revival and permanent well-being of agriculture. Obviously the selection of these policies require mature consideration. We must analyze existing conditions in the light of past experience and future probabilities. The agricultural brain must function more efficiently, and the agricultural will must express itself more forcibly and definitely before we can hope for substantial relief from present unfavorable conditions.

There is a profound philosophy underlying the profitable activities of the agricultural classes. The farmer must work in harmony with sound economic principles, if he would reap richly where he has sown, and gather largely where he has scattered. We can not defy or ignore the fundamental principles that permeate and vitalize every other successful and profitable calling. We can not run counter to the safe and sane business policies that are the price of success in other vocations.

In the present agrarian emergency, conditions demand the abandonment of slipshod farming and financial methods, a radical reduction in overhead expenses, rigid economy, and intelligent and efficient management. Unless brain is mixed with brawn, the balance at the end of the year will be on the wrong side of the ledger. Farming is as much a business as manufacturing, commerce, and transportation, and there is the same necessity for the use of prudent business methods in farming, and in farm finance, as in these other great occupations.

The farmer's objective is to establish his calling permanently on a profit-producing basis, which can only be attained by the abatement of legislative favoritism and removal of economic

handicaps and by patient industry, intelligent personal supervision, and painstaking attention to details.

The farmer can not conduct his affairs slovenly, extravagantly, or profligately and escape insolvency. He must see to it that the income from his farm exceeds the outgo, and he should never lose sight of the basic truth that he has failed or at least is economically slipping unless the year's business shows a profit. While the present nation-wide agricultural distress is largely the result of pernicious economic policies over which the farmer has had no control and for which he is not primarily responsible, nevertheless very frequently much of the trouble is traceable to unbusinesslike methods, neglect, inattention to details, excessive and unnecessary overhead expense, and, in some instances, to extravagance, speculation, and reckless disregard of safe and sane business methods.

Agriculture is the most important single industry in America, and therefore if it is to be made a profitable calling we should not only draft the keenest intellect in the world of agriculture but the best brain power of the Nation should be requisitioned to aid in formulating methods and establishing benevolent policies by which agriculture may function efficiently and profitably and be established on a stable and permanent basis. We must therefore apply the acid test of reason and common sense to the myriad plans and policies that now bewilder and confuse. We must separate the practical and wholesome from the impracticable and vicious. In the crucible of sound logic and in the blast furnace of reason the economic gold must be separated from the economic dross. We must subject every proposal, every business plan, every suggested remedy to the test of logic, reason, and common sense, for only by so doing can we determine what policies will best promote the welfare of the agricultural classes.

The farmer should adopt a bill of rights declaratory of principles and policies that will insure for agriculture equality of opportunity. We need an agricultural magna charta that will curtail the power and limit the greed of profiteers, abate monopoly, restrain industrial and commercial buccaneers, and prevent a wrongful invasion of the economic rights of those who produce the food that satisfies the hunger of mankind. There must be a recognition of the principle that there can be no worth-while, nation-wide, or permanent prosperity unless agriculture shares in that prosperity. All other vocations must concede the necessity of agriculture being permanently placed in the list of profitable occupations. This agrarian bill of rights, this agricultural magna charta, must be formulated along broad and comprehensive lines and should enunciate well-established economic principles and demand the recognition and concrete application of those outstanding economic policies, on the inexorable operation of which the permanent prosperity of the agricultural classes largely depends. These policies should not be bent and twisted in an effort to make them applicable to every conceivable condition or to furnish a remedy for every imaginary abuse or to protect one from the inevitable consequences of his own folly; but they should embody workable principles, from the just and rational application of which improved conditions may reasonably be expected.

Much of the farmers' trouble results from their failure to act in concert. There is a deplorable lack of unity—an absence of centripetal force that draws, unites, anneals, and solidifies. In the past there has been but little agreement among farmers as to what economic policies will best promote and conserve their interests. The agricultural classes do not always speak the same language, advocate the same policies, or support the same legislative program. Frequently we have ignored simple business principles and immutable economic laws. Ofttimes we have failed to distinguish between cause and coincidence. Even now in this protracted period of agricultural anemia, the farmers, farm organizations, and farm papers are not agreed on the remedies that will afford agriculture either temporary or permanent relief.

In unity there is strength; in division there is discord, weakness, and failure. So long as the farmers of the United States are divided into numerous opposing and contending factions, making war on each other, they can not hope to accomplish anything. Group rivalries, factional undertows, and antagonistic organization cross currents will neutralize their altruistic activities and render impossible the attainment of their legislative and economic objectives. The need of the hour is for unity in our agricultural faith and creed; unity of purpose, unity in principles, and unity in efforts and action. This unity must be real, not merely nominal. It must be more than a rope of sand; something more than lip service or voice loyalty. Farmers must no longer divide into warring factions, but should present a united front, support the same legislative and

economic program, and stand foursquare for policies bottomed on reason, and which appeal to the intelligence and sober judgment of our thoughtful, level-headed, forward-looking farm leaders. They should establish and adhere more rigidly to a definite agricultural creed and confession of economic faith. They must learn to differentiate between good policies and bad policies; between wholesome and practical remedies and visionary and impractical experiments. They need a definite formula or standard, by which to determine the effect of legislative and economic policies on agriculture.

There should be an end to the unseemly rivalry, bickerings, and contention that have divided the agricultural classes into hostile groups and neutralized the energies of the millions constituting the most numerous and important single class of workers in the world. Reason requires that we get together and coordinate our energies and efforts.

The agriculturalists should be as thoroughly organized as the industrial, commercial, and professional classes. The world does not always know what the farmer thinks, what he needs, or what he demands, because, too often, those who speak for the farmers do not speak the same language, give the same diagnosis of agricultural conditions, agree on economic or legislative policies, or accurately reflect the will of the agricultural classes.

Farmers can not secure substantial results or win a worthwhile victory in their present divided condition. Agriculture must have one mind, and one mind only on economic and legislative policies. It must close up its ranks and end the internecine war that has neutralized its influence and rendered its efforts impotent. Without this unity it can not come into its own, or attain a position of vocational dignity and influence.

The farmer suffers not only from lack of organization but he is the victim of organization, reorganization, and disorganization. We have too many organizations assuming to speak and act for the farmer which speak in an unknown tongue and often fail to reflect the farmer's will or protect his interests. Disclaiming any intention to criticize any of these organizations or to disparage their accomplishments or to discuss their merits or demerits, I nevertheless make bold to say that too often the wholesome purpose of these several groups is sacrificed on the sharp edge of envy, jealousy, group rivalry, self-aggrandizement, and, may I say, at times inefficiency. So far as I know all of the many farm organizations are founded on wholesome principles, have altruistic aims, and are designed to promote the good of the agricultural classes, but these organizations have been multiplied unnecessarily. The rivalry between these different farm groups is so pronounced that they are often exceedingly hostile toward each other, thereby neutralizing their influence and making it practically impossible for any of them to accomplish substantial results. Seldom do they feature the same policies or advocate the same legislative or economic program. Ofttimes when they should be united and actively cooperating they are at cross purposes, strenuously combating the plans, policies, and proposals of each other. Each pretends to speak for agriculture, but each represents only a part of a divided house; and a house divided against itself shall not stand.

Congress, in doubt, inquires what do you farmers want? What economic program do you favor? What legislative relief do you demand? To these inquiries frequently the rival farm organizations give no harmonious and clear-cut response. Each offers its own legislative program as a panacea for all agricultural ills and opposes the policies of rival farm organizations. During the recent session of Congress there was more unity and cooperation between the national organizations than usually prevails, but even then they did not speak as with one voice.

Now, something is radically wrong when the great farm organizations are unable to agree upon an economic or legislative program; when, instead of cooperating with one another, they spend their energies in undermining the influence of rival organizations. I am making no charge against any particular farm group, but commending all for the good they have done; nevertheless, it is obvious that we have many more farm organizations than are really necessary to work the will of and to efficiently serve the agricultural classes. Indeed, these farm organizations have become so numerous that they actually get in the way of one another, which makes it extremely difficult for even the best of them to function efficiently.

It would not be so bad if all these farm organizations supported the same economic policies and advocated the same legislative program.

Let us hope that by absorption, union, amalgamation, or by some other fair process many of these rival farm organizations may be eliminated, so we may have only a very few

national bodies to speak and act for the agricultural classes and to interpret and reflect their will. Without such a centralization and unity agriculture can not make its power felt in the never-ending struggle for equal opportunity and economic independence and vocational stability.

The agricultural classes must be actuated and inspired by a militant loyalty and devotion to the best interests of this great basic industry. Farmers should not forget that an injury to one is the concern of all; that what will promote the interests of one farm group will not injuriously affect another farm group; that in unity strength will be found for the grave tasks of the hour; that division and lack of cooperation spell disaster. This cooperation must be more than skin deep. There must be a willingness, if need be, to suffer a little temporary loss in order to establish helpful economic policies, strengthen their organization, and get in a better position to protect our interests in the future.

Too long have the farmers acted on the old adage, "Every fellow for himself and the devil take the hindmost." As a result, and because of this lack of cooperation, the profiteers, monopolists, and special-privilege groups, by sapping its substance, have brought agriculture dangerously close to bankruptcy.

The solution of the agricultural problem is both external and internal. The relief must come from within and without. There are numerous factors in this complicated equation, some of which are under the control of the farmers themselves and some are controlled by the Government and some by the special-privilege classes. The handicaps resulting from legislative discrimination must be lifted. "Big business" must give agriculture a square deal. The manufacturing and commercial classes must cease to exploit and ravish agriculture. The farmer must have a living price for his commodities and a voice in the conference at which the business and economic activities of the Nation are determined. But if all these remedies should be provided much would still remain to be done by the farmers themselves before agriculture would be securely anchored in the lists of profitable occupations.

The Clerk read as follows:

ADMINISTRATION OF THE UNITED STATES WAREHOUSE ACT

To enable the Secretary of Agriculture to carry into effect the provisions of the United States warehouse act, including the payment of such rent outside of the District of Columbia and the employment of such persons and means as the Secretary of Agriculture may deem necessary, in the city of Washington and elsewhere, \$205,060.

Mr. WILLIAMSON. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Page 61, line 17, strike out the figures "\$205,060" and insert in lieu thereof "\$215,060."

Mr. WILLIAMSON. Mr. Chairman, as will be observed, this adds \$10,000 to the appropriation carried in the bill. The warehouse act has proven to be one of the most valuable pieces of legislation that has been enacted in the interest of American farmers in recent years. Already many public bonded warehouses have come into existence. The cooperative associations among the farmers are just beginning to learn the value of the utilization of these bonded warehouses. This law has done more to stimulate the cooperative movement among the farmers themselves than any other thing that Congress has ever done.

At the present time the receipts issued by the warehouses are printed on specially prepared paper approved by the Department of Agriculture and printed by a bonded printer. The warehouse receipts issued as evidence of stored farm products are everywhere accepted as the best class of security by the banks, and the local banks have no difficulty in discounting this character of paper with the Federal reserve and rural-credit banks. As a result of the favor in which these warehouse receipts are held as security, the cooperatives of our State have been able to borrow all necessary funds for the carrying on of their legitimate business in handling such farm products as are now warehoused, but under present conditions it is impossible in our State to secure the warehousing of alfalfa seed. In South Dakota, North Dakota, Nebraska, Wyoming, and Montana the production of alfalfa seed has gotten to be an important industry, running into hundreds of thousands of dollars annually. Alfalfa seed to-day is sold largely through cooperatives in our State, but we have been unable to take advantage of the warehousing act because the appropriation is so limited that it has been impossible to organize a sufficient personnel to take care of alfalfa seed under the warehousing act.

I have been in conference with the department officials in regard to this matter, and am informed that if there were added to the appropriation the sum of \$10,000 they would be able to add alfalfa seed to the products now being warehoused. With \$10,000 additional the situation in our State and the surrounding States could be properly taken care of.

This is one of the most important items in the bill and I believe the additional \$10,000 ought to be allowed in the interest of the midwestern farmers. It is a small amount, but it seems to be absolutely necessary in order to give the service we need in connection with our cooperatives that are handling alfalfa seed. I hope the committee will approve this amendment. It is asking but a small favor and should be graciously extended.

The cooperative marketing movement among our midwestern farmers is just in its infancy. It is a movement in the right direction and ought to be given every possible encouragement. Wisely managed, it will prove to be the real solution of the farm problem. Every facility should be offered the cooperatives to store grains and seeds in these bonded warehouses, and the least that this Congress can grant is to allow a sufficient appropriation to enable the Department of Agriculture to provide the necessary storage facilities, manned with a sufficient personnel to care for such products as may be offered for storage. Ample warehouse facilities will largely solve the problem of adequately financing our local cooperatives.

Mr. MAGEE of New York. Mr. Chairman, the apparent increase in this item over the year 1925 is \$18,560. Of this amount \$10,560 is for the classification of field employees. An actual increase of \$8,000 is to provide for the rapidly increasing volume of work due to the large number of warehouses which are being licensed under the warehouse act. The number of warehousing products, cotton, grain, wool, and tobacco, has been extended to include corn, potatoes, and peanuts, and preliminary work has been done on beans and dried fruit.

I do not feel competent to say whether this list should be extended to include alfalfa. Probably many Members of the House are more competent to speak on that proposition than myself. The warehouse act is an important act. We recognize that, and we gave the department, apparently, what they wanted. We gave them this increase, as I have said, because of the increasing number of warehouses that are being licensed under the act. I have risen simply to put before the members of the committee the facts as we got them.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from South Dakota.

The amendment was rejected.

The Clerk read as follows:

COMPLETION OF WOOL WORK

To enable the Bureau of Agricultural Economics to complete the work of the domestic wool section of the War Industries Board and to enforce Government regulations for handling the wool clip of 1918 as established by the wool division of said board, pursuant to the Executive order dated December 31, 1918, transferring such work to the said bureau, \$11,290, and to continue, as far as practicable, the distribution among the growers of the wool clip of 1918 of all sums heretofore or hereafter collected or recovered with or without suit by the Government from all persons, firms, or corporations which handled any part of the wool clip of 1918.

Mr. TAYLOR of West Virginia. Mr. Chairman, I move to strike out the last word. The bill under consideration is one that confers broad powers upon the Secretary of Agriculture, and justly so. As a matter of State pride, I think that it is not amiss at this time to call to the attention of this committee the fact that the Secretary of Agriculture, Hon. Howard M. Gore, is a West Virginian.

There will be a new Secretary of Agriculture after March 4 next. The fine administrative ability of Mr. Gore, recently given substantial recognition by the President of the United States in placing him at the head of this great Department of Agriculture, has been recognized in a greater measure by the people of West Virginia, who have called Mr. Gore to be governor of that State for a four-year period, beginning on the same day that his commission as Secretary of Agriculture is handed back to the President.

For the third time in the history of West Virginia she has been honored by a place in the President's Cabinet, and her place in the sun has been more firmly established. In the higher call of Mr. Gore to the governorship, I feel that the country as a whole loses the services of a splendid administrative officer and that West Virginia is the gainer thereby. [Applause.]

Mr. BLANTON. Mr. Chairman, I move to strike out the section. If my amendment should prevail, this would save \$11,290. There was a time right after the war when this wool section bureau was necessary, but that time is past now.

What is the use of longer keeping up this business? If you would investigate, you will find that every dollar of this money pays salaries of individuals, continuing them on the pay roll, on and on. I do not see any necessity for keeping on paying for war work that ought to be over. If it is not wound up now, when is it going to be wound up? I do not care to take any further time, but I hope that the committee will let it go out. It is not doing the woolgrowers any good in my section or down in the section of my colleague Mr. HUDSPETH, and it is not doing the woolgrowers of New Mexico or anywhere else any good that I know of.

Mr. MAGEE of New York. Mr. Chairman, we fought out this proposition pretty completely, as gentlemen will remember, at the last session of Congress. The work ought to be completed, and I had hoped that the work would be completed during the fiscal year 1925. The Department of Agriculture claims that it has done all that it can possibly do, and I think it has. That department gave us the inference that the delay was due to the Department of Justice. There are a great many important suits pending, involving large amounts of money. The House, of course, can not force the Department of Justice to go ahead, push these cases, and get a final determination in the courts as soon as possible.

Mr. BYRNS of Tennessee. Will the gentleman yield for a question?

Mr. MAGEE of New York. But I think the department ought to press these suits, as suggested by the gentleman from Texas [Mr. BLANTON]. I want to get the facts before the members of the committee. The Government started in and collected a lot of money from the little fellows, so called, who bought the wool. The total amount collected to date is \$752,930.20. Of that the Government has distributed \$450,235.07. There is approximately \$220,000 in the Treasury which has not been distributed, because the Government does not know to whom to distribute it, neither the names of the persons nor the addresses of those to whom these moneys belong. These moneys eventually will go into the miscellaneous receipts of the Treasury, as well as a part of the additional amounts that may be collected. There are claims in the amount of \$724,000 outstanding, and the Government claims that those moneys are owed by a few persons, the large dealers. The question we have to determine now is whether the Government, having pursued persistently the little fellows, will quit on the big fellows. I am not in favor of that policy.

Mr. BYRNS of Tennessee. Now, will the gentleman yield? The gentleman will remember a year ago when this appropriation was before the House I had something to say in opposition to the appropriation. Now, at the time, I am not certain the gentleman made a definite statement, but somebody handling this bill before the House left me under the impression that there would have to be a decided showing that progress was being made by the department toward winding up this work or the appropriation would be eliminated this year. Now, the gentleman says they have \$220,000 in the Treasury belonging to somebody, but nobody knows their names, nobody knows the addresses of those who are entitled to that sum, and eventually it will go into the Treasury. I want to submit to the gentleman that if we continue to appropriate \$11,000 a year to pay a few salaries in the Agricultural Department that sum of \$220,000 is going to rapidly diminish.

Mr. MAGEE of New York. I want to say that I do not concur in that statement, because the more money the Government collects the more money will go into the miscellaneous receipts of the Treasury.

Mr. BYRNS of Tennessee. If the gentleman will permit me—I am sure the House will give him more time if he wants it—I understand that, as the gentleman says, the money was collected off the little fellows. Now, the big fellow, the man who owed a larger amount, has refused the department's demands for payment, and it is necessary to bring suit. I understand that those suits have been brought and are now in the hands or under the jurisdiction of the Department of Justice.

Mr. MAGEE of New York. Except one.

Mr. BYRNS of Tennessee. Why is it necessary to maintain exactly the same force, maintain them to sit down and fold their hands in the Agricultural Department, drawing salaries, and so forth, awaiting the disposition of these lawsuits which may drag along for several years?

Mr. MAGEE of New York. They are not doing that. They have their work to do, and the employees in the Department of Agriculture who have prepared the cases are the only ones who know the facts. They have to prepare the cases and ascertain the witnesses who can be called upon in the trial of those cases. You can not get along without them, and even if this appropriation is not made, I understand that

these persons will still continue in the employment of the Department of Agriculture. I feel exactly about this proposition, so far as winding it up is concerned, as the distinguished gentleman from Tennessee. I do not know what I said a year ago, but I certainly felt as the gentleman expresses himself now. If the gentleman will examine the hearings he will see that I questioned pretty sharply the representatives of the Department of Agriculture who came before the committee. You will find from the hearings that the Department of Agriculture took the position that this paragraph should be continued, and that if it was dropped probably those cases now pending to collect from these big fellows, as they call them, involving some seven hundred thousand dollars, would be dropped. That was the idea expressed by the Department of Agriculture.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. MAGEE of New York. Mr. Chairman, may I have two minutes more?

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WATKINS. The appropriation is \$11,280. I want to ask the gentleman a question. What about the expenditure in the District of Columbia, that there shall be spent not over \$8,600? That is on page 554 of the hearings. Why is the appropriation larger than the law allows it to spend? I think it should not be over \$8,600 anyway.

Mr. MAGEE of New York. The sum of \$8,600 is what they are expending for personal services in the District of Columbia.

Mr. WATKINS. Yes. I understand that is the limit, as your statement implies, beyond which they can not spend.

Mr. MAGEE of New York. No; printing and some other clerical work makes up the difference.

Mr. WATKINS. The difference between \$11,280 and \$8,600?

Mr. MAGEE of New York. Yes. I am not criticizing the Department of Justice. I do not know how the House can force the Department of Justice to speed up these cases. All I can do, particularly in view of the existing situation, is to explain what the Government has done in these cases. I think that the Department of Justice ought to take up these cases and push them to a conclusion as speedily as possible.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent that the gentleman from New York may have two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BLANTON. The gentleman does not mean to intimate that our action here in dropping these few clerks off the pay roll of the Agricultural Department would affect the action of the Department of Justice in these cases? The department will carry on these cases just the same?

Mr. MAGEE of New York. That is what they say will happen. If you will read the hearings you will see that.

Mr. BLANTON. The Department of Justice is in a bad position if it is interfered with by the fate of these few clerks.

Mr. MAGEE of New York. That is what appears in the hearings.

Mr. MOORE of Virginia. Does not the gentleman know, from what we have heard, that the collection of this money would not have been accomplished except for the work of the Department of Agriculture in collecting the information?

Mr. MAGEE of New York. Exactly.

Mr. MOORE of Virginia. I find that in the last few months collections have gone on. An amount considerably in excess of this sum of \$11,000 has been collected.

Mr. MAGEE of New York. I will say to the distinguished gentleman from Virginia that in the last year they have distributed a very considerable amount, which I would like to put in the Record. The hearings show that during the year \$57,000 has been distributed.

The CHAIRMAN. The time of the gentleman from New York has again expired. The question is on the amendment offered by the gentleman from Texas.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

COOPERATIVE DISTRIBUTION OF FOREST-PLANTING STOCK

For cooperation with the various States in the procurement, production, and distribution of forest-tree seeds and plants in estab-

lishing windbreaks, shelter belts, and farm wood lots upon denuded or nonforested lands within such cooperating States, under the provisions of section 4 of the act entitled "An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote the continuous production of timber on lands chiefly suitable therefor," approved June 7, 1924, \$50,000, of which amount not to exceed \$2,650 may be expended for personal services in the District of Columbia.

Mr. WHITE of Kansas. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Kansas moves to strike out the last word.

Mr. WHITE of Kansas. Mr. Chairman, I wish to address some inquiries to the chairman of the committee on the subject of the appropriations on page 70, line 1, and continuing on page 71, just read.

I want to say that I think this is an important undertaking. I have traveled a good many times throughout the States lying between the Capital of the Nation and the State of Kansas, where I live—not as early in my life as I desired, but finally—and I have observed the beautiful wood lots in the State of Indiana and in that "Irish State of Ohio," and I have seen with what great care they have been kept and preserved. It is to me a very interesting subject. Then I have come along here and ridden through the States of Virginia and Pennsylvania and some others of the seaboard States, and I have seen a great waste in timber, thousands of trees lying prone upon the earth. And incidentally it made me think of a remark which a boyhood friend made at one time, to the effect that there were only two things that he hated to do—one was to work and the other was to chop wood. [Laughter.] It seems to me that antipathy is somewhat widely diffused.

But seriously, I would like to ask the chairman what it is proposed to do with this money. I note with some surprise that only \$2,650, in the first item, is to be expended for personal services in the District of Columbia. That seems ridiculously out of proportion, according to my way of thinking, as compared with the other appropriations carried in this bill.

In the second item only \$2,600 can be expended in the District of Columbia. I wonder if the chairman, as a matter of information to this House, could tell the House, especially Members like myself, who are so much interested in this subject and who live in States where there is not so much natural timber, how it is proposed to advance this work. Can the chairman do that? I regret that I have not had time to examine the hearings.

Mr. MAGEE of New York. I could not attempt to do that, but I will simply say to the gentleman that we are trying to carry out the provisions of the act of June 7, 1924, known as the McNary-Clark Reforestation Act. No appropriations have been made under that act heretofore. What those who are to carry out the act propose to do, I do not know. We have given the sums recommended by the Budget to supply what is needed to carry out the provisions of the act passed last June.

Mr. WHITE of Kansas. Well, Mr. Chairman and gentlemen, I would like to see the same beautiful, well-kept wood lots in the State of Kansas that I see in the States of Indiana, Ohio, and Illinois. We can not have them in a day. I suppose it was only a full-grown tree to which some writer referred, apostrophizing those eminent qualities that render human life vigorous and strong, when he said that such and such a man was built like a forest tree, the broad oak, that strikes its roots deeply in the earth, or like the tall cedar, that lifts its head above the other forest trees. Those trees must have been centuries in developing. I would like to have those trees, or trees like them. I wish the gentleman from New York would tell us how we can get those trees. The officials in charge of this service, it is understood, are going to start, perhaps, in a year from now. I would like to ask the chairman to tell us how we can get them.

Mr. MAGEE of New York. Mr. Chairman, I ask for five minutes in order to answer the gentleman from Kansas [Mr. WHITE].

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. MAGEE of New York. I may say to the distinguished gentleman from Kansas [Mr. WHITE] that this is what Colonel Greeley, who has charge of the Forest Service in the Department of Agriculture, said in the hearings:

What we actually expect to accomplish is this: At the present time all of the forest planting in the country amounts to less than 40,000 acres a year; what the Federal Government does, what the States do—

The idea is for the Federal Government to cooperate with the States, of course—

what is done by the farmers, what is done by everybody else—the entire amount is less than 40,000 acres a year, as compared with about 300,000 acres a year in Japan alone. Now, if we get this activity going, even with the \$50,000 proposed for this year, we expect to increase that acreage by at least 10,000 acres a year planted.

Mr. WHITE of Kansas. Will the gentleman yield?

Mr. MAGEE of New York. Just one moment, please.

And to get that 10,000 acres planted where we believe it will do the most good, namely, on the parts of our farms that are not adapted to agricultural crops but will make good timber crops.

Mr. WHITE of Kansas. Well, I think the folks over in Indiana, Ohio, and Illinois know all about this. I think their system is perfect, so far as it could be made so, and I want to say to the chairman that our farmers are anxious to cooperate with the Government if they have some information and know how to do it. Now, we are creating a separate bureau for this purpose?

Mr. MAGEE of New York. No. This is not my act. This is the act of Congress. I voted for the act, and I believe the gentleman from Kansas voted for it.

Mr. WHITE of Kansas. I am trying to find out a little more about it than I know. That is why I have asked these questions.

Mr. MAGEE of New York. It is a new act, and I would suggest that if the gentleman desires more information than Colonel Greeley has given in the hearings he take the matter up with him.

Mr. WHITE of Kansas. I thank the gentleman.

Mr. MAGEE of New York. He knows as much or more about it than anybody else, and he is a very estimable gentleman. But this is a new proposition.

Mr. WHITE of Kansas. I am already instructed in a degree. I thank the gentleman.

The Clerk read as follows:

ACQUISITION OF ADDITIONAL FOREST LANDS

For the acquisition of additional lands at headwaters of navigable streams, to be expended under the provisions of the act of March 1, 1911 (36 Stat. L. p. 961), as amended, \$1,000,000, of which amount not to exceed \$14,800 may be expended for departmental personal services in the District of Columbia.

Mr. KINCHELOE. Mr. Chairman, I move to strike out the last word. I want to address myself to the chairman of the subcommittee. Is this appropriation for the perpetuity of the so-called Weeks Act?

Mr. MAGEE of New York. Yes.

Mr. KINCHELOE. I think it was last year or the year before that the gentleman from Oregon [Mr. HAWLEY], who is a member of the commission provided by this law, made a very elucidating statement before the Agricultural Committee as to what this commission had already accomplished and what it hoped to accomplish. At that time it seemed to be the policy of this commission to buy as much as possible of the hardwood timber watersheds of this country, and my recollection is that he stated at that time that there were tentative contracts for the purchase of a great deal of land, but that the contracts had not been carried out for the lack of appropriations. My recollection further is that year before last you appropriated \$400,000 under this item, last year \$800,000, and this year, under the authorization of the original act, you appropriate \$1,000,000. Does the gentleman think it is the policy of the department to undertake to carry out the Weeks Act by yearly acquiring more of the watersheds of this country?

Mr. MAGEE of New York. Yes. I thought I made that clear in my remarks explaining the bill.

Mr. KINCHELOE. I was not fortunate enough to be present and hear the gentleman's remarks. Is it contemplated by this commission to use the \$1,000,000 carried in this item for the purchase of more land?

Mr. MAGEE of New York. Yes. I will repeat briefly what I tried to convey to the House at that time. Under the Weeks Act they have a certain organization and they claim that with the \$400,000 or \$450,000, the amount appropriated, I think, for the fiscal year 1924, it is impossible to keep that organization intact and functioning and at the same time have money with which to purchase land. Now, as I understand it, they claim that on the basis of \$1,000,000 they can keep that organization functioning and purchase each year about the amount of land the commission thinks the Government ought to purchase annually. That is my notion about it.

Mr. KINCHELOE. Do the hearings disclose or does the Agricultural Department indicate to the committee what character of land will be purchased during the ensuing year, and in what part of the United States?

Mr. MAGEE of New York. Yes. If the gentleman will refer to page 617 of the hearings he will find a table showing in what States the purchases have been made, the number of acres, the average price, and the value. The States are Alabama, Arkansas, Georgia, Maine, New Hampshire, North Carolina, Pennsylvania, South Carolina, Tennessee, Virginia, and West Virginia.

Mr. KINCHELOE. Practically that statement is already in the hearings before the Agricultural Committee—that is, as to what they have already purchased. I am not so much interested in the geography of this as I am in the character of watersheds they propose to buy and in territory where there is hardwood timber, and I was wondering whether it was the purpose of the commission to buy any watersheds of hardwood timber out of this \$1,000,000 appropriation. I certainly hope the commission may see fit to do so.

The CHAIRMAN. The time of the gentleman from Kentucky has expired. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

PASSENGER-CARRYING VEHICLES

That not to exceed \$150,000 of the lump-sum appropriations herein made for the Department of Agriculture shall be available for the purchase, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles necessary in the conduct of the field work of the Department of Agriculture outside the District of Columbia: *Provided*, That not to exceed \$46,000 of this amount shall be expended for the purchase of such vehicles, and that such vehicles shall be used only for official service outside the District of Columbia, but this shall not prevent the continued use for official service of motor trucks in the District of Columbia: *Provided further*, That the Secretary of Agriculture is authorized to purchase, from the funds provided for carrying out the provisions of the Federal highway act of November 9, 1921 (42 Stat. L. p. 212), not to exceed \$35,000 for motor-propelled passenger-carrying vehicles to replace such vehicles transferred under authority of the acts of February 28, 1919 (40 Stat. L. p. 1201), March 15, 1920 (41 Stat. L. p. 530), and November 9, 1921 (42 Stat. L. p. 212), from the War Department and retained and used by the Secretary of Agriculture in the construction and maintenance of national forest roads or other roads constructed under his direct supervision which are or may become unserviceable: *Provided further*, That the Secretary of Agriculture shall on the first day of each regular session of Congress make a report to Congress showing the amount expended under the provisions of this paragraph during the preceding fiscal year: *Provided further*, That the Secretary of Agriculture may exchange motor-propelled and horse-drawn vehicles, and boats, and parts, accessories, tires, or equipment thereof, in whole or in part payment for vehicles, or boats, or parts, accessories, tires, or equipment of such vehicles, or boats purchased by him.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the subcommittee whether he has any figures showing how many trucks the War Department has turned over to the Department of Agriculture that have been distributed among the States for this highway work and whether they continue to have any of these trucks on hand. Does the gentleman know anything about that?

Mr. MAGEE of New York. I think most of those trucks are worn out.

Mr. BRIGGS. It was my impression some time ago when we passed an act providing for the transfer of these surplus trucks in the hands of the Army to the Department of Agriculture for distribution among the States there were quite a number of them on hand, and I was just wondering whether they have all been distributed or not. My impression is the War Department stated they turned over all they had to the Department of Agriculture, and I wanted to get some idea about what that distribution was.

Mr. MAGEE of New York. I think they were turned over and they are now worn out.

Mr. BUCHANAN. I will state to the gentleman that all the trucks that have been declared surplus have been disposed of and the only thing remaining on hand as surplus is explosives. There may be some more trucks on hand, but they have not been declared surplus, and therefore they can not touch them.

Mr. BRIGGS. The War Department tells me they have not any more trucks for disposition and that they have turned them all over to the Agricultural Department.

The pro forma amendment was withdrawn.
The Clerk read as follows:

FEDERAL-AID HIGHWAY SYSTEM

For carrying out the provisions of the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and all acts amendatory thereof and supplementary thereto, to be expended in accordance with the provisions of said act as amended, \$76,000,000, to remain available until expended, of which amount not to exceed \$454,971 may be expended for personal services in the District of Columbia, being \$25,000,000, the remainder of the sum of \$50,000,000 authorized to be appropriated for the fiscal year ending June 30, 1923; \$35,700,000, the remainder of the sum of \$65,000,000 authorized to be appropriated for the fiscal year ending June 30, 1924; and \$15,300,000, being part of the sum of \$75,000,000 authorized to be appropriated for the fiscal year ending June 30, 1925, by paragraph 1 of section 4 of the act making appropriations for the Post Office Department for the fiscal year 1923, approved June 19, 1922.

Mr. BUCHANAN. Mr. Chairman and gentlemen of the committee, I have been asked to make a statement relative to the appropriation for public highways; in fact, I have received some criticism for my action on the committee, for which I have no apology to make. I am willing to stand by my action through thick and thin.

In a general way let me call the attention of the House to the appropriations for highway construction since the commencement of this work.

In 1917 the first authorization for appropriation was \$5,000,000; in 1918, \$10,000,000; in 1919, \$65,000,000; in 1920, \$95,000,000; in 1921, \$100,000,000; and in 1922, \$75,000,000.

In all of these years the same year the authorization was made Congress appropriated the full amount of the authorization, so that appropriations could not get behind because the full amount authorized and the full program contemplated by the law was appropriated.

In 1923 we began to get behind. For that year Congress authorized \$50,000,000 to be appropriated, but we only appropriated \$25,000,000, leaving a balance to be carried over and appropriated the next year or in future years of \$25,000,000. In the year 1924 the law authorized us to appropriate \$65,000,000. However, we did not appropriate but \$29,300,000, leaving a balance of \$35,700,000 to be carried over for future years, in addition to the \$25,000,000 carried over from the year preceding. In 1925 the law authorized us to appropriate \$75,000,000, when, as a matter of fact, we appropriated only \$13,000,000, leaving \$62,000,000 to be appropriated in future years.

Mr. DOWELL. Will the gentleman yield for a question there?

Mr. BUCHANAN. Yes; I yield.

Mr. DOWELL. According to the bill, as I understand it, at the bottom of page 77, there was appropriated for the year 1925 all but \$15,300,000.

Mr. BUCHANAN. For the year 1925 we appropriated only \$13,000,000, leaving \$62,000,000 to be carried over to this or future years.

Mr. DOWELL. Will the gentleman listen to the reading of the bill, as reported by your committee:

And \$15,300,000, being part of the sum of \$75,000,000 authorized to be appropriated for the fiscal year ending June 30, 1925.

As I understand the action of the committee, you are withholding the \$15,300,000 of the \$75,000,000 that has already been appropriated.

Mr. BUCHANAN. But you segregate the years. It has all come to one total now, and the grand total is \$122,700,000 that we are behind for the past three years in our appropriations.

Mr. DOWELL. Yes; that is possibly true. I am only taking the report of your committee on the last authorization for 1925.

Mr. BUCHANAN. The misunderstanding is in one year being segregated.

Therefore, gentlemen, when your subcommittee met this year we were confronted with the situation that there was \$122,700,000 unappropriated what we were authorized to appropriate in three preceding years.

Mr. MOORE of Virginia. Will the gentleman yield for a question for the purpose of getting his comment upon a few paragraphs of the report of his committee?

Mr. BUCHANAN. Yes.

Mr. MOORE of Virginia. I would like to ask the gentleman why the committee reported \$4,000,000 less than the estimate submitted in the Budget. I suppose there is some good reason for that. Then I would like to ask the gentleman to state

a little more exactly than is done in the report what is meant by this statement in the report:

During the fiscal year 1926 if the Bureau of Public Roads discovers that the amount made available by this bill is insufficient Congress will be in session and a deficiency appropriation can be estimated and appropriated for.

Mr. BUCHANAN. I will answer the gentleman in the course of my remarks. We were confronted with the fact that in the authorization for the past years we did not appropriate the \$122,700,000. The Bureau of the Budget returned estimates for \$80,000,000. On examination of the witnesses we find that the department will actually pay out in withdrawals from the Treasury this fiscal year \$90,000,000, leaving, in round numbers, \$4,000,000 for next year. The Department of Agriculture in its estimates concluded that it would take \$90,000,000 to meet the actual withdrawals from the Treasury for the fiscal year 1926. The Budget recommended \$80,000,000, and with the \$4,000,000 would be \$84,000,000 to meet the estimates of the department of \$90,000,000. We did not appropriate that amount. We appropriated \$76,000,000. The fact is, gentlemen, there is going to be a deficiency anyhow. If you appropriate the Budget estimate of \$80,000,000, there is going to be a deficiency of \$8,000,000 or \$10,000,000. So that it does not make any difference whether you have a deficiency of \$14,000,000 next year or a deficiency of \$6,000,000 to \$10,000,000.

Now, what do we mean by the statement in the report which the gentleman from Virginia has read. It means this, that whether we appropriate in this bill seventy-six million or eighty million, that the Department of Agriculture believes there will be a deficiency, it means that the Bureau of the Budget believes that there will be a deficiency, and if there is a deficiency that it will be promptly submitted by the department to the Budget, approved by the Budget, favorably reported by the Appropriation Committee, and passed by this House with no injury to the highway construction of the United States. That is understood on all sides.

I understand that the gentleman from New York, the chairman of the subcommittee [Mr. MAGEE] does not believe that there will be a deficiency, but in this fiscal year they have spent up to December 1 fifty-three and one-half million dollars, or more than \$10,000,000 a month. Undoubtedly for the next fiscal year we will need at least \$90,000,000 or perhaps more, and we carry in this bill \$76,000,000 and the \$4,000,000 left over from last year makes \$80,000,000, and that will carry us up until March, 1926, before the money is exhausted, and as the next Congress convenes December, 1925, we will have ample time to pass a deficiency appropriation. I wanted the House to understand my action in the matter, and to understand that in this bill for the fiscal year 1926 and the appropriations for good roads for the fiscal year 1927, we will have to provide \$122,700,000 to pay our contractual obligations to the cooperative States, which indebtedness was incurred during the fiscal years 1923, 1924, and 1925; so that the fiscal years 1926 and 1927 have inherited from the fiscal years 1923, 1924, and 1925 this indebtedness of \$122,700,000 on good roads alone. Let us hope any other bequests will be a blessing, not a burden.

Mr. MAGEE of New York. Mr. Chairman, I want to say for myself that I voted for the \$80,000,000 in this bill because in my judgment that will be sufficient for the purposes of the department. The claim of an alleged deficiency did not have any weight with me, and I will tell you why. In 1924 it was estimated that \$85,000,000 would be necessary. As a matter of fact they used only about \$80,000,000. In other words, their estimate was \$5,000,000 above what they actually used. In the next place it seems to me that the House has at least given an indication that in its judgment by the passage of the Dowell bill \$75,000,000 a year is about the amount that we ought to appropriate. The Dowell bill passed last session called for an expenditure of \$75,000,000 for each of two years from July 1, 1925. I voted to give the department the \$80,000,000, \$5,000,000 above that sum. I find no fault with the recommendation made by the committee. I read with great interest after the representative from the Department of Agriculture appeared before us the remarks made by the chief of the bureau, Mr. Thomas H. MacDonald, on December 4, 1924, and published in the Evening Star on that date, at the Fourth Annual Convention of the Highway Research Board. This is what Mr. MacDonald is reported to have said:

Scientific research into the processes of making lasting roads has developed new and economical practices, which should result in cutting the road-making bill of the Nation down by nearly one-fourth, Thomas H. MacDonald, chief of the Bureau of Public Roads, told the Highway

Research Board at its fourth annual convention, which opened to-day at the new home of the National Academy of Sciences and the National Research Council.

Application of time-saving methods by contractors in road construction work, by overcoming of delays and use of proper machinery, would save between 20 and 25 per cent of the total spent on road construction, Mr. MacDonald estimated. Applied to the billion dollars he said was annually spent on roads in the United States, this would represent an enormous saving to the taxpayer.

Whether there will be a deficiency or not I do not know. If there should be a deficiency, as my distinguished colleague from Texas [Mr. BUCHANAN] has stated, it can be taken care of, but it would not surprise me, looking into the future as far as 1926 and taking the statement of Mr. MacDonald at 50 per cent of its face value, if we should have a surplus of ten or fifteen million dollars. In other words, if such savings can be effected as he intimated at this convention, it is possible that in 1926 we may not spend more than \$60,000,000 or \$65,000,000. We are safe anyway. I simply wanted to make my position clear.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. MAGEE of New York. Yes.

Mr. DOWELL. Is it contemplated by the committee making this appropriation that there will be a deficiency?

Mr. MAGEE of New York. It is not so contemplated by myself.

Mr. DOWELL. Is it not the fact that there should be no deficiency in these appropriations if they are made properly?

Mr. MAGEE of New York. I can only tell the gentleman why I voted for the appropriation. I can not speak for the other members of the committee.

Mr. DOWELL. I do not understand why the Committee on Appropriations should come before the House with an appropriation and intimate that it is the understanding that there will be a deficiency in the appropriation. I think they should hold the department to the actual appropriation, and if we are going to get anywhere it seems to me there must be a limitation to the actual appropriations made. I do not understand about this intimation that this appropriation is made and that there will be a deficiency to come before us later.

Mr. MAGEE of New York. I have not made that intimation.

Mr. HASTINGS. Mr. Chairman, I move to strike out the last two words. I invite the attention of the chairman of the subcommittee to line 9 on page 74, where the following language occurs—

together with any unexpended balances of appropriations heretofore made for this purpose.

Are such sums as that included in the total in the last line, line 5 on page 78 of the bill? It occurs to me it would be very difficult, indeed, for us to keep up with the obligations of the Government if many such appropriations were carried as are carried in line 9, page 74. I wonder whether there are many occurrences of that kind throughout the bill?

Mr. MAGEE of New York. I do not know that I understand the gentleman exactly.

Mr. HASTINGS. On page 74 you appropriate the unexpended balance that has heretofore been appropriated for the eradication of the foot-and-mouth disease.

Mr. MAGEE of New York. I am very glad the gentleman has asked that question. My information is that in the last deficiency bill was an item of \$3,500,000. Whether that has all been expended I do not know, but we wanted to provide in this paragraph that in case of an emergency any unexpended balance of such appropriation carried in that deficiency bill would be available.

Mr. HASTINGS. It would be continued.

Mr. MAGEE of New York. By this language.

Mr. BYRNS of Tennessee. Mr. Chairman, I ask unanimous consent that the committee may return to page 30, line 13, of the bill, for the purpose of permitting the gentleman from Florida [Mr. SEARS] to offer an amendment relating to the disease called nailhead rust attacking tomatoes. I do so for this reason. I am a member of the subcommittee on deficiencies of the Appropriations Committee. This matter was brought to the attention of the deficiency committee while considering the deficiency bill at the last session. It was then earnestly presented by the gentleman from Florida [Mr. SEARS], and it appeared from statements made to the committee then that this disease was making great ravages on the tomato, and that tomato growers in Florida had lost possibly a million dollars as a result of it. The Department of Agriculture wanted and was given \$10,000 on a three-year program, as I now recall. That \$10,000 was appropriated, and it seems to me, and I am told that the Agricultural Department so

states, that unless another \$10,000 is appropriated for next year on this three-year program the \$10,000 which has already been appropriated, which is doubtless in process of expenditure, will be wasted. They think they can control this disease, and for the reasons stated and the fact that this disease is now being given consideration by the Department of Agriculture, and it having originally recommended this program, I ask that the gentleman from Florida be permitted to offer this amendment.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to return to page 30 of the bill, line 13. Is there objection?

Mr. ANDERSON. Mr. Chairman, let us have the amendment read so that we will know what it is. I reserve the right to object.

Mr. MAGEE of New York. Mr. Chairman, this is an item that the gentleman from Florida [Mr. SEARS] spoke to me about. He said it first came up at the time of the preparation of the deficiency bill. I am not a member of the subcommittee on deficiencies, and as I understand, and as the gentleman from Tennessee [Mr. BYRNS] will confirm, if true, an item of \$10,000 for this purpose was put into the deficiency appropriation bill.

Mr. BYRNS of Tennessee. For this year.

Mr. MAGEE of New York. Precisely; and what is desired now is to put a similar item in this bill.

Mr. BYRNS of Tennessee. For next year.

Mr. MAGEE of New York. I told Mr. SEARS of Florida that my attention not having been called to the matter and no hearings held by the committee, yet if some member of the deficiency committee would come on the floor and explain it to the Members I would not object to turning back and putting it in the bill, and I have no objection so far as I am concerned.

Mr. ANDERSON. Mr. Chairman, reserving the right to object, I ask unanimous consent that the amendment be read for information.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that the amendment be read for information. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Amendment offered by Mr. SEARS of Florida: Page 30, after line 13, insert: "For investigation, eradication, and control of the tomato disease commonly known as nailhead rust, \$10,000."

Mr. ANDERSON. I withdraw the reservation.

The CHAIRMAN. Is there objection to returning to page 30, line 13? [After a pause.] The Chair hears none. The Chair would suggest before returning and taking up the matter that there is one line left which the Clerk has not yet read, and the Chair suggests that the line be read first in order to complete the reading of the bill.

The Clerk read as follows:

Total, Department of Agriculture, \$124,637,715.

Mr. MAGEE of New York. I understand that the Clerk was authorized to correct any and all totals.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

The CHAIRMAN. The gentleman from Florida offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 30, after line 13, insert: "For investigation, eradication, and control of the tomato disease commonly known as nailhead rust, \$10,000."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. SEARS of Florida. I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. SEARS of Florida. Mr. Speaker, I desire to thank the gentleman from Tennessee [Mr. BYRNS] for requesting unanimous consent that I be permitted to offer the amendment—

For investigation, eradication, and control of the tomato disease commonly known as nail-head rust, \$10,000.

Last year it was estimated the growers of tomatoes lost approximately \$1,000,000 because of this disease. The amount asked for is small, but the Department of Agriculture is satisfied that by appropriating said amount annually, not to exceed three years, they will be able to cope with this disease.

Last year the growers, out of their own funds, spent several thousand dollars trying to discover some method of control; but, not having the facilities that the Government has, they did

not make much progress. Realizing as I do the importance of finding some way to eradicate or at least control this disease, I sincerely trust the amendment which I have offered will be adopted.

I understand the chairman of the subcommittee will not oppose the amendment and, therefore, I will not take up more of your time.

Mr. MAGEE of New York. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 10404, the Agricultural appropriation bill, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. MAGEE of New York. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment; if not, the Chair will put them in gross?

The question was taken, and the amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MAGEE of New York, a motion to reconsider the vote by which the bill was passed was laid on the table.

RESIGNATION FROM A COMMITTEE

The SPEAKER. The Speaker lays before the House the following resignation.

The Clerk read as follows:

DECEMBER 10, 1924.

Hon. FREDERICK H. GILLET,

Speaker House of Representatives, Washington, D. C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Committee on the Post Office and Post Roads, effective at once.

Very respectfully yours,

WILLIAM B. BOWLING.

The SPEAKER. Without objection the resignation is accepted.

There was no objection.

ENROLLED BILLS SIGNED

Mr. ROSENBLUM, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

S. 116. An act to amend section 196 of the Code of Law for the District of Columbia;

S. 933. An act to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia; and

S. 1343. An act to authorize the widening of Fourth Street, south of Cedar Street NW. in the District of Columbia, and for other purposes.

AUTOMATIC TRAIN CONTROL

Mr. SNYDER. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record on the bill H. R. 9773.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. SNYDER. Mr. Speaker, I have asked for this opportunity to extend my remarks on H. R. 9773, a bill I introduced in the last session of Congress, for the one reason that it is a humanitarian measure and a great protection to the employees of the railroads and the traveling public, and Congress should be fully advised. I have no interest in any way in any of the train-control devices which are in existence, and my only thought in bringing this matter to your attention is that the people should be given the protection which train control affords. It is a fact that the only device that has been approved by the Interstate Commerce Commission is the Regan automatic train-control device, and since this name is used frequently in the reports of the Interstate Commerce Commission, it will have to be referred to many times. I want to explain now that the plea of the railroads and the newspaper propaganda against this device makes it very embarrassing for anyone who has taken an interest in the proposition. I know that the Interstate Commerce Commission has been embarrassed over the use of this to such an extent that it has become almost a crime in the eyes of some people to mention the name of the Regan device. I again state that I have no

pride in the name of any device in the name of Regan and have no interest other than the humanitarian end of the proposition. I will have to say many times that the Regan device is the one which has been approved by the Interstate Commerce Commission; all other devices have so far not been approved; and it is the one I have myself inspected and seen its successful operation.

Mr. Speaker, in order to explain the necessity for the approval of H. R. 9773, it will be necessary for me to state briefly the history of train control, and I am laying before Congress information I have gathered principally from the records of the Interstate Commerce Commission and from my personal observation of the operation of train control.

HISTORICAL

It has long been recognized that some form of protection should be provided to prevent railroad collisions. This subject has been a live issue since 1880, with ever-increasing interest, until in 1906 Congress passed an act directing the Interstate Commerce Commission to investigate the subject of automatic train control, as a result of which the commission appointed a body known as the Block Signal and Train Control Board. Reports were made to the commission annually from 1908 to 1912, inclusive. Several hundred different automatic stop and train-control systems were inspected by the board, and annual reports were made to the Congress containing such details as the commission thought necessary.

The Block Signal and Train Control Board was superseded in the development of this subject by the Bureau of Safety in 1913, and beginning with 1914 reports were made by the Bureau of Safety covering tests and inspections of many additional devices.

On January 14, 1919, the United States Railway Administration created an automatic train control committee, which also inspected a number of devices, reporting from time to time to the director general.

Definite action was taken by the Interstate Commerce Commission on January 10, 1922, when under authority of section 26 of the transportation act the commission issued order No. 13413, under which 49 railroads were given an opportunity to show cause why an order should not be entered requiring the installation of automatic stop or automatic train-control devices upon designated portions of their lines. Hearings were held before the commission during March and April, 1922, as a result of which the railroads failed utterly to show cause why the order should not be enforced; whereupon, on June 13, 1922, the commission made its order permanent, under the terms of which 49 railroads, specified by name, were required to install on or before the 1st of January, 1923, an automatic stop or train-control device or devices applicable to or operated in connection with all road engines running on or over at least one full passenger-engine division.

In this order the commission set forth the general requirements covering the design and construction of such systems, and provided that each installation made pursuant to such order should when completed be subject to inspection by and approval of the commission. In issuing this order the commission made the following statement:

We do not desire to force any carrier to adopt a particular type which it believes is not entirely suitable to its peculiar needs if there are others available which within a reasonable time may be shown to be more suitable. In view, however, of the investigations which have already been made and the time which has elapsed we are of the opinion that a six months' period will give sufficient time for any road to decide upon the device it should select. Within this time, provided a sufficient installation is made and intensive tests of the device are conducted, it can be determined whether or not the device will be suitable.

As to what has been done to carry out the order of the commission, this will be referred to later.

On January 14, 1924, the commission issued a second order requiring the installation of 92 additional divisions, and specified that installation should be completed by February 1, 1926. This order included an additional division upon 47 of the carriers contained in the first order, and additional carriers as shown therein. Hearings were held before the commission May 7, to May 17, 1924, inclusive, and again the railroads were fully represented. It was shown conclusively that an automatic train-control system which fully complied with the requisites of the commission and which had received the approval of the commission was available.

During the time the commission has been investigating this subject, and in the period 1906 to 1921, as shown by the records of the commission, there were 106,473 train accidents, in which 6,142 persons were killed, 95,936 injured, and a property loss of \$80,386,694. Of rear-end collisions there were 17,043, in

which 1,914 persons were killed and 25,974 injured, with a property loss of \$21,507,894. Of head-on collisions there were 9,255, in which 2,412 persons were killed and 34,708 injured, with a property loss of \$19,461,769.

The latest figures available and which will give you the facts regarding conditions at the present time are found in the Interstate Commerce Commission's report for the month of October, 1924. This report shows that during the month of August, 1924, 95 employees of the railroads on duty were killed, and 2,567 were injured; 14 passengers were killed, and 779 were injured. For the eight months of this year ending with August the report shows that 788 employees on duty were killed, and 20,932 were injured; 101 passengers were killed, and 3,736 were injured.

The following is taken from the Thirty-eighth Annual Report of the Interstate Commerce Commission, of December 1, 1924:

The record of accidents investigated by our forces for the year ended June 30, 1924, shows 100 collisions and derailments, in which 245 persons were killed and 1,501 injured. These accidents may be divided into four groups: (1) derailments; (2) collisions in automatic-signal territory; (3) collisions in nonautomatic-signal territory; and (4) collisions in time-table and train-order territory and yards. The following table shows the number of accidents in each group, the number in each group which probably would have been prevented if an adequate system of automatic train control had been in use, and the number of persons killed and injured in such preventable accidents:

Group	Accidents	Preventable accidents	Persons killed in preventable accidents	Persons injured in preventable accidents
Deraillments	46	14	19	77
Collisions in automatic-signal territory	12	9	18	122
Collisions in nonautomatic-signal territory	10	8	18	134
Collisions in time-table and train-order territory and yards	32	19	58	447
Total	100	50	113	780

The number of preventable accidents represent 50 per cent, the number of persons killed represent 46 per cent, and the number injured in such preventable accidents represent 52 per cent of the total number of accidents investigated, persons killed, and persons injured.

The importance of continuous effort to prevent railway accidents, with their great loss of life, injury to persons, and destruction of property, can hardly be overstated.

INTERSTATE COMMERCE COMMISSION,
Washington, December 8, 1924.

Hon. H. P. SNYDER,
House of Representatives, Washington, D. C.

MY DEAR SIR: Your letter of December 2, asking for certain data in connection with railroad accidents since May 24, 1924, was received in due course. I called upon our Bureau of Safety for the information you desire and understand that your office was advised by telephone that preparation of a list of all accidents since May 24, 1924, would require the tabulation of several thousand items. There are inclosed copies of our monthly statistical reports, which I understand will meet your present needs. These reports cover the period from May to August, both inclusive. Figures for subsequent months have not as yet been compiled. You will note that the number of accidents classed as "train accidents" are as follows:

May	1,761
June	1,654
July	1,722
August	1,906
Total	7,043

There is also inclosed a list of all accidents in which our Bureau of Safety made investigations and reports since May 24, 1924, which these reports state would not have occurred if an adequate system of automatic train control had been in use.

At the present time there are 12 accidents under investigation, 11 of which occurred since May 24. Of the 11, the result of the bureau's investigation as to the accident on the Baltimore & Ohio at Weyerton, Md., on November 15, which resulted in the death of 1 and the injury of 8 persons, has led to the conclusion that it would have been prevented by automatic train control. Investigation of one accident has developed that it would not have been so prevented, and the investigation of the remaining nine has not been sufficiently completed to permit of expression of a conclusion thereon.

Very truly yours, H. C. HALL, Chairman.

Accidents investigated by the Bureau of Safety since May 24, 1924, in the report covering which it was stated that the particular accident would not have occurred had an adequate system of automatic train control been in use

Date	Railroad	Location	Persons killed	Persons injured
June 19	Nashville, Chattanooga & St. Louis	Adairsville, Ga.	3	20
24	Hocking Valley	Linworth, Ohio	1	1
July 10	Spokane, Portland & Seattle	Avon, Ore.	1	6
29	Piedmont & Northern	Charlotte, N. C.	1	15
Aug. 15	Chesapeake & Ohio	Dayton, Ky.	1	1
16	Texas & Pacific	Grand Prairie, Tex.	1	1
30	New York Central	Syracuse, N. Y.	0	43
Sept. 6	Missouri Pacific	Howcott, La.	5	6
7	Louisville & Nashville	Frankfort, Ky.	3	1
24	Chicago, Rock Island & Pacific	Des Moines, Iowa	1	1
Oct. 3	Southern Pacific	Noonan, Tex.	2	2
3	Baltimore & Ohio	Avison, Ill.	1	16
13	Delaware, Lackawanna & Western	New Milford, Pa.	3	17
19	International	Tonawanda, N. Y.	4	98
19	Portland Electric	Nasf, Ore.	0	6
Nov. 11	Lehigh Valley	Aldene, N. J.	1	0
	16 accidents listed		28	232

Investigation has been completed of 27 other accidents which have occurred since May 24, 1924; in the reports covering these investigations no statement was made concerning automatic train control. These 27 accidents resulted in the death of 62 persons and the injury of 326 persons.

I wish to call the attention of Congress to the following editorials which have been recently published in the Washington Post:

[From Washington Post, Thursday, November 27, 1924]

FOR SAFETY IN TRAVEL

The time originally granted by the Interstate Commerce Commission for the installation of train-control appliances upon railroads will expire on January 1 next. Severe penalties are imposed by law upon such railroads as fail to comply with the commission's order. Some of the leading railroad companies are delinquent and will not be able to install the required apparatus by January 1. They are preparing an appeal for an extension of time.

There is no reasonable excuse for further delay or for an extension of time. The first order of the commission was issued nearly three years ago. The fact that some railroads complied with the order is proof that all could have done so if they had been so inclined. One reason after another was assigned for failure to obey the law, but the Interstate Commerce Commission appears to have reached the limit of its patient consideration of these excuses, and certainly the law and the public interest require that no further delays be granted.

Although some railroad companies assert that train control is in its experimental stage, the fact is well established that appliances are successfully in operation upon many roads. The prevention of accidents due to the fallible human element has been demonstrated. At the same time, on roads not equipped with train-control devices frightful accidents have occurred which would have been prevented by automatic appliances designed to stop trains in cases where the engineers ignore the usual warnings and plunge into collisions.

During the last two years many passengers have been killed because of the failure of railroads to install train-control devices. After January 1, in case of such accidents on railroads that have failed to comply with the law, it is probable that heavy damage suits could be sustained, thereby subjecting delinquent railroads to double penalties. The legal counsel of the railroads may conclude that the risks incurred by further evasion of law are more costly than the expense involved in installing safety devices. When that point is reached the railroads will doubtless install train-control devices without further pressure, but in the meantime human life may be needlessly lost.

The law commands the installation of train control. The Interstate Commerce Commission has gone beyond the limit of its authority in granting time for such installations. It is up to the railroad executives to comply with their plain duty. They need not expect to hold public sympathy in other directions if they persistently fail and refuse to provide the safety devices required by law.

[From the Washington Post, Monday, December 8, 1924]

NEEDLESS DANGER IN TRAVEL

Another rear-end collision occurred recently in which human life was lost and many persons injured. The "accident" occurred near Englewood Station, Chicago. It was preventable; and if the railroad had been equipped with train-control apparatus, the blunder of the train crew could not have resulted in a crash. A Pennsylvania passenger train from Cincinnati ran into the rear end of a special train from

Columbus. One person was killed and 25 injured, some of them seriously. Two cars of the special were crushed, and the engine of the Cincinnati train was derailed. The special train was picking up speed upon leaving the station and the regular train was slowing down when the collision occurred.

The law requires the railroads of the United States to equip themselves with train-control apparatus. Three years' notice has been given for the first installation, and the time limit will expire January 1 next. The railroads that have failed and refused to install equipment are asking the Interstate Commerce Commission to grant them further time, on one pretext or another.

The time has come for decisive action by the Government. There is no excuse for further delay. The railroads that have failed to install equipment are trifling with human life for the sake of saving money. It is an intolerable affront to the public, and a terrible calamity may occur at any time to stir the people to the danger to which they are unnecessarily subjected.

The Interstate Commerce Commission will not be doing its duty if it overlooks the public safety and interest and extends favors to the railroads that have flagrantly failed to obey the law. Let the law be applied!

Much has been said about the protection afforded by automatic block signals, yet the statistics of the commission show that between July, 1911, and March 31, 1924, there were 111 collisions caused by failure of the engineman to observe and be governed by signal indications, in which there were 510 persons killed and 2,453 injured, with a property loss—not including damage to lading—of \$1,539,074. Such human failures are not surprising, however, when one considers that the safety to trains, under present operating conditions, largely depends upon the engineman observing and being governed by a small signal light set at the top of a pole, often located at considerable distance away from the track and frequently obscured by fog, smoke, rain, or snow. All of these accidents and all of this tremendous loss of life and property occurred while the commission was investigating the subject of automatic train control.

The orders of the commission were undoubtedly based upon accurate information developed by thorough and long service inspections of automatic stop and automatic train-control devices then in operation, all of which were of the intermittent contact or ramp type, including the following:

(a) Miller automatic stop, in service since November 1, 1914, on 105.4 miles of double track—Chicago & Eastern Illinois Railroad, including 85 locomotives.

(b) American automatic stop, in service since June, 1919, on 21 miles of single track—Chesapeake & Ohio Railway, including 37 locomotives.

(c) The Regan automatic train-control system in service since March, 1920, on 22.4 miles of double track—Chicago, Rock Island & Pacific Railway, including 20 locomotives.

As distinguished from the Miller and the American automatic stop systems, the Regan automatic train-control system is so arranged as to include speed control, such as to enforce prescribed limited speed when approaching danger, and an automatic stop or prescribed low-speed control when danger is immediately impending. With this system the engineman must be alert to continue even at low speed when a dangerous condition prevails—as a misplaced switch, broken rail, open drawbridge, train standing on siding fouling the main track, or a train immediately ahead.

In other words, while the other systems described permit a train to move at full speed in the face of danger, the Regan system stops the train unless the engineman is alert, when by pushing a button he is permitted to enter the block at low speed, while with the other systems he may release and then proceed at full speed.

Fully satisfied with the test installation of the Regan system, covering a period in excess of three years, the Chicago, Rock Island & Pacific Railway, in compliance with the order of the Interstate Commerce Commission, decided to install, and did install, the Regan system throughout its Illinois division, and in line with the order, submitted plans and specifications and promptly complied therewith, completing the installation of 165.4 miles of double main track from Blue Island to Rock Island, Ill., and 102 locomotives on November 1, 1923. This installation was inspected by the commission, such inspection being completed November 30, 1923, and approved by the commission on December 17, 1923.

It will be noted that the Rock Island complied with the order of the commission and completed its installation of the Regan system one year before the time limit set by the order. Further, the Regan automatic train-control system was ap-

proved by the commission as in full compliance with the requisites laid down by that body.

This installation was completed at a total cost of \$235,780, including all expense of installation.

INTERCHANGEABILITY

The question of interchangeability has been set forth as one of the difficulties preventing such carriers from complying with the order of the commission. What are the facts as to this? The records show that the New York Central lines are testing three different types of automatic train control, none of which is interchangeable with the others.

The Chicago, Indianapolis & Louisville, the Chicago & Eastern Illinois, and the Atchison, Topeka & Santa Fe, using the same terminal at Chicago, are testing three different types of train control, none of which is interchangeable.

Reference to the tabulation of carriers, which is made a part of this record, will show the position of the carriers as to the adoption of automatic train-control appliances and the inconsistency between the demand for interchangeability and the devices now under test.

If interchangeability is to be secured, such that trains using joint tracks or detour will operate successfully with automatic train control, surely the best solution of the problem lies in the railroads of the same operating group adopting the same automatic train-control system. The train-control system adopted by the Chicago, Rock Island & Pacific Railway is the only train-control system in service which was installed in line with the order of the commission and which has been approved by the commission. As such, it has set the standard with which other railroads in its territory should comply.

FUEL ECONOMY—SAVING IN OPERATION

In addition to the conservation of life and property, experience has shown tremendous savings in operation due to this scientific improvement in railroad service, as under a train-control system not alone is safe operation insured but, substituting the principle of "spacing trains by restricting their speed" rather than by stopping them, as is done under the present antiquated method of railroading, train control becomes an asset and a distinct earning power. Whereas the American Railway Association rules provide that a train shall stop at automatic block signals in the "stop" position, and then proceed under a certain speed prescribed by rule alone, the Regan automatic train-control system, as heretofore stated, compels the train to reduce speed and compels the engineman to indicate his alertness to the situation by acknowledging the "stop" signal and permits the train to proceed under safe speed without stopping. Such is the practice and the rule on the Illinois division of the Rock Island, where a check of the operation during the month of July, 1924, showed that in the movement of 1,105 freight trains and 1,183 passenger trains there were a total of 6,078 freight-train stops and 485 passenger-train stops eliminated, which, capitalized at the American Railway Association figure of \$1.92 per stop, would amount to the tremendous figure of \$150,000 per annum in the saving of fuel, wear and tear on equipment, and loss of time.

To stop a heavy-tonnage train unnecessarily costs money; to install a proper system of train control increases track capacity and saves money.

Mr. Aishton, president of the American Railway Association, is authority for the statement that if 1 pound of coal were saved per 1,000 gross-ton miles, it would mean a saving of \$3,165,000 per annum. To stop a heavy-tonnage freight train unnecessarily consumes an average of approximately 665 pounds of coal, so that when safety can be secured with economy in such measure as the figures above indicate with the installation of automatic train control there is evidently no good reason why further delay should be permitted if the reason for delay is based on the cost of installation.

RAILROADS—AND COMPLIANCE WITH ORDER NO. 13418

The Chicago, Rock Island & Pacific Railway has complied with the order of the commission, and the Regan automatic train-control system has been approved. At this moment no other train-control system has been approved. It is evident that other railroads have made no serious attempt to carry out the order of the commission. Numerous experiments and tests are being made on short sections of track, evidently with the hope that there will be an extension of time granted and that installations over additional mileage which may be ordered by the commission will be postponed and probably abandoned. The railroads have already succeeded in securing modification of the second order of the commission covering a large number of railroads which were scheduled for completion by January 1, 1926; but order of June 13, 1922, as it applies to

the carriers listed herein, and which were ordered to have their installations completed on a full passenger engine division by January 1, 1925, was not modified or extended.

Automatic train control should be installed without further delay. The attempt of the railroad companies to cloud the issue should be discouraged, considering that an approved automatic train-control system is available and that the manufacturers of this device are conscientiously striving to secure installations; that they have the ability to make good; that they have successfully met all tests laid down by the commission or by any railroad. Considering further that an automatic train-control system is operating successfully and to the entire satisfaction of the officials and the men on the railroad upon which it is installed there should be no further delay in its adoption.

The officers are outspoken in their commendation of the device, and the locomotive engineers of the division on which it is installed are enthusiastically in favor of it. There is no greater obligation resting upon the railroads, the Interstate Commerce Commission, and the Congress than that of security and safety for the traveling public, for there is no condition in life where a competent and valuable citizen is so helpless to protect himself from bodily injury or death as when riding as a passenger on a railroad.

As to what has been done by the railroads over the many years the commission has been investigating this subject, a study shows that no installations were made on any railroad except upon the initiative and at the sole expense of inventors and manufacturers. Even on the Rock Island Railroad the preliminary installation was made entirely at the expense of the Regan Co., and it was not until the system had qualified in service for a period covering three years that authority was given by the board of directors to equip a full operating division.

In spite of the fact that an approved automatic train-control system is available that complies with all of the requisites covering design and construction as laid down by the commission, that it is in daily service on one of the great trunk-line railways, under all conditions of traffic, performing to the full satisfaction of the officials of the railroad, an installation comprising 330 miles of track and 102 locomotives; in spite of the fact that all witnesses from that railroad testifying before the Interstate Commerce Commission, including the vice president in charge of operation, locomotive engineers, and others, fully indorsed the device; in spite of the fact that locomotive engineers of the division on which it is installed have by resolution unanimously indorsed the device and recommended its extension; regardless of the fact that this train-control system qualified under the period of test outlined by the commission and that the manufacturers are prepared to install it on any railroad, the railroads of this country have by a studied campaign of camouflage and in violation of the principles that should actuate these common carriers set out to defeat the will of Congress and the orders of the commission.

What is the reason for the delay? The device approved by the Interstate Commerce Commission, as heretofore stated, has fully qualified. I understand that a supply of the apparatus is available. It has demonstrated that tremendous savings in operation may be secured on lines of dense traffic, and this information is all in the hands of the railroad companies. The subject of train control has been taken out from the realm of theory and is now an actual accomplishment.

What is the reason for failure of the carriers to install this device?

Let us analyze the situation by reference to the carriers covered by the order, which shows the following:

Atchison, Topeka & Santa Fe: Union Switch & Signal Co.'s continuous induction. Complete division. Nonapproved device.

Atlantic Coast Line: Short-track section General Railway Signal Co.'s intermittent induction. Nonapproved device.

Baltimore & Ohio Railroad: No installation.

Boston & Albany (New York Central): Some experiments made. No installation.

Boston & Maine: No installation.

Buffalo, Rochester & Pittsburgh: Small test installation. General Railway Signal Co.'s induction system. Disapproved by the commission. No further installation.

Central Railroad of New Jersey: No installation.

Chesapeake & Ohio: American intermittent ramp type; 61 miles single track and 64 locomotives equipped. This system has no speed control. Nonapproved device.

Chicago & Alton: Experimenting with Bostwick induction 20 miles roadway, 16 locomotives, vicinity of Bloomington, Ill. Nonapproved device.

Chicago & Eastern Illinois: Miller intermittent ramp type, installed in 1914; 105.4 miles double track, 65 locomotives. Nonapproved device.

Chicago & Erie: No installation.

Chicago & North Western: No installation.

Chicago, Burlington & Quincy: Twenty-mile Sprague intermittent induction. Nonapproved device.

Chicago, Indianapolis & Louisville: 20-mile roadside

Chicago, Indianapolis & Louisville: Twenty-mile roadside, six locomotives, Sprague intermittent induction. Nonapproved device.

Chicago, Milwaukee & St. Paul: Union Switch & Signal Co.'s continuous induction. River division. Nonapproved device.

Chicago, Rock Island & Pacific: Regan automatic train-control system, intermittent ramp type, 165 miles double track, 102 locomotives equipped. Approved device.

Chicago, St. Paul, Minneapolis & Omaha: This carrier has been relieved by the commission from compliance with the order, although a line of comparatively dense traffic.

Cincinnati, New Orleans & Texas Pacific: Thirty-five and two-tenths miles General Railway Signal Co.'s intermittent induction, with several locomotive equipments. Nonapproved device.

Cleveland, Cincinnati, Chicago & St. Louis (New York Central): Twenty-mile roadside, six locomotive equipments. General Railway Signal Co.'s continuous induction. Nonapproved device.

Delaware & Hudson: Four miles Federal Signal Co.'s continuous induction, 1923. Nonapproved device. No further attempt at installation.

Delaware, Lackawanna & Western: Twenty miles Union Switch & Signal Co.'s continuous induction, 10 locomotive equipments. Nonapproved device.

Erie Railroad: No installation.

Galveston, Harrisburg & San Antonio (Southern Pacific): Fifty-one miles Bostwick induction system. Nonapproved device.

Great Northern: Twenty miles Sprague intermittent induction, with seven engine equipments. Nonapproved device.

Illinois Central: Twenty miles Union Switch & Signal Co.'s modified continuous induction, with 10 locomotive equipments. Nonapproved device.

Kansas City Southern: No installation.

Lehigh Valley: Short track section, General Railway Signal Co.'s intermittent induction. Nonapproved device.

Long Island (Pennsylvania Railroad): No installation.

Louisville & Nashville: Union Switch & Signal Co.'s continuous induction. Nonapproved device.

Michigan Central (New York Central): Twenty miles, General Railway Signal Co.'s continuous induction and several locomotive equipments. Nonapproved device.

Missouri Pacific: Twenty-five miles, Bostwick intermittent induction; 29 locomotive equipments. Nonapproved device.

New York Central: Twenty miles, Sprague intermittent induction; 15 locomotive equipments. Nonapproved device.

New York, Chicago & St. Louis: Experimenting with small installation Union Switch & Signal Co.'s continuous induction. Nonapproved device.

New York, New Haven & Hartford: Experimenting with small installation Union Switch & Signal Co.'s continuous induction. Nonapproved device.

Norfolk & Western: Union Switch & Signal Co.'s continuous induction, complete division. Nonapproved device.

Northern Pacific: Twenty miles, Sprague intermittent induction with seven locomotive equipments. Nonapproved device.

Oregon-Washington Railroad & Navigation Co.: Union Switch & Signal Co., continuous induction. Complete division. Nonapproved device.

Pennsylvania Railroad: No compliance with order as to installation on designated division. Test installation on Lewiston branch, completed 1923. Nonapproved device.

Pere Marquette: No installation.

Philadelphia & Reading: Union Switch & Signal Co.'s continuous induction; complete division. Nonapproved device.

Pittsburgh & Lake Erie (New York Central): Twenty miles, Union Switch & Signal Co.'s continuous induction; 10 locomotive equipments. Nonapproved device.

Pittsburgh, Cincinnati, Chicago & St. Louis: No installation.

Richmond, Fredericksburg & Potomac: Union Switch & Signal Co.'s continuous induction, 25 miles; 16 locomotive equipments. Nonapproved device.

St. Louis-San Francisco Railway: Twenty miles, Bostwick intermittent induction; 22 locomotives. Nonapproved device.

Southern Pacific: Bostwick intermittent induction. Nonapproved device.

Southern Railway: No installation.

Union Pacific: Union Switch & Signal Co.'s modified continuous induction. Nonapproved device.

West Jersey & Seashore (Pennsylvania Railroad): No installation.

Western Maryland: Relieved from order of commission.

It will be noted that none of the carriers covered by the order of the commission, other than the Rock Island, have adopted the only automatic train-control system that has been approved, and that some are installing systems that have been inspected and not approved; others are making or figuring upon small installations that have not been approved; while still others have made no evident move in the selection of a device.

It is worthy of note that carriers which are proceeding with expensive installations costing approximately \$10,000 per mile (for nonapproved devices) are among those carriers earning in excess of 6 per cent on valuation or have tremendous surpluses, in the face of the fact that the approved system can be installed at approximately \$2,000 per mile of double track, including both locomotive and roadside equipment complete.

The action of the common carriers subject to the transportation act when automatic train control is considered is deplorable. Their position has been one of consistent objection, one of constant obstruction to the consummation of the act of Congress and the orders of the commission. It is probable that they recognize the fact that the orders of the commission now confronting them cover but a small proportion of the total passenger mileage and that their tactics are based upon a desire to prevent the issuance of further orders or bring about a modification of those now in effect.

No matter what the motive may be, it is safe to say that from the viewpoint of the traveling public, which to a very large extent includes the holders of railway securities, this great improvement is here to stay, and that within a few years it will be a source of wonder how railroad trains were operated at such extremely high speeds as are now in vogue without such protection. Surely when safety, efficiency, and economy are considered, automatic train control as demonstrated in daily service on the Rock Island, stands out as one of the great engineering achievements—the utilization of the resources of nature for the benefit of mankind—and represents an immense stride toward conservation in the saving of fuel, wear and tear on equipment, and in the increased safety which it insures to the traveling public.

The responsibilities resting upon the Interstate Commerce Commission to enforce its train-control orders are clearly defined by law. In so far as the railroads are concerned, they should be compelled to comply with the law and with the orders of the commission. Surely public safety is a matter in which partisanship can not be shown.

In opposing the order of the commission the representatives of the carriers have contended that no automatic train-control device is sufficiently developed as to warrant installation, and that such devices are in the development or experimental stages. In all fairness to the railroads who have taken this position, the statement may be made truthfully that automatic train control is advanced to a far greater degree of perfection than was the automatic signal, automatic coupler, or automatic air brake when those great improvements were adopted. Nothing could be more perfect in its operation, as demonstrated under actual service conditions, than the automatic train-control system that has been approved by the commission. Duplicating the conditions which resulted in such terrible wrecks as occurred at Porter, Ind., the Twentieth Century wreck at Forsyth, N. Y., and many others, this train-control system has demonstrated its perfection in the prevention of such accidents when for any reason the human agency fails.

In view of the facts, and the investigations and inspections by experts of the commission, it is evident that the railroads have not moved in the direction of compliance with the order of the commission with a view of finding a suitable automatic train-control system for installation; and when it is considered that the first order covers but 10,000 miles of track of a total passenger mileage in excess of 250,000 miles, or 5 per cent of the total—that but approximately 5,000 locomotives of a total of 60,000, or about 8 per cent of the total, distributed among 49 carriers—there should be prompt steps taken to enforce the order of the commission by making the penalty such as will insure prompt action.

The Congress, in section 26 of the Interstate Commerce Commission act, authorized the commission "after investigation to prescribe the installation of automatic train stops or train-control devices, or other safety devices upon the whole or any part of the railroad or any carrier by railroad subject to the act."

The commission has investigated and inspected through its experts many hundreds of inventions and systems covering a

period in excess of 18 years, and for the past three years has concentrated its attention upon investigations, inspections, and analyses of actual installations. As a result, the commission has approved the automatic train-control system which was installed by a great trunk-line railway in conformity with the order of the commission, as in full compliance with the requisites of the commission.

The time limit as set by the commission for compliance with its order for the installation of such systems, namely, January 1, 1925, is about to expire. The penalty for noncompliance is evidently inadequate to produce the desired action. Prompt and strenuous measures should be taken by the Congress and such a penalty imposed as will cause the carriers to comply with the order of the commission without further delay.

Here is the language used by Commissioner Esch, and which is concurred in by Commissioners McChord and Cox, of the Interstate Commerce Commission, with regard to the necessity of adopting train control. You will find this language on page 448, Interstate Commerce Commission Report No. 13413. He says:

With the exception of three roads that have installed devices of the ramp type the carriers generally have definitely stated to us that they will not install this latter type. Thus they discard the successful results of years of effort to develop a practicable automatic train-control device, which upon final test we have found meets all our requirements. In view of the expressed attitude of the carriers, the commission's decision and conclusions appear to have but little weight. In view also of this decision of the carriers—if they are to be permitted to adhere to it—any further expenditure of either time or money experimenting with this type of device would simply be wasted, notwithstanding the fact that it has been found by us to meet every requirement and that we have approved its installation. This would be true even though a joint committee should supervise such experimentation.

On page 449 of the same report they make this further statement:

In its original report in this case, June 13, 1922, this commission gave the history of what has been done by Congress and the commission with respect to automatic train control. Congress and this commission have been at work for more than 18 years in an endeavor to persuade and require the carriers to install automatic train control, with scant results.

And on page 450 of the same report they use this language:

We had concluded prior to our first report (1) that the need for automatic train-control devices had been clearly shown, and (2) that devices had been developed and used under actual service conditions that met this need in a practical manner. These conclusions were and still are the bases for our orders in this case. They are the results of over 15 years of study culminating in many months of tests and observations under actual service conditions. The facts are too well known to need further discussion.

Now, Mr. Speaker, in the face of all these facts, can it be said that the railroads of this country are going to be allowed to go on ignoring the orders of the Congress and the Interstate Commerce Commission? And shall the Congress and the people of this country sit calmly by and allow people to be injured and killed almost daily, as has been pointed out in the remarks I have made, when an improved device can be installed on these roads at a reasonable cost, which would not only save thousands of people from becoming injured, but would save hundreds of lives and would be a saving on the upkeep and operation of the railroads to the extent that the interest on the cost of installation would be more than saved?

Section 26 of the interstate commerce act provides that the railroads shall be fined \$100 per day for noncompliance with the orders of the Interstate Commerce Commission, and this penalty has brought no results, thereby furnishing the necessity for the enactment of my bill, H. R. 9773, which provides as follows:

That section 26 of the interstate commerce act as amended is amended to read as follows:

"SEC. 26. That the commission may, after investigation, order any carrier by railroad subject to this act, within a time specified in the order, to install automatic train-stop or train-control devices, or other safety devices, which comply with specifications and requirements prescribed by the commission, upon the whole or any part of its railroad, such order to be issued and published at least two years before the date specified for its fulfillment: *Provided*, That a carrier shall not be held to be negligent because of its failure to install such devices upon a portion of its railroad not included in the order; and any action arising because of an accident happening upon such portion of its railroad shall be deter-

mined without consideration of the use of such devices upon another portion of its railroad. Any common carrier which refuses or neglects to comply with any order of the commission made under the authority conferred by this section shall be liable to a penalty of \$1,000 for each day that such refusal or neglect continues, which shall accrue to the United States, and may be recovered in a civil action brought by the United States. Every director, officer, or employee of a common carrier, or other person, in whom, at any time within the period for compliance with an order of the commission made in respect of such carrier under the authority of this section, there is vested, by appropriate action of the board of directors or the president of the carrier, the duty to cause compliance with such order (or if such action has not been taken, then every president and director of the carrier during such period), shall, if (1) an accident involving bodily injury or loss of human life occurs upon the railroad of such carrier, and (2) such accident is attributable in whole or in part to any failure to comply with the order of the commission, and (3) such director, officer, employee, or other person willfully or negligently failed to cause such compliance, on conviction of such offense in a court of competent jurisdiction, be subject to a fine of not more than \$5,000 or be imprisoned for not more than five years. As used in this section, the term "board of directors" includes any other board, committee, or agency or any person in whom are vested the powers commonly vested in a board of directors of a common carrier, and the term "president" includes any other chief executive in whom is vested the powers commonly vested in a president of a common carrier."

This measure warrants the prompt attention of this Congress.

MONUMENT TO "NUNS OF THE BATTLE FIELD"

Mr. TAGUE. Mr. Speaker, I ask unanimous consent to extend my remarks by publishing a speech delivered by former Congressman Kennedy.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to extend his remarks by inserting in the Record a speech delivered by ex-Congressman Kennedy. Is there objection? [After a pause.] The Chair hears none.

Mr. TAGUE. Mr. Speaker, under leave granted to me to extend my remarks in the Record I include an address delivered at the ceremonies attending the unveiling of the monument to the "Nuns of the Battle Field," in Washington, D. C., Saturday afternoon, September 20, 1924, by Hon. Ambrose Kennedy, of Woonsocket, R. I., a former Member of Congress, who for 10 years represented in this House the third district of Rhode Island, as follows:

The leading events of the Civil War have been often repeated in the years that have since come and gone, and in every section of the country are observable numerous tablets and memorials dedicated to the deeds of chivalry and heroism that signalized that memorable struggle. The eye is always gladdened at the sight of impressive shaft and pillar proclaiming in silence the gratitude of a people to the national heroes whose genius preserved the Nation and whose lives sum up a large part of its history. Their names and fame have been and always will be held in reverent remembrance by true and loyal Americans everywhere.

In the annals of that war there is one glorious chapter that has too long remained uncelebrated, but, due to the generosity and patriotism of the women of the Ancient Order of Hibernians, we are commemorating it on this spot to-day. Here, on public ground, a new and imposing monument stands revealed. Not to the heroes but rather to the heroines of the Civil War is this splendid memorial dedicated. The advancing generations of Americans as they pass this way in the years to come and view this fine creation in bronze and granite will realize then, if they never did before, that hard by the far-flung battle lines, where shot and shell carried their terrible message of death and destruction in the war of '61, there were heroines in the garb of the Catholic sisterhoods, who, amidst these hideous surroundings, were ever ready to relieve the anguish and strengthen the hopes of the suffering and dying soldiers.

Up to 10 years ago, when the Ladies' Auxiliary of the Ancient Order of Hibernians began to prepare the way for the erection of this memorial, very little had been heard of the services of these war-nursing sisters. Yet their devoted and patriotic ministrations shed glory upon the many thrilling occurrences of the Civil War. They were the special almoners of mercy amidst the ghastliest horrors then known to human warfare. Though suddenly and unexpectedly called into service, they were not unprepared for the trials that confronted them amidst the heartrending and revolting scenes of this crowded theater of action. If they were lacking in material equipment, by their faith and charity they were admirably prepared. These virtues they had long before pledged to the service of God and humanity. The privations incident to the havoc and confusion of war did not in the least dishearten them, for their usual practice of self-sacrifice and

self-denial enabled them to overlook the things that affected their own personal comfort and devote their attention solely to the relief and assistance of the wounded and dying. Many of these sisters came from old and famous institutions of learning in different parts of the country; many others from orphan asylums and well-established hospitals where they had hitherto presided, to answer the official call for nurses and take up the harder tasks and duties which the horrors of war entailed. Many of them, too, belonged to orders whose victories for charity constituted a bright page in the history of antecedent wars, both in Europe and America.

Hundreds of sisters, representative of 12 different orders, took active part in the service, the details of which volumes alone could unfold. The number comprised Sisters of Mercy, Sisters of the Holy Cross, Sisters of St. Joseph, Sisters of Charity of Nazareth, Sisters of Charity of St. Vincent de Paul, Sisters of the Mother Seton Order of Charity, Sisters of Our Lady of Mt. Carmel, Sisters of the Poor of St. Francis, Sisters of Our Lady of Mercy, Sisters of Providence of St. Mary of the Woods, Sisters of St. Dominic, and the Ursuline Sisters. All these furnished their respective quotas to labor in the humane and merciful work. And they did service in 18 States and in the District of Columbia, laboring in military hospitals and going from one battle field to another in ambulances, in old wagons, and in every form of vehicle that could be made available, where thousands of suffering and dying soldiers in the Blue and in the Gray were the objects of their tender ministrations. Not only did they nurse the patients, but in gentle whispers they spoke the words of consolation that lightened the burdens which oppressed the hearts of these soldiers.

In administering to the comfort of these unfortunates, these sisters exhibited a wonderful spirit of fortitude and charity, and they showed no preference whatever in the application of their labors. Their services were impartially rendered on Union and Confederate sides. When their labors were concluded, without pomp or parade, but with the calm and quiet that characterized their coming, softly and silently they returned to their pre-war occupations, and from that day to this no historian has ever recorded their names and no Congress until the Sixty-fifth had ever paid them a tribute of recognition. That Congress granted to the Ladies' Auxiliary of the Ancient Order of Hibernians the privilege of erecting a memorial to the war-nursing sisters and they have nobly erected it here. All honor to the public spirit and patriotism of that organization! It has called back almost from oblivion the story of those dark-robed messengers of mercy who, at the call of President Lincoln, voluntarily left the peaceful atmosphere of their accustomed surroundings to serve amidst the noxious vapors of military camp and hospital in the awful hour of misery and affliction.

The services rendered by these various sisters stand forth conspicuously, evincing a splendid heroism among the many and varied scenes of that war; and, to their honor, be it said, they never sought nor received any tangible rewards for their labors. I venture to say that, if they were living to-day, they would in their humility lay but little, if any, claim even to the recognition which this belated monument indicates. Well did they know that the works of mercy they so tenderly performed transcend the measure of reward which earthly wealth or recognition can bestow.

Many a tribute has been paid them by Union and Confederate soldiers, but none more touching or expressive than that of an eyewitness to their labors which appears in the Recollections of Abraham Lincoln.

"Of all the forms of charity and benevolence seen in the crowded wards of the hospitals, those of some Catholic sisters were among the most efficient. I never knew whence they came or what was the name of their order. More lovely than anything I have ever seen in art, so long devoted to illustrations of love, mercy, and charity, are the pictures that remain of these modest sisters going on their errands of mercy among the suffering and the dying. Gentle and womanly, yet with the courage of soldiers leading a forlorn hope, to sustain them in contact with such horrors. As they went from cot to cot, distributing the medicines prescribed, or administering the cooling, strengthening draughts as directed, they were veritable angels of mercy. Their words were suited to every sufferer. One they incited and encouraged, another they calmed and soothed. With every soldier they conversed about his home, his wife, his children, all the loved ones he was soon to see again if he was obedient and patient. How many times have I seen them exorcise pain by their presence or their words! How often has the hot forehead of the soldier grown cool as one of these sisters bathed it! How often has he been refreshed, encouraged, and assisted along the road to convalescence, when he would otherwise have fallen by the way, by the home memories with which these unpaid nurses filled his heart!"

In the hospital and military reports of the Civil War may be found here and there records of the enlistments of many of these war-nursing sisters. Some of the institutions, also, from which they went out to answer the call to service still retain the original registers of their names. From these and other sources have been carefully collated and placed in the records of Congress of the 18th of March, 1918, a long and authentic roll of their names, both family and re-

ligious. But this record is by no means complete. Lapse of years has made a complete record impossible. Many of these names were assembled by a distinguished member of your order, Mrs. Ellen Ryan Jolly, who gave years of painstaking study and research to this subject and who resolved long ago that one day the name and fame of these sisters would be fittingly and publicly honored.

That happy day has arrived, and her labor of love is accomplished. Here on this piece of ground in the Nation's Capital she sees her fondest hope realized in the erection of this beautiful memorial. It is her work from its origin to its consummation. Long may it stand a testimonial to her fidelity to the righteous purpose it represents! Long may it remain to preserve and perpetuate the memory of the "Nuns of the Battle Field," whose labors for God and humanity in the trying days of the Civil War were an inspiring example of the doctrine of faith we cherish that in the performance of loyal Christian service in this life lies the surest way to eternal happiness in the life to come!

SAMUEL GOMPERS

Mr. HAWES. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks in the Record. Is there objection?

There was no objection.

Mr. HAWES. Mr. Speaker, my request for unanimous consent for an extension of remarks in the Record regarding Samuel Gompers was occasioned by many years of pleasant friendship, and, in addition, I have the conviction that he was not only a remarkable man but a great American; that he remained steadfast to the broader principles of orderly government, and that his Americanism was acquired by study, reflection, and experience. It did not come to him through birth, environment, or heredity; it was an intellectual acquisition.

I have disagreed with him on many matters, but in the matter of American patriotism he was splendid.

He had brilliant wit of a sympathetic kind which did not hurt.

More men called him by his first name than any other man that ever lived, and he had the remarkable faculty of remembering names, and the first name or a nickname were the handles he usually applied.

There was a perpetual conflict going on within his great brain, developed by study, experience, and contact with men, and his big heart, which was always interested in the sentimental—in music, art, and good fellowship.

Children liked him. He was fond of animals. He had courage of a high order. He could say "no" upon occasion when to do so invited defeat.

To retain for nearly half a century leadership over the diversified interests—sometimes impatient demands—of the organized labor movement in this country presents a record unparalleled in the labor history of the world.

No wonder that upon his death the press of the country unite in speaking well of him! Great chiefs of industry, with whom he clashed and fought, respect his memory, and I feel sure he will be hard to replace.

He had that vast experience which is the best teacher, and his successor, no matter how able or well informed, can not come prepared, because no man now living has such a long record of the things that have gone before. Few men have the retentive memory possessed by him. His experience and memory were two strong elements of his great power.

I met him frequently under very trying circumstances. On one occasion, during the peace conference in Paris, accompanied by a delegation of representatives of American labor, just at a period when America's participation in the great World War had astounded Europe, every device of cajolery and appeal was pressed upon him to lead the American delegates to the international conference of labor leaders to be held at Berne, Switzerland.

I was present in Paris at the time, and in conversation with "Sam" when he was approached by American correspondents with an inquiry as to whether the American representatives of labor would attend the international convention of radicals to be held in Berne his answer was emphatic and in picturesque form. He stated the Americans would not go or become a party to such convention, as it did not represent the thought of American labor. I was impressed with his emphasis and his clear way of repudiating any connection or sympathy with the Bolshevik movement.

He fought to the utmost for labor, but his contentions for betterment were made under orderly and accepted legal methods.

He understood our theory of government, and any proposals from him were to be employed by legal enactments; and even in proposing changes they were rarely, if ever, of a revolutionary character.

He led American labor in supporting President Wilson during the war.

My feeling of personal friendship for this man was based upon many pleasant conversations on subjects which did not relate to labor problems, but on one occasion, upon being called upon to deliver an address upon the subject of labor, I reviewed some of his statements and speeches. Among many I found the following, showing vision, breadth, and statesmanship:

I do not know that I am entitled to very great credit because I am not a Bolshevik. With my understanding of American institutions and American opportunities, I repeat that the man who would not be a patriot in defense of the institutions of our country would be undeserving of the privilege of living in this country.

Again he said:

I stand in so far as I can and dare—and I dare much—for the principles of natural and national development and growth.

I am opposed, as is organized labor of America, to any destructive policy.

There is nothing that is worth while maintaining that I would aid or abet in destroying.

Our policy, our work, our method, our ideas, and our ideals, are to build, to construct, to grow, to help in the development of the highest and best in the human family; to make to-day a better day than yesterday, to make to-morrow a better day than to-day, to make to-morrow and to-morrow's to-morrow each a better day than the one that has gone before. That evolutionary process of progress and improvement is the basis for the opportunity for freedom, justice, and democracy.

He believed that American organized labor occupied a middle place in between extreme capitalistic selfishness and the I. W. W. and kindred movements of what he termed "irresponsibles" or "irreconcilables."

It is a question of dealing with such a movement as represented by the American trade-unions—the American Federation of Labor—or dealing with a body of irresponsibles or irreconcilables. If we are not on the right track, then those who represent the wildest orgy of destruction with no consideration for the rights of individuals will come to the front. It is a matter of choice between dealing with such elements or dealing with the constructive forces of the organized-labor movement of our country.

We find a touch of Jefferson and a thought from Wilson in this statement:

Freedom is not a condition, nor is democracy a condition. Freedom is the exercise, the functioning of freedom, the practice of freedom, the practice of democracy. All that society can give, all that government can give, is the opportunity for freedom. It depends upon the people to be intelligent and grow into the feeling, the exercise, and practice of the function of freedom. It was because the principles of freedom and democracy were menaced by the system of autocracy and militarism that the people of our country and the peoples of other countries and of the democracies of the world rallied around their banners and declared and made good their willingness to make the supreme sacrifice for the principles, the institutions, and the practice of freedom which were threatened to be overwhelmed and crushed.

He never permitted fine-spun theories and impracticable political panaceas to control his movements or change his convictions, as illustrated in this statement:

The field is littered with the whitened bones of those who have gone seeking salvation through laws. This the American labor movement has recognized, and there is no immediate danger that this philosophy will be deserted in favor of whims and caprices of similar portent. In the realm of political life there is always present the great personal necessity for remaining in political life. In the realm of industry there is only the necessity of going forward with the tasks and battles of industrial life, out of which we can not emerge even if we should wish to. The facts are inescapable, the battles must be fought where they are. Industry is real, as real as tools, and iron, and coal, and wheat. Men can lay their hands to the things of industry and get the feel of them. There is definiteness in industry, a great, all-enveloping, all-enfolding definiteness that comes as natural to mankind as life itself, because he goes through life by the feel of these things of industry.

There is nothing fixed and definite in the realm of abstraction, in the realm of politics. It lends itself to a false understanding of things that are real. When men depart from the fundamental productive process of the life of the world there is no power on earth

that can guarantee the accuracy of the course they still pursue. Look back upon the record of falsity made by these movements of abstraction in the war. Against such error the American labor movement in its loyalty to the cause of mankind sets its face and must continue to set its face.

He had but four years in school but became a great writer and speaker of unusual attainment. He was without affectation and hit from the shoulder.

To-day thoughtful American people in high places and in low are honoring the memory of Samuel Gompers, and the Russian people, as reported by the newspapers, are driving Trotsky from his rule.

The American Jew, Samuel Gompers, fought the Russian Jew, Trotsky, and, more than any other man, stopped the spread of Bolshevism in this country.

He opposed sabotage and communism and defeated it by upholding trade-unionism.

He knew that our forefathers, in their declarations of equality, did not mean that all men were created equal mentally, morally, and physically, but that all men had the equal right to the law's protection and equal rights to the world's opportunities for life and happiness.

He did not understand that liberty was license, and he knew that a democracy which degenerates may quickly turn to lawlessness, and after a brief period of misrule would become the prey of some strong man. This was the history of nations, which he had read and understood.

He knew that democracy was ordered liberty, which should respect and safeguard the rights of all.

There were many discouragements for him because of the impatience which would proceed with more speed than safety. He knew better than most men that conditions are improved by steadily gaining point upon point and not by pulling down good and bad together in one hasty action.

He never had the dream that government could make everyone rich but believed it should give an equal opportunity to become rich.

He believed in preserving the real things which are worth while and to bring about by persuasion changes which were desired through the ballot and the suffrage in the old-fashioned way.

He knew that without law property, life, order, and happiness are impossible.

His method was to educate the voice of the majority.

Experience and history had taught there could be but one basis of settlement—an American one—made under the law, and there can be but one flag—the American flag.

The American people will watch with interest the naming of his successor. Will he understand our institutions as Mr. Gompers did?

Will he have his sagacity, his diplomacy, his broad sympathy, and, above all, his patience?

If his successor adopts the thoughts of Mr. Gompers as a guide, then truly his last words will be an inspiration for the man who follows him. Turning to his nurse, the great American labor chief said, in his parting breath:

This is the end. God bless our American institutions. May they grow better day by day.

LEAVE OF ABSENCE

By unanimous consent, Mr. CHOLL (at the request of Mr. CUMMINGS) was granted leave of absence for five days on account of death in his family.

BILLS LAID ON THE TABLE

The SPEAKER. Without objection, two measures, House Joint Resolution 181 and the bill H. R. 7887, will be laid on the table, similar bills having become laws.

There was no objection.

ADJOURNMENT

Mr. MAGEE of New York. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 2 minutes p. m.) the House adjourned until to-morrow, Friday, December 12, 1924, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GRAHAM: Committee on the Judiciary. H. R. 3842. A bill to provide for terms of the United States circuit and dis-

trict courts at Denton, Md.; without amendment (Rept. No. 1038). Referred to the House Calendar.

Mr. GRAHAM: Committee on the Judiciary. H. J. Res. 240. A joint resolution confirming the execution of an agreement to settle the boundary line between the States of New York and Connecticut, and for other purposes; without amendment (Rept. No. 1039). Referred to the House Calendar.

Mr. GRAHAM: Committee on the Judiciary. H. R. 5083. A bill to create an additional judge in the district of Maryland; without amendment (Rept. No. 1037). Referred to the Committee of the Whole House on the state of the Union.

Mr. UNDERHILL: Committee on the District of Columbia. H. R. 9435. A bill to provide for commitments to, maintenance in, and discharges from the District Training School, and for other purposes; without amendment (Rept. No. 1041). Referred to the Committee of the Whole House on the state of the Union.

ADVERSE REPORTS

Under clause 2 of Rule XIII,

Mr. GRAHAM: Committee on the Judiciary. H. Res. 365. A resolution requesting the Secretary of the Treasury to furnish to the House of Representatives certain information regarding Robert J. Owens, a prohibition agent; adverse (Rept. No. 1040). Laid on the table.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. DRANE: A bill (H. R. 10644) to provide for a site and public building at Winter Haven, Fla.; to the Committee on Public Buildings and Grounds.

By Mr. GARNER of Texas: A bill (H. R. 10645) granting consent of Congress to the Valley Bridge Co. for construction of a bridge across the Rio Grande near Hidalgo, Tex.; to the Committee on Interstate and Foreign Commerce.

By Mr. SWEET: A bill (H. R. 10646) for the relief of the State of New York; to the Committee on Appropriations.

By Mr. KELLER: A bill (H. R. 10647) extending time for the completion of the bridge across the Mississippi River between the cities of St. Paul and Minneapolis; to the Committee on Interstate and Foreign Commerce.

By Mr. PHILLIPS: A bill (H. R. 10648) authorizing the construction of a bridge across the Ohio River between the municipalities of Ambridge and Woodlawn, Beaver County, Pa.; to the Committee on Interstate and Foreign Commerce.

By Mr. SPROUL of Illinois: A bill (H. R. 10649) to permit certain national associations to operate booths in public buildings containing post offices; to the Committee on the Post Office and Post Roads.

By Mr. BURTON: A bill (H. R. 10650) to authorize the settlement of the indebtedness of the Republic of Lithuania to the United States of America; to the Committee on Ways and Means.

Also, a bill (H. R. 10651) to authorize the settlement of the indebtedness of the Republic of Poland to the United States of America, and for other purposes; to the Committee on Ways and Means.

By Mr. SPROUL of Illinois: A bill (H. R. 10652) to permit certain national associations to furnish post offices with cancellation dies; to the Committee on the Post Office and Post Roads.

By Mr. LaGUARDIA: Resolution (H. Res. 378) to determine the number of immigrants who have entered the United States from the Republic of Mexico from July 1, 1924, to December 1, 1924, their destination and occupation; to the Committee on Immigration and Naturalization.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNS of Tennessee: A bill (H. R. 10653) granting an increase of pension to Sallie A. Pahmore; to the Committee on Invalid Pensions.

By Mr. COLE of Iowa: A bill (H. R. 10654) granting an increase of pension to Elizabetha Oswald; to the Committee on Invalid Pensions.

By Mr. DALLINGER: A bill (H. R. 10655) granting a pension to James B. Bentley; to the Committee on Pensions.

By Mr. DICKINSON of Missouri: A bill (H. R. 10656) granting a pension to Rebecca J. Crist; to the Committee on Invalid Pensions.

By Mr. FISH: A bill (H. R. 10657) for the relief of the Commercial Union Assurance Co. (Ltd.); to the Committee on Claims.

By Mr. FOSTER: A bill (H. R. 10658) granting an increase of pension to Nancy J. Martin; to the Committee on Invalid Pensions.

By Mr. FREDERICKS: A bill (H. R. 10659) granting a pension to Sarah A. Stubblefield; to the Committee on Invalid Pensions.

By Mr. FULBRIGHT: A bill (H. R. 10660) granting a pension to Robert W. Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10661) granting a pension to Frederick M. Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10662) granting a pension to Melissa J. Ramsey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10663) granting an increase of pension to Jesse A. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10664) granting a pension to William Bleckwendt; to the Committee on Invalid Pensions.

By Mr. GILLET: A bill (H. R. 10665) granting an increase of pension to Ellen M. Brown; to the Committee on Invalid Pensions.

By Mr. MANLOVE: A bill (H. R. 10666) granting an increase of pension to Jane C. Stinnett; to the Committee on Invalid Pensions.

By Mr. MERRITT: A bill (H. R. 10667) granting an increase of pension to Mary E. Clark; to the Committee on Invalid Pensions.

By Mr. MOORE of Illinois: A bill (H. R. 10668) granting a pension to Robert Zink; to the Committee on Invalid Pensions.

By Mr. SNYDER: A bill (H. R. 10669) granting an increase of pension to Oscar S. Jones; to the Committee on Pensions.

By Mr. STEPHENS: A bill (H. R. 10670) for the relief of Frederick S. Easter; to the Committee on Naval Affairs.

By Mr. SWING: A bill (H. R. 10671) granting an increase of pension to Mattie L. Bailey; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Tennessee: A bill (H. R. 10672) for the relief of the Guamoco Mining Co.; to the Committee on Claims.

By Mr. TILSON: A bill (H. R. 10673) for the relief of Alice P. Martin; to the Committee on Claims.

By Mr. UNDERWOOD: A bill (H. R. 10674) granting a pension to Ophelia C. McKnight; to the Committee on Invalid Pensions.

By Mr. UPSHAW: A bill (H. R. 10675) granting a pension to Leo Pope Ott; to the Committee on Pensions.

By Mr. WOLFF: A bill (H. R. 10676) granting a pension to Henrietta Rowe; to the Committee on Pensions.

By Mr. WURZBACH: A bill (H. R. 10677) granting an increase of pension to Phebe A. Rice; to the Committee on Invalid Pensions.

By Mr. WYANT: A bill (H. R. 10678) granting an increase of pension to Lucinda Bush; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3151. By the SPEAKER (by request): Petition of Thomas Brennan Post, No. 390, Grand Army of the Republic, Department of Kansas, urging repeal of the law authorizing the Director of the Mint to issue memorial 50-cent pieces, the profits from the sale of these coins to be turned over to the Stone Mountain Memorial Association of Atlanta, Ga.; to the Committee on Coinage, Weights, and Measures.

3152. Also (by request), petition of Courtland Sanders Post, No. 21, Grand Army of the Republic, Department of Pennsylvania, favoring repeal of legislation which authorizes the Director of the Mint to issue memorial 50-cent pieces, the profits from the sale of these coins to be turned over to the Stone Mountain Memorial Association of Atlanta, Ga.; to the Committee on Coinage, Weights, and Measures.

3153. Also (by request), petition of citizens of Indianapolis, Ind., opposing the enactment into law of Senate bill 3218; to the Committee on the District of Columbia.

3154. By Mr. GALLIVAN: Petition of Kearsarge Association of Naval Veterans, Boston, Mass., recommending construction

of a cruiser for the United States Navy to be named the *Kearsarge*; to the Committee on Naval Affairs.

3155. By Mr. LAMPERT: Petition of citizens of Oxford, Wis., protesting against the enactment of Senate bill 3218, compulsory Sunday observance; to the Committee on the District of Columbia.

3156. By Mr. O'CONNELL of New York: Petition of the secretary of the Central Union Label Council, of Brooklyn, N. Y., favoring the Jones bill, for the closing of barber shops in the District of Columbia on Sundays; to the Committee on the District of Columbia.

3157. By Mr. ROUSE: Petition of 73 citizens of Campbell County, Ky., against the passage of compulsory Sunday observance bill (S. 3218) or the passage of any other religious legislation; to the Committee on the Judiciary.

3158. By Mr. WEFALD: Petition of 74 Chippewa Indians of Deer River, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3159. Also, petition of 28 Chippewa Indians of Rochert, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3160. Also, petition of 57 Chippewa Indians of Beaulieu, Minn., praying for a \$100 per capita payment from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3161. Also, petition of 53 Chippewa Indians of Pine Bend, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3162. Also, petition of 16 Chippewa Indians of Ebro, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3163. Also, petition of 89 Chippewa Indians of Cass Lake, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3164. Also, petition of 43 Chippewa Indians of Naytauwaush, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3165. Also, petition of 136 Chippewa Indians of Mahnomen, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3166. Also, petition of 26 Chippewa Indians of International Falls, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3167. Also, petition of 52 Chippewa Indians of Rice Lake District, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3168. Also, petition of 62 Chippewa Indians of Fosston, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3169. Also, petition of 32 Chippewa Indians of Lengby, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3170. Also, petition of 39 Chippewa Indians of Rogalskis Mill, Minn., praying for a per capita payment of \$100 from their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3171. Also, petition of 55 Chippewa Indians of Detroit, Minn., praying for a per capita payment of \$100 out of their tribal fund to assist them through the winter; to the Committee on Indian Affairs.

3172. Also, petition of 11 Chippewa Indians of Waubun, Minn., praying for a per capita payment of \$100 out of their tribal fund to help them through the winter; to the Committee on Indian Affairs.

3173. By Mr. WHITE of Kansas: Petition of George Morell and 51 other citizens of Collyer, Quinter, and Wakeeney, Kans., protesting against the compulsory Sunday observance bill; to the Committee on the District of Columbia.

3174. By Mr. WOODRUFF: Petition of citizens of Big Rapids, Mich., opposing any favorable action on Senate bill 3218, called the compulsory Sunday observance bill; to the Committee on the District of Columbia.

SENATE

FRIDAY, December 12, 1924

(Legislative day of Wednesday, December 10, 1924)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

PORTER H. DALE, a Senator from the State of Vermont, appeared in his seat to-day.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Clerk will call the roll. The principal legislative clerk called the roll, and the following Senators answered to their names:

Ball	Fernald	Ladd	Robinson
Bayard	Ferris	McCormick	Sheppard
Borah	Fess	McKellar	Shipstead
Brookhart	Fletcher	McKinley	Shortridge
Broussard	Frazier	McNary	Simmons
Bruce	George	Mayfield	Smith
Bursum	Glass	Menna	Smoot
Butler	Greene	Metcalf	Stanfield
Capper	Hale	Moses	Sterling
Caraway	Harrell	Neely	Swanson
Copeland	Harris	Norris	Trammell
Cottens	Harrison	Oddie	Underwood
Cummings	Hedlin	Overman	Wadsworth
Curtis	Howell	Pepper	Walsh, Mass.
Dale	Johnson, Calif.	Phillips	Walsh, Mont.
Dial	Jones, Wash.	Ralston	Warren
Dill	Kendrick	Ransdell	Watson
Edge	Keyes	Reed, Mo.	Weller
Ernst	King	Reed, Pa.	Willis

The PRESIDENT pro tempore. Seventy-six Senators have answered to the roll call. There is a quorum present.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Hattigan, one of its clerks, announced that the Speaker of the House had affixed his signature to the following enrolled bills, and they were thereupon signed by the President pro tempore:

S. 116. An act to amend section 196 of the Code of Law for the District of Columbia;

S. 923. An act to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia; and

S. 1343. An act to authorize the widening of Fourth Street, south of Cedar Street NW., in the District of Columbia, and for other purposes.

CREDENTIALS

The PRESIDENT pro tempore laid before the Senate a certificate of the Governor of the State of New Hampshire certifying to the election of HENRY W. KEYES as a Senator from that State for the term commencing on the 4th day of March, 1925, which was ordered to be filed and to be printed in the RECORD, as follows:

STATE OF NEW HAMPSHIRE,
EXECUTIVE DEPARTMENT.

This is to certify that on the 4th day of November, 1924, HENRY W. KEYES was duly chosen by the qualified electors of the State of New Hampshire a Senator from said State to represent said State in the Senate of the United States for the term of six years from the 4th day of March next.

Witness his excellency our governor, Fred H. Brown, and our seal hereto affixed at Concord this 25th day of November, in the year of our Lord 1924.

[SEAL.]

FRED H. BROWN, Governor.

By the governor, with advice of the council.

ENOS K. SAWYER, Secretary of State.

The PRESIDENT pro tempore also laid before the Senate a certificate of the Governor of the State of Kansas certifying to the election of ARTHUR CAPPER as a Senator from that State for the term commencing the 4th day of March, 1925, which was ordered to be filed and to be printed in the RECORD, as follows:

STATE OF KANSAS,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 4th day of November, 1924, ARTHUR CAPPER was duly chosen by the qualified electors of the State of Kansas a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1925.

Witness his excellency our governor, Jonathan M. Davis, and our seal hereto affixed at Topeka, Kans., this 10th day of December, in the year of our Lord, 1924.

[SEAL.]

JONATHAN M. DAVIS, Governor.

By the governor:

FRANK J. RYAN, Secretary of State.

PETITIONS AND MEMORIALS

Mr. WARREN presented a memorial of sundry citizens of Greybull, Big Horn County, Wyo., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. JONES of Washington presented memorials of sundry citizens of Yakima and Camas, all in the State of Washington, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. SHIPSTEAD presented memorials of sundry citizens of Eresborg, Sherburne, and Blackduck, all in the State of Minnesota, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented a resolution adopted at the sixty-third annual conference of the Minnesota Conference of Seventh-day Adventists, protesting against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. McKINLEY presented a memorial of sundry citizens of Chicago, Ill., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. CAPPER presented a petition of sundry employees of the Holton (Kans.) post office, praying for the passage of legislation granting increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

Mr. FESS presented a resolution adopted by the council of the city of Cleveland, Ohio, favoring the passage of legislation granting increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a resolution adopted by the council of the city of Cleveland, Ohio, favoring the regulation of the interstate traffic in deadly weapons, which was referred to the Committee on Interstate Commerce.

Mr. FRAZIER presented the memorial of George W. Dunham and 50 other citizens residing in the Isle of Pines, remonstrating against the ratification of the so-called Hay-Quesada treaty proposing to cede the Isle of Pines to Cuba, which was referred to the Committee on Foreign Relations.

Mr. WILLIS presented memorials of A. E. Maddox and 43 other citizens; of Jesse B. Casterline and 52 other citizens; and of Ellen Lord Foote and 49 other citizens, all of Cleveland, Ohio, remonstrating against the ratification of the so-called Hay-Quesada treaty proposing to cede the Isle of Pines to Cuba, which were referred to the Committee on Foreign Relations.

REPORTS OF COMMITTEES

Mr. FERRIS, from the Committee on Commerce, to which was referred the bill (S. 3123) authorizing the Secretary of Commerce to convey certain land to the city of Duluth, Minn., reported it without amendment and submitted a report (Rept. No. 802) thereon.

Mr. WADSWORTH, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 3571) authorizing the transfer of real property no longer required for lighthouse purposes (Rept. No. 803); and

A bill (H. R. 3388) to place the name of Paul Crum on the muster rolls of Company E, First Regiment Nebraska Infantry, United States Volunteers (Rept. No. 804).

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BRUCE:

A bill (S. 3644) for the relief of common carriers and transportation companies granting credit to the United States for transportation; to the Committee on Interstate Commerce.

A bill (S. 3645) for the relief of the Monumental Stevedore Co.; to the Committee on Claims.

By Mr. GLASS:

A bill (S. 3646) granting six months' pay to Virginia Weaver Plouk; to the Committee on Naval Affairs.

A bill (S. 3647) authorizing the appointment of Herbert L. Lee as artillery officer, United States Army; to the Committee on Military Affairs.

By Mr. JONES of Washington:

A bill (S. 3648) granting to the county authorities of San Juan County, State of Washington, certain described tracts of land on the abandoned military reservations on Lopez and Shaw Islands as a right of way for county roads, and for other purposes; to the Committee on Public Lands and Surveys.

By Mr. SHIPSTEAD:

A bill (S. 3649) to extend the time to the Chicago, Milwaukee & St. Paul Railroad for completion of bridge across the Mississippi River; to the Committee on Commerce.

A bill (S. 3650) granting a pension to Bruno Knyphausen; to the Committee on Pensions.

By Mr. WALSH of Montana:

A bill (S. 3651) for the relief of George A. Robertson (with an accompanying paper); to the Committee on Claims.

By Mr. McKELLAR:

A bill (S. 3652) granting a pension to Patrick S. Horton (with accompanying papers); to the Committee on Pensions.

By Mr. FESS:

A bill (S. 3653) to provide for the choice of an officer who shall act as President in the event a President and Vice President shall not have been elected and qualified as provided by law; to the Committee on Privileges and Elections.

By Mr. BALL:

A bill (S. 3654) to provide for the widening of First Street between G Street and Myrtle Street NE., and for other purposes; and

A bill (S. 3655) to transfer jurisdiction over United States Reservation No. 248 from the Chief of Engineers of the United States Army to the Commissioners of the District of Columbia; to the Committee on the District of Columbia.

By Mr. WILLIS:

A bill (S. 3656) granting an increase of pension to Mary C. Wood (with accompanying papers); to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3657) granting an increase of pension to Lola C. Armijo; and

A bill (S. 3658) granting a pension to Albert J. Fountain, sr.; to the Committee on Pensions.

By Mr. FESS:

A joint resolution (S. J. Res. 153) for the creation of a commission to prepare a constitutional amendment providing for election and terms of President, Vice President, Senators, and Representatives; to the Committee on the Judiciary.

AMENDMENTS TO MUSCLE SHOALS BILL

Mr. GEORGE, Mr. WADSWORTH, and Mr. WALSH of Montana each submitted an amendment intended to be proposed by them to House bill 518, the so-called Muscle Shoals bill, which were severally ordered to lie on the table and to be printed.

AMENDMENT OF INTERSTATE COMMERCE ACT

Mr. SHEPPARD submitted an amendment intended to be proposed by him to the bill (S. 3594) to amend paragraph 11, section 20, of the interstate commerce act, which was referred to the Committee on Interstate Commerce and ordered to be printed.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. McNARY submitted the following amendment intended to be proposed by him to House bill 10020, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed:

The appropriation of \$125,000 for cooperative investigations of the feasibility of reclamation projects, including the Guernsey Reservoir of the North Platte project, Nebraska-Wyoming; the Spanish Springs project in Nevada, the Owyhee and Vale projects in Oregon, projects in the Salt Lake Basin of Utah, the Kittitas Division of the Yakima project in Washington, and the Casper-Alcova project in Wyoming; including personal services in the District of Columbia and elsewhere, and the purchase, repair, maintenance, hire, and operation of motor-

propelled and horse-drawn passenger-carrying vehicles, contained in the second deficiency act, fiscal year 1925, approved December 5, 1924, is hereby reappropriated and made available for the fiscal year 1926.

To be inserted at the proper place in the bill.

APPROPRIATIONS FOR RAILROAD VALUATION WORK

The PRESIDENT pro tempore. The Chair, as a Senator from the State of Iowa, asks unanimous consent to submit a Senate resolution, and asks that it be printed in the Record and referred to the Committee on Interstate Commerce. Is there objection?

There being no objection, the resolution (S. Res. 283) was referred to the Committee on Interstate Commerce and ordered to be printed in the Record, as follows:

Whereas the budget for the fiscal year ending June 30, 1926, allots \$1,000,000 to enable the Interstate Commerce Commission to carry on the work of the valuation of common carriers subject to the act to regulate commerce approved February 4, 1887, and all the amendments thereto; and

Whereas it is estimated by the Interstate Commerce Commission that it will require to complete that work within two years the sum of \$4,148,300, and that of said aggregate sum \$2,369,626 should be expended in the year ending June 30, 1926, and \$1,778,674 in the year ending June 30, 1927; and

Whereas it is of the highest importance to the people of the country that the work of the Interstate Commerce Commission in that regard shall be completed at the earliest possible moment inasmuch as the ascertainment of the value of the properties of these common carriers must furnish the basis for the making, adjustment, and readjustment of the rates for transportation; and

Whereas it is estimated by the Interstate Commerce Commission that under the provisions of paragraph 6 of section 15a there was due at the close of the calendar year 1923 to the United States from certain of said common carriers the sum of \$69,668,000, divided as follows: For the year 1920, \$5,568,000; for the year 1921, \$12,500,000; for the year 1922, \$15,000,000, and for the year 1923, \$36,600,000, to which must be added a very large amount as the Government's share of the excess earnings for the year 1924; and

Whereas it is impossible for the Interstate Commerce Commission to demand and collect any part of said sums until the valuation of the properties of the common carriers which owe these sums is completed; and

Whereas many activities of the Interstate Commerce Commission depend upon the completion of the work of valuation: Be it therefore

Resolved, That it is the sense of the Senate that the Interstate Commerce Commission should be allotted sufficient funds to carry on the work of valuation with the greatest possible expedition; be it further

Resolved, That the Director of the Budget is earnestly requested to review this subject and to recommend to the President of the United States an enlargement of the sum allotted to the Interstate Commerce Commission for the year ending June 30, 1926, to at least \$2,369,626, and if that be done the Senate respectfully asks the President of the United States to consider favorably the supplemental report of the Director of the Budget.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Farrell, one of its clerks, announced that the House had passed a bill (H. R. 10404) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1926, and for other purposes, in which it requested the concurrence of the Senate.

RULES IN COMMON-LAW ACTIONS

Mr. WALSH of Montana. I ask unanimous consent that Order of Business No. 668, being the bill (S. 2061) to give the Supreme Court of the United States authority to make and publish rules in common-law actions, may be recommitted to the Committee on the Judiciary. I beg to say that the President pro tempore, Mr. CUMMINS, who is chairman of the Committee on the Judiciary, has authorized me to state to the Senate that this action is entirely satisfactory to him.

Mr. CURTIS. What is the bill, Mr. President?

The PRESIDING OFFICER (Mr. LADD in the chair). It is Senate bill 2061.

Mr. SMOOT. The Senator from Iowa [Mr. CUMMINS] is the author of the bill.

Mr. CURTIS. Very well.

The PRESIDING OFFICER. In the absence of objection, the bill will be recommitted to the Committee on the Judiciary.

HOUSE BILL REFERRED

The bill (H. R. 10404) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1926, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Mississippi [Mr. HARRISON] to the amendment in the nature of a substitute submitted by the Senator from Alabama [Mr. UNDERWOOD].

Mr. McKELLAR. Mr. President, on line 11, page 2, of the amendment submitted by the Senator from Mississippi it is proposed to insert the following:

The lessee shall pay as the annual rental for use of such properties an amount not less than 4 per cent of the total amount expended by the United States in acquisition, construction, and completion of Dams Nos. 2 and 3 and the purchase and emplacement of all machinery, gates, or other metal parts or material used in the construction of locks, dams, and power houses: *Provided*, That the rental for said dams, or either of them hereinbefore provided for, shall become operative upon their delivery to the lessee.

The rental for all these properties is 4 per cent on \$45,800,000, or between \$1,800,000 and \$1,900,000 a year for the rental period. What will the Alabama Power Co., in the event it gets this property and, of course, it will in my judgment get it, receive for that rental? It will receive Dam No. 2, on which the Government has actually spent already, or will have spent by the time it is delivered, the sum of \$45,800,000, according to figures that have been submitted to me by the department, on which will be paid a 4 per cent rental, an exceedingly small rental for that particular property. I call the Senate's attention to the fact that that is a very small portion of the property which the Alabama Power Co. would get under the lease for 4 per cent. I am going to state what property it would receive for this exceedingly small rental:

All of the property at nitrate plant No. 1, including the steam power plant, all of the land connected therewith, all of the buildings thereon, and all the building material, machinery, fixtures, equipment and appurtenances, tools and appliances; likewise all the property owned by the United States at nitrate plant No. 2, including its steam power plant; all of the land and the buildings thereon, the material, machinery, fixtures, tools and equipment, and personal property of all kinds and descriptions owned by the Government; all the land and machinery owned by the Government at Waco Quarry, together with all the buildings, machinery, railroad tracks, tools, engines, cars, and all other property located at and connected with the Waco Quarry plant.

In the aggregate the Government has spent the following sums for those properties: Plant No. 1, \$13,443,941.31; nitrate plant No. 2, \$67,071,236.20; Waco plant, \$1,200,000; or a total of \$81,815,177.51.

Mr. KING. How much has been spent on Dam No. 2?

Mr. McKELLAR. On Dam No. 2 up to October 31, 1924, the Government had spent \$35,081,074.55. They have had \$39,258,410, and they estimated that it will cost \$6,541,590 additional and that the total cost to complete it will be \$45,800,000.

Mr. KING. Does that mean Dam No. 2?

Mr. McKELLAR. That is Dam No. 2.

Mr. KING. About \$45,000,000?

Mr. McKELLAR. Yes; \$45,800,000.

Mr. KING. What did Dam No. 1 cost when completed?

Mr. McKELLAR. Dam No. 1 is not involved in this controversy. It is an entirely separate proposition.

Mr. KING. It has been completed?

Mr. McKELLAR. Yes. It has nothing to do with the present controversy. That is a navigation project.

I want the Senate to listen to the property the company would get under the lease. In the aggregate it is some \$82,000,000 worth of property in addition to the cost of Dam No. 2, of \$45,800,000. Listen to this, Senators, before you cast your vote to transfer this property to the Alabama Power Co.

When the Government commenced the construction of these plants it was necessary to build homes for the workers. In fact, the Government bought sufficient land to build a town at nitrate plant No. 1 and another town at nitrate plant No. 2. There are 13 locomotive engines. There is a large number of other kinds of cars and railroad equipment. At nitrate plant No. 1 there are 112 permanent houses, at nitrate plant No. 2 there are 186 permanent houses, and at Waco Quarry there are 14 permanent residences. The houses at the nitrate plants are fully equipped with every modern convenience. They have electric lights, heating plants, running water, bathrooms, and are in every way modern.

I stop long enough to say that there are over 300 of these residences thus equipped at the two little towns, both of which and all of which will pass under the terms of the proposed amendment.

Mr. NORRIS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Nebraska?

Mr. McKELLAR. I yield.

Mr. NORRIS. The Senator must not forget that there is also another town at Dam No. 2.

Mr. McKELLAR. The Senator is right. I have not included that, but what he states is true.

At nitrate plant No. 1 there is a large water-filtration system. This water system is so large that it will not be economical to use it until this town has grown into a city. At nitrate plant No. 2 there is another water-filtration plant. Instead of a standpipe, the Government utilized a large hill and constructed a reservoir on its top. These towns are about 5 miles apart, and are both capable of almost indefinite expansion. The houses are surrounded by beautiful, well-kept lawns and have macadamized streets and cement sidewalks. There are also at these plants nearly 500 other houses that were built for temporary purposes. Altogether there are 30 miles of macadamized roads on this property. There are 28 miles of sewers, 23 miles of water mains, and 54 miles of electric light facilities. At the Government town located at nitrate plant No. 2 there is a furnished hotel of 100 rooms.

The Government still owns a large amount of land suitable for the construction of additional homes and for other purposes. At these two Government-owned towns there are altogether 4,200 acres of land, a great portion of which is still vacant and ready for additional improvement. There are also at Waco Quarry 450 acres of land.

In addition to all this, the Government, in the event the Alabama Power Co. is given a lease of this property, will turn over to it more than \$2,000,000 worth of personal property, much of which is absolutely new and has a definite market value. For instance, there is a vast quantity of all kinds of building material, properly stored in sheds. None of this is second-hand and was all bought with the idea of building permanent homes and other structures. For instance, there are more than 6,000,000 feet of lumber. There are shingles, doors, plaster, windows, several millions of various kinds of common and fancy brick, lath, slate shingles, hollow building tile, and so forth; there are 10,500 wooden doors, 3,000 screen doors—all of which the Alabama Power Co. could sell on the market the next day after the transfer was made.

In addition to this, there are many cars and railroad engines which were used in the construction of nitrate plants Nos. 1 and 2, which are now absolutely unnecessary in the operation of these plants. These engines and cars and much of the railroad track, although second hand, could be sold at a fair value for cash. In addition to this, there is a vast amount of other material that has been used in the construction of these plants that is unnecessary in their operation. This consists of a great deal of secondhand lumber, tools, office furniture, consisting of typewriters, desks, and so forth, and a large amount of camping equipment that was used at the beginning of the construction period, camping furniture of all kinds in enormous quantities, temporary structures for the housing of employees during the construction period, which could be readily sold for cash and in the open market. A careful valuation of property of this description has been made and very conservatively valued, and it shows that \$1,500,000 could be realized from this source alone. Putting it all together, the personal property, both new and second hand, that is of no value in the operation of these plants, and could be sold without any injury whatever, has a total value at a very conservative estimate of over \$2,000,000.

Mr. President, if the Alabama Power Co. or any other company which may lease this property should acquire solely and alone plant No. 2, which cost \$45,800,000, it would get a won-

derful bargain, and at only 4 per cent interest; yet it is proposed in the pending substitute to convey to the lessee property which cost the Government over \$82,000,000 and which, I have no doubt, is worth in the neighborhood of half that sum.

Senators, how can you defend a vote by which you will convey this great water power, that cost the Government \$45,800,000, to a private corporation for only 4 per cent interest, without any replacement provisions in the contract, and then, in addition, give them property that is worth probably \$40,000,000? How are you going to defend that? How can any of us defend it if it shall be done? Yet that it will be done, apparently, there does not seem to be much doubt.

Mr. REED of Missouri. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Missouri?

Mr. McKELLAR. I yield.

Mr. REED of Missouri. I am very much interested in the last statement which the Senator has made. I have been examining the pending measure and I desire to ask, is it a fact that there is no provision to be made in the contract whereby the lessee shall maintain the property?

Mr. McKELLAR. There is a provision for maintenance but not for replacement, which is quite a different thing. Especially under a lease for 50 years, where a large part of the property is machinery, it will unquestionably have to be replaced within the 50-year period; and without a provision for replacement, as I am going to argue a little later—and I was coming to that proposition—it will cost the Government perhaps as much to replace it if it keeps it there as the entire rental received.

Mr. REED of Missouri. Mr. President, I do not wish to argue the question, and I am merely making the inquiries for information. We, of course, all perfectly understand that an ordinary lease for a property similar to this would contain a provision to the effect that the property is to be kept and maintained in as good condition as it is delivered; and in this particular instance, as to machinery, the lease ought not to contain in the contract the usual clause which excepts ordinary wear and tear, because ordinary wear and tear in this instance would, of course, consume a large part of the property. So the lease ought to be so drawn, as I think we will all agree, that at its end or sooner termination the property when turned over to the Government will be in substantially as good condition as it was when delivered. It is very important to know what the fact is with reference to that question.

Mr. UNDERWOOD. Mr. President—

Mr. McKELLAR. If the Senator from Alabama will pardon me, I will read to the Senator from Missouri the pertinent provision of the substitute covering the suggestion he has made. The language is:

and that after the lease is entered into the lessee shall maintain the property covered by the lease in good repair and working condition for the term of the contract.

There is something about replacement. It merely means that the lessee will maintain the property. When the lease runs out, of course, there is no obligation on the part of the lessee in that provision to replace the property.

I wish to call the attention of the Senator from Missouri and of the Senate in this connection to what the Alabama Power Co. proposed about replacement last January when it made its offer, which is still before the Government. Section 3 of that proposal reads:

The power company will, at its own expense, throughout the lease period, operate and make all necessary renewals and repairs incident to efficient maintenance of the spillway gates, the power house and substructures, superstructures, machinery, and appliances appurtenant to the power house, and will maintain the same in efficient operating condition—

And so forth.

In other words, the company itself offered to make renewals, while under the pending substitute it is only proposed to require them to maintain the property.

Mr. DIAL. Mr. President, is it not true that the Government has realized a very small percentage on the sale of any of the properties which it disposed of after the war? I am not contending, of course, that any Government property should be sacrificed, but is it not true that much of the property which the Government acquired during the war when sold brought a very small return? In the Senator's own State, for instance, my recollection is that a powder plant there, which cost the Government something like \$85,000,000, sold, perhaps, for less than \$5,000,000.

Mr. McKELLAR. That is very true, although I do not know about this particular case to which the Senator refers. I do know, however, that many Government plants which were constructed in time of war did not sell for anything like their value, and, in fact, brought only a small proportion of their value. But in this case we are transferring to a lessee a dam which has cost since the war \$45,800,000 at only 4 per cent interest as rental, and, in addition, we are giving them property which cost the Government some \$82,000,000 and probably is worth half that amount at this time. Dam No. 2 is amply worth this rental.

Mr. DIAL. I do not understand that we are giving them all the other property. We are merely leasing it to them. Some personal property might go with the lease, but not the properties on which the Government has expended so much money.

Mr. McKELLAR. I doubt if even the 300 splendid residences will be of any value to the Government at the end of the 50-year period. I imagine that they will be substantially worn out at that time. So, if the Senator from South Carolina shall vote for this bill and the property should pass to a lessee under the bill, he will have, in my judgment, voted to give at least \$40,000,000 to a lessee under this contract for absolutely nothing, and he will have voted away the money of the American people.

Mr. DIAL. I should like to have the Senator tell me what we should vote for, if we are not to vote for the pending measure.

Mr. McKELLAR. I am glad the Senator has come to that. I have reached a conclusion myself and I do not object to telling the Senator very frankly what that conclusion is. The Senator from Nebraska has said that he is willing to accept a provision under which the Government will be obligated to manufacture 40,000 tons of fixed nitrogen a year, at least substantially, as provided in the Underwood amendment. I think under such a plan the desired amount of nitrogen is more likely to be manufactured than it will be under the Underwood substitute. With such an amendment and some other amendments that I am sure will be agreed to I am going to support the measure requiring the Government operation of this plant.

Mr. KENDRICK. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Wyoming?

Mr. McKELLAR. I yield.

Mr. KENDRICK. I want to ask the Senator from Tennessee if he was in favor of the Ford offer?

Mr. McKELLAR. I was.

Mr. KENDRICK. In the light of that circumstance, Mr. President, I am unable to see how the Senator can object to the use, rent free, of this property, the title to which under the Ford offer he would transfer outright.

Mr. McKELLAR. There is quite a difference between the Ford offer and this, if the Senator has read them both.

Mr. KENDRICK. The Ford offer simply proposed to pay for this property, as I read the figures, \$1,500,000 for about seventy-odd million dollars of invested capital. This offer just leases the land instead of giving title to it.

Mr. McKELLAR. The Ford offer proposed to give \$5,000,000 in cash.

Mr. KENDRICK. Five million dollars with the plant that cost \$3,500,000.

Mr. McKELLAR. It proposed to give, then, \$5,000,000 in cash for this property. I think that was exceedingly cheap; but that is \$5,000,000 more than the Alabama Power Co. is offering for the property. Five million dollars may be a small amount to the Senator, but it is not such an insignificant amount so far as I am concerned. I should much prefer an offer of 4 per cent and \$5,000,000, especially in view of the other considerations connected with the Ford offer, to this proposal which puts it in the hands of the Alabama Power Co., as I think I can show in a few moments, without the \$5,000,000.

Mr. KENDRICK. Mr. President, I want to call the Senator's attention to the fact that written in the Norris bill as passed by the House there is a provision under which the Government shall expend, under the direction of Mr. Ford, about \$3,500,000 that would have been granted to him under that bill. That reduces his actual payments to the Government to about \$1,500,000.

Mr. McKELLAR. No; not exactly that way. The Senator is right in part, as I understand the record, and he is wrong in part. The additional \$3,000,000 would have to be added to the cost of plant No. 2, and he would have to pay the interest on that. That is the only difference between the Senator and myself. There is no question about the fact. Ford offered

\$5,000,000 in addition to the 4 per cent, and that is all there is in it.

Mr. KENDRICK. Mr. President, all I can say in answer to the Senator from Tennessee is that the figures, of course, would show the facts, and I am sure they would prove that the Senator is mistaken.

Mr. McKELLAR. Perhaps so. That is not very material at this point, and I want to come to something else.

It may be said that this company is not going to get all of this property. I want to call attention to the first section of the Underwood amendment:

That the United States nitrate fixation plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings used in connection therewith—

That takes in the 3,000 acres of land; it takes in all those three or four hundred residences, the 100-room hotel, the sewers, the improved streets and sidewalks and lights, and everything—

all tools, machinery, equipment, accessories, and materials thereunto belonging; all laboratories and plants used as auxiliaries thereto; the Waco limestone quarry in Alabama and any others used as auxiliaries of said nitrogen plants Nos. 1 and 2; also Dam No. 2, located in the Tennessee River at Muscle Shoals, its power house, its auxiliary steam plants, and all of its hydroelectric and operating appurtenances, together with all machines, lands, and buildings now owned or hereafter acquired in connection therewith—

That even takes in the navigation facilities; it takes in the locks themselves; and if a contract should be entered into in accordance with the terms of this bill, this company could actually charge the Government for every boat that passed down through the locks and charge them for operating the locks. It would have the control and the ownership of the whole thing, and yet we are conveying it to the lessee.

Mr. KING. Mr. President, will the Senator yield to me?

Mr. McKELLAR. In just a moment I will yield.

I next call attention to the fact that section 6 provides that all of the properties described in section 1, "in compliance with the terms and conditions," etc., will be included in the lease. Now, a day or two ago the Senator from Alabama [Mr. Underwood] stated that the Alabama Power Co. was not going to bid on this property. I do not know whether it is or not.

Mr. UNDERWOOD. Mr. President—

Mr. McKELLAR. Does the Senator desire to modify that statement?

Mr. UNDERWOOD. No; I do not. I just want to correct the Senator's statement. I said that after I had introduced this bill I had merely a conversation with one of the officers of the Alabama Power Co., who told me that he would not make a bid under this bill. That came to me from one of the officers. If the Senator has any question about it, I shall be glad to introduce him to the officer.

Mr. McKELLAR. I do not care to talk to him about it. I am opposed to his getting the plant, and there is no use in complicating the matter by a personal conversation.

Mr. UNDERWOOD. What I want to say is that I do not go any farther than that statement, and I do not believe they will make a bid; but when the Secretary comes to make the lease I am not concerned with whom he makes the lease if he makes a lease within the terms of the bill. I have no favorites in it. He can make it with anybody he pleases.

Mr. McKELLAR. Mr. President, in this connection I ask unanimous consent to place in the Record at this point an article from the Nashville Banner of, I think, Wednesday last. I have not it before me, but I will put in the article. It states that the Alabama Power Co. had bought the street railway companies in Sheffield, and probably in surrounding territory; that it was buying up the land in that territory. I take it that since it has gone out to the country that the Senate is going to fall over itself in passing this bill, this great corporation, which is already under a temporary lease for the steam plant, reasonably construed that it would get the plant, and is now buying up the little town in order to enhance its business further. That is all right; I do not blame it; but it ought to afford some reason why we should look into the matter before we vote on it.

I have a letter from one of my constituents saying that he is the owner of quite a large property down at Sheffield, and that the Alabama Power Co. recently had offered him a small profit on his investment, and he wanted my advice. I could not advise him. I do not know. Evidently, though, it is a strange thing that the Alabama Power Co. is buying up the public utilities in the vicinity of the shoals, and buying the lands in the vicinity of the shoals, and yet does not propose to bid

if it has the opportunity under this bill. In my judgment, the Senator from Alabama is mistaken. I think the Alabama Power Co. is just waiting to get this bill through, when it will purchase this plant. That is my judgment about it.

Mr. KENDRICK. Mr. President—

Mr. UNDERWOOD. Mr. President, just in this connection, if the Senator from Wyoming will pardon me a moment, I know nothing about the Alabama Power Co.'s purchase of the utility plants at Sheffield except what I have read in the papers. I read in my home papers an account similar to what the Senator says; but the public utilities in Sheffield have nothing more to do with this plant than the public utilities in Huntsville or Birmingham or anywhere else. They have no connection whatever with the matter.

Mr. McKELLAR. Why, Mr. President, it is just as certain as that day follows night that if this company did not believe that it was going to obtain this plant under the terms of the bill it would not be buying up the real estate and public utilities in and around Muscle Shoals.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

Mr. McKELLAR. I had better yield first to the Senator from Wyoming [Mr. Kendrick], because he was on his feet first. Then I will yield to the Senator from Arkansas.

Mr. KENDRICK. Mr. President, in the interest of fairness I want to say to the Senator from Tennessee, as one of the members of the committee who visited Muscle Shoals and gave a good deal of time and effort to a study of the situation there, that I was surprised to learn, as it seemed to me, from an authorized source, that the Alabama Power Co. had deeded to the United States Government the lands abutting on Dam No. 2 at Muscle Shoals without money and without price, as I remember. Is not that the case?

Mr. UNDERWOOD. One dollar was the consideration of the deed.

Mr. McKELLAR. Well, that dollar was better spent than any other dollar that was ever spent in history if the company gets this plant in consideration of it.

Mr. KENDRICK. I thought it ought to be said in fairness, and in view of the statement made by the Senator, that these people who are now charged with intent to monopolize the situation had actually granted to the Government the very land on which Muscle Shoals Dam No. 2 was erected.

Mr. McKELLAR. I am glad the Senator has put that in. I want to be absolutely fair. I have no desire to be anything else but fair; but I will say to the Senator that if the Senator's vote is going to be influenced by that, surely that dollar cast upon the waters was Biblical bread that has been used to very, very fine advantage.

Mr. KING. Mr. President, will the Senator yield?

Mr. McKELLAR. I promised to yield to the Senator from Arkansas [Mr. Caraway]. Then I will yield to the Senator from Utah.

Mr. CARAWAY. Mr. President, I want to ask the Senator a question, because I have always believed that we should understand exactly what we say and what we intend to say. Is it the Senator's belief that some kind of a conspiracy has been entered into to promote this legislation in order to help the Alabama Power Co.?

Mr. McKELLAR. Oh, no.

Mr. CARAWAY. Then what does the Senator mean by saying that this legislation means that the Alabama Power Co. is to have the plant?

Mr. McKELLAR. Because the Alabama Power Co. now has the steam plant; because the Alabama Power Co. has before the Secretary of War and before the Congress a substantially similar offer, offering precisely the same consideration in so far as dollars and cents are concerned, to wit, 4 per cent on the \$45,800,000; because this bill affords a proposition that is so much better for the Alabama Power Co. than what it has already offered; because the Alabama Power Co. is buying up the lands in and around Sheffield; because the Alabama Power Co. is buying the public utilities in and around Sheffield. I may be mistaken about it; it may be that I am unfortunate in not understanding those facts; the Alabama Power Co. has long wanted the plant. It has tried in every way to get the plant. It now has a part of the plant, to wit, the steam part of it, and it is using it on its transmission lines; and if these things that I have stated are the facts, it is the most natural belief in the world from all these facts that the Alabama Power Co. will get the plant, and I have no doubt about it in my own mind.

Mr. CARAWAY. Then the Senator must mean by that, if I understand him, that there is some kind of an understanding between the people who are promoting this legislation and the Alabama Power Co.

Mr. McKELLAR. Oh, no.

Mr. CARAWAY. Let me ask the Senator a question. Does not his statement inevitably lead to that conclusion?

Mr. McKELLAR. No; because I am trying to argue with these very Senators who have been and who are now favorable to this legislation. I am trying to get the facts before them, in the hope and belief that when all the facts do come before Senators, every one of whom I know to be honest and sincere and desirous of doing what is right for the Government and for the American people, they can be induced to change their minds.

Mr. CARAWAY. Under the provisions of this bill anybody may lease the property who makes the best offer, may he not?

Mr. McKELLAR. Not necessarily the best offer; oh, no.

Mr. CARAWAY. The Secretary of War, then, must be either corrupt or ignorant, because it is with him to make the contract, and unless he is going to make a contract that is either foolish or corrupt, the man who makes the best offer must necessarily get it, must he not?

Mr. McKELLAR. Not necessarily, for this reason—

Mr. CARAWAY. Why?

Mr. McKELLAR. If the Senator will permit me, I will tell him why I think so. We have already voted down all regulation of the terms of this lease by the United States Government. When there was an attempt to apply to this matter the provisions of the water power act, which was passed by the Congress and which was supposed to apply to all of the water powers in the country, it was voted down.

Mr. CARAWAY. Will the Senator yield?

Mr. McKELLAR. Yes.

Mr. CARAWAY. What amendment seeking to apply the provisions of the water power act was voted down, the Senator's amendment?

Mr. McKELLAR. My amendment.

Mr. CARAWAY. Does not the Senator know that his amendment was nullified by the proviso in the water power act; that if his amendment had been agreed to this would have been absolutely the only project in America that has been created since the water power act was passed that would not have been in line with it? The proviso absolutely nullifies the power of the Water Power Commission when a State shall have a body to regulate the distribution and sale of power.

Mr. McKELLAR. Mr. President, let me make this suggestion to the Senator. The only difference between the regulation provision in the water power act and the one here is that I put the power in the hands of the Secretary of War. I believe the Secretary of War could better regulate this company, under the circumstances, under this lease, than could the Water Power Commission. I would be glad to insert the Water Power Commission.

Having this amendment in mind, having selected it out of the water power act, when the Senator from Oregon [Mr. McNARY] offered his amendment, which applied all of the regulations of the water power act to this, I voted against it. I made a mistake, a mistake I am going to vote to rectify, so far as I can do it, when it comes up again. I expect to vote for the amendment of the Senator from Oregon when it comes up in the Senate, if he offers it again; and if he does not offer it, I hope some one else will. I probably will offer it myself unless he does. I believe there ought to be national regulation.

Mr. CARAWAY. Mr. President—

Mr. McKELLAR. If the Senator will just permit me a moment—and then I will yield to him—here we are turning over to this company a plant that cost in actual money, since the war—not during the war, but since the war—\$45,800,000, and I do not believe there is a person in the Senate who does not know that the property is worth not only every dollar of the \$45,800,000, but with the power it is worth vastly more than that sum. In addition, we are proposing by this substitute to give the lessee probably \$40,000,000 more of the American people's money. It is a national proposition. It is to be turned over by the National Government. It is a matter over which the National Government alone has jurisdiction, under the Constitution and laws of the United States, and yet it is proposed that we denude ourselves of every power of regulation. The Senator from Alabama has said that if the lessee did not do its duty, if it did not do right, he would be here to raise his voice in protest against its action. That is true; the Senator from Alabama always protests against what he believes to be wrong, and he is entitled to the greatest credit for it. He is a courageous representative of his people. But what good will a protest in the Senate do after a contract is made, after the property is gone, after the power to regulate is gone? We should, in some way, keep the power to regulate. Now I yield to the Senator from Arkansas.

Mr. CARAWAY. If the Senator will permit me, if this were a project that was constructed under the water power act, does the Senator contend that the Water Power Commission could control and regulate the distribution of power in Tennessee?

Mr. McKELLAR. Yes.

Mr. CARAWAY. Then what does the proviso mean which says that as soon as Tennessee shall have a regulatory body itself, all the powers of the commission under this act cease? Does that mean anything? "Cease" means to quit, does it not?

Mr. McKELLAR. I know; but I do not agree with the Senator's proposal about that. The Tennessee commission, under the water power act, as I read it, will have exactly the same power to regulate that part of it in Tennessee as the railroad commission of Tennessee has to regulate railroads in Tennessee. But where there is an interstate transmission of power, then the regulation is there, and if it is not there, after building this plant for the lessee without a dollar of money being paid out by the lessee, in Heaven's name we ought to put it there, after the expenditure of this enormous sum.

Mr. CARAWAY and Mr. NORRIS addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Tennessee yield further; and if so, to whom?

Mr. McKELLAR. I yield first to the Senator from Arkansas.

Mr. CARAWAY. Of course, if the Senator wants to go back now and amend the water power act, and say "We can not trust the State commissions; Tennessee can not regulate its own affairs, and the Government has to be its guardian," that is all right.

Mr. McKELLAR. Wait one moment.

Mr. CARAWAY. Just a minute.

Mr. McKELLAR. I do not want the Senator to put me in that attitude, because that is not my attitude.

Mr. CARAWAY. I am just putting the Senator where he is putting himself.

Mr. McKELLAR. Oh, no. The transmission of power from one State to another is a function of government that has been turned over by the States to the National Government, and I am not taking away any rights from them.

Mr. CARAWAY. The mere power to transmit it does not have anything to do with it. The power of saying how much it shall be sold for and how it shall be distributed is the only vital thing. The line that transmits it to the public is not worth a cent one way or the other. We might just as well be absolutely fair. We think the States have patriotism and sense enough to regulate their own affairs, or we think they need guardians, and that the States ought to be abolished.

I have noticed a great deal of heat about this matter. I was a member of the committee before which these hearings were conducted. There is no use going out and disguising what we want to do. We either want private enterprise to develop power or we want the Government to do it. There is no use trying to make it impossible for private interests to succeed if they shall engage in the business. Why not just throw off the disguise and say that we are no longer willing to trust private individuals with control of their own business; that we think they all need guardians?

Of course, this is not personal, but I noticed when a great power plant up in Tennessee, which cost eighty-five or ninety million dollars, sold for three, nobody on the floor of the Senate shrieked then. Tennessee people bought it for two or three million, when it cost \$85,000,000. I do not recall anybody particularly filled with horror at the advantage some people were getting over the Government.

Mr. McKELLAR. Does the Senator think that if that were sold too cheap, that is any reason why we ought to give this away to the Alabama Power Co. or any other company?

Mr. CARAWAY. I thought that if the Senator was so outraged about this, he ought to have been shocked a bit when that happened.

Mr. McKELLAR. I am sorry it did not bring more.

Mr. CARAWAY. I do not recall that the Senator made any protest.

Mr. McKELLAR. I did not.

Mr. CARAWAY. That is what I thought.

Mr. McKELLAR. It was a very different matter.

Mr. CARAWAY. Of course, one was a powder plant and the other was a fertilizer plant, but they were both built by the Government.

Mr. McKELLAR. One was a war plant.

Mr. CARAWAY. They were both war plants, absolutely.

Mr. McKELLAR. One was a temporary one.

Mr. CARAWAY. No; they were both permanent.

Mr. McKELLAR. I yield to the Senator to say what they were. Go ahead.

Mr. CARAWAY. Just this other thing: The Senator just now made the assertion that this project is worth all that it cost.

Mr. McKELLAR. Oh, no, Mr. President.

Mr. CARAWAY. Did not the Senator just a minute ago say—

Mr. McKELLAR. Does the Senator mean Dam No. 2?

Mr. CARAWAY. That the whole thing was worth all it cost.

Mr. McKELLAR. Dam No. 2; yes; \$45,800,000.

Mr. CARAWAY. There are a good many business men in this country who are rather familiar with the value of such plants, are there not?

Mr. McKELLAR. I imagine so.

Mr. CARAWAY. And if it is worth that much, and they have a perfectly free chance to obtain it under what the Senator says are the most outrageously favorable terms, why will they not go and bid on it? Why will they not make it impossible for this iniquitous institution called the Alabama Power Co. to get it if it is worth that much in the open market?

Mr. McKELLAR. Will the Senator vote for an amendment providing that this plant shall be sold at public sale, after asking for bids?

Mr. CARAWAY. If the Senator wants to offer it—

Mr. McKELLAR. If the Senator wants to be fair about it, will he not vote to put a provision like that in this bill?

Mr. CARAWAY. Does the Senator want to offer an amendment like that?

Mr. McKELLAR. I think I shall. It has already been offered by the junior Senator from Nebraska [Mr. HOWELL], as I understand it, and I am going to vote for it.

Mr. CARAWAY. I think, then, that inasmuch as I do not agree with the Senator I had better vote the other way.

Mr. McKELLAR. I think so, too. I now yield to the Senator from Nebraska.

Mr. NORRIS. Mr. President, I wanted to call the attention of the Senator from Tennessee, and also the Senator from Arkansas, to the fact that under the so-called Underwood substitute there is no assurance that any State commission will ever have an opportunity to regulate a single kilowatt of power. They are not required, under the so-called Underwood substitute, to sell or to carry any of it.

Mr. CARAWAY. Nor were they under the Ford bid.

Mr. NORRIS. No. That was one of the objections I had to the Ford offer—that he could keep it all himself; and the bidder who gets this lease under the Underwood substitute can likewise keep it all himself and go into the manufacture of aluminum, for instance, if Mr. Mellon should get it, and use every kilowatt of it, and no State authority, under this substitute, and no Federal authority could have a word to say in regard to it.

Mr. UNDERWOOD and Mr. COUZENS addressed the Chair. Mr. McKELLAR. Just a moment. I want to comment on what the Senator from Nebraska has said. I will yield in a moment.

The Senator from Nebraska very aptly called the attention of the Senate to the fact that until this power is transmitted across the line from the State of Alabama to some other State no other public utility commission has any power over it. That is the first step. So we find the Alabama Power Co. buying up all the public utilities in the three cities near this plant. They are buying up the lands around this plant, and I am not so sure, with that prospect in view, whether any of that power will ever get across any State line. I think those of us who live near by, like the Senators from Georgia, like the Senators from South Carolina, like the Senator from Mississippi [Mr. HARRISON], had better be looking out for the interests of the people of our own States, if this great corporation is going to build a great city there and use this plant for the purpose of building it up for its own benefit. Nobody could blame it; I do not blame it. The stockholders of that company, if they desire, can confine it to the State of Alabama and build up their own property. They could well do so, under the terms of this substitute, and no public utility commission in any other State would have the slightest authority over them.

Mr. UNDERWOOD. Mr. President—

Mr. McKELLAR. I had promised to yield to the Senator from New York, but I will yield to the Senator from Alabama, who is in charge of the substitute.

Mr. UNDERWOOD. I have several times called the attention of the Senator from Tennessee, and also of the Senator from Nebraska, to the provision in this bill in section 10 pro-

viding for the regulation of the use of this power by State commissions, and it is based on use, not sale. Therefore if it is used in the State of Alabama or in any other State it will be subject to regulation.

Mr. McKELLAR. But the Senator must first admit that, until this power crosses the State line, no other utility commission has any power or jurisdiction over it.

Mr. UNDERWOOD. Of course, if it were all used in Alabama the Alabama Public Utility Commission, under the terms of my substitute, could regulate it.

Mr. McKELLAR. Of course.

Mr. UNDERWOOD. But if it crosses the line some other State utility commission can control it.

Mr. NORRIS. Let me interrupt the Senator there in answer to the Senator's suggestion. Suppose Mr. Mellon's—

Mr. McKELLAR. Aluminum company.

Mr. NORRIS. Suppose Mr. Mellon's aluminum company should be a bidder and get the property, or suppose they bid through a subsidiary company. Let us say they are going to use every kilowatt of it to manufacture aluminum. They will sell it all to their own company, and they do not care a whit whether they pay one-thousandth part of a mill a kilowatt or whether they pay a dollar a kilowatt. It is only taking it out of one pocket and putting it in the other. So a bidder can, under that substitute, absolutely escape any regulation, even by the Alabama Power Commission.

Mr. UNDERWOOD. And by the Government, too.

Mr. NORRIS. Yes; the Government. They bought it and used it themselves.

Mr. McKELLAR. And we have already by an amendment voted down Government regulation. I will yield to the Senator from New York [Mr. COPELAND] now, and then to the Senator from Michigan [Mr. COUZENS] in just a moment.

Mr. COPELAND. Mr. President, I would like to suggest to the Senator from Tennessee that I am not at all satisfied that the Underwood bill does make adequate provision for the protection of the users of electricity developed at Muscle Shoals. I had a friendly altercation with the Senator from Alabama yesterday over an editorial in the New York World, and in what I had to say suggested that while there were technical errors in the editorial, yet essentially it was correct because there is no provision in the Underwood bill for the adequate protection of the public in the use of electricity. The Senator from Alabama challenged that statement and called attention to section 10 of his amendment, where it is provided that—

The surplus power not required under the terms of this act for the manufacture of nitrogen or fertilizer, when sold or used shall be subject to the laws, rules, and regulations relating to the sale and use of electric power in the several States in which said power is used.

I do not believe the law of Alabama gives that protection. I hold in my hand a copy of the Alabama act dated October 1, 1920, to enlarge the authority and power of the Alabama Public Service Corporation, and this very astonishing language occurs in that act:

SEC. 5. Limitations: None of the provisions of this act shall apply to the generation, transmission, or distribution of electricity, to the manufacture or distribution of gas, to the furnishing or distribution of water, or to the production, delivery, or furnishing of steam for heat or power by a producer who is not otherwise a utility, for the sole use of such producer or for the use of tenants of such producer—

This is what I particularly want to call to the attention of the Senator from Tennessee—

nor shall they apply to any person not otherwise a utility who manufactures and supplies such products to a utility for its use or distribution without participation by such manufacturer in such use or distribution.

Suppose, then, that the power is turned over by the Muscle Shoals corporation to the Alabama Power Co., where is there in the Underwood bill any protection against the exorbitant rates which might be charged for the use of that power? As I understand it, the Underwood bill would free the lessee from all form of regulation there as to rates or service or otherwise.

Mr. McKELLAR. Apparently the law is very explicit, but there would not be any regulation at all. However, I do not think it makes very much difference.

Mr. UNDERWOOD. I will say to the Senator—

Mr. McKELLAR. Just a moment and I will yield to the Senator. I do not think it makes very much difference, anyway. Some years ago I read an old book called "Flush Times in Alabama," written long, long before the Civil War, and there was a character in a sketch who was called "Ovid Bolus." Among other things, in describing Ovid the writer said that some

20 years before he had made friends with his conscience and now they never had a difference. I do not think there are any differences between the Alabama Power Co. and the Alabama Public Utilities Commission, certainly none of serious import, as I judge from what I am told by citizens of Alabama. I am a native Alabaman myself, and still own some property down there, and I go down there occasionally. I do not think there is very much difference of opinion between the Alabama Public Utilities Commission and the Alabama Power Co., and whether the law provides for it or not, I do not think the Alabama Power Co. will be very greatly disturbed by any regulation at the hands of the Alabama commission.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

Mr. McKELLAR. I yield.

Mr. CARAWAY. The Senator is so strong for regulation now that I am prompted to remind him that when one man whose name was Henry Ford had an offer pending for this property there was no provision for any regulation at all and no effort to divorce it from the water-power plant. I think the Senator was for accepting Henry Ford's bid without the crossing of a "t" or the dotting of an "i."

Mr. McKELLAR. I do not think the Senate ever voted on the Henry Ford offer.

Mr. CARAWAY. Was not the Senator for it?

Mr. McKELLAR. It was reported out by the Senator's committee, to which it had been referred.

Mr. CARAWAY. Was not the Senator for it?

Mr. McKELLAR. I was very much in favor of Henry Ford getting the plant, and I would like to have had the very regulations the Senator speaks of. I do not think any person or any corporation ought to have that power without national regulation.

Mr. CARAWAY. Was not the Senator in favor of Henry Ford's offer without any modification?

Mr. McKELLAR. I do not recall that I was. I have always said there ought to be reasonable regulation.

Mr. CARAWAY. I want to call the Senator's attention to the fact that he was speaking about the editor of the Banner. I recall that a lot of people were down here spending somebody's money for the Henry Ford offer absolutely without any change.

Mr. McKELLAR. Yes, I think so; and not only the editor of the Banner but about nine-tenths of the people in my State and probably 95 per cent of the people in the Senator's State were for the Henry Ford offer.

Mr. CARAWAY. Therefore the Senator was for Henry Ford's offer without change, regardless of the fact that it destroyed the water power.

Mr. McKELLAR. I do not want the Senator to put me in an attitude which I never have occupied and never have been in.

Mr. CARAWAY. I do recall that the Senator was going around with people who were down here supporting the Henry Ford offer.

Mr. McKELLAR. Yes; I introduced those gentlemen to the Senator's committee just as I have introduced people that come from my State, whether I am for their contention or against it.

Mr. CARAWAY. I recall that the Senator from Tennessee never did make the suggestion to the committee that there ought to be any modification of the Henry Ford offer.

Mr. McKELLAR. Nor did I make any suggestion that there ought to be acceptance of his offer.

Mr. CARAWAY. I certainly got the impression that the Senator was for it.

Mr. WALSH of Montana. Mr. President, will the Senator yield to me?

Mr. McKELLAR. I yield.

Mr. WALSH of Montana. The course the discussion has taken has moved me to interrupt the Senator from Tennessee to ask unanimous consent for leave to present an amendment to the Underwood amendment in order that it may be printed for the information of Senators.

I may say in this connection for the information of those interested that it proposes to strike out section 10 and insert in lieu thereof sections 19 and 20 of the water power act, modified only so as to make them conform to the conditions of the pending bill. The idea I dare say was embraced in the amendment offered by the Senator from Oregon [Mr. McNARY] some days ago, which made generally the provisions of the water power act applicable, but there are so many provisions that are entirely inapplicable it seems to me it would

be difficult to discern from an amendment of that character what particular provisions were intended to be applicable.

If I may be pardoned for a further word in this connection I desire to say that that measure, as many of the Senators will recall, was the subject of very spirited contention in both Houses of Congress, the discussion of it covering many years. Generally the controversy has centered about two propositions. One was the provisions of the recapturing clause and the second was the provisions in relation to the regulation of rates to be charged for the power to be developed. Of course, the recapturing clause is unimportant here, but I have been unable to understand why this particular power plant should not be subject to exactly the same regulations concerning rates as other power plants developed under lease or license from the Government of the United States.

Mr. OVERMAN. May I ask the Senator a question? He proposes to strike out section 10 and substitute the other sections to which he has referred?

Mr. WALSH of Montana. Yes.

Mr. OVERMAN. The only provision for the sale of surplus power contained in the Underwood bill is contained in section 10.

Mr. WALSH of Montana. Yes.

Mr. OVERMAN. Now, what provision has the Senator made for disposing of the surplus power?

Mr. WALSH of Montana. The provision is substantially the same, making the rates subject to regulation by the authority of the State into which the power is carried, provided that State has a regulatory authority. If it has not a regulatory authority, then, as in the water power act, the rates are subject to regulation by the water-power commission.

Mr. OVERMAN. But suppose there is no distribution of power?

Mr. WALSH of Montana. That is covered by section 20 of the water power act, which contemplates the case of the transmission of power from one State to another. In that case it is subject to regulation by the water-power commission under the general water power act.

Mr. OVERMAN. In the opinion of the Senator as a lawyer, if the property is leased, would that provide the authority for the power company to sell power?

Mr. WALSH of Montana. Of course that is provided for in section 5, which reads as follows:

The lease shall also provide the terms and conditions under which the lessee may sell and dispose of the surplus electric power created at said plant.

Mr. NORRIS. Suppose he does not sell it?

Mr. WALSH of Montana. That is another matter. These provisions are simply intended to regulate the rate in case it is sold.

Mr. OVERMAN. Therefore section 10, which is proposed by the Senator to be stricken out, is the only authority in the bill for the sale.

Mr. McKELLAR. Of course, this discussion is entirely outside of the scope of the argument to which we are addressing ourselves, to wit, the amendment of the Senator from Mississippi; but the Senator from Georgia [Mr. GEORGE] has an amendment which, in my judgment, amply provides, and very wisely provides, for the very suggestion that the Senator from North Carolina is making; that is, about the distribution of surplus power in other States.

Mr. OVERMAN. I am heartily in favor of it. The Senator refers to section 10, which the Senator from Montana proposes to strike out.

Mr. McKELLAR. If he does strike it out in connection with this matter, it will be taken care of by the amendment of the Senator from Georgia.

Mr. WALSH of Montana. While it strikes out section 10, it would be substantially the same provision and make an addition to it.

Mr. OVERMAN. Then that is all right.

Mr. McKELLAR. I am sure there will be no trouble about it.

Mr. WALSH of Montana. I simply ask leave to present the amendment and ask that it may be printed and lie on the table.

Mr. McKELLAR. I ask that it may be printed in the RECORD at this point. I think it is a valuable contribution to this particular part of the argument and I thank the Senator from Montana for introducing it at this time.

The PRESIDENT pro tempore. Without objection, the amendment proposed by the Senator from Montana will be printed in the RECORD.

The amendment of the Senator from Montana [Mr. WALSH] is as follows:

Strike out section 10 and in lieu thereof insert:

"Sec. 10. That as a condition of any lease entered into under the provisions of this act every lessee hereunder which is a public-service corporation, or a person, association, or corporation developing, transmitting, or distributing power under the lessee, either immediately or otherwise, for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State in which the service is rendered or the rate charged. That in case of the development, transmission, or distribution, or use in public service of power by any lessee hereunder, or by its customer, engaged in public service within a State which has not authorized and empowered a commission or other agency or agencies within said State to regulate and control the services to be rendered by such lessee or by its customer engaged in public service, or the rates and charges of payment therefor, or the amount or character of securities to be issued by any of said parties, it is agreed as a condition of such lease that jurisdiction is hereby conferred upon the commission created by the act of Congress approved June 10, 1920, upon complaint of any person aggrieved or upon its own initiative, to exercise such regulation and control until such time as the State shall have provided a commission or other authority for such regulation and control: *Provided*, That the jurisdiction of the commission shall cease and determine as to each specific matter of regulation and control prescribed in this section as soon as the State shall have provided a commission or other authority for the regulation and control of that specific matter.

"Sec. 11. That when said power or any part thereof shall enter into interstate or foreign commerce the rates charged and the service rendered by any such lessee or by any subsidiary corporation, the stock of which is owned or controlled directly or indirectly by such lessee, or by any person, corporation, or association purchasing power from such lessee for sale and distribution or use in public service shall be reasonable, nondiscriminatory, and just to the customer, and all unreasonable, discriminatory, and unjust rates or services are hereby prohibited and declared to be unlawful; and whenever any of the States directly concerned has not provided a commission or other authority to enforce the requirements of this section within such State or to regulate and control the amount and character of securities to be issued by any of such parties, or such States are unable to agree, through their properly constituted authorities, on the services to be rendered, or on the rates or charges of payment therefor, or on the amount or character of securities to be issued by any of said parties, jurisdiction is hereby conferred upon the said commission, upon complaint of any person aggrieved, upon the request of any State concerned, or upon its own initiative, to enforce the provisions of this section, to regulate and control so much of the services rendered and of the rates and charges of payment therefor as constitute interstate or foreign commerce, and to regulate the issuance of securities by the parties included within this section; and securities issued by the lessee, subject to such regulations, shall be allowed only for the bona fide purpose of financing and conducting the business of such lessee.

"The administration of the provisions of this section, so far as applicable, shall be according to the procedure and practice in fixing and regulating the rates, charges, and practices of railroad companies, as provided for in the act to regulate commerce, approved February 4, 1887, as amended, and that the parties subject to such regulation shall have the same rights of hearing, defense, and review as said companies in such cases.

"In any valuation hereunder for purposes of rate making no value shall be claimed or allowed for the rights granted by this act or under any lease executed thereunder."

Mr. HARRISON. Mr. President, may I ask the Senator a question, with the permission of the Senator from Tennessee?

Mr. McKELLAR. Certainly.

Mr. HARRISON. I was not in the Senate Chamber during all of the Senator's statement. The Senator does not seek to apply the whole Federal water power act to the Muscle Shoals development, but, as I understand him, only so far as where the States fail or have no public-service commission to regulate the rates; and in that event the provisions of the water power act, in so far only as rates are concerned, shall then have application and be controlled by the Water Power Commission.

Mr. WALSH of Montana. That is practically the effect of the amendment.

Mr. GEORGE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Georgia?

Mr. McKELLAR. I yield.

Mr. GEORGE. At this time and in view of the statement of the Senator from Montana about the proposed amend-

ment which he offers, I wish formally to offer, and I send to the desk for the purpose of having printed, the amendment to which I referred on yesterday; that is to say, on page 16 of the Underwood substitute in line 8 strike out the first comma and the words following the comma, to wit, "when sold or used shall be"—

Mr. NORRIS. That is in section 10?

Mr. GEORGE. Yes; and insert "shall be sold for distribution," so that it may be considered in connection with the provisions of the water power act which the Senator from Montana seeks to make applicable.

Mr. NORRIS. If the Senator from Tennessee will permit, I would like to call the attention of the Senator from Georgia to the fact that the pending question now is the proposed amendment of the Senator from Mississippi which takes section 10 bodily out of the bill where it is now and puts it in another part of the bill, so that his amendment, if the Harrison amendment should be agreed to, would not apply at the place where it would apply now.

Mr. HARRISON. May I say to the Senator that it is section 8 that I am proposing to transpose?

Mr. NORRIS. Then, I am mistaken, I will say to the Senator from Georgia.

Mr. KING. Mr. President—

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from Tennessee yield to the Senator from Utah?

Mr. McKELLAR. I yield. I shall be glad to have the views of all Senators in regard to this matter.

Mr. KING. I do not wish the Senator to play favorites in according the right to interrogate.

Mr. McKELLAR. I will not. I will yield to any Senator, and especially to a Senator whom I love as I do the Senator from Utah.

Mr. KING. I am not a member of the committee, and I am seeking information in order to enable me to vote intelligently upon this bill.

Mr. McKELLAR. The Senator from Utah always votes intelligently. He sometimes votes mistakenly, but never unintelligently.

Mr. KING. I am always mistaken, I suppose, when I vote differently from the Senator from Tennessee?

Mr. McKELLAR. Absolutely.

Mr. KING. I leave that to the public to decide. However, that is immaterial. I should like to get the views of the Senator from Tennessee, who evidently has given a good deal of attention to this bill. Is the Senator's position, first, that this bill should be so hampered with restrictions as to prevent any company from leasing; that is to say, while we pretend to pass a law that would permit private persons to lease the right to operate this property for 50 years, does the Senator desire that they shall not obtain it, but that it shall be controlled absolutely by the Government?

Mr. McKELLAR. Mr. President, I will take pleasure in giving the Senator from Utah the benefit of what views I have about the matter. If I were going to provide in this bill for private ownership, I would simply give to the President the power, under such terms as he might deem wise, after due publication and reception of bids, to lease the property for the term of 50 years. We ought not to hamper him by saying that the water power law shall not apply to the lease; we ought not to hamper him by saying that the United States shall not regulate rates; we ought not to hamper him in any way if we are going to give him the power to lease to private persons. I doubt the wisdom of such action; but, if we are going to do it, then I think there ought to be a central responsibility. I think we ought simply to provide that for a period, say until the 1st of next July, the President is authorized to advertise for bids, to receive bids for the property, and we ought to permit him to lease it after the reception of bids without any limitations or restrictions. Does that answer the Senator's question?

Mr. KING. I think, perhaps, it does. Does not the Senator think that the bill which is known as the Underwood substitute, which is now before us, is accompanied by so many restrictions as to make it impossible for any person successfully to bid for a lease on the property?

Mr. McKELLAR. The Senator might think so, but if he will look at the RECORD of Wednesday, December 10, on pages 391 and following, he will find the bid of the Alabama Power Co. and the proposal in the Underwood substitute, so far as its private leasing provisions are concerned, in parallel columns. He will find that in essentials they track each other so well, and there is such great similarity, that I take it that it is beyond question that the Alabama Power Co. would immediately

avail itself of the privilege of leasing the property under the Underwood substitute, and to the great detriment of the country, because in its bid the Alabama Power Co. agreed to be subjected to many regulations salutary for the American people that are not included in the substitute. It agreed to be bound by the water power act; it agreed to give a greater consideration for the property; it agreed to manufacture more nitrates for the American farmer. Therefore, the President or the Secretary of War, if they lease it to the Alabama Power Co. under the Underwood substitute, will be restricted by the amendments which have been adopted. So, while the Alabama Power Co. would get it, it would get it under very much more favorable terms than that company itself offered to lease it for last January.

Mr. KING. Will the Senator permit me to make two other inquiries?

Mr. McKELLAR. Yes.

Mr. KING. Does the Senator interpret the Underwood amendment to mean that the power possibilities in this project are subordinated to the production of fertilizer?

Mr. McKELLAR. No; I do not believe that under the provisions contained in the Underwood amendment the lessee would make fertilizer there, but that probably what fertilizers are made will be made at some other place; it may be at the steam plant, which is amply capable of doing it, and that this power will be yoked up with all the other Alabama Co.'s holdings and used in that way.

The Senator must bear in mind also that the Alabama Power Co. is absolutely controlled by an English syndicate, of which Marcus Edgar and his associates have control. It is true an amendment has been accepted by which the plant shall not be leased to any alien corporation. Therefore, as shown in the Alabama Power Co.'s proposal of last January, it will not be leased to the Alabama Power Co. directly, but it will be leased to an American corporation which will be formed by the Alabama Power Co. and others. That, in my judgment, is what will become of this plant if the Underwood amendment shall be agreed to.

Mr. KING. I should like to ask the Senator another question. If no provision is made by Congress for the immediate sale of the property—and I refer to the fertilizer plant and the power—is it the opinion of the Senator that the wisest course would be to negotiate a lease, or for the Government immediately to enter upon the manufacture of fertilizer and the generation of power, or for the Government to control the matter, holding it, so to speak, in abeyance, making certain experiments with a view to determining just what the power possibilities are and the practicability of making nitrates in commercial quantities at a profit?

Mr. McKELLAR. Mr. President, as I said a while ago, I have very reluctantly come to the conclusion that the proper disposition of this matter is to pass the Norris bill with an amendment requiring experiments to be made; requiring the most careful scientific examination so as to determine the most economical methods of manufacturing nitrates; requiring, when the experiments show that it can be done, the production of the same amount of nitrates for the farmers as called for by the Underwood amendment, and leave the matter at this time entirely in the hands of the Government. I wish to give the Senator my reasons for that conclusion.

The Senator knows that, brought up in the school in which I have been brought up, naturally I look with disfavor upon Government ownership, and yet I recall the wonderful success the Government has made out of the Panama Canal, which is a great public institution, and I understand that within a reasonable period the income from its operations will be sufficient to pay off all the bonds and pay for the expenses of running it.

I recall also that the Farm Loan Board, for which we all voted at first with some misgiving and for the same reason, has made such a success of its operations that the farmers of the country are securing loans at interest rates not much more than half of what they used to pay to private concerns. I have in mind also the parcel post. I was in the House of Representatives at the time the parcel post bill was passed and voted for it, although I did so with misgivings, because it invaded the province of private business; but I recall that that has been a wonderful success and that, notwithstanding the charges of enormous losses against it, a recent report of the Postmaster General shows that the loss has been comparatively very small and can easily be provided against without serious injury to the conduct of the business. When I think of these splendid results from Government operation and when I contemplate the fact that the Government has already spent on this project some \$130,000,000 or \$140,000,000 of the people's

money, and when I see, as I think I see, although I may be mistaken, that it is about to go into the hands of a great private corporation which certainly has not been too friendly to the interests of the people in the locality in which it now operates, I think, considering all these things, that it is the part of prudence and wisdom for me to vote to keep this great water power, so necessary in time of war, so valuable to the farmers in time of peace, in the hands of the Government.

In taking this course we can not make a mistake about it, for if it should be determined later that it is better to have it turned over to private hands we still could take that action; but if we lease it now under the terms of the pending amendment to a private corporation we give them property costing \$140,000,000 under a rental which will not produce a cent of income to the Government. The reason I say that is because, in my humble judgment, the repairs and replacements which are not provided for in the bill will more than consume during the 50-year period the less than \$2,000,000 a year rental which the Government will receive from the lease. It looks to me as if we are merely transferring bodily this great property to a private concern and that it will not be to the interest of the people. At all events, I have reluctantly reached the conclusion that it is better to have Government operation of this plant at this time.

The Senator from Nebraska has agreed to accept an amendment to his bill providing for the manufacture of 40,000 tons of fixed nitrogen a year, just as is proposed in the Underwood substitute. Under those circumstances, with such an amendment incorporated in the Norris bill, I have reached the conclusion that we had better have Government operation, just as we have in the case of the Panama Canal, just as we have in the case of the Farm Loan Board, which invaded the province of banking, and just as we have in the case of the parcel post, which invaded the province of the express companies. Those are my reasons for the position which I take.

Mr. KING. Mr. President—

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Utah?

Mr. McKELLAR. I yield the floor.

Mr. KING. Without assenting to all of the propositions which the Senator has stated with reference to the Panama Canal, the parcels post, and other organizations and instrumentalities, permit me to ask one other question. Does the Senator believe that it is wise and proper for the Government to embark upon a project which concededly, as I am advised, will result in enormous losses annually if the Government undertakes the manufacture of fertilizer under the provisions of the Underwood bill, compelling us to manufacture 40,000 tons of nitrogen annually after a certain number of years, with, of course, an increased number of tons of fertilizer which would be the product of the pure nitrogen?

Mr. McKELLAR. I will say to the Senator—and I am very glad he has asked the question—that that is a matter which has given me great concern. I have said to the Senate, and I say now to the Senate, that I have reached this conclusion with great reluctance. Indeed, I was twitted here on the floor the other day for not having any fixed determination about it; and, as I say, I have reached this conclusion with great reluctance.

I will say to the Senator, however, that in the first place the power generated at this plant will be so great, especially with the steam plant there, which will produce nearly 100,000 horsepower more, that if that power is coupled up with the power generated in Dam No. 2, instead of its being a losing proposition for the Government, the Government can sell that power at very reasonable cost to the users of power in Alabama and in the adjoining States—my State, and the State of the Senator from South Carolina, and other States—and there is no reason whatever why the Government should lose a cent. Even if it should lose something in its experiments on nitrates, even if it should lose for several years on nitrates, the loss would not overcome the profit made out of the power.

The advantage of putting it in the hands of the Government, however, is this: If it is demonstrated that nitrates can not be economically manufactured in that way, the Congress at any time it desires can direct a cessation of the manufacture; but if the plant is leased what is the situation? If it is found that the thing is economically unsound, and can not be done, you know perfectly well that the Alabama Power Co., if it should get the lease, will come back and make the same statement of fact, and the Congress will not require it to do an impossible thing, and I doubt if it would be right to require it to do an impossible thing. The lessee has every chance to win, and no chance to lose; while if the Underwood amendment is adopted, and the Alabama Power Co. gets it, the Government has every chance to lose and no chance to win.

My own judgment is that it is the part of wisdom, the part of business judgment and business sagacity, not to lease the plant under those terms. If it were my own plant I certainly would not do it. I do not think there is a Senator here who, if he owned the plant, would be willing to lease it under those terms, especially if he were financially able to run it himself, just as the Government is able to run it itself. So, to my mind, the argument in favor of granting this plant to a private lessee at this time is absolutely without merit.

Mr. DIAL and Mr. SHIPSTEAD addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Tennessee yield; and if so, to whom?

Mr. McKELLAR. I will yield to both Senators; but the Senator from South Carolina has been on his feet longer than the Senator from Minnesota.

Mr. DIAL. Then, Mr. President, I understand that the Senator contends that it is better for the Government to retail the surplus power?

Mr. McKELLAR. Why, of course—to dispose of it in a way that will be to the greatest benefit of agriculture. When the Senator talks about retailing the power, I do not know. I am not familiar with the power business; I can not say; but I take it for granted that the Secretary of War, who will have charge of it, or such other instrumentality of the Government as may be given charge of it, will dispose of the power to the best interests of the American people.

Mr. WALSH of Montana. Mr. President, if the Senator will pardon me, I want to suggest that I think the usual rule is that the developing company sells to the distributing company.

Mr. McKELLAR. I think that is so.

Mr. WALSH of Montana. The developing company rarely, if ever, carries the power into the home of an individual for the purpose of lighting his house.

Mr. McKELLAR. I think that is so. For instance, if it is in the hands of the Government, if the Norris bill should pass with the amendment suggested, I should think that the city of Memphis or some company there might well buy from the Government and build its own transmission line, or have the Government build the transmission line, whichever might be agreed upon, and then have such power distributed as might be needed by the city of Memphis.

I am not an expert on the matter. The Senator from Montana is an expert, and comes from a power State. He is an expert not only on power but on almost everything else, and I have great respect for his opinion.

Mr. DIAL. Mr. President, I was just thinking that in that way it would get into the hands of the Alabama Power Co., whose hands the Senator is desirous of keeping it out of.

Mr. McKELLAR. I have said to the Senator and I have said to the Senate, time and again, that I have nothing in the world against the Alabama Power Co. It is looking to its business interests; but I do not believe that the best interests of the Alabama Power Co. are the best interests of the American people, and for that reason I am making this argument.

I now yield to the Senator from Minnesota.

Mr. SHIPSTEAD. Mr. President, I desire to ask the Senator a question because of a remark that he made.

I believe the Senator expressed some doubt as to the possibility of producing nitrates at this plant on a paying basis. Am I right about that?

Mr. McKELLAR. Mr. President, if the Senator had been here a day or two ago, when I discussed this matter with the Senator from Nebraska, he would have understood my view. Personally, I have no doubt about it. I believe that nitrates can be manufactured cheaply at this plant. I think that it will have an enormous effect upon the cost of fertilizers to the farmers of the United States. I have not any doubt about that; but the Senator from Nebraska and others who have discussed the matter have expressed considerable doubt about it. That is all I intended to convey.

Mr. SHIPSTEAD. I want to say to the Senator that I have been called out on committee work and have not been able to be in the Chamber, and therefore have not been able to hear the discussion at all times.

Mr. McKELLAR. Yes; I understand that.

Mr. SHIPSTEAD. I have read the Record, however; and in reading the remarks of the Senator from South Carolina I observed a letter from Doctor Whitney, of the Bureau of Soils, I believe, in which he makes the statement that at this plant nitrate can be manufactured for 6 cents a pound, which is about half what is charged by private concerns who manufacture and sell it.

Mr. McKELLAR. Those who handle Chilean nitrates,

Mr. SHIPSTEAD. Yes. I want also to call to the attention of the Senator another phase of this problem. I believe it is generally understood that industrial chemistry is as yet almost in its infancy, and that this is a question of a chemical plant as well as a power plant. Bearing in mind the advancement of industrial chemistry in the last 20 years, the men engaged in that field have made tremendous strides, and the chemists of the Government have rendered very valuable service to the country on very small pay, and have received very little honor from it. Some Senator advanced the idea that we should continue this as a research plant to help the development of the production of fertilizer. I am reminded of the fact that the State of Minnesota has built an enormously large building out of the taxpayers' money for the purpose of doing research work in the reduction of iron ore. We have in almost every State an experimental station to develop scientific problems along lines of agriculture; and when we look ahead for 25 or 50 years at the possible development of power and the production of fertilizer from power, that seems to me to be another reason why it should be left in the hands of the Government. Many foreign countries have found it necessary, in order to keep up the fertility of the soil, to pay a bonus to farmers for every ton of fertilizer they put upon their farms; and if Government chemists can develop a process of producing fertilizer for half of what fertilizer is sold for now, they will be rendering a great service to agriculture, and will save the Government the possibility in the future of finding it necessary to pay a bonus to every farmer who goes to the expense of putting fertilizer on his farm.

Mr. McKELLAR. I will say to the Senator that the Norris bill provides for the very kind of research he is talking about. It provides for that kind of an investigation. I will say to the Senator further that President Coolidge, in his message the other day, pointed out the large difference between soil exhaustion and soil recuperation. The difference is very large, and I believe it is growing very much larger. It is very necessary that our soils be fertilized and made more productive; otherwise, there is a limit upon the production even of this great country. The Senator is right about that. I think in 50 years, with this plant, we can save to the American people enormous sums in the way of nitrates and fertilizer; and I thank the Senator for his interruption.

Mr. BROOKHART. Mr. President—

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Iowa?

Mr. McKELLAR. Yes; I am glad to yield.

Mr. BROOKHART. Before the Senator closes I want to ask him a few questions about this matter of cost.

Mr. McKELLAR. I had no idea of taking this long; and the interruptions of Senators have made what might have been a very short statement develop into too long a statement.

Mr. BROOKHART. I think the time has been spent to good advantage, and I think much information has been brought out by the interruptions.

The Senator states that the cost of this property on which a return is to be provided for in the lease is \$45,800,000, I believe.

Mr. McKELLAR. Yes.

Mr. BROOKHART. Then there is about \$82,000,000 in addition to that that is leased?

Mr. McKELLAR. To be exact, it is \$81,815,177.51, with the addition of a substation at Muscle Shoals for connection with the Gorgas plant, which will pass under this amendment, of \$189,843.90, or a total of \$82,005,021.41.

Mr. BROOKHART. And from this entire proposition the Government will receive a return of a little over \$1,800,000?

Mr. McKELLAR. Not quite \$1,850,000, or 4 per cent on the actual cost of the Wilson Dam.

Mr. BROOKHART. Has the Senator estimated what will be the return of the lessee on the fertilizer? On the minimum of 40,000 tons his profit probably would be, in round numbers, about \$400,000, if he carried it out on an 8 per cent margin. Has the Senator any estimate of what would be the profit or the return from the sale or use of the water power?

Mr. McKELLAR. No; I have not; but the Senator's question reminds me of a statement made in the Senate some three or four years ago by the senior Senator from Utah [Mr. Smoot]. At that time Henry Ford had not made his offer for Muscle Shoals, and a number of us, led by the Senator from Alabama [Mr. Underwood], proposed to continue the appropriations for the building of this plant. That proposal was very strenuously opposed by gentlemen on the other side of the aisle; and the Senator from Utah, as I recall his words, said something like this—that instead of Muscle Shoals being an asset it was a liability, and that we had thrown away that

money, and it was ridiculous to undertake to throw more good money after this bad money; that it would not be of any use to anyone. Mr. Ford made his offer, and it was not long after that before the Senator from Utah and others who believed that way were claiming that Muscle Shoals was one of the best assets of the Government. In my judgment, if the Alabama Power Co. gets it under the Underwood amendment it will increase its holdings, its property value will be increased by many, many, many millions of dollars, and it may run into the hundreds of millions of dollars.

Mr. BROOKHART. Is it not possible to get a reasonable estimate of what would be a reasonable profit and return to the Alabama Power Co. or any other lessee that might get this under the Underwood substitute from the production of power?

Mr. McKELLAR. I do not know. I have not ascertained that. I hope the Senator will get it and put it into the Record and give it to the Senate.

Mr. BROOKHART. I think that ought to be done.

Mr. McKELLAR. I think it ought to be done myself.

Mr. BROOKHART. Has the Senator any estimate of how much of an investment the Alabama Power Co. or other lessee would have to make to handle this proposition?

Mr. McKELLAR. I think the Government has made all the necessary investment. It is true that only eight units of the Wilson Dam are being used, but there are other units that are capable of being used. No mention is made of those in the amendment of the Senator from Alabama, and the only way they could be used, I suppose, would be through an appropriation by Congress providing for the use of those other units and for turning them over to the power company at 4 per cent. I would also say to the Senator that if the views of the majority of the Committee on Agriculture and Forestry of the Senate are correct, if this property goes into the hands of the Alabama Power Co., it could sell enough personal property, nearly, to—

Mr. BROOKHART. To furnish all the capital necessary?

Mr. McKELLAR. To furnish all the capital necessary.

Mr. BROOKHART. Upon that basis, then—

Mr. McKELLAR. The Government would be furnishing it all.

Mr. BROOKHART. All this profit would be net profit. Practically all of it would be net profit, over and above expenses.

Mr. McKELLAR. Of course, I am not expert enough to know whether that is correct or not, but apparently that is so.

Mr. BROOKHART. It occurred to me, from all this situation, that we have such a lack of knowledge of what would be the return from this water power, what would be the expense of operating it, and what would be the net profit, that we would better complete the development and find out and know those things before we authorize the leasing on 4 per cent terms on a \$45,000,000 valuation.

Mr. McKELLAR. As I told the Senator before, I have made up my mind very definitely to vote against such a lease.

Mr. FLETCHER and Mr. CARAWAY addressed the Chair. The PRESIDING OFFICER. Does the Senator yield; and if so, to whom?

Mr. McKELLAR. I will first yield to the Senator from Florida, and then will yield to the Senator from Arkansas.

Mr. FLETCHER. It seems to me, from the statement made by the Senator from Tennessee in answer to the query just propounded, that there must be some little confusion in his mind. He speaks about the value of the property the lessee would obtain, and the right of the lessee to dispose of that property. The lessee would not get any fee simple title to this property.

Mr. McKELLAR. He would get it for 50 years, and of course none of the personal property could possibly exist for 50 years. If we lease perishable property for 50 years, I doubt very much whether the property would be very valuable after the termination of the lease.

Mr. FLETCHER. The whole proposition is that if the lease is made, it will merely be a leasehold interest that will pass. The title to the whole property would not pass. The title to this 4,200 acres of land, and the 450 acres of land, with the buildings and improvements on it, would not pass.

Mr. BROOKHART. What would happen to the personal property?

Mr. FLETCHER. The lessee would have a right to use it. He would not have any right to sell or otherwise dispose of it.

Mr. McKELLAR. What would you ever do with the lumber, and what would you do with the plaster of Paris and the sand, the freight cars, the window frames, and the doors?

Mr. BROOKHART. After it had been used 50 years, what would it be worth?

Mr. FLETCHER. That, of course, must all be provided for in the terms of the lease. This substitute does not go into the details as to the terms of the lease, except that it shall not extend beyond the period of 50 years. It would be a mere lease. It would not vest any title in the lessee. It would not convey any fee-simple title.

Mr. McKELLAR. A lease of property of that kind for 50 years would be something more than a mere lease.

Mr. BROOKHART. There is this definite proposition of 4 per cent on the \$45,000,000. That is fixed in the substitute sufficiently definitely to be the basis of this lease.

Mr. McKELLAR. Yes.

Mr. BROOKHART. And I say that we have no information that warrants us in saying that it shall be leased on those terms. The income from this property may be enough so that we ought to have 4 per cent on the entire valuation. I have no doubt that water power is valuable enough to sustain something of that kind.

Mr. McKELLAR. At least, we ought to advertise for bids before it is leased.

Mr. CARAWAY. Mr. President, if the Senator will yield to me, I notice he just said that we ought to advertise before we lease. I happen to have before me, because the Senator challenged me to get the record, a statement made on January 14, 1924, by the distinguished Senator from Tennessee, in which he said that he wanted Henry Ford to have it.

Mr. McKELLAR. Will the Senator read what I said?

Mr. CARAWAY. I shall be delighted. The Senator said:

Muscle Shoals, under Henry Ford's offer, will probably develop more horsepower than all the horsepower developed by all the nine companies joining in the combination bid.

The Senator was opposing other bids. I will just skip now and read further from what the Senator said:

Mr. Ford is the logical man to have this plant. I am now, as I have always been since the matter first came up, in favor of leasing it to him.

Mr. McKELLAR. I am.

Mr. CARAWAY. The funny thing about it is that there were no competitive bids then. Nobody else could bid. The bill itself said, "You will let Henry Ford have it"; and if somebody else wanted it, they could not have it. Under the Senator's state of mind then, he wanted no competitive bids. He wanted no guarantees for regulation or control, but wanted simply to turn it over in fee simple to one Henry Ford on Henry's own offer.

Mr. McKELLAR. Mr. President, I will say to the Senator that what he quotes is exactly correct—

Mr. CARAWAY. Of course it is.

Mr. McKELLAR. And I have not any different opinion now, except that Mr. Ford has withdrawn his offer. Even after he had withdrawn his offer, the Senator from Alabama [Mr. HEFLIN] and I sent him a telegram and urged him to renew his offer, because I have so much confidence in the constructive and mechanical genius of Mr. Ford that, notwithstanding his age, I prefer to take a chance on leasing it to him, believing that he would do the right thing. Mr. Ford, as the Senator knows, pays his laborers more, probably, than is paid by any other manufacturer in the country. He has done more things with his invention of what is known as the Ford car—

Mr. CARAWAY. He did not invent that.

Mr. McKELLAR. His ownership of Ford cars, and manufacture of Ford cars. I am not advised about their invention. At all events, he has made a great success of the matter, and being opposed by training and education to public ownership, I preferred at that time, and would prefer now, if Mr. Ford would remake his offer—it might be necessary to blind him down, but I would prefer that he should have it now.

Mr. CARAWAY. Then the Senator would now be willing to make the sale to Ford under the terms of the Ford offer?

Mr. McKELLAR. I can not say that. I never said that at any time. I am inclined to think this, and I have always thought that there ought to be an absolute obligation on the part of Mr. Ford or anyone else to make nitrates for the farmers.

Mr. CARAWAY. The thing I particularly had in mind was that Ford's offer was for the property to be turned over to him for 100 years, and he was to take title to all of the property, except the dam.

Mr. McKELLAR. Yes; and he was to pay a great deal more for it.

Mr. CARAWAY. He was to get absolute title to it, and it was to be for 100 years. There was not a suggestion in the offer, from beginning to end, that any control or regulation was to be in any body, the Alabama Utilities Commission or any other body.

Mr. McKELLAR. I will say to the Senator this, that so far as Ford's offer was concerned, I was honestly and sincerely for it. I believed in it. I even wanted him to renew it, so that we could let him have it. But he has withdrawn it. It is a last year's bird's nest. The Senator did not agree with me then about it, and does not agree with me now about it, and why discuss a matter that is entirely out of it except as a matter of illustration?

Mr. CARAWAY. As a matter of illustration, the Senator just announced what an iniquitous thing it would be to let it go without competitive bids; but he has been always supporting an absolute grant.

Mr. McKELLAR. I do not want to go into the discussion of it again, but, as a matter of fact, there were all kinds of competitive bids. The Alabama Power Co. had a bid in at the time. The Union Carbide Co., as I remember, had a bid in. There were several gentlemen who had bids in. Some man from my State had a bid in. They were not competitive in the sense I am now asking. I want to say to the Senator that I have not changed my mind about it at all—

Mr. CARAWAY. I do not think the Senator has.

Mr. McKELLAR. But I was opposed to the Alabama Power Co. bid when it was offered last January and argued against it, spoke against it, and I am just as much opposed to it to-day in whatever form it comes.

Mr. CARAWAY. I was a member of the committee and voted against the Alabama Power Co.'s bid and even voted for the Ford bid.

Mr. McKELLAR. I congratulate the Senator.

Mr. CARAWAY. Do not congratulate me, because certainly if I was right then the Senator is wrong now.

Mr. McKELLAR. I do not agree with the Senator.

Mr. CARAWAY. Of course—

Mr. McKELLAR. I want to say to the Senator in all frankness that I do not claim to be never wrong. I am very frequently wrong.

Mr. CARAWAY. I hope the Senator will take that back.

Mr. McKELLAR. I admit it. If the Senator just wants to prove that I am wrong, I will not deny his allegation, because I am frequently wrong.

Mr. CARAWAY. The Senator is never wrong at the time he is talking.

Mr. McKELLAR. I feel this way about it: I believe that I am right, or I would not be talking.

Mr. CARAWAY. Of course; but what I am just trying to say to the Senator—and I hope he believes I want to be courteous with him—

Mr. McKELLAR. Certainly.

Mr. CARAWAY. He is conscious that Henry Ford can bid on this plant now if he thinks this offer is a good one, if we shall pass the Underwood substitute; and whatever else we may say about him, Henry Ford has the reputation of being a good business man and knowing how to take care of Henry Ford's interests. Nobody has ever yet offered to suggest that he ought to have a guardian. He started out without anything, and I dare say he is the richest man in the world, and I have never heard anybody say he did not get his money honestly. I have been a defender of Henry Ford. I thought sometimes he had mighty poor political judgment.

Mr. McKELLAR. I know he has. I agree with the Senator entirely in that.

Mr. CARAWAY. And I was entirely unable to understand how he was so much against certain political policies, and yet had a talk and then came out immediately for the very things he had been opposing; and the other folks who had been fighting him then were for his bid. All those things filled me with some surprise and a little pain.

Mr. McKELLAR. They did me, too.

Mr. CARAWAY. I want to ask the Senator just this question—

Mr. McKELLAR. Certainly.

Mr. CARAWAY. I think we are all interested in doing the very best we can.

Mr. McKELLAR. I am sure of that.

Mr. CARAWAY. The Henry Ford offer is dead.

Mr. McKELLAR. Yes; I think it is.

Mr. CARAWAY. If he wants this plant, under this proposed substitute he can get it, if the substitute shall become a law.

Mr. McKELLAR. Mr. President, I want to say to the Senator and to others who may be interested in my personal views about the Ford offer, which is past and gone, that notwithstanding the fact that I invited him to renew it, together with the Senator from Alabama [Mr. HEFLIN], if he were to renew it, I would not be willing to have the plant conveyed to him without some provision for regulation by the National Government, and I do not think there is sufficient provision for regulation under this proposed substitute.

Mr. CARAWAY. Let me ask the Senator another question. Of course, I hardly see how the Senator could afford to ask Mr. Ford to make a bid, and at the same time say he would not accept it. I think Henry would certainly have been entitled to the supposition, at least, that if he should have renewed the bid, the Senator from Alabama and the Senator from Tennessee would have accepted it as he offered it.

Mr. McKELLAR. Not at all.

Mr. CARAWAY. Why then not have suggested, "If you make a modified bid, we will take it," not ask him to submit the very bid the Senator says he would not accept? Let me ask the Senator another question. If Henry Ford should come along and say, "I will accept this plan under the so-called Underwood substitute," would the Senator be willing to give it to him?

Mr. McKELLAR. Not unless there was a provision for regulation by the National Government during the term of the lease.

Mr. CARAWAY. The Senator, then, does not think his own State and other States can regulate power within their own borders?

Mr. McKELLAR. I think sometimes they do and sometimes they do not. I want to say to the Senator in perfect fairness and without any improper criticism of any official of my State or any other State that I have seen a great many utility commissions, both in my State and in other States, which I did not think regulated to any great extent.

Now, Mr. President, I have been for some time trying to read to the Senate what the Alabama Power Co. is doing at Sheffield and Tuscumbia and Muscle Shoals. "Sells holdings to Alabama Co." is the title of the article. It is in the Nashville Banner of December 8:

Sheffield, Ala., December 8 (by Associated Press)—

I think we can rely upon the statements made by that news agency—

It was officially announced at the offices of the Sheffield Co. here to-day that the company had disposed of its holdings to the Alabama Power Co. for a large but unnamed consideration. The Alabama Power Co. will take over its newly acquired property on December 16.

The Sheffield Co. owns and operates the interurban car line which serves the tricies—

That is, Sheffield, Tuscumbia, and Florence—

It also owns the power plant which distributes light and power and the water plant which supplies Sheffield and Tuscumbia. In addition it is the owner of more than 3,000 city lights in Sheffield and has numerous other properties. It was stated that Henry Parsons, of New York, the owner of the Sheffield Co., had not included the Sheffield National Bank, in which he owns a controlling interest, in the sale of his other properties here.

From a constituent whose name I can not give at this time—I will write to her and get permission, if necessary—I read the following:

I invested rather heavily in some property in the district—

Meaning the Muscle Shoals district—

I now have an offer from the Alabama Power Co. to resell my lots at a very small profit, and I wish you would advise me what to do. Do you think the place promises development at an early date? Of course, values are already greatly inflated, but following the line of other industrial developments my holdings should be worth hundreds of thousands of dollars.

I read these communications for the purpose of showing, as I believe they do show, that the Alabama Power Co. is so convinced that the bill is going through—because it has been published in all of the papers down there that the Underwood amendment is going to be adopted—and that it is going to get the property that it is buying up the public utilities and the various lands in and around the cities, and it seems to be its purpose to make a great industrial region there. We can not blame it for that. Alabama will be greatly benefited by it, or

at least that part of Alabama. I have nothing to offer against that situation at all; but I am calling the attention of Senators, and especially of those Senators who represent States around and about the State of Alabama, that it is possible that this company can use all of the power there locally, not transmitting under the terms of the bill any of it to any other State, and that the National Government will be furnishing this enormous power for the benefit of a single State and for the benefit virtually of a single company. I do not believe if the Alabama Power Co. gets the property that its rates will be reduced in the slightest or that the farmers will ever be benefited in the slightest by the manufacture of nitrates at that plant. For that reason I am going to vote against the amendment of the Senator from Mississippi to which this applies.

Mr. HEFLIN. Mr. President, I am surprised at some of the doctrines announced by my good friend from Tennessee. Together we fought for the Ford offer. I remember my friend was enthusiastic for the Ford offer and that he accompanied old Colonel Stallman, of Nashville, to our committee and introduced him to us. The old gentleman in his testimony stated that he was for the Ford offer without the dotting of an "i" or the crossing of a "t." He was for passing the bill adopting the Ford offer just as it stood. It disposed of all this \$80,000,000 worth of property down there for \$5,000,000, and of course all the property round about in the resident section was to go with it and he was to get all of that.

At that time the Senator from Nebraska [Mr. NORRIS] and the Senator from Iowa [Mr. BROOKHART], both bitterly opposing the Ford offer, made the same fight that the Senator from Tennessee has made here to-day. They told how horrible it would be to turn over all that property to Mr. Ford, and my friend from Tennessee sat with his face wreathed in smiles of calm magnificence when that fight was going on, and he was supporting the Ford offer. I just wonder what has come over the spirit of my good friend's dreams. He has read a letter from some woman who is interested in real estate at Muscle Shoals. I know it can not be that he wants to hold back the development of Muscle Shoals for the purpose of securing a better price for his constituent's lot down there. I know that can not be the inspiring power back of the Senator's change in this matter.

The Senator complains about the rate of 4 per cent fixed in the Underwood bill. He supported the Ford offer, which provided 4 per cent as the maximum, while the Underwood proposition fixes 4 per cent as the minimum rate. Seventeen million dollars was to be deducted under the Ford offer. That was the money spent during the war on that dam. But my friend from Tennessee did not have any compunctions of conscience on the subject along about that time. He was wholeheartedly supporting the Ford offer.

Then so devoted was he to Mr. Ford, as I was, and so anxious was he to have the Ford offer accepted and so reluctantly did he give up Mr. Ford that after the Congress reconvened the Senator from Tennessee and I sent a telegram to Mr. Ford—he wrote the telegram—begging him to reenter the field and asking him to let us consider his bid once more. Mr. Ford did not reenter the field. The only thing we could do then, those of us who really wanted to develop the project down there and get some benefit out of it for the farmers, was to support the only bill that had the Ford provision in it for making fertilizer. Not only that, but there was a provision stating that the fertilizer should be made under the Ford proposition, "if practicable" and "upon demand," and those two expressions are stricken out in the Underwood amendment and it is made obligatory upon the company. The practicability of it was removed and the demand feature has vanished, and now the lessee will have to make it. My friend from Tennessee has deserted the proposition and has gone back on the provision entirely, and is now supporting this will-o'-the-wisp arrangement that the Senator from Nebraska offered and against which my friend from Tennessee leveled so many shafts in his speeches in the past when he supported the Ford offer on the floor of the Senate.

At this point Mr. McKELLAR approached Mr. HEFLIN's seat. Mr. HEFLIN. I take it that the Senator from Tennessee wants to speak to me and I yield to him.

After a brief whispering conversation,

Mr. WADSWORTH. Senators on this side of the aisle can not hear the colloquy that is taking place.

Mr. CARAWAY. And we on this side object to an executive session.

Mr. HEFLIN. The Senator from Tennessee, who has been occupying the floor for some time, informs me that he desires to go to lunch.

Mr. McKELLAR. I merely inquired whether I would be treating the Senator from Alabama disrespectfully if I retired from the Chamber for some lunch at this time. I always like to be respectful to him.

Mr. HEFLIN. It is after the lunch hour and I am sure that the Senator needs to eat something, and I shall wait until he is here to say a few words in reply to some of the things he has said. If any other Senator wants to take the floor, he is at liberty to do so.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Mississippi [Mr. HARRISON] to the amendment of the Senator from Alabama [Mr. UNDERWOOD].

Mr. McNARY. Mr. President, I note the absence of the Senator from Nebraska [Mr. NORRIS], who desires to be present when the vote is taken. So I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ball	Fess	McCormick	Sheppard
Bayard	Fletcher	McKinley	Shipstead
Borah	Frazier	McLean	Shortridge
Brookhart	George	McNary	Simmons
Broussard	Greene	Mayfield	Smith
Bruce	Hale	Means	Smoot
Bursum	Harrell	Moses	Stanfield
Butler	Harris	Neely	Sterling
Capper	Harrison	Norbeck	Swanson
Caraway	Heflin	Norris	Trammell
Cauzons	Howell	Oddie	Underwood
Curtis	Johnson, Calif.	Overman	Wadsworth
Dial	Jones, N. Mex.	Pepper	Walsh, Mass.
Dill	Jones, Wash.	Philips	Walsh, Mont.
Edge	Kendrick	Ransdell	Warren
Ernst	Keyes	Reed, Mo.	Watson
Fernald	King	Reed, Pa.	Weller
Ferris	Ladd	Robinson	Willis

The PRESIDING OFFICER. Seventy-two Senators having answered to their names, a quorum is present.

Mr. HARRISON. Mr. President, the debate, it seems to me, on this particular amendment is exhausted, and I hope that we may now vote on it. There seems to be no opposition to the amendment to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Mississippi [Mr. HARRISON] to the amendment of the Senator from Alabama [Mr. UNDERWOOD].

Mr. HARRISON's amendment to Mr. UNDERWOOD's amendment is as follows:

On page 2 strike out lines 3 to 5, inclusive, and insert in lieu thereof "also Dams Nos. 2 and 3, located in the Tennessee River at Muscle Shoals, power plants, auxiliary steam plants, all hydroelectric and operating appurtenances."

On page 4, after line 14, transpose section 8 of the substitute.

On page 4, line 20, strike out "being" and insert in lieu thereof "shall be."

On page 4 strike out line 25, and through the period in line 6 on page 5, and insert in lieu thereof "The lessee shall pay as the annual rental for use of such properties an amount not less than 4 per cent of the total amount expended by the United States in acquisition, construction, and completion of Dams Nos. 2 and 3 and the purchase and emplacement of all machinery, gates, or other metal parts or material used in the construction of locks, dams, and power houses: *Provided*, That the rental for said dams, or either of them hereinbefore provided for, shall become operative upon their delivery to the lessee."

On page 5, line 10, strike out "said Dam No. 2 and" and insert in lieu thereof "Dams Nos. 2 and 3 and for."

On page 5, line 14, strike out "Dam No. 2" and insert in lieu thereof "as soon as practicable Dams Nos. 2 and 3."

On page 5, line 17, after "into," strike out through "lease," in line 18, and insert "and such property is turned over to the lessee in accordance with the terms of the lease, the lessee shall maintain such property."

On page 9, line 7, strike out "Dam No. 2" and insert in lieu thereof "Dams Nos. 2 and 3."

On page 9, line 8, strike out "plant" and insert in lieu thereof "plants."

On page 12, line 10, strike out all after the period through the period in line 14.

Mr. SMOOT. I ask for the yeas and nays on the amendment to the amendment.

The yeas and nays were ordered, and the roll was called.

Mr. McLEAN (after having voted in the negative). I have a general pair with the junior Senator from Virginia [Mr. GLASS]. I transfer that pair to the junior Senator from Missouri [Mr. SPENCER], and will allow my vote to stand.

Mr. SHIPSTEAD. I desire to announce that the Senator from Minnesota [Mr. JOHNSON] has been called to Minnesota on account of illness in his family, and, for that reason, is detained from the Senate.

Mr. BAYARD. I have a general pair with the junior Senator from Pennsylvania [Mr. REED]. In his absence I withhold my vote. If I were permitted to vote, I should vote "yea."

Mr. SIMMONS (after having voted in the affirmative). I have a general pair with the junior Senator from Oklahoma [Mr. HARRELD]. That Senator has not voted, and I transfer my pair with him to the junior Senator from New Jersey [Mr. EDWARDS], and will let my vote stand.

Mr. JONES of Washington. I desire to announce the following general pairs:

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY]; and
The Senator from West Virginia [Mr. ELKINS] with the Senator from Oklahoma [Mr. OWEN].

The result was announced—yeas 23, nays 39, as follows:

YEAS—23			
Broussard	George	Mayfield	Smith
Reice	Harris	Nevly	Trammell
Caraway	Harrison	Overman	Underwood
Dial	Heflin	Reed, Mo.	Walsh, Mass.
Ferris	Jones, N. Mex.	Sheppard	Walsh, Mont.
Fletcher	Kendrick	Simmons	
NAYS—39			
Bali	Fernald	McKinley	Shortridge
Borah	Fess	McLean	Snoot
Brookhart	Frazier	McNary	Stanfield
Bursum	Hale	Means	Sterling
Butler	Johnson, Calif.	Moses	Wadsworth
Capper	Jones, Wash.	Norris	Warren
Couzens	Keyes	Oddie	Watson
Curtis	King	Pepper	Weller
Dill	Ladd	Phippa	Willis
Edge	McKellar	Shipstead	
NOT VOTING—33			
Ashurst	Gerry	McCormick	Shields
Bayard	Glass	Metcalf	Spencer
Cameron	Gooding	Norbeck	Stanley
Copeland	Greene	Owen	Stephens
Cummins	Harreld	Pittman	Swanson
Dale	Howell	Ralston	Wheeler
Edwards	Johnson, Minn.	Ransdell	
Elkins	La Follette	Reed, Pa.	
Ernst	Lenroot	Robinson	

So Mr. HARRISON's amendment to Mr. UNDERWOOD's amendment was rejected.

Mr. HARRISON. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 13, line 2, it is proposed to strike out "fourth year" and to insert in lieu thereof the words "tenth year after commencement of business as authorized by the Secretary of War."

Mr. HARRISON. Mr. President, just a moment.

The Underwood proposal gives this corporation, in the event no one enters into a lease under the terms of the proposal, four years in which to prove the operation to be a success. At the expiration of four years, if it is losing money, it shall cease to operate and come back to Congress. It seems to me that it ought to have at least 10 years. I should much prefer it to have no limit at all. Certainly, four years is not fair. Ten years would be more reasonable.

Mr. UNDERWOOD. Mr. President, I will say to the Senator that at the suggestion of the War Department I have extended the time for reaching a maximum of fertilizer, and, of course, having extended that time, it would not be possible for them to produce it within the time fixed by me. All I want in that provision is that the Congress may have its hand on this matter if it is not a success, and I will ask the Senator if he would be willing to agree to eight years?

Mr. HARRISON. I would. I modify my amendment and make it 8 years instead of 10.

The PRESIDING OFFICER. The question is on the modified amendment offered by the Senator from Mississippi to the substitute of the Senator from Alabama.

Mr. McKELLAR. Mr. President, may the amendment be stated again?

The PRESIDING OFFICER. The Secretary will restate the amendment as modified.

The READING CLERK. On page 13, line 2, where it reads:

The terms for the sale of said bonds shall be approved by the Secretary of War. If at the end of any fiscal year after the fourth year the corporation shall not have earned net sums sufficient—

It is proposed to strike out the words "fourth year" and to insert in lieu thereof "eighth year after commencement of business as authorized by the Secretary of War."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Mississippi to the substitute of the Senator from Alabama.

The amendment to the amendment was agreed to.

Mr. SMITH. Mr. President, the other day I introduced an amendment and had it lie on the table. I now offer that amendment.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 3 it is proposed to strike out from line 1 down through line 2 on page 6 and to insert in lieu thereof the following:

SEC. 3. In order to supply the United States Government with nitrogen for uses by it in time of war, and in order to produce nitrogen and balanced commercial fertilizers for the national needs in time of peace, the properties enumerated in the first section of this act shall be developed and utilized to their fullest capacity. It shall be the duty of the Secretary of War and of the corporation organized under authority of section 4 to develop and utilize all such properties primarily for the production of nitrogen for war and commercial fertilizer purposes and to produce balanced fertilizers for agricultural and commercial purposes. The Secretary of War and the corporation may make such secondary uses of the properties and power as are not inconsistent with the primary purpose of this act.

On page 6, line 3—

Mr. SMITH. Mr. President, the rest of the amendments proposed here are simply rearrangements of the sections to correspond to the bill in case the provision I have proposed as an amendment is agreed to. This amendment simply strikes out the leasing features proposed in the Underwood bill and leaves the Government corporation proposed by him as it is in the bill.

I spoke at length on this subject the other day, calling attention to the fact that at the present stage of development at Muscle Shoals none of us know definitely just what may be done in furtherance of that for which this whole matter was projected, namely, the production of fertilizer in available form for the farmers themselves and nitrogen in the form in which it may be produced in the greatest quantity for use in explosives in time of war.

With the tremendous expenditures that have been made by the Government at this place for the purposes set forth in the original bill and reiterated in the Underwood bill, and set forth even in the Norris bill, I do not believe that we are warranted now in leasing this property at this stage of development, when we have every promise that a process will be developed by which the ingredients necessary for fertilizer purposes can be made more economically and cheaply than at present in a way which will be of tremendous benefit to agriculture. If the power needed to produce fixed nitrogen can be reduced, as there is every reason to believe in the near future it will be reduced, it will correspondingly increase the aggregate amount of nitrogen that can be fixed by the power at Muscle Shoals. If that can be practically indefinitely enlarged, since the process even now is bound to be cheaper than the ordinary sources of nitrogen, we ought to carry on that work until it has passed beyond all doubt as to the possibilities for the relief of agriculture and as to the possibilities of surplus power, if there should be any; and then, if we see fit to lease, we will have an intelligent basis upon which to offer this property for private use.

I do not believe there is a Senator here who believes that a private corporation would have the same interest as the Government in pioneering, in developing the processes by which the ingredients of fertilizer may be produced and brought together as I showed here the other day in the concentrated form that has been produced in the laboratory now. I do not believe that a private individual would carry on the work as the Government, devoted solely to the interests of the people, would carry it on; and the American farmers are looking to us to devise the best possible means by which this new process of furnishing them with the elements necessary to enrich the soil shall be carried out.

I am convinced that the thing for us to do is to see to it that with approximately \$150,000,000 of public funds already invested for this definite purpose, set forth in the original bill of 1916 and reiterated in the bills that have been subsequently introduced, the Government shall carry on this project until such time as we know within an approximate degree of certainty what can be done in the new processes of combining these elements for the benefit of agriculture.

My amendment simply strikes out all the provisions for leasing in the Underwood bill, and leaves the Government agency, the corporation the Senator from Alabama has provided, to go immediately to the prosecution of this work. There is a plant already there that this corporation can run;

and within a reasonable time, within a year, they can ascertain exactly the cost of producing cyanamide at nitrate plant No. 2. They can do that with the steam plant that is there now; and in the meantime, while we are finishing the dam and developing the hydroelectric power, they can be prosecuting at nitrate plant No. 1 their experimentations and if they are made practicable can apply them in nitrate plant No. 2, so that within a reasonable length of time the American people, out of their own investment, with their own officers, can ascertain what are the prospects of meeting the hopes of the American farmer.

I sincerely hope that we will eliminate any leasing features until such time as the Government, with its investment, shall demonstrate the feasibility of the thing for which the original bills were passed.

Mr. UNDERWOOD. Mr. President, I discussed this feature fully the other day when the bill first came before the Senate. The Senator from South Carolina has properly stated his amendment. It is merely to strike out of my bill all concerning a lease and bring the Government operating corporation into effect.

I prefer, and I hope the Senate prefers, to operate this plant under a lease if it is possible to find a lessee, and not have the Government in the business. If we can not get a lessee we have a plant there, and I think it is better to operate it by a Government corporation than by a bureau in Washington. Therefore I have the corporation in the bill; but because I believe that the wiser plan is to allow the President to find a lessee if he can—and he has up to the 1st of September to do so—I do not think the amendment should prevail. I hope it will be defeated, and I ask for the yeas and nays on it.

Mr. SMITH. Yes; I should like to have the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. WALSH of Montana. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Montana will state it.

Mr. WALSH of Montana. Is that amendment in order at this time?

Mr. UNDERWOOD. I think so. It is an amendment to the bill. It is not a substitute.

Mr. WALSH of Montana. It is really a substitute for half the bill, is it not?

Mr. UNDERWOOD. Well, it may be a substitute.

Mr. WALSH of Montana. And if that half of the bill should be amended as is proposed, it might make quite a difference with the vote on the measure. Really, is it not quite the same as a motion to amend that is divisible, and should not the principle of the rule apply to a case of this kind? Possibly if that moiety of the bill which is to be stricken out were amended, as has been proposed by a great number of us, some of us who at present would vote one way might be disposed to vote the other way.

Mr. UNDERWOOD. I think the real issue, which I should be very glad to have determined, is as to whether we shall make any effort to find a lessee, or whether we are determined to have Government operation. I think that might clear up the situation and allow us to reach a conclusion very much more readily.

Mr. WADSWORTH. Mr. President, I have not heard any mention made by either the Senator from South Carolina [Mr. SMITH] or the Senator from Alabama [Mr. UNDERWOOD] as to that feature of the Senator's amendment which proposes to eliminate from the amendment of the Senator from Alabama the mandate for the production of 40,000 tons of nitrogen annually after the fifth year.

Mr. SMITH. I think it would not be wise, if my amendment should prevail, as it will be noted that my amendment dedicates it to the work of producing nitrogen.

Mr. WADSWORTH. I am not criticizing that. I merely say that matter has not been called to the attention of the Senate by either the Senator from South Carolina or the Senator from Alabama. Here is my dilemma. I would like to see that mandate stricken from the substitute of the Senator from Alabama, but I do not want to see stricken from it all reference to a lease.

Mr. SMITH. As a matter of course, that will be a question for the Senate to settle after a majority of the Senate have spoken as to whether they propose to support a provision for a lease. The issue I am bringing up here is whether or not, at this stage of the development of Muscle Shoals, we should lease the property, or at least develop it until such time as

we may have an intelligent basis as to what may be done in the way of fertilizer production.

Mr. WADSWORTH. Mr. President, to accomplish that purpose it was scarcely necessary to strike out all of section 3 of the substitute of the Senator from Alabama. The Senator would strike that out, as well as all of section 4, all of section 5, and all of section 6. It may be necessary to strike those out, but the Senator's amendment has two distinct purposes in view, and they are not related one to the other. One purpose is to strike out the mandate for the 40,000 tons.

Mr. SMITH. Yes.

Mr. WADSWORTH. The second purpose is to strike out all reference to leasing. I am in favor of one and against the other. How shall I vote on this amendment?

Mr. SMITH. There is no escaping that dilemma. The Senator will have to use his own discretion, because the 40,000 tons would be indicated, if my amendment should pass, because then it would be devoted to the production of fertilizer, whereas under the leasing proposition the lessee shall produce 40,000 tons.

Mr. WADSWORTH. Or the Government shall produce, under the amendment of the Senator from Alabama.

Mr. SMITH. The Government shall produce all that it can, under my amendment.

Mr. WADSWORTH. Yes; but under the amendment of the Senator from Alabama, either the Government, or the lessee, if there be such, would be compelled to produce 40,000 tons. I ask, as a parliamentary inquiry, if it is possible to have this question divided? There are two entirely different propositions here.

Mr. SMITH. Let me ask the Senator this question: Does the Senator want to vote for the provision requiring the production of 40,000 tons?

Mr. WADSWORTH. I want to vote to eliminate that from the substitute of the Senator from Alabama.

Mr. SMITH. This proposition of mine does both; but the Senator does not want to eliminate the leasing feature?

Mr. WADSWORTH. I do not.

Mr. UNDERWOOD. Mr. President, of course I am very earnestly opposed to this amendment, but I am glad to have a vote on it now, because this issue lies in the Senate, whether we shall have a mandate for national defense for the production of 40,000 tons of nitrogen, and fertilizer carrying 40,000 tons of nitrogen in time of peace, as to whether we shall allow a Government corporation in the initial stages to operate the plant, or try to have a lessee do it. Of course, if the Senator's amendment should prevail, we will have a Government corporation, with five directors appointed by the President, and those five directors will have the power to make nitrogen for national defense, and fertilizer for the farmers, if they desire to; but if the President should appoint five directors who do not desire to make it, they would not have to turn a wheel to make nitrogen and fertilizer. Then, of course, the lease proposition would be entirely gone.

I think that in order to avoid further delay we might as well get a full expression of the Senate. Of course, so far as the farmers of America are concerned, I think if you do not put a distinct mandate in this bill that a certain amount of nitrogen shall be manufactured and then converted into fertilizer, the farmer's interest in this matter will be gone. He might as well be counted out of the bill.

Mr. REED of Missouri. Mr. President, if the Senator will pardon me, the Senator's opinion is, then, that as an economic proposition the manufacture of nitrogen is not a success?

Mr. UNDERWOOD. Oh, no. The Senator from South Carolina himself produced a letter here from Doctor Whitney, the Chief of the Bureau of Soils of the Department of Agriculture, saying that this was the place where nitrogen could be produced for fertilizer cheaper than at any other place.

Mr. REED of Missouri. I understood the Senator to say that unless there was a mandate in the law for the manufacture of nitrogen it would never be manufactured.

Mr. UNDERWOOD. I mean that there would be no assurance.

Mr. REED of Missouri. Of course, if money could be made by making nitrogen—

Mr. UNDERWOOD. This is a Government corporation. It would not be the question of a man making money for himself; it would be a question of following a mandate of somebody.

Mr. SMITH. Under this proposed amendment they would be required to use the full capacity of the plant for the production of nitrogen.

Mr. UNDERWOOD. Undoubtedly. There is no question about that. I have intended that there should be a mandate

in the interest of national defense and for the production of fertilizer. That is the question. If the Senate wants to make the experiment, we might as well find it out, and if they do not, if they are not going to carry out the purpose of the national defense act, they might as well fix it right now. I think that is the issue, and I am perfectly willing to meet it now and have it settled.

Mr. REED of Missouri. I understand that what both the Senator from Alabama and the Senator from South Carolina want is an absolute mandate to make 40,000 tons—

Mr. UNDERWOOD. Not the Senator from South Carolina. He would strike that mandate out of my bill.

Mr. SMITH. If the Senator will read my amendment, he will see that I substitute for that a provision that all the facilities there shall be used to their fullest capacity in producing what the Underwood leasing proposition and mandate command them to produce—namely, 40,000 tons. The Senator from Alabama knows that there is a plant there now, the capacity of which, under steam power, is 40,000 tons of nitrogen. I command them to run that to its fullest capacity, and also to apply any additional power that is needed to produce it.

Mr. UNDERWOOD. Will the Senator read the section in his amendment that gives any such mandate?

Mr. REED of Missouri. Before he reads that let me say this, that plant must be run at capacity to make nitrogen, regardless of what the nitrogen will cost produced by that method.

Mr. SMITH. We are informed—

Mr. REED of Missouri. Never mind about the information; the terms of the bill are, as I understand it, that this plant must be operated to make nitrogen, and that regardless of the amount of loss which may be sustained in the manufacture of nitrogen.

Mr. SMITH. The Underwood substitute, the balance of which I accept, provides that after four years, if there is a lease, if it is found that it is impracticable, they shall cease operations. He has just increased the time limit to eight years by an amendment.

Mr. REED of Missouri. In other words, for eight years, if we accept the proposition as it is now stated, we are to run this plant willy nilly, make money or lose money. Even if it is found to be an utter failure it must go on, and then the losses must be met, of course, by appropriations. I just want to understand the proposal.

Mr. UNDERWOOD. I will say to the Senator, because I am sure he was not here when I made my original speech on the bill, that I stated just what the Senator has said; but I stated that this plant should be run as a matter of national defense; that we had no nitrogen available for defense in war except that we could bring from Chile, and if the line of communication between our country and Chile were cut we would have no nitrogen for defense; that I felt that this plant should be run and should be kept in a stand-by condition in that way, as we keep a battleship. It will cost no more money to do it than to maintain a battleship in fighting condition. It will cost just as much money to maintain the *West Virginia* ready to go to sea at any hour as this will cost. As I said, what is the use of the guns on the *West Virginia* if you have no powder?

Mr. REED of Missouri. I am not taking a different position—

Mr. UNDERWOOD. I only say that to explain why I say this plant should be run, even if it loses money.

Mr. REED of Missouri. The difference is this: That we know the *West Virginia* will go, and we know she can fight; and, therefore, when we are putting money into the maintenance of that vessel, we know we have something to show for it.

Mr. UNDERWOOD. We know this plant will produce powder.

Mr. REED of Missouri. When we start to operate it—this plant—when it comes to the matter of making nitrogen, is it not possible that in a year's time we will have found out that the whole scheme is utterly bad and that we must adopt some other method? Yet we are asked to bind ourselves to an eight-year period of experimentation.

Mr. UNDERWOOD. Let me put the proposition to the Senator. If we lease the plant under the leasing feature which the Senator from South Carolina desires to have stricken out, the lessee will assume the burden of making a profit. If he fails to make the profit, that will not be our loss, it will be his loss, and we will have the powder and the fertilizer. We stand to lose only if the Government corporation operates it; and therefore the leasing feature does not carry any question of Government loss. It may be that we will get no lessee,

but if we get no lessee then we are just where the Senator from South Carolina seeks to put us by his amendment.

Mr. REED of Missouri. I am not discussing a particular amendment; I want to get the situation clear.

Mr. UNDERWOOD. That is the situation. Of course, if it is leased, we will have our national defense and our fertilizer without cost. If it falls in the lap of the Government corporation, of course, although this says eight years, Congress can repeal the law at any time and stop it. It is entirely in the hands of Congress to do that.

Mr. NORRIS. Mr. President, I want to get an understanding from the Senator from South Carolina about the effect of his amendment. I also want to say just a word or two along the lines of the explanation the Senator from Alabama has made to the Senator from Missouri. I would like to have the attention of the Senator from Missouri for just a moment.

As the Underwood substitute now stands, it has two ways of operating, one by lease, one by a governmental corporation; but it is provided that in either case this nitrate plant must be operated or that 40,000 tons of nitrate, which is the capacity of that nitrate plant, must be made each year regardless of what it costs. Forty thousand tons, then, just as soon as it is made, is converted into fertilizer, unless it was in time of war, when they would be using it for the making of explosives. So the lessee, or, if it is not leased, the governmental corporation which the bill sets up, must make that much after the few years' time of experimentation.

The theory that that must be done and that we must keep it in condition does not appeal to me at all. The Senator says we must make that much in order to keep this plant in a stand-by condition. As a matter of fact, what we ought to do, it seems to me, is to keep it in a stand-by condition. Whatever expense that entails, of course it is necessary. It is just like any other building and machinery—we must see that the roof does not leak, and all such things as that. But when you started to operate we would not keep it in a stand-by condition. In fact, operating it would wear it out, and it is conceded that the machinery would wear out many times before the 50-year period had ended.

So I can not see where that argument applies. We keep it in a stand-by condition, ready for emergencies of war, without making 40,000 tons of nitrogen for a year, and we do not keep this nitrogen for war purposes when we make it under that bill. Neither the lessee nor the governmental corporation could convert it into fertilizer. That is compulsory regardless of what it cost. To me that is an economic mistake. It will not do anybody any good. Now the Senator from South Carolina has offered an amendment that strikes out the leasing part of it. Does it leave the rest?

Mr. SMITH. No. It strikes out the provision for making 40,000 tons. It simply leaves the Government in charge to develop the proposition.

Mr. NORRIS. Does it compel the Government to make 40,000 tons?

Mr. SMITH. No; it does not compel the Government to do anything except that they shall go ahead and at full capacity.

Mr. NORRIS. If it is full capacity at which they must operate, it must compel the manufacture of 40,000 tons, because that is its capacity.

Mr. SMITH. Suppose after the operation of a year or after they have gone through with the processes there available, after the completion of the dam which is now in process of completion and the installation of the hydroelectric power and the use of the machinery that is on hand for the production of nitrogen, it is demonstrated that they have arrived at the limit of their improvement and find it is not feasible and is not practicable. Then the farmers of the country as well as the Senate will know definitely what can be done and what can not be done along this moot line. Then they can, if they desire, lease it as a pure power project or if they want to use it for the production of fertilizer they can go ahead on that basis.

Mr. NORRIS. In other words, they would continue under the Senator's amendment to operate it at full capacity until Congress otherwise determined.

Mr. SMITH. Or until they determined the feasibility of it. Mr. NORRIS. Does the Senator's amendment permit them to stop?

Mr. SMITH. No.

Mr. NORRIS. We order them to go ahead at full capacity.

Mr. SMITH. Yes.

Mr. NORRIS. And we do not tell them when to stop.

Mr. SMITH. Oh, we have the full power to tell them when to stop.

Mr. NORRIS. I understand. They would go out and operate at full capacity until Congress might see fit to relieve them from further responsibility.

Mr. SMITH. Certainly.

Mr. REED of Missouri. May I ask what business man would propose in an experiment to start a plant at its full capacity and run it for two years when he does not know whether it will be a complete success or not? What business man is there who would not start in slowly and carefully and experiment as he went along until he had found the condition where he could make at least his expenses? Yet here is a command for full speed ahead regardless of reefs or rocks or dangers.

Mr. SMITH. Oh, no.

Mr. REED of Missouri. That is the way it is stated. I do not know whether it was stated correctly.

Mr. NORRIS. Suppose we went ahead there under the Senator's amendment or by the Underwood amendment—

Mr. UNDERWOOD. We do not reach full capacity until the end of six years under my amendment.

Mr. NORRIS. Yes; but we would go up to full speed then. I know some Senators do not agree with me—I think a few of them disagree with me—but I am so well satisfied now that I am not in favor of spending any money to operate a plant when I feel, and I think I know, in advance that it is going to be a financial loss and can not be done. I do not want to tackle an impossibility. I do not want to ask the lessee to tackle an impossibility. I do not want the Government corporation to tackle an impossibility.

To my mind, in the two years of study that the Committee on Agriculture and Forestry has given to the question one thing has been demonstrated fairly, although there are those who do not agree with me, and that is that with nitrate plant No. 2 fertilizer can not be produced at all. We had dozens and dozens of expert chemists before us. Never one of them demonstrated, in my opinion, that it could be done. Practically all of them said that without some improvement it could not be done. Most of them thought we would get improvements that would eventually bring about a condition so it could be done, but that we had not reached it yet.

At the beginning the committee selected and asked me to request the War Department to detail Major Burns to attend our meetings. Major Burns is not a chemist. He is in the Ordnance Department. He has been connected with the nitrate plant from the very beginning. He knows as much about the details of it and the questions involved as any man living. He has during all that time been studying the question. It is true, as I said, that he is not a chemist, but putting together the work of the chemists, analyzing what they said, not only in this country but all over the world, Major Burns became an expert on the question of fertilizer and the production of explosives. The committee adopted a unanimous vote of thanks to him at the first long hearings we had, and when we took up the matter again he was again requested to attend, and was with us all the time. He was with us when we went to Muscle Shoals. He knew every detail of ever corner, everything there was in any of the factories there, what it cost, and how to make this and that, and everything else.

Major Burns is no more emphatic than are a good many chemists. I do not know of a single chemist who had laid before us a definite plan by which he even claims that he can produce commercial fertilizer with the use of the nitrate plant down there at Muscle Shoals and sell it below the market price, but that it will have to be done at a loss. He testified before the committee on both occasions and summed up the testimony of other people who were more or less technical and gave us the English of it. Knowing the confidence the committee had in Major Burns, after some debate had gone on here in the Senate I asked him if he would not submit in writing, just as briefly as he could, his idea of this question. I have it in my hand, signed by him, written this morning, and I want to read it. It is addressed to me, dated Washington, December 12, 1924, and reads as follows:

In compliance with your request for my opinion as to the cost of producing fertilizer at United States nitrate plant No. 2, I am pleased to submit the following:

The problem has so many ramifications that it is difficult to make a simple answer which is accurate as to all details. However, it is my general conviction that, under the conditions which would probably prevail during the next several years, the No. 2 plant could not be operated at a profit in competition with the present market prices of nitrogen fertilizer materials even though the power cost nothing.

The fertilizer material "cyanamide" could be manufactured at a profit by the American Cyanamid Co., but this is protected by patents to which the Government has no rights. The market for this par-

ticular material is also very limited, and could absorb only a small part of the capacity of the plant.

The most likely product, under present knowledge, is ammonium sulphate, but it is not believed that this material could be manufactured at a profit.

Urea has been suggested as a product, but this material is in a research and development stage only."

I will pause there to say that the Carbide Co., one of the bidders for Muscle Shoals, who had experts and witnesses before us without limit, was relying on the product urea and made a very plausible showing, relating to something, however, that had never been actually tested out in the fertilizer world.

Continuing the reading:

Ammonium nitrate is a fertilizer material and is the product which the plant is constructed to manufacture. But the cost is high and the material is not considered fully satisfactory to the fertilizer market.

Ammonium phosphate has also been suggested, and this to my mind is the logical objective, because it combines two of the three essential plant foods into one highly concentrated material, and would thus assist in producing concentrated fertilizers. But this requires phosphoric acid of sufficient quantity and cheapness to make the combination economical. While it is possible to produce any desired quantity of phosphoric acid, it is not believed that the method of producing it is as yet sufficiently developed to warrant the assumption that it can be produced at Muscle Shoals and then converted into ammonium phosphate in competition with the present fertilizer market. Cheap phosphoric acid is to-day the crux of the solution of concentrated fertilizers.

In conclusion, it is my belief that the hope of materially cheapening the price of fertilizers lies in comprehensive research and development work thereon, and that no early results of great benefit are to be expected.

Very truly yours,

J. H. BURNS,
Major, Ordnance Department.

What Major Burns said about concentrated fertilizer is one of the avenues that many scientific men are working on. That means that if we get a concentrated fertilizer we eliminate the filler, we eliminate the mixing, we eliminate freight, we eliminate 80 per cent or more of the weight; it depends, of course, on the grade of fertilizer, but in a 2-8-2 fertilizer we eliminate more than 80 per cent of the freight, the bags, all the mixing, and so forth. That is the kind of fertilizer that the Senator from South Carolina is advocating and that he has faith in. It has never yet been demonstrated that we can do it and put it on the soil without a mixer without danger of injuring the plant, because in the concentrated form it will, perhaps, kill the plant.

Mr. SMITH. Oh, let me correct the Senator there. There is not a practical farmer who will say that it can not be put on in the concentrated form.

Mr. NORRIS. Yes; it can be done.

Mr. SMITH. And done without injury to the plant, because every man here knows that we can take nitrate of soda, which is a concentrated essence of nitrogen outside of the sodium in it, and put it directly on as a top dressing on all small grain and right at the roots of corn. The only thing necessary is to keep it from doing like we do even a fertilizer that has the filler in it—keep it from coming in contact with the roots of the plant.

Mr. NORRIS. Yes; and that is the difficulty.

Mr. SMITH. No fertilizer that is put near the roots of the plant can come in contact with the roots unless it goes through or is mixed with the soil in which the plant is growing. A concentrated form of fertilizer is the one that the farmers and the scientists of the country have been laboring to get in order to remove the necessary expense of the 80 per cent of dirt or silt.

Mr. NORRIS. That is what I have been trying to say. If we can get concentrated fertilizer, we have improved the situation more than any other one thing that is in sight. We have then eliminated the mixing, we have eliminated 80 per cent of the waste, we have eliminated the hauling and one-third of all the freight. We would eliminate a great portion of the labor that the farmer has in hauling it to his farm and putting it on the land. That is conceded. Most people believe, and I am one of them, that we are going to solve that question, and that eventually we are going to get rid of all that trouble. But that is all outside of nitrate plant No. 2. Operation or nonoperation of nitrate plant No. 2 does not have anything to do with the question. As Major Burns said, if we charge nothing for the power at nitrate plant No. 2, we will not be able to

cheapen fertilizer unless we develop some improvement somewhere else.

The thing I have against both of these amendments—the amendment of the Senator from Alabama [Mr. UNDERWOOD] and the proposition of the Senator from South Carolina [Mr. SMITH]—is that they require the Government and the lessee to go ahead and do something that I think is known by the scientific world in advance will be a failure, and it is going to cost millions of dollars to do it. The amendment of the Senator from South Carolina requires that the plant be operated to its full capacity; and I do not see very much difference in the two propositions.

Mr. SHIPSTEAD. According to the information which the Senator has, how much does it cost now to produce a ton of cyanamide at Muscle Shoals?

Mr. NORRIS. I can not give the Senator that information offhand. I will say that cyanamide is something which is used only in small quantities in fertilizers. Cyanamide is different from nitrogen; as I understand, it is a nitrogen carrier, and only a small quantity of it is necessary in fertilizer. In order to make the nitrogen at the plant the Government must pay to the American Cyanamid Co. a royalty, because that company has the patent for the making of cyanamide, which is a patented process. The Government has to pay \$30 a ton royalty on every ton of nitrogen which is made at nitrate plant No. 2. The question arises whether the Government can assign that right to the lessee. The Government has the right under its contract with the American Cyanamid Co. if it sells the plant to transfer its right, so that the purchaser would pay only \$30 a ton royalty; but I do not know what the company would charge if the Government had not such an agreement, or whether the company could be required, as a matter of law, to assign the agreement to a lessee.

Mr. SMITH. Mr. President, if the Senator will permit me, let me explain to the Senate how the statement in reference to the payment of \$30 a ton royalty for nitrogen may be misleading. Thirty dollars a ton royalty for the nitrogen contents of the cyanamide means 2,000 pounds of pure nitrogen.

Mr. NORRIS. Oh, yes. It is not \$30 a ton on the fertilizer. I did not want to convey that idea.

Mr. SMOOT. Nor did the Senator do so.

Mr. NORRIS. No; I do not think I did.

I can tell the Senator about what it would amount to on the fertilizer. It would depend on the amount of nitrogen in a ton of fertilizer; it would depend on the grade of fertilizer. The lowest grade that is used is 2-8-2. The Senator from Georgia [Mr. GEORGE] called my attention to the fact the other day that that is the lowest grade of fertilizer, and many farmers want a better grade. On a ton of the mixed finished 2-8-2 fertilizer the royalty which would be paid on the ton would amount to about 60 cents. If the grade of fertilizer were 3-8-3, which is a better grade of fertilizer, the royalty would be between 90 cents and \$1 on a ton of finished mixed fertilizer of that grade. If we should make fertilizer, such as the Senator from Alabama [Mr. UNDERWOOD] wishes to be made at the plant at Muscle Shoals, the American Cyanamid Co. as their royalty under their contract, if the grade of fertilizer were 3-8-3, would get considerably over \$1,000,000 a year for their royalty. Of course, they would be glad to have the plant started up, whether we lease the property or not, because that is the sum they would have to be paid. If we leased the plant under the Underwood amendment, there is no assurance that the lessee would not have to pay more probably, and a lawsuit would be required to settle it. It would not be any less; but under the Government contract with the American Cyanamid Co., while the Government has the right under that contract, as I understand, if it sells the property to sell that right with it, there is not anything said about leasing it to anybody; and whether the terms of the contract would cover a lease would be a question to be determined by the courts.

If the courts should hold that we could not transfer the right to a lessee, then the Cyanamid Co. would fix its own terms with our lessee. They could absolutely refuse to let them use the process at all if they chose to do so. Of course, they would not do that, for they would be glad to have them use it, but they could ask a larger royalty, and there is not any hope of getting a lower royalty. That means, depending on the grade of fertilizers that are made, for 40,000 tons of nitrogen the payment of between \$1,000,000 and \$2,000,000 every year in royalty to the American Cyanamid Co. That will all come out of the farmer who buys the fertilizer.

Mr. SMITH. Mr. President, the Senator from Nebraska read the opinion of Major Burns. I notice that, like all men

more or less who are scientists where they have been experimenting and do not know their ground with certainty, Mr. Burns is careful not to state any positive fact; but when they have passed the experimental stage and know to a certainty, they generally speak authoritatively.

We have in the Agricultural Department a bureau, known as the Bureau of Soils, which is charged with the duty of ascertaining what the different soils of this country need and what are the sources of fertilization to supply the needs of the soils. At the head of that bureau is Doctor Whitney. He conducts the investigation of the soils of the several States of the Union; he is charged with the duty of ascertaining whether they are deficient in potash, as all lands are that have not an excess of clay, or are deficient in phosphoric acid, as all sandy lands are, or are deficient in nitrogen, as are the worn-out fields where vegetable matter and humus are not put back on them, and is charged also with the duty of ascertaining in what sections of the country those deficiencies are and of suggesting to the farmer from time to time the available sources at the lowest price of any one of the three ingredients which constitute a balanced fertilizer and which are essential to restore fertility of the soil.

In a letter from Doctor Whitney, which I read into the Record, he states that the nitrogenous contents of cyanamide can be made available for the farmers of this country at one-half the price of the other sources of nitrogen. We have very limited sources of nitrogen in this country. Hence it is the costliest article in all fertilization.

If Senators will look at the map on the wall, they will find that South Carolina uses more fertilizer than any other State in the Union and perhaps produces more cotton and corn to the acre where the fertilizer is concentrated than any other State in the Union where artificial fertilization is employed. So, certainly, we ought to know something about the effect of fertilizer and the burden of using it. The limit of our soil can never be tested until we get to the point where the farmer is justified in putting the fertilizer on his soil until the maximum capacity of the soil is reached without being destroyed by the law of diminishing returns by virtue of the excess cost of the fertilizer used. The object that you and I have here for those who feed and clothe our Nation is to see to it that the natural factory, the farm, where the food of the Nation is produced, shall be made as fertile as possible.

The chemistry division of the Bureau of Soils have themselves developed a process for the production of phosphoric acid, to which Major Burns refers, and which he erroneously says is the crux of the matter. I can buy phosphoric acid for one-third of what I pay for the nitrogenous content of a mechanically mixed and balanced fertilizer. By consulting the fertilizer quotations, it will be found that 16 per cent acid sells for from \$11 to \$12 a ton and gets down as low as \$6 or \$7, while 16 per cent nitrogen, which is the nitrate of soda, sells for \$55 and \$60 a ton. Even the potash brought from Germany in the form of kainit, the lowest form of the potash, will sell for from \$9 to \$10 a ton. So the main element of cost is the nitrogenous ingredient, and the plant which we have already there will produce it at half the cost of any other known source.

In my amendment I say that the plant shall be run at its fullest capacity. Now, let us take conditions as they exist there at this time—

Mr. NORRIS. Mr. President, if the Senator will allow me to interrupt him, I think I can disabuse his mind of an impression for which perhaps I am to blame. I have said I do not like the Senator's amendment because it requires the operation of the plant to full capacity without knowing whether it could be so operated without a loss or not. If the Senator is right—and of course I concede that he is just as conscientious in his belief as I am—he would not run any risk if he put in his amendment a provision to the effect that the plant shall be operated to its full capacity provided it may be done and the fertilizer may be sold at a less price than commercial fertilizer is sold for to-day.

Mr. SMITH. I would be willing to accept such an amendment if—

Mr. NORRIS. Let me finish. That is the only weakness that there is in the Senator's amendment. I am going to vote for the Senator's amendment, although, as I have said, I do not like it. I do not believe that what the Senator desires can be done, but if he is satisfied that it can be done, then he runs no risk by putting in the provision to which I have referred. The Senator from South Carolina strikes out of the substitute of the Senator from Alabama a provision that I think can not be defended by any business man under any conditions, namely, the leasing provision, because, assuming

that I am right—and I think the Senator from Alabama believes I am right, because he has said and the Senator from Mississippi also has said that it was necessary to be liberal on the water power end in order that the losses might be made up on the fertilizer end—when we lease the plant we are going to lease it for 50 years. Suppose a man should bid for it and secure the lease on a business basis such as the Senator or I would insist upon, that lessee will proceed on the theory that he is going to operate the fertilizer part of the business at a loss and is going to make up that loss out of the profits on the water power, and he will make enough out of the water power so that out of the whole transaction he will make money out of the lease. Assuming that he does that and then, say, within 2 years, or 5 years, or 10 years, or 25 years, or 30 years, in fact, at any time within the lease period, there shall be discovered a new method—and practically every scientific man who appeared before the committee believes such a thing will happen; we all believe it—under which it will be possible to cheapen production so that fertilizer may be made at half its present cost in its completed form or that a practicable, concentrated fertilizer may be made that requires no mixture, who would get the benefit?

We would have leased the plant for 50 years; the lessee makes out of the power, though he loses money on the production of the fertilizer; but there is developed a new method by which he can make the fertilizer at a profit. Will the farmer get the benefit? Will the Government get it? No; for we have leased it for 50 years.

Mr. SMITH. But suppose the Government has the plant?

Mr. NORRIS. Exactly. That is where the amendment of the Senator from South Carolina has the advantage of the Underwood substitute, I think; and, even though it contains that objectionable feature, yet it seems to me we ought to adopt it. Suppose that we now had a surplus of fertilizer, as we have of wheat, and we had to ship it abroad and could not consume it all. In that event, whenever this additional fertilizer were put on the market it would reduce the price. We would not be in our present difficulty if we had a surplus, but we have a deficit. We do not use on American farms to-day more than half of the fertilizer we ought to use. We ought to double the amount of fertilizer used. So, if we increase the amount of fertilizer having nitrogen content by 40,000 tons, we have not added a drop in the bucket; we have not passed from a deficit to a surplus, and the result would be that the additional fertilizer which the lessee would make he would sell on the market at the market price, and the farmer would pay the same old price for it.

Mr. WADSWORTH. Mr. President—

The PRESIDING OFFICER. Does the Senator from South Carolina yield further; and if so, to whom?

Mr. SMITH. I want the Senator from Nebraska to finish; I am enjoying his speech, and it seems to be along the line of my amendment.

Mr. NORRIS. I have pointed out the weakness of the Senator's amendment, but I think it improves the Underwood substitute.

Mr. WADSWORTH. Mr. President, I ask the Senator if he will yield to me in order that I may ask a question of the Senator from Nebraska.

Mr. SMITH. I yield.

Mr. WADSWORTH. The Senator from Nebraska just a moment ago pointed out what he regarded as a very great danger, if I may use that expression, in that through some tremendous improvement in the process of extracting nitrogen from the air this nitrogen shall become very much cheaper, and that in that event the lessee will pocket the immense profit and the farmer will gain nothing by the improved process. My question is—or perhaps I can make it in the form of an observation—is it conceivable that the Secretary of War will make a lease making possible such an outcome?

Mr. SMITH. Mr. President, I want to finish what I have to say and hope we will get a vote on this amendment.

When I was interrupted by the Senator from Nebraska I was going to observe that this is a very important question to those of us who are burdened with the compelling necessity to use fertilizer or quit farming. The peculiarity of the South Atlantic soil is such that unless you rotate the crops with legumes or apply artificial fertilizer in order to keep up the fertility you do not make any crop. The old process of getting phosphoric acid was to treat the phosphate rock, and I want the Senate to understand that the amount of phosphate rock available is almost as unlimited as the nitrogen in the air, but the low-grade phosphate rock has such a large percentage of iron and lime that when you treat it with sulphuric acid

to get the phosphoric reaction from it the iron and lime neutralize your treatment and you get no phosphoric acid. Therefore, they had to abandon the fields in South Carolina, they had to abandon some of the fields in Florida, and the only rock that is available is the high-grade rock, and yet it is so abundant that it is one of the cheapest elements in a balanced fertilizer.

The Bureau of Soils of the Government, working on that problem, discovered that by a comparatively cheap process—perhaps cheaper than the sulphuric-acid process—by using fuel in a furnace they could heat the phosphate rock, and, by putting in common, ordinary sand, produce silicic acid, the acid from the silicon that would produce phosphoric acid without regard to the lime or the iron contents of the low-grade rock. So that by that process alone they revolutionized the process of obtaining phosphoric acid; and one of their own employees left the department and went with the fertilizer companies to install this new method of getting this ingredient of fertilizer.

With our men paid salaries, with \$150,000,000 already invested in Muscle Shoals, dedicated to the study of this problem that vexes all the agriculturists in the fertilizer-using States—and it will mean all the States in the course of time—I maintain that it is the duty of the Government to hold that property until the processes are developed either for or against the practicability of giving the farmer an adequate supply of this ingredient, so absolutely essential to sustain the prosperity of this country.

We all know that the amount of nitrogen in the air is unlimited. We know that there has been developed a process of extracting it. It has made further advances in its short life than even the application of transportation in the airplane; but the principle has been indicated, and scientists are going to develop it. We must not forget that the submarine was rejected here and developed in Germany. We must not forget that from the initial point of Mr. Franklin's discovery the application of electricity, the marvelous work that electricity is doing, has been developed. This problem of the fertilization of our soil is of more moment to us than all the other discoveries of science, and we, as the representatives of the people, ought to see to it that we shall guard this attempt to benefit the American farmer as we guard nothing else, and shall develop at Muscle Shoals the process by which the balanced fertilizer, of which I showed you a sample the other day, can be produced and turned over to the American farmer at a reasonable price. Then, if we want to lease it, we will have passed the pioneer stage, and we will have a basis upon which to calculate its value to those to whom we dedicate it.

Mr. HEFLIN. Mr. President, I want to say a word in reply to the letter from Major Burns which has been read by the Senator from Nebraska [Mr. NORRIS].

This is indeed a doleful note that Major Burns has sounded forth for use in this debate. When the Congress has had under consideration for months the proposition of manufacturing nitrates at Muscle Shoals, and we are now about to enact into law some measure for that purpose, a Government expert, so-called—an officer paid by the Government of the United States—gives to the Senator from Nebraska his opinion that fertilizers can not be made at a profit at Muscle Shoals. He even goes so far as to say that he does not think it could be done even if the power cost nothing.

Mr. President, if my recollection serves me right, the various companies—all of them that have made bids for Muscle Shoals—have now reached the conclusion and have stated to the committee that they thought they could make fertilizer at Muscle Shoals at half the price for which it is selling to-day. I think Mr. Hooker—one of the ablest of all the men who have appeared before the committee, a New York gentleman—testified to that effect.

Mr. WADSWORTH. Mr. President—

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from New York?

Mr. HEFLIN. I yield to the Senator.

Mr. WADSWORTH. It should be remembered that Mr. Hooker said it could be made for half the present price, but by an entirely different process from the one now installed at Plant No. 2.

Mr. HEFLIN. I do not remember that he said anything about the process.

Mr. WADSWORTH. That is the all-important part of it.

Mr. HEFLIN. But, Mr. President, various witnesses have testified that at Muscle Shoals fertilizer could be made for about half the price for which it sells to-day.

The Senator from Nebraska has crossed himself up in this debate considerably because in the hearings before our com-

mittee here is what he said in reply to Mr. Waldo, who was testifying before the committee. Mr. Waldo said:

We do not claim that he [Mr. Ford] guarantees to cut the price of fertilizer in half. We say it is a reasonable expectation.

Then here is what the Senator from Nebraska [Mr. NORRIS] said:

It is a reasonable expectation no matter who gets it. I think it is fair to assume that we are going to cut the price of fertilizer in two in some way.

At that time the Senator from Nebraska was of the opinion that it could be done whether Ford got the plant or somebody else got it. Now he does not seem to think that it can be done by anybody. He is so doleful and mournful in his attitude now that he appears to be willing to give up the whole thing in despair.

Mr. BROOKHART. Mr. President—

Mr. HEFLIN. I yield to the Senator from Iowa.

Mr. BROOKHART. I want to call the Senator's attention to the fact that Major Burns's letter and the remarks of the Senator from Nebraska [Mr. NORRIS] were directed to the cyanamide process in use at plant No. 2, while the statements which the Senator from Alabama has just quoted refer to the new modified Haber process which all of them expect to cheapen the cost of fixed nitrogen. There is no inconsistency between what the Senator from Nebraska said here to-day and what he said in the statement the Senator has quoted.

Mr. HEFLIN. The Senator does not take the position that the lessee could not introduce another process just the same as the Government might?

Mr. BROOKHART. Oh, no. The position is that the Government is now developing these modified processes, and that it ought to go ahead and do that until we know more about them.

Mr. HEFLIN. This bill does not specify any particular process.

Mr. BROOKHART. I understand that.

Mr. HEFLIN. It is open to all the processes, to the best one that may be devised. The main point in this whole proposition is to have a guarantee in the bill to make fertilizer for the farmers of the United States. Interests from various sources who oppose such a plan are being heard and they are busy in bringing their influence to bear in various ways to kill this particular provision in the bill. They never have favored it. They are responsible for delay in action upon the Ford offer because of this provision. They have fought it from the beginning. They are fighting it now. Their influence is being felt here—you can feel it in the very atmosphere about this Chamber—in an effort to kill the provision that guarantees the manufacture of 40,000 tons of fixed nitrogen annually at Muscle Shoals. Why are they fighting it? Because they know that its enactment into law will sound the death knell of the high prices of fertilizers that so sorely afflict our farmers to-day. Mr. President, I read to the Senate yesterday an interesting article on this subject. It is very brief, and I will read it again. It is from the Wall Street Journal of October 22, 1924: Listen to these headlines:

Chilean nitrate outlook—Ford's withdrawal of Muscle Shoals offer results in boom to Chilean industry.

Does that sound as though they think we can not make fertilizer and make it cheap at Muscle Shoals? Listen! Here is the statement—the significant statement—that tells the truth about it:

SANTIAGO, CHILE.—Henry Ford's withdrawal of his offer to take over the Muscle Shoals project has resulted in a considerable boom in the Chilean nitrate industry. Chile is the greatest nitrate producer in the world, and the United States is her principal customer. With Ford in control of Muscle Shoals on an announced program of making vast quantities of nitrate from the air, Chilean producers saw ruin ahead of them. Nitrate shares in London rose from two to three points as soon as news of the withdrawal of the Ford offer was received.

That is from the Wall Street Journal. Does that sound as though they think that this fertilizer proposition would be a failure at Muscle Shoals? No, Mr. President; it shows that they know it will be a success. They know that the manufacture of cheap fertilizer at Muscle Shoals will teach the farmers of the country how cheaply fertilizer can be made, and when they find that fertilizer can be bought at Muscle Shoals for such a low figure they will say to the various companies in other States: "You must bring down these high prices." That is why they do not want this fertilizer provision enacted into law. That is why they do not want fertilizer manufactured at Muscle Shoals. They know exactly

what they are doing when they oppose the provision which compels the making of fertilizer at Muscle Shoals. They want to keep our farmers in the dark, keep them ignorant as to what it costs to manufacture fertilizer. They do not want them to know how cheaply it can be made or what a tremendous profit they are making on its sale to-day. I am opposed to the amendment of my friend from South Carolina because it would in effect kill the guarantee proposition of 40,000 tons of fixed nitrogen. I do not think that he wants to do that. I want that provision to remain in this measure. I want the Senate to keep that provision above all the other provisions of this bill. That really is, so far as the farmers of the country are concerned, the real milk in the coconut. If that is stricken out, the very soul of the measure has been destroyed.

I want to warn some of my friends on the other side that the people are getting impatient with the dallying, delaying, do-nothing tactics employed here to prevent action on the Muscle Shoals project. One man comes in with one theory and another with another theory and another with still another theory, with the result that the measure is held up, no action taken, and nothing done to manufacture cheap fertilizer for the farmer at Muscle Shoals or anywhere else.

I do not believe that they can be deceived as to the true situation here. There are more ways to kill a bill than just by fighting it—everybody from the same angle. One can attack it from the rear, another can attack it from the front, and another can shoot it from his hiding place in the dark. Various methods can be employed to destroy a measure, and this very meritorious provision that we are seeking to enact into law for the benefit of the farmers of America is being vigorously and wrongfully attacked from many sources.

Oh, Mr. President, there are some men who claim to be the friends of the farmer when they are running for election to the Senate. Just before the battle of the ballots they talk so eloquently and pleasingly of their friendship for the farmer and how they like to serve him and safeguard his interests, but sometimes when they get here in this forum, where measures are enacted into law, and where they can show their friendship for the farmer, alas, they frequently seem to forget him. Sometimes they talk one way upon the hustings, when seeking election to the Senate, and act quite another way after they have secured a seat in this body. After election it is a matter of serious doubt with some of them as to whether fertilizers can be made at all down at Muscle Shoals. My friend from Nebraska reaches the high peak and climax of his ridiculous position in this matter by quoting Major Burns, who stated that, in his opinion, fertilizer can not be made at all at Muscle Shoals, even if you got the power for nothing. Oh, Mr. President, how utterly absurd and ridiculous! The answer to the statement of Major Burns and to that of the Senator from Nebraska is that the Cyanamid Co. of Canada is making it and selling it at a profit, and selling a great deal of it in the United States. Do Senators take the position that the Government of the United States and the intelligent, enterprising citizens here operating under a lease from this Government, with plenty of power at Muscle Shoals, can not succeed as well in making nitrates at Muscle Shoals as the people up in Canada are succeeding with the cyanamide process? Do they desire to occupy such an untenable and unenviable position?

Mr. President, when Mr. Callan, who testified before our committee, was talking about fertilizer ammonia selling for 30 cents a pound I asked him what it could be produced for at Muscle Shoals, and he said 5 cents per pound—25 cents a pound less than it is selling for to-day. If it could do no more than that, it would be worth this step upon our part in behalf of the farmers of America. This is the promising prospect at Muscle Shoals, United States of America! I doubt if the cyanamide company of Canada can produce it so cheaply as that.

So, Mr. President, there is absolutely nothing in the contention of the Senator from Nebraska that you can not make fertilizer at Muscle Shoals. He said in his own statement in the hearing that he looked to see the price of fertilizer cut in half; it made no difference who got Muscle Shoals. He said here a day or so ago that we ought to manufacture in the United States twice as much fertilizer as we are manufacturing to-day. Well, here is a step in the right direction. Here is a proposition that will to a considerable extent increase the amount of fertilizer manufactured in the United States. But the Senator from Nebraska stands in the way with a club in his hand, and every time we get this bill in close proximity to a roll call on its passage he knocks it in the head.

Mr. BROOKHART. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Iowa?

Mr. HEFLIN. Certainly.

Mr. BROOKHART. Is it not true that the bill which the Senator from Nebraska is advocating was reported out favorably by the committee?

Mr. HEFLIN. Yes.

Mr. BROOKHART. And is it not a fact that this other bill, which the Senator from Alabama is supporting, is the one brought in here to knock in the head the process that would be developed just for the farmers?

Mr. HEFLIN. Oh, no.

Mr. BROOKHART. Is not the Senator advocating the slide issue here?

Mr. HEFLIN. No; Mr. President. I am a member of the Committee on Agriculture and Forestry. I opposed the Norris bill, and I am opposing it now. The bill we brought in here, the bill containing the Ford offer, was our substitute for the Norris bill.

Mr. UNDERWOOD rose.

Mr. HEFLIN. I yield to my colleague.

Mr. UNDERWOOD. I was just going to suggest that when the Norris bill came before the Senate, the Ford offer was here, guaranteeing 40,000 tons of nitrogen to the country and the requisite amount of fertilizer to the farmer, and the Norris bill was brought in here to kill the Ford offer.

Mr. HEFLIN. I think that is true—

Mr. BROOKHART. The committee brought it in, did it not?

Mr. HEFLIN. Yes.

Mr. BROOKHART. And in a regular way, after full investigation?

Mr. HEFLIN. The committee brought it in, a majority of the members of the committee, but there were several members of the committee, myself in the number, who fought the Norris bill, and we brought in another bill with a minority report.

Mr. BROOKHART. Would there not be quite as much reason in saying that this other bill was brought in here to kill the Norris bill, and that perhaps the Alabama Power Co. would reap the benefit of it? There are two sides to that kind of an argument.

Mr. HEFLIN. I will answer the Senator by saying to him since he has asked that question, that I got the impression before the committee during the hearings that the companies that did not want Ford's offer accepted were very quietly backing the Norris bill; and I think they played hide and seek behind his bill for several months. I think the same influences are still fighting this fertilizer proposition, and I think every time these big power companies and chemical companies and fertilizer companies see a step made against this fertilizer proposition, they are patting some of you on the back.

Mr. BROOKHART. Did not the Senator himself say this morning the Alabama Power Co. could bid and take this over under the provisions of the Underwood substitute?

Mr. HEFLIN. No.

Mr. BROOKHART. That he hoped they might?

Mr. HEFLIN. No; I did not say anything of the sort.

Mr. BROOKHART. I so understood the Senator.

Mr. HEFLIN. The Senator in that respect had a very bad understanding. I said I did not know who would get it, and I did not know what this Republican President and Secretary of War would do; that I would be thankful to get anything out of the situation that will benefit the farmer.

We all are fighting under conditions that exist, Mr. President, and the Norris proposition to turn this thing over to the Government to experiment with commissions and to experiment with a limited amount of water power for the manufacture of fertilizers is a postponing and delaying process in my judgment. We are trying to get away from that. The farmers are held up by the Fertilizer Trust. The Senator from Nebraska denied that there was such a trust until the Federal Trade Commission brought in its report and stated that there was a trust; that seven big companies controlled the price.

Many companies in the country are making fertilizer, and they are making money out of it. Yet the Senator's position is that a lessee under the Government, with a plant already established and with water power ready to drive the wheels, can not make a success in the production of fertilizer at a profit at Muscle Shoals.

That position seems ridiculous to me. There are little jerk-water plants around the country making money hand over fist manufacturing fertilizer, and Senators stand up in this august body and seriously contend that it can not be done at Muscle Shoals.

That is about all I want to say at this time. I earnestly insist that we keep in the bill the fertilizer provision which my colleague has in it, guaranteeing the farmers of the United States 40,000 tons of fixed nitrogen. Let those of us who claim to be the friends of the farmers stand by the provision which compels the manufacture of fertilizer at Muscle Shoals.

Mr. UNDERWOOD. Mr. President, I have just listened with a great deal of pleasure to the able address that has been delivered by my colleague, and I think he has very clearly and forcefully covered the subject. I would not detain the Senate longer except that I feel that this is the very crux of this fight. If we are going to have national defense, we have to have a guaranty of a certain amount of nitrogen. If we are going to have an increased supply of fertilizer for the farmers of America, we have to have a guaranty of production.

As to the cost, the distinguished Senator from Tennessee [Mr. McKellar] this morning fights this bill because he says that if the property is given to a lessee the lessee may make untold profits. On the other hand, his colleague in the fight against this measure, the Senator from Nebraska [Mr. Norris], comes here to-day and says that we should not put a requirement into the law for the production of a certain amount of nitrogen, because we are bound to lose.

Mr. BROOKHART. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Iowa?

Mr. UNDERWOOD. I yield.

Mr. BROOKHART. Is it not true that both of the Senators contemplated that the profits would come out of the water power and that the losses would come out of the manufacture of nitrogen?

Mr. UNDERWOOD. They made assertions of that kind, but they are mere assertions. They have made assertions on both sides of the question. I am merely calling to the attention of the Senate the opposition that has developed.

Everybody knows that four years ago we passed a bill for Government operation that died in the House. The same Major Burns whom the Senator from Nebraska is putting up as his chief witness, in saying that it can not be profitably made, was one of the men four years ago who advocated the Government operation of this plant, and the testimony will show that.

Let me call attention to this, however. Major Burns is an Army officer. He is a gentleman of character and standing. His business is that of an ordnance officer, however, and not that of a chemist. Let me call attention to a few lines from the testimony of some distinguished chemists of this country. In the first place, let me say that Chilean nitrate of soda was selling last spring at wholesale at our Atlantic ports at \$50 a ton of 2,000 pounds, which means a price of 16.1 cents per pound for nitrogen. Sulphate of ammonia last spring was selling at wholesale prices at our Atlantic ports at \$58 a ton of 2,000 pounds, which means a price of 14 cents per pound for nitrogen.

Listen to this. Mr. S. Peacock, a chemical engineer of Philadelphia, in a letter of January 11, 1923, to Senator E. F. Ladd, made this statement:

It will be possible eventually to produce ammonia at Muscle Shoals at a cost of 5 cents per pound.

Nearly a third less than the cost to-day of ammonia from Chilean nitrates. Then Dr. R. F. Bacon, chemical engineer of New York, formerly director of the Mellon Institute of Industrial Research, testifying in behalf of the Alabama Power Co. and associates before the Military Affairs Committee of the House, said this:

The actual cost of fixing nitrogen by the process we propose to use is about 6 cents, down as low as 5 cents, per pound, of actual nitrogen fixed.

Here is another. I could read you a number of others, but this is enough. Dr. Lewis C. Jones, industrial chemist of New York City, testified on behalf of officers of the Alabama Power Co. and associates before the House Committee on Military Affairs in January, 1924, as follows:

I say there is no difficulty in the United States in making fixed nitrogen at Muscle Shoals by a process which would produce ammonia at prices which our friends have suggested, 5 or 6 cents for fixed nitrogen.

Now that is not theory. These are practical chemists. There is no limitation under the bill requiring anybody to use any particular process. He may use any process that he desires. We are only turning over the plant to help him. If he wants to adopt some other process he can do so. It is idle to say that we can not make it successfully when we know it is being made successfully to-day.

I want to call attention to another fact. We can not enact laws unless they are signed by the President of the United States. Of course, if we are not going to allow the farmer to eat unless he eats out of our platter, if he must starve if he does not eat out of our particular platter, if that is the attitude of Senators, so much for it. But all I am contending for is that after the investment of these millions of dollars for national defense and fertilizer under the law of the land as contained in the national defense act, we should arrive at a result and not temporize with the situation any longer. Here is what the President of the United States said in his message. It has been read before, but I am going to read two excerpts from it for the Record at this point. He said, referring to Muscle Shoals property:

Several offers have been made for the purchase of this property. Possibly none of them represent final terms. Much costly experimentation is necessary to produce commercial nitrogen. For that reason it is a field better suited to private enterprise than to Government operation. I should favor a sale of this property, or long-time lease, under rigid guarantees of commercial nitrogen production at reasonable rates for agricultural use.

To the Republican side of the Senate let me read again what the President of the United States said:

I should favor a sale of this property, or long-time lease, under rigid guarantees of commercial nitrogen production at reasonable rates for agricultural use.

The bill pending does not provide for a sale, but it does provide for a lease and for a guaranty of 40,000 tons of fixed nitrogen. The amendment offered by the Senator from South Carolina would strike out of the bill the opportunity to make a lease and the guaranty of fixed nitrogen.

More than that, the President said in his conclusion with reference to Muscle Shoals:

If no advantageous offer be made, the development should continue and the plant should be dedicated primarily to the production of materials for fertilization of the soil.

That is just what the bill does as it stands to-day. It gives the President himself an opportunity to find a lessee on a long-term 50-year lease as he desires. It provides that if he can not find a lessee, then, as a last resort, we may use the power of a Government corporation to produce the result.

I want to say to my friends on this side of the Chamber who represent the southern States, where at least our farmers have been crying for nitrogen for many years, that for the first time in the history of the Government a President of the United States has sent a message here in favor of commercial fertilizer for aiding the farmers. We Democrats had demanded it as a party. We southern men have promised the farmers of the Southland that we would accomplish this result if possible, and now when the President of the United States, not from the Southland, states the terms on which he is willing to accept a bill to make it operative, are we going to challenge his position and say that the farmers of the United States can have no fertilizer unless we proceed in a way that we know will tend to produce a veto from the Executive of the Nation? That is the whole proposition. Do we want to amend the bill so that we know it is perhaps going to be vetoed if it goes to the White House?

Mr. JONES of New Mexico. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from New Mexico?

Mr. UNDERWOOD. I yield.

Mr. JONES of New Mexico. I, of course, recognize the fact that we need the support of the President of the United States in this legislation, but I wonder upon what analysis of the President's message the Senator from Alabama concludes that the President of the United States would veto the bill if it did not contain the leasing feature. The President himself said, if I understood his message correctly, that if we can not lease the property, then the plant should be operated in the making of nitrates.

Mr. UNDERWOOD. That is just what I have said.

Mr. JONES of New Mexico. If the President would be willing to sign a bill which would put it in the hands of operators or intending lessees to lease it or not, would he not be willing for the Congress of the United States to exercise its judgment in the matter and sign a bill which did contain a provision for the operation of the plant in a manner which the President of the United States says he is willing shall be used? It is true he expressed a preference for the leasing of the property to individuals, but he said if we can not get that then he is in favor of operating it for the purpose of producing nitrates.

Should not the Congress of the United States have as much right as an individual to say that it shall not be leased?

Mr. UNDERWOOD. I do not challenge the question that the Congress of the United States has the right.

Mr. JONES of New Mexico. Therefore it seems to me a wrong construction has been put by the Senator from Alabama upon the President's message. He expressed a preference for private operation, but if that can not be done he said then the plant should be operated anyway by the Government for the production of nitrates. Why should not we settle the proposition as well as to leave it to some individual outside of the Congress to settle?

Mr. UNDERWOOD. That individual happens to be the President of the United States, who has nearly as much power as we have in regard to legislation. I have not said that the President would veto the bill. I say we invite his veto if we do not give him a chance to make a private lease, and we do give that chance in my amendment. Most of the Senator's on this side of the Chamber were favorable to Mr. Ford's offer.

Mr. JONES of New Mexico. I am sure the Senator from Alabama will not include me in that category.

Mr. UNDERWOOD. No. I said most of us, and that is so. Most of the Democratic Senators favored the Ford offer. They did not think then that it was necessary to have Government operation. What put them behind Henry Ford's offer? They were going to give him millions of dollars' worth of property in exchange for less than \$5,000,000, because they thought he would produce a result favorable to the agricultural masses of America. That was the only ground they had, and it was the real ground. It was because Ford was willing to guarantee the production of 40,000 tons of fixed nitrogen for national defense in time of war and for fertilizer in time of peace that I supported his offer and the only reason why I did, and it is the only reason why many Democratic Senators supported it. Now they are proposing to strike out that guarantee, to abandon that effort.

As I said, the President of the United States said he desires a lease for 50 years. Is a lease any more convincing than a sale to Mr. Ford? Are Senators going to challenge the fact that the President will make the best lease he can within the terms of the bill? As I have said repeatedly, the bill does not make the terms of the lease. It only places certain limitations on the power of the Secretary of War with the approval of the President to make a lease. One of those limitations is that they must make 40,000 tons of fixed nitrogen annually.

Senators talk about losing money and that it ought not to be done because we are going to lose Government money if we make 40,000 tons of fixed nitrogen a year, and yet in the very terms of the bill which the Senator from South Carolina seeks to strike out by his amendment are the provisions that would let an individual contractor or lessee take the chances as to whether he was going to lose money or not. It would not be the Government that would lose the money, if the contractor said he would make the 40,000 tons. What concern is it of ours if some man thinks he can make the 40,000 tons every year and then fails to do it? It is his loss and not the loss of the Government. If there is going to be a loss in the manufacturing of nitrogen and Senators are trying to put it onto the taxpayers of America, we ought to say it shall only be done by the Government.

The real truth about it is that my friend from Nebraska fought the Ford offer because he believed in a power development. He has been perfectly sincere and perfectly honest in his position. His only proposal in reference to fertilizer or nitrogen has been experimental from the beginning. The production of nitrogen may be in its infancy, but it has passed the experimental stage in the matter of accomplishing a result for the American farmer.

We might just as well know that we are not sure of accomplishing legislation that will be effective unless we write a guarantee in the bill. There is no reason in the world why we can not trust the President to make the terms of the contract within the requirements of this guaranty, and there is no reason I can conceive of why we should not give him first the chance to make the lease, and then if it can not be done we can take care of the matter by means of a Government corporation. I think that with the Government corporation this guarantee of 40,000 tons of nitrogen could remain. Of course I recognize the fact that if it is a Government corporation and is not successful, a bill in Congress will stop it at any time.

Why not try to make that 40,000 tons? The Senator from Nebraska said it is a mere drop in the bucket. It is one-fifth of the amount of nitrogen that we are getting from Chile every year. It is more than a drop in the bucket. It is not

the full answer to the problem, but it amounts to one-fifth. Forty thousand tons of fixed nitrogen, the capacity of the plant, is one-fifth of the nitrogen the farmers of the United States consumed last year.

Mr. KING. Mr. President, will the Senator permit a question?

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Utah?

Mr. UNDERWOOD. I yield.

Mr. KING. If the Government shall fail to obtain a lease in the event the bill passes as the Senator has projected it, and embarks upon the manufacture of power and nitrogenous matters or fertilizers, and then within a few years desires to make a lease or can make a satisfactory lease, is there anything in the bill that would prevent it?

Mr. UNDERWOOD. No; the Government could repeal the law creating the corporation and provide for a lease.

Mr. KING. That could only be done by an act of Congress?

Mr. UNDERWOOD. Yes; by an act of Congress; but it is within the power of Congress to do it.

Mr. HEFLIN. Mr. President, I desire to ask my colleague a question.

The PRESIDENT pro tempore. Does the senior Senator from Alabama yield to his colleague?

Mr. UNDERWOOD. I do.

Mr. HEFLIN. The European countries are using their war nitrate plants in the interest of agriculture, are they not?

Mr. UNDERWOOD. Oh, undoubtedly. Japan has cyanamide plants with water power behind them. The Muscle Shoals plant is the largest single plant in the world, but Japan has several plants with a greater productive capacity than that plant, and it is fitting those plants for agriculture in time of peace. Great Britain is doing the same thing, and so is France. Germany has a very great production of nitrogen, although her plants are largely operated on the Haber process. Instead of the cyanamide process, but some of them are operated under the same process which we are proposing to use here.

Now, I think we have got to the dividing of the ways. We are either going to stand for a guaranty of doing something for the American farmer, for writing into the law the fixed standard of 40,000 tons of fixed nitrogen, or we are not. If we are not going to impose that requirement, then I desire to say that I have made the best fight for it that I could make. I have been in this fight for more than 10 years. I repeat, we have reached the dividing of the ways. We are either going in the legislation of this country to dedicate this plant to national defense and the farmers of the United States or we are going to abandon it for so-called experimentation and let the power go to the development of the great industries of the South. That is all there is in this issue.

Mr. SMITH. Mr. President, I wish to ask the Senator a question before he takes his seat.

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from South Carolina?

Mr. UNDERWOOD. I yield.

Mr. SMITH. By the terms of my amendment, I am seeking, without specifying 40,000 tons, as the Senator has provided in the first section of his amendment, to accomplish the same purpose. The Senator from Alabama will recognize that the capacity of nitrate plant No. 2 is 40,000 tons of fixed nitrogen annually. Under the terms of the amendment proposed by me it is provided:

In order to supply the United States Government with nitrogen for uses by it in time of war and in order to produce nitrogen and balanced commercial fertilizer—

I desire to strike out the word "commercial"—

for the national needs in time of peace, the properties enumerated in the first section of this act shall be developed and utilized to their fullest capacity.

That, perhaps, is giving a wider scope to the objects which are enumerated in the section referred to, but the effect will be to utilize nitrate plant No. 2 for the production of nitrogen to its fullest capacity. If its fullest capacity shall be 40,000 tons annually, then the guaranty in my amendment is just as binding as the guaranty which is contained in the Senator's substitute, with the additional advantage that if we find a process which will use this power and cheapen the product we shall get more nitrogen and not be confined to a stated amount.

Mr. UNDERWOOD. The Senator has not read my amendment. The Senator proposes to do just the opposite. He provides in his amendment that these plants shall be operated—and I take it, as he has said so, he means it—to their capacity,

but I do not know that the law will mean that. I do not know what construction may be put by the operators of the plants or by the courts on the Senator's amendment, but I do know when the Senator states that the plants shall be operated to their full capacity he limits the production of the plants.

Mr. SMITH. I should like to understand the Senator a little better. If these plants are required to be utilized to their full capacity in the production of the commodities enumerated in my amendment, and in the Senator's amendment, why is not that an order, a command to produce nitrogen to the full capacity of the plants, which, according to all the testimony before the committee, at the nitrate plant now established and ready to proceed is 40,000 tons a year.

Mr. UNDERWOOD. The difference is this: Some gentlemen operating that plant who wanted power and not fertilizer might let it become obsolescent and say it could not produce that amount, that its productive capacity was not so much; but I know that the theoretical production of that plant is 40,000 tons of fixed nitrogen, and I do not say anything about the plant in my proposal. I propose to turn the plant over to the lessees, and then I say, "You must write a guaranty to produce 40,000 tons of fixed nitrogen, and you may produce it as you please." If the lessees can not do it with cyanamide plant No. 1 or No. 2, then they can take some other plant. The amendment of the Senator limits the capacity of the plants, unless the operators should want to go ahead voluntarily. The Senator limits their guaranty of production to the productive capacity of these plants, and I do not. I say they shall produce 40,000 tons of nitrogen regardless of any plants.

There is not any question about the issue; there is no question where the Senate is dividing. I am not criticizing my colleagues, for they have a right to their opinion and their position, but I do say that the leader of the fight against this bill, the leader of the fight against the Ford bill, the Senator from Nebraska [Mr. Norris], brought in his proposal to prevent any contract going through with Henry Ford for 40,000 tons of fixed nitrogen. If I were in favor of merely a power development, I would be for the Norris bill. It is a better power bill than the one I propose; I recognize that. It develops the headwaters of the Tennessee River as well as Dam No. 2; but I have not been making this fight for the development of the industries of the South. I want them to be developed; I would be glad at some other time to help their development; but this plant at Muscle Shoals has been consecrated to the national defense in time of war and to the production of fertilizer for the farmer in time of peace. The Senator from South Carolina was one of the men—in fact, he was the leader—in the fight to consecrate it for that purpose, and I am sorry to see him now in an alliance with men who are not in favor of making fertilizer at Muscle Shoals.

Mr. SMITH. Oh, Mr. President, I can not allow that statement to go unchallenged, because my original bill stipulated that in exactly the wording the Senator has in his substitute. I am attempting to do now what I attempted to do in the first bill, which provided that the Government should select such site or sites for the production of water power as were necessary in order to produce nitrogen for use in time of war and fertilizer in time of peace.

Mr. UNDERWOOD. Mr. President, I said that. I had just complimented the Senator for that being his position.

Mr. SMITH. If the Senator will bear with me further, I am trying to keep the record straight. I provide in my amendment that the plant at Muscle Shoals shall be consecrated as it was in the original act, but I seek to provide that until the Government has solved the problem as to the production of the nitrogen, solved it practically and produced in commercial form commodities similar to the examples which I had on my desk a few days ago, and which came from one of the bureaus of the Government, the Government shall stay with the problem until the farmers are guaranteed that the project is feasible and relief is in sight, and not, in the pioneering stage of this development, to turn it over to private interests whose very objective would be to make the most out of the plant in the shortest time, which would result in the development and sale of power.

In my amendment, as the Senator has done in his proposal, I have consecrated the plant to the production of fertilizer for the farmer and for the defense of the Nation, and made the party most interested as the guardian of the Nation, which is the Congress and Government of the United States, directly responsible to those whom they serve, rather than delegate that power to a private corporation which may or may not patriotically carry out the purposes stated in the original act and reiterated in my amendment.

Mr. UNDERWOOD. I am glad to hear what the Senator has said, but I do not think his defense goes to the case. I complimented him a while ago on his splendid fight in 1916 to secure nitrogen for national defense and for the farmer, but I say that his hand has weakened when he is not willing to write into the legislation a guaranty of the production of so many tons of nitrogen.

Mr. SMITH. If the Senator will allow me, I have written into my amendment a proviso that the full capacity of that plant shall be utilized for that purpose; and in the second paragraph of the same amendment have provided that future development shall also be so utilized. Of course, if it is true that the production of a mixed fertilizer, a balanced fertilizer, is not practicable, we may desist from that, as provided in the Senator's bill, but, so far as the production of nitrogen is concerned, I have not limited it to 40,000 tons; I have used the words "full capacity" to include 40,000 tons, as the Senator from Alabama does in his proposal, and then such other production as further development may make possible.

Mr. UNDERWOOD. Mr. President, there is nothing in my proposal that does not let a successful operator make as much fertilizer as he wants to make, and he will, if he is successful, make as much as he can, but under my proposal there is a direct guaranty. The theoretical capacity of plant No. 2 is 40,000 tons. It may not be made to work up to the capacity of 40,000 tons; some portions of the plant may become obsolescent; it is not possible to go beyond 40,000 tons in that plant any more than it is possible to put more than a gallon of water in a gallon measure; but if the gallon measure leaks, as that plant may leak in its productive capacity, then we will not have the gallon of water or the 40,000 tons. Under the proposal that I make the lessee who gets the plant or the Government corporation itself must guarantee to the people of America a production of 40,000 tons of fixed nitrogen; and there is no way to get around that guaranty.

Mr. SMITH. Mr. President, will the Senator allow me to ask him one other question?

Mr. UNDERWOOD. Certainly.

Mr. SMITH. Either under my amendment, or if my amendment should not prevail and his bill were to pass and we did not get a lessee, does the Senator think that the officers of the Government of the United States, charged with the duty of providing the basis of explosives for defense, would be less likely to use every effort to bring about that production than would private individuals under compulsion? Do we have to put the Government under compulsion?

Mr. UNDERWOOD. I will tell the Senator candidly what is in my mind. I may be wrong about it. I know that in order to produce 40,000 tons of nitrogen annually that plant will have to run every hour in the day and every day in the year. I know also that if it runs 12 hours a day and six days in the week it will be in a stand-by condition for the production of nitrogen for war purposes, but it will not be furnishing the farmers of America more than one-half of its productive capacity. I know that, and I know just what it means. That would be one-half of the productive capacity of the plant. I would rather have one-half than nothing, but I am going to make my position perfectly plain. I am not going to have any "hereafter" about this matter. I want at least 40,000 tons of nitrogen to go into the fields of America annually from this plant, and I am not going to take any chances about it as far as I am concerned.

I have presented my case. Of course, I shall accept the decision of my colleagues, and their wisdom is what must rule. What I said was intended in no way as a criticism of them; but I say that everybody knows the standard that I propose to fix. There can be no doubt about it, and, more than that, I say we know that the President will sign the bill I propose. We know that if it is enacted into legislation we will get the law, and I can say that not only from his message but from personal conversation. This bill will be signed and you will take no chances on it.

Mr. SMITH. Does the Senator think he would veto the bill if the leasing features were eliminated?

Mr. UNDERWOOD. No; I said a while ago that you take your chance of a veto. You are temporizing with the question. You are like a child playing with fire; you do not know what is going to happen; and if we really want to accomplish a great benefit here, why should we take the chance on a theoretical proposition?

As I said, I know that the Senator from South Carolina is, and always has been, an earnest advocate of relief for the farmers in these matters. That is one reason why I regret to see him fighting in a cohort that I know do not care a snap of the finger about fertilizers or nitrogen. They want a

great power development. I know that. Some of the gentlemen on the other side are perfectly candid in their statements about it. They say they are willing to experiment, but they admit that they are fighting for a great power bill, for the development of industry; and I think my friend is not in his rightful place, if he will allow me to say so.

I agreed to yield to the Senator from Nebraska [Mr. HOWELL], and I now do so.

Mr. HOWELL. Mr. President, do I understand the Senator from Alabama to believe that fixed nitrogen can be produced at Muscle Shoals, with the present plant, more cheaply than the present market price, or will it cost more?

Mr. UNDERWOOD. I think it can be. My amendment does not limit it to the present plant, however. I hope the man who comes in to take possession of this property will do his best. I require the annual production of 40,000 tons of nitrogen, and say: "Make it as best you can." I have read into the Record the testimony of three great chemists—the Senator may not have been in the Chamber at the time—who testified that it could be produced at 5 or 6 cents a pound, as against 16, its selling price last spring in New York from the Chilean nitrate, and that is the basis of the present fertilizer.

Mr. SMITH. How much did the Senator say—16 cents a pound?

Mr. UNDERWOOD. That is based on the selling price of Chilean nitrate.

Mr. SMITH. Yes; 16 cents a pound. That is right.

Mr. HOWELL. In other words, then, as I understand, the Senator believes that fixed nitrogen can be produced more cheaply at Muscle Shoals than the market price to-day?

Mr. UNDERWOOD. Yes; I do. I have not any doubt about it. I base that conclusion on the testimony of the witnesses from whom I have read, and they are great chemists. One of them is the chemist who was formerly director of the Mellon Institute of Industrial Research; and that great institution certainly did not have a chemist who was not worthy of his profession.

Mr. HOWELL. What method would they use?

Mr. UNDERWOOD. They have different methods, and I have not a statement of the methods here.

Mr. HOWELL. The Haber method?

Mr. UNDERWOOD. Oh, no. That is not where the question comes. Cyanamide is the basis, as I understand, of their proposal.

Mr. SIMMONS. Mr. President, I desire to ask the Senator a question more particularly for information. The Senator says that he thinks the cost of production of nitrate at Muscle Shoals may be very much reduced?

Mr. UNDERWOOD. I think so.

Mr. SIMMONS. The Senator thinks that even at this time it could be produced cheaper than the cost of Chilean nitrate?

Mr. UNDERWOOD. That is what these witnesses say; yes.

Mr. SIMMONS. Does the Senator believe that if this plant is leased the farmers will ever get more than 40,000 tons annually?

Mr. UNDERWOOD. Yes; I think so. Of course, a great deal depends on whom it is leased to, and that is in the hands of the President of the United States; but I think that there are some of these possible bidders—well, I do not know whether they will bid or not; but they have had proposals from the Carbide people, who are manufacturers of chemicals, and want to make urea. They are one of the possible bidders. The Cyanamid Co., of New York, which manufactures cyanamide in Canada and whose fertilizer manufacturing plant is in New Jersey, is another possible bidder in the offing. I do not know that they will bid, but they are talking about it; and there are other people who are involved in chemistry and fertilizer who, of course, if they go at it and make a profit on the 40,000 tons of fixed nitrogen, will then develop the production so far as the market demands will allow them to do so. If they do not, if they fail to make a profit, then of course they will not make any more than the 40,000 tons; but we will get that much anyhow.

Mr. SIMMONS. Does not the Senator think that any probable lease of this plant at this time would be made only to a company that would expect to make the sale of power the chief source of profit?

Mr. UNDERWOOD. The only company in that neighborhood that might be interested in power told me that they would not bid if we required them to make fertilizer.

Mr. SIMMONS. They would not?

Mr. UNDERWOOD. They would not bid.

Mr. SIMMONS. That means that that company—and I think that probably is true of almost any company that would be apt to make an offer—thinks there is a great deal more

profit in the sale of power than there is in the manufacture of nitrates.

Mr. UNDERWOOD. They are not in the business of making nitrogen for fertilizers, and I think they are afraid to go into it. That is the real truth. Of course these chemical companies know something about it. That is the distinction.

Mr. SIMMONS. If the lessee of this plant believes that he can make more out of power than he can out of nitrates, he will never manufacture more than the minimum tonnage that the bill provides. Is not that true?

Mr. UNDERWOOD. I think that would be true if that happened. I really do not know enough about the power business or the fertilizer business to know where the profit lies; but I will say this—

Mr. SIMMONS. Let me ask the Senator if it is not a fact that at this time, with the present developed processes of manufacturing nitrates from the air, there is more profit in the sale of power than there is in the manufacture of nitrates?

Mr. UNDERWOOD. I can not answer that question for the Senator, because I do not know.

Mr. SIMMONS. But if this plant is leased and it develops as a result of their operations that they can make larger profits out of the sale of power than they can make out of the manufacture of nitrates, then the farmers of this country, while that condition of things lasts, never will get more than the 40,000 tons annually.

Mr. UNDERWOOD. I think that is apparent on the face of the matter, that a business man is going to make his profits where he can make them the best; but I want to say that under the recent action of the Senate which cut the cooperation of Dam No. 3 out of this bill, the extreme limit of the primary power that you have developed there would be, for all but five days in the year, 125,000 horsepower. Of course, the last day in the year it is only about eighty-odd thousand horsepower; but you can produce at Dam No. 2 on the lowest gauge of the river 125,000 horsepower for all except five days in the year. Then you have 60,000 supplemental horsepower; so that at best, as the bill now stands, not bringing in Dam No. 3, you have 185,000 horsepower for the productive capacity. If you adopt the cyanamide process you have 90,000 or 100,000 horsepower gone at once. If you use the electrical power to make your phosphoric acid out of phosphorous rock, you consume most of it; so that as the bill now stands there will not be very much surplus power to sell at all. The horsepower will be consumed to a large extent by the production of the nitrogen and the fertilizer ingredients which this bill requires.

Mr. SIMMONS. So that the Senator reaches the conclusion that the lessee would lease the property with the understanding that he would have very little power to sell?

Mr. UNDERWOOD. Yes; I think he would have to do it as the bill stands. There would be much more power if we would put back in the bill Dam No. 3; but it is out, and we have not any development there.

As I said a while ago, I want to be perfectly candid with the Senate. From the standpoint of the gentlemen on the floor of the Senate who want primarily to develop power, the bill of the Senator from Nebraska, which is a power bill, is a better bill than mine; but it is nothing but an experimental proposition so far as fertilizer and national defense are concerned.

[Mr. HOWELL addressed the Senate. After having spoken for a few minutes he yielded the floor for the day. His speech is published entire on page 673.]

Mr. JONES of Washington. Mr. President, I desire to offer an amendment which I intend to propose. I would like to have it read, printed, and lie on the table.

The PRESIDENT pro tempore. The Secretary will read the amendment.

The READING CLERK. The Senator from Washington proposes to strike out all of the enacting clause and to insert:

That the Secretary of War, the Secretary of Agriculture, and a third person to be appointed by the President of the United States be, and they are hereby, constituted a commission to investigate and study the proposals and questions involved in the use and disposition of the water-power resources and property of the United States at and connected with Muscle Shoals and to report to Congress on or before the first Monday in January, 1926, its conclusions and recommendations for the use or disposition of the same. The commission is authorized and directed to use in the work herein authorized such employees of the War and Agriculture Departments as can be used advantageously, and may employ such additional assistants as may be necessary within the limits of appropriations made for such purposes. The commission may invite proposals for the lease or purchase

of such properties or any part thereof and report such proposals to Congress with their recommendations in regard to the same. The appropriation of \$100,000 is hereby authorized for carrying out the purposes of this act. Until legislation shall be enacted providing otherwise, the Secretary of War is authorized temporarily to dispose of the power developed at Muscle Shoals from time to time upon such terms as he may deem wise, but no contract for the use of power shall be made for a longer period than one year.

INLAND WATERWAYS CORPORATION

Mr. REED of Missouri. Mr. President, I desired to-day to submit some remarks touching the operations of the Inland Waterways Corporation. In view of the course the debate has taken, I do not want to trench upon the time of the Senate; but I do want to have printed now as a part of my own remarks a letter and some figures touching that question which were prepared by the Inland Waterways Corporation.

The PRESIDING OFFICER (Mr. LADD in the chair). Is there objection? The Chair hears none.

Mr. REED of Missouri. I also desire to have printed, with due credit, of course, to its author, but as a part of my remarks, because I want it to appear in the RECORD proper, the address on the same topic which Secretary of War Weeks delivered last night at the banquet of the National Rivers and Harbors Congress. I ask that these two matters be printed in the RECORD proper.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Missouri? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

UNITED STATES INLAND WATERWAYS CORPORATION,

THE SECRETARY OF WAR, GOVERNOR,

Washington, D. C., December 11, 1924.

Hon. JAMES A. REED,

Senate Office Building, Washington, D. C.

MY DEAR SENATOR: At the request of your office I am sending you a statement of operations on the Mississippi River for the nine months' period ended September 30, 1924.

The figures are not complete for the months of October and November, but a preliminary estimate indicates that there will be a loss for these two months. The operating losses for the months of October and November are due to the low stage of the river.

The attached statement shows a net profit for the nine months of \$34,837.44. In the expenses are included depreciation charges amounting to \$253,324.41. Eliminating the depreciation results in a net in-pocket gain of \$288,161.85.

Figures compiled by our auditing department reflect that the rates obtained by the barge line saves the public approximately \$1.35 per ton. This would indicate a saving of about \$942,000 for the nine months' period.

Very truly yours,

GUY BARTLEY, Secretary-Treasurer.

Inland Waterways Corporation—Operations of Mississippi River section by months, January–September, 1924

January:	
Gross revenues.....	\$261,119.61
Total expenses.....	\$256,597.06
Net income.....	\$4,522.55

Total expenses	\$283,065.93
Net income	\$1,740.61
Add depreciation charges	\$29,009.16
Net in pocket	\$30,749.77
Revenue tonnage	76,609
September:		
Gross revenues	\$278,378.23
Total expenses	\$260,188.67
Net income	\$18,189.56
Add depreciation charges	\$29,009.16
Net in pocket	\$47,198.72
Revenue tonnage	80,537

SUMMARY OF OPERATIONS, JANUARY-SEPTEMBER, 1924

Gross revenues	\$2,556,724.05
Total expenses	\$2,521,886.61
Net income	\$34,837.44
Add depreciation charges	\$253,324.41
Net in pocket	\$288,161.85
Revenue tonnage	698,067

ADDRESS OF HON. JOHN W. WEEKS, SECRETARY OF WAR, AT THE ANNUAL BANQUET OF THE NATIONAL RIVERS AND HARBORS CONGRESS, THURSDAY, DECEMBER 11, 1924

I have selected as the subject of my remarks this evening the Inland Waterways Corporation, which is one of the important activities under the supervision of the Secretary of War. Aside from my personal interest in the success of this activity, I am most desirous of interesting the American public in this transportation experiment. I know of no better way to accomplish this than through the membership of the National Rivers and Harbors Congress and I am glad, therefore, to have this opportunity to call to your attention the operations of the Inland Waterways Corporation.

The Inland Waterways Corporation is the logical successor of the Inland and Coastwise Waterways Service, which was an organization created by the Secretary of War in accordance with a mandate contained in the transportation act of 1920. This act required the Secretary of War to operate certain transportation facilities created and operated upon the Mississippi and Warrior Rivers and the New York Canal during the World War by the Railroad Administration. The purpose of these transportation lines was to relieve rail congestion during the war.

In addition to the fleets constructed for operation on the Mississippi and Warrior Rivers, and the New York Canal, there was also another project undertaken by order of President Wilson which had in mind the operation of a fleet on the upper Mississippi River between St. Louis and St. Paul. All these facilities, except the one for operation upon the upper Mississippi River, were operated by the Railroad Administration until it was legislated out of existence and the Inland and Coastwise Waterways Service was formed.

The mission of the Inland Waterways Corporation is to carry out the mandate and purpose of Congress as expressed in sections 201 and 500 of the transportation act. It provides that the Secretary of War shall continue to operate all of the transportation facilities in existence at the time they were turned over by the Railroad Administration to him, and to promote, encourage, and develop waterway transportation.

The purpose of the Congress in turning these transportation facilities over to the Secretary of War for continued operation was to

demonstrate whether or not waterway transportation, acting in cooperation with rail and highway transportation, could offer a cheaper means of transportation to the public.

For a long time those who had been interested in the development of waterway transportation had been divided into two groups.

First. Those who lived along the rivers made navigable and who contended that the value of such navigability was the fact that, potentially, there existed competition to such an extent as to cause rail rates to favor the cities along the streams by lower rates than those granted to the people of the interior.

Second. Those who opposed the canalization of our streams on the grounds that it was an unjust system of taxation whereby one section of the country was compelled to contribute to the welfare of cities located on streams when such increase in the welfare of these cities was in direct opposition to the interests of the contributors.

The program, then, that confronted the Secretary of War in carrying out his mandate to promote, encourage, and develop waterway transportation, and to foster and preserve in full vigor both rail and water transportation, was the enunciation of certain principles upon which the whole of the people could unite in an effort to make the transportation facilities which he was required to operate popular and of widespread value. To-day all advocates of waterway transportation practically stand united upon the following principles:

(a) That there is not enough transportation—rail, water, and highway—to serve the needs of our rapidly developing commerce.

(b) That waterway transportation is inherently cheaper than any other form; and as long as navigable systems have been created under the assumption that their utilization would afford the most feasible and economical means of developing the transportation necessary to meet our rapidly expanding commerce, some means must be found for such utilization of our waterways.

(c) Since all of the people of the United States have been taxed to create navigable waterways, under the impression that the utilization of such streams would result in a cheaper form of transportation, the benefits to be derived from the utilization of such streams must be reflected in the consignments and assignments of freights, not only from the people along the banks of the navigable streams and canals, but also from the interior of the country.

There is no doubt that inland waterway transportation as it existed at the time of the passage of the transportation act was a negligible factor in our interior commercial development. At one time in the history of our country it had been a very considerable factor. Something must have caused this radical change, and if the cause were susceptible of removal, then waterway transportation might be rehabilitated.

Waterway transportation may be utilized in three ways: By private carriers owning their own boats and transporting their own commodities; by contract carriers who may either be owners of their boats carrying their own commodities and contracting to carry for some other interests on their return trip, or one who contracts to carry only the goods of certain specified firms; or by common carriers cooperating with rail and highway transportation. The common carrier—rail, water, or highway—is one which holds itself out for hire to any and all parties at certain specified rates, with certain dates of sailing. The development of a common carrier upon the rivers, having no relations with rail and highway carriers, would limit the advantage of such a carrier to the people residing along the banks of the stream. The operation of the private and contract carriers requires their development to such a limited extent, in order to be of great value to the people at large, that the purpose of Congress would not seem to be served in simply aiding and encouraging them. The more they carry, the larger will be the return to the United States in a way, but the benefits to be derived from their operation will be confined to a much smaller class of people than would be advantaged by the development of common water-rail-highway carriers.

Having arrived so far in the study of the question as to determine upon the development of common carriers, it became evident that there were certain conditions incident to the successful operation of common water-rail-highway carriers, and that these conditions must be created by experiment and demonstration. These conditions are simple, but until demonstrated they offer such obstacles to the investment of private capital that their establishment by private capital is unlikely. These conditions are:

1. A suitable navigable waterway.
2. Suitably designed equipment for each particular waterway, and that suitable equipment must be determined by experiment.

That the old water-borne transportation equipment and its methods of operation were obsolete is proven by the fact that it had been driven out of existence. The development of a transportation agency to success must be gradual and healthy. There is bound to be, however, a long period of constructive effort, of financial outlay without return, before such constructive effort results in a remunerative return. The history of our railroads has been that of ups and downs, and there is too much demand for capital in assured undertakings, too

great a demand for quick return upon an investment, for capital to pour itself unthinkingly and for an indefinite period into an undertaking so perilous as the rehabilitation of a form of transportation that competition had utterly destroyed.

It was fortunate, therefore, for the revival of water-borne commerce that the demands of war brought into being the fleets operated by this corporation and that the law required their operation, because, aside from the other fundamentals of success that experience has brought forward in their proper perspective, while it might have been physically possible to have obtained sufficient funds to inaugurate a service of local importance only, a service whereby the public could be very widely benefited could not in all probability have been developed. Financial failure faced it from the start. Indeed, the schemes of the original proponents of the revival of water-borne transportation on the Mississippi were so strictly limited in their application that their proposed line was not to be even a common carrier, but a contract carrier, and the freight to be carried was to originate in or be destined to river ports or their immediate vicinity. It would have led to active competition and the destruction of water transportation by its active and determined competitors and the consequent delay of the revival of such commerce for a long time. But it is an entirely different thing to drive an independent corporation, with limited capital, out of business and to fight against the expressed policy of Congress that water-borne commerce should be revived in order that the people may be given a chance to find out whether or not the hundreds of millions of dollars spent in making waterways navigable is a success or a blunder.

In this connection, however, I think I should say that proper equipment for the Mississippi-Warrior service has not yet been satisfactorily determined in its entirety, and the towboats now used draw entirely too much water.

There should be suitable terminals and balanced freight both ways.

There was and still is to an appreciable extent an argument as to what constitutes a suitable terminal. Suffice it to say that suitable terminals depend upon very widely different conditions. In general they may be classified into three types—the direct lift, the conveyor type, and the floating terminal with incline.

The kind of terminal to be built depends upon the character of the stream, the commodities to be principally handled, whether or not there is to be interchange with the railroads, and various and sundry other local considerations.

By a balanced traffic is meant not only freight both ways, but freight both ways of both high and low revenue production, and that kind of freight is only going to be procured when there has been built up a dependable, economical, and durable service. The distinction I make between dependable and durable is that to constitute dependability there must be scheduled sailings on which reliance may be placed and advantage taken of, while by durable is conveyed the idea of permanency.

The next essential condition to success is interchange with the railroads. Without such condition being fulfilled, the only freight that can be handled is local production; that is, the produce of the cities situate upon the navigable stream or the immediate vicinity. Certainly it is unfair discrimination to tax the public at large for the benefit of an inconsiderable portion of the population fortunately located. If the public at large is to be benefited by the revival of water-borne commerce on our interior rivers and canals, then their consignments or assignments of freight must reflect some savings due to the use of such rivers or canals. And to reach any of the public to-day not on these navigable waters and to let them reap the benefits of cheaper transportation, recourse must be had to railways or highways, and the commerce must, of necessity, be both rail and water borne.

Let us examine what effect this would have upon the private revival of water-borne commerce.

To compel the railroads to enter into interchange relations with them, the water carrier would at once become, willy nilly, a common carrier, and at the mercy of its rail connections in the matter of the division of revenue accruing from joint hauls. The railroads could and would have said in effect, "You will take what share of the proceeds we voluntarily give you or we will not interchange."

The share of the revenue that the water carrier might have been compelled to accept under this condition could have been so low as to have been very unprofitable, and it would not have been a difficult matter to flood the private corporation with undesirable freight that it would have to carry because of its published schedules, to the exclusion of other freight more profitable, but not of sufficient importance in itself to justify the maintenance of the line.

Now, this condition, to some extent, befell the governmental operations, and led to the enunciation of the final postulate for success, namely—

There must be an equitable division of revenue accruing to both water and rail transportation for a combined haul. Fortunately,

there exists in law a tribunal with effective powers for compelling such a division—the Interstate Commerce Commission.

The Inland Waterways Corporation has interchange relations with approximately 165 railroads in the United States. These railroads divide their joint revenue between each other in various ways, depending upon a multitude of conditions.

An attempt was made in briefs submitted and argued before the Interstate Commerce Commission to enunciate certain principles of general application upon which the commission could base an order to the railroads to give an equitable proportion of the revenue jointly earned by a combined rail and water movement to the water carrier. It required from October, 1920, to April, 1923, to get any decision from the Interstate Commerce Commission. In my judgment their decision in dockets Nos. 11892 and 11893, issued February 6, 1923, gives a fair working basis upon which rail and water ways may cooperate and eventually coordinate. Practically the commission's answer to the waterways' brief was:

"There are too many conflicting interests to render it possible for this commission to render a blanket decision as requested. We enunciate certain principles which we desire to be followed in negotiations between water and rail carriers. If, in the negotiations such as we recommend, you reach a breaking point with an individual railroad, such case may be resubmitted and a decision rendered."

There are certain inherent difficulties of governmental operation. Generally speaking, there has always been a very well defined opposition in the United States to governmental ownership of any transportation facilities and a rather insistent demand that the Government abandon any such ownership or operations at any cost. Those charged by me with the operation of these governmental facilities presented to me a statement of the difficulties that they ran against in operating governmentally. These objections they stated to be:

(a) The lack of certainty on the part of the shipping public as to whether governmental operation might not be suddenly abandoned altogether, or that the transportation facilities might be disposed of to interests hostile to the waterways; either of which contingencies has a marked effect on the decision of a shipper who desires economical, dependable, and permanent service.

(b) The tendency on the part of individuals, communities, or certain groups of shippers to demand service of benefit to them peculiarly, on the ground that they are taxpayers, such service involving the barge lines in operations distinctly opposed to all economic considerations, and sometimes opposed to the public interest.

(c) Its inability to finance itself in periods of depression, thus necessitating an appeal to Congress for funds, opening the floodgates of criticism with the resultant agitation as to whether or not Congress will, through failure to appropriate, cause the cessation of an operation that is economically sound, the destruction of a solvent transportation agency, the failure of a successful waterway demonstration, because of the law against a Government agency creating a deficit; and under the limits set by such conditions the line is incapable of expansion unless there be a further extension of governmental ownership.

Now, a private transportation agency would certainly include in its powers the ability to—

(a) Expand as business increases.
(b) To cease unprofitable operations.
(c) To borrow money.
(d) To issue bonds.
(e) To inaugurate and develop new lines.
(f) To dispose of any line at any time under favorable conditions.
Just as clearly can it be seen by a reading of the transportation act that the only one of these things the Secretary of War is authorized to do is to expand the existing service, and it is just as clear that each expansion he might make would result in an extension of governmental operation and ownership, and would require special appropriations.

Since there is a sincere disposition to develop common carriers on our inland and coastwise waterways, a widespread and well-founded belief in the necessity of such means of transportation, there should be a general recognition of what the experience of the Mississippi-Warrior service proves, and there was presented to Congress a concrete program based on that demonstration, which they accepted. When this program was presented to them they were informed fully on the following points:

(a) The inherent difficulties of governmental operation.
(b) The necessity of governmental operation as a pioneer demonstration.
(c) The necessity of Congress providing some means which would allow the Secretary of War, its mandatory, to do the things he would ordinarily do as the head of a great private transportation agency.
(d) The necessity of providing the Secretary of War with sufficient capital to overcome the conditions which militate against the success of the governmental demonstration.

The result of this presentation to Congress was the enactment of Public Act No. 185, Sixty-eighth Congress, which I have mentioned.

A corporation is hereby created which has a capital stock of \$5,000,000, in addition to all the assets transferred to it belonging to the Inland and Coastwise Waterways Service, which have been appraised at very nearly \$10,000,000.

The objections to governmental operation have been removed to a large degree, and the law provides, after enumerating certain definite powers which the corporation has, the following: "In addition to the powers specifically granted, it shall have such powers as may be necessary or incidental to fulfill the purposes of its creation."

In order that the corporation may function as a private transportation agency, the law provides for a board of advisers, who shall be selected from persons prominently identified with the business interests of their communities, and who shall not be salaried officers but men who will give their services willingly and freely in advising the Secretary of War, through his executive, as to the varying conditions arising which might react for or militate against the development of the transportation facilities operated by the Secretary of War.

In addition to the advisory board, the law provides for a chairman, who shall be the direct representative of the Secretary of War and his executive in carrying out his policy. This executive has been clothed by me with certain powers which, under the law, I may delegate to him; and he freely consults with the board of advisers, laying their recommendations before me for my consideration as to their adoption. Monthly reports are rendered by him to me, so that I am at all times conversant with what is actually occurring in the operation of the corporation, and he frequently reports to me upon matters requiring my decision. There is absolutely no red tape involved in this administration. My executive has free access to me at any time and has at all times the advice of the board of advisers.

The Inland Waterways Corporation operates one great transportation facility to-day, known as the Mississippi-Warrior Service, which is divided into two operating sections. Each of these operating sections has an operating manager. The two operating sections are combined in a service which has a traffic manager, an auditor, and a disbursing officer. The head of each one of these departments is directly subordinate to the executive of the corporation. The officers of the corporation are simply the Secretary of War, the chairman of the advisory board, and a combined secretary and treasurer. This organization is in accordance with the best practice existing in railroad transportation, the heads of the various departments corresponding with the vice presidents in charge of operating, traffic, financial and accounting departments.

It can be said that when the unusual conditions precedent to success on the Mississippi section are given suitable consideration, it has demonstrated its probable capacity as a self-supporting concern. The only time since the fleet has been completed and in operation that this section has not earned money, is when the river falls to such an extent that in some places its channel depth is not over 6 feet. The towboats operating on this section were designed for a channel which was credibly assumed to be 8 feet from St. Louis to Cairo and 9 feet from Cairo to New Orleans. If such a condition actually did exist, with the boats in operation on the Mississippi, it is fair to assume from the results that it could be made very attractive to private capital. So long as the channel conditions exist as they are, one or two solutions must be made. Either a new type of boat of sufficient power and of little enough depth to navigate the all-year-round channel must be built and put in service, or the channel itself must be kept up to the standard required by law.

On the Warrior River the towboats have always been satisfactory. The self-propelled barges, designed for operation as bulk carriers only, were a dismal failure, and they have been converted into cargo carriers which have proven a good paying investment.

The Warrior River is a completely canalized river, but in no other way is it comparable with the Mississippi River. It has never had any suitable barges, except rented ones; it has never had any highly-developed terminals, and it has always been handicapped by having a rail haul at the upper end, from Birmingham to Birmingham, of 26 miles, which has absorbed such an inordinate portion of the rail-water revenue between New Orleans and Birmingham as to make it almost impossible to create a paying waterway transportation facility.

In addition to this it has been limited in its application of joint rail-water rates to four States from which the produce originating or commodities destined for were not of such a character as to furnish a sufficiently improved revenue to make it profitable. Its activities have largely been confined in the past to the hauling of sulphur, ore, salt, and other bulk commodities upstream, and coal and steel downstream. The officers of the corporation are confident that in time they can work out a solution for the Warrior that will be as satisfactory as that for the Mississippi.

The tonnage on the Warrior has increased from about 8,000 tons per month in 1918 to approximately 24,000 tons per month at the present time. Until the last six months the proportion of downstream tonnage to upstream tonnage was about 75 per cent to 25 per cent. In the last six months this has been changed to such an extent that the upstream is now about 40 per cent of the total. This improvement in upstream

revenues is due to the freight which comes down the Mississippi River on the fast packet boats destined to Mobile and points on the Warrior River, and by the increased amount of freight of this character originating at New Orleans for Warrior points.

The situation offers possibilities that, if the plans for the development as laid before me by the chairman of the board, with the concurrence of his advisers, can be carried out, the Warrior may be made self-supporting.

The tonnage on the Mississippi shows a remarkable state of affairs. In the first three years of its existence, the downstream tonnage, which is the most desirable and most remunerative, never was less than 75 per cent of the total. In the last year and a half, however, this balance has been reversed so that to-day the total amount of freight carried upstream bears a relation of 55 per cent to the 45 per cent carried downstream.

Satisfactory working relations have been established with the principal so-called railroad competitors—that is, the Illinois Central on one side of the river and the Missouri Pacific on the other side of the river—whereby the divisions of accruing revenue for joint hauls are most equitably divided.

The Mississippi-Warrior service has relations with 165 railroads in the United States. The development of its terminal facilities has been slow but rational, and in an increasing measure of efficiency. It serves to some degree a total of 39 States. Canned goods from the Pacific coast come through the Panama Canal, to New Orleans, and thence up the Mississippi River for distribution to the whole Mississippi Valley, cheaper than they can be shipped by rail from the Pacific coast. Cotton from the interior of the country is concentrated and shipped from Memphis and Vicksburg via the Morgan Line to New York and New England points at a saving of 11½ cents per hundred pounds over the direct rail routes. From India, Cuba, South America, Central America come burlaps, sisal, manganese ore, bauxite, nitrate from Chile and potash from Germany, and various and sundry other commodities which are imported through New Orleans and Mobile.

The classified statement of tonnage handled for the last fiscal year shows 183 varieties and under these varieties, after classifying certain products such as wheat, corn, etc., one single classification will include "all other farm products."

The general principle of the fair division of rates which the barge line is contending for is this: That the joint rail and water rate should be 80 per cent of the all-rail rate; out of this 80 per cent rate the railroad generally gets its proportion of its through rate to the point where the freight is transferred to the water carrier. A typical illustration of how this works out is as follows: On the joint rail and water rate from Chicago to New Orleans the rail line would get the revenue which would accrue to it from a haul from Chicago to St. Louis if the haul were all rail.

The barge line absorbs the balance of the differential necessary to make the combined rate 80 per cent of the all-rail rate. This results in about the following on the haul mentioned from Chicago to New Orleans: From Chicago to St. Louis the rail line gets 33½ per cent of its all-rail rate, which is substantially 40 per cent of the total barge-rail rate. There are various absorptions which one or the other bears in accordance with certain well-defined rules.

The boats in operation on the Mississippi River are very powerful, and are known as the twin-screw, tunnel type; they have a capacity of 2,400 horsepower, and can move downstream eight barges carrying 2,000 tons each, or one single trip will carry what would require 10 freight trains of 80 cars each; the average speed downstream is about 5 miles per hour. The same towboat can carry upstream 9,000 tons at 2½ miles per hour.

The towboats on the Warrior are very similar but of a smaller type and have a pushing capacity of about 1,000 horsepower.

The fast express steamers, leaving St. Louis on Friday, make the trip to New Orleans in six days, and the trip upstream in nine days. These self-propelled barges have a capacity of 1,500 tons. They are well suited for the trade in which they are engaged.

There is just one thought which I wish to leave in the minds of my audience, and that is this:

Since it seems to be an established fact that waterway transportation will not come back of its own volition, and since the Government has embarked upon this project of demonstration that waterway transportation, in conjunction with rail and highway, is feasible and economical, and in the public interest; then, upon the success of this demonstration rests the policy to be pursued by the Congress as to whether or not any more money shall be spent making streams navigable. If this demonstration proves a success, if the conditions precedent to success are created, if the line proves a money maker, private capital will invest in that particular service and we will have demonstrated on that particular river that our money spent in developing it as a transportation facility has not been wasted. We could then sell the line and place it in the hands of private operators, and, with the money thus obtained, create conditions precedent to success on other streams.

It would not require many demonstrations to establish most of the conditions precedent to success upon all other navigable rivers. At least there would have been formed a basis upon which private capital could embark upon other rivers in the rehabilitation of common water-rail carriers without the necessity of suffering the long periods of financial losses which would otherwise have been sustained by them, if, indeed, they would have attempted to create such conditions in the establishment of a successful line.

I can well understand the insistent demand for the establishment of lines on other rivers, but the proponents of such enterprises should wait patiently until the success or failure of the Mississippi line has been demonstrated. If, for no other reason, they should do so in order to get the benefit of the experiences resulting from the building up of the Mississippi service and being able to avoid the mistakes which have been made.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened.

CONVENTION WITH FRANCE TO AID IN PREVENTION OF SMUGGLING

In executive session this day, the following convention was ratified, and on motion of Mr. BORAH the injunction of secrecy was removed therefrom:

To the Senate:

I transmit, with a view to receiving the advice and consent of the Senate to its ratification, a convention between the United States and the French Republic to aid in the prevention of the smuggling of alcoholic liquors into the United States, signed June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE,
Washington, December 8, 1924.

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification if his judgment approve thereof, a convention to aid in the prevention of the smuggling of alcoholic liquors into the United States, signed between the United States and the French Republic on June 30, 1924.

Respectfully submitted.

CHARLES E. HUGHES.

DEPARTMENT OF STATE,
Washington, December 5, 1924.

The President of the United States of America and the President of the French Republic being desirous of avoiding any difficulties which might arise between them in connection with the laws in force in the United States on the subject of alcoholic beverages, have decided to conclude a convention for that purpose, and have appointed as their plenipotentiaries:

The President of the United States of America; Mr. Charles Evans Hughes, Secretary of State of the United States; and

The President of the French Republic; Mr. J. J. Jusserand, ambassador of the French Republic to the United States;

Who, having communicated their full powers found in good and due form, have agreed as follows:

ARTICLE I

The high contracting parties respectively retain their rights and claims, without prejudice by reason of this agreement, with respect to the extent of their territorial jurisdiction.

ARTICLE II

(1) The President of the French Republic agrees that France will raise no objection to the boarding of private vessels under the French flag outside the limits of territorial waters by the authorities of the United States, its Territories, or possessions, in order that inquiries may be addressed to those on board and an examination be made of the ship's papers for the purpose of ascertaining whether the vessel or those on board are endeavoring to import or have imported alcoholic beverages into the United States, its Territories, or possessions in violation of the laws there in force. When such inquiries and examination show a reasonable ground for suspicion, a search of the vessel may be effected.

(2) If there is reasonable cause for belief that the vessel has committed or is committing or attempting to commit an offense against the laws of the United States, its Territories, or possessions prohibiting the importation of alcoholic beverages, the

vessel may be seized and taken into a port of the United States, its Territories, or possessions for adjudication in accordance with such laws.

(3) The rights conferred by this article shall not be exercised at a greater distance from the coast of the United States, its Territories, or possessions than can be traversed in one hour by the vessel suspected of endeavoring to commit the offense. In cases, however, in which the liquor is intended to be conveyed to the United States, its Territories, or possessions by a vessel other than the one boarded and searched, it shall be the speed of such other vessel and not the speed of the vessel boarded which shall determine the distance from the coast at which the right under this article can be exercised.

ARTICLE III

No penalty or forfeiture under the laws of the United States shall be applicable or attach to alcoholic liquors or to vessels or persons by reason of the carriage of such liquors when such liquors are listed as sea stores or cargo destined for a port foreign to the United States, its Territories, or possessions on board French vessels voyaging to or from ports of the United States or its Territories or possessions or passing through the territorial waters thereof, and such carriage shall be as now provided by law with respect to the transit of such liquors through the Panama Canal, provided that such liquors shall be kept under seal continuously while the vessel on which they are carried remains within said territorial waters and that no part of such liquors shall at any time or place be unladen within the United States, its Territories, or possessions.

ARTICLE IV

Any claim by a French vessel for compensation on the grounds that it has suffered loss or injury through the improper or unreasonable exercise of the rights conferred by Article II of this treaty or on the ground that it has not been given the benefit of Article III shall be referred for the joint consideration of two persons, one of whom shall be nominated by each of the high contracting parties.

Effects shall be given to the recommendations contained in any such joint report. If no joint report can be agreed upon, the claim shall be referred to an umpire selected by the two Governments; should they fail to agree on the choice of that umpire, it shall be referred to the Permanent Court of Arbitration at The Hague described in the convention for the pacific settlement of international disputes, concluded at The Hague, October 18, 1907. The arbitral tribunal shall be constituted in accordance with article 87 (Chapter IV) and with article 59 (Chapter III) of the said convention. The proceedings shall be regulated by so much of Chapter IV of the said convention and of Chapter III thereof (special regard being had for articles 70 and 74, but excepting articles 53 and 54) as the tribunal may consider to be applicable and to be consistent with the provisions of this agreement. All sums of money which may be awarded by the tribunal on account of any claim shall be paid within 18 months after the date of the final award without interest and without deduction, save as hereafter specified. Each Government shall bear its own expenses. The expenses of the tribunal shall be defrayed by a ratable deduction of the amount of the sums awarded by it, at a rate of 5 per cent on such sums, or at such lower rate as may be agreed upon between the two Governments; the deficiency, if any, shall be defrayed in equal moieties by the two Governments.

ARTICLE V

This treaty shall be subject to ratification and shall remain in force for a period of one year from the date of the exchange of ratifications.

Three months before the expiration of the said period of one year, either of the high contracting parties may give notice of its desire to propose modifications in the terms of the treaty.

If such modifications have not been agreed upon before the expiration of the term of one year mentioned above, the treaty shall lapse.

If no notice is given on either side of the desire to propose modifications, the treaty shall remain in force for another year, and so on automatically, but subject always in respect of each such period of a year to the right on either side to propose as provided above three months before its expiration modifications in the treaty, and to the provision that if such modifications are not agreed upon before the close of the period of one year, the treaty shall lapse.

ARTICLE VI

In the event that either of the high contracting parties shall be prevented either by judicial decision or legislative action from giving full effect to the provisions of the present treaty

the said treaty shall automatically lapse, and, on such lapse or whenever this treaty shall cease to be in force, each high contracting party shall enjoy all the rights which it would have possessed had this treaty not been concluded.

The present convention shall be duly ratified by the President of the United States of America, by and with the advice and consent of the Senate thereof, and by the President of the French Republic in accordance with the constitutional laws of France; and the ratifications shall be exchanged at Washington as soon as possible.

In witness whereof, the respective plenipotentiaries have signed the present convention in duplicate in the English and French languages and have thereunto affixed their seals.

Done at the city of Washington this 30th day of June, 1924.

[SEAL.]

[SEAL.]

CHARLES EVANS HUGHES.
JUSSEFAND.

CONVENTION WITH THE NETHERLANDS TO AID IN THE PREVENTION OF SMUGGLING

In executive session this day, the following convention was ratified, and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

To the Senate:

I transmit, with a view to receiving the advice and consent of the Senate to its ratification, a convention between the United States and the Netherlands to aid in the prevention of the smuggling of alcoholic liquors into the United States, signed August 21, 1924.

For the information of the Senate I transmit also copies of notes exchanged at the time of the signature of the convention between the Secretary of State and the Minister of the Netherlands.

CALVIN COOLIDGE.

THE WHITE HOUSE,

Washington, December 8, 1924.

DEPARTMENT OF STATE,
Washington, December 5, 1924.

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a convention between the United States and the Netherlands to aid in the prevention of the smuggling of alcoholic beverages into the United States, signed on August 21, 1924.

At the time of the signature of the convention notes were exchanged between the Secretary of State and the Minister of the Netherlands, stating the understanding between the two Governments that in the event of the adhesion by the Government of the United States to the protocol of December 16, 1920, under which the Permanent Court of International Justice has been created at The Hague, the Government of the United States will not be averse to considering a modification of the convention or the making of a separate agreement, providing that claims mentioned in Article IV of that convention which can not be settled in the way indicated in the first paragraph of that article shall be referred to the Permanent Court of International Justice instead of to the Permanent Court of Arbitration.

Copies of these notes are inclosed for the information of the Senate.

Respectfully submitted.

The President of the United States of America and Her Majesty the Queen of the Netherlands, being desirous of avoiding any difficulties which might arise between them in connection with the laws in force in the United States on the subject of alcoholic beverages, have decided to conclude a convention for that purpose and have appointed as their plenipotentiaries:

The President of the United States of America: Charles Evans Hughes, Secretary of State of the United States; and Her Majesty the Queen of the Netherlands: Jonkheer Dr. A. C. D. de Graeff, her envoy extraordinary and minister plenipotentiary to the United States of America;

Who, having communicated their full powers found in good and due form, have agreed as follows:

ARTICLE I

The high contracting parties declare that it is their firm intention to uphold the principle that 3 marine miles extending from the coastline outward and measured from low-water mark constitute the proper limits of territorial waters.

ARTICLE II

(1) Her Majesty agrees that she will raise no objection to the boarding of private vessels under the Netherlands flag outside the limits of territorial waters by the authorities of the United States, its Territories, or possessions in order that inquiries may be addressed to those on board and an examination be made of the ship's papers for the purpose of ascertaining whether the vessel or those on board are endeavoring to import or have imported alcoholic beverages into the United States, its Territories, or possessions in violation of the laws there in force. When such inquiries and examination show a reasonable ground for suspicion, a search of the vessel may be initiated.

(2) If there is reasonable cause for belief that the vessel has committed or is committing or attempting to commit an offense against the laws of the United States, its Territories, or possessions prohibiting the importation of alcoholic beverages, the vessel may be seized and taken into a port of the United States, its Territories, or possessions for adjudication in accordance with such laws.

(3) The rights conferred by this article shall not be exercised at a greater distance from the coast of the United States, its Territories or possessions, than can be traversed in one hour by the vessel suspected of endeavoring to commit the offense. In cases, however, in which the liquor is intended to be conveyed to the United States, its Territories or possessions, by a vessel other than the one boarded and searched, it shall be the speed of such other vessel and not the speed of the vessel boarded which shall determine the distance from the coast at which the right under this article can be exercised.

ARTICLE III

No penalty or forfeiture under the laws of the United States shall be applicable or attach to alcoholic liquors or to vessels or persons by reason of the carriage of such liquors when such liquors are listed as sea stores or cargo destined for a port foreign to the United States, its Territories or possessions, on board Netherlands vessels voyaging to or from ports of the United States, or its Territories or possessions, or passing through the territorial waters thereof, and such carriage shall be as now provided by law with respect to the transit of such liquors through the Panama Canal, provided that such liquors shall be kept under seal continuously while the vessel on which they are carried remains within said territorial waters and that no part of such liquors shall at any time or place be unladen within the United States, its Territories or possessions.

ARTICLE IV

Any claim by a Netherlands vessel for compensation on the grounds that it has suffered loss or injury through the improper or unreasonable exercise of the rights conferred by Article II of this treaty or on the ground that it has not been given the benefit of Article III shall be referred for the joint consideration of two persons, one of whom shall be nominated by each of the high contracting parties.

Effect shall be given to the recommendations contained in any such joint report. If no joint report can be agreed upon, the claim shall be referred to the Permanent Court of Arbitration at The Hague described in the Convention for the Pacific Settlement of International Disputes, concluded at The Hague October 18, 1907. The arbitral tribunal shall be constituted in accordance with article 87 (Ch. IV) and with article 59 (Ch. III) of the said convention. The proceedings shall be regulated by so much of Chapter IV of the said convention and of Chapter III thereof (special regard being had for arts. 70 and 74, but excepting arts. 53 and 54) as the tribunal may consider to be applicable and to be consistent with the provisions of this agreement. All sums of money which may be awarded by the tribunal on account of any claim shall be paid within 18 months after the date of the final award without interest and without deduction, save as hereafter specified. Each Government shall bear its own expenses. The expenses of the tribunal shall be defrayed by a ratable deduction of the amount of the sums awarded by it, at a rate of 5 per cent on such sums, or at such lower rate as may be agreed upon between the two Governments; the deficiency, if any, shall be defrayed in equal moieties by the two Governments.

ARTICLE V

This treaty shall be subject to ratification and shall remain in force for a period of one year from the date of the exchange of ratifications.

Three months before the expiration of the said period of one year either of the high contracting parties may give notice of its desire to propose modifications in the terms of the treaty.

If such modifications have not been agreed upon before the expiration of the term of one year mentioned above, the treaty shall lapse.

If no notice is given on either side of the desire to propose modifications, the treaty shall remain in force for another year, and so on automatically, but subject always in respect of each such period of a year to the right on either side to propose as provided above, three months before its expiration, modifications in the treaty, and to the provision that if such modifications are not agreed upon before the close of the period of one year the treaty shall lapse.

ARTICLE VI

In the event that either of the high contracting parties shall be prevented either by judicial decision or legislative action from giving full effect to the provisions of the present treaty, the said treaty shall automatically lapse, and on such lapse or whenever this treaty shall cease to be in force each high contracting party shall enjoy all the rights which it would have possessed had this treaty not been concluded.

The present convention shall be duly ratified by the President of the United States of America, by and with the advice and consent of the Senate thereof, and by Her Majesty the Queen of the Netherlands; and the ratifications shall be exchanged at Washington as soon as possible.

In witness whereof the respective plenipotentiaries have signed the present convention in duplicate in the English and Dutch languages and have thereunto affixed their seals.

Done at the city of Washington this 21st day of August, in the year of our Lord 1924.

CHARLES EVANS HUGHES, [SEAL.]
A. DE GRAEFF, [SEAL.]

EXCHANGE OF NOTES

ROYAL NETHERLANDS LEGATION,
Washington, D. C., August 21, 1924.

HON. CHARLES E. HUGHES,
Secretary of State, Washington, D. C.

SIR: In connection with the signing to-day of a convention pertaining to avoid difficulties which might arise between our two Governments in connection with the laws in force in the United States on the subject of alcoholic beverages and in pursuance of our previous correspondence on the subject, I have the honor to inform you that the Royal Government understands that in the event of the adhesion by the United States to the protocol of December 16, 1920, under which the Permanent Court of International Justice has been created at The Hague, the Government of the United States will not be averse to considering a modification of the said convention, or the making of a separate agreement, providing that claims as mentioned in Article IV of that convention which can not be settled in the way as indicated in the first paragraph of that article shall be referred to the Permanent Court of International Justice instead of the Permanent Court of Arbitration.

I shall be glad to have you confirm this understanding on behalf of your Government.

Accept, sir, the renewed assurances of my highest consideration.

A. DE GRAEFF,
Netherlands Minister.

AUGUST 21, 1924.

Jonkheer Dr. A. C. D. DE GRAEFF,
Minister of the Netherlands.

SIR: I have the honor to acknowledge the receipt of your note of to-day's date, in which you were so good as to inform me, in connection with the signing this day of the convention between the United States and the Netherlands to aid in the prevention of the smuggling of intoxicating liquors into the United States, that the Government of the Netherlands understands that in the event of the adhesion by the Government of the United States to the protocol of December 16, 1920, under which the Permanent Court of International Justice has been created at The Hague, the Government of the United States will not be averse to considering a modification of the said convention, or the making of a separate agreement, providing that claims mentioned in Article IV of that convention which can not be settled in the way indicated in the first paragraph of that article, shall be referred to the Permanent Court of International Justice instead of to the Permanent Court of Arbitration.

Complying with your request for confirmation of this understanding, I have the honor to state that the Netherlands Government's understanding of the attitude of the Government

of the United States in this respect is correct, and that in the event that the Senate gives its assent to the proposal made by the President on February 24, 1923, that it consent under certain stated conditions to the adhesion by the United States to the protocol of December 16, 1920, under which the Permanent Court of International Justice has been created at The Hague, the Government of the United States will not be averse to considering a modification of the convention this day signed, or the making of a separate agreement, providing for the reference of claims mentioned in Article IV of the convention which can not be settled in the way indicated in the first paragraph of that article, to the Permanent Court of International Justice instead of to the Permanent Court of Arbitration.

Accept, sir, the renewed assurances of my highest consideration.

CHARLES E. HUGHES.

CONVENTION WITH CANADA TO AID IN THE PREVENTION OF SMUGGLING

In executive session this day, the following convention was ratified, and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

To the Senate:

To the end that I may receive the advice and consent of the Senate to ratification, I transmit herewith a convention signed June 6, 1924, between the United States and His Britannic Majesty in respect to the Dominion of Canada, to aid in suppressing smuggling operations along the border between the United States and the Dominion of Canada and in the arrest and prosecution of persons violating the narcotic laws of either Government.

CALVIN COOLIDGE.

THE WHITE HOUSE, June 6, 1924.

THE PRESIDENT:

The undersigned the Secretary of State has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a convention signed June 6, 1924, between the United States and His Britannic Majesty, in respect of the Dominion of Canada, to aid in suppressing smuggling operations along the boundary between the United States and the Dominion of Canada and in the arrest and prosecution of persons violating the narcotic laws of either Government.

Respectfully submitted.

CHARLES E. HUGHES.

DEPARTMENT OF STATE,

Washington, June 6, 1924.

The United States of America and His Majesty the King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Emperor of India, in respect of the Dominion of Canada, being desirous of suppressing smuggling operations along the boundary between the United States of America and the Dominion of Canada, and of assisting in the arrest and prosecution of persons violating the narcotic laws of either Government, and of providing as to the omission of penalties and forfeitures in respect to the carriage of alcoholic liquors through Alaska into the Yukon Territory, have agreed to conclude a convention to give effect to these purposes and have named as their plenipotentiaries:

The President of the United States of America: Charles Evans Hughes, Secretary of State of the United States; and

His Britannic Majesty, in respect of the Dominion of Canada: The Hon. Ernest Lapointe, K. C., a member of His Majesty's Privy Council for Canada and Minister of Justice in the Government of that Dominion;

Who, having communicated to each other their respective full powers, which were found to be in due and proper form, have agreed upon the following articles:

ARTICLE I

The high contracting parties agree that the appropriate officers of the Governments of the United States of America and of Canada, respectively, shall be required to furnish upon request to duly authorized officers of the Government, information concerning clearances of vessels or the transportation of cargoes, shipments, or loads of articles across the international boundary when the importation of the cargo carried or of articles transported by land is subject to the payment of duties; also to furnish information respecting clearances of vessels to any ports when there is ground to suspect that the owners or persons in possession of the cargo intend to smuggle it into the territory of the United States or of Canada.

ARTICLE II

The high contracting parties agree that clearance from the United States or from Canada shall be denied to any vessel carrying cargo consisting of articles the importation of which into the territory of the United States or of Canada, as the case may be, is prohibited, when it is evident from the tonnage, size, and general character of the vessel, or the length of the voyage and the perils or conditions of navigation attendant upon it, that the vessel will be unable to carry its cargo to the destination proposed in the application for clearance.

ARTICLE III

Each of the high contracting parties agrees with the other that property of all kinds in its possession which, having been stolen and brought into the territory of the United States or of Canada, is seized by its customs authorities shall, when the owners are nationals of the other country, be returned to such owners, subject to satisfactory proof of such ownership and the absence of any collusion, and subject moreover to payment of the expenses of the seizure and detention and to the abandonment of any claims by the owners against the customs, or the customs officers, warehousemen, or agents, for compensation or damages for the seizure, detention, warehousing, or keeping of the property.

ARTICLE IV

The high contracting parties reciprocally agree to exchange information concerning the names and activities of all persons known or suspected to be engaged in violations of the narcotic laws of the United States or of Canada, respectively.

ARTICLE V

It is agreed that the customs and other administrative officials of the respective Governments of the United States and of Canada shall upon request be directed to attend as witnesses and to produce such available records and files or certified copies thereof as may be considered essential to the trial of civil or criminal cases and as may be produced compatibly with the public interest.

The cost of transcripts of records, depositions, certificates, and letters rogatory in civil or criminal cases, and the cost of first-class transportation both ways, maintenance, and other proper expenses involved in the attendance of such witnesses shall be paid by the nation requesting their attendance at the time of their discharge by the court from further attendance at such trial. Letters rogatory and commissions shall be executed with all possible dispatch and copies of official records or documents shall be certified promptly by the appropriate officials in accordance with the provisions of the laws of the respective countries.

ARTICLE VI

The following offenses are added to the list of offenses numbered 1 to 3 in Article 1 of the treaty concluded between the United States and Great Britain on May 18, 1908, with reference to reciprocal rights for the United States and Canada in the matters of conveyance of prisoners and wrecking and salvage, that is to say:

4. Offenses against the narcotic laws of the respective Governments.

ARTICLE VII

No penalty or forfeiture under the laws of the United States shall be applicable or attached to alcoholic liquors or to vessels, vehicles, or persons by reason of the carriage of such liquors when they are in transit under guard by Canadian authorities through the territorial waters of the United States to Skagway, Alaska, and thence by the shortest route, via the White Pass and Yukon Railway, upward of 20 miles to Canadian territory, and such transit shall be as now provided by law with respect to the transit of alcoholic liquors through the Panama Canal or on the Panama Railroad, provided that such liquors shall be kept under seal continuously while the vessel or vehicle on which they are carried remains within the United States, its Territories or possessions, and that no part of such liquors shall at any time or place be unladen within the United States, its Territories or possession.

ARTICLE VIII

This convention shall be ratified, and the ratifications shall be exchanged at Washington as soon as possible. The convention shall come into effect at the expiration of 10 days from the date of the exchange of ratifications, and it shall remain in force for one year. If upon the expiration of one year after the convention shall have been in force no notice is given by either party of a desire to terminate the same, it shall continue in force until 30 days after either party shall have given notice to the other of a desire to terminate the convention.

In witness whereof the respective plenipotentiaries have signed the present convention in duplicate and have thereunto affixed their seals.

Done at the city of Washington this 6th day of June, 1924.

ERNEST LAPOINTE.

CONVENTION WITH PANAMA TO AID IN THE PREVENTION OF SMUGGLING

In executive session this day, the following convention was ratified, and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

To the Senate of the United States:

To the end that I may receive the advice and consent of the Senate to ratification, I transmit herewith a convention between the United States and Panama to aid in preventing the smuggling of intoxicating liquors into the United States, signed June 6, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, June 6, 1924.

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approves thereof, a convention signed June 6, 1924, between the United States and Panama to aid in preventing the smuggling of intoxicating liquors into the United States.

Respectfully submitted.

CHARLES E. HUGHES.

DEPARTMENT OF STATE,
Washington, June 6, 1924.

The President of the United States of America and the President of the Republic of Panama being desirous of avoiding any difficulties which might arise between them in connection with the laws in force in the United States on the subject of alcoholic beverages have decided to conclude a convention for that purpose, and have appointed their plenipotentiaries:

The President of the United States of America, Charles Evans Hughes, Secretary of State of the United States of America, and

The President of Panama, Ricardo J. Alfaro, Envoy Extraordinary and Minister Plenipotentiary of the Republic of Panama in Washington.

Who, having communicated their full powers found in good and due form, have agreed as follows:

ARTICLE I

The high contracting parties declare that it is their firm intention to uphold the principle that 3 marine miles extending from the coast line outwards and measured from low-water mark constitutes the proper limits of territorial waters.

ARTICLE II

(1) The President of Panama agrees that Panama will raise no objection to the boarding of private vessels under the Panamanian flag outside the limits of territorial waters by the authorities of the United States, its Territories, or possessions, in order that inquiries may be addressed to those on board and an examination be made of the ship's papers for the purpose of ascertaining whether the vessel or those on board are endeavoring to import or have imported alcoholic beverages into the United States, its Territories, or possessions in violation of the laws there in force. When such inquiries and examinations show a reasonable ground for suspicion, a search of the vessel may be initiated.

(2) If there is reasonable cause for belief that the vessel has committed or is committing or attempting to commit an offense against the laws of the United States, its Territories, or possessions prohibiting the importation of alcoholic beverages, the vessel may be seized and taken into a port of the United States, its Territories, or possessions for adjudication in accordance with such laws.

(3) The rights conferred by this article shall not be exercised at a greater distance from the coast of the United States, its Territories, or possessions that can be traversed in one hour by the vessel suspected of endeavoring to commit the offense, and shall not be exercised in waters adjacent to territorial waters of the Canal Zone. In cases, however, in which liquor is intended to be conveyed to the United States, its Territories, or possessions by a vessel other than the one boarded and searched, it shall be the speed of such other vessel and not the

speed of the vessel boarded which shall determine the distance from the coast at which the right under this article can be exercised.

ARTICLE III

No penalty or forfeiture under the laws of the United States shall be applicable or attach to alcoholic liquors or to vessels or persons by reason of the carriage of such liquors when such liquors are listed as sea stores or cargo destined for a port foreign to the United States, its Territories or possessions, on board Panaman vessels voyaging to or from ports of the United States, or its Territories or possessions or passing through the territorial waters thereof, and such carriage shall be as now provided by law with respect to the transit of such liquors through the Panama Canal, provided that such liquors shall be kept under seal continuously while the vessel on which they are carried remains within said territorial waters and that no part of such liquors shall at any time or place be unloaded within the United States, its Territories or possessions.

ARTICLE IV

Any claim by a Panaman vessel for compensation on the grounds that it has suffered loss or injury through the improper or unreasonable exercise of the rights conferred by Article II of this treaty or on the ground that it has not been given the benefit of Article III shall be referred for the joint consideration of two persons, one of whom shall be nominated by each of the high contracting parties.

Effect shall be given to the recommendations contained in any such joint report. If no joint report can be agreed upon, the claim shall be referred to the Permanent Court of Arbitration, at The Hague, described in the convention for the pacific settlement of international disputes, concluded at The Hague October 18, 1907. The arbitral tribunal shall be constituted in accordance with article 87 (Chapter IV) and with article 59 (Chapter III) of the said convention. The proceedings shall be regulated by so much of Chapter IV of the said convention and of Chapter III thereof (special regard being had for articles 70 and 74, but excepting articles 53 and 54) as the tribunal may consider to be applicable and to be consistent with the provisions of this agreement. All sums of money which may be awarded by the tribunal on account of any claim shall be paid within 18 months after the date of the final award, without interest and without deduction save as hereafter specified. Each Government shall bear its own expenses. The expenses of the tribunal shall be defrayed by a ratable deduction of the amount of the sums awarded by it, at a rate of 5 per cent on such sums or at such lower rate as may be agreed upon between the two Governments; the deficiency, if any, shall be defrayed in equal moieties by the two Governments.

ARTICLE V

This treaty shall be subject to ratification and shall remain in force for a period of one year from the date of the exchange of ratifications.

Three months before the expiration of the said period of one year either of the high contracting parties may give notice of its desire to propose modifications in the terms of the treaty.

If such modifications have not been agreed upon before the expiration of the term of one year mentioned above, the treaty shall lapse.

If no notice is given on either side of the desire to propose modifications, the treaty shall remain in force for another year, and so on automatically, but subject always in respect of each such period of a year to the right on either side to propose, as provided above, three months before its expiration modifications in the treaty, and to the provision that if such modifications are not agreed upon before the close of the period of one year the treaty shall lapse.

ARTICLE VI

In the event that either of the high contracting parties shall be prevented, either by judicial decision or legislative action, from giving full effect to the provisions of the present treaty the said treaty shall automatically lapse; and, on such lapse or whenever this treaty shall cease to be in force, each high contracting party shall enjoy all the rights which it would have possessed had this treaty not been concluded.

The present convention shall be duly ratified by the President of the United States of America, by and with the advice and consent of the Senate thereof, and by the President of Panama, in accordance with the requirements of the Panaman constitution; and the ratifications shall be exchanged at Washington as soon as possible.

In witness whereof the respective plenipotentiaries have signed the present convention in duplicate and have thereunto affixed their seals.

Done at the city of Washington, this 6th day of June, A. D. 1924.

HOUSE OF REPRESENTATIVES

FRIDAY, December 12, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, whisper to us the language of the eternal, that we may be in sympathy with things that are of infinite value. Keep us in harmony with Thy plan and enable us to get at the very soul of things. Carry our manhood to its highest point, and help it to conform to the best that we know. Give range and vision to the thoughts that we think and to the lives that we live, and may they be according to Thy will. Let us understand that obedience to vision means consecration to duty. Allow no cloud to flood it, but let the light of Thy Spirit direct it. In the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

CLAIMS UPON THE PRIVATE CALENDAR

Mr. EDMONDS. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House for the consideration of claims upon the Private Calendar.

Mr. MCKENZIE. Mr. Speaker, I desire to ask the majority leader a question in regard to the Private Calendar, with the permission of the gentleman from Pennsylvania [Mr. EDMONDS]. As I understand it, to-day will be taken up with the consideration of claims, and not the Private Calendar as it is printed, but bills from the Committee on Claims.

Mr. LONGWORTH. That is the understanding.

Mr. MCKENZIE. Now, Mr. Speaker, on that Private Calendar there are a large number of bills that have been reported

from the Committee on Military Affairs and other committees of the House, and I would like to ask the gentleman from Ohio what hope he can hold out to us as to when we may have an opportunity to consider the bills reported from the Committee on Military Affairs and other committees now on the Private Calendar?

Mr. LONGWORTH. I will say to the gentleman that no gentleman has spoken to me about that up until now, and I have not given it any thought. I think it will be well to have a day sometime, without interfering with appropriation bills.

Mr. McKENZIE. I have been laboring under the impression that the calendar would be called as printed, and would not be given over wholly to claims. Of course, I understand that under the rules it is properly claims day, but I have been laboring under the impression that we would have a right to call up our bills, and for that reason I had not taken up the matter with the gentleman from Ohio. But how would it do to take up the Private Calendar to-morrow and consider other bills than claims?

Mr. LONGWORTH. I will give some consideration to that to-day during the consideration of claims, and I may ask unanimous consent to-morrow to bring up those bills, depending on how we proceed with the consideration of these claims to-day.

Mr. McKENZIE. It is important, of course, that we know now that we are not going to consider bills reported from the Committee on Military Affairs.

Mr. LONGWORTH. May I say this to the gentleman from Illinois: I would like to consult with the minority leader on that subject during the day, and we can perhaps arrive at some agreement.

Mr. McKENZIE. It is understood, however, that bills reported to the Committee on Military Affairs will not be taken up to-day?

Mr. LONGWORTH. Yes.

Mr. CRAMTON. And that only bills will be taken up from the Committee on Claims or War Claims Committee?

Mr. LONGWORTH. From the Committee on Claims.

The SPEAKER. The gentleman from Pennsylvania moves that the House resolve itself into Committee of the Whole House for the consideration of claims upon the Private Calendar.

Mr. LINDSAY. Mr. Speaker, I rise to a point of order. There is a very important claim bill on this calendar which is to be considered to-day, and I think it is necessary to have the Members present. I make the point of no quorum.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present. Obviously, there is not.

Mr. EDMONDS. Mr. Speaker, I move a call of the House. The motion was agreed to.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 6]

Anderson	Funk	Magee, Pa.	Smithwick
Anthony	Gallivan	Manlove	Snell
Berger	Geran	Michaelson	Snyder
Black, Tex.	Gifford	Miller, Ill.	Stalker
Britten	Glatfelter	Montague	Sullivan
Buckley	Graham	Mooney	Sweet
Byrnes, S. C.	Harrison	Morin	Taylor, Colo.
Carter	Hastings	Nelson, Wis.	Temple
Celler	Hawes	Newton, Mo.	Thompson
Clancy	Howard, Nebr.	Newton, Minn.	Tilson
Clark, Fla.	Jacobstein	Nolan	Tincher
Cole, Ohio	Jeffers	O'Brien	Trakham
Collins	Johnson, S. Dak.	O'Connell, R. I.	Upshaw
Connolly, Pa.	Kahn	Oliver, N. Y.	Vare
Cornling	Kelly	Patterson	Ward, N. C.
Croft	Kendall	Perlman	Weller
Curry	Kent	Phillips	Welsh
Davey	Kless	Porter	White, Me.
Dempsey	Kincheloe	Quayle	Williams, Mich.
Dickinson, Iowa	Knutson	Ransley	Williams, Ill.
Dickstein	Langley	Rayburn	Winslow
Dominick	Larson, Minn.	Reed, W. Va.	Wolff

Eagan	Logan	Rogers, Mass.	Wurzbach
Fairchild	McLeod	Rogers, N. H.	Zihlman
Fish	McNulty	Rosenbloom	
Fitzgerald	McSwain	Schall	
Fredericks	Madden	Sherwood	

The SPEAKER. Three hundred and twenty-two Members have answered to their names, a quorum.

Mr. EDMONDS. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

The SPEAKER. The gentleman from Pennsylvania moves that the House resolve itself into Committee of the Whole House for the consideration of claims upon the Private Calendar.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House for the consideration of claims upon the Private Calendar, with Mr. SANDERS of Indiana in the chair.

RELIEF OF LOUIS LEAVITT

Mr. EDMONDS. Mr. Chairman, I call up for consideration Senate bill 88, for the relief of Louis Leavitt.

The CHAIRMAN. The gentleman from Pennsylvania calls up a bill, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc. That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Louis Leavitt, out of any money in the Treasury not otherwise appropriated, the sum of \$620,623.33 in reimbursement of certain moneys paid by him to the United States and for certain expenses incurred under circumstances set forth in the communication of the President of the United States to the Speaker of the House of Representatives dated the 6th day of May, 1922, and in the accompanying report of the Director of the Budget, House Document No. 313, Sixty-seventh Congress, second session.

With the following committee amendment:

That Louis Leavitt, of Brooklyn, N. Y., is hereby authorized to bring suit against the United States to recover damages for any loss or losses which he may have suffered through action by governmental agencies, acting under authority of the Government, had in connection with the purchase by Louis Leavitt of surplus goods of the War Department and which were referred to in the opinion of the Attorney General dated December 23, 1921. Jurisdiction is hereby conferred upon the Court of Claims of the United States to hear, consider, and determine such action upon its merits and according to the law which governs the principles of liability that prevail between private parties, but only so far as is herein indicated, and in accordance with the practice pertaining to such action between private parties, and to enter decree or judgment against the United States for the amount of such damages as may be found due to said Louis Leavitt, if any: *Provided, however,* That such right to sue, as is hereby granted, shall not apply to any interest, nor to any claim for damages resulting from any criminal prosecution of the said Louis Leavitt on a charge of violating the penal laws of the United States: *Provided,* That such action shall be brought and commenced within four months from the date that this act becomes effective: *And provided further,* That no judgment shall be rendered for more than \$620,623.33.

SEC. 2. That upon final determination of such cause if a decree or judgment is rendered against the United States, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, a sum sufficient to pay final judgment, which shall be paid to said Louis Leavitt or his duly authorized attorneys of record by the Secretary of the Treasury upon the presentation of a duly authenticated copy of such final decree or judgment.

Mr. EDMONDS. Mr. Chairman and gentleman of the House—

Mr. BLANTON. Mr. Chairman, I make a point of order.

The CHAIRMAN. The gentleman from Texas will state his point of order.

Mr. BLANTON. I make it primarily to get a ruling of the Chair. The Committee on Claims, since the rule was adopted by the House creating one appropriating committee, has been held, in one instance, by one chairman, Mr. Campbell presiding, to have appropriating power within its jurisdiction. I would like for the present occupant of the chair to pass upon that ruling.

I make the point of order, first, that the rule which created our appropriating committee did not leave appropriating jurisdiction in the Committee on Claims. I make this point of order merely to get a ruling from the present chairman and to have an additional authority backing up, if it does back up, the former ruling.

I make the further point of order, Mr. Chairman, which has not yet been passed upon, that in no event has the Committee on Claims the jurisdiction to appropriate to meet a contingency that is wholly undetermined and that may never happen. For instance, the present bill confers jurisdiction on the Court of Claims to hear and determine a certain claim against the United States, and then the committee goes further and says that in case a year from now or 5 years from now or 10 years from now, as the case may be, the Court of Claims should render a judgment, so long as it is under \$620,623.33, then in that case there shall be appropriated out of the Treasury such sum of money as will pay off that judgment. My point of order is that the Committee on Claims under no circumstances has jurisdiction to appropriate money when it may be beyond the term of this Congress, when it may be beyond the term of the next Congress, when it may be beyond the term of three or

four or five or six succeeding Congresses. That is a very important question, Mr. Chairman. That is a very large power to confer upon the Committee on Claims—to say that they can appropriate an indeterminate sum that may never be called forth out of the Treasury for years to come—and I hope the Chair will give the question careful consideration before rendering a decision.

Mr. EDMONDS. Mr. Chairman, answering the gentleman from Texas, about three years ago the matter of the appropriating power of the committee was thoroughly gone into, and it was decided by the then chairman, Mr. Campbell, of Kansas, that the committee had appropriating power. As to the policy of asking the Court of Claims to pay a judgment against the Government and giving them power to do so, that has been customary in this House for years past. It has been done hundreds of times to my knowledge, and therefore I do not see anything in the gentleman's point of order. We are doing nothing here that has not been done in the past, and I can not understand how he can advance any reason why it should be opposed in the future. The Committee on Claims has prepared the report on this bill and the House acts on it. The House itself will decide whether they wish to approve of the Court of Claims paying this judgment. This procedure has been before the House, as I say, many times. The House has often passed bills allowing the Court of Claims to satisfy a judgment, and therefore there is nothing new in the bill which we are presenting to-day.

Mr. CHINDBLOM. Mr. Chairman, I merely want to call the attention of the Chair to the fact that the gentleman from Texas [Mr. BLANTON]—inadvertently, perhaps—said that the bill provides that in the event there is a finding and a judgment in the Court of Claims there shall be appropriated a certain sum of money to pay such judgment. That is not the language of the bill. The language of the bill is that "there is hereby appropriated," and this appropriation is upon exactly the same footing as so-called continuing appropriations which are made years and years in advance, as the Chair well knows, and are constantly being paid.

The CHAIRMAN. The Chair is ready to rule. The gentleman from Texas makes the point of order against the bill that it carries an appropriation and that the Committee on Claims has no jurisdiction to report such an appropriation. The gentleman from Texas makes a further point of order which should be directed to the amendment, it occurs to the Chair, rather than to the bill. That point of order, if good at all—and the Chair is inclined to think it is not well taken—would be a point of order directed to the amendment when it is considered rather than to the bill. The presumption is that we consider the bill alone.

The same point of order was made by the gentleman from Texas on June 24, 1921, and the then Chairman of the committee, the gentleman from Kansas, Mr. Campbell, ruled on the point of order and held that the change in the rules which took away from the various committees which had appropriating power the right to appropriate did not affect the Committee on Claims.

The Chairman at that time said:

In the last Congress the rules of the House were so changed as to consolidate the ordinary appropriations and revenues of the Government for the support of the Government in one committee. The language of the clause relating to appropriations is as follows:

"Rule XI, clause 3: To the appropriation of the revenue for the support of the Government * * * to the Committee on Appropriations."

That is to say, there shall be referred to the Committee on Appropriations matters relative to the support of the Government out of revenues. This bill still leaves, in the opinion of the Chair, the retention of their jurisdiction by certain other committees, even though those committees may affect appropriations or may carry an appropriation in the bills that they report. The language of clause 4 (now clause 3), Rule XXI, is as follows:

"No bill for the payment or adjudication of any private claim against the Government shall be referred, except by unanimous consent, to any other than the following committees, viz: To the Committee on Invalid Pensions, to the Committee on Pensions, to the Committee on Claims, to the Committee on War Claims, to the Committee on the Public Lands, and to the Committee on Accounts."

These committees have exclusive jurisdiction over private claims against the Government.

If this bill had been referred to the Committee on Appropriations, the question of the jurisdiction of that committee could have been successfully raised.

Of course, everyone realizes that if a bill is properly referred to a committee and no point of order could then be made against it, that committee has the power to report on that

measure, and, construing all of the rules together, the present occupant of the chair will adhere to the former ruling by Chairman Campbell and hold that the point of order is not well taken. The Chair overrules the point of order.

Mr. EDMONDS. Mr. Chairman, this is one of the most hotly contested and best investigated bills that has ever been before the Claims Committee, to my knowledge. Every opportunity was given all the parties interested to come before the committee and tell us what they knew about the bill.

It appears that in 1919 one Louis Leavitt, of New York, purchased from the Government some 3,000,000 pounds of bacon at a price of about 28½ cents per pound. Although the Government officials had previous information from the department that they could sell as low as 22½ cents a pound, Mr. Leavitt paid 28½ cents for the bacon. Of course, it involves a sum of about \$700,000. He had to raise the money. He made some sales and he made some payments. This was in June. During July and August he raised the money and paid it to the Government. He started to order shipments. He went out and tried to sell some of the bacon for export. The bacon, as you will understand, was packed for Army use and was different from that for domestic use, packed in a different manner.

He sent a customer to the Baltimore storehouse and the officer there found, on inquiry, that he was paying 36 cents a pound for the bacon. The officer then offered him bacon cheaper, and the result was that Mr. Leavitt lost the customer. He started out to hunt for other customers, and suddenly the district attorney of Brooklyn procured an indictment against him for food profiteering. This indictment sequestered and took away all the bacon he had shipped to New York, which was not a very large quantity, possibly about 100,000 pounds. The indictment went through the usual course and the grand jury dismissed it. Then the district attorney immediately procured another indictment, and that went through the usual course and was dismissed. That continued until April, during which time there were five indictments procured against Mr. Leavitt, and then Mr. Leavitt made up his mind to go into the court and fight it out, and he did and won the case, the court deciding that he was not a food profiteer.

The district attorney seemed to think that Leavitt in most of the cases should eat all the bacon in his own family. He had a wife and two servants only and, of course, could not do it. That came out in the testimony and seemed very ludicrous that a man should be supposed to consume 3,000,000 pounds of bacon in his own family before it spoiled.

However, at the end of that time the Army had started to sell bacon, and the price was all cut to pieces. Mr. Leavitt felt that he had been wronged; he had no market for the bacon which was still lying in the storehouse, and he did not take the bacon. The bacon laid there until it was spoiled and was sold for whatever they could get for it, and received credit for it.

Now, the situation is this: The Government has \$620,000 of Mr. Leavitt's money. There has been a number of controversies in the committee in regard to this. Some Members of the House have spoken about it to me. We tried to give them an opportunity to come before the committee. Some members of the committee object to the bill, but the Government of the United States has Mr. Leavitt's money. It may be that he is to blame; it may be that he has been dilatory in not removing the bacon, but you can readily realize the position of this man. He has gone to the banks and borrowed money, has given the Government \$620,000, for which he has had nothing. He is out the interest on the money for several years. Taking into consideration the entire circumstances of this case, the committee came to the decision that Mr. Leavitt was entitled to justice. It was impossible in committee to get an agreement. I know that no claim has had interest added to it in recent years; so the majority of the committee decided that we would give him his day in the Court of Claims and limit any judgment that the court might give in order to prevent interest on the \$620,000, and let the parties fight it out in the Court of Claims. Let Mr. Leavitt go into a proper court of justice. If this was between two private parties, he would have had justice long ago. The Government has had the money since 1919. Mr. Leavitt is entitled to justice from the United States Government. If there is nothing coming to him, he is entitled to have it so decided by a competent court. The Government of the United States has no right to take \$620,000 from a man and keep it. That is the position that the majority of the committee take. The minority will present their view.

Mr. Chairman, I reserve the balance of my time.

Mr. BOX. Mr. Chairman, as a member of the committee I ask recognition.

The CHAIRMAN. The gentleman from Texas is recognized.
Mr. BOX. Mr. Chairman, I ask unanimous consent to extend my remarks in the Record.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BOX. Mr. Chairman and gentlemen of the committee, another body has twice passed this bill, carrying an appropriation of some \$620,000. A majority of the committee has once reported it to the House with an appropriation paying the claim outright, amounting to some \$620,000. It is now in the shape in which the chairman of the committee reports it. In my judgment a claim should not be referred to the Court of Claims unless Congress believes that there is substantial ground on which the claim can rest. Because I entertain that view and because I believe that this claim should not be paid and because, if I may be frank, I fear that this is not the form in which it is expected that this bill will finally become a law, I am exercising my right and performing my duty as I see it in opposing it.

Mr. Leavitt was engaged in buying many surplus war supplies. He bought lumber; he bought prunes; he bought other commodities in large quantities. He contracted to buy this bacon. There was in the Department of Justice, and probably in the War Department, as the files of the committee show, although the majority report does not show it, a fear on the part of those administering those departments, at least the Department of Justice, that the act passed by this Congress about that time preventing hoarding was being violated in this instance. The bacon declined very rapidly in price. It deteriorated in quality. At the instance of the Department of Justice, Mr. Leavitt was arrested, placed under bond, and thereafter indicted by the grand jury. It is not true—and the gentleman from Pennsylvania [Mr. EDMONDS] did not intend to so state—that the grand jury dismissed the cases. The grand jury returned indictments, and demurrers were sustained and the indictments were dismissed.

Mr. EDMONDS. I accept the gentleman's correction. I am not a lawyer, and probably did not state that correctly.

Mr. BOX. There was no such failure to deliver, no such prosecution or seizure by the Government without probable cause, as gave the claimant, Mr. Leavitt, a right to compensation by the Government. No sufficient showing is made of any amount of loss resulting from the seizure of which he complains to warrant the sending of the demand to the Court of Claims.

Outside of about 350,200 pounds of bacon which the Government failed to deliver to him, the full price of which was refunded to him, no showing is made of a failure to deliver after Mr. Leavitt completed payment and after the giving of notice and the expiration of 30 days thereafter, as provided by the contract of sale. The Government insisted that the price should be paid before the delivery of the bacon would be made. (Statement of Mr. Leavitt's attorney, majority report, p. 15.) Mr. Leavitt offered to buy the bacon on May 26, 1919. His offer was accepted June 12, 1919. (Majority report, p. 38.) Full payment of the price was not made until August 19, 1919, two months and three weeks after Mr. Leavitt made his offer and two months and one week after his offer was accepted. (Majority report, p. 38.) In its contract the Government allowed itself 30 days' time after notice within which to make deliveries. There is no evidence that a delivery was denied Mr. Leavitt after he paid the full price, gave notice, and became entitled to delivery of the bacon. (Majority report, p. 38.) There are some general, disconnected remarks in the record about slow delivery and nondelivery, but they do not show whether they refer to delay, if any, because of the delay in paying for it, or delay in delivery after the bacon was paid for, or to its alleged wrongful seizure which is claimed to have undone the delivery. Mr. Leavitt himself says:

The fact of the matter is that the Government did make a delivery to me, and that was some time after I paid for this material. (Majority report, p. 15, top.)

Mr. HERSEY. Mr. Chairman, will the gentleman yield?

Mr. BOX. Yes.

Mr. HERSEY. Was the bacon sold at auction?

Mr. BOX. No; at private sale.

Mr. HERSEY. He offered a voluntary bid for it?

Mr. BOX. Yes.

Mr. HERSEY. And made his own figures?

Mr. BOX. Yes.

Mr. HERSEY. And the Government accepted the figures?

Mr. BOX. Yes. Then the contract required that the bacon should be delivered upon 30 days' notice and also required that the payment be made before the bacon was delivered.

Mr. EDMONDS. Mr. Chairman, will the gentleman yield?

Mr. BOX. Yes.

Mr. EDMONDS. The gentleman will recollect also the testimony that Mr. Klopstock, who was Mr. Leavitt's customer, went to Baltimore to look at bacon and bought 8,000,000 pounds of bacon, and that nobody brought profiteering charges against him.

Mr. BOX. I do not know anything about the intent with which Mr. Leavitt bought the bacon. He was indicted not for buying it but for hearing it contrary to the statute enacted by Congress.

There is no proof that after payment for it Mr. Leavitt gave notice of his desire to have any specific amount delivered, or that the delivery of any specified amount was delayed more than 30 days after payment and notice, or that he lost any specified amount because of failure to deliver as provided in the contract.

After Mr. Leavitt had finished paying the price of the bacon on August 19, 1919, and had become entitled to delivery of it upon expiration of 30 days after notice, all the bacon except about 350,200 pounds, in lieu of which he received the return of the price, was delivered to him. He was indicted by the grand jury of the United States District Court for the Eastern District of New York in October, 1919, on a charge of hoarding in violation of the Lever Act. (The demurrer to the first indictment shows that the first indictment was presented on or about October 30, 1919, while the indictments themselves describe conditions prevailing on October 27, 1919.) The bacon in the possession of Mr. Leavitt was libeled about October 27, 1919. At that time the market price of such bacon had declined from 36 to 37 cents per pound in May, June, and July preceding to about 29 cents per pound on or about October 27 to November 1, 1919. It appears to have gone much lower before the bacon was finally sold in March, 1922. (Majority report, p. 17, near top.)

I insert here a letter to me from the Department of Commerce and table of market quotations which accompanied it:

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE,
Washington, September 23, 1922.
In reply refer to -30

Hon. JOHN C. BOX,

House of Representatives, Washington, D. C.

My DEAR SIR: In further reference to my letter of September 22, relative to your inquiry of September 19 for market quotations on certain classes of bacon for each week from May 15, 1919, to August 30, 1919, there is attached a table giving the desired data.

Very truly yours,

J. E. WRENN,

Specialist Fats, Oils, and Meat Products, Foodstuffs Division.

Majority report, pages 19-20.

The bacon in question seems to have been approximately of the classes shown in the second and third columns of these tables.

These tables show how the market price was going down from May, 1919, to March, 1920. The first table, on page 19, and the "Statement of facts," on page 44 of the majority report, show that the Government and municipalities were distributing bacon at many places in a manner and at prices which could not have failed to affect the plans of those who had bought bacon for speculative purposes. In the meantime the whole country had been complaining of hoarding and profiteering. The Congress of the United States had ordered such provisions sold from its great war surplus. Column 2 of page 1913, CONGRESSIONAL RECORD of June 11, 1919, shows that the Director of Sales of the War Department estimated surplus meat products on hand in the United States amounting to about 141,000,000 pounds, and that they were being offered for sale. The Army appropriation bill, which was under discussion in the House on June 11, 1919, and was afterwards passed and approved by the President on July 11, 1919, contained the following:

The Secretary of War be, and he is hereby, authorized to sell any surplus supplies, including motor trucks and automobiles, now owned and in possession of the Government for use of the War Department, to any State or municipal subdivision thereof, or to any corporation or individual, upon such terms as may be deemed best. (U. S. Stat. L. vol. 41, pt. 1, Public Laws, p. 105.)

In the meantime the market price of the bacon was going down. More than 2 months and 10 days later, when the price was down to 29 cents per pound, Mr. Leavitt had not sold the bacon and was, about October 27 to 30, 1919, indicted for hoarding it.

Mr. CAREW. Will the gentleman permit me to correct him? It was on the 10th of October.

Mr. BOX. The gentleman from New York is in error about that. I shall not quarrel about that, and I know only from the photostatic copies of the correspondence between the district attorney and the Department of Justice, which I have examined. I know that that date is mentioned. You can leave that open. The gentleman may be in error as to the exact date, but he is fairly sure that he is right in saying that that prosecution was instituted on the 27th or the 28th and that Leavitt was bound over to appear before the commissioner or to await the action of the grand jury on the 25th to the 27th. The department here started its motion on the 25th, as I get it from the record. That fact is not in the majority report.

The first table on page 19 of the majority report shows that by October 25, 1919, the Government was selling bacon at 20 cents per pound. It was also being retailed by the Government and many municipalities and individuals at prices far below

what Mr. Leavitt had paid for the bacon he bought. The market price was then, in fact, about 7 cents per pound less than he had agreed to pay for it five months before, and Mr. Leavitt had already lost about \$125,000 in the decline of the market price and an unknown amount in the deterioration in its quality.

The risk of this decline in the value of the bacon, either through its deterioration or a fall in the market, was a chance which Mr. Leavitt took when he bought it for speculative purposes. To make him whole against a loss through decline in the market or deterioration of the bacon is without justification in law or moral right. It is jobbery; it is plunder. The United States is not legally or morally liable for financial loss caused by its efforts to prosecute Mr. Leavitt for violating the statute against hoarding nor for its libeling of the bacon in its bona fide efforts to enforce that law.

There is a confused effort to make it appear that the Government ought to be held liable for damages for malicious prosecution. I know that effort will not be approved by this House.

Mr. BUTLER. Will the gentleman yield?

Mr. BOX. I will.

Mr. BUTLER. I did not quite understand. Is it proposed to require the Government to pay damages here for breach of contract? I have listened very intently and thought I understood it, because the gentleman has made a very lucid explanation.

Mr. BOX. Not as lucid as it should be or as the gentleman from Texas has desired.

Mr. BUTLER. I think the gentleman did very well, if I may say so. Now, if the gentleman will bear with me, I will be obliged to him. Why did the Government hold this bacon, was there anything wrong, or the price went down?

Mr. BOX. I do not know what was in the minds of those who acted. I know that two years later in 1921 there was an effort made to rescind the contract. I know that there was about 350,000 pounds of bacon which was never delivered, for which the Government paid him; that is, they returned to him the money he had paid on bacon he never got. When the proposition to rescind was presented, the Acting Judge Advocate General reviewed it very thoroughly and reported that the facts did not warrant a rescission of the contract. That opinion is omitted from the majority report.

Mr. BECK. Was that available to the committee? I never heard of it.

Mr. BOX. It was not offered to the committee by any of those presenting the claim, nor was there any reference to it by those purporting to represent the Government upon the hearing so far as the gentleman from Texas heard. The gentleman from Texas, if you will permit a personal remark, suspected the existence and withholding of something like that and hunted up the facts and found that there had been not one but two extended opinions, one of which he will insert in his remarks, advising the department that the rescission of this contract was not warranted; that the facts did not warrant it. It is a long opinion and to present it now would take up more time than I have.

Mr. BUTLER. The Government did buy so much bacon from Leavitt.

Mr. BOX. Leavitt bought from the Government.

Mr. BUTLER. And bacon went down and Leavitt went down with the bacon. I see it now.

Mr. EDMONDS. If the gentleman will yield, I want to call attention to the remark made just before, that Mr. Hull, the Acting Adjutant General of the Army approved of it, that the Budget Bureau approved of it, and the Department of Justice approved. Mr. Hull sent a letter, and Director Dawes sent a letter approving of it.

Mr. BOX. I fear that they will not understand it better than some of the majority members of the committee. An effort was made to get a direct appropriation from the Appropriations Committee and the chairman of the Committee on Appropriations of this House went carefully into the whole thing. I wish his counsel might be given to this House to-day on the merits of this bill.

Mr. EDMONDS. This bill is to permit Mr. Leavitt to go into the Court of Claims and give him opportunity to have his day in court, and I think that is fair because the bill says:

Jurisdiction is hereby conferred upon the Court of Claims of the United States to hear, consider, and determine such action upon its merits and according to the principles which govern such liability that prevails between private parties.

Mr. BOX. Well, the gentleman from Texas is trying to do two things: He is trying to show the Members of this

House that this claim ought not to go to the Court of Claims; second, he wants the record of this transaction to get into this Record, so that those who will deal with it hereafter will find as much as possible of it in the Record; and next, the gentleman from Texas is very much afraid that this is not the final form in which this legislation is to pass.

The chairman of the committee reporting the bill has heretofore favored its direct payment. It will be a matter of conference in the last instance. The gentleman from Texas feels that it is his duty to have this House understand what is involved when it votes now, and when it is called upon to vote hereafter.

Mr. UNDERHILL. Mr. Chairman, will the gentleman yield?

Mr. BOX. Yes.

Mr. UNDERHILL. What has the gentleman to say about this? When Mr. Leavitt had a customer for the bacon he sent him down to the storehouse to examine it and look it over, and an officer of the Army undersold Mr. Leavitt, because they had a surplus supply there at about 2 cents a pound less. Now, the Government had the bacon in its charge and an officer was in charge of the bacon, and then the officer broke all the ethics of business life and undersold Mr. Leavitt, when Mr. Leavitt could have sold all his bacon at a profit.

Mr. BOX. The officer delivered all the bacon which Mr. Leavitt had sold to Klopstock. He had a provisional arrangement to sell more. The officer had been instructed by Congress to sell this bacon, and found out that there was a chance to sell more, other than that which Mr. Leavitt had sold, and he did sell, and it was somewhat hard on Leavitt for his customer to go in there to get bacon that he had bought from Leavitt and find that hereafter—not as to this lot—he could get bacon from the Government at a cheaper rate than he could get it from Leavitt. All he had to do was to read the records of Congress and the proceedings of municipalities everywhere to learn that they could buy bacon cheaper almost everywhere at the time Klopstock bought from the Government than the price Leavitt made to him. The officer did not remind him or tell him of anything that was not already widely published in the press. He did not learn any trade secrets there.

Mr. EDMONDS. Had it not been shown that the Government sold that bacon at 34 cents a pound? The gentleman knows that Mr. Leavitt sold Mr. Klopstock 150,000 pounds of bacon, and Klopstock took an option on 500,000 pounds more, and then when he found he could buy it cheaper from the Government, he bought from the Government.

Mr. BOX. If Klopstock bought from the Government at 34 cents a pound after that, he paid about 5 or 6 cents a pound more than the market price of bacon.

Mr. EDMONDS. The gentleman will find that in the record. In the record is the market price of bacon in 1919.

Mr. BEEDY. Mr. Chairman, will the gentleman yield?

Mr. BOX. Yes.

Mr. BEEDY. I am not clear as to whether there is more than one lot of bacon involved here. After Mr. Leavitt bought his, the Government still had a large amount, had it not? That is what the officer was talking about?

Mr. BOX. Yes.

Mr. BEEDY. Not his bacon?

Mr. BOX. No; Government bacon. The amount was large. I will not state how much, but it was millions of pounds, a vast amount, that we were selling everywhere, trying to dispose of the war surplus and trying to supply it more cheaply to the folks; and now we are asked to pay damages because a man suffered loss because we succeeded in bringing down the price.

As previously stated, an effort is made to show that the prosecution was instituted and insisted upon by District Attorney Ross, now deceased, on his own motion for selfish, political, and wholly unjustified purposes. I never knew Mr. Ross. He died before the first hearing on this claim and had no chance to justify his action, nor was there any effort by the representatives of the Department of Justice as administered when this claim was considered by the committee to present to the committee the viewpoint of the Government at the time of this prosecution and libel. The claimant's attorney, Mr. Steinbrink, was himself an attorney employed by the Department of Justice at the time he was prosecuting this claim, and either his prosecution of the claim or his employment by the Government was itself in plain violation of the law. He stated to the committee that he reserved the right to prosecute this claim when he was employed by the Government as one of its attorneys (majority report, p. 6, near top), but a man, whether a layman, a lawyer, or a subordinate, or even the head of the Department of Justice, can not reserve the right in advance to violate the law. Both Mr. Steinbrink and the official who employed him

showed a regrettable disregard of the law in his employment with the understanding that he should violate the law in this particular.

In the presentation and promotion of this claim other unfavorable outcroppings have developed. Upon the hearing my colleague on the committee [Mr. UNDERHILL] asked the following question:

Mr. UNDERHILL. Is Mr. Ross still the district attorney?

Mr. STEINBRINK. I think I can answer your question. I wish you gentlemen to understand that Le Roy Ross was my friend. He is dead, and I should only speak kindly concerning the dead. In 1920 there were to be in our judicial district four vacancies in our supreme court, and Le Roy Ross was a candidate for one of those vacancies, and this was used as the chariot in which he hoped to ride to one of those nominations.

A little later the gentleman from Texas asked Mr. Steinbrink, who at the time the question was propounded was a Government attorney, this question:

Mr. Box. Has the Government any information indicating that this unjustified act on the part of District Attorney Ross was at the behest of any persons representing the General Government in the sense that they were located in Washington?

To which Mr. Steinbrink answered:

Mr. STEINBRINK. We have no information which indicates that.

Now, this was in furtherance of the apparently unwarranted claim that District Attorney Ross was actuated by his own base, personal motives in the proceedings against Mr. Leavitt instead of under the direction of the Department of Justice and the guidance of his sense of duty. In fact, documents in possession of the committee, and which should have been fully shown in the majority report, but were not, show that before the institution of the proceedings against Mr. Leavitt the Department of Justice at Washington had telegraphed to District Attorney Ross about violations of this statute and had confirmed its telegram by letter. On October 28, 1919, District Attorney Ross wrote to the Attorney General at Washington a letter in which the following appears:

Your letter of August (October) 27, 24-317, signed by Mr. Harold Figg, special assistant to the Attorney General, confirming telegram received by me yesterday in reference to prosecution of sections 6 and 7 of the food control act, is received.

I might state that upon receiving said telegram I immediately had a United States commissioner's warrant issued and under this warrant Louis Leavitt, a white-lead manufacturer, with a place of business at 454 Driggs Avenue, Brooklyn, N. Y., was arrested.

At the same time I commenced an action under section 7 of said act, and the property described was seized. I am inclosing a statement of the goods seized, showing where stored and when placed in storage in the warehouse.

From that time to the end of this proceeding, some three or four months later, Mr. Ross was in constant touch with the Department of Justice here and apparently proceeded under its direction. In one of his first letters to the Department of Justice he said:

I believe I have a strong case. (Majority report, p. 39.)

The Department of Justice wrote him under date of October 29, 1919, as follows:

I beg to acknowledge your letters of October 27 and 28, concerning the arrest and indictment of Louis Leavitt.

I am very much gratified at your prompt, vigorous, and effective action in this matter. On the facts you present this seems to be an aggravated case, and I sincerely hope a conviction can be obtained. It would seem that this is a case where the extreme penalty of imprisonment would be none too severe. This thoroughly vicious character of speculation must be discouraged.

There have been several prosecutions under section 6 of the food control act, but in most of the cases the parties have pleaded guilty, and another case is now pending on appeal. We have, therefore, to date no authoritative construction of the meaning of section 6. It would seem, however, that unless this defendant can show that he has business requirements, the facts of the case would establish violation of the provision relating to requirements for use or consumption by himself and dependents.

After considerable correspondence between District Attorney Ross and the Department of Justice, all showing frequent official communication between the two offices about this proceeding, and showing that the trial court had sustained demurrers to indictments against Leavitt, Mr. Ross, on January 5, 1920,

wrote the Department of Justice a letter in which, among other things, he said:

I would strongly recommend that an appeal be taken from this decision at once, as it goes to the very heart of this prosecution and of other prosecutions for hoarding and selling for excessive rates commodities purchased from the Government.

On February 21, 1920, District Attorney Ross wrote to the Department of Justice a letter, in which the following appears:

I appreciate your agreement with me that the dismissal of the first indictment was erroneous.

So much for Mr. Steinbrink's implication that this proceeding was not at the instance of the Department of Justice at Washington but was for Mr. Ross's own base, personal purposes.

It is appropriate to add here that papers in the possession of the committee show, though the majority report does not show, that Mr. Leavitt had bought large quantities of other surplus war materials, among which were lumber and some 4,600,000 pounds of oleomargarine; that he had acquired several hundred thousand pounds of prunes; that he was named as one of the associates of the man who bid \$8,000,000 for the Government nitro plant at Charleston, W. Va. The manner of Mr. Leavitt's handling of these commodities was the subject of a special investigation made by the Government in connection with its efforts to enforce the hoarding statute enacted by Congress. (See memorandum of November 12, 1919, made by Maj. G. Q. Peters, United States Army, for Colonel McKenney; also letter of District Attorney Ross to the Attorney General at Washington, dated November 5, 1919, both in the files of the Committee on Claims.)

As further illustrating the one-sided manner in which this claim has been presented to the committee, which ex parte character has necessarily gone into the committee report, I call attention to the fact that, while the favorable opinion of Attorney General Daugherty was presented to the committee in support of the claim and placed in the committee's report, the adverse opinion of the then Acting Judge Advocate General of the Army was not presented to the committee, though it was in its files, and does not appear in the committee's report. This opinion shows that it was at least the second adverse opinion by that office. I insert a copy of it here:

AUGUST 23, 1921.

Memorandum for the Acting Secretary of War.

Subject: Proposed rescission of sale of bacon to Louis Leavitt.

1. This case was before this office on June 3, 1921, on a request for an opinion as to whether or not there was legal justification for the rescission of a contract of sale to Louis Leavitt in so far as it relates to 1,400,000 pounds of bacon purchased by him from the War Department. This office at that time found no legal justification for such rescission, and the matter was transmitted by the Assistant Secretary of War to the Department of Justice with a request for an opinion, which that department declined to render for the reason, among others, that the request was not made by the head of this department. The matter again came before this office on June 23, 1921, for reconsideration upon a brief submitted by the attorney for Mr. Leavitt, on which occasion this office adhered to its former opinion. The matter is now before this office on a request to the Acting Secretary of War that the matter be again submitted to the Department of Justice.

2. On May 26, 1919, Louis Leavitt bid 28½ cents per pound on 2,493,836 pounds of strip bacon offered for sale by the War Department "as is," f. o. b. Army warehouse, Baltimore, Md., delivery to be made "when notified within 30 days." The bacon was awarded to him on June 12, 1919. Leavitt paid down \$60,000 with his bid. All of the balance of the purchase price was paid by Leavitt by August 19, 1919. Some of the bacon was delivered by shipments made directly from the Army warehouse at Baltimore to persons who had purchased from Leavitt. The remainder of the bacon which was delivered under the contract was delivered to Leavitt f. o. b. Baltimore at his request and shipped to New York, where it was stored by him. The bulk of it was shipped in September, none in October, and about 530,000 pounds in November, 1919. Leavitt states that a part of the bacon was not delivered and the purchase price was repaid to him by the United States. While Leavitt claims that there was some delay in the early shipments made prior to his final payments, the evidence only indicates that he may have, perhaps, lost the sale of one carload by reason of the fact that a certain other carload was not shipped for 10 days after receipt of shipping instructions. As the case now stands before this office, Leavitt makes no claim for rescission on this ground; in fact, he subsequently received and accepted delivery of all the bacon.

3. In August, 1919, the Government commenced to dispose of other bacon to municipalities throughout the United States. This other bacon was chiefly canned and not strip bacon. There was, however, some strip bacon sold by the Government. The market value of bacon

thereafter commenced to decline and continued to decline during all of the period under consideration. In the hearing before an officer of the Quartermaster Corps hereinafter referred to, claim was made that the Government had interfered with Leavitt in his disposition of the bacon by the sales above referred to. At present, however, no claim for rescission is based upon this ground.

4. On October 10, 1919, Leavitt was indicted by the Federal grand jury for the southern district of New York for hoarding bacon. Demurrers to this indictment and three subsequent ones were sustained. On a fifth indictment Leavitt went to trial in the month of February, 1920, and was acquitted.

5. October 27, 1919, 13,318 cases of bacon, aggregating approximately 1,400,000 pounds, were seized on a libel, a proceeding in rem begun by United States attorney for the southern district of New York, under the act of Congress approved August 10, 1917 (40 Stat. 276), known as the food and fuel act. This bacon was held by the United States marshal until March 2, 1920, after Leavitt had been acquitted under the fifth indictment, when it was released to Leavitt by stipulation. On November 20, 1919, about 30 days after the bacon was seized, the United States attorney for the southern district of New York, at the suggestion of the court and claimant's attorney, offered in writing to stipulate with the claimant that the bacon might be sold and the proceeds distributed or retained as the court might order. In this letter the United States attorney suggested that the bacon should be sold at auction so that it might not again fall into the hands of food boarders or profiteers. Claimant's attorney took exception to this language and refused to stipulate. At the request of claimant's counsel copies of the correspondence between the attorneys relative to the stipulation are attached to this opinion as Exhibits A, B, and C.

6. It appears that the claimant made some efforts in June, July, and early August, 1919, when the market price of bacon was above 40 cents, to make a sale of at least a part of this bacon. These efforts, however, resulted in a sale of not more than two carloads thereof. It is claimed also that at the time the claimant was indicted, an agent or representative of his was engaged in negotiations for the sale of 1,400,000 pounds of this bacon to some of the Balkan States. This agent, a Mr. Noonan, states that when the representatives of these Governments learned that Leavitt had been indicted and arrested and a part of the bacon seized on the charges above mentioned, they refused to negotiate further. Mr. Noonan testified before Major Griffin in regard to these negotiations, as follows:

"Mr. NOONAN. Well, I do not want to say I could have sold it, because I do not know.

Mr. MILLER. At the time you discontinued, under the circumstances stated, your efforts to sell to the foreign ministers, at what stage were your negotiations? Did you have a sale practically consummated, or nearly so, or what?

"Mr. NOONAN. Well, I thought it was nearly consummated, but when you are dealing with foreign representatives you do not know until it is done. They are cabling back and forth.

"Major GRIFFIN. You had every reason to believe you had a deal for the 1,400,000 pounds?

"Mr. NOONAN. I did."

It appears also that during the month of December the claimant or one of his representatives discussed the sale of this bacon with a representative of the New York Globe, which was then importing meat for the purpose of effecting a reduction in the cost of living, and that the Globe expected to purchase about 2,000,000 pounds of bacon but would not consider a price above 25 cents per pound, which was not acceptable to the claimant.

7. The claimant, through his attorney, the Hon. Clarence B. Miller, filed a claim with the Quartermaster General seeking a cancellation of the sale of all of the unsold bacon delivered to him on the purchase made by him on June 12, 1919, and requesting that the War Department take back the bacon and pay him the purchase price thereof, together with all of the expense, interest, storage, freight, insurance, and advertising incurred by him in connection therewith, amounting in all to the sum of \$789,189.53. He claims to have on hand approximately 1,800,000 pounds of this bacon. On May 5 and 6, 1921, a hearing was held before Maj. W. W. Griffin, of the contracts and advisory branch, administrative division, office of the Quartermaster General, at which the claimant presented evidence to sustain his request for rescission. Major Griffin made findings of fact and recommended a disposition of the claim. As to the 1,400,000 pounds which Leavitt through his agent attempted to sell in Europe he recommended that the Government take back the bacon and repay the purchase price thereof to Leavitt, with interest, insurance, and storage thereon. As to the other bacon, which he apparently estimates at 1,000,000 pounds, he recommended that relief be denied.

8. The ground upon which Leavitt claims a right to rescission is that the Government seized the bacon which it had previously sold him and caused him to be indicted for hoarding the same, and by this alleged unjust interference prevented him from disposing of the bacon to his advantage or, at least, without loss.

9. It will be noted that the contract sale was completed by payment of the purchase price and delivery of the bacon. For the bacon not delivered Leavitt received back the purchase money. No complaint is now made that the United States did not fulfill its contract in every respect. Complaint is made solely on the ground of the acts done by the grand jury, the United States attorney, and the United States marshal in indicting and prosecuting Leavitt and in seizing his bacon. The bacon seized October 27 was purchased in June and delivered to Leavitt in September and had been fully paid for in August. None of the bacon shipped in November was libeled or otherwise interfered with. Leavitt accepted and received it when shipped. Therefore the questions presented are, first, is the United States, as a contractor, liable for the acts of the grand jury, United States attorney, and United States marshal for the southern district of New York, acting in their official capacities—that is, is the United States, as a contractor, liable for the acts of the United States as a sovereign—and, second, if so liable, is the relief sought by the claimant, namely, a rescission of this contract, justified by the acts of the United States as a sovereign?

10. In the opinion of this office heretofore rendered in this case (J. A. O. 500,703, June 3, 1921), the cases of *Wilson v. United States* (11 Ct. Cls., 515), *Deming's case* (1 Ct. Cls., 190), and *Jones and Brown* (1 Ct. Cls., 383), were cited. This office is particularly impressed with the soundness of the reasoning contained in the case of *Wilson v. United States*, supra. In that case Wilson had contracted with the Quartermaster General to deliver a specified number of mules in the city of Washington. He brought the proper number of mules from Kentucky to the vicinity of Washington, which was then threatened with capture by the forces of General Early. The agents of the contractor sought to enter the city and deliver the mules, but were stopped at the picket line and turned back under an order of the military governor of Washington forbidding all persons to approach the defenses or enter the camps. The agents notified the picket guard that the mules were for the military service of the United States and were to be delivered in Washington under a contract, and that the enemy's cavalry was approaching and might capture them. Nevertheless, the request to enter was refused and the mules were captured and, in part, lost to the contractor. The Court of Claims held that, notwithstanding the peculiar hardships of the case and with a full appreciation of the good faith of the contractor, his diligence, and due observance of all the obligations of his agreement, he could not recover for the loss sustained. The court held that the double character of the Government as a contractor and as a sovereign can not be lost sight of in any of its transactions.

"The Quartermaster General was the contracting agent of the United States and bound the corporation. For his acts, within the scope of his authority, the Government, as a contracting party, is liable. But neither the Quartermaster General nor any of his assistants, nor any other contracting agent of the Government, interfered with the claimant or prevented performance on his part. The military governor of Washington, on the other hand, was not a contracting agent of the Government and his acts were limited strictly to the public defense. He did not interfere with this contractor as such. His order was general, applying to all persons, and affecting the claimant precisely as though he had contracted with any private corporation. It has been repeatedly held in this court, and often reiterated by the Supreme Court, that the Government, as a contractor, can be held to no greater liability than other contractors; and that seems decisive of the case now before us, for the Government, as contractor, did nothing which would have cast a legal liability upon any other contractor."

In *Deming's case*, above cited, the alleged interference was by the legislative branch of the Government, and it was there held that the Government as a contractor was not responsible for the Government as a lawgiver. In the case of *Jones and Brown*, supra, the acts complained of were by the executive branch of the Government, and consisted of the withdrawal of troops from the Indian country and the consequent inability of the contractors to complete a public survey. It was there held "that the United States as a contractor can not be held liable for the public acts of the United States as a sovereign."

11. In *Gibson's case* (2 Ct. Cls. p. 421), with *Wallace*, 269, the Supreme Court of the United States states that the principle is established—

"that even in regard to matters connected with the cause of action relied on by the United States the Government is not responsible for the laches, however gross, of its officers."

In the case of *Whiteside v. United States* (8 Ct. Cls. 532) the claimants were employed by the Treasury to establish the right of the Government to certain cotton and to bring in the cotton. As a consideration for their services they were to have one-half of all cotton so recovered and condemned and to be reimbursed their expenses in case the cotton should be released. After they had seized and brought in a quantity of cotton to Camden, Ark., in January, 1866, the cotton was unlawfully seized by the military commander there and returned to the alleged owners. The action of the mili-

tary authorities was wholly without justification or warrant, although done in good faith. The Court of Claims held that there could be no recovery of the claimants' loss due to the unlawful acts of the officer and that no action lay against the Government upon the contract for their expense.

12. In the case now before this office, the action of the grand jury, the United States attorney, and the United States marshal for the southern district of New York, was action taken by the public officers of the United States for the purpose of enforcing general laws of the United States as they applied to this claimant and all others. The statute prohibiting the hoarding of food products was in effect prior to and at the time this contract was entered into, and Mr. Leavitt was charged with knowledge that if he violated the same with respect to this bacon or any other he was subject to prosecution. The United States as a contractor could not have prevented such prosecution had it sought to do so; the position of the claimant was no different from what it would have been had he purchased this bacon from a private corporation or from a foreign government, and his sources of relief for any injury or damage suffered are the same.

13. Even if it should be conceded that the acts of the grand jury, the United States attorney, and the United States marshal created a liability on the part of the United States as a contractor, still the claimant would have no right to a rescission of the contract. This is not the legal remedy. If an individual had sold him this bacon and if, after having delivered the bacon and received the entire purchase price, he should have made an unwarranted and malicious complaint against this claimant and have caused him to be indicted and the bacon to be seized under a libel, nevertheless, such action would be no ground upon which any court would be justified in compelling the vendor of the bacon to receive it back and restore the purchase price. The claimant's action, if he had one, would necessarily be for damages on account of a malicious prosecution. If the claimant here is entitled to any relief it is by way of a civil suit against any person who may have been responsible for a malicious prosecution by means of which he was indicted, or his property seized. In effect the claimant is asking the War Department to buy bacon, without advertising for bids, at a price far in excess of the present market price, and to pay damages by way of interest, insurance, and storage for not having purchased the bacon earlier. This can not be done legally.

14. This office is of the opinion that there is no legal justification for the rescission of this contract or any part of it. Pursuant to your instructions I submit herewith draft of letter prepared for the signature of the Secretary of War transmitting these papers to the Attorney General with request for an opinion.

E. A. KREGER,

Acting Judge Advocate General.

An effort was made on the hearing, and appears in the committee's report, to show that Mr. Ross refused to agree to the sale of the bacon at the time it was libeled, presumably to avoid loss on account of its decline in market value and deterioration in quality. When this stipulation was suggested the market value of the bacon had already declined several cents per pound, and the Government had been selling its surplus bacon of similar character for 20 cents per pound; yet, in the interest of Mr. Leavitt it was suggested that the bacon should be sold at a price which "would protect Mr. Leavitt for the amount expended by him in the purchase of this bacon from the Government." (Majority report, p. 61.) That was necessarily an impossible agreement for the district attorney or the Attorney General to make. In addition, the Government wanted such a stipulation as would prevent the further hoarding of the bacon, which was the very evil, real or imaginary, which the Attorney General and district attorney were trying to correct; but Mr. Leavitt's attorneys spurned the idea of that suggested phase of the agreement. (See letter of Mr. Steuer, attorney for Mr. Leavitt, majority report, p. 61.) Apparently for these two sufficient reasons the stipulation for the sale of the bacon was not made.

There is indisputable evidence that the Attorney General and Mr. Ross believed that Mr. Leavitt was violating the law. Mr. Ross's report to the Attorney General that he believed he had a strong case is supported by the concurring opinion of the Attorney General's office and by the presumption that every public official does his duty.

The Department of Justice supported the action against Mr. Leavitt; the grand jury returned an indictment against him; the district attorney insisted upon the prosecution; the district judge submitted the final indictment to the jury for its finding on fact questions. It is inconceivable that Congress will, under these facts, say that the Department of Justice, the district attorney, the grand jury, and the district judge acted without probable cause, and that the Treasury should now compensate Mr. Leavitt on the basis of a willful wrong done by all these representatives of the Government.

It is said (majority report, p. 16, latter part of fifth paragraph):

Mr. Leavitt had negotiated the sale of it [the bacon] at 30 cents per pound alongside the ship in New York, and that was as early as the latter part of August, 1919.

The grand jury had not indicted Mr. Leavitt then, nor had the court seized the bacon. Neither was done until two months thereafter. Under no condition or theory could the Government be held responsible for a failure of that sale, which is wholly unexplained. This statement was made by Mr. Steinbrink, the very able and adroit attorney for Mr. Leavitt, and whose statement binds him. Mr. Leavitt had a right to hold the bacon after that and after delivery of it at the risk of being prosecuted for hoarding, but will Congress now make good the loss to the risk of which he exposed himself? This fact alone should dispose of this claim. But there are other considerations.

When and after the bacon was released in February or March, 1920, it was worth 23 or 24 cents per pound. Mr. Leavitt was thereafter free of any embarrassment in the disposition of it, except such as came from the condition of the market, and certainly Congress will not hold the taxpayers liable because the market went against Mr. Leavitt while he was engaged in this speculation. The bacon remained in his possession, or in the warehouse subject to his order, until March, 1922 (majority report, p. 42), about two years, after which it was sold at the suggestion of the Secretary of War for 3½ cents per pound, when bacon in large quantities was being sold for 10 cents per pound. Apparently this sold to the General Rendering Co. for less than one-third the current price because the bacon was not then in good condition. (Majority report, p. 17.) It had been in Mr. Leavitt's exclusive control from the time it was delivered to him, soon after he completed the payment of the purchase price in August, 1919, until March, 1922, save and except the time during which it was seized and held under libel proceedings extending from about October 27, 1919, to February or early March, 1920—about four months—out of the period of more than 32 months, covering the time that elapsed between the acceptance of Leavitt's bid and the final sale of the meat for his account.

If we compute the time elapsing after he made final payment on August 19, 1919, to March, 1922, the period would cover a little more than 30 months, while the embarrassment of Mr. Leavitt's possession by the seizure covered only 4 months of that period. Shall we assume that all of the deterioration in quality which the meat suffered in this 30 or 32 months occurred in the 4 months while the court held it? We know that the decline of the market price of the bacon went from 36 or 37 cents per pound, when he bought it, down to about 10 cents per pound, when it was sold for his account in March, 1922. Certainly the Government is not liable for the decline in the market price or for the deterioration in the quality of the bacon before it was libeled or after it was released, and these two periods together cover about seven-eighths of the period between the acceptance of Mr. Leavitt's offer and the sale of the bacon for his account, at the suggestion of the War Department, in March, 1922.

If Congress is going to compensate Mr. Leavitt on the theory that the Department of Justice, district attorney, grand jury, and district judge proceeded against Mr. Leavitt and his bacon without probable cause, which is unthinkable, the measure of his damages would not exceed the decline in the market value of the bacon from October 27, 1919, when it was seized, to February or March, 1920, when it was released. That decline was 4 or 5 cents per pound, which would be computed upon the quantity of bacon actually seized, and by no stretch of morality, law, right, or reason could be made to cover the whole price of the bacon, which was 28½ cents per pound. Let us remember that Mr. Leavitt was in no way hindered from disposing of the bacon prior to October 27, 1919, the date of seizure, or after February or March, 1920, when it was released.

It can not be contended that the Government should compensate Mr. Leavitt for a decline in the market price of the bacon either before or after the seizure proceedings because it was selling large quantities of bacon and helping the market to decline. If it is liable on that account to Mr. Leavitt, it will be liable to all other purchasers of surplus war supplies who may claim to have suffered loss on the same account. Mr. Leavitt and others bought these goods knowing that the Government had other surplus supplies which it was selling. He speculated on the market with that fact in mind. The Gov-

ernment in no way undertook to protect him from a decline in the market from that or any other cause.

I heartily concur in the following expressions of the Acting Judge Advocate General of the Army in his opinion advising that the Government should not compensate Mr. Leavitt on the basis of the rescission of his contract of sale:

In the case now before this office, the action of the grand jury, the United States attorney, and the United States marshal for the southern district of New York was action taken by public officers of the United States for the purpose of enforcing general laws of the United States as they applied to this claimant and others. The statute prohibiting the hoarding of food products was in effect prior to, and at the time this contract was entered into, and Mr. Leavitt was charged with knowledge that if he violated the same, with respect to this bacon or any other he was subject to prosecution.

Even if it should be conceded that the acts of the grand jury, the United States attorney, and the United States marshal created a liability on the part of the United States as a contractor, still the claimant would have no right to a rescission of the contract. This is not the legal remedy.

This office is of the opinion that there is no legal justification for the rescission of this contract or any part of it.

Mr. Leavitt's speculation resulted unfortunately for him, but he took the chances of that and lost. I conclude that there is no showing made of legal or moral liability to him for any sum.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. BOX. Yes.

Mr. MOORE of Virginia. As I understand, the gentleman's proposition is that after the bacon was relieved of the libel there was no damage sustained by Mr. Leavitt for which the Government is, upon any view, accountable?

Mr. BOX. That is right.

Mr. MOORE of Virginia. That is to say that after the bacon was released, after which Mr. Leavitt was free to do with it as he pleased, there were no damages accruing from that time on for which the Government can be held responsible? Now back of that you also hold that the libel, because of the operation of which he claims damages, was a mere incident to criminal proceedings against him?

Mr. BOX. It was a separate proceeding, but incidental.

Mr. MOORE of Virginia. That the bacon was withheld from him because of the criminal proceeding against him, and that he was acquitted in that criminal proceeding?

Mr. BOX. The court submitting the issues of fact and the jury finding for Leavitt.

Mr. MOORE of Virginia. And you contend, as I understand, that he is now claiming damages in consequence of a prosecution which resulted in his acquittal; and you take the position that it is against all precedent and against the universal policy to indemnify a successful defendant in a criminal case?

Mr. BOX. Yes.

Mr. JONES. Will the gentleman yield?

Mr. BOX. Yes.

Mr. JONES. Does the gentleman state—I do not know whether I understood him or not—that this bill undertakes to compensate this man for some decrease in the price of bacon after the bacon was sold to this man and before criminal prosecution was instituted?

Mr. BOX. Well, it is not stated in those terms, but it is necessarily involved in the legislation; it covers the whole loss from the deterioration in quality and the decline in price, and from other causes, from the purchase in 1919 until the sale of the bacon for Leavitt's account early in 1921.

Mr. DENISON and Mr. BEGG rose.

Mr. BEGG. Will the gentleman yield?

Mr. BOX. The gentleman from Illinois [Mr. DENISON] rose first, and I will yield to him.

Mr. DENISON. I am somewhat confused about the proceeding, perhaps because I am not familiar with the statute.

Mr. BOX. It is a very voluminous affair.

Mr. DENISON. I am talking about the libel proceeding. Was that a necessary part of the prosecution or was it a separate proceeding?

Mr. BOX. I understand it was an ancillary proceeding, provided for in the same act. A libel proceeding under it would not be authorized in the absence of a hoarding charge, but there might be an indictment for hoarding without a libel.

Mr. DENISON. Are not the two proceedings separate?

Mr. BOX. Yes.

Mr. DENISON. One is a criminal proceeding and the other is a civil proceeding.

Mr. BOX. Yes; but in this case they go together, because we authorized this libel proceeding in the very statute we passed, the antihoarding act.

Mr. DENISON. But the libel proceeding itself was not a criminal proceeding?

Mr. BOX. No.

Mr. MOORE of Virginia. If I may be permitted, is not it much like the prosecution of a person for selling liquor unlawfully, where there is an ancillary proceeding—a libel proceeding—with reference to the automobile in which the liquor, as was charged, was being hauled? Now, the point you make, as I understand, is that in that case, if the individual successfully defended and was acquitted, nevertheless he would have no ground on which to base a claim for damages for the detention of his automobile or anything that might have happened to his automobile. Is not the case I have supposed analogous to the claim you are now dealing with?

Mr. BOX. I think it is. I now yield to the gentleman from Ohio.

Mr. BEGG. I would like to ask the gentleman two questions. Does the gentleman contend that this contestant was not damaged at all by the action of the Government?

Mr. BOX. I would not say he was not damaged at all. I think no defendant is free from damages when the Government proceeds against him, but such damages are not the basis of a proper claim against the Government.

Mr. BEGG. Then, the gentleman would be willing to concede that he had been damaged in an indefinite or an undetermined amount? That being the case, does not the gentleman think his arguments will be protected in the Court of Claims?

Mr. BOX. If the gentleman from Texas were sure that would be true and was also sure that the facts which he is trying to present to the House would remain in the minds of Members in dealing with the matter in conference hereafter and be preserved in this record so that the facts so vital to anything like a fair understanding would have due consideration throughout, he would not be very much concerned. If the gentleman from Ohio will permit, the gentleman from Texas favored and insisted upon these amendments because he thought they would go far in the direction the gentleman has in mind.

Mr. BEGG. I think the gentleman from Texas and I are in accord on all of these claims, but I can see where we are taking no chance along the line the gentleman is discussing unless he makes the contention that our courts can not be trusted.

Mr. BOX. But suppose this bill does not come back to this House in this shape, and suppose this House does not understand these facts?

Mr. BEGG. Well, of course, I will admit there is a possibility of that, but we will have our chance in court the next time and we have to do something. We either have to allow him a definite amount—which I would not favor at all—or else we have to send it to some place where they can ascertain what he is entitled to.

Mr. BOX. It is entirely possible that when the gentleman from Texas—like his fellows—takes a position he sometimes goes a little too far, but the gentleman from Texas does not think so in this case. The earmarks of a wrongful intention are all over this proposition. The gentleman from Texas has gone through this, and he acquits his fellows, just like he acquits the gentleman from Ohio, of any such intention, but the gentleman is very much afraid that the interests of the Government have not been properly gotten before this committee or before the House. Four years' service on the Committee on Claims has made it clear that the trying of great cases like this in this manner is a farce and that the House ought to provide some method of ascertaining the merits of these claims.

Mr. EDMONDS. Will the gentleman yield for a moment?

Mr. BOX. I yield.

Mr. EDMONDS. I know the gentleman does not want to give the House the impression that so far as I am concerned, as chairman of the committee, there is any conference contemplated looking toward any change in the bill if it passes the House.

Mr. BOX. May I ask the gentleman a question?

Mr. EDMONDS. Surely.

Mr. BOX. If the bill passes the House in the shape proposed, or substantially in these terms, because, of course, we can not bind the membership to any particular terms, will the gentleman from Pennsylvania, chairman of the committee, be

inclined as a member of the conference committee to insist in conference upon adhering to the terms of this bill or bringing the question back and giving the House a chance to vote on whether or not it will pay the money directly as the gentleman has heretofore proposed?

Mr. EDMONDS. I will make this agreement, and, as the gentleman knows, I voted in favor of this language. As a matter of fact, I had it drawn up in my office so that we could reach a compromise on this matter and get some justice for Mr. Leavitt, if there is any justice due him; and I will say to the gentleman that as far as I am concerned I will take no action, if the other House should change this bill in any manner or any particular, without instructions from the Committee on Claims.

Mr. BOX. The Committee on Claims has reported payment of this claim in full.

Mr. BULWINKLE. Oh, no.

Mr. EDMONDS. No; the gentleman is wrong about that.

Mr. BOX. That was done heretofore. I meant the Committee on Claims of a former Congress, the Sixty-seventh, of which the gentleman was chairman and which had many of the same Members as this one. That committee reported, recommending the making of an appropriation to pay this claim in full.

Mr. EDMONDS. I do not think it is fair for the gentleman to say that.

Mr. BOX. It is true, as I qualify the statement. It has formerly been reported. It passed the other House twice in that shape, and it has been reported by the immediate predecessor of this committee for payment, once with a provision making appropriation for its payment.

Mr. EDMONDS. And I will agree with the gentleman that if the other House changes this bill in any way from the shape in which we pass it in the House, that that change shall be taken up by the committee and the committee shall reach an agreement upon it.

Mr. BOX. That is very gratifying, and I am sure the gentleman will do exactly what he says; nevertheless, the gentleman from Texas does not believe that this claim ought to be sent to the Court of Claims.

Mr. HERSEY. Will the gentleman yield?

Mr. BOX. Yes; I yield.

Mr. HERSEY. Is not the Court of Claims in a better position to try this case and to do justice to it and conduct more complete hearings than this House?

Mr. BOX. It is; and that is why the gentleman from Texas favored that rather than a direct appropriation. I have not been able to present all these facts. I know how Members feel about reading long speeches. I have gone to the labor of going through this record and I do not know half as much about it as I ought to know about it in order to pass on it right. I would be glad to have the Members familiarize themselves with the facts of this case.

I think it is unwise to send to the Court of Claims such claims as this. I understand they are four or five years behind, and I have seen enough to know that facts favorable to the interest of the Government are easily forgotten.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. BOX. I yield.

Mr. WILLIAMSON. It seems to be perfectly clear from the report that has been handed in by the committee itself that the amount which it is proposed to be allowed here in the event the court should find such a sum due is in excess of any possible amount that could be due him, and certainly no such amount is due him upon the statement made by the gentleman from Texas.

Mr. BOX. I think the gentleman is correct about that, but the gentleman will notice that the committee put the limit at the top and provided that it should not be more than the most. That is the language of the limitation.

Mr. UNDERHILL. Is not that just a little bit exaggerated?

Mr. BOX. May be so.

Mr. UNDERHILL. The courts are in the habit of allowing interest on claims, as I understand it, when they make a favorable report.

Mr. BOX. Do they allow interest on such claims as this against the United States?

Mr. UNDERHILL. The Committee on Claims has not taken that position since the gentleman from Texas and myself have been members of it. We have refused to allow any claim for interest. It is my understanding that the courts take the same position.

Mr. BOX. I so understand, but I may be in error about that.

Mr. Chairman, I reserve the balance of my time. I thank you very much, gentlemen, for hearing my disconnected statement, but the breaking up of the statement has been caused by the many questions propounded to me by colleagues.

Mr. EDMONDS. Mr. Chairman, I yield such time as he may need out of my remaining time, to the gentleman from North Carolina [Mr. BULWINKLE].

Mr. BULWINKLE. Mr. Chairman and gentlemen of the House, when I first went into the consideration of this claim, I examined it with a prejudiced mind against the claimant. That was in the Sixty-seventh Congress. But after studying evidence and hearing the witnesses, I was convinced, beyond all doubt, that a wrong was done this man.

It is true that there is legal liability as far as the Government is concerned. This is a matter for the Congress to pass upon. But going further than that, there is a moral liability in this matter. You have this situation before you to-day for consideration. You have on the one hand one branch of the Government, advertising that the Government has surplus bacon to sell, let all who want come and make a bid for and purchase. You have another branch of the Government, on the other hand, and saying to that man who makes a bid and purchases, "You are to be indicted for hoarding foodstuffs; you have bacon in your possession."

Mr. BOX. Would it interrupt the gentleman if I asked a question?

Mr. BULWINKLE. Not at all.

Mr. BOX. Does the gentleman contend that Mr. Leavitt was indicted for buying?

Mr. BULWINKLE. No; I said that the Government said to him, "If you buy this bacon and if you have it in your possession, you are to be indicted for hoarding foodstuffs," which the other branch of the Government said to him.

Mr. BECK. Will the gentleman yield?

Mr. BULWINKLE. Yes, sir.

Mr. BECK. Suppose I had bought 2,000,000 pounds of bacon from the packers, and I had it from August until October, and I was indicted for having that in my possession, would my relation with the Government be any different from that of Mr. Leavitt?

Mr. BULWINKLE. Yes; but let me answer you by giving the full facts which you evidently have forgotten. It was in June that Mr. Leavitt first contracted for this bacon.

Mr. BECK. Just a moment. That question was raised in my mind by the memorandum that was dug up from the Acting Judge Advocate General which I saw yesterday for the first time, and that is the thing, or one of the things, that is puzzling me.

Mr. BULWINKLE. Mr. Leavitt did not have all of this bacon in his possession from August to October. Mr. Leavitt bid for it in June, making the first payment of \$60,000. It was not until August that he completed the payments. The bacon was not shipped to him at once, but during this entire time he was endeavoring to sell it in America and to foreign governments and in foreign countries. Some shipments he did make. He sold to Klopstock 150,000 pounds with an option for 500,000 pounds more. Klopstock was the man who went to Baltimore and went into the quartermaster's warehouse. When he arrived there he told the quartermaster what he had done, and the quartermaster said, "Why, it is no use buying that; we will sell you bacon considerably cheaper than Mr. Leavitt is selling it for and will sell you 500,000 pounds." There you have another agent of the Government undertaking to hurt the man they had sold the bacon to.

This went on until October 10, when the first indictment was made and the first time the bacon was libeled.

From October until March the Government had the bacon in its possession. After that time, after March when the libel was dismissed and Mr. Leavitt was acquitted, the foreign government refused to buy from Mr. Leavitt, saying, "You are a man that has been under indictment in the courts in your own country on account of this bacon which you are attempting to sell." Then the United States Government commenced flooding the market with bacon all over this country. There was an injustice done Mr. Leavitt, and there is no question about it.

Mr. BLANTON. Will the gentleman yield?

Mr. BULWINKLE. Yes.

Mr. BLANTON. What witnesses other than Mr. Leavitt, the claimant; Mr. Steinbrink, the attorney for the claimant; and Mr. Steur, another attorney for the claimant, were before the committee to testify in this case?

Mr. BULWINKLE. We had Mr. Klopstock—

Mr. BLANTON. Klopstock was one of the alleged purchasers.

Mr. BULWINKLE. One that did not purchase. We had in addition to that the Sixty-seventh Congress—it was reported to us by two Members of the House that a certain gentleman was here and knew the full transaction and that there was something wrong about it. We had him before the committee. I think the gentleman from South Dakota [Mr. JOHNSON] brought him up there. He did not testify to a thing against Mr. Leavitt and knew nothing about it. That is the reason that I started out saying that I was prejudiced against Mr. Leavitt. Not only that, but we had the letter from the Attorney General of the United States, we had the Secretary of War who said in his letter that if he could have done it he would have rescinded the contract and given the man his rights and benefits. We also had a letter from the Director of the Budget, Mr. Dawes, and we had Judge Lovett, of the Department of Justice, and also Colonel Hull, of the Judge Advocate General's department, and two or three other officers.

Mr. BLANTON. All of these that you speak of were ex parte statements in writing—they did not appear as witnesses before your committee but all made written statements.

Mr. BULWINKLE. The statements of the Director of the Budget, the Secretary of War, and the Attorney General were in writing, but Colonel Hull, of the Judge Advocate General's department, investigated this fully and one other of the investigating officers came before the committee.

Mr. BLANTON. Did Colonel Hull come before the committee?

Mr. BULWINKLE. He came twice before the committee.

Mr. BLANTON. The way it appears in the hearing is that it was before the Senate committee and not before the House committee.

Mr. BULWINKLE. He came twice before the House committee.

Mr. EDMONDS. We had Colonel Hull before the committee and also Judge Lovett.

Mr. BULWINKLE. There is no question about that. There was no attempt to keep anyone from coming before the committee.

Mr. BOX. Will the gentleman yield?

Mr. BULWINKLE. Certainly.

Mr. BOX. Did any one of these gentlemen before the committee advise any member of the committee about these adverse opinions?

Mr. BULWINKLE. No. I never heard of any adverse opinion until the gentleman spoke of it. The gentleman being a member of the committee should have shown these adverse opinions to the rest of us. We had Colonel Hull in cross-examination and others from the Judge Advocate General's department. It is not fair to the claimant or anyone else not to have brought this adverse opinion before the committee so that we could have said, "Bring the man here so that we can examine him."

Mr. BOX. If the gentleman will read the minority report written by the gentleman from Texas in the Sixty-seventh Congress he will find great sections of that adverse opinion quoted in the minority report.

Mr. BULWINKLE. The gentleman from Texas has no minority report in this session.

Mr. BOX. Has the gentleman read the majority report?

Mr. BULWINKLE. I have.

Mr. BOX. Clear through?

Mr. BULWINKLE. I have.

Mr. BOX. And does the gentleman say that the gentleman from Texas has no minority report on this bill?

Mr. BULWINKLE. I have just seen this statement on the back page.

Mr. BOX. The gentleman doesn't think that the minority report would be on the front page?

Mr. BULWINKLE. No; but I should expect that the gentleman would include these reports that he speaks of in his minority report.

Mr. BOX. The minority report states plainly my strong opposition to the bill and refers to an extended adverse report made by me to a former Congress.

Mr. BUTLER. Will the gentleman yield?

Mr. BULWINKLE. Yes.

Mr. BUTLER. I find in looking through the report that Secretary Weeks wrote a letter to Mr. Leavitt in which he said:

I understand that you are going to ask for congressional relief, and should any opinion be asked by Congress my present disposition would be to join with the Department of Justice in recommending relief.

Did Secretary Weeks testify before your committee?

Mr. BULWINKLE. No; that letter came before the committee, but Colonel Hull, of the Judge Advocate General's department, did come before the committee. Now, another thing. The gentleman from Texas answering a question of the gentleman from Virginia [Mr. Moore] just now in regard to an automobile seized for transporting liquor said that it was an analogous case. In the case he cited there was a man driving an automobile with liquor in it and the automobile is seized. In this case there is no liquor and nothing except the bacon that the Government itself sold to the man in which the Government says you are wrong in having that, but even though we sold you, you are attempting to hoard food-stuffs.

I say to you gentlemen after careful consideration, after a thorough study, I think the claim should be submitted to the Court of Claims in order that justice may be done a citizen of the United States. [Applause.]

Mr. GARRETT of Texas. Mr. Chairman, will the gentleman yield?

Mr. BULWINKLE. Yes.

Mr. GARRETT of Texas. How did the committee arrive at the figures, \$620,623.33?

Mr. BULWINKLE. I think I can show the gentleman that in the report. That is not the full purchase price of the bacon. The Government paid him back \$100,000 for holding some of the bacon.

Mr. BOX. That is a credit.

Mr. BULWINKLE. Yes; and then there are some other items.

Mr. GARRETT of Texas. If we pass this bill referring the matter to the Court of Claims, what precedent is there for limiting the Court of Claims in the adjustment of the claim to the amount fixed in the bill? If we want to refer the matter to the Court of Claims and adjust any claim, why say that it shall be limited to the amount fixed in the bill? That is the amount fixed after the hearing.

Mr. BULWINKLE. That is an amount beyond which the court should not find, as it was all that Mr. Leavitt claimed.

Mr. GARRETT of Tennessee. In other words, that simply fixes the limit?

Mr. BULWINKLE. Yes.

Mr. WILLIAMSON. What became of the bacon that Mr. Leavitt bought? Did he eventually sell it?

Mr. BULWINKLE. No; it was sold for 3% cents a pound for soap grease.

Mr. WILLIAMSON. By whom?

Mr. BULWINKLE. By the Government, for Mr. Leavitt. This bacon was not in tins, whereby it could be preserved. It was strip bacon and was lying in these different warehouses for months.

I shall extend my remarks by inserting a statement showing the dates the bacon was delivered to Mr. Leavitt (No. 1) or his order, and the dates that he made payment to the Government for the bacon (No. 2):

Mr. BECK. Mr. Chairman, this bill was before the House during the Sixty-seventh Congress and was defeated. It reappeared before the Committee on Claims during the early part of this Congress. Mr. Leavitt appeared before the committee with witnesses and made it appear that on June 12, 1919, he purchased 2,493,830 pounds of bacon stored in the Army warehouse at Baltimore, Md., for 28% cents per pound. He paid \$60,000 with his bid and the balance by August 19, 1919.

It was further made to appear that none of this bacon was ever in possession of Mr. Leavitt, but was continually in the possession of the Government; that only such portions of the bacon were released by the Government as were sold from time to time by Mr. Leavitt.

It was also made to appear that on October 27, 1919, the Food Administration seized 1,400,000 pounds of this bacon on a libel, a proceeding begun by the United States attorney for the southern district of New York and held until in March, 1920. During that time the price of bacon fell about 10 cents below what Mr. Leavitt paid for it, and the quality very materially deteriorated so that he finally sold it for less than 3 cents a pound, as I remember it. So far as the committee could learn, the Government through one department, was selling Mr. Leavitt bacon to be resold to the trade, and the Government, through another department, after the Government had his money, was prohibiting him from selling it until it became practically worthless, and through this proceeding Mr. Leavitt claims to have lost about \$700,000.

So far as this Congress is concerned no one appeared before the Committee on Claims on this bill except the claimant. The Government was not represented at all. No one looked after its interests. It was said that both the President of the United States and the Attorney General had urged the payment of this claim; that it was just.

When the question was asked what the United States attorney, who started the action against Mr. Leavitt, had to say about the case, the reply was that he was dead and gone, that he had started the case for the sole purpose of landing himself in a judgeship somewhere. When inquiry was made as to what the Government agents who investigated the charge of hoarding, upon which the case is based, had to say, the reply was "No one knows who they are or what has become of them." Every avenue of information seemed to be cut off.

Unable to find a copy of any hearings on this bill when it was before the Sixty-seventh Congress, I searched the CONGRESSIONAL RECORD for information about it. I found nothing there except unsupported statements opposing the bill. An appropriation bill in that Congress had an item in it for paying this claim. The hearings on that item had the statement of an Army officer to the effect that the claim should not, in his opinion, be allowed. Other members of the committee also searched for information regarding this claim, and were about as successful as myself.

This was the situation when the committee came to dispose of the bill. The committee had no desire to throw anything in the way of Mr. Leavitt getting what is justly due him. If he lost this money or any part of it through any fault of the Government, he should be reimbursed. If the Government was not at fault, Mr. Leavitt should get nothing. The Government or its agents did a great many useless and senseless things during the war and since. This may have been one of those things. This committee is not able to determine that fact. It is willing that the matter go to the Court of Claims where it can be determined. Mr. Leavitt had an opportunity to sell this bacon between August 19, 1919, and October 18, 1919, and did sell a considerable amount. He would have sold more than he did had it not been for the fact that the Government agent in charge of the Army warehouse in Baltimore induced Mr. Leavitt's customers to buy from the Government at a less price than they could get it from Leavitt. This is the point, in my opinion, upon which Mr. Leavitt's claim largely hangs. At

a time when he had a half million pounds of bacon sold, the Government agent in Baltimore defeated its sale by inducing the buyer to take from the Government instead of Mr. Leavitt. In so far as any claim arising out of the Government seizing this bacon on October 27, 1919, is concerned, I do not believe he has any legal or moral right to recover, nor do I believe the courts will so hold. During that period he should have had to take his chances with any other dealer in food supplies.

I supported this bill in the committee, and am supporting it here; first, because the committee had not the means to get at the facts, so far as the Government is concerned; and second, because no man should be deprived of a right to go into court to get justice. I opposed the bill as it passed the Senate because it gave the claimant the right to dip his hands into the Treasury and take over \$600,000 without the Government being given a chance to give its side of the case.

Mr. BLANTON. Mr. Chairman, for nearly three years I have opposed this bill before the House, and from a sense of duty I have objected to and blocked it every time it has been called up on the calendar. I have carefully investigated the matter and I do not believe there is a dollar due by the Government, but I do not intend, even believing as I do, to deny this man the right to go to the Court of Claims. Although I believe that this is a claim that ought to be turned down, and I do not believe the Government should pay this man one dollar, yet under the circumstances, under the recommendations made by the Budget, by the President of the United States, by the War Department, I think the matter should be adjudicated in a court. I am going to vote to send it to the Court of Claims, but I am also going to vote to strike out this suggestion of amount in the bill, which by the court might be considered our opinion of the measure of damages, because whenever you put a direction in the bill, such as you find in this amendment of the committee, you may find that that is the guiding and controlling factor before a jury in fixing the amount of the judgment, if one should be rendered. Suppose in a court trial a jury without any such limitation should decide that a man should be paid \$50,000. If you give them such a direction as in the bill, they might give him \$620,000.

Mr. CAREW. But there is no jury in the Court of Claims.

Mr. BLANTON. I am merely using that as an illustration. Whenever you send a case to the Court of Claims for the judges there to pass upon, they are human and in some respects, at least, are just like jurors, when it comes to passing upon the facts. Let Congress send a matter to the Court of Claims, indicating that in its mind that if the Government is responsible at all, it is responsible up to the amount of \$620,000, and that will be an influential factor before that court in rendering judgment. I think that feature ought to go out.

There are some admitted facts that have not been brought out here on the floor by the committee, and I think we ought to take them all into consideration. We can well assume that the attorney for the claimant will give us at least facts that are not prejudicial to the interest of his client. He is not likely to say much that would inure to the injury of his client. I want you to know what Mr. Steinbrink, the attorney for Mr. Leavitt, says in his testimony. He admits that on May 10, 1919, the Government advertised for bids to buy this bacon. There were lots of bids made. None of them was in an amount sufficient to warrant the Government in selling, and the Government turned every one down. Then our officers were instructed to sell the bacon under a new arrangement to the highest private bidders, but under no circumstances to sell the bacon at a price less than 22 cents a pound. On June 12, following the May 10 bids, Mr. Leavitt—

Mr. BULWINKLE. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. BULWINKLE. I wish to correct the gentleman. Mr. Leavitt was not one of the bidders on May 10.

Mr. BLANTON. I did not say that he was. I merely said that all of the bids of May 10 were turned down, but under this new arrangement that was made Mr. Leavitt voluntarily came in on June 12, 1919, without any influence from the Government, and proposed to buy from the Government two and a half million pounds of bacon, approximately, at 28½ cents per pound. Is the Government responsible because he was proposing to pay more than the Government would have sold it for? Of course not. Others may have offered 28½ cents per pound. Mr. Leavitt continued all through June and July and August to make payments on that contract. But he did not dispose of his bacon. Were deliveries made? Not altogether. Why? It was because Mr. Leavitt did not demand them during July and August. I want you to show me one scintilla of testimony

here when he ever made a demand upon the Government in July or August for one pound of bacon. I have examined Mr. Steinbrink's testimony; I have gone over it time and time again in my office.

Mr. Leavitt sent a man down there to the department—one of his customers—to have bacon delivered to him under the usual custom and practice, bacon that Mr. Leavitt had not yet paid for; but he understood his customer was to receive so many pounds of bacon and was to pay, not Mr. Leavitt but the Government, and the Government was to credit Mr. Leavitt's account with that amount. One of Mr. Leavitt's customers went down there and received \$53,000 worth of this bacon at 36 cents a pound, and paid for it at the rate of 36 cents a pound, and that money was credited to Mr. Leavitt's account at 36 cents per pound, when Mr. Leavitt had paid only 28½ cents for same. Some of our colleagues on the committee would have you understand that this bacon was to be delivered by the Government actually to Mr. Leavitt. That is not the case. The purchasers of most of this surplus property from the War Department never had it delivered actually to them. It was in most cases delivered to the people to whom they had sold. They would give an order to their customer to come there and get so many pounds of a commodity which they had bought and which, in turn, they had sold to their customers. It was delivered to the customers, not to the men who bought. That was merely following out the usual practice. Mr. Leavitt had been engaged in doing other business with the Government in respect to surplus property. As was stated by the gentleman from Texas [Mr. Box], he had bought surplus lumber and prunes and other commodities from the War Department, and he sold them, and sold them at a profit. Here is all there is about the War Department selling some of its own bacon to one of Mr. Leavitt's customers.

Mr. Leavitt had contracted to this customer to sell him bacon, 153,000 pounds of bacon, at 36 cents a pound. He did receive a certain amount at 36 cents per pound; but Mr. Leavitt's customer found out later that he could buy bacon from the United States Government, not at 28½ cents a pound at which Leavitt bought, but at 34 cents, and he bought from the Government 500,000 pounds and paid 34 cents a pound for it, which was more than Mr. Leavitt was paying the Government, nearly 4 cents per pound more. I now yield to the gentleman from Texas.

Mr. BOX. With reference to the delivery of the bacon under the contract, did not the gentleman find from the record that the Government reserved to itself 30 days within which to deliver the bacon after notice, and does the gentleman find any instance in which it is shown to the committee there was a delay of more than 30 days in said deliveries?

Mr. BLANTON. Not a single instance. You can look this evidence over carefully and scrutinize it carefully, and you will find the Government has not been given proper opportunity to be heard in this case. It has not brought its witnesses or presented the facts. The only evidence here the Government has produced are little ex parte statements; but when you get to the Court of Claims Mr. Leavitt is going to have to furnish sworn testimony, and the Government is going to have its opportunity to furnish sworn witnesses and give testimony under oath, and it is going to call them.

Gentlemen, who of you can defeat this bill when you look around the floor and see our great generalissimo from New York with his entire company here, and we have to take off our hat to him. There is no man on earth with an organization like his—Mr. CAREW from New York. He is here to-day with his full organization from New York. How are you going to beat this bill? You can not defeat it to save your life. They vote en masse, every one of the 23 votes, and you can not beat them.

Mr. LINDSAY. I want to state I am from New York, and I am going to oppose the bill and vote against it.

Mr. BLANTON. Then I must back up. But the gentleman from New York [Mr. CAREW] does have a splendid organization. I am complimenting him. Whenever I see all of them down here from New York there is something doing. [Laughter.] When I see them all together.

Mr. O'CONNELL of New York. Does the gentleman say they are absent all the time?

Mr. BLANTON. Oh, no! I am talking now about the whole bunch of them. My colleague from Texas is not going to beat this bill. The best we can do, gentlemen, is to do just what the committee has compromised on—send it to the Court of Claims. We have got a good Court of Claims. They are not going to mulet this Government. This is nothing in the world but the case of a rich Jew buying a lot of bacon. [Laughter.] If he were an orthodox Jew he would have let that bacon

alone. [Laughter.] Whenever you find a Jew slipping around and buying two and a half million pounds of bacon he is likely to damage himself some way or other. He ought to steer away from bacon and be orthodox. Mr. Chairman, I reserve the remainder of my time.

Mr. EDMONDS. Mr. Chairman, I would like to see if I can come to some arrangement in regard to debate on this bill.

Mr. BOX. I think we can abbreviate it, cut it very short. I have not many more requests for time.

Mr. EDMONDS. I have three. Has the gentleman any requests?

Mr. BOX. I will probably want to reserve a little time. I wish the gentleman would use some more of his time.

Mr. EDMONDS. Can not we come to a unanimous-consent agreement to close debate, say, in an hour or half an hour?

Mr. BOX. Could we come to this agreement, subject to the ratification of the House; could the gentleman assure the House—

Mr. BLANTON. I yield the balance of my time to the gentleman from New York [Mr. LINDSAY].

Mr. BEGG. Mr. Chairman, a point of order; the gentleman has surrendered the floor.

The CHAIRMAN (Mr. LEHLBACH). The gentleman from Pennsylvania had the floor.

Mr. BLANTON. I reserve the remainder of my time and will not yield now.

The CHAIRMAN. The gentleman can be recognized, but now the gentleman from Pennsylvania has the floor.

Mr. BOX. I think the gentleman from Pennsylvania and the gentleman from Texas can not make an agreement here that will cut other Members off from their rights to recognition.

Mr. EDMONDS. We can by unanimous consent.

Mr. BOX. We could abbreviate discussion to a great extent providing the gentleman will assure the House that in conference—and he probably will be on the conference committee—that he will report this bill back to the House and permit the House to vote on the question of whether or not the claim shall be referred to the Court of Claims or shall be paid out of the Treasury.

Mr. EDMONDS. I will agree to that.

Mr. BOX. The gentleman from Texas probably will not consume any more time.

Mr. EDMONDS. Further, as far as I am concerned, I will stand by the House's decision on the matter of its going to the Court of Claims. I can only speak for myself.

Mr. BUTLER. The gentleman will give the House a chance to vote on it?

Mr. EDMONDS. I will give to the House a chance.

Mr. BOX. If that is the case, the gentleman from Texas does not wish to consume further time.

Mr. BLANTON. I will yield the balance of my time to the gentleman from New York—

The CHAIRMAN. The gentleman from Pennsylvania still has the floor.

Mr. EDMONDS. I ask unanimous consent that debate close in half an hour.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that the general debate on this measure be closed in one-half hour. Is there objection?

Mr. BLANTON. Reserving the right to object—and I do not think I shall object—if the gentleman will permit me to have the floor long enough to yield 10 minutes to the gentleman from New York [Mr. LINDSAY], there will be no objection. I want to yield him 10 minutes.

Mr. EDMONDS. All right.

Mr. BLANTON. Well, Mr. Chairman, with that understanding, I yield to the gentleman from New York 10 minutes.

The CHAIRMAN. Is there objection?

Mr. BEGG. Reserving the right to object, Mr. Chairman, I think the gentleman from Pennsylvania wants to modify his request.

Mr. BOX. Under the agreement the gentleman from Texas will not ask for more time.

Mr. EDMONDS. Mr. Chairman, I wish to modify my request and ask unanimous consent that the general debate be closed in 10 minutes.

Mr. BLANTON. With the understanding that the gentleman from New York may have the time?

Mr. EDMONDS. Yes.

The CHAIRMAN. The gentleman from Pennsylvania modifies his request and asks unanimous consent that the general debate on this measure be closed in 10 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Texas [Mr. BLANTON] is recognized to yield time. The gentleman from Texas yields 10 minutes to the gentleman from New York [Mr. LINDSAY].

Mr. LINDSAY. Mr. Chairman, I rise in opposition to the bill.

When the bill was called up on this calendar heretofore I objected to it; and, reading the record, I find that Mr. Leavitt, who purchased the bacon, was down in his payments, and I think that was partly responsible for the delay in delivering the bacon to him.

I think the majority of people who made purchases during the war took speculative chances; and in this instance, like those, I think Mr. Leavitt took a speculative chance and lost, and I do not think this House ought to refund the money to him. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Louis Leavitt, out of any money in the Treasury not otherwise appropriated, the sum of \$620,623.33 in reimbursement of certain moneys paid by him to the United States and for certain expenses incurred under circumstances set forth in the communication of the President of the United States to the Speaker of the House of Representatives dated the 6th day of May, 1922, and in the accompanying report of the Director of the Budget, House Document No. 313, Sixty-seventh Congress, second session.

With a committee amendment, as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

"That Louis Leavitt, of Brooklyn, N. Y., is hereby authorized to bring suit against the United States to recover damages for any loss or losses which he may have suffered through action by governmental agencies, acting under authority of the Government, had in connection with the purchase by Louis Leavitt of surplus goods of the War Department and which were referred to in the opinion of the Attorney General, dated December 23, 1921. Jurisdiction is hereby conferred upon the Court of Claims of the United States to hear, consider, and determine such action upon its merits and according to the law which governs the principles of liability that prevail between private parties, but only so far as is herein indicated, and in accordance with the practice pertaining to such action between private parties, and to enter decree or judgment against the United States for the amount of such damages as may be found due to said Louis Leavitt, if any: *Provided, however,* That such right to sue, as is hereby granted, shall not apply to any interest nor to any claim for damages resulting from any criminal prosecution of the said Louis Leavitt on a charge of violating the penal laws of the United States: *Provided, That* such action shall be brought and commenced within four months from the date that this act becomes effective: *And provided further,* That no judgment shall be rendered for more than \$620,623.33.

"Sec. 2. That upon final determination of such cause, if a decree or judgment is rendered against the United States, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, a sum sufficient to pay final judgment, which shall be paid to said Louis Leavitt or his duly authorized attorneys of record by the Secretary of the Treasury upon the presentation of a duly authenticated copy of such final decree or judgment."

Mr. BOX. Mr. Chairman, I propose an amendment to the first section of the committee amendment on page 3. I offer an amendment to this effect:

On lines 1 and 2 of page 3, to strike out the words "*And provided further,* That no judgment shall be rendered for more than \$620,623.33."

The CHAIRMAN (Mr. SANDERS of Indiana). The gentleman from Texas offers an amendment, which the Clerk will report. The Clerk read as follows:

Amendment offered by Mr. Box: Page 3, strike out all of lines 1 and 2.

Mr. BOX. The purpose of this amendment is to avoid any suggestion of the Court of Claims or the Court of Appeals as to the amount that ought to be awarded, if any.

Mr. HUDSPETH. Mr. Chairman, will the gentleman yield?

Mr. BOX. Yes.

Mr. HUDSPETH. Did Mr. Leavitt claim more than \$620,623.33?

Mr. BOX. Originally, as presented to the department, the claim was very much more; but that was the amount brought to the Committee on Claims.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas to the committee amendment.

The amendment to the committee amendment was agreed to.

Mr. BOX. Mr. Chairman, I have another amendment. On page 3, line 5, after the word "hereby" and before the word "appropriated," I move to amend by inserting the words "authorized to be appropriated," so that it will hereafter read, "there is hereby authorized to be appropriated out of the Treasury," and so forth. That is a matter that is projected into the future. I do not know when the court will decide the case, and this is to authorize it in the future, if the House deems it wise.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Texas.

The Clerk read as follows:

Amendment offered by Mr. Box: Page 3, after the word "hereby," insert the words "authorized to be."

Mr. EDMONDS. Mr. Chairman, I do not think we ought to put that language in. If we owe Mr. Leavitt any money it ought to be paid. The claim has been hanging around the committee for four years. The French spoliation claims, referred to by the President in his message, has a favorable report from the Committee on Claims. You will by this amendment simply extend the time. If we owe this money, the claimant will never get it if he has to wait for the Committee on Claims to bring out a decision of the Court of Claims.

Mr. BLANTON. The gentleman from Pennsylvania knows that just as soon as a court renders a judgment the Committee on Appropriations immediately embraces it in one of the regular appropriation bills to cover such an item. Why not adopt the amendment?

Mr. EDMONDS. I do not see any reason why we should.

Mr. BLANTON. The Appropriations Committee will take care of it.

Mr. EDMONDS. That involves another committee, another trouble, another hold-up. If we do not honestly owe the money, let the court so find.

Mr. BEGG. It has been decided by rulings of the Chair that this committee has authority to legislate money out of the Treasury. Now, then, if the Court of Claims finds that the claimant is entitled to the money, why is not the proper thing to do to carry the appropriation for the amount?

Mr. EDMONDS. We ought to do either one thing or another—either not pass it or pass it in such form as will enable the claimant to get the money. He has been waiting for four or five years.

Mr. CAREW. Mr. Chairman, will the gentleman yield?

Mr. EDMONDS. Yes.

Mr. CAREW. Is not the form in which the bill is drawn in strict accordance with the rules of the committee for a number of years past?

Mr. EDMONDS. Yes. Sometimes we send a claim to the court for findings of fact. In other cases we have authorized them to pay the judgment. I do not think there is anything unusual in this procedure at all.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas to the committee amendment.

The question was taken, and the amendment to the committee amendment was rejected.

Mr. BOYCE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Delaware offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. Boyce: Page 2, strike out all of line 6 and the first four words of line 7. In line 18, after the word "damages" and before the word "as" insert the words "without interest." Strike out line 19, beginning with the word "Provided," and all the rest of page 2 down to the word "Provided" in line 23.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Delaware.

The amendment was rejected.

The CHAIRMAN. The question now recurs upon the committee amendment.

The question was taken, and the committee amendment was agreed to.

Mr. EDMONDS. Mr. Chairman, I ask the unanimous consent of the House to set this bill aside for a report at the end of the afternoon. I think that has been the usual custom on such bills, has it not?

Mr. BLANTON. But suppose the gentleman were to find himself without a quorum?

Mr. CAREW. You have only adopted the amendment but you have not passed the bill.

Mr. EDMONDS. I thought the bill had been passed.

Mr. CAREW. No.

The CHAIRMAN. The Chair will state that the gentleman from Pennsylvania earlier in the day moved that the House resolve itself into Committee of the Whole House for the consideration of private bills. This bill has reached the position where it is proper to ask unanimous consent to lay the bill aside and consider other bills.

Mr. CRISP. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CRISP. I have never seen the House operate in recent years under the general rules of the House in the consideration of private claims as we are operating to-day. The old practice was, when the House went into Committee of the Whole House to consider the Private Calendar, that after a bill was considered it was in order then to move to lay it aside with the recommendation that it pass, with or without amendment, and when that was disposed of the next bill was called, and when the committee as a whole rose then the Chairman made the report that the Committee of the Whole House had considered sundry private bills and had directed him to report them to the House for the action of the House. Would not that be the proper proceeding when the House is operating, as it is to-day, in Committee of the Whole House in the consideration of the Private Calendar?

The CHAIRMAN. The Chair will state to the gentleman that the Chair does not desire, unless it is presented to him, to rule upon that question. The Chair has stated that the gentleman's request for unanimous consent to do so was in order. If the question is presented, the Chair will be glad to pass on it.

Mr. CRISP. Then, another parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. CRISP. I am asking this with the utmost respect, because I think this is the proper way to consider the Private Calendar, so as to give the House an opportunity to pass on the merits of the claims. Is it not in order now, then, to make the motion that this bill be laid aside, with the recommendation to the House that it be passed with an amendment when the committee shall have concluded considering the other private claims?

Mr. EDMONDS. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The CHAIRMAN. The Chair will state to the gentleman from Georgia [Mr. Crisp] that before the Chair had an opportunity to respond to his parliamentary inquiry the gentleman from Pennsylvania made a motion to rise and report this bill back to the House with favorable recommendation. That motion is in order, and unless that question is presented the Chair would not like to respond to the gentleman's parliamentary inquiry. The Chair will state that it is his impression that such a motion would be in order, particularly in view of the fact that the original motion to-day was that the House resolve itself into Committee of the Whole House for the consideration of bills on the Private Calendar, making it in the plural. So the Chair is under the impression that would be proper, but he would not like to give that as an absolute opinion without looking up the precedents.

Mr. BEGG. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BEGG. When we adopt the amendment does that pass the bill?

The CHAIRMAN. The Chair will state to the gentleman from Ohio that we are in Committee of the Whole House. There is one single amendment, which is a substitute for the entire bill. That amendment has been adopted in committee. Of course, we do not pass the bill in committee; we merely rise and report the bill back to the House, with an amendment, with the recommendation that the bill pass.

Mr. BEGG. Has the committee actually passed upon the bill before us?

The CHAIRMAN. The committee has finished its consideration of the bill. The committee passes upon a bill through a vote on the motion to report it favorably, and when that motion is made and carried then the committee has acted upon the entire bill.

Mr. BOX. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BOX. If the committee does not now vote on whether or not it will report this bill to the House, favorably or un-

favorably, when will it have an opportunity to do so and have a separate vote on it as a separate proposition?

The CHAIRMAN. The motion is entirely in order; there is no question about that. The question is on the motion of the gentleman from Pennsylvania that the committee do now rise and report the bill back to the House, with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SANDERS of Indiana, Chairman of the Committee of the Whole House, reported that that committee having had under consideration the bill (S. 83) for the relief of Louis Leavitt had directed him to report the same back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

Mr. EDMONDS. Mr. Speaker, I move the previous question on the bill and all amendments thereto to its final passage.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. EDMONDS, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. EDMONDS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House for the consideration of claims bills on the Private Calendar.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House for the consideration of claims bills on the Private Calendar, with Mr. SANDERS of Indiana in the chair.

REUBEN R. HUNTER

Mr. EDMONDS. Mr. Chairman, I call up for consideration S. 353, an act for the relief of Reuben R. Hunter.

The CHAIRMAN. The gentleman from Pennsylvania calls up a bill, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That the United States Employees' Compensation Commission is hereby authorized and directed to award and pay to Reuben R. Hunter, of Deming, N. Mex., who suffered a total and permanent loss of sight in both eyes as a result of voluntarily fighting a forest fire on Government land in the vicinity of Cloudercroft, Otero County, N. Mex., in May, 1904, in an effort to protect valuable standing timber and other property of the United States, compensation at the rate of \$66.67 per month from September 7, 1916, for the period and in the manner provided by the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, for the payment of compensation for permanent disability of a civil employee resulting from personal injury sustained while engaged in the performance of his duty.

Mr. EDMONDS. Mr. Chairman, this bill is for the relief of Reuben R. Hunter. It appears that Reuben R. Hunter is not an employee of the Government. In New Mexico they had a forest fire or a fire on a Government reservation, and Reuben Hunter went out with a number of citizens and endeavored to put out the fire. While doing so one of his eyes was affected by the smoke, and he lost the sight of that eye. The other eye was affected by the loss of that eye, and he is now totally blind. At the time he volunteered his services Reuben Hunter was earning from \$4.50 to \$5 a day as a miner and would probably be earning from \$6 to \$8 a day as a miner now.

Mr. CRAMTON. Will the gentleman yield?

Mr. EDMONDS. Yes.

Mr. CRAMTON. I understood the gentleman to say that this occurred on a public reservation?

Mr. EDMONDS. On a Government reservation, so the testimony says.

Mr. CRAMTON. The best information that the report of the committee carries is the statement of the Acting Secretary of the Interior, who quotes the Forest Service to the effect that the place where the injury was reported to have occurred is outside of a forest reserve. That is the last statement in the report on that question.

Mr. EDMONDS. The report states that he was fighting a forest fire on Government land in the vicinity of Cloudercroft, Otero County, N. Mex.

Mr. CRAMTON. The statement of the Forest Service is that the point where the accident is said to have occurred was outside of any forest reserve.

Mr. EDMONDS. The Senate report which accompanied this bill when it was reported out of the Senate committee sets forth the fact that the fire occurred in township 16 south, range 11 east, which is now a part of the Lincoln National Forest. At the time of the fire this township was a part of an unreserved public domain. I have always understood that public domain is Government land. I may be wrong about that.

Mr. CRAMTON. The statement of September 3 of the Acting Secretary of the Interior, which is the latest report the committee quotes, is:

The Forest Service reports over the telephone that when this bill was referred to that bureau a thorough examination was made and they were unable to find any record of this incident, except that the place where the injury was reported to have occurred is outside of a forest reserve.

Of course, it may have been on the public land, but the question is whether it was on a forest reserve.

Mr. EDMONDS. I intended to say that it was on Government property. I did not mean to say it was a forest reserve. However, there are a number of witnesses who furnished affidavits to the Senate Committee and stated that they knew that Mr. Hunter was there and that he went out to stop this fire on a Government reserve and suffered this damage from the service he was rendering to protect Government property.

Mr. BLANTON. Will the gentleman yield?

Mr. EDMONDS. Yes.

Mr. BLANTON. I remember distinctly, and I think it was in 1918, when Mr. HUBERT STEPHENS, who is now a Senator, was at the head of the Committee on Claims, when this bill came up, the distinguished gentleman from Pennsylvania, who was then across the table, rose in his seat and said he would never vote for a bill of this kind because it would go behind the act of 1916 and open up hundreds and even thousands of such cases, which would have to be settled by the Government.

Mr. EDMONDS. The gentleman has not said he would vote for it now, has he?

Mr. BLANTON. Well, the gentleman is presenting it here.

Mr. EDMONDS. I am presenting it as it is my duty to do as chairman of this committee.

Mr. BLANTON. To my mind it comes here in a very weakened condition, remembering the attitude of the gentleman back in 1918. The gentleman knows, as a policy of government, that this man does not even come within the employees' compensation act, and there are thousands of cases that come within the employees' compensation act, and if we ever go behind the act of 1918 this Congress is going to be maled by claims. Does the gentleman think it is a wise policy now to ask the Congress to approve this bill?

Mr. EDMONDS. No; frankly, the gentleman does not.

Mr. BLANTON. Then I hope the House will vote it down.

Mr. UNDERHILL. Mr. Chairman, the gentleman from Texas [Mr. BLANTON] told you a fact which is undeniable. If the House ever attempts to break down or go behind the employees' compensation law, we are going to bring to ourselves more trouble than Congress and the Committee on Claims can handle.

This man was not even an employee of the Government. He was not requested nor required by anybody connected with the Government to participate in putting out this fire. This fire was not on Government property. It did, as a matter of fact, threaten Government property. This man was protecting private property. His case is a particularly pathetic one. But it is no more pathetic than hundreds of cases now before the Committee on Claims which the Committee on Claims will not even consider because they have not the time, and they realize or believe that the House would not stand for such legislation.

The chairman of the committee, I realize, is in an embarrassing position. The gentleman from Pennsylvania [Mr. EDMONDS] has taken a position heretofore on these matters and has refused time and time again to vote to report such claims as this. I do not believe there is a court, no matter how liberal the court or the jury may be, that would find damages as this bill asks us to find.

Furthermore, the sum involved is a larger sum than an employee of the Government would receive even under the existing workmen's compensation law. If you pass this bill, you establish a precedent to protect or cover every person in the United States who is injured in any way or manner by any Government agency, and bring every citizen of the United States under the provisions of the compensation law, which applies now only to employees of the Government.

The amount involved in establishing such a precedent as this would run into millions of dollars. The Committee on

Claims could not begin to take care of the claims that would come in and it could not without great injustice decide or adjudicate an infinitesimal percentage of them. The committee has established a rule, unwritten although it may be, that the committee would not go back of these compensation laws of 1908 and 1916. That is the proper course for the committee to take and the proper course for the House to take, and then in the future your House and your committee can adjudicate matters with some degree of equity and justice and some degree of expediency and expedition. [Applause.]

Mr. BOX. Mr. Chairman, the gentleman from Massachusetts [Mr. UNDERHILL], a member of the committee, has stated the facts of the case accurately. It is a very pathetic case and not a pleasant thing for several of us to write a minority report opposing the passage of the bill. The facts seem to be clear that this claimant, not in the service of the Government, not at the instance of anybody in the Government service, went out as any good citizen would do and engaged in fighting fire, not on Government land but on a section, a portion of which is said to have been Government land, and lost his eyesight. The proof is not very satisfactory that he lost his eyesight as a result of this fire fighting. The proof does show affirmatively that there were private and public lands in the vicinity. Those of us of the committee who do not favor the claim are unable to see how we can differentiate it from any case in which a private citizen goes out and fights fire in a neighborhood where there are both Government and private properties.

Mr. O'CONNELL of New York. Will the gentleman yield?

Mr. BOX. Yes.

Mr. O'CONNELL of New York. If this fire had occurred on Government property and the man was injured during the fire, would he be entitled to relief?

Mr. BOX. That would depend on circumstances.

Mr. O'CONNELL of New York. Suppose it had occurred on Government property and extended out beyond the Government property?

Mr. BOX. I would not in an offhand way want to fix any precedent in any imaginary case.

Mr. UNDERHILL. Will the gentleman yield to me to answer the gentleman from New York?

Mr. BOX. Certainly.

Mr. UNDERHILL. If the fire had been on Government property and the man had been required to fight the fire by the Government of the United States, he would not then come under the workmen's compensation law.

Mr. EDMONDS. Mr. Chairman, I would like to give this man a little sum of money, but as to the general policy of going back of the 1916 employers' liability act, I have tried to oppose anything of that kind in committee. It is a bad policy, and if we start that policy there will be no end to the millions of dollars that would be taken out of the Treasury. The act of 1916 should stand right where it is. I shall not be here next year to help hold up any bills of that kind, but I do hope that the House of Representatives will never allow any bill to go through which goes back of the act of 1916 providing for compensation for things that happened years back of that time.

Mr. MORROW. Mr. Chairman, I have heard the statement of the gentleman that this claim did not come within the law and that if you established a precedent of this kind you would have hundreds of claims coming in before this Congress for relief.

As has been said, this is a very pathetic case. This occurred in the State of New Mexico in 1904, long before the liability act was passed. This man, then a young man, just entering upon his manhood, at the age of 20 years, physically strong, a coal miner, went out to fight a fire. The gentleman says that it was not on public property, but in a section where there was included private property. If this report is to be believed, it was public land belonging to the United States Government. There was adjoining where this fire occurred a great forest which is now the Alamo Forest Reserve in New Mexico, containing valuable timber. This man organized a force, went out to fight the fire, not for one day but for several days, to protect Government property. I say that public land is just as much Government property as your public buildings are. The result was that he lost his eyesight from fighting that fire. The report, in my opinion, is very clear on that subject.

I admire the committees of this House, I admire the Claims Committee, and I believe that that committee wants to perform its duty properly.

Another body has on three occasions passed this bill. I do not think this claim has ever been presented to this House previous to this time. It has been upon the calendar, but has never been presented.

Mr. Chairman, the great body of law is the unwritten law. Courts interpret law almost daily that did not exist before. It is said that if we allow this claim we will have hundreds of other such claims. This claim is a claim peculiar in itself. I say that every citizen should protect the property of his Government, that every citizen of the State should protect the property of his State and every citizen of a community should protect the property of his community. If a fire should suddenly break out in this building and some private citizen through his efforts should put out that fire and in so doing be injured in limb or should lose his eyesight, of course one could say that there is no law to compensate him, but what would this House do? What would the citizens of this community do? There would be some method provided whereby he would be compensated.

I want now to take up this report. It is quite a lengthy report—Senate Report 87, Sixty-eighth Congress, first session. I read:

The Committee on Claims, to whom was referred the bill (S. 353) for the relief of Reuben R. Hunter, having considered the same, report thereon with a recommendation that it do pass.

Attached herewith is Senate Report No. 87, which is made a part of this report.

[Senate Report No. 87, Sixty-eighth Congress, first session]

The Committee on Claims, to whom was referred the bill (S. 353) for the relief of Reuben R. Hunter, having considered the same, report favorably thereon with the recommendation that the bill do pass without amendment.

The facts in the case are fully set forth in Senate Report No. 34, Sixty-seventh Congress, first session, which is appended hereto and made a part of this report.

[Senate Report No. 34, Sixty-seventh Congress, first session]

The Committee on Claims, to whom was referred the bill (S. 906) for the relief of Reuben R. Hunter, having considered the same, report favorably thereon with the recommendation that the bill do pass without amendment.

The facts in the case are fully set forth in Senate Report No. 657, Sixty-sixth Congress, second session, which is appended hereto and made a part of this report.

[Senate Report No. 657, Sixty-sixth Congress, second session]

The Committee on Claims, to whom was referred the bill (S. 676) for the relief of Reuben R. Hunter, having considered the same, report favorably thereon with the recommendation that the bill do pass with an amendment.

Strike out all after the enacting clause and insert the following:

"That the United States Employees' Compensation Commission is hereby authorized and directed to award and pay to Reuben R. Hunter, of Deming, N. Mex., who suffered a total and permanent loss of sight in both eyes as a result of voluntarily fighting a forest fire on Government land in the vicinity of Cloudercroft, Otero County, N. Mex., in May, 1904, in an effort to protect valuable standing timber and other property of the United States, compensation at the rate of \$66.67 per month from September 7, 1916, for the period and in the manner provided by the act entitled 'An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes,' approved September 7, 1916, for the payment of compensation for permanent disability of a civil employee resulting from personal injury sustained while engaged in the performance of his duty."

In May, 1904, a disastrous forest fire raged in the vicinity of Cloudercroft, Otero County, N. Mex., on land embraced in T. 16 S., R. 11 E., a great portion of which was Government land and covered with valuable timber. This land is now embraced in the Alamo National Forest. At intervals of time for several weeks Reuben R. Hunter, claimant, together with several others, voluntarily fought this fire in order to save valuable standing timber and other public property. A great portion of this timber was on Government land. By reason of the exposure to the intense heat and smoke for such a great length of time the strain was too great on his eyes and total blindness was resulted, and, although he has been examined by specialists, they pronounce his case to be incurable.

A summary of the evidence as shown by the affidavits of eyewitnesses and those familiar with the facts is as follows:

"William Goodsell: Was present with R. R. Hunter, claimant, at the fire which was raging on Government land in Otero County, N. Mex., and that Hunter rendered faithful and valuable service in subduing the fire and from which he sustained injuries resulting in the complete loss of eyesight and is now totally blind.

"John Hunter: The father of Reuben R. Hunter, claimant, saw him fighting the fire in Cox Canyon about three hours before he was stricken blind.

"Reuben Hunter: Claimant states that he is the same person who fought the forest fire in 1904 in Otero County, in T. 16 S., R. 11 E., with others, at different intervals of time, until the same was extinguished, and that by reason of the intense heat and smoke caused him to lose his eyesight, and total blindness has resulted.

"J. E. Hudman and Charles Hudman: Both of Cloudercroft, Otero County, N. Mex., identify the map which is in the file as showing a correct description of the land over which the fire raged; that it was largely Government land; and that Reuben R. Hunter fought this fire almost over the entire area.

"J. E. Edgington: County surveyor of Otero County, N. Mex.; lived there and near land at time of the fire and familiar with this fire in 1904, and that this fire swept over an area of Government land; that the map is a true and correct description of the fire-swept area, conforming with legal subdivisions.

"Will Hunter and H. Hunter: They have examined the map or plat of the land made by Surveyor Edgington and that the same is true and shows the fire-swept area; that Reuben R. Hunter, claimant, fought fire over almost the entire area of Government land, and that each of them was also engaged in this fire fight. They believe that the heat and smoke from this fire caused Hunter to lose his eyesight, as the heat was very intense.

"Jesse R. Goodsell: That he personally knows Reuben R. Hunter, and was present at the fire which raged on Government land in Otero County in 1904; that he saw Reuben R. Hunter engaged in fighting the same, and that Hunter received injuries to his eyes from this fire resulting in total loss of eyesight. That the above facts are within his personal knowledge.

"S. J. Smith (letter Mar. 28, 1917, p. 4): That Reuben R. Hunter made the statement to him that he 'was stricken (blind) while fighting fire, and that he had to be called back from the fire by his comrades, and could not see to drive team home.'

"Dr. Thomas A. Haxby (certificate): The examining physician that examined Hunter after the fire in Cloudercroft, Otero County, N. Mex., in the spring of 1904, and who believes that from his examination that Hunter lost his eyesight from the intense heat and smoke from fighting this fire.

"Dr. F. D. Vickers (affidavit): From his examination of Reuben R. Hunter he states that he has a double cataract, no perception of light, and no possibility of recovering sight by an operation. That Hunter will remain totally blind all his life. That his health is otherwise good."

The following persons of Deming, N. Mex., the present home of Reuben R. Hunter, testify to his good character and urge payment of this claim. They are men of the highest standing in that community, as shown by letters and from my investigation: S. J. Smith, member of the legislature; J. S. Vaught, district attorney; R. B. Griffith, editor; E. R. Vallandigham, editor; William E. Foulks, postmaster; J. G. Cooper, vice president Deming National Bank; B. N. McKeyes, United States commissioner; John Corbett, president Bank of Deming; F. L. Nordhaus, merchant; N. E. Almy, secretary chamber of commerce; F. C. Parish, garage owner.

Mr. VINSON of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. MORROW. Yes.

Mr. VINSON of Kentucky. Does this man claim to own any property in the vicinity of the fire?

Mr. MORROW. He did not.

Mr. VINSON of Kentucky. Does the record disclose under what circumstances he fought the fire?

Mr. MORROW. The fire started and he just went out there and fought the fire to protect the Government timber.

Mr. VINSON of Kentucky. Voluntarily?

Mr. MORROW. Yes. I take the position that you frequently find there is no existing law. This man to-day is totally disabled. He is 40 years of age. Twenty years ago he suffered a terrible disaster doing what? In protecting Government property. You may say that because a man is not employed in the service of the Government he is not entitled to a reward, he is not entitled to recover, and that the Government is under no obligation to take care of him. What happens to a man in a community when he becomes disabled? The community takes care of him, the State takes care of him just as it takes care of the poor. Can this great Government afford to say that this man saved for the Government of the United States millions of dollars' worth of timber in protecting it against fire, but that it will not reward and take care of him in his disability?

Mr. UNDERHILL. Mr. Chairman, will the gentleman yield?

Mr. MORROW. Yes.

Mr. UNDERHILL. Who has been taking care of him for the last 20 years?

Mr. MORROW. I have an affidavit here that the county commissioners are paying him charity.

Mr. UNDERHILL. Is not that usual in all the States of the Union?

Mr. MORROW. But, my friend, he was taking care of Government property at the time he met his disability.

Mr. BARBOUR. Is it not a fact that in case of these forest fires the Government has the right to draft the citizenship and compel them to go out and fight the fires?

Mr. MORROW. Absolutely.

Mr. BARBOUR. And if they do not go, it can punish them in criminal proceedings? There are laws to that effect.

Mr. MORROW. Yes.

Mr. UNDERHILL. He was not drafted in this case.

Mr. BARBOUR. He volunteered, which showed his good citizenship.

Mr. MORROW. I desire to put this affidavit in the RECORD showing the man's present condition. It was made on the 31st day of May, A. D. 1924, and reads as follows:

STATE OF NEW MEXICO, County of Luna, ss:

Reuben R. Hunter, being first duly sworn according to law, says that he is of the age of 39 years, resides at Deming, Luna County, N. Mex., and is the identical person mentioned in S. 353, an act entitled "An act for the relief of Reuben R. Hunter," now, as he is informed, standing upon the Consent Calendar of the House of Representatives.

Affiant further says that report No. 521 from the Committee on Claims of the House of Representatives, Sixty-eighth Congress, first session, to accompany said S. 353, has been read to affiant, and that affiant fully understands the contents thereof, and that all of the findings of fact contained in the majority report regarding the loss of affiant's sight while engaged in combating a forest fire upon the public domain, and that all of the evidence recited upon which said findings are based are true.

Affiant further says that at the time of the said injury, affiant then being under the age of 20 years, affiant was by occupation a miner, earning from \$3.50 to \$4.50 per day; that by reason of his said injury he became at once unable and has always since been unable to follow his said occupation of mining; that affiant then learned the trade of broom maker, and followed the same for a number of years, but that he is unable to maintain himself or, in fact, to make any substantial daily sum in following such occupation for the reason that he is unable to compete with the machine-made product; that affiant has never been able to produce more than a dozen and a half brooms per day, and can not realize for his labor more than 50 cents per dozen.

Affiant further says that at the time of his said injury he had no property nor means of support except his daily labor, and that he has never since been able to acquire any property, and now has no property, income, or means of support except as hereinafter stated.

That during the past year or more affiant has been compelled to resort to charity of one sort or another for his sustenance; that he has traveled from town to town with his fiddle, playing on the streets where permitted; that the people of his community, Deming, N. Mex., have from time to time given him benefit dances; that he has received contributions from the Woman's Club; and that in the month of January, 1924, he received from the county poor fund the sum of \$37.50 and for the month of April from said fund the sum of \$15, and expects to receive such amount of \$15 per month from such poor fund indefinitely.

That affiant has no relatives legally obligated to his support and no relatives who are able in the least to contribute to his support, and that he lives with his father, John Hunter, age 76 years, whose sole source of income is \$12.50 per month received from the old miners' relief fund.

Further affiant says not.

REUBEN R. HUNTER.

Subscribed and sworn to before me this 31st day of May, A. D. 1924.

[SEAL.]

JOHN C. WILSON,

Notary Public.

(My commission expires May 25, 1925.)

Mr. ROMJUE. Mr. Chairman, will the gentleman yield?

Mr. MORROW. Yes.

Mr. ROMJUE. I am sure the gentleman has made a careful investigation of this matter. Will he state whether of his own knowledge the fire actually occurred on Government property?

Mr. MORROW. I read to the House the reports from the county surveyor and some others stating it was almost entirely public ground. I know the entire forest was public land, and at that time it was contemplated to be taken into the forest reserve. Shortly thereafter it became a forest reserve and is known as the Alamo Forest Reserve. Just a few weeks ago the newspapers reported that \$50,000 of damage was done by fire in that reserve.

Mr. ROMJUE. And the fire that he was attempting to put out at the time of his injury was raging in the Government property?

Mr. MORROW. Absolutely. I know the man personally, having met him within a few months, and I saw his condition, and I know that he is totally blind and has been for 20 years.

Mr. BOYLAN. Is it not quite possible that were it not for the heroic efforts of the man at the time there would be no Government reserve there now?

Mr. MORROW. There certainly would be much less of one than there is there now. I have heard considerable reflection passed upon the other body for passing certain legislation that this body does not pass. I have looked over the record of the Senate that passed upon this claim, and when we see such distinguished statesmen as the Senator from Utah [Mr. SMOOT], the Senator from Missouri [Mr. SPENCER], the Senator from Montana [Mr. WALSH], the Senator from New Mexico [Mr. JONES], and the late lamented Senator from Massachusetts [Mr. LODGE] saying that this is a just claim and should be passed on favorably I believe this House should hesitate long before turning down a claim of this character.

I just desire to read into the Record the remarks of Senator Lodge made in the other body:

Mr. JONES of New Mexico. I thank the Senator from Utah for withdrawing his amendment.

Mr. LODGE. Mr. President, I am very glad the Senator from Utah has withdrawn his amendment. It seems to me this is one of the most deserving cases I ever heard of. It is obviously to the interest of the man to give him monthly payments. He certainly deserves it. He is carrying a lifelong injury, under which he may have to suffer for many years. I sincerely hope the bill will pass in its present form. [Applause.]

Now, gentlemen, I believe that in the presenting of this bill to this Congress it is a just claim and one that should be considered.

Mr. EDMONDS. If the gentleman will yield, my principal objection to the bill is the putting of this man on the employees' liability list under the compensation act. If this bill were for paying this man a sum of money, I would agree to it as far as I am personally concerned. My objection is that by starting and going back of the 1916 law you will not be able to say where you will stop. I think that a proposition of this kind should be made to the House to give to this man a fair sum of money, which, from a reading of the case, I think he is entitled.

Mr. MORROW. In answer to the gentleman, I would say that the Senate seems to have considered that. The matter was presented of a lump sum of \$10,000, and after due consideration they come in the same position of allowing him compensation similar to other civil employees of the Government and he be placed upon the pension list. I do not think you are establishing a precedent in this case.

Mr. EDMONDS. If the gentleman will yield, he does not come in the same position as any other employee of the Government.

Mr. MORROW. The Senate placed him in it.

Mr. BOX. If the gentleman will yield, the gentleman knows the position of the gentleman from Texas. Is not this true also? In the form in which your Claims Committee reported this bill and recommended its passage, does the gentleman know whether if it was referred back and changed it would have to pass the Senate?

Mr. MORROW. I do not think so.

Mr. BOX. I mean if we pass it in this form, then it is final; but if amended, it is not final?

Mr. MORROW. No.

Mr. BEGG. Mr. Chairman and gentlemen of the committee, it is always much easier in a case of this kind to take the side of the claimant, because you can play upon the sympathy and emotions of the House, than it is to take the side of the Government. In the first place, I can not understand the Committee on Claims that reports the bill out to the House recommending the payment of any amount when, so far as any evidence on file with the Government anywhere pertaining to the case, it does not know this man Hunter ever existed. Now, I do not question there is a man by the name of Hunter in New Mexico who is perhaps blind. I do not question such a man existed and has gone blind for some reason. But, gentlemen of the Congress, if you will find in a single item in the Department of the Interior, that had control of the Government lands prior to 1905, and in the Department of Agriculture since that time that this man Hunter even fought a fire, then you have some grounds upon which to present a case.

Mr. BARBOUR. Will the gentleman yield right on that point? I want to say often when a forest fire breaks out they do not wait to make up a lot of Government records, but they go out and grab everybody they need and rush them in and compel them to fight that fire. [Applause.]

Mr. BEGG. Certainly that is the argument presented by the other side, but when the statement is made by the Government that they did not report it seems to me they have been a long, long time waiting to bring it to the attention of Congress that this man was going to make a claim for compensation. Now, great consideration is held by the proponents of this bill that he was volunteering in fighting the fire that was raging in the vicinity of private property, but so far as any evidence at my command goes the fire was on private property at the time of the fire, but the fact that he volunteered makes him an exception, and you want us to come in and pay him \$60 a month when you only pay the defenders of the war \$50 a month; and there was a veto of the bill, and there are now many 80 years of age who fought in the Civil War, and then in the Spanish-American War; those who defended the flag are getting the magnificent sum of \$30, but if a man volunteered to fight a fire that raged in the vicinity of private property then the Government is under obligation to pay him \$60 a month. It seems to me that we are very inconsistent, if anything, when we advocate that. Now, where will we get to if we pass this bill and recognize a monthly stipend?

What is the end of it? If the House Office Building over here were to take fire and the owners of Congress Hall were to come over and attempt to put out the fire in order to save their own private property and were thereby injured, they would have a just right, according to that reasoning, to come to the Congress of the United States and make a claim for compensation, and every man who supports a measure of this kind would morally be bound to support that claim. There is no limit, if you want to embark on the sea of accepting statements not backed up by records from official departments of the Government.

Mr. WEFALD. Mr. Chairman, will the gentleman yield?

Mr. BEGG. Yes.

Mr. WEFALD. I want to ask if the gentleman does not consider fighting fire and saving valuable property is defending and honoring the flag as much as going to war?

Mr. BEGG. No. I do not concede that at all.

Mr. WEFALD. It is part of good citizenship.

Mr. BEGG. Certainly; and there is nothing wrong with it. But if your house takes fire in this city, or in any other city, and I come over to help you protect your property and fall downstairs and break a leg, I will ask the gentleman from Minnesota if he is obligated to compensate me for the injury I have incurred?

Mr. WEFALD. Well, I do not think the gentleman would break his leg; he is too active and able-bodied to do that. [Laughter.]

Mr. BEGG. I think from past experience I would be liable to. But, Mr. Chairman and gentlemen of the committee, I shall not oppose—

Mr. MORROW. Mr. Chairman, will the gentleman yield?

Mr. BEGG. Yes.

Mr. MORROW. Where do you get any evidence that he was fighting fire on private property?

Mr. BEGG. So your report says. I will read it to you. I have no evidence except what your committee has furnished. Your report says:

In May, 1904, a disastrous forest fire raged in the vicinity of Cloudcroft, Otero County, N. Mex., on land embraced in T. 16 S., R. 11 E., a great portion of which was Government land covered with valuable timber.

Now, what was the rest of it?

Mr. MORROW. That does not say he was fighting fire on private property.

Mr. BEGG. No; and I did not say that. But you have not furnished any evidence, and there is not any evidence in the Department of Agriculture, and the report is from the Department of Agriculture; and there is no evidence from the Department of the Interior that they ever heard of the man in connection with the forest fire.

Mr. EDMONDS. There are affidavits in existence of people who were out with him fighting the fire.

Mr. BEGG. Oh, yes; affidavits. I had an old fellow come into my office not long ago and claim to have fought in the Civil War in Tennessee. I said to him, "You will have to identify yourself as having been in Tennessee," and he brought in half a dozen of his old comrades.

Mr. EDMONDS. This is not the first time this claim has been here. It has been before the committee for several sessions.

Mr. BEGG. Why has the committee brought it out now without any evidence from the department?

Mr. EDMONDS. I think this bill has been reported in the Senate, but not in the House.

Mr. BEGG. Why not?

Mr. EDMONDS. Because of the congestion in the House.

Mr. BEGG. I am afraid there will be a little more congestion.

I want to conclude with this statement to Members of the House: I do not want to appear unduly harsh. On the other hand, I do not want to get myself in a position where I can be approached and asked to do things that will ultimately amount to millions of dollars, because I have acted favorably upon a bill granting a pension to a man greater than that which any other volunteer pensioner of the United States ever received without any evidence in the world that he actually performed any service except the testimony of some interested people.

Mr. BLANTON. Mr. Chairman, this is a most pathetic case, indeed. It deeply arouses the sympathy of all of us; there is no question about that. But are we to take the money of the people out of the Treasury and pay a man, woman, or child wherever we find one sorely afflicted who arouses our sympathy? If we are to do that, I can go into every State of this Union and, turning the blind institutes and asylums inside out, can show you hundreds of pathetic cases of blind boys and blind girls and blind men and blind women who are afflicted, who are pathetic cases, who appeal to our sympathy. But we can not take Government money and pay them.

When I first came to Congress I was put on this Claims Committee. I was at the foot of the table. The gentleman from Pennsylvania [Mr. EDMONDS] was up next to the head of the table on the opposite side. There were several of these cases before that committee at that time seeking payment, just as pathetic cases as this one, and I saw the chairman of that committee rise, when at that time I was afraid even to open my mouth [laughter], and I heard the chairman of that committee say, "Gentlemen, we can not afford to allow this claim." He said, "If we go behind the compensation act of 1916 it will mulct the Government in millions of dollars, because there are many cases all over the United States that are within this same class."

That was not the only speech I heard. I heard the gentleman from Pennsylvania, the chairman of this committee [Mr. EDMONDS], who reports this bill, speak against it. He said the same thing. He said, "We can not let our sympathies run away with us." He said, "This is a policy of Government that we are to pass upon." He said, "If you allow this claim, you will have to allow everyone of these others, and there are hundreds of claims almost in every State which will be put in this same class, and if you once set this precedent you will have to allow everyone of them."

Mr. WEFELD. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. WEFELD. The gentleman does not contend that every blind person would come into this Congress with a claim?

Mr. BLANTON. I was speaking of people sorely afflicted with injuries of many kinds arousing our sympathy, all of whom would want compensation.

Mr. WEFELD. You were speaking of the blind women and children. I say all of them could not come in here.

Mr. BLANTON. The gentleman from Minnesota diverted me.

I want to say that at that time I backed up the chairman of that committee and also our present chairman in their sound position. I voted with them; I followed them. It rocked along, and we did not report that bill; but it came up again, and I happened to be appointed to draw up the adverse report of the committee. You will find in the archives of that committee, somewhere among its dusty papers, an adverse report that I was instructed to make for the committee on this very case. In that report I went into details. I tried to show approximately about how many new cases it would set a precedent for if we allowed this one.

Are you now going to go behind the act of 1916 just because we feel sympathetic for this poor, blind man out in New Mexico? I have as much sympathy for him as any man here, and I will go as far in personal charities as almost any man to relieve his distress and suffering. But are you going to take the people's money when you have no authority of law? We come here under our oaths to administer the law of the land and to vote according to the law of the land, but there is no law authorizing any payment to this man.

Congress passed the compensation act in 1916, which provided that certain employees of the Government who were injured in line of duty should be paid a certain amount. That did not apply to employees of the Government preceding that date; it applied only to employees of the Government who should be injured after the passage of that act and not before.

Mr. BOYLAN. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. BOYLAN. Why does the gentleman hold that was a sacred and sanctified act in 1916, and that on account of the sanctity of the act all of the injustice of the years before should be forgotten, just because in that great year of 1916 this great and sublime act was passed?

Mr. BLANTON. Why does the gentleman hold, under the pension laws passed by Congress, that a man who served the Government back in 1865, who defended his flag and country, can not get a pension, no matter how much he was injured dated back to 1865, but is paid only from the date he files his pension claim in the Pension Department or in Congress? Why did Congress pass such a law as that?

Mr. BOYLAN. Does the gentleman from Texas desire me to answer his question?

Mr. BLANTON. Certainly. That is the law.

Mr. BOYLAN. We provide that machinery for carrying out the wishes and desires of Congress.

Mr. BLANTON. Well, that was the wish and desire of Congress back in 1916 and it never has been changed by law.

Mr. BOYLAN. What is the simile? I do not get the simile at all.

Mr. BLANTON. Well, I can not make my friend understand.

Mr. BOYLAN. Well, I am not considered to be particularly obtuse. [Laughter.]

Mr. BLANTON. Here is the situation: Congress has passed a law with respect to pensions and in that law has provided that a party who served and was injured in 1865, or who has reached a certain age at this time and becomes disabled, can get a pension, but not dated from the time he became disabled but paid from the date he files his application. Congress has fixed a definite, specified date. Likewise, in passing the employees' compensation act, the Federal act, in 1916, Congress provided a date behind which they can not get compensation but in front of which they can.

Mr. BOYLAN. I hold that is not a proper comparison, because Congress could not pass a law allowing a pension before the war took place. The war would have had to be over before they could pass such a law.

Mr. BLANTON. No. But in 1916 Congress could have said, if it wanted to, that all parties who had been injured in the past can get compensation.

Mr. BOYLAN. But it should have.

Mr. BLANTON. It did not do that.

Mr. BOYLAN. But it should. Why should the gentleman be so unjust because Congress neglected to do that and failed to let these men seek ordinary and common justice at the hands of the Government?

Mr. BLANTON. Our friend from New York has been here and very active in this seat most of the last two years when we were in session, and he never yet has offered an amendment to change that law to make it applicable to all parties who were injured prior to the passage of the act. If he wants to do that and make it applicable to all I will go down along the line and argue that with him. But if he changes it, he ought to make it applicable to all who have been injured and not pick up just one pathetic case, when there are hundreds of others who have gone without relief and who have for 20, 25, and 30 years been injured and begging for what they considered justice at the hands of the Government. The chairman of this committee knows lots of such cases, cases just as pathetic and just as appealing to our sympathies. He knows of such cases, and that is the reason he has voted up to this time not to report such a bill; he knows that if we pass such a bill it will set a bad precedent which we can not go behind and he knows it will result in favorable action on many such cases when they come before the committee.

I want to say to my colleague from New York [Mr. BOYLAN] and my colleague from Georgia [Mr. UPSHAW], who has just been itching to get up and say something in behalf of this bill because he is sympathetic [laughter]—I want to say this to them: This man is not entitled to one cent under the law, but in order to prevent a bad precedent from being set by giving him a pension, and to show that my heart is in the right place for this poor man, who has been blind all of these years out in New Mexico—

Mr. MORROW. I am glad to know the gentleman has a heart.

Mr. BLANTON. And who has just been allowed \$15 a month by the State of New Mexico; during the last month he has been granted compensation at the rate of \$15 a month by his county—I want to say this: I intend to offer an amendment, when the bill is read again, which will provide for striking

out the provision placing this man on the compensation list at so much per month and paying him a lump sum of \$3,000 in cash. But I want to say this: I would not vote for putting any man on that compensation list behind 1918 unless you change the law and make it applicable to all of them. If you want to make it applicable to all of them, all right. But I want to say this to my friend from New Mexico [Mr. Morrow]: I think \$3,000 in cash paid to this poor man right now will be worth more to him than to have this matter delayed by going back and forth between the two Houses of Congress.

Mr. UNDERHILL. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. UNDERHILL. In order to assist the gentleman and in order that he may assist the committee, may I state to him that it has been the policy of the committee, where an employee of the Government has presented such a pitiable case as this, to award compensation under the law of 1908, where we allowed him one year's salary.

Mr. BLANTON. I know, but this man has suffered total blindness for 20 years.

Mr. UNDERHILL. Oh, there are thousands of them.

Mr. BLANTON. I know that and I know this: I know the temper of this House and I know that unless you adopt such an amendment as I suggest these gentlemen here are going to pass this bill [laughter], and it is going to cost this Government several million dollars whenever we set that precedent. I think that if the gentleman from Massachusetts wants to save the Treasury and at the same time protect this poor man he should be willing to give him a lump sum of \$3,000, and I think if he will consent to do that it will satisfy these gentlemen.

Mr. UNDERHILL. The gentleman from Texas usually stands on principle rather than on policy.

Mr. BLANTON. Usually, yes; but sometimes I have found out you have got to have a little policy. [Laughter.]

Mr. UNDERHILL. I have not seen any evidence of it. I will simply say to the gentleman, if he is not aware of the fact, that New Mexico has already granted this man a pension.

Mr. BLANTON. Yes; of \$15 a month, and nobody on God's green earth can buy coffee and potatoes with that.

Mr. UNDERHILL. There are lots of them getting that.

Mr. LOZIER. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. LOZIER. I will ask the gentleman from Texas if it is not a fact that under the general pension laws there are hundreds of cases in which the applicants have no right or title to a pension?

Mr. BLANTON. Yes.

Mr. LOZIER. And does not every session of Congress enact private pension bills granting relief in cases where such relief is not permissible under the general pension laws of this country?

Mr. BLANTON. They bring them within the pension laws. Mr. LOZIER. And is not this a private act on the same principle as a private pension bill, to provide relief where the law, by reason of its universality, has made no provision for such relief?

Mr. BLANTON. No; because in the case of a man who served his country back in 1865 you bring his case within the law by a special act, and you only give him \$50 a month.

Mr. LOZIER. It is not a question of the amount.

Mr. BLANTON. And you are attempting now to even go back of that act and make it \$66 a month.

Mr. LOZIER. But is there any difference in principle between this private claim and a private pension bill which is introduced to provide a remedy for a person who, under the general laws of the United States, is not entitled to relief?

Mr. BLANTON. I think so.

Mr. LOZIER. Is it not then a distinction without a difference?

Mr. BLANTON. I think not.

Mr. LOWREY. Will the gentleman yield?

Mr. BLANTON. I did not want to take up any further time of the House, but I will yield to the gentleman.

Mr. LOWREY. If every case fell under the fixed laws, what would be the use for a Committee on Claims to decide these cases? Is it not really the business of a Committee on Claims to handle the matters of special claims that can not be granted under the general law?

Mr. BLANTON. I want to say to my friend from Mississippi that if the gentleman knew all the problems of this Claims Committee, and if the gentleman knew the number of new cases that would be brought before them by reason of this precedent, if you establish it, the gentleman would not want to

see such a precedent established. The gentleman would want to try to settle this case in a way that would not establish this bad precedent.

Mr. LOWREY. I may say to the gentleman that I have been on the War Claims Committee four years.

Mr. BLANTON. I feel sorry for the gentleman.

Mr. LOWREY. And I agree with the gentleman that this is too much, and I believe a lump sum of a moderate amount would be all right, and I am not even sure it should be as much as \$3,000, but I am willing to vote for that.

Mr. BLANTON. I think that would satisfy my friend, the gentleman from New Mexico, although I do not know.

Mr. LOWREY. Will the gentleman from New Mexico answer me one question?

Mr. BLANTON. The gentleman from New Mexico is the Representative of that State, and that is the reason I mentioned him.

Mr. LOWREY. May I ask the gentleman from New Mexico if it is not the fact that this man had no property of his own? Is not that the testimony?

Mr. MORROW. Absolutely.

Mr. LOWREY. Then he could not have been fighting for his own property. I think the gentleman from Texas is right, and yet it is certainly true that these Committees on Claims consider cases that do not come under the general law.

Mr. UPSHAW. Mr. Chairman—

Mr. EDMONDS rose.

The CHAIRMAN. For what purpose does the gentleman from Pennsylvania rise?

Mr. EDMONDS. Mr. Chairman, I ask unanimous consent that general debate on this bill do now close.

Mr. UPSHAW. Mr. Chairman, the Chair had recognized the gentleman from Georgia before the gentleman from Pennsylvania rose.

The CHAIRMAN. The Chair will state that the Chair started to recognize the gentleman from Georgia when he discovered that the gentleman from Pennsylvania was seeking recognition. The Chair thinks that if the gentleman from Pennsylvania desires recognition, the Chair should first recognize the gentleman.

Mr. EDMONDS. Does the gentleman from Georgia want five minutes?

Mr. UPSHAW. Yes.

Mr. EDMONDS. Mr. Chairman, I ask unanimous consent that general debate on this bill close in five minutes.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that general debate on this bill close in five minutes. Is there objection?

There was no objection.

Mr. UPSHAW. Mr. Chairman, I had a tremendous draft—a sort of paralyzing draft—made on my imagination. I have been trying to imagine how far back in ancient history the gentleman from Texas was afraid to open his mouth in the committee or on the floor. [Laughter.] But I commend the gentleman for being able to read faces when he said the gentleman from Georgia was itching to say something in favor of this bill. While I commend the generosity on his part, the real humanity that is willing to introduce an amendment for a special sum of \$2,500 or \$3,000, I am compelled in the same moment to indict him, in all good humor, for inconsistency, because if there is no law for this bill that is now before the House, there will be no law for his amendment. I contend, with the gentleman from Mississippi [Mr. Lowrey] and the gentleman from Missouri [Mr. Lozier] in their questions just propounded, that we are, in every special individual appropriation not reached heretofore by some law, making a law for that special case, and that is what we propose to do now. It was said of Goldsmith's village preacher that "e'en his fallings leaned to virtue's side." When I came to Congress I said openly, before and since election, that I proposed to make humanity my hero, and I want to remind the gentlemen who oppose this humane bill that this Government will never have a conscience that is not given to it by the concert of character and ideals on the part of its citizens; and I hope I am not a citizen of a Government that is so little as to ask the geographical spot where a man was standing as he tried to protect the property of the flag. [Applause.] If it is my house and my property, I am not going to ask where the man was standing when he helped to save it. The fact is established by incontestible evidence that this man was fighting a fire that was sweeping over some Government property, perhaps along with private property, but the great objective yonder was the great forest belonging to this Government, for which the man heroically fought for several days; and I want to say to you that this Government is competent to recognize heroism like that; and whether the man was standing

on the Continent of Africa or the islands of the sea. If his heroism reached a national property and he lost his sight in protecting that property, God save the mark—and I was almost going to say, forgive the individual who is hesitating to vote that man some sort of recognition.

I feel that I am in consonance with the Constitution and in consonance with my oath when I swore to stand by all things that meant the common good when I am increasing the patriotism of the thousands who will know of this governmental action in New Mexico. Twenty years blind for the sake of our flag and humanity. Think of it! Let us help his blind eyes to see the big heart of a great and grateful Nation! And we are showing the gratitude of our Government in reaching out this tardy hand of helpfulness with a "God bless you" to the hero who was defending the property of our Government. [Applause.]

The Clerk read the bill for amendment.

Mr. BLANTON. Mr. Chairman, I offer the following amendment.

The Clerk reads as follows:

Amendment by Mr. BLANTON: Page 1, line 3, strike out all after the enacting clause and insert: That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, the sum of \$3,000 to Reuben R. Hunter, of Deming, N. Mex., in full settlement of all claims against the United States Government on account of injuries received in May, 1904.

Mr. ABERNETHY. Mr. Chairman, I move to strike out the figures "\$3,000" in the amendment and insert in lieu thereof "\$5,000."

The CHAIRMAN. The Clerk will report the amendment to the amendment.

The Clerk read as follows:

Amendment to the amendment by Mr. ABERNETHY: Amend the amendment by striking out "\$3,000" and inserting in lieu thereof "\$5,000."

Mr. UNDERHILL. Mr. Chairman, I rise in opposition to the amendment. I do not believe the Members of the House realize what they are doing. This should read, if the amendment is properly named, that the sum of \$5,000 be appropriated out of the United States Treasury to the State of New Mexico or to the town of Deming.

We might as well be practical and sensible. New Mexico or Deming are not the only State or town that has a large number of charitable patients, as we might call them, whom they are supposed to look after. In the first place, it is agreed by everybody that this man was not employed by the Government. In the second place, there is not one particle of evidence introduced to show that he lost his eyesight in fighting a fire, either on Government land or private land. The Acting Secretary of the Agricultural Department claims no knowledge of this man or his performance. The Department of the Interior states that the records of that department have no reference to the services of Mr. Hunter.

Mr. ABERNETHY. Will the gentleman yield?

Mr. UNDERHILL. Yes.

Mr. ABERNETHY. Did not the committee find and report that this man was injured while protecting the property of the United States Government?

Mr. UNDERHILL. The majority report the gentleman can read for himself. I am referring to the evidence and the record in the case.

Mr. BEGG. Will the gentleman yield?

Mr. UNDERHILL. Yes.

Mr. BEGG. There is no statement in the report showing that this man was blinded by any accident due to his participation in fighting the fire. The blindness is plainly a case of cataracts, and there is no evidence before the committee anywhere to show that it was even induced by fighting the fire.

Mr. UNDERHILL. Mr. Chairman and gentlemen, you are bringing a lot of trouble upon yourselves. You gentlemen who have been reelected to the coming Congress, if this bill goes through, are going to be flooded with petitions and requests to introduce bills for compensation by those who do not come under the compensation law of 1908, which allowed one year's salary, and one year only to those who were injured in the employ of the Government.

You would not ask a man engaged in industry to go back 10 or 20 years and pay any amount to an injured employee. You do not know how many employees of the Government previous to 1916 are now living and who need help just as much as this man does.

Mr. BOYLAN. Will the gentleman yield?

Mr. UNDERHILL. Yes.

Mr. BOYLAN. You say there may be thousands of others come in for compensation. Where there is a liability of the Government existing should not the Government be decent enough to take up that liability? Why are we so afraid of other claims?

Mr. UNDERHILL. I am in the same difficulty as the gentleman from Texas. I can not get it through the heads of some gentlemen that there is no just claim on the Government, that there is no liability; that this solely a gift, a charity. Congress is not a charitable organization, but is supposed to pay some attention to the despised taxpayer.

Mr. BOX. Mr. Chairman, will the gentleman yield?

Mr. UNDERHILL. Yes.

Mr. BOX. Has this Committee on Claims or the Congress ever paid as much as \$5,000 on any of these claims where the injuries did not result in death?

Mr. UNDERHILL. Never. Furthermore, this Congress had before it only a short time ago in one of the evening sessions a case where a breadwinner, the head of a family, was killed through no negligence of his own, and the House reduced the amount which the committee reported of \$5,000 to \$3,000. There is nothing consistent about giving this man \$3,000 or \$5,000. Furthermore, it is not a mere bagatelle of \$5,000. It means eventually millions of dollars that you will have to take out of the pockets of your constituents. I wonder if you want to go back home with that kind of a record.

Mr. ABERNETHY. Mr. Chairman, I did not intend to have anything to say about this matter. I knew nothing about it until the matter came up for discussion. I am not on the committee, but I want to read to the House the statement of the two doctors here:

Dr. Thomas A. Haxby (certificate): The examining physician that examined Hunter after the fire in Clonderoft, Otero County, N. Mex., in the spring of 1904, and who believes from his examination that Hunter lost his eyesight from the intense heat and smoke from fighting this fire.

Dr. F. D. Vickers (affidavit): From his examination of Reuben R. Hunter he states that he has a double cataract, no perception of light, and no possibility of recovering sight by an operation. That Hunter will remain totally blind all his life. That his health is otherwise good.

The only question involved in the amendment that I offer to the amendment of the gentleman from Texas [Mr. BLANTON] is this: It is better, and it does not set a precedent that \$66 per month would set, but if we pay this man \$5,000, even as an act of charity or as an act of grace, it will be something that we are in the habit of doing frequently. The President of the United States sometimes recommends that we pay claims presented by other governments—not as an act of right, but as an act of grace.

I have heard that many times coming from the President of the United States. What could be worse than for a man to be blind? Talk about a death claim! I would prefer to be dead rather than to be blind.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. ABERNETHY. Yes.

Mr. BLANTON. We have our distinguished colleague here from Minnesota [Mr. SCHALL], who is totally blind, and who is going from this House, after an able service here, to the United States Senate.

Mr. ABERNETHY. But he was not made blind while protecting the property of the Government.

Mr. BLANTON. Oh, but simply because a man is blind does not mean that he can not yet be of good service.

Mr. ABERNETHY. Is the gentleman in favor of \$3,000?

Mr. BLANTON. Yes.

Mr. ABERNETHY. The only difference between us, then, is the question of \$2,000. Does the gentleman favor the policy?

Mr. BLANTON. It was a question of policy that made me offer the \$3,000.

Mr. ABERNETHY. Does the gentleman favor his own amendment?

Mr. BLANTON. Yes.

Mr. ABERNETHY. Well, I favor \$5,000, and that is the only difference between us.

Mr. BEGG. Mr. Chairman, I do not care to take more than a minute or two. I do want to call the attention of the House seriously to two things. In the first place, at every session of Congress when we have considered bills on the Private Calendar we find the calendar loaded up with personal claims bills. During the last session of Congress we passed, I think, 50 personal injury claims, and not a single personal injury claim, even that of a Government employee, was allowed

to as great an extent as \$5,000. They were just as pitiable cases as this is. There was a reasonable argument for the presentation of them, and the law fixes no liability. They were damaged either by an employee of the Government doing a careless act, or they were in the employ of the Government. Yet this Congress refused to grant those claimants any such sum as is being proposed here.

Let me now refer to the two statements of the two physicians. It is always true when you consult more than one physician you are liable to have varying opinions. I call the attention of the House to one or two statements here. Neither of the physicians states as a positive fact that the man was blinded from smoke and heat. One doctor certifies that he believes that the smoke and the heat perhaps blinded the man. The other doctor files an affidavit, in other words, swears that the man is blinded by a double cataract. There is not a line of evidence that the exposure of eyesight to intense heat and smoke for a period of time would produce a cataract. If this man had never been fighting a fire, the chances are 100 to 1 that a cataract would have developed eventually, and that he would have been blind anyway. If such a statement could be proven to be true, medically, then there is not a man in the House who would entertain the thought for a minute that this Government owes this man a single penny beyond the customary charity the State does out, and I think before we hastily take a step in this direction we ought to ask the Committee on Claims to furnish some evidence from the medical fraternity that intense exposure to heat and smoke might induce cataract.

Mr. HUDSPETH. Do I understand my friend to say that there is not a suspicion here that the fighting of fire by this man caused his blindness?

Mr. BEGG. The medical fraternity in the two brief statements do not make a positive assertion of that kind.

Mr. HUDSPETH. In view of the fact that he was a man of good sight before he went into the fire and immediately after he was a blind man?

Mr. BEGG. There is no testimony like that in this report.

Mr. HUDSPETH. That is the way I read it.

Mr. BEGG. I can not read it in that way. One of the physicians says that he believes. He does not make an affidavit like the second man. The second doctor makes an affidavit that this injured man has a double cataract and that it is incurable. If the exposure caused the double cataract, then perhaps there is an obligation morally, but there is not a scintilla of evidence on file anywhere to show that the medical fraternity believes that such a thing is possible.

The CHAIRMAN. The question is on the amendment—

Mr. EDMONDS. Mr. Chairman, I want to say a few words in defense of the committee. Personally I went over this bill about seven or eight years ago. There were a number of affidavits which are not published, portions of which appear in the report. The report would be very large if we had published all the documents and affidavits in the case. I was satisfied several years ago from the affidavits I read through that this man was injured at the fire, or he had his eyes hurt at the fire, and that it resulted in the cataracts. There is no question that one doctor did report immediately after the fire that his eyes were injured. It is possible that it produced the cataracts. Anyhow, he is blind to-day. He fought the fire; I am satisfied of that in my mind. I am opposed to the compensation feature in the bill and always will be opposed while I am in the House to putting that feature in any bill of this kind. However, I do believe the man is entitled to consideration, and as far as I personally am concerned I am going to vote for the \$3,000.

The CHAIRMAN. The question is on the amendment to the amendment offered by the gentleman from North Carolina.

The question was taken, and the Chair announced the yeas appeared to have it.

On a division (demanded by Mr. MORROW) there were—ayes 24, noes 60.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question recurs upon the amendment offered by the gentleman from Texas.

The question was taken, and the Chair announced the yeas seemed to have it.

On a division (demanded by Mr. UNDERHILL) there were—ayes 63, noes 12.

So the amendment was agreed to.

Mr. EDMONDS. I would like to ask unanimous consent to lay this bill aside, to be reported favorably later.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to lay this bill aside, to be reported later.

Mr. BLANTON. Mr. Chairman, I object.

Mr. EDMONDS. Mr. Chairman, I move that the bill be laid aside and reported favorably later.

The question was taken, and the motion was agreed to.

JOHN A. BINGHAM

Mr. EDMONDS. Mr. Chairman, I move to take up for consideration the bill (H. R. 5803) relating to John A. Bingham.

The CHAIRMAN. The gentleman from Pennsylvania calls up a bill, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 5803) for the relief of John A. Bingham.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to John A. Bingham the sum of \$500, the amount stolen from him while postmaster at Vandalia, Ill.

Mr. BLANTON. Mr. Chairman, I ask for recognition.

The CHAIRMAN. The gentleman from Pennsylvania was on his feet.

Mr. BLANTON. I ask for recognition.

Mr. EDMONDS. I started to ask for recognition.

The CHAIRMAN. If the gentleman from Pennsylvania desires recognition, he is entitled to it.

Mr. EDMONDS. I will yield such time as he may desire to the gentleman from New York [Mr. BLACK].

Mr. BLACK of New York. Mr. Chairman and gentlemen of the committee, there is not very much to this bill. Away back in 1903 a postmaster in a town of Illinois found his building was about to be engulfed by a storm, and he had to protect it with the help of his assistants, and in the confusion attendant upon taking care of that building some thief entered the building and stole some stamps from the safe, about \$500. The Post Office Department has made a very careful investigation of this and reports in favor of passing this bill. It is just a simple act of justice to this postmaster, who had to pay the Government \$500 for the lost stamps.

Mr. LA GUARDIA. Will the gentleman yield?

Mr. BLACK of New York. I will.

Mr. LA GUARDIA. Was the postmaster under bond?

Mr. BLACK of New York. He was under bond and he had to put up collateral for his bond. He paid the bonding company and the bonding company paid the Government.

Mr. LA GUARDIA. What assurance has the gentleman this money is not appropriated to reimburse the bonding company?

Mr. BLACK of New York. The bonding company is a good company, in the first instance, and—

Mr. LA GUARDIA. I did not know there was such a thing as a good bonding company.

Mr. EDMONDS. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. I yield that back to the gentleman.

The CHAIRMAN. The Clerk will report the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to John A. Bingham the sum of \$500, the amount stolen from him while postmaster at Vandalia, Ill.

Mr. EDMONDS. I ask unanimous consent that the bill be laid aside with a favorable recommendation.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that the bill be laid aside with favorable recommendation. Is there objection? [After a pause.] The Chair hears none.

WILLIAM J. OLIVER

Mr. EDMONDS. Mr. Chairman, I move that the committee take up the bill (H. R. 3132) for the relief of the William J. Oliver Manufacturing Co. and William J. Oliver, of Knoxville, Tenn., No. 133 on the Private Calendar.

The CHAIRMAN (Mr. CHINDBLOM). The Clerk will report the bill.

Mr. BLANTON. Mr. Chairman, I make a point of order.

The CHAIRMAN. The bill has not yet been read.

Mr. BLANTON. I know, but my point of order is applicable before it is read. This bill involves an expenditure of \$170,000. It is too important a bill to be considered without the presence of a quorum. I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Texas makes the point of order that there is no quorum present. The Chair will count. [After counting.] Ninety-five gentlemen are present.

Mr. EDMONDS. Mr. Chairman, I move that the committee do now rise and report the bills that have been passed.

The CHAIRMAN. The gentleman from Pennsylvania moves that the committee do now rise. The question is on agreeing to that motion.

The question was taken, and the Chairman announced that the yeas seemed to have it.

Mr. EDMONDS. Mr. Chairman, I ask for tellers.

Tellers were ordered, and the Chairman appointed Mr. EDMONDS and Mr. BLANTON to act as tellers.

The CHAIRMAN. Those in favor of the motion that the committee do now rise will pass between the tellers and be counted.

The committee divided; and the tellers reported—ayes 4, noes 89.

So the motion was rejected.

The CHAIRMAN. The committee refuses to rise. A quorum is not present, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 7]

Almon	Fish	Lindsay	Roach
Anderson	Fitzgerald	Lineberger	Rogers, Mass.
Anthony	Frear	Linthicum	Rogers, N. H.
Ayres	Fredericks	Logan	Rosenbloom
Bankhead	Freeman	Lyon	Schall
Barkley	Gallivan	McKenzie	Schneider
Bergor	Gambrell	McLaughlin, Nebr.	Scott
Black, Tex.	Geran	McLeod	Sherwood
Bloom	Glatfelter	McNulty	Smithwick
Britten	Goldsborough	MacGregor	Snell
Browne, N. J.	Graham	Madden	Stalker
Buchanan	Greenwood	Magee, Pa.	Sullivan
Buckley	Guyer	Manlove	Summers, Tex.
Busby	Hadley	Merritt	Sweet
Butler	Harrison	Michaelson	Swing
Carter	Hawley	Miller, Ill.	Swoope
Casey	Hill, Ala.	Milligan	Taylor, Colo.
Celler	Holaday	Mills	Temple
Clark, Fla.	Hooker	Mooney	Thomas, Ky.
Cole, Iowa	Howard, Nebr.	Moore, Ill.	Tilson
Cole, Ohio	Howard, Okla.	Morgan	Tincher
Colton	Hudson	Morin	Tinkham
Connolly, Pa.	Humphreys	Morris	Tydings
Corning	Jacobstein	Murphy	Vare
Croll	Jeffers	Newton, Mo.	Vinson, Ga.
Crowther	Johnson, W. Va.	Newton, Minn.	Volgt
Curry	Johnson, S. Dak.	Nolan	Wainwright
Davey	Kahn	O'Brien	Ward, N. Y.
Davis, Minn.	Kearns	O'Sullivan	Ward, N. C.
Dempsey	Kelly	Oliver, N. Y.	Weller
Dickinson, Iowa	Kendall	Park, Ga.	Welsh
Dickstein	Kent	Patterson	White, Me.
Domineck	Kless	Perleman	Williams, Mich.
Doyle	Kincheloe	Porter	Wilson, La.
Drewry	Knutson	Porter	Wingo
Eagan	Kunz	Pou	Winslow
Elliott	Langley	Purnell	Wolf
Fairchild	Larsen, Ga.	Quayle	Wurzbach
Fairfield	Larson, Minn.	Ransley	Zahlman
Fenn	Lee, Ga.	Reed, W. Va.	

Thereupon the committee rose; and the Speaker having resumed the chair, Mr. CHINBLOM, Chairman of the Committee of the Whole House, reported that that committee, having under consideration bills from the Committee on Claims, having found itself without a quorum, he had caused the roll to be called, whereupon 273 Members, a quorum, answered to their names, and he submitted a list of absentees for printing in the Journal.

The committee resumed its session.

The CHAIRMAN. The Clerk will proceed with the reading of the bill H. R. 3132.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$1,438,095.61 to the William J. Oliver Manufacturing Co. and William J. Oliver for damages sustained by said company and said Oliver growing out of the seizure and holding by the Government of the William J. Oliver manufacturing establishment at Knoxville, Tenn.

With a committee amendment, as follows:

Page 1, line 5, after the word "of," strike out "\$1,438,095.61 to the William J. Oliver Manufacturing Co. and" and insert "\$170,757.86 to."

On line 8 strike out the words "by said company and said Oliver," so that the bill will read, "that the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$170,757.86 to William J. Oliver for damages sustained growing out of the seizure and holding by the Government of the William J. Oliver manufacturing establishment at Knoxville, Tenn."

Mr. EDMONDS. Mr. Chairman, I think the purpose of this bill can be better explained by the gentleman from Tennessee

[Mr. TAYLOR] than by anybody else in the House; so I yield 15 minutes to the gentleman from Tennessee.

The CHAIRMAN. The gentleman from Tennessee is recognized for 15 minutes.

Mr. TAYLOR of Tennessee. Mr. Chairman and gentlemen of the committee, this bill is a bill for the relief of William J. Oliver, of Knoxville, Tenn. William J. Oliver organized the William J. Oliver Manufacturing Co. about 16 or 18 years ago and was always president of the company and owned practically 100 per cent of its capital stock. The factory of the company was perhaps the largest iron and wood working factory south of the Ohio River.

Ordinarily it engaged in the business of building and repairing equipment used in railroad construction work, mine and quarry equipment and supplies, the manufacture of plows, and so forth, and the operation of a large foundry.

In 1917 the factory took a contract to make for the Italian Government one hundred thousand 6-inch shells, high explosive, which it filled ahead of the time limit and to the entire satisfaction of the Italian Government. In the report you will find a letter from the Italian Government complimenting Mr. Oliver on the splendid and efficient work performed by him in connection with the fulfillment of that contract. A little later the Government of the United States entered into a contract with the Oliver Manufacturing Co. to manufacture 10,000 high-explosive shells. The company completed this contract with the Government, and a little later the War Department entered into another contract with Mr. Oliver for 20,000 shells, which he manufactured for the Government. A little later still, he having shown such skill and efficiency in the manufacture of those shells, the Government of the United States entered into a contract with him to manufacture 100,000 additional shells.

It was while manufacturing these shells that Mr. Oliver's trouble began. Mr. Oliver was one of the largest captains of industry in the South, but he always took a strong position on the proposition of the "open shop," and it was on account of his attitude on the "open shop," taken advantage of by German spies, as you will find in the record, that brought about the trouble that led up to his arrest. Anyhow, these labor agents went about Mr. Oliver's plant, dissatisfying his men, and finally they went to the office of the district attorney and by false representations caused the district attorney, or the Department of Justice, to issue warrants against Mr. Oliver, charging him with fraud in connection with the manufacture of these shells and charging him with sabotage, and on October 4, 1918, while the factory was being operated at maximum speed, turning out about 1,000 shells a day and employing about 1,200 laborers, the Government of the United States, through its military and legal departments, seized the manufacturing plant of Mr. Oliver and arrested William J. Oliver. A troop of soldiers was sent up to Knoxville from Chattanooga, and under the orders of the district attorney they went down to Mr. Oliver's plant, while his plant was in full operation; they cut the telegraph wires and surrounded his plant, and the district attorney and these Army officers went into Mr. Oliver's private office, where Mr. Oliver was himself, and where his wife and his office employees were, arrested Mr. Oliver and various other employees. They took his private papers, all of them, and put them into gunny sacks; they pulled the drawers out of his desk and over his protest took these papers and put them in these sacks and went away with them, with Mr. Oliver under arrest. They even took \$8,000 worth of Liberty bonds, which were never returned to Mr. Oliver, and were never accounted for at all, in fact, none of this private property, belonging to Mr. Oliver, that was taken away by the United States district attorney's office and this troop of soldiers was ever returned to him or accounted for. They destroyed his credit absolutely and destroyed his business. Three days after his arrest, while he was going down to attend a proceeding in connection with his arrest, Mr. Oliver was struck by a truck which paralyzed him, and he has continued paralyzed up to this time, and probably will not survive more than a few days longer.

They put him on trial in the United States district court at Knoxville, Tenn., and after the Government had introduced all of its testimony against him the trial judge, Judge McCall, of Memphis, who was sitting on the case, after hearing the testimony of the Government, of his own motion dismissed some twenty-odd counts of the indictment, and after he had dismissed them the district attorney arose and dismissed the remainder. So that after arresting Mr. Oliver, after destroying his business, and after Mr. Oliver, as a direct result of this arrest, lost his health and became a permanent invalid—after all this, and after they had humiliated him and his family,

the Government of the United States dismissed the charges against him without Mr. Oliver ever offering a single witness in his defense, the Government thus confessing that it had blundered.

Now, this bill is based upon the fact that as a result of this arrest of Mr. Oliver and as a result of the seizure of his plant he lost his credit and lost his business, and his plant was so wrecked that when the Government turned it back to him it promptly went into the hands of a receiver, was wound up, and not one single dollar was ever paid upon the common claims. As a matter of fact, the receiver did not realize a sufficient sum to satisfy the bonded indebtedness of the plant.

Now, it may be that some of you would like to know just what elements there are in the sum arrived at by this committee. One of the elements, of over \$100,000, represents the difference in what it cost the Government to complete this contract more than what Mr. Oliver would have completed it for had he not been arrested and had he been permitted to complete the contract himself. It cost the Government to manufacture these shells, per shell, an amount equalling \$103,000, I believe, more than it would have cost Oliver.

Mr. EDMONDS. Will the gentleman yield?

Mr. TAYLOR of Tennessee. Yes.

Mr. EDMONDS. While this was going on Mr. Oliver's son was in the service in France, was he not?

Mr. TAYLOR of Tennessee. Yes. At the time that Mr. Oliver was charged, as he was, with disloyalty to his Government, and charged with sabotage, on the day of his arrest his only son, an American aviator, was flying over the German front. [Applause.]

Mr. EDMONDS. What does the gentleman estimate Mr. Oliver was worth when this trouble started?

Mr. TAYLOR of Tennessee. According to the evidence in the record, the best evidence available at the time of his arrest, William J. Oliver was worth \$2,000,000, while to-day he is what you might call a pauper.

Mr. EDMONDS. Further, will the gentleman explain why Mr. Oliver did not bring this case before the board of the War Department?

Mr. TAYLOR of Tennessee. The reason Mr. Oliver did not bring this claim before the board created by Congress to hear and determine matters of this kind, was because of the fact that he had an accident just three days after his arrest, and for many months he was in the hospital and unconscious, and up to this time he is hardly what you might call, except at times, rational.

Mr. BOX. Will the gentleman yield?

Mr. TAYLOR of Tennessee. Yes.

Mr. BOX. Does the gentleman state to the House that this claim was not presented to the War Department under the Dent Act?

Mr. TAYLOR of Tennessee. Well, notice was given—

Mr. BOX. Was not a substantial amount paid and a full release accepted?

Mr. TAYLOR of Tennessee. No; it was not with Mr. Oliver's consent. Mr. Oliver at that time was in the hospital and there was no consent from him whatever.

Mr. McREYNOLDS. Is it not a fact that the Government had charge of all his papers for nearly two years and he could not present this claim?

Mr. TAYLOR of Tennessee. Of course, he could not have presented the claim with any sort of effectiveness, because he did not have the papers necessary for a preparation of the claim, because these papers had been forcibly taken out of his possession by agents of the Government and they were not returned to him for more than two years.

Mr. LaGUARDIA. Will the gentleman yield?

Mr. TAYLOR of Tennessee. Yes; I will be glad to yield.

Mr. LaGUARDIA. This bill and the compensation is based entirely, I take it, on the unjustifiable conduct of the Government. Has anything been done since 1918 to fix the responsibility, either in the intelligence department of the War Department or the Department of Justice, on the person or official who brought about this seizure?

Mr. TAYLOR of Tennessee. No; there has been nothing of that kind, of course.

Mr. LaGUARDIA. Somebody must have blundered if the gentleman's contention is correct.

Mr. TAYLOR of Tennessee. We do not criticize the War Department, and we do not criticize the Department of Justice. I think they were acting in good faith so far as they were concerned, but they were relying on misrepresentation by these German spies who were seeking, not only in Knoxville at Oliver's plant, but all over the country, to wreck industry.

Mr. LaGUARDIA. That is a very serious indictment against the intelligence department of the Department of Justice, if enemy spies could prevail on them to commit such an outrageous act.

Mr. TAYLOR of Tennessee. An investigation was under way at one time, but the man who was supposed to have been responsible for this misrepresentation and for the action of the departments committed suicide in an Atlanta hotel. I can not recall just now his name, but that is all disclosed in the record.

Mr. BURTNESS. Will the gentleman yield?

Mr. TAYLOR of Tennessee. I will be glad to yield to the gentleman.

Mr. BURTNESS. One point that is bothering me is this: In glancing over the bill and the report of the Secretary of War, the bill says in so many words that these damages were sustained growing out of the seizure and holding by the Government of the William J. Oliver manufacturing establishment at Knoxville, Tenn., and I notice that the report of the Secretary of War denies that the Government ever seized or ever held the plant, and the Secretary states that all that was done was that the Department of Justice searched the plant and took away a large number of records and things of that sort, but that the plant was immediately turned over and was retained by the William J. Oliver Co., and that the company appointed a trustee, as I understand it. Now, what were the facts?

Mr. TAYLOR of Tennessee. It is true that a few days afterward a trustee was placed in charge.

Mr. BURTNESS. By whom was the trustee appointed—by the company itself?

Mr. TAYLOR of Tennessee. No; not by the company. The Government officials who were there acting for the Government and the heads of the company agreed on that, but Mr. Oliver was never permitted to go to his place at all. He was not permitted to go on the premises.

Mr. BURTNESS. The Government did not conduct the business?

Mr. TAYLOR of Tennessee. They did indirectly. They had their agents directing the business and finishing this contract.

Mr. BURTNESS. This trustee was not a trustee in bankruptcy, or anything of that sort, but was a trustee appointed by the corporation itself under a sort of approval of the Department of Justice or the War Department.

Mr. TAYLOR of Tennessee. Under their approval, of course. As I understand it, the attorneys of Mr. Oliver—Mr. Oliver, of course, was injured at that time, having been struck by a truck, and was unconscious—

Mr. BURTNESS. At the time the trustee was appointed? I thought he was injured about the time he tried to defend himself in the criminal action.

Mr. TAYLOR of Tennessee. He was injured three days after the seizure, and I am pretty sure that up to that time this trustee had not been appointed.

Mr. BURTNESS. In any event, when the loss occurred the plant was being conducted by a private trustee appointed by the corporation head.

Mr. McREYNOLDS. Will the gentleman yield?

Mr. TAYLOR of Tennessee. Yes.

Mr. McREYNOLDS. Is it not a fact that they forced him to agree to a trustee, with the understanding that the Ordnance Department from Cincinnati would run this plant for the Government by putting one Mr. Snyder in charge?

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. EDMONDS. I yield the gentleman five more minutes.

Mr. BURTNESS. Then the statement of the Secretary of War in his report is false?

Mr. McREYNOLDS. I am only giving you the evidence and telling you what occurred.

Mr. TAYLOR of Tennessee. That is the evidence.

Mr. DENISON. May I ask the gentleman a question?

Mr. TAYLOR of Tennessee. Certainly.

Mr. DENISON. I notice the bill as filed was for more than \$1,000,000, and there has been allowed \$170,000 in this bill.

Mr. TAYLOR of Tennessee. Yes; that is true.

Mr. DENISON. What are the facts about the actual loss sustained? Why did the committee cut it down to \$170,000, if he sustained a good deal larger loss than that?

Mr. TAYLOR of Tennessee. Of course, he did sustain a much larger loss. In the preparation of the bill I took into consideration the loss of his health and the loss of his credit and such things as the committee could not consider. The committee in making its decision based its findings on concrete facts, just as I was explaining a while ago. For instance,

Oliver was manufacturing these shells at a certain cost, and after the Government took charge it cost the Government a good deal more to do the same work than it had cost Oliver to do it. This item alone amounted to more than \$100,000.

Mr. DENISON. Was that loss charged to Mr. Oliver?

Mr. TAYLOR of Tennessee. Yes; certainly that was Mr. Oliver's loss and that is one of the elements of the findings of the committee.

Mr. DENISON. Will the gentleman state whether or not the amount the committee has allowed in their amended bill covers his actual loss sustained?

Mr. TAYLOR of Tennessee. We contend that it does not; but, of course, in Mr. Oliver's condition we felt we would be fortunate to get whatever we could. We have therefore submitted to this amount, of course, with reluctance.

Mr. DENISON. Did Mr. Oliver get back his bonds, or any of them?

Mr. TAYLOR of Tennessee. No; he did not get back any of them.

Mr. DENISON. What did the committee allow him for the bonds?

Mr. TAYLOR of Tennessee. Eight thousand dollars, the exact amount. I want to say in conclusion that Congress has never had before it a more meritorious claim than this.

Mr. EDMONDS. I would like to state to the gentleman that the committee, as near as possible, gave the amount which they thought would be awarded to him if he had taken the matter up with the War Adjustment Board. There is no amount of money in here which involves payment for his losses occasioned by his arrest by the Government or anything of that kind. This is simply the compensation that the committee felt would be given to him if he had gotten before the War Adjustment Board.

Mr. Chairman, I yield 10 minutes to the gentleman from Oklahoma [Mr. THOMAS].

Mr. THOMAS of Oklahoma. Mr. Chairman and gentlemen of the committee, the gentleman from Tennessee [Mr. TAYLOR] has covered the foundation of this claim thoroughly. If there is any question that develops during the time I shall occupy the floor I would be glad to have the question asked. The testimony before the committee shows that Mr. Oliver was the principal stockholder in the Oliver Manufacturing Co. He was getting out ammunition for the United States Government. On the 4th day of October, 1918, while he was in his office at Knoxville at work, his wife was making out the pay roll in that office, a cordon of cavalry was thrown around his manufacturing plant. Deputy marshals appeared at the door of his office with drawn revolvers; possession was taken of the office and the plant. The deputy marshals proceeded to put the private papers of his office into a sack and to take the contents away.

A few days after this seizure by the Government, Mr. Oliver, in going to the courthouse in response to a telephone call to appear there in connection with his arrest, was struck by a motor truck and injured most severely. It was such a severe injury that he has not yet recovered, and at the present time is in a very bad condition.

The United States Government kept possession of this property and this plant for something like 14 months. During this time the contract which he had for the making of shells was completed. There was a total of something like 31,300 shells to be made and completed under the contract. At the time the seizure was made Mr. Oliver was making the shells at a cost to his plant of \$7.36 per shell. After the plant was seized and taken over by the Government and operated by the Government under orders and supervision by Army officers, men in the employment of the Government, the cost of making the shells amounted to \$10.61 per shell. So that as a practical result of taking over this plant and the change in supervision of making the shells the cost of the shells rose from \$7.36 to \$10.61, or \$3.25 more per shell. I am now suggesting the elements of damage to Mr. Oliver and his plant.

Mr. BLANTON. Will the gentleman yield?

Mr. THOMAS of Oklahoma. I will.

Mr. BLANTON. Is it not the fact that the Government took charge of this plant, claiming that it was in possession of evidence of a conspiracy on the part of Mr. Oliver to manufacture defective shells for the Government while it was at war with Germany. Was not that the claim under which the Government took charge of the plant?

Mr. THOMAS of Oklahoma. I will explain that briefly. At that time it was a nonunion plant. A man by the name of Gilmore, termed in the evidence a labor agitator, came to the plant and urged the men to unionize. This was not agreeable

to Mr. Oliver, as the testimony shows. The man who did this worked among the men and at a later date was apprehended, or was about to be apprehended in a neighboring hotel, and committed suicide. The attorney for the labor union in Knoxville appeared before the committee and testified and gave it as his opinion that the trouble to Mr. Oliver was caused by the agitation among his men over the question as to whether they should unionize.

Now, there was something like 26 charges brought against Mr. Oliver in the indictment. When the time came for the trial the case was gone into, and, as said by the gentleman from Tennessee, 23 of these counts were dismissed by order of the court, and the district attorney immediately dismissed the balance of the charges. So Mr. Oliver came forth out of the case with a clear vindication.

As to the reasons why the trouble arose the Congress can decide for itself by reading the testimony before the committee.

Mr. CRISP. Will the gentleman yield?

Mr. THOMAS of Oklahoma. I will.

Mr. CRISP. The gentleman said that one element of damage was the additional cost of the manufacture of these shells. In what way did the additional cost of the manufacture of shells affect Mr. Oliver so as to be an element of damage? Did the Government charge Mr. Oliver with the additional price for the manufacture of the shells?

Mr. THOMAS of Oklahoma. The testimony shows that Mr. Oliver was making them for \$7.36 per shell. If he could have completed his contract, that would have been the cost of producing the shells. As soon as the plant was turned over to the Government the cost rose from \$7.36 to \$10.61 per shell. So the company lost this difference in price of the production of the shells amounting to \$3.25 per shell.

Mr. MOORE of Virginia. What was the total loss?

Mr. THOMAS of Oklahoma. There were 31,300 shells to be completed, and the cost on each shell was increased \$3.25; so that it is a simple arithmetical calculation and amounts to \$101,725.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of Oklahoma. Yes.

Mr. LAGUARDIA. Did I understand the gentleman to say in answer to an inquiry that this plant was operated by these agents for 14 months? The plant was taken over on the 4th of October, 1918, and the armistice was declared on the 11th of November, 1918. What was the necessity for the continued manufacture of these shells?

Mr. THOMAS of Oklahoma. The testimony shows that the work was not concluded for something like 14 months, and the plant did not come back to the possession of Mr. Oliver until February, 1920.

Mr. LAGUARDIA. Did they continue to manufacture shells?

Mr. THOMAS of Oklahoma. They still had possession of the property.

Mr. LAGUARDIA. Did they continue to manufacture shells?

Mr. THOMAS of Oklahoma. They completed the contract they had; yes. That is the first element of damage that the committee found due Mr. Oliver. The second element of damage was the loss of the Liberty bonds.

The records show that when the agents of the Government took possession of Mr. Oliver's office Mr. Oliver had in his safe or in his desk \$8,000 of Liberty bonds and war savings stamps. These bonds and stamps were dumped into sacks along with private papers. He testifies that he has never seen the bonds since. The deputy marshals took the bonds and the stamps and they have not been returned to Mr. Oliver and his company suffered that loss, and the evidence shows that that loss is \$8,000.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of Oklahoma. Yes.

Mr. JOHNSON of Texas. I did not understand the answer of the gentleman in reply to the inquiry of the gentleman from Georgia, as to whether or not the Government charged against the Oliver Co. the difference in the cost of the manufacture of the shells.

Mr. THOMAS of Oklahoma. Mr. Oliver received the price that he was to receive from the Government. The evidence does not state what he was receiving for making these shells for the Government, but he suffered a loss of this increase in the cost of the making of the shells.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. EDMONDS. Mr. Chairman, I move that the committee do now rise and report such bills as have been acted

upon favorably by the committee with the recommendation that they be passed.

Mr. BOX. Mr. Chairman, before the motion is put, on what status will this leave the pending bill? When will it be considered again?

Mr. LONGWORTH. Mr. Chairman, if the gentleman will permit, it is my intention, after speaking to the minority leader, to ask unanimous consent that these bills be in order to-morrow.

Mr. BOX. There will be members of the committee who will not be able to give that unanimous consent.

The CHAIRMAN. Responding to the parliamentary inquiry of the gentleman from Texas, the Chair thinks, no motion having been made respecting this bill, and the consideration having been interrupted during the general debate, that when the Committee of the Whole House again is in session to consider bills on the Private Calendar, unless a motion is made to the contrary, this bill would be under consideration and would be pending under general debate.

Mr. BOX. Would that apply as to the business of this particular calendar, or to to-morrow?

The CHAIRMAN. The Chair is not talking about the unfinished business of the House. The Chair is talking about the unfinished business of the Committee of the Whole House.

Mr. LONGWORTH. Am I to understand that objection is to be made to continuing consideration of private claims to-morrow?

Mr. GARRETT of Tennessee. Mr. Chairman, if I may have the attention of the gentleman from Texas [Mr. Box], I am in entire sympathy with the great work that the gentleman from Texas has done on the Committee on Claims, but, if I may venture to say this to the gentleman, the probability is that there will be but a few more days on which these private claims can be considered. I believe the gentleman from Texas will agree with me that men are entitled to have these bills considered in fair debate. If there is any effort to take advantage or to railroad claims through, I should join with the gentleman readily in obstructing, but I do think that there should be opportunity to consider the claims. I have no interest in any claim on this calendar. No constituent of mine has any interest in any claim on this calendar. I do think, however, that there ought to be opportunity to consider claims, and I had hoped that gentlemen would permit to-morrow to be taken for the continuation of this work. To-day seems to have been a day of fair consideration. No effort has been made to cut off debate.

Mr. BOX. Mr. Chairman, the gentleman from Texas may be misguided and unwise in his efforts, but he is very much distressed about the character of consideration being given claims like the pending claim. He would like to promote the fair consideration of bills on the Private Calendar. He has been a member of this committee for four years and a Member of the House longer, and never during this time, until there was some such group of claims as we have here, has this calendar during that time been placed in the position that it is given to-day. The gentleman from Texas does not believe that the interests of the Treasury of the United States are promoted by the further consideration of claims on this calendar, such as this, in the manner in which they are being dealt with, and he says that in all respect to all concerned.

Mr. LONGWORTH. Mr. Chairman, if the gentleman will yield, how would the gentleman suggest that these claims should be considered? Would he have them considered in any other way than the manner in which they have been considered to-day, with full freedom of debate?

Mr. BOX. One thing the gentleman suggests is that Members of this House come in here and discuss these claims, not merely those who are mostly interested in the claims.

Mr. LONGWORTH. It seems to me there has been a fair attendance, a much better attendance than in the consideration of most appropriation bills.

Mr. BLANTON. Will the gentleman yield?

Mr. BOX. I have not the floor.

Mr. BLANTON. If the gentleman will yield, I am with him on fighting bad bills; but I think the membership has been accorded a very fair consideration to-day in the matter of debate allowed.

Mr. BOX. The gentleman is not complaining of his personal treatment.

Mr. BLANTON. We might just as well fight out these things to a conclusion. I think the membership has been very careful about these bills to-day. They have adopted several amendments which the gentleman himself has offered in the protection of the rights of the people. I am with him on cutting out

these bad bills, but we just as well come to a showdown some time, I think, and I am willing to go on fighting them out to-morrow.

Mr. LONGWORTH. Mr. Chairman, this is the first day, I believe, in a number of years, three years, where we observed claims day as provided under the rules of the House. To take the attitude that we must have no more days of this sort, consider no further claims in the way the rules of the House provide, where there shall be the utmost freedom of debate, is to say that the Claims Calendar had better be abandoned. So far as I am concerned, I have no possible interest in the passage of any of these claims.

Mr. CRISP. If the gentleman will yield, I desire to say I have been here for 12 years, and I think this is the first time in those 12 years that this calendar has been called under the general rules of the House.

Mr. LONGWORTH. I can not recall in a great many years, considerably more than three, where we have had a day like this.

Mr. BOX. One thing the gentleman from Texas does not understand. Here is the pending bill; I do not wish to prejudice it now, although I have very thoroughly settled views concerning it; but there is an accumulation of such bills on the calendar, and that only when there is such an accumulation of bills, in the good judgment and good conscience of many of the Members of the House, has there been a day given for the consideration of these claims. There are many people who have smaller claims, not so thoroughly organized and so active in their support. These smaller claims have fallen by the way, while these bigger claims of this class have accumulated here, and now the House stops consideration of other business to give them a privileged status and privileged consideration, and that is what the gentleman from Texas—

Mr. LONGWORTH. There is no privileged status at all in reference to this question. The committee is observing the rules of the House, and it seems to me that no gentleman ought to take the position of preventing the majority of this House passing such legislation as it desires.

Mr. BOX. There is a great deal in that suggestion. The gentleman from Texas has not been disposed to be obstructive in his work, and it is possible the conclusion that he has reached is not wise. He is not disposed to be contrary or make trouble for the House, and he therefore withdraws his statement that he will object to the request. [Applause.]

Mr. EDMONDS. Mr. Chairman, I move that the committee do now rise and report the bills laid aside with a favorable recommendation to the House with the recommendation that such bills do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SANDERS of Indiana, Chairman of the Committee of the Whole House, having had under consideration bills from the Committee on Claims, reported that that committee had directed him to report back to the House Senate bill 353 with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass, and the bill H. R. 5803, without amendment, with the recommendation that the bill do pass; and also that the committee had had under consideration the bill (H. R. 3132) for the relief of the William J. Oliver Manufacturing Co. and William J. Oliver, of Knoxville, Tenn., and had come to no resolution thereon.

The SPEAKER. The Clerk will report the first bill.

The Clerk read as follows:

A bill (S. 353) for the relief of Reuben R. Hunter.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. EDMONDS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

The Clerk read as follows:

A bill (H. R. 5803) for the relief of John A. Bingham.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. EDMONDS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

ORDER OF BUSINESS ON SATURDAY

Mr. LONGWORTH. Mr. Speaker, appreciating the courtesy of the gentleman from Texas [Mr. Box], I ask unanimous consent that bills reported from the Committee on Claims be in order for consideration to-morrow.

The SPEAKER. The gentleman from Ohio asks unanimous consent that bills reported from the Committee on Claims be in order to-morrow. Is there objection?

Mr. BLANTON. Reserving the right to object—and I shall not object—may I ask the majority leader if there are any appropriation bills ready to be taken up?

Mr. LONGWORTH. There is no appropriation bill ready for to-morrow.

The SPEAKER. Is there objection?
There was no objection.

HOUR OF MEETING ON MONDAY—11.30 A. M.

Mr. LONGWORTH. I further ask unanimous consent, Mr. Speaker, that when the House adjourns to-morrow it adjourn to meet at 11.30 Monday morning.

The SPEAKER. The gentleman from Ohio asks unanimous consent that when the House adjourns to-morrow it adjourn to meet at 11.30 a. m. on Monday. Is there objection?

There was no objection.

FOREIGN DEBT-FUNDING COMMISSION

Mr. GREEN. Mr. Speaker, I present a privileged report from the Committee on Ways and Means.

The SPEAKER. The Clerk will report it.
The Clerk read as follows:

Report to accompany the bill (H. R. 9804) to amend the act entitled "An act to create a commission authorized under certain conditions to refund or convert obligations of foreign governments held by the United States of America, and for other purposes," approved February 9, 1922, as amended February 28, 1923.

The SPEAKER. Referred to the Union Calendar.

Mr. GARRETT of Tennessee. Mr. Speaker, I reserve all points of order.

The SPEAKER. The gentleman from Tennessee reserves all points of order on the bill.

ENROLLED BILLS SIGNED

Mr. ROSENBLUM, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 7052. An act for the relief of Geston P. Hunt; and

H. R. 8687. An act to authorize alterations to certain naval vessels and to provide for the construction of additional vessels.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. HARRISON (at the request of Mr. Moore of Virginia), for three days, on account of sickness;

To Mr. WELLER, for two days, on account of important business;

To Mr. DAVEY (at the request of Mr. Crosser), on account of death in his family; and

To Mr. DOYLE, for one week, on account of important business.

FILLING A COMMITTEE VACANCY

Mr. GARNER of Texas. Mr. Speaker, I present a privileged resolution.

The SPEAKER. The gentleman from Texas asks unanimous consent for the present consideration of a resolution (H. Res. 380) which the Clerk will report.

The Clerk read as follows:

Resolved, That JEFF BUSBY, of Mississippi, be, and he is hereby, elected a member of the standing Committee of the House on the Post Office and Post Roads.

The SPEAKER. Is there objection to the present consideration of the resolution? [After a pause.] The Chair hears none. The question is on agreeing to the resolution.

The resolution was agreed to.

ADJOURNMENT

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 12 minutes p. m.) the House adjourned until to-morrow, Saturday, December 13, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

725. Under clause 2 of Rule XXIV, a letter from the Secretary of the Interior, transmitting report showing proceeds from the "Sale of surplus and obsolete material and equipment during the fiscal year ending June 30, 1924," was taken from the Speaker's table and referred to the Committee on Appropriations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GREEN: Committee on Ways and Means. H. R. 9804. A bill to amend the act entitled "An act to create a commission authorized under certain conditions to refund or convert obligations of foreign governments held by the United States of America, and for other purposes," approved February 9, 1922, as amended February 28, 1923; without amendment (Rept. No. 1043). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. STEPHENS: Committee on Naval Affairs. H. R. 9846. A bill for the relief of Francis Kelly; without amendment (Rept. No. 1042). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 10553) granting a pension to Charles M. Brown; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 10613) granting a pension to Florence M. Lane-awaver; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BELL: A bill (H. R. 10679) to amend section 7 of an act entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," approved March 1, 1911 (36 Stat. 961); to the Committee on Agriculture.

By Mr. LEE of Georgia: A bill (H. R. 10680) to amend section 7 of an act entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," approved March 1, 1911 (36 Stat. 961); to the Committee on Agriculture.

By Mr. HAWLEY: A bill (H. R. 10681) to amend section 7 of an act entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," approved March 1, 1911 (36 Stat. 961); to the Committee on Agriculture.

By Mr. EDMONDS: A bill (H. R. 10682) to amend and supplement the merchant marine act, 1920, and for other purposes; to the Committee on the Merchant Marine and Fisheries.

By Mr. COLE of Iowa: A bill (H. R. 10683) to increase the rates of pension to certain veterans of the Civil War, and to certain widows of such veterans; to the Committee on Invalid Pensions.

By Mr. REED of West Virginia: A bill (H. R. 10684) to provide for the widening of First Street between G Street and Myrtle Street NE., and for other purposes; to the Committee on the District of Columbia.

By Mr. BUTLER: A bill (H. R. 10685) to authorize the Secretary of the Navy to extend the nurses' quarters at the naval hospital, Washington, D. C., and to construct necessary additional buildings at certain naval hospitals; to the Committee on Naval Affairs.

By Mr. REED of West Virginia: A bill (H. R. 10686) to transfer jurisdiction over United States Reservation No. 248 from the Chief of Engineers of the United States Army to the Commissioners of the District of Columbia; to the Committee on the District of Columbia.

By Mr. HADLEY: A bill (H. R. 10687) granting to the county authorities of San Juan County, State of Washington, certain described tracts of land on the abandoned military reservations on Lopez and Shaw Islands as a right of way for county roads, and for other purposes; to the Committee on the Public Lands.

By Mr. SINCLAIR: A bill (H. R. 10688) granting the consent of Congress to the State of North Dakota to construct a bridge across the Missouri River between Williams County and McKenzie County, N. Dak.; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 10689) granting the consent of Congress to the State of North Dakota to construct a bridge across the Missouri River between Mountrail County and McKenzie County, N. Dak.; to the Committee on Interstate and Foreign Commerce.

By Mr. HAWES: A bill (H. R. 10690) to regulate the interstate transportation of black bass, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROGERS of Massachusetts: Joint resolution (H. J. Res. 307) creating a trust fund of \$400,000 for care of overseas graves; to the Committee on World War Veterans' Legislation.

By Mr. FISH: Resolution (H. Res. 379) authorizing the appointment by the Speaker of five Members of the House of Representatives to investigate the National Disabled Soldiers' League (Inc.); to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 10691) granting a pension to Bridget Braunreiter; to the Committee on Invalid Pensions.

By Mr. CLARKE of New York: A bill (H. R. 10692) granting a pension to Margaret B. Tew; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10693) granting a pension to Mary L. Daniels; to the Committee on Invalid Pensions.

By Mr. CONNERY: A bill (H. R. 10694) granting a pension to Adam Marker; to the Committee on Invalid Pensions.

By Mr. CRISP: A bill (H. R. 10695) granting an increase of pension to Cornelia H. Clopton; to the Committee on Pensions.

By Mr. DOYLE: A bill (H. R. 10696) for the relief of Thomas Hannon; to the Committee on Claims.

By Mr. HAUGEN: A bill (H. R. 10697) granting an increase of pension to Elizabeth J. Chambers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10698) granting a pension to Adile Hemmings; to the Committee on Invalid Pensions.

By Mr. HULL of Iowa: A bill (H. R. 10699) granting an increase of pension to Eliza Bannister; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 10700) granting an increase of pension to Lizzie J. Fagin; to the Committee on Invalid Pensions.

By Mr. LOZIER: A bill (H. R. 10701) granting an increase of pension to Bell Sadders Kelly; to the Committee on Pensions.

Also, a bill (H. R. 10702) granting an increase of pension to Richard W. Knight; to the Committee on Pensions.

By Mr. MEAD: A bill (H. R. 10703) for the relief of Samuel F. Freiert; to the Committee on Military Affairs.

Also, a bill (H. R. 10704) granting an increase of pension to George Dechend; to the Committee on Pensions.

By Mr. MORGAN: A bill (H. R. 10705) granting a pension to Phedora J. Black; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10706) granting an increase of pension to Cordelia A. Wilson; to the Committee on Invalid Pensions.

By Mr. MORRIS: A bill (H. R. 10707) conferring jurisdiction upon the Court of Claims of the United States or the district courts of the United States to hear, adjudicate, and enter judgment on the claim of Solomon L. Van Meter, jr., against the United States, etc.; to the Committee on the Judiciary.

By Mr. NELSON of Maine: A bill (H. R. 10708) granting a pension to Thomas C. Jones; to the Committee on Invalid Pensions.

By Mr. RATHBONE: A bill (H. R. 10709) for the relief of Katie O'Brien; to the Committee on Claims.

By Mr. ROMJUE: A bill (H. R. 10710) granting a pension to George W. Berryman; to the Committee on Invalid Pensions.

By Mr. SIMMONS: A bill (H. R. 10711) granting an increase of pension to Conrad Nagel; to the Committee on Pensions.

By Mr. STRONG of Kansas: A bill (H. R. 10712) for the relief of Roland Baldwin Estep; to the Committee on Naval Affairs.

Also, a bill (H. R. 10713) for the relief of Henry P. Biehl; to the Committee on Naval Affairs.

By Mr. STRONG of Pennsylvania: A bill (H. R. 10714) granting an increase of pension to Margaret M. Altman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10715) granting a pension to Lewis M. Kuhns; to the Committee on Invalid Pensions.

By Mr. SWING: A bill (H. R. 10716) granting an increase of pension to Lavina I. Roe; to the Committee on Invalid Pensions.

By Mr. THOMAS of Kentucky: A bill (H. R. 10717) granting an increase of pension to James Carey; to the Committee on Pensions.

Also, a bill (H. R. 10718) granting a pension to Nathan L. Smith; to the Committee on Pensions.

By Mr. TINCHER: A bill (H. R. 10719) granting an increase of pension to Maria Sylvester; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10720) granting an increase of pension to Catherine Eichhorn; to the Committee on Invalid Pensions.

By Mr. WOOD: A bill (H. R. 10721) granting an increase of pension to Robert R. Friel; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3175. By Mr. CLARKE of New York: Petition of thirty-fourth congressional district, State of New York, not to concur in the passage of Senate bill 3218, compulsory Sunday observance bill; to the Committee on the District of Columbia.

3176. By Mr. EVANS of Iowa: Petition of 44 citizens of Woodburn, Iowa, protesting against the enactment of Senate bill 3218 or any similar legislation into law; to the Committee on the District of Columbia.

3177. By Mr. LEACH: Petition of Army and Navy Union, Boston, Mass., favoring immediate enactment of legislation to increase the pensions of Civil and Spanish War veterans and their widows and children; to the Committee on Pensions.

3178. By Mr. MAJOR of Missouri: Petition of Messrs. R. S. Gibb, E. R. Gibb, W. P. Huston, et al., residents of Howard County, Mo., protesting against the passage of Senate bill 3218, or any other religious legislation which may be pending; to the Committee on the District of Columbia.

3179. By Mr. O'CONNELL of New York: Petition of the Association of the Bar of the City of New York, disapproving the enactment of Senate bill 624 and House bill 3260; to the Committee on the Judiciary.

3180. By Mr. O'CONNELL of Rhode Island: Petition of residents of Pawtucket and vicinity protesting against the passage of compulsory Sunday observance bill (S. 3218); to the Committee on the Judiciary.

3181. By Mr. RAKER: Petition of the Ebell of Los Angeles, Calif., urging support of the international opium conference; to the Committee on Foreign Affairs.

3182. Also, petition signed by D. A. Bayles and eight other employees of the Red Bluff (Calif.) post office, urging favorable action on the postal salary bill; to the Committee on the Post Office and Post Roads.

3183. Also, petition of Chamber of Commerce of the State of New York, urging that passport fees should be reduced; to the Committee on Ways and Means.

3184. Also, petition of National Association of Real Estate Boards, Chicago, Ill., urging scientific enlargement of plan for the city of Washington and the extension of its parks; to the Committee on Public Buildings and Grounds.

3185. Also, petition of California Irrigation Districts Association, urging indorsement and support of the bill (H. R. 2903) for building the Boulder Canyon Dam and All-American Canal; to the Committee on Irrigation and Reclamation.

3186. Also, petition of John F. Mathews, of New Orleans, La., urging the passage of Senate bill 1535 and the House bill 2719, for the relief of persons who served in the United States Military Telegraph Corps during the Civil War; to the Committee on Military Affairs.

3187. Also, petitions of the Chamber of Commerce of the State of New York, urging the defeat of the Howell-Barkley bill (S. 2046 and H. R. 7358); also Milton L. Bond and William E. Rowe and 42 other citizens of Roseville, Calif., urging the passage of the game refuge bill; to the Committee on Interstate and Foreign Commerce.

3188. Also, petitions of Irrigation Districts Association of California, relative to the proposed Roosevelt-Sequoia Park (H. R. 4095), and by Irrigation Districts Association of California, protesting against the Roosevelt-Sequoia Park bill (H. R. 4095); to the Committee on the Public Lands.

3189. Also, petitions of Mrs. G. E. Wilson and 27 others, of Los Molinos, Tehama County, Calif., protesting against the passage of any Sunday observance bill; Mr. John J. Southard and 32 others, of Los Molinos, Tehama County, Calif., protesting against the passage of any Sunday observance bill; and Mr. J. F. Richardson and 37 others, of Los Molinos, Tehama County, Calif., protesting against the passage of any Sunday observance bill; to the Committee on the District of Columbia.

3190. By Mr. SPEAKS: Papers to accompany House bill 10114, granting an increase of pension to Arthur L. Hamilton; to the Committee on Pensions.

3191. Also, papers to accompany House bill 10578, granting an increase of pension to Josephine Miller; to the Committee on Pensions.

3192. By Mr. TAGUE: Petition of mayor of city of Boston, urging that the air mail be extended to the Boston air port at East Boston; to the Committee on the Post Office and Post Roads.

3193. Also, petition of National Industrial Council, urging that Senate Joint Resolution 109 or House Joint Resolution 68 be submitted to the consideration of the people; to the Committee on the Judiciary.

3194. By Mr. WATSON: Petition of the George N. Althouse Post, No. 39, the American Legion, Norristown, Pa., protesting against reduction of appropriation which would handicap the future of the National Guard of the United States; to the Committee on Military Affairs.

SENATE

SATURDAY, December 13, 1924

(Legislative day of Wednesday, December 10, 1924)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Farrell, one of its clerks, announced that the House had passed a bill (H. R. 5803) for the relief of John A. Bingham, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills of the Senate, each with an amendment, in which it requested the concurrence of the Senate:

- S. 88. An act for the relief of Louis Leavitt; and
- S. 353. An act for the relief of Reuben R. Hunter.

PETITIONS AND MEMORIALS

Mr. WATSON presented memorials (numerously signed) of sundry citizens of Indianapolis, Ind., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. CAPPER presented a memorial of sundry citizens of Collyer, Kans., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. McCORMICK presented two memorials of sundry citizens of Peoria County and Springfield, all in the State of Illinois, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. FESS presented resolutions adopted by the Seventh District Rehabilitation Committee of the American Legion (including the States of Ohio, Indiana, and Kentucky) at Cincinnati, Ohio, favoring the passage of legislation establishing a medical corps in the United States Veterans' Bureau, which was referred to the Committee on Finance.

Mr. WILLIS presented memorials of Warren B. Thomas, of Columbus; of Henry H. Howenstein and Ernest Coffee, of Akron; of W. C. Williamson and William Durham, of Cincinnati; and of A. G. Tame, of Cleveland, all in the State of Ohio, remonstrating against the ratification of the so-called Hay-Quesada treaty proposing to cede the Isle of Pines to Cuba, which were referred to the Committee on Foreign Relations.

He also presented memorials of F. P. Lindsay and 16 other citizens of Columbiana; of H. C. Shively and 16 other citizens of Berlin Center; of A. W. Bundy and 30 other citizens of Wauseon, and of W. Wallace Kay and 68 other citizens of Youngstown, all in the State of Ohio, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

REPORTS OF THE INDIAN AFFAIRS COMMITTEE

Mr. HARRELD, from the Committee on Indian Affairs, to which were referred the following bills and resolution, reported them severally without amendment and submitted reports thereon:

A bill (S. 2375) to facilitate the suppression of the intoxicating liquor traffic among Indians (Rept. No. 805);

A bill (H. R. 26) to compensate the Chippewa Indians of Minnesota for lands disposed of under the provisions of the free homestead act (Rept. No. 806);

A bill (H. R. 6541) to amend an act entitled "An act to provide for the disposal of the unallotted lands on the Omaha Indian Reservation, in the State of Nebraska (Rept. No. 807);

A bill (H. R. 8545) conferring jurisdiction on the Court of Claims to determine and report upon the interest, title, ownership, and right of possession of the Yankton Band of Santee Sioux Indians to the Red Pipestone Quarries, Minnesota (Rept. No. 808); and

A resolution (S. Res. 271) authorizing preparation of compilation of Indian laws and treaties (Rept. No. 809).

ENROLLED BILLS PRESENTED

Mr. WATSON, from the Committee on Enrolled Bills, reported that on December 12, 1924, that committee presented to the President of the United States the following enrolled bills:

S. 116. An act to amend section 196 of the Code of Law for the District of Columbia;

S. 933. An act to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia; and

S. 1343. An act to authorize the widening of Fourth Street south of Cedar Street NW. in the District of Columbia, and for other purposes.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH:

A bill (S. 3659) granting an increase of pension to William F. Rowland; to the Committee on Pensions.

By Mr. WALSH of Massachusetts:

A bill (S. 3660) granting a pension to Etta M. Howard;

A bill (S. 3661) granting a pension to Thomas J. Kelly (with accompanying papers); and

A bill (S. 3662) granting an increase of pension to Thomas Coriam; to the Committee on Pensions.

By Mr. KEYES:

A bill (S. 3663) to amend section 7 of an act entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," approved March 1, 1911 (38 Stat. 961); to the Committee on Commerce.

By Mr. FERNALD:

A bill (S. 3664) granting a pension to Charles R. Fish (with accompanying papers); to the Committee on Pensions.

By Mr. PEPPER:

A bill (S. 3665) for the relief of Commander Charles James Anderson, United States Naval Reserve Force; to the Committee on Naval Affairs.

By Mr. KENDRICK:

A bill (S. 3666) for the exchange of lands in the Custer National Forest, Mont.; to the Committee on Public Lands and Surveys.

By Mr. MOSES:

A bill (S. 3667) granting a pension to Etta H. Sleeper (with accompanying papers); to the Committee on Pensions.

By Mr. RANDELL:

A bill (S. 3688) authorizing the construction of additional hospital facilities for the port of New Orleans, La.; to the Committee on Appropriations.

By Mr. BURSUM:

A bill (S. 3669) granting a pension to Jose Ke-wa-ty, sometimes called Go-y-ty; to the Committee on Pensions.

CHARLESTON HARBOR, S. C.

Mr. SMITH submitted an amendment intended to be proposed by him to the bill (H. R. 8914) authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

WATER-FRONT DEVELOPMENT AT NAVAL BASE OF SAN DIEGO

Mr. SHORTRIDGE submitted an amendment intended to be proposed by him to the bill (H. R. 2688) providing for sundry matters affecting the naval service, and for other purposes, which was referred to the Committee on Naval Affairs and ordered to be printed.

PRECEDENTS AND DECISIONS OF THE SENATE

Mr. CURTIS submitted the following resolution (S. Res. 284), which was referred to the Committee on Printing:

Resolved, That the Precedents and Decisions on Points of Order in the United States Senate, revised and indexed to and including the Sixty-eighth Congress, be printed in one volume as a Senate document, and that 1,000 additional copies be printed for the use of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 5803) for the relief of John A. Bingham was read twice by its title and referred to the Committee on Claims.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the Speaker of the House had affixed his signature to the following enrolled bills, and they were thereupon signed by the President pro tempore:

H. R. 7052. An act for the relief of Geston P. Hunt; and

H. R. 8687. An act to authorize alterations to certain naval vessels and to provide for the construction of additional vessels.

RECLASSIFICATION OF POSTAL SALARIES—VETO MESSAGE

Mr. EDGE. Mr. President, I wish to ask the indulgence of those in charge of the pending bill to permit me to make one final effort to secure an agreement on a time to vote on the unfinished business known as the postal employees salary increase bill.

Mr. OVERMAN. Mr. President, I suggest the absence of a quorum. If the postal matter is coming up, we ought to have a quorum.

The PRESIDENT pro tempore. The Clerk will call the roll. The principal legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fernald	Ladd	Robinson
Ball	Ferris	McCormick	Sheppard
Bayard	Foss	McKellar	Shipstead
Borah	Fletcher	McKinley	Shortridge
Brookhart	Frazier	McLean	Simmons
Broussard	George	McNary	Smith
Bruce	Greene	Mayfield	Smoot
Bursum	Hale	Means	Spencer
Butler	Harrell	Metcalf	Stanfield
Capper	Harris	Moses	Stanley
Caraway	Harrison	Neely	Sterling
Connors	Hedlin	Norris	Swanson
Cummins	Howell	Oddie	Trammell
Curtis	Johnson, Calif.	Overman	Underwood
Dale	Jones, N. Mex.	Pepper	Walsh, Mass.
Dial	Jones, Wash.	Phipps	Walsh, Mont.
Dill	Kendrick	Randell	Watson
Edge	Keyes	Reed, Mo.	Wheeler
Ernst	Kling	Reed, Pa.	Willis

The PRESIDENT pro tempore. Seventy-six Senators have answered to the roll call. There is a quorum present.

Mr. EDGE. As I have announced on several occasions, because of the failure of previous efforts to secure the unanimous consent of the Senate to a day certain to vote upon the postal salary increase bill to which I have referred, I had intended moving at the first opportunity to take it up. However, many Senators on both sides of the Chamber have stated that because of the holidays their engagements would take them out of the city and they would be very much relieved if it were possible to have a day certain fixed upon which it could be known that the bill would be laid before the Senate. So I have prepared another unanimous-consent proposition which I send to the desk and ask to have read.

The PRESIDENT pro tempore. The Senator from New Jersey presents a request for unanimous consent which the Clerk will report.

The reading clerk read as follows:

UNANIMOUS-CONSENT AGREEMENT

It is agreed by unanimous consent that at the conclusion of the routine morning business on the calendar day of January 8, 1925, the Senate will proceed to the reconsideration and final disposition of the bill (S. 1898) reclassifying salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes, heretofore returned by the President of the United States without his approval; that no Senator shall speak longer than one hour on the bill, and said bill shall not be laid aside or superseded except by unanimous consent by any other business.

The PRESIDENT pro tempore. The Chair desires to observe that a request for unanimous consent is not debatable, but the Senate has found it necessary to have a reasonable interchange of views upon the subject. The Chair reserves the right, however, to arrest the debate whenever it seems best to the Chair.

Mr. EDGE. I have already stated that the object of the proposal is to permit Senators to arrange their plans in ample time so they can be here when the bill shall be laid before the Senate for final disposition.

The PRESIDENT pro tempore. Is there objection to the request for unanimous consent submitted by the Senator from New Jersey?

Mr. STERLING. Mr. President, a parliamentary inquiry. I observe that the unanimous-consent agreement provides for the final disposition of the bill after it is taken up, and the inquiry is as to whether or not that will preclude a motion to refer the bill, together with the veto message of the President, to the Committee on Post Offices and Post Roads?

The PRESIDENT pro tempore. Does the Senator propound that as a parliamentary inquiry?

Mr. STERLING. Yes.

The PRESIDENT pro tempore. As at present advised the Chair would construe that the unanimous-consent agreement as proposed would preclude a motion to refer.

Mr. BORAH. That is not the understanding of the Senator who offers the unanimous-consent request, and if it is so understood and is to be so construed by the Chair the unanimous-consent agreement will have to be modified.

Mr. STERLING. Yes.

Mr. EDGE. The Chair, of course, is far better informed in the matter of parliamentary decisions and precedents than I am, but my own analysis would be that any motion could be received during the consideration of the bill, and that it would be voted upon, but that the bill must be finally disposed of before other business could take its place.

The PRESIDENT pro tempore. The Chair is of the opinion that a motion to recommit or commit the bill to any committee would not be a final disposition of it.

Mr. STERLING. I shall have to object.

Mr. CURTIS. I suggest that the Senator from New Jersey modify his proposition so as to provide that one motion to recommit may be permitted.

Mr. EDGE. I understand the regular form used in the House of Representatives, and I presume it to be the established precedent here, provides that a motion to commit is always in order. I am entirely willing to add that provision to the proposal, because I had always assumed such a motion to be in order, and so stated in the debate here two or three days ago.

The PRESIDENT pro tempore. Does the Senator from New Jersey modify his request?

Mr. EDGE. Yes; I will modify it.

Mr. DILL. Mr. President—

The PRESIDENT pro tempore. Just a moment, until the request is modified as suggested by the Senator from New Jersey.

Mr. WALSH of Massachusetts. Mr. President, I should like to ask the Senator from New Jersey if he is going to modify his unanimous-consent request, why he puts in the words "shall proceed to a reconsideration." Why is not the only issue a consideration of the President's veto?

Mr. EDGE. I think the words "proceed to a reconsideration" are the usual form.

Mr. WALSH of Massachusetts. We could not reconsider a veto that has not yet been acted on.

Mr. EDGE. We are reconsidering the bill that was vetoed.

Mr. CURTIS. The Constitution provides that the bill shall be reconsidered.

The PRESIDENT pro tempore. The Chair will direct that the qualified form of the unanimous-consent request be read.

Mr. DILL. Before that is done, as I understand the request for unanimous consent, it now proposes to include in it that which is not in accordance with the rules of the Senate, namely, that a motion to refer or recommit the matter to a committee shall be in order. If that were the case, I should have to object.

Mr. STERLING. Is there any rule of the Senate to that effect?

Mr. EDGE. I trust the Senator from Washington will withhold his objection. We have certainly made every possible effort in the interest of this proposed legislation and to bring it to a vote. If a majority of the Senate are favorable to recommitting the bill, it certainly can not be passed over the veto. I can not conceive that the addition of that language can have the slightest effect upon the final disposition of the measure.

Mr. DILL. I want to say to the Senator, if he will yield to me—

Mr. EDGE. I yield.

Mr. DILL. That the motion will be made and the Senate will be called upon to vote on the motion to recommit before we vote on the veto message. If the motion to recommit carries, we shall never vote on the veto message. I shall not consent to have the right to vote on the veto message taken away.

Mr. EDGE. If the Senator from Washington will permit me, the same condition will prevail if we do not have a unanimous-consent agreement. A motion to recommit can be made at any time, and if it shall prevail the bill will go to the committee just the same.

Mr. DILL. But probably we shall get the bill up considerably sooner anyway.

Mr. EDGE. Quite the contrary. I am trying to impress the Senator with the conviction that it is with the assurance that we shall have the veto finally disposed of that I make this proposition. Otherwise, what is the parliamentary situation? I have given this matter much thought. Under a ruling by the President pro tempore we can not get the measure up while the Muscle Shoals legislation is pending, unless it be during the morning hour; and everyone knows that that would not permit us to dispose of the message. In fact we have been recessing from day to day. No one can decide how long it is going to require to dispose of the pending Muscle Shoals bill. Under a resolution which has been agreed to Congress adjourns next Saturday for 10 days. We shall come back on the 29th of December. Then New Year's Day will intervene, and apparently, under the present situation, the best I can do is to make a motion some time after that to proceed to the consideration of the veto message. Then the Senate can do as it pleases with the motion. It can buffet the motion; it can filibuster the motion; it can discuss it for hours. If it wants to delay the matter it is reasonable to assume we would not get a vote on this motion until after the 8th of January. Now, I am trying to have the question definitely settled in the interest of the postal employees' salary measure and in the interest of its orderly disposal. I can not understand how anyone can object to this proposition who is in favor of the proposed legislation.

Mr. STERLING. Mr. President, let me say that a unanimous-consent agreement which would deny the right to make a motion to refer the bill and veto message to the committee would be a denial of a right which has long been exercised both in the other House and in the Senate of the United States in regard to referring to a committee a bill which has been vetoed, together with the veto message. There are innumerable precedents to that effect in the other House, and there are also some in the Senate.

Mr. REED of Missouri and other Senators rose.

The PRESIDENT pro tempore. Let the Secretary read the modified form of the proposed unanimous-consent agreement in order that discussion may properly proceed with reference to it.

The reading clerk read as follows:

It is agreed by unanimous consent that at the conclusion of the routine morning business on the calendar day of January 8, 1923, the Senate will proceed to the reconsideration and final disposition of the bill (S. 1898) reclassifying salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes, heretofore returned by the President of the United States without his approval; that no Senator shall speak longer than one hour on the bill, and said bill shall not be laid aside or superseded except by unanimous consent by any other business. But this shall not preclude the offering of a motion to refer the bill and message to a committee.

The PRESIDENT pro tempore. Is there objection to entering into the unanimous-consent agreement?

Mr. STERLING. I suggest the changing of the wording in the unanimous-consent agreement. Instead of reading "to a

committee," I think it should read "to the Committee on Post Offices and Post Roads," rather than to a committee, which might imply a special or select committee.

Mr. REED of Missouri. Mr. President, I was at first prepared reluctantly to accept the proposition to postpone action on this measure until the 8th of January, 1925. I am not, however, in favor of the suggested agreement as modified, which proposes not definite and final action on the veto message on the 8th of January but reference to a committee.

I think I understand this proposition. The President vetoed the postal employees' salary bill. During all of the months when Congress was not in session, of course the question remained in abeyance. Under the ordinary procedure in the Senate the veto would have been laid before the Senate for action almost immediately after its reception. I mean by "immediately" within a day or two days. We who favor this legislation came here prepared to meet the issue and expecting prompt action, but every effort has been made to prevent prompt action. It may not be apparent upon the face of things, but it does not require much experience in this body to know what is going on. Now, the fact is that those who want to sustain the President desire time. They are fearful of the result if the measure is brought to prompt decision. I do not think anybody with any degree of candor can deny that statement.

The measure is one that has been fully discussed upon the floor of the Senate; it has been a long time pending in Congress; hearings have been had, and there is no occasion for any prolonged debate upon this question. There is now a plain skirmish for time, and we know from past experience what that means.

Mr. EDGE. Mr. President, will the Senator from Missouri yield for a moment?

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from New Jersey?

Mr. REED of Missouri. I will yield for a question, but I do not care to yield for a break in what I am saying.

Mr. EDGE. I simply wanted to draw the Senator's attention to the fact—with which, perhaps, he is not familiar, for according to my recollection he was not present at the time—that the Senator from New Jersey presented a unanimous-consent proposal a week or 10 days ago to have the vote taken yesterday. So that every effort, so far as the sponsor of the bill is concerned, has been made to reach an early vote.

Mr. REED of Missouri. I am not criticizing the Senator from New Jersey directly or by implication.

Then we were met on yesterday or the day before with a suave proposition that we ought to postpone action upon this measure for 30 days in order that a bill might be drawn, introduced in the House of Representatives, passed there, and passed in the Senate within 30 days, to raise revenue sufficient to meet the expenditures to be incurred under the bill which the President has vetoed. When inquiry was made it was found that that bill had not yet been written and no one knew what its terms would be, but it was suggested that the money necessary would be raised by increasing the postal rates on the newspapers. Of course, that means that the old artifice is to be employed, namely, that when a measure is proposed which increases the expenditures of the Government the tax shall at the same time be levied, so that every person who has to pay the tax shall rally to the defeat of the proposition.

Without charging any bad motives on behalf of anybody, it is perfectly plain to me that some shrewd legislator has concluded that in order to sustain the President's veto it would be well to rally to the support of the President and to the opposition of the measure the newspapers and periodicals of the country, which would come here saying, "You propose to pay additional wages to the postal employees and you propose to make us pay for the raise." So we would have presented here not only the President and the supporters of his veto but we would have that force recruited by a large outside force here present to insist that that veto must be sustained because of the iniquities in the accompanying measure.

The PRESIDENT pro tempore. The Chair is constrained to hold that this question is not debatable.

Mr. REED of Missouri. It is a little late so to hold, Mr. President. Everybody else who wanted to speak has been indulged, and I hope I will be permitted to conclude my remarks.

The PRESIDENT pro tempore. The Chair suggested that he would permit a reasonable interchange of the views of the Senators, according to the practice of the Senate.

Mr. REED of Missouri. But, Mr. President, you are getting nothing now but pure reason.

Mr. MOSES. I ask unanimous consent that the Senator from Missouri may conclude his remarks.

Mr. REED of Missouri. I think my discussion has been reasonable; I do not know.

Mr. BORAH. Of course, it is reasonable, but if the debate is going to continue we want the unanimous-consent request to include all Senators who wish to discuss it.

Mr. REED of Missouri. Certainly.

Now, Mr. President, I have about reached the point that I want to make in regard to this proposition. We were ready to consent to the 8th provided we obtained a vote which would be a final vote on the 8th; but the proposition is now modified so that we may not get a final vote on the 8th at all, but only a reference to a committee. If it is referred to a committee, the committee can hold the measure for an indefinite period, and probably will hold it to such a period as will make it impossible to have action upon the veto at this session of Congress. And so, Mr. President, in the present form, with the amendment made as it is, I object.

The PRESIDENT pro tempore. Objection is made.

Mr. EDGE. Mr. President, will the Senator answer just one question before he takes his seat? Does he think, as a friend of the legislation, that the objection to this unanimous-consent agreement will actually bring a vote on the veto message more quickly than if it is entered into?

Mr. REED of Missouri. Yes. If you will strike out the last clause and let the proposition stand as it did stand for a vote, so that we will know we will get a vote on the 8th, I am agreeable; but if you propose, instead of that, a reference to a committee, with an indefinite postponement of action, we might as well fight it out on the floor and see if we can get action.

Mr. EDGE. As I understand the rules, we can not prevent a motion to refer to a committee. We can not prevent a majority of the Senate, on a motion of that kind, referring it to a committee, if the majority desire to do so; but I can only point out again the practical situation. If we can not defeat a motion to recommit, we never can pass the bill over the veto.

Mr. REED of Missouri. But we may get the matter up before the 8th; and this proposition as it stands now means, or readily might mean, an indefinite postponement. In the meantime, if we do not make this consent, we can fight the proposition out on this floor, and we will see whether we can get a vote or not. We will try to see whether the other business of the Senate does not stop until this is transacted.

Mr. STERLING and Mr. NORRIS addressed the Chair.

The PRESIDENT pro tempore. The Senator from South Dakota.

Mr. STERLING. Mr. President, I desire to reply to some of the implications, anyhow, of the Senator from Missouri in this matter.

Mr. NORRIS. Mr. President, may I ask the Senator from South Dakota a question there?

Mr. STERLING. I yield.

Mr. NORRIS. Will he add to this unanimous-consent agreement, and will the Senator from New Jersey consent that if a motion is made to refer the matter to the committee, said motion shall be voted on without debate?

Mr. STERLING. Mr. President, I could not consent to that.

Mr. SMOOT. Under the rules it is not debatable.

Mr. CURTIS. Mr. President, under the rules the motion is not debatable.

Mr. EDGE. I will say, in answer to the Senator from Nebraska, if the Senator from South Dakota will yield, that I shall be glad to add that; but it seems to me unnecessary, because under the rules, as I understand, a motion to recommit is not debatable.

Mr. STERLING. Mr. President, we have an example, I think, of where a motion to refer a veto message, together with the bill, was debated, and debated at great length, in the Senate of the United States. I do not recall now just the occasion.

The PRESIDENT pro tempore. The Chair is compelled to say that a discussion of that question is not in order at this time.

Mr. STERLING. Mr. President, I understood that I was recognized by the Chair, and I think I have the floor in virtue of that recognition. I was about to reply to some of the statements made by the Senator from Missouri [Mr. REED].

Mr. NEELY. I call for the regular order.

Mr. STERLING. The Senator from Missouri conveys the idea that there is an intent upon the part of some one to delay action upon this legislation. That is not the idea. I expect to receive to-day a bill prepared at the Post Office Department which will increase the rates on various classes of mail matter, and my thought all along has been to make that bill a part of a

new bill for the increase of salaries, leaving the salaries as they are provided in the bill which the President vetoed.

What is the situation now with reference to the receipts of the various branches of the Post Office Service? Second-class mail is nearly \$75,000,000 behind, lacking that much of paying its way.

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. STERLING. Yes.

Mr. NORRIS. I should like to call the attention of the Senator to the fact that while, of course, he has a perfect right to discuss that matter, my colleague [Mr. HOWELL] had the floor when the Senate took a recess, debating the pending motion; and it was understood when he yielded the floor that he could resume when the Senate reconvened.

Mr. STERLING. Very well. I shall be through in just a moment. I will say to the Senator from Nebraska.

The PRESIDENT pro tempore. The Chair desires to say again that this question is not debatable. The Chair desires, however, in accordance with the custom of the Senate, to give an opportunity for an interchange of views upon the wisdom of granting or refusing this unanimous-consent agreement; but the Chair does not desire to hear a debate upon extraneous matters.

Mr. NORRIS. Mr. President, will the Senator yield for just a moment? I desire to call the attention of the Chair to the fact that there is a motion pending, and the Senator from South Dakota now legally has the floor, and, of course, he can talk about anything he wants to. I simply desired to call the attention of the Senator to the fact that my colleague [Mr. HOWELL] had the floor, and as a matter of courtesy I think he ought to be permitted to continue.

Mr. STERLING. I conclude with this statement, Mr. President: In view of what I have said and what has been said by other Senators on the floor here, I thought it but reasonable that this bill should be referred to the committee for the purpose of considering the bill that will be presented by the Post Office Department for the increase of rates to ascertain whether we can not combine the two propositions, and bring out a bill that will be satisfactory to the Senate and do justice to the people of the United States. There is no intention of causing any unnecessary delay.

The PRESIDENT pro tempore. Objection has been made. The Chair recognizes the Senator from Nebraska [Mr. HOWELL].

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam plow plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from South Carolina [Mr. SMITH] to the substitute of the Senator from Alabama [Mr. UNDERWOOD], on which the Senator from Nebraska [Mr. HOWELL] is entitled to the floor.

PERSONAL EXPLANATION

Mr. UNDERWOOD. Mr. President, I do not often rise to a question of personal privilege, but I have lying on my desk an editorial that is in one of the morning papers, and probably the editorial was based on an article that purports to come from the Senator from Nebraska, which I am sure does not carry the facts, as I think the Senator will agree if he will refer to the article that attempts to quote him. I should like to make my statement now in regard to this matter of personal privilege as an immediate answer, and then it will give the Senator a chance to reply, if he will kindly yield for that purpose. I know he has the floor, and I can not take it away from him.

Mr. HOWELL. I yield.

Mr. UNDERWOOD. Mr. President, it is not often that I worry myself about any newspaper comment. I have been in Congress nearly 30 years. I have handled tariff legislation that brings comment and criticism, and I think a man in public life should be trained to accept fire coming from the opposition;

and if it is honest, truthful criticism he should accept his part and not complain about it, because I think in fact honest and truthful criticism is most beneficial both to Congress and to the individual Member of Congress. Of course, however, when a propaganda is organized for the evident purpose, through lies, of creating misunderstanding and a misinterpretation to the American people in order to mislead them the man involved not only must rise to defend himself but it is his duty to make very clear what stands behind the libel and the falsehood uttered.

There is in the Washington Herald this morning an editorial that deliberately tries to put me in a position that I never have occupied and do not occupy. Unfortunately, within the year this paper was guilty of a somewhat similar offense. I called on the paper to correct it the next morning, and that was done, and I let it pass; but as this involves a great public question, as well as myself, I would not be doing justice either to myself, to the Senate, or to my constituency if I did not challenge the lie that is editorially uttered in this paper. I ask the Senate to allow me to read it to them at this time.

The heading of the editorial is:

ANOTHER TEAPOT DOME IS THRUST UPON MR. COOLIDGE

President Coolidge is a wise, courageous, and patriotic leader. Once he has gone to the bottom of a subject he is likely to decide rightly about it. Therefore, the country can have confidence that President Coolidge will disregard those advisers who seek his support of the Underwood bill, now in the Senate, authorizing the Secretary of War to "lease" Muscle Shoals for 50 years to the Alabama Power Co.

Let me stop there to interpolate that under the Underwood bill the Secretary of War is authorized to make a lease subject to the approval of the President, and the Secretary of War can not make the lease unless it receives the approval of the President of the United States. Next, let me say again, as I have said before, that the bill I introduced was introduced without any consultation with the Alabama Power Co. or any other power company; that the only talk I have had with an officer of the Alabama Power Co. was after the bill was written and came to the Senate in that form; and he stated to me then that he would not make a bid under the terms of my bill if it became a law, because he said he did not propose to go into the fertilizer business. That man's name is Mr. Thomas Martin, and he is president of the Alabama Power Co.; and yet some Senators on this floor have sought to connect this bill with the Alabama Power Co.

I am always polite to my colleagues; but I want to challenge the statement of any man, on this floor or off of it, who seeks to say that the bill I have introduced has any connection at all with the Alabama Power Co. The statement is false in its conception and in its intention. I know perfectly well, and you know, that for the last three or four years I have been supporting Mr. Ford's offer to take over the shoals. If you know anything, you know that the Alabama Power Co. has been before the committee having this legislation in charge fighting the Ford offer.

The Alabama Power Co. has been collaborating on the other side of the question and suggesting a power bill, not a bill for fertilizers and national defense, and I challenge any man in the Senate to deny that statement.

This editorial challenges the bill as a steal. There are just two parts to the bill. One provides that any lease which may be made must contain a clause that would compel the making of 40,000 tons of nitrogen for national defense and a requisite amount of fertilizer to consume it, and that the contract shall provide for not less than 4 per cent on the cost of the dam. The President of the United States, through his Secretary of War, would have the right and power under this bill, subject to the limitations I have just named, to make any kind of a lease he desired. I ask any man who challenges that statement to do so now.

It will be absolutely in the hands of the President of the United States. The bill says the Secretary of War shall have the power to make the lease, subject to the approval of the President. Of course, the President himself could not conduct the negotiations and make the contracts. He would have to have an agent, and if I struck the provision out providing that the Secretary of War should conduct the negotiations and just said the President, as the Secretary of War is the war officer charged with the national defense and has had under his command the building of this great plant, he, in all human probability, is the man the President would pick to initially make the contract, subject to his approval. So in the end it would have to come back to the President of the United States.

Before I go further in my remarks, let me continue the reading:

President Coolidge can not afford and does not want a Teapot Dome scandal in his administration. He is being offered a greater scandal in this proposal of Senator OSCAR UNDERWOOD.

"Offered a scandal." Mark the lie that lay in the mouth of the editor of this paper when he wrote those words, trying to hitch this matter up with a scandal such as the Teapot Dome scandal, when the only limitation on the power of the President is that requiring him to make the lease with a provision in it for the production of nitrogen for national defense and fertilizer. Otherwise, he can make the lease as he desires. This editor tries to placate the President in his opening words by saying he is "a wise, courageous, and patriotic leader," as he is; and then he says that because I put in the hands of that wise, courageous, and patriotic leader the power to make a lease to dispose of this property that there is a greater scandal than the Teapot Dome.

As a matter of fact, I have no doubt that that editorial was purchased by interests who are trying to gobble this power. I do not know, I have no proof of it, but it bears on its face evidence that the corrupting hand is behind this libel. Listen further:

Who is OSCAR UNDERWOOD? He is an able man, capable of high statesmanship, but since his entrance into Congress his ability and his statesmanship have often been at the service of the railroads and the other great corporations seeking public privileges without paying for them. Just now his talents and ability are working in the interest of the central figure in the Electric Power Trust—the General Electric Co. It owns the Electric Bond & Share Co., which has stock ownership and its own directors in Mr. UNDERWOOD's Alabama Power Co., to which the Senate of the United States is asked to give away the second most valuable property of the Nation, second only to the Panama Canal.

Mr. President, there never was a lie that was more deliberate and manifest than the utterance of this paper. There never has been a time in the 30 years that I have been in the Congress of the United States when I have ever served, directly or indirectly, the great corporations of Alabama or of the United States, and I challenge any man to show that I have. I voted for the Esch-Cummins bill, and I got a great deal of criticism on account of that vote. I was on the general committee which wrote the bill, but I was not on the conference committee. I accepted the conference report, as did the other Members of the Senate who voted for it. Outside of that one vote, I do not recall any time when I could have been said to have voted for any railroad legislation which the railroads wanted. If I have, it was not anything that I was fostering, and it has gone entirely out of my mind. I voted for the Esch-Cummins bill because we had to take the railroads out of the Government's hands and put them back into the owners' hands.

Listen to this editorial further:

But since his entrance into Congress his ability and his statesmanship have often been at the service of the railroads and the other great corporations.

Mr. President, if there is one thing that stands out distinctively in my career, it is the writing of a tariff bill by the committee of which I was chairman, where I had all of the great industrial corporations of America before my committee, and no man has ever charged that I wrote that bill, or that the committee of which I was chairman wrote that bill, in the interest of great corporations. The real truth about it is that when it came to the writing of the bill I put on the free list the items in which either myself or my family was interested and most of the great iron and steel commodities of the Birmingham district; not that I was discriminating against them, but I knew they did not need a tariff. Was that yielding to the demands of great corporation interests, when I was putting the products of my own district and my own State on the free list? Listen to this language:

• • • the central figure in the Electric Power Trust—the General Electric Co. It owns the Electric Bond & Share Co., which has stock ownership and its own directors in Mr. UNDERWOOD's Alabama Power Co., to which the Senate of the United States is asked to give away the second most valuable property of the Nation.

I know, as well as this editor knows, that the General Electric Co., through these other corporations, is the final owner of the Alabama Power Co. That is true. But when he says "Mr. UNDERWOOD's Alabama Power Co.," he is trying to insert by indirection a malicious lie into the brains of the American people. I have no connection whatever with the Alabama Power Co., and never have had, either as a stockholder, an

individual, or an associate—none whatever—and what I am trying to do by this bill is not to create a great power project. I am making a fight here to give the President of the United States power, in accordance with the message which he sent to Congress within this month, to allow this property to be operated to make nitrogen for national defense and fertilizers for the people of America, the farmers of America; and it is because I take that stand that these men who are behind the Power Trust which wants this power are trying to connect me and my bill with that interest—to defeat it by an infamous lie; that is all.

The editorial continues:

The Government of the United States has spent \$135,000,000 at Muscle Shoals, beginning the project in war time. This \$135,000,000 of property constitutes perhaps the most valuable manufacturing property in the world. It includes two entire towns, scores of miles of railroad, two huge steam-power plants, and two great nitrate factories, one of them the largest of its kind in the world. Finally—and this is what the Power Trust is after—Muscle Shoals has the huge Wilson Dam and power house, which converts the rushing river into 100,000 horsepower of electric energy. When the Government has completed the additional dams and storage reservoirs in the Tennessee River it will be providing 500,000 horsepower—a second Niagara.

Incidentally, I wish to say that the committee bill is the one which would develop this great horsepower, not my bill. My bill relates to Dam No. 2, and not to the development of the upper reaches of the Tennessee River. That is provided for in the bill reported by the committee as a substitute for the Ford offer.

I continue reading:

The Power Trust, always wise and always awake, is terrified at the prospect of Senator Norris's bill.

I think if Senators will read the testimony before the committee they will find that the gentlemen who are interested in power were testifying favorably to a power bill and not to the Ford offer, which is a nitrogen and fertilizer proposition; and the Ford provisions are the provisions in the bill I have introduced.

Take the testimony yourselves and find out which side the power men are on. Every line of testimony which they delivered was against Ford, and my bill is the Ford offer, except that it opens the matter to any bidder in the world, and the committee bill, although it refers to the production of fertilizer in an experimental way, is a great power bill. Its purpose is to develop the high powers of the Tennessee River and possibly produce a million horsepower.

Was there ever a more damnable misrepresentation of facts than that which this editorial contains? I will read that again:

The Power Trust, always wise and always awake, is terrified at the prospect of Senator Norris's bill.

I am not reflecting on the Senator from Nebraska and would not do so for the world; but, as I have said many times in the debate and as the Senator himself practically said in his own speech, his bill provides for the development of power. Read it. It would build Dam No. 3, it would build the reservoirs, and it relates to the headwaters of the Tennessee River and, according to his own speech, would result in a great development of power. My bill would not do so. That is not contemplated in it—not that I object to the development of that power properly, but it is not in the legislation I propose. This editorial writer has just reversed the situation. The editorial continues:

If the United States Government is allowed to use its own electricity at Muscle Shoals to demonstrate how cheaply electricity can be sold, it would destroy the richest source of private monopoly profits in the Nation.

My bill provides that unless we can get a lease satisfactory to the President a Government corporation shall operate the plant and sell the power. This editorial writer says the President will be honest about it, and yet I put it into the hands of the President to make the lease, and if he fails to make a fair and honest lease I put it in the hands of a Government corporation to run it in the interests of the American people.

Within a year every section of the country would be proceeding with a similar public-owned hydroelectric development. Or, in anticipation of such development, the private electric light companies would be scaling their rates down to a decent level.

There is a misrepresentation of rates in my State that is attributed to the junior Senator from Nebraska [Mr. HOWELL]. It is entirely wrong, but I have talked with the junior Senator

from Nebraska and he has told me that the newspaper man did not properly quote him and that later on he will correct that statement.

Mr. HOWELL. May I interrupt? I have not read the article.

Mr. UNDERWOOD. It says the horsepower in Alabama is sold for \$60 per horsepower. None of it is ever sold for more than \$25.

Mr. HOWELL. I have not made a statement as to what it has been sold for there, but I will make a clear statement as to what my views are respecting the situation.

Mr. UNDERWOOD. I am not objecting to what the Senator thinks or said, because he does not attribute it to me. He has a right to his own opinion. Clearly this editorial writer in writing the newspaper article got his information wrong or deliberately misrepresented when he said the Alabama Power Co. was selling electricity to the people of Alabama for \$60 per horsepower. I think that is untrue.

Mr. HOWELL. Of course, the Alabama Power Co. is selling electric energy at a higher price than \$60, but the Senator means on an average.

Mr. UNDERWOOD. Yes. It may be it is selling in some particular case a very small or limited quantity at such a rate, but I am talking about the sale for industrial and other purposes.

I will proceed with the editorial:

The interests behind the Underwood bill are perfectly obvious. It would be wrong to give the Muscle Shoals power away to a private power corporation under any conditions. It is a crime to give it away for such a miserable pittance as a 4 per cent rental—not 4 per cent on the entire \$135,000,000 but 4 per cent only on the \$45,000,000 that the Wilson Dam cost.

Mr. President, I have stated that the rental in the bill is low. I have stated that we put it low to try to induce some private citizen like Mr. Ford to make nitrogen for national defense and fertilizer for the farmers, but I also stated that that was the minimum, that the President of the United States—in whom even this editorial writer has confidence, as he says in his article—can make the price and terms of the contract whatever he wants. The minimum price is fixed in my bill and not the maximum price; and if they can find a bidder who will do the work, they can charge him twice or three times or four times the minimum price as fixed in the bill. If there is any purpose in putting this provision in the bill, it is for the purpose of seeing that the power is not given away entirely.

The Power Trust is to be given \$30,000,000 outright in return for doing us the service of blocking an immediate opportunity to operate a magnificent public-owned power plant, eventually big enough to serve the entire South.

Of course, if we developed the power in the upper reaches of the Tennessee, we could probably produce and would produce a million horsepower, I think. That would be a very great horsepower, but it would not serve all the uses of the South. But the gravamen of that sentence is that the Power Trust is behind this bill of mine to make nitrogen for the farmers.

Mr. REED of Missouri. And is going to get it.

Mr. UNDERWOOD. Yes, and is going to get it; that the Power Trust is going to get it when every effort of the Power Trust has been in the direction of power, and not in the direction of making nitrogen. It is perfectly evident that the men who are interested in power realize that the bent of the United States Senate is to accept the recommendation of the President of the United States and use the power primarily for the purpose of national defense in the form of 40,000 tons of nitrogen and to serve the farmers of America, and now when they fear they can not command sufficient votes to defeat my bill which they do not want, they are trying to libel me and make the American people believe that my bill is in the interest of power and not in the interest of fertilizer for the farmers. It is simply an infamous misrepresentation by a lobby that stands without doors of the Senate Chamber at this hour. I know they are there and Senators know they are there, and we know their purpose.

Muscle Shoals is purely a power proposition.

Listen to this. Here is the confession of this editor, Mr. President. In the next sentence is where this editor pleads guilty of the charge that I have made against him. After condemning my bill and condemning me as being an instrument of the General Electric Co., when I have never had a dealing or connection with anybody that ever belonged to the General Electric Co. whatever and no consultation whatever

in regard to the terms of the bill or what I have said or what I have advocated, yet he puts me in partnership with them because I am trying to make nitrogen for defense and fertilizer for the farmer. After all that, listen to where he pleads guilty to the influences of the Power Trust himself. I do not know whether those influences were gold, dinners, or personal friendship, but here is the plea of guilt:

Muscle Shoals is purely a power proposition.

Mark you, my bill is not purely a power proposition. My bill is a national defense and fertilizer proposition, with merely the right to sell the surplus power, and this editorial writer is condemning my bill as being in partnership with the Power Trust. Yet listen now to his plea of guilt:

Muscle Shoals is purely a power proposition. All talk of making cheap fertilizer for the farmers there is pure buncombe and the Underwood bill advocates know it.

He comes down to his confession when he says this:

Muscle Shoals is purely a power proposition. All talk of making cheap fertilizer for the farmers is pure buncombe and the Underwood bill advocates know it.

I do not know it. I know that every other great civilized nation in the world is making nitrogen for national defense and selling that nitrogen to the manufacturers of fertilizers for the farmers in times of peace. We have Germany, France, England, and Japan that are all doing the same thing and doing it successfully.

This editor says that our efforts to do anything for the farmers of America at this time are "pure buncombe," and that we know it. Well, Mr. President, I do not know it. The efforts I have made in that direction are earnest and honest and I hope they will be successful. But I do know that when this paper published that article and said that the Muscle Shoals development is a pure power proposition, it admitted that it had accepted a brief from the power companies of America to try to kill my bill. That is all there is to it. They want to wipe out fertilizer, they want to wipe out national defense, and then allow some power company that is probably within their trust to absorb all the power of the Tennessee River.

The editorial goes on to say:

Secretary Weeks, said to be desirous of retiring on March 4, will be the man to give away Muscle Shoals, if it is given away. Secretary Fall, a member of President Harding's Cabinet, thus alienated the Navy's oil reserves, incomparably less valuable than 50 years' ownership of half a million electric horsepower.

President Coolidge is too wise to want another Teapot Dome in the Cabinet at Washington.

This snake that crawls through an editorial column bearing misrepresentation and slime is too cowardly to attack the President of the United States, and seeks by innuendo and charge to attack other people who are only carrying out exactly what the President of the United States has recommended. Listen to this from the message of the President of the United States delivered to the Congress during this month:

Several offers have been made for the purchase of this property. Probably none of them represent final terms. Much costly experimentation is necessary to produce commercial nitrogen. For that reason it is a field better suited—

Listen to this—

For that reason it is a field better suited to private enterprise than to Government operation.

That is exactly what my bill does and exactly what the Norris bill does not do. The President continued:

I should favor a sale of this property, or long-time lease, under rigid guarantees of commercial nitrogen production at reasonable prices for agricultural use.

The bill I introduced gives that power to the President of the United States, and yet when my bill attempts to carry out identically the terms that the President names in his message this editorial writer says:

President Coolidge is too wise to want another Teapot Dome in the Cabinet in Washington.

In other words, it is the first attack on this Republican administration since it was elected because all the power of the bill rests solely in the hands of the President of the United States.

It is in conformity with the message and desires of the President of the United States. To say that it is going to create a Teapot Dome scandal is identical with saying that if the

matter shall go to the President we can not trust him, but that he will betray the confidence which the American people reposed in him when he was elected President of the United States last November.

The President even goes further than I do. I limit the lease to a term of 50 years, when the property shall come back to the Government, but the President states that it might be well to sell the property or to make a long-time lease.

Mr. President, if it were only myself, I think my character is sufficiently established among the American people to rise above the mud heaps of scandal and dirt that can be thrown at one in a newspaper whose own character is very questionable; but this goes to a great piece of legislation. Here is a charge made that legislation of a corrupt nature is sought to be passed through the Congress. I do not think the statement ought to go without challenge.

I know that there are lobbies here who are trying to get the power which may be developed at Muscle Shoals. When I say "lobbies" I mean gentlemen who represent power interests. I do not charge them with corruption or misconduct; they may have a perfect right to try to have enacted legislation that suits them so long as it is done honestly, and I do not charge them with any dishonest purpose, but that they are here trying to shape this legislation in favor of power development and utilization and not for the production of fertilizer no man who knows anything about the situation can doubt.

I think that that editorial challenging the character and integrity of one of the Members of the Senate is entitled to the consideration of the Senate of the United States, and, although I can not make the motion at this time, Mr. President, I ask unanimous consent that the charges made in that editorial may be referred by the Senate to the Judiciary Committee of the Senate, for them to report concerning the facts involved, to call this editor before them to ascertain the truth or falsity of this editorial and who is responsible for it, and the truth or falsity of the charges against me, and as to whether any man in all this broad land can be found to substantiate a single one of the charges that have been uttered in this newspaper, and, further, that the committee shall report a resolution, if necessary, authorizing them to summon witnesses and giving them the necessary power to act. I make that unanimous-consent request and ask that it may be agreed to.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Senate has heard the request of the Senator from Alabama. Is there objection? The Chair hears none, and it is so ordered.

Mr. UNDERWOOD. I thank the Senate.

MEMORIAL SERVICES FOR THE LATE WOODROW WILSON

Mr. CURTIS. Mr. President, in order to carry out the purposes of the concurrent resolution providing for services in the Hall of the House of Representatives on Monday next in memory of Woodrow Wilson, late President of the United States, I ask unanimous consent that when the Senate shall conclude its business to-day it take a recess until 11.50 o'clock on Monday morning.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT OF NATIONAL PROHIBITION ACT

Mr. STERLING. Mr. President, I desire to call attention to calendar No. 846, being the bill (H. R. 6645) to amend the national prohibition act, to provide for a bureau of prohibition in the Treasury Department, and define its powers and duties. It is known as the Cramton bill. The bill was reported to the Senate, after a poll of the committee, at the last session on the 6th day of June, the day before final adjournment. I subsequently sent to about 75 Members of the Senate, including all the members of the Judiciary Committee, all available copies of the House hearings on the bill which I had. But, notwithstanding that, there is a disposition on the part of some of the Members to think that the bill ought to be considered in the committee, and I think probably that a point of order could be made against the bill if its consideration were moved, namely, that it had not been considered in committee. I therefore ask unanimous consent that the bill may be recommitted to the Committee on the Judiciary.

Mr. ROBINSON. Mr. President, may I ask the Senator a question?

Mr. STERLING. Certainly.

Mr. ROBINSON. Is it intended to give the parties who may be opposed to the bill an opportunity of hearing?

Mr. STERLING. It is so intended.

Mr. ROBINSON. I have no objection to the request.

Mr. FLETCHER. Mr. President, will the Senator state again what the bill is.

Mr. STERLING. It is known as the Cramton bill, being House bill 6645.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Dakota? The Chair hears none, and the bill is recommitted to the Committee on the Judiciary.

INDEMNITY ON ACCOUNT OF DEATH OF A BRITISH SUBJECT
(S. DOC. NO. 172)

The PRESIDING OFFICER (Mr. JONES of Washington in the chair) laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed:

To the Congress of the United States:

I transmit herewith a report from the Secretary of State in relation to the claim presented by the British Government for indemnity on account of the death of Daniel Shaw Williamson, a British subject, at East St. Louis, Ill., on July 1, 1921. I recommend that Congress authorize an appropriation and that an appropriation be made to effect a settlement of this claim in accordance with the recommendation of the Secretary of State.

CALVIN COOLIDGE.

THE WHITE HOUSE,
Washington, December 13, 1924.

REPORT OF THE GOVERNOR GENERAL OF THE PHILIPPINES

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Territories and Insular Possessions:

To the Congress of the United States:

As required by section 21 of the act of Congress approved August 29, 1916 (39 Stat. 545), entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands," I transmit herewith, for the information of the Congress, the report of the Governor General of the Philippine Islands, including the reports of the heads of the departments of the Philippine Government, for the fiscal year ended December 31, 1923.

I concur in the recommendation of the Secretary of War that this report be printed as a congressional document.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 13, 1924.

REPORT OF THE PERRY'S VICTORY MEMORIAL COMMISSION

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on the Library:

To the Congress of the United States:

I transmit herewith the fifth annual report of the Perry's Victory Memorial Commission, dated December 1, 1924, which was submitted to the Secretary of the Interior, pursuant to section 5 of the act entitled "An act creating a commission for the maintenance, control, care, etc., of the Perry's Victory Memorial on Put in Bay Island, Lake Erie, Ohio, and for other purposes," approved March 3, 1919 (40 Stat. 1322-1324).

CALVIN COOLIDGE.

THE WHITE HOUSE, December 13, 1924.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17, on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. BROOKHART. Mr. President—

The PRESIDING OFFICER. The Senator from Nebraska is entitled to the floor. Does he yield to the Senator from Iowa?

Mr. HOWELL. I yield.

Mr. BROOKHART. Mr. President, the Senator from Nebraska has consented to yield to me a few moments while I put into the Record certain information in reference to the nitrate situation in Germany at this time from the supplement to Commerce Reports, dated September 29, 1924, being Trade Information Bulletin No. 207. That bulletin states:

As a result of the expansion of the air-nitrogen industry Germany found herself at the end of the war with a fixed-nitrogen producing capacity greater than her total consumption of fixed nitrogen for all purposes in 1913. Under normal conditions Chilean nitrate would have regained a part of its pre-war market in Germany, for a time at least, because of the specific demand for nitrate. In order to protect the industry, however, the German Government excluded Chilean nitrate entirely. Later, under pressure of agricultural demands and probably upon urgent requests of the Chilean nitrate interests, the ban was lifted to allow entry of a limited amount of nitrate. Meanwhile the financial crisis in Germany had come on and only a part of the allowed importation was actually accomplished. During the past few years a relatively small tonnage of Chilean nitrate has found a market in Germany, and it appears certain that even with complete stabilization of financial conditions in Germany, Chilean nitrate will never again find a large market in that country.

Mr. President, from that it appears that in spite of all the industrial development during the war it was necessary to put an absolute embargo on Chilean nitrates and to exclude them from Germany.

I now ask to have inserted in the Record a table in the same document showing the fixed nitrogen production in Germany in metric tons for the years 1912-13, 1915-16, 1916-17, and 1917-18, appearing on page 6 of the report. The table shows that the production increased from 122,000 tons in 1913 to 271,000 in 1918. The present capacity of the industry as developed during the war is 400,800 tons.

The PRESIDING OFFICER. In the absence of objection, the table will be printed in the Record.

The table referred to is as follows:

The actual production of fixed nitrogen in Germany during the war years is shown in the following table:

Fixed-nitrogen production in Germany

[In metric tons. Years ending April 30. Data from Die Stickstoffversorgung der Welt, Walter Eucken, 1921]

Produced from—	1912-13	1915-16	1916-17	1917-18
Coke and gas works.....	110,000	90,000	100,000	100,000
Cyanamide process.....	5,000	20,000	58,000	66,000
Direct synthetic ammonia.....	7,000	24,000	64,000	105,000
Total fixed nitrogen.....	122,000	134,000	222,000	271,000

Mr. BROOKHART. I also ask unanimous consent to have inserted in the Record a table appearing on page 7 of this report giving the details of the production capacity of the air-nitrogen industry of Germany.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Iowa? The Chair hears none, and it is so ordered.

The table referred to is as follows:

The approximate production capacity of the air-nitrogen industry in Germany at present is given in the following statement:

By direct synthetic ammonia process:	Metric tons
Badische Anilin- und Sodafabrik, Oppau.....	100,000
Ammoniakwerke Merseburg, Merseburg.....	200,000
By cyanamide process:	
Mitteldeutsche Stickstoffwerke, Pleieritz.....	30,000
A. G. für Stickstoffdünger, Knapsack.....	12,000
Bayerische Stickstoffwerke, Trostberg (Margaretenberg).....	30,000
Lonzawerke, Waldshut.....	12,000
By arc process:	
Elektro-Nitrum A. G., Rhine.....	4,000
Elektrosalpeterwerke, Muldenstein.....	2,000
By coke and gas works: Combined capacity.....	100,000
Total fixed nitrogen.....	490,000

Mr. BROOKHART. I also ask unanimous consent to insert in the Record the table appearing on page 8, entitled "The production of fixed nitrogen in Germany."

The PRESIDING OFFICER. Without objection, it is so ordered.

The table referred to is as follows:

Production of fixed nitrogen in Germany

[In metric tons. Data from report of M. Tillier to the "Service of restitution and reparation in kind," from *Industrie und Handelszeitung* and other technical journals]

Produced from—	1913	1920-21	1921-22	1922-23
Coal-gas and coke works.....	110,000	70,000	90,000	75,000
Cyanamide plants.....	5,000	50,000	47,000	35,000
Synthetic ammonia plants.....	7,000	110,000	170,000	210,000
Total fixed nitrogen.....	122,000	230,000	307,000	320,000

Mr. BROOKHART. I also ask unanimous consent to have incorporated in the RECORD a table showing "The consumption of fixed nitrogen in agriculture in Germany from 1914 to 1922," appearing on page 8.

The PRESIDING OFFICER. Without objection, it is so ordered.

The table referred to is as follows:

CONSUMPTION OF FIXED NITROGEN IN GERMAN AGRICULTURE

German agriculture has long been intensive and the nitrogen consumption high. The following data on the consumption of fixed nitrogen by agriculture are quoted from Tillier's report to the "Service of restitution and reparation in kind (years ending April 30)":

	Metric tons
1914.....	210,000
1915.....	98,000
1916.....	73,000
1917.....	80,000
1918.....	92,000
1919.....	115,000
1920.....	159,000
1921.....	215,000
1922.....	295,000

These tonnages presumably do not include any of the nitrogen used by industry.

Mr. HOWELL. Mr. President, in opening I wish to say, in connection with whatever remarks I may make at this time, that I have the greatest respect for the senior Senator from Alabama [Mr. UNDERWOOD], and while I may not agree with him in his view of such a question as we now have before us, I do not question his motives. Moreover, I wish it understood that anything I may say with reference to the Alabama Power Co. will not be said with an idea of casting any reflection upon the senior Senator from Alabama or of suggesting that he is in any way connected with or influenced by that corporation.

Mr. President, there is no lack of production of fixed nitrogen in the United States to-day. In 1923 there were produced some 600,000 tons of ammonium sulphate, and of that amount there were exported 172,000 short tons, which brought an average of about \$50 per ton. This means that fixed nitrogen in that form was produced in this country last year in excess of 34,000 tons, at a market price—not at a cost—of about 12 cents a pound.

In the substitute offered by the Senator from Alabama it is proposed to make it obligatory upon a lessee of the property at Muscle Shoals to produce 40,000 tons of fixed nitrogen.

Mr. FLETCHER. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Florida?

Mr. HOWELL. Certainly.

Mr. FLETCHER. May I interrupt the Senator to inquire, if the Senator's preliminary statements are correct about the production of nitrogen in this country, what is the occasion for the large importations of Chilean nitrates into this country?

Mr. HOWELL. For use in the production of fertilizer. It has some advantages for particular kinds of fertilizer. The statistics I have given are in accord with the facts.

It is proposed, under the substitute of the senior Senator from Alabama, that the lessee of this property must produce at least 40,000 tons of fixed nitrogen. That means 80,000,000 pounds, which at 12 cents a pound equals \$9,600,000.

Yesterday, it will be remembered, in response to a question put to the Senator from Alabama [Mr. UNDERWOOD], he stated that the evidence showed that fixed nitrogen might be produced at Muscle Shoals for 5 or 6 cents a pound less than the price I have stated.

Mr. UNDERWOOD. Oh, no, Mr. President.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Alabama?

Mr. HOWELL. I do.

Mr. UNDERWOOD. If the Senator will yield, I read the testimony of certain chemists. I have their testimony here in

my desk, or it is in the RECORD. In that testimony they stated that it could be produced for 5 or 6 cents—not 5 or 6 cents less, but for 5 or 6 cents. I am not a chemist. I do not know whether they are right or wrong; but some of them were eminent chemists, and that was their statement. I read it to the Senate, and it is in the RECORD.

Mr. HOWELL. Assume that they can produce fixed nitrogen for 6 cents a pound. I have pointed out that the cost of fixed nitrogen in the form of ammonium sulphate is about 12 cents a pound. That would be about 6 cents a pound more than the cost as suggested through manufacture at Muscle Shoals. Six cents a pound upon 80,000,000 pounds means \$4,800,000, a sum that might be saved to the farm operators of this country, provided the lessee of this property produced 40,000 tons, and not more.

It is also provided in the substitute offered by the Senator from Alabama that the lessee shall be entitled to 8 per cent return upon the cost of production of this fixed nitrogen. If the cost of production is 6 cents a pound, 80,000,000 pounds will cost \$4,800,000. Apply your 8 per cent and you will find, as all profit and royalties must be deducted from the saving sought for the farmer, that the net saving to farm operators because of this proposal for the production of nitrogen at the Muscle Shoals plants for fertilizer will be not far from \$4,000,000 a year as a minimum, or an average of about 60 cents per year to each of the 6,500,000 farm operators in the United States. In short, this is what we are considering here to-day, and have been for the past week.

It may be urged that the lessee of this plant will make more than 40,000 tons of fixed nitrogen. As it has been made clear that the reason we are asked to give the Muscle Shoals plant to a lessee on such favorable terms is to grant him a bonus for making fixed nitrogen, and as the money or profit will lie in the sale of power, we can properly expect that he will make not more than the minimum fixed nitrogen required under his contract. Therefore I feel that under the circumstances I am justified in insisting that the average saving possible under this bill through the leasing of Muscle Shoals will not exceed 60 cents per annum to each of the 6,500,000 farm operators in this country.

We, it is apparent, are thinking only of fertilizer.

Mr. SIMMONS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. HOWELL. I do.

Mr. SIMMONS. I am very much interested in the statements the Senator from Nebraska is making. As I understand the Senator, his argument is that the farmers of this country would get only 60 cents per capita reduction. Am I right about that?

Mr. HOWELL. Upon the basis of the premises that I have laid down.

Mr. SIMMONS. If, therefore, these operations at Muscle Shoals shall eventuate in a reduction of the price of the fertilizer produced at that plant by reason of the fact that it is demonstrated that it can be made at probably half the price of Chilean nitrogen, does not the Senator think that the nitrogen we have to buy from abroad for the use of the farmers would be likewise reduced in price, and that the farmer would not only get the benefit of the reduction upon that part of his fertilizer which he buys from the Muscle Shoals company, but he would get likewise the benefit of the reduction which would be enforced as a result of the cheaper fertilizer produced in this country upon the fertilizer which he buys other than from the Muscle Shoals company? Do I make myself clear?

Mr. HOWELL. The Senator does.

Mr. SIMMONS. In other words, Mr. President, if this fraction of our requirements of fertilizer is produced so much cheaper than we are now paying for the fertilizer which we import into this country, does the Senator think that the effect of that reduction in the price of a part of the farmer's fertilizer would force a reduction in the price of the balance of his requirements?

Mr. HOWELL. Mr. President, there is now used in this country about 200,000 tons of fixed nitrogen per annum for fertilizer purposes. If it were all reduced to 6 cents it would amount to a saving of but approximately \$3 annually for each farm operator in this country; but I have no confidence that any such result would be achieved, because the interests producing and selling nitrogen are organized for the insurance of profit, and all of the saving rendered possible under such circumstances would not go to the farmer; but, understand, if all of it were reduced to 6 cents it would only amount to about \$3 per annum for each farm operator in this country.

Mr. SIMMONS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska further yield to the Senator from North Carolina?

Mr. HOWELL. I do.

Mr. SIMMONS. If the reduction extends to the entire amount of pure nitrogen used by the farmers of this country, they will get their nitrogen—which is the most essential of all fertilizers—at practically one-half of what they are paying for it now. The argument of the Senator is that the present expenditure of the farmer for nitrogen is not very large, but however large it is, it is an important fertilizer; and if, as the result of the establishment of this manufacturing operation at Muscle Shoals, the farmer can get that fertilizer at one-half what he is paying for it now, we will have accomplished our purpose.

We are seeking here to reduce the price of nitrogen to the farmer—not all fertilizer, but this essential element in fertilizer—and if we reduce it one-half, whether that one-half be 60 cents or \$2, we will have accomplished our object.

Mr. NORRIS. Mr. President, may I interrupt my colleague there?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to his colleague?

Mr. HOWELL. I do.

Mr. NORRIS. I want to ask my colleague if, in finding out whether the farmer is going to be benefited by a reduction that might take place, it is not necessary for us to consider this fact: We always have a deficit of fertilizer. With all this addition we would still have a deficit; and therefore the people who had it could put it on the market and sell it as long as the market could absorb it—and it would, and more than they could produce here—at the same price that all the other fertilizer sells for, and therefore the farmer would not get any benefit. It would all go to the lessee.

Mr. HOWELL. Mr. President, I think it is rather a violent assumption that through the production by a lessee of 40,000 tons of fixed nitrogen we are to have a reduction of 50 per cent in the price of all the nitrogen that is sold in this country. That is the theoretical result, and we know that the promise of theory goes far beyond practical results which are usually obtained. But let us consider what we are going to pay for this saving.

Mr. SIMMONS. Mr. President, suppose, as a result of this experiment into which we are now asking the Government to go, it should be demonstrated that we can make nitrates in this country at one-half the price we are paying for Chilean nitrates; does not the Senator believe that American capital would be induced to go into the manufacture of nitrates, and supply the balance of the demand, instead of forcing the farmers of this country to pay double the price? Has not that result always followed, when it is demonstrated that we can manufacture here in the United States a product at a lower cost than it can be manufactured abroad, and there is a demand for that product? Does not the Senator know that American ingenuity and initiative and spirit in this country have always risen to the requirements of the occasion and have supplied the American markets?

Mr. NORRIS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to his colleague?

Mr. HOWELL. I yield.

Mr. NORRIS. I only interrupt because the Senator from North Carolina has referred to me and my question. I only wanted to say that the provisions of the so-called Underwood substitute provide practically nothing, as I look at it, in the way of authorization for experimentation, or anything of that kind. If the Senator wants to get American ingenuity behind the production of fertilizer, to cheapen it and improve it, he will have to support the committee bill, because that provides for extensive and elaborate experimentation and investigation.

Mr. SIMMONS. All of my inquiries are predicated upon the suggestion of the Senator from Nebraska that possibly fertilizer might be produced in this country for 5 cents a pound; but the farmer would get no particular benefit. I am assuming it can be produced at that price. I am assuming that the result of these operations at Muscle Shoals will be that it will be shown that it can be produced at that price, and I am arguing that if that be true that will either bring down the price of the foreign article to the level of the price at which it can be made in this country, or American capital will go into the business and supply the demand, thereby making it unnecessary for us to make these importations from abroad at these high prices.

Mr. HOWELL. Mr. President, if the Senator believes that the United States Government should go ahead with research work and develop a method for making nitrogen at half the

present cost, I agree with him; but what I object to is the turning over of this great plant to a lessee whose primary purpose will be profit and to make that profit out of the power; and that fertilizer shall be merely a secondary matter in the transaction.

Mr. SIMMONS. Mr. President, will the Senator yield to me again?

Mr. HOWELL. I yield.

Mr. SIMMONS. I am assuming that if the Government retains this plant and goes into this business itself it will demonstrate the possibility of making fertilizer at this lower price. I also assume that if it shall be leased and placed in the hands of private capital that private capital will demonstrate the same thing. I assume that if the Government retains it the Government will inaugurate research work and get the benefit of whatever may be discovered.

I am assuming that if private individuals shall take charge of this plant, with the obligation of making 40,000 tons annually for 50 years, the burden placed upon them will stimulate them, just as it would stimulate the Government, to inaugurate research work, with the view of ascertaining if they can not cheapen the manufacture of the product.

Mr. NORRIS. Mr. President—

Mr. HOWELL. I yield.

Mr. NORRIS. I only interrupt my colleague because of the assumption in the question of the Senator from North Carolina, which is a natural one. I think he said that no matter who did this, it would be to their interest to make it cheaper.

Mr. SIMMONS. To inaugurate research work.

Mr. NORRIS. I agree with that proposition. If the Government does it, however, as would happen under the committee bill, when they did discover an improvement, when they did reduce the cost of the fertilizer ingredients, the public generally would get the benefit of it. The private party who would make a bid under present conditions as a business proposition—and I am not criticizing him at all, for it would be just as a business proposition—if he could not make the fertilizer except at a loss, which I think is the fact, he would have to recoup himself out of what he made out of the power, and he would bid with the idea of losing some on the fertilizer he made and making up the loss on the profits from the power and enough other profits so that out of the whole deal he could make a profit.

Suppose he assumed that, and got the property; it would be to his interest to make the fertilizer just as cheaply as possible. Every time he reduced the cost of the manufacture of fertilizer ingredients he would be saving himself some money. But he would patent every discovery. That would be the first thing he would do, and of course the Government would not do that. Nobody else could use his process, and since after he has used the plant to its full capacity there would still be a deficiency in fertilizer, he would sell it at the same old price, the farmer getting no benefit, but he getting the benefit. That would be the natural result of that kind of a proceeding, even if he did reduce it.

Mr. SIMMONS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield further to the Senator from North Carolina?

Mr. HOWELL. I yield.

Mr. SIMMONS. The Senator is simply assuming that the great business concerns of the country do not consider the interests of their customers at all.

Mr. NORRIS. They consider themselves first.

Mr. SIMMONS. That their prices are not regulated by costs nor by the law of supply and demand.

Mr. NORRIS. Yes; I am considering that they are.

Mr. SIMMONS. I will say to the Senator that, so far as that is concerned, I am afraid there is a great deal of truth in the statement which the Senator makes. It was not through the attitude of exploitation which prevails in this country to a very alarming extent that I was addressing myself. I was simply accepting the statements of the Senator from Nebraska as to cost, and then I was assuming that the consumer would get at least some benefit from a reduction in the cost.

Mr. HOWELL. Mr. President, I have set out to demonstrate that the Muscle Shoals plants, under a lessee required to make but 40,000 tons of fixed nitrogen, would, at the maximum, on the basis of 40,000 tons of fixed nitrogen, with an assumption of a saving of one-half, as I have outlined heretofore, benefit the average farm operator in this country only to the extent of 60 cents a year.

I acknowledge that it is important to make any saving that is possible, but the question is, when we are proposing a saving, as to what that saving would cost. We are thinking about

fertilizer; the prospective lessees of this property are thinking about profit. They know that under present conditions, and under the terms of this substitute, profits from the manufacture of fixed nitrogen are very questionable. They know the situation; they are experts; and they do know that as a power proposition the possibilities of Muscle Shoals, under the conditions which exist in Alabama, Georgia, Tennessee, and Mississippi, are tremendous. Therefore, I propose now to show what this saving would cost the country if accomplished through leasing Muscle Shoals, as proposed.

In order that we may prevail upon some one to take over this property and produce 40,000 tons of fixed nitrogen a year, and assure the saving of about 60 cents, on an average, to the 6,500,000 farm operators of this country, it is to be provided that the lessee shall receive nitrate plant No. 1 at Muscle Shoals, which, exclusive of the power plant, has cost the United States Government \$10,000,000. For this property the lessee is to pay not one dollar of interest in return thereon.

Mr. UNDERWOOD. Mr. President, will the Senator allow me to interrupt him just there?

Mr. HOWELL. Certainly.

Mr. UNDERWOOD. At the minimum price at which the plant can be leased, the substitute does not say that any return shall be made, but the President in making the contract may charge any reasonable amount he thinks he can get a lessee to pay.

Mr. HOWELL. Mr. President, if there is a determination to lease this property on the part not only of Congress, but on the part of the administration, which I fear exists, and we announce to the public and to prospective bidders, as is proposed, that the President is authorized to accept 4 per cent, does the Senator think they will pay more than 4 per cent? It reminds me of the story of General Grant as a boy, who was told by his father to sell a horse to his neighbor, to get \$50 for it if he could, but to take \$25 if he could not get more. Grant rode over and told the neighbor what his father had said, and of course got \$25 for the horse.

Mr. UNDERWOOD. Mr. President, I do not like to interrupt the Senator's speech, but I want the matter made clear. If the President does not get a bid which he thinks is fair and just, he does not have to lease to anybody. He has a Government corporation organized, to which he can turn the project over on the 1st day of September, and I assume that the President of the United States is not going to make a lease that will be disadvantageous to the Government of the United States.

Mr. HOWELL. If the President becomes familiar with this debate, and this leasing provision shall be passed by Congress, he will understand that Congress is determined that this plant shall be leased at 4 per cent, if he can not get more than 4 per cent on the property, as stipulated in the bill. It is a matter of experience, too, that when bidders know the minimum that will be accepted—and that is what they are always trying to find out—that is what they will bid; and especially is that true in connection with public affairs. Therefore, I think I am justified in assuming that this property would be leased for 4 per cent, but, understand, not including \$10,000,000 on account of this nitrate plant No. 1. No interest whatever is to be paid on that.

Again, Mr. President, we will turn over to the lessee a model town that has been developed in connection with nitrate plant No. 1 that has cost \$1,800,000, but under the substitute of the Senator from Alabama not one dollar will be paid in interest upon this investment. The lessee will get this property free of charge.

Nitrate plant No. 2 will be turned over to the lessee free of charge also, and that plant, exclusive of the steam plant, has cost \$56,000,000.

Again, Mr. President, there is a 5,000 horsepower modern steam electric plant at nitrate plant No. 1 which is to be turned over to the lessee. The lessee is to have it free of charge. That modern plant, in splendid condition, is to be turned over to the lessee without requiring him to provide any depreciation reserve whatever for its ultimate replacement.

The lessee will have turned over to him under this leasing proposal the steam electric plant at nitrate plant No. 2 that has a capacity now of 80,000 horsepower and that has cost the Government \$12,000,000. Not only is it equipped with electric generators for the production of 80,000 horsepower, but it is equipped with boiler capacity for another 30,000 horsepower. Under the terms of the proposed substitute the lessee will not pay one dollar for the use of that plant, although the Government to-day is receiving a rental of \$200,000 a year for its

use. Neither would he be required to provide a depreciation reserve.

There is to be turned over to the lessee Dam No. 2, capable of affording—

Mr. NORRIS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to his colleague?

Mr. HOWELL. I do.

Mr. NORRIS. I hope the Senator will not forget, if he has left the nitrate plants and is going to Dam No. 2, that at nitrate plant No. 2 there is another town, with macadamized streets and in the neighborhood of 200 modern houses that are to be turned over.

Mr. HOWELL. I appreciate my colleague's suggestion. I had left out the second model town that has been constructed by the United States Government at plant No. 2 that is to be turned over to the lessee without one dollar of return during 50 years for the use of those modern houses and buildings.

Mr. NORRIS. If the Senator will permit me to interrupt him again—

Mr. HOWELL. Certainly.

Mr. NORRIS. At Dam No. 2 there are 180 temporary houses, 15 mess halls, 32 railroad engines—although some of those may have been moved to other parts—79 box cars, 200 narrow-gauge cars, 30 miles of railroad, a waterworks system and electric-light system. There is also a waterworks system and an electric-light system at the model town at nitrate plant No. 1. The figures I gave were at Dam No. 2, but the Senator has not yet come to that.

Mr. HOWELL. I am coming to that now.

Mr. NORRIS. There are in that model town 196 model houses and there are 14 at the stone quarry. I do not think the latter are modern houses, however.

Mr. HOWELL. In addition under the leasing proposal of the Senator from Alabama there is to be turned over to the lessee Wilson Dam, known as Dam No. 2, completed so far as eight power units are concerned for the creation of 260,000 horsepower, and a switchboard in addition that has cost \$1,000,000, the total property having cost about \$45,000,000, and upon this property alone is the lessee expected to pay an interest return. The minimum interest return fixed in the leasing proposal is 4 per cent per annum. I have not enumerated all the property. There are 4,200 acres of land. All of this property that has cost the Government between \$140,000,000 and \$150,000,000 is to be turned over to a lessee at an annual minimum cost, for interest, of about \$1,800,000.

Mr. SIMMONS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. HOWELL. I yield.

Mr. SIMMONS. May I ask the Senator what he thinks it is worth? He is a business man.

Mr. HOWELL. I will now proceed to discuss that feature, and I will answer the Senator's question in so doing.

Mr. SIMMONS. The reason why I desired to get the Senator's answer to that question at this time was because I wished to ask him a further question.

Mr. HOWELL. If the Senator will defer his question until after I have gone into the value of the property, I shall be very glad to answer his questions if possible.

Mr. REED of Missouri. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Missouri?

Mr. HOWELL. I yield.

Mr. REED of Missouri. I am interested in what the Senator has been saying, but is not this the situation, that the bill which the Senator from Alabama has introduced authorizes the President to lease the property and leaves within the discretion of the President what he shall charge and simply provides that it shall not go below a certain point? Is not that the situation?

Mr. HOWELL. There is still a painful impression left upon my mind respecting a similar loose amendment concerning the naval oil reserves which was enacted into law by Congress and because of which a Secretary of the Navy was asked to resign.

Mr. REED of Missouri. I do not see the connection. The President had no authority under the naval oil leasing act. I am not trying to get into an argument with the Senator; I am trying to get the case stated as the truth may be for my benefit and the benefit of everyone else. Suppose it were proposed that the President should lease the property upon the most advantageous terms attainable and not a word were said

as to a minimum; would the Senator then think that the bill was necessarily fraught with either danger or fraud?

Mr. HOWELL. I should feel that such a bill were much preferable to this one, but I do not think that Congress should shirk its responsibilities in reference to the matter.

Mr. REED of Missouri. Can Congress at this time determine what kind of lease can be made? Can the Senator determine or can any of us determine what may be made possible when we sit down across the table to negotiate with men who want the property? Are we not forced to the position to say we will take the property and keep it ourselves, or that we will empower somebody to make a contract for us? Is not that about the situation in which we find ourselves?

Mr. HOWELL. This is a business proposition. Congress is but a board of directors. A board of directors for a business concern would direct its general manager to proceed with the initial steps to lease the property and report to the board of directors the best proposition he had obtained. If that were provided for, then Congress might pass upon the matter, but unless that is done I feel that Congress is shirking a part of its responsibilities.

Mr. REED of Missouri. Then the Senator would be agreeable to the pending bill or some bill of like character. I am not committed to this bill. I do not know yet whether I am going to vote for it or not. Does the Senator think that the right thing to do is when the contract is made to have it submitted to Congress for ratification?

Mr. HOWELL. Yes, sir; I think that would be the proper course to pursue.

Mr. REED of Missouri. Has the Senator prepared any amendment to that effect?

Mr. HOWELL. I have not.

Mr. SMITH. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from South Carolina?

Mr. HOWELL. I yield.

Mr. SMITH. In pursuance of that suggestion the Senator means that if we are to lease, it would be the proper thing for us to have the specific terms of the lease submitted to us after the parties had gotten together and decided. But I would like to ask the Senator if he thinks that at this stage of the development at Muscle Shoals we ought to try to negotiate a lease until such time as we can develop the property and know just what are the possibilities along the line to which the Congress has dedicated it?

Mr. HOWELL. I feel that we ought to look at this matter exactly as if it were personal property, the Senator's property or my property. The plant has not as yet been completed. We do not know what can be done with it. We should not proceed to lease this property upon terms that might be far from profitable and uncertain as to results until we have had an opportunity to observe the property in operation and to know exactly what we have and may expect. Therefore, I feel that we are putting the cart before the horse in leasing this property now for 50 years. It may be that it would be well to lease the property later, but the question now is as to what is the best course to pursue, and I am simply expressing what I, as a general manager, would recommend to my board of directors.

I have outlined the character of the property it is proposed to turn over to the lessee for \$1,800,000 a year; but we are not to receive that amount net, Mr. President, because we are now receiving \$200,000 a year from the 80,000 horsepower steam electric plant at nitrate plant No. 2, while under the provisions of this proposed lease we are to receive nothing in return for this plant. Therefore, we are simply adding to the income of the Government from this property \$1,600,000 a year, or about 3½ per cent upon the \$45,000,000. In other words, understand me, we are now getting \$200,000 a year for just one steam plant, which is to be thrown in and turned over to the lessee under Senator Underwood's substitute without providing that he shall pay a dollar for the use of that plant.

Furthermore, Mr. President, there is no provision in this lease as proposed in the substitute of the Senator from Alabama for maintaining depreciation reserves of the property. Each one of us knows that if we purchase an automobile and keep it in perfect repair year after year, at the end of about six years it is junk. What else do we have to do? If the automobile costs \$1,200, we ought to put into a sinking fund \$200 every year, so that at the end of the six years, when our automobile has become junk, we will have \$1,200 with which to purchase another.

Such a fund is provided for by every public utility which is operated in this country; every public-utility commission in the

country insists that the public shall contribute such depreciation funds; but no provision is made in this leasing substitute of the Senator from Alabama for setting up any such sinking-fund reserves. All the lessee needs to do is to make the 40,000 tons of fixed nitrogen. But, remember, he does not have to make any nitrogen at all for two years. He has to make 10,000 tons the third year, 20,000 tons the fourth year, 30,000 tons the fifth year, and not until the sixth year and annually thereafter is he required to make 40,000 tons of nitrogen. Under this leasing proposition he is required to produce the sixth year and thereafter 40,000 tons of fixed nitrogen and to pay \$1,800,000 to the Government, or what is equivalent to \$1,600,000 a year, as the Government will lose \$200,000 on the steam plant, which is now leased on that basis. The lessee is also required to maintain the property in repair, but, as I have pointed out, a property may be maintained in repair as carefully as possible, yet at the end of a certain period each and every machine becomes junk, and these plants will prove no exception to the rule.

From a power standpoint, what are the potential possibilities of the property which is to be turned over to the lessee? It is possible for the plant at Muscle Shoals, Dam No. 2, in connection with the steam plant at nitrate plant No. 2, to develop 210,000 primary horsepower—that is, constant horsepower—year in and year out. However, let us call it 200,000 horsepower; let us make it even. What would it cost to develop that 200,000 horsepower by steam? It is generally recognized that in the best of plants, such as the plant here in Washington, for instance, it costs about nine-tenths of a cent per kilowatt-hour to produce electrical energy. Under very favorable conditions it might drop down to seventy-five one-hundredths of a cent. I speak of producing electrical energy by steam. What does nine-tenths of a cent mean per horsepower year? It means \$59. What does three-fourths of a cent per kilowatt-hour mean per horsepower year? It means \$49. Suppose we take the mean of these figures, or, say, \$55 as the cost of production of electrical energy by steam; that would be about eight-tenths of a cent per kilowatt-hour. Then we will turn over to this lessee 200,000 horsepower which would cost to produce on a steam plant basis \$11,000,000 a year.

But what would it cost the lessee so far as operation is concerned to maintain this power? I have obtained some figures respecting this matter from sources familiar with the situation, and it appears that to develop 200,000 primary horsepower, outside of any interest charges, would cost about \$6 per horsepower per year. Add interest due to an assumed interest charge of \$1,800,000 per annum and it will be found that the cost to the lessee will be \$15 per horsepower, or \$3,000,000 a year, while on a steam basis equivalent power would cost \$11,000,000 a year. So the lessee would be getting for \$3,000,000 200,000 primary horsepower that would cost to produce by steam \$11,000,000.

It has been suggested here by the senior Senator from Alabama that the Alabama Power Co. or the companies operating in his State are selling power for \$25 per horsepower per annum. I have here on my desk the National Electric Light Association rate book for 1924, and I find that in Bessemer and Birmingham the rate for large power, alternating current, is as follows: \$1 per horsepower for demand, plus an energy charge of three-quarters of a cent per kilowatt hour. Suppose that a power user did not have to pay any demand charge whatever but had to pay three-quarters of a cent a kilowatt hour; he would be paying \$49 per horsepower per annum.

Mr. UNDERWOOD. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Alabama?

Mr. HOWELL. I do.

Mr. UNDERWOOD. Of course, the Senator knows that, in the first place, the Alabama Power Co. does not directly sell to the people of Birmingham. I do not know how it is in the case of Bessemer, but I do not think it is true of Bessemer. Birmingham happens to be my home. The old company was known as the Birmingham Railway, Light & Power Co., and on its reorganization, I think, it became known as the Birmingham Electric Co. That company buys its power wholesale from the Alabama Power Co. and sells to the people of Birmingham.

The contract that was made with them was made by the city commission of Birmingham. I do not know as to the terms of the contract; I had nothing to do with it, but I do know what I state to be the case. In some instances where a small amount of power is used for special demand the rates may go very high, but I state—and I make the statement on the authority of a gentleman of whom I asked the question this morning and who is very familiar with the subject of power—that \$25 a horsepower would be the average

price for power that is sold there. Of course, if current is desired to operate a small machine involving only a slight consumption of power, then a fairly high price is paid, but when the power is purchased in large volume it is a very different question.

Mr. HOWELL. Mr. President, as I understand, they have a public-service commission in the State of Alabama, and its rulings would take precedence of any contract made by the city with the electric light and power company. In other words, the rates prevailing in Birmingham, Ala., I assume, are those determined by the Public Service Commission of Alabama. I should like to ask the Senator if they have a public-service commission in Alabama?

Mr. UNDERWOOD. Oh, yes; we have a public-service commission with power to regulate the rates; and I have not heard, although I am not at home a great deal, of any severe criticism of their action in regard to the regulation of rates. I know that commission has been created under the power of the legislature and has the authority, as I understand, to fix local rates on the railroads, the rates for power, and other matters of that kind.

Mr. HOWELL. Mr. President, what I wanted to make clear was that any contract made by a council with a power company is superseded by the rate schedules provided by a State public service commission or any public regulatory body. I have reason to know this, as a contract that I entered into on behalf of the Metropolitan utilities district of Omaha for power to operate ice plants was voided by the act of the city council, which in our State has the power of regulation. What I want to make clear is that if anybody is getting power in Birmingham, Ala., or in Bessemer, for \$25 a horsepower, the power company is violating the rulings of the public service commission and the customer is the beneficiary of special privilege.

I have here the rate book I have referred to, and I am quoting "Large power, alternating current":

Demand charge: \$1 per horsepower, plus an energy charge of seventy-five one-hundredths of a cent per kilowatt hour.
Large power off peak—

That is the cheapest kind of power—

Rate: Straight line meter, three fourths of a cent per kilowatt hour.

Or \$49 per horsepower per annum.

But, to go back, I have shown here that under the minimum terms of the substitute of the Senator from Alabama it would cost the lessee about \$15 per horsepower 24 hours a day per year for 200,000 primary horsepower, and that in Birmingham, Ala., and Bessemer those who use such power must pay from \$49 to \$59 per horsepower per year in large units; and that at \$49 per horsepower this power, if all sold, would bring in \$9,800,000, and at \$55 per horsepower, \$10,100,000. The lessee, however, would have to pay therefor but \$3,000,000 per annum.

That, however, is not all. In my opinion the Alabama Power Co. or a subsidiary or an interest closely connected therewith will secure this water power; and I want to say that I have had no thought that the senior Senator from Alabama had any idea when drawing this bill that that company would secure this power. I will now state the reasons why I believe the Alabama Power Co. or one of its subsidiaries will prove the ultimate lessee of this power.

The General Electric Co. has one great subsidiary known as the Electric Bond & Share Co. That Electric Bond & Share Co. the last time I had data afforded me had 13 subsidiaries. One of those subsidiaries, if I remember rightly, is the American Light & Power Co., which, in turn, has 192 subsidiaries. One of these 192 subsidiaries is the Nebraska Power Co., which serves the city of Omaha. Besides this American Light & Power Co., which two years ago had 192 subsidiaries, there are 12 other subsidiaries of the Electric Bond & Share Co., and one of those subsidiaries is the Alabama Power Co. In other words, the electric light and power business in this country is largely tied up and in the hands of one great interest. It practically controls the business.

The Alabama Power Co., which is really the General Electric Co., first located the site for building a dam where the Wilson Dam, or Dam No. 2, is now constructed. It acquired the site and lands adjacent thereto. As the construction of what is now known as Dam No. 2 involved the expenditure of a very large sum of money, the company said to the United States Government in 1916:

If you will build this dam, we will present you with this site and the land adjacent thereto for the sum of \$1.

The United States Government accepted this offer and proceeded to build this dam, and in addition, as I have pointed out, installed 85,000 steam electric horsepower. Since that time the Alabama Power Co. has leased from the Government the steam electric power plant at nitrate plant No. 2, developing 80,000 horsepower, with boiler and power-house capacity for 120,000 horsepower; and that company is now paying for the use of that plant some \$200,000 a year. It now has a transmission line leading from that plant to aid in supplying all the territory covered by the transmission lines of the Alabama Power Co.

In the meantime the Alabama Power Co. has been developing water power on the Tallapoosa River. This water power will be completed within one year of the time of the completion of this lease if it is made; that is, in 1926. This power will develop 85,000 primary horsepower; so there will be 85,000 primary horsepower on the Tallapoosa River and 200,000 primary horsepower available at Muscle Shoals, including the steam plant at nitrate plant No. 2.

Now, mark you, the vice president of the Alabama Power Co. has stated that if the water power and steam plants at Muscle Shoals were operated in conjunction with and supplemental to the power development on the Tallapoosa River the primary horsepower available would not be merely the sum of the primary power at Muscle Shoals and the Tallapoosa River, which would be 285,000 horsepower, but that amount plus 75 per cent of the 285,000 horsepower. What does this amount to? Four hundred and ninety-nine thousand horsepower. In other words, the Alabama Power Co. is developing the Tallapoosa watershed for the 85,000 primary horsepower that will be available when the power is completed; and now if it secures the Muscle Shoals plants, it will secure the equivalent of 414,000 horsepower additional, at what cost? At a cost of approximately \$3,000,000 a year—\$1,800,000 paid the Government at 4 per cent interest and \$6 per horsepower developed.

What will that mean per horsepower per annum? About \$7.50 per horsepower. I wish to say here that I have never visited Muscle Shoals or the watershed of the Tallapoosa River. I am merely making these deductions from the testimony afforded the Agricultural Committee.

Mr. NORRIS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to his colleague?

Mr. HOWELL. I do.

Mr. NORRIS. Perhaps the Senator is going to elaborate the matter he has just mentioned, but I thought he was getting from it. I think the Senator ought to explain to the Senate just how the Alabama Power Co. would get this additional horsepower. The Senator has been talking about primary power all the time, and Senators may not understand how they can get, apparently out of the air, so much additional horsepower by the combination of these two systems.

Mr. HOWELL. Mr. President, we have on the Tennessee watershed 200,000 primary horsepower. We have on the Tallapoosa watershed 85,000 primary horsepower. The stages of water prevailing in these two watersheds are not identical at the same time, so that it is possible to combine considerable secondary power available in each watershed so as to become virtually primary power and thus increase the total of the primary power of the two developments. In other words, tying these two powers together will mean that the Alabama Power Co. itself, or by an arrangement through a subsidiary or another interest, will be able to add to its power resources 414,000 primary horsepower by the acquisition of Muscle Shoals, not merely 200,000 primary horsepower.

What would it cost to develop that power by steam? Suppose we consider 8 mills per kilowatt hour as the cost, or about \$55 per horsepower per annum. I do not mean to say that they could sell all that power at once—of course, a market therefor would have to be developed—but if they could do so at \$55 per horsepower they would have an income from that 414,000 horsepower of more than \$22,000,000 a year. I am going to these limits so that Senators may understand the possibilities of the situation that exists at Muscle Shoals, in that region so favorable to the development of water power.

Mr. President, the possibilities are so tremendous that if this Congress deeds away this great power, the greatest one outside of Niagara Falls east of the Mississippi River, for a pittance, that action, I believe, will some day be called the crime of the Sixty-eighth Congress.

We have been considering what we could do for the farmer by leasing this great power, and I have shown that if this 40,000 tons of fixed nitrogen is produced at 6 cents a pound,

the probable saving, on the basis of ammonium sulphate, would be but \$4,000,000 a year to the farmers of this country, so far as this 40,000 tons of nitrogen is concerned, or about 6 cents per annum per farm operator in the United States.

It might be urged that, in addition, with this great power in the hands of a strong power company, the citizens of Alabama, Georgia, Mississippi, and Tennessee might secure cheaper electrical energy. Let us consider what the results of the development of water power under private ownership have been for the people of this country thus far. That I may make it clear, I am going to point out what has been accomplished for some communities in the United States in the reduction of the cost of electrical energy through public competition, or threatened public competition.

Some 10 years ago Mr. Baker, afterwards Secretary of War, was the mayor of Cleveland, and he developed a publicly owned electric light plant, which now supplies about one-third of the electric energy used in Cleveland, and the maximum rate from that time down to the present has been 3 cents a kilowatt hour, and the enterprise has been a success, not only in the matter of service but financially also.

At the time this plant was established, another subsidiary of the General Electric was supplying the city of Cleveland with light and power. They were charging the people at that time, as I remember, about 12 cents a kilowatt hour. Subsequently the Public Service Commission of Ohio fixed the maximum rate at 10 cents a kilowatt hour, but consumers on the lines of the private company naturally resented the rate charged and appealed to the court, upon the ground that the rate fixed by the Public Service Commission of Ohio was unreasonable. Notwithstanding the great difference in the rates charged by the two plants the courts upheld the 10-cent rate, but by that time the financial success of the publicly owned plant had become so patent that the private company reduced its rate voluntarily to 5 cents a kilowatt hour, and that has since been the rate in the city of Cleveland, notwithstanding, mind you, that the energy is produced by steam, and it costs about nine-tenths of a cent a kilowatt hour to produce it, as I found when in Cleveland last June.

Let us determine what 40 kilowatts a month costs in the city of Cleveland. I am using 40 kilowatts as an example, because I noted that for the months of August and September last summer our apartment used about 51 kilowatts a month. However, I shall adopt as my standard 40 kilowatts per month. The publicly owned plant in Cleveland supplies 40 kilowatts a month to small consumers for \$1.20. The private company supplies 40 kilowatts a month for \$2. It might be suggested there was some peculiar reason why this development has taken place in Cleveland. The only peculiarity is public competition and the threatened extension of the publicly owned plant.

I am asked how large a house 40 kilowatts would light. Our apartment has seven rooms, and we used about 51 kilowatts per month during the summer months and all for lighting.

I am also asked by the Senator from Iowa [Mr. BROOKHART] as to what the rate is here in Washington. It is outrageous. We pay 10 cents a kilowatt hour, with no discount. Forty kilowatts in Cleveland cost \$1.20, and we pay \$4 for that amount of electrical energy here in Washington.

Congress ought to be ashamed of itself. For what the private company charges \$2 in Cleveland, in Washington we pay \$4, a hundred per cent more. Let me again call attention to the fact that there is nothing peculiar about the situation in Cleveland except public competition, and wherever public competition is seriously threatened similar results follow.

To illustrate this fact let me refer to my own State. In the city of Lincoln, which has a population of about 58,000 people, there is a private lighting plant and the rate for 40 kilowatts a month, net bill, is \$2.10. Why do they get that rate from a private company? Because there is a public plant that lights part of the city.

Mr. BALL. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Delaware?

Mr. HOWELL. I yield.

Mr. BALL. In order that the Senator may be perfectly fair with the Public Utilities Commission of Washington, I think it is proper for him to state that the public utilities fixed a rate of 8 cents and not 10 cents, but the user does pay 10 cents a kilowatt. The 2 cents now is impounded until the courts shall render a decision as to the valuation of the properties. The public utilities commission has reduced the rate; they did so probably two years ago.

Mr. HOWELL. Mr. President, I was not familiar with that fact, and I thank the Senator from Delaware for giving me the

information. I do want to say this, however, that even 8 cents is an outrageous price in the city of Washington, because, as I pointed out, in Lincoln, Nebr., a city of 58,000 inhabitants, a private company supplies 40 kilowatts for \$2.10, and the electrical energy used in Lincoln is produced by steam from slack that comes from the Kansas district and costs about \$5 a ton.

If you will compare the rate, for instance, in Lincoln, Nebr., with the rate here, you will find that we pay 90 per cent more in Washington for 40 kilowatt hours of electricity, in a city of 480,000 inhabitants, than the people in the city of Lincoln pay, with only 58,000 inhabitants. Why is this? It is because in Lincoln they have a publicly owned plant which supplies a part of the city, just as they have in Cleveland.

Mr. President, with the example of Cleveland and with the example of Lincoln, we proceeded to secure a reduction of rates in the city of Omaha, a city of 200,000 inhabitants.

In 1912 we took over the water plant in Omaha and immediately discussed the question of combining an electric plant therewith. The rate of the private lighting company immediately dropped from 14 cents a kilowatt hour to 12 cents. That was in the piping times of peace, in 1912. We put in a small plant in connection with the water plant in Omaha and found that we could place the energy at that time, 1913, upon the switchboard at three-quarters of a cent per kilowatt hour. The fact was announced. We further announced that we would go to the legislature and ask for authority to extend the plant into the city, and within a month another reduction of 1 cent per kilowatt hour was announced, bringing the rate down to 11 cents per kilowatt hour. Notwithstanding we went to the legislature and merely asked authority for the people to vote upon the question of issuing bonds to build a competing light plant. The bill passed both houses, but the governor of the State saw fit to veto the bill; but they knew that they had had a fight, and almost immediately the rate came down to 8½ cents per kilowatt hour. Two years later they thought we were preparing to go to the legislature and again ask for such authority. The day before the legislature convened the rate again came down, this time to 6 cents a kilowatt hour. That was January 1, 1917, right in the midst of war; and since then the rate has been further reduced to 5½ cents per kilowatt hour, not because of public competition but because of threatened competition.

Mr. BALL. Mr. President—

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the Senator from Nebraska yield to the Senator from Delaware?

Mr. HOWELL. I yield.

Mr. BALL. I would like to inquire of the Senator whether the rates given are for the small users for the purpose of residence lighting, or are they for large industrial users where they use large quantities?

Mr. HOWELL. I am making a comparison on the basis of 40 kilowatt hours per month and will take up the large power users later.

Here we have three cities with either public competition or threatened public competition, with the result that 40 kilowatt hours from coal cost as follows: In Cleveland, \$1.20 from the public plant, \$2 from the privately owned plant. In the city of Omaha 40 kilowatt hours cost \$2.20; in Lincoln, Nebr., 40 kilowatt hours cost \$2.10, both cities being supplied by privately owned plants.

In each case the power is made by steam. These rates are compensatory, and to show what it means let us consider, for instance, the city of Cleveland. It has at least 160,000 consumers. At 10 cents per kilowatt in Cleveland, 40 kilowatt hours used to cost \$4 and now cost \$2. Suppose consumers do not save \$2 in Cleveland, but only \$1. This saving would amount to \$160,000 a month. Multiply that by 12 and we have nearly \$2,000,000. Do Senators see what public competition has done for the people of Cleveland? Do Senators see what public competition could do for the people of the country? And yet we are talking about trying to save the farmers 60 cents a year on fertilizer. What might be saved on light and power?

What are the rates afforded electric-energy users in those communities that are supplied by water power under private ownership? Let us consider Niagara Falls, N. Y. There, in the shadow of the great cataract, is probably the cheapest hydroelectric energy in the world, certainly in this country. They have a private plant there, and 40 kilowatt hours per month in the city of Niagara Falls costs \$2.26, or 88 per cent more than the same amount costs in Cleveland from the publicly owned plant.

Consider the city of Burlington, Iowa, supplied from the Keokuk Dam. The rate for 40 kilowatts per month is \$3.24.

These are all net rates. That is 168 per cent more than from the Cleveland public plant, 62 per cent more than from the Cleveland private plant, and 54 per cent more than from the Lincoln private plant.

Mr. BROOKHART. Mr. President, I would like to ask the Senator if he is certain that the power in Burlington is furnished by the Keokuk water power, or is it steam power?

Mr. HOWELL. It is water power.

Mr. BROOKHART. I presume it is. Does the Senator's data show whether it is from the Keokuk Dam or not?

Mr. HOWELL. It states that the power is purchased. In all these municipal plants where they are purchasing hydroelectric energy they are maintaining the old steam plants as auxiliaries.

Now let us go to Quincy, Ill., supplied by water power privately owned. There the rate is \$3.05, 150 per cent more than the Cleveland public plant, 53 per cent more than the Cleveland private plant, and 45 per cent more than the Lincoln private plant.

How about the State of Alabama, where water power has been developed to a wonderful degree and where the possibilities for water power are extremely favorable? What do we find in the cities of Bessemer, Birmingham, and Montgomery, Ala.? We find that private plants supply energy from water power at a cost of \$3.06 for 40 kilowatt hours. How does this compare? It is 155 per cent more than the same would cost from the Cleveland public plant, 53 per cent more than the same energy costs from the Cleveland private plant, and 45 per cent more than the same would cost from the Lincoln private plant. That is the State of Alabama.

Let us consider now the State of Georgia. Atlanta has a population of 222,000. The energy is secured from a private plant supplied by water power. The net bill for 40 kilowatt hours is \$3.24 or 166 per cent more than from the Cleveland public plant, 62 per cent more than from the Cleveland private plant, and 54 per cent more than from the Lincoln private plant.

In Augusta, Ga., a private plant obtains energy from water power. There the rate is \$3.60 net for 40 kilowatt hours. That is 200 per cent more than from the Cleveland public plant, 80 per cent more than from the Cleveland private plant, and 72 per cent more than from the Lincoln private plant.

They have no water power supplying Meridian and Jackson, Miss., but we find that in Meridian 40 kilowatts cost \$4.56, or 280 per cent more than from the Cleveland public plant, 128 per cent more than the Cleveland privately owned plant, and 112 per cent more than the privately owned plant in Lincoln.

In Jackson, Miss., we find that the bill for 40 kilowatt hours is 400 per cent more than from the Cleveland public plant, 200 per cent more than from the Cleveland private plant, and 186 per cent more than from the Lincoln private plant.

Mr. OVERMAN. Has the Senator the figures from North Carolina?

Mr. HOWELL. I regret to say that I have not made up the figures for North Carolina.

Mr. McKELLAR. Mr. President, I was out for a few minutes. Has the Senator the figures from Tennessee?

Mr. HOWELL. I have. In Nashville, Tenn., there is a private steam plant, and the rate is \$4.04 for 40 kilowatt hours, 236 per cent more than from the Cleveland publicly owned plant, 102 per cent more than from the Cleveland privately owned plant, and 90 per cent more than from the Lincoln privately owned plant.

In Knoxville, Tenn., with a population of 89,000 and a privately owned water-power plant, the rate is \$3.96 per 40 kilowatt hours, or 230 per cent more than from the Cleveland public plant, 98 per cent more than from the Cleveland private plant, and 89 per cent more than from the Lincoln private plant.

Mr. President, this gives a very fair view of the electric light and power situation in the United States to-day. The people of the country through the power of habit are paying extravagant prices wherever they have not had the energy to rise up and demand reasonable rates, and then, if they did not get them, to take the bull by the horns and build their own plant.

Mr. McKELLAR. Mr. President—

Mr. HOWELL. I yield to the Senator from Tennessee.

Mr. McKELLAR. If the Government were to operate this plant and sell the surplus power, Tennessee being in close proximity to the plant, does the Senator know of any reason why municipalities, or even private concerns, might not build transmission lines and sell the power or current in the cities of Knoxville, Nashville, Chattanooga, and so forth, at a much lower price than is now being paid in those cities? What is the Senator's view about that subject?

Mr. HOWELL. There has arisen a method of manipulation of the electric light and power situation about as follows: The Alabama Power Co. supplies wholesale power and is a subsidiary of the General Electric Co. The General Electric Co. may have in the State of Alabama another subsidiary that owns the distribution lines. The General Electric Co., through its Alabama Power Co. subsidiaries, probably sells power wholesale and makes a profit from its Birmingham subsidiary, and then the Birmingham subsidiary sells it for enough more to enable it to make another handsome profit.

Do Senators see how they milk the consumers? The people of this country will obtain no benefit from hydroelectric power in private hands. Why? Suppose it costs, as it does, about nine-tenths of a cent per kilowatt hour to make electrical energy by steam and that a hydroelectric plant can produce it for four-tenths of a cent. The difference is five-tenths of a cent. Suppose there is given to a community the advantage of that whole five-tenths of a cent—as, for instance, Washington, when hydroelectric power is developed here—what is the result? If the electric light and power company has its way, the people will get the service for 9.6 cents instead of 10 cents.

The determining factor is not the cost of the primary power; it is the cost of distribution. That is where these companies secure their exorbitant profits. The only way they can be regulated is by public competition or the threat of public competition. That is why it seems to me it would be a crime for Congress to alienate the great water-power plant at Muscle Shoals, which has possibilities, through its potentialities of various kinds, of reducing electric-light rates throughout the contiguous States and ultimately of affecting electric-light rates throughout the Nation.

Mr. BALL. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Delaware?

Mr. HOWELL. Yes.

Mr. BALL. Mr. President, the figures given are most interesting, but it would be of great service if we could only have in connection with those figures the amount of taxes which are paid by the privately owned corporations into the State or municipal treasury. Of course publicly owned corporations pay no taxes.

In order to get at the real cost of distribution it would be necessary to add to all other expenses the amount of taxes which are paid; then the difference between that sum and the expenses of the publicly owned utilities would give us the exact condition.

Mr. HOWELL. Mr. President, as Senators will note, I have only quoted in this comparison figures relative to one publicly owned plant, but have made a comparison of the Cleveland privately owned plants, which pays taxes, with the Lincoln privately owned plant, which also pays taxes.

I wish to say, further, that the Cleveland publicly owned plant sets aside every year and places in the hands of the treasurer as a sinking fund an amount equal to the taxes it would pay if privately owned.

Mr. BALL. Mr. President, the point at issue is this: Each State or each municipality has its own method of taxation. What Cleveland, Ohio, may tax its public utilities and what some other city may tax its public utilities may be very different propositions. I should like, if possible, to get the actual figures. Some cities tax their public utilities very severely, while others impose comparatively light taxation. Not only does the taxation on electric lights, but on railways, differ in each city. If we could get those figures, they would probably be of great benefit.

If the Senator will permit me, I will say that in my own city of Wilmington, Del., the charge is 10 cents per kilowatt for such distribution as that to which the Senator is referring, and yet I know that the company will supply electric power for other purposes where a large amount is used as low as three-fourths of a cent per kilowatt.

Mr. BROOKHART. Is not that to subsidiary companies or to interlocking directorate companies, which they are favoring?

Mr. BALL. I think not.

Mr. BROOKHART. And that amounts to a discrimination against the public, and a very severe one.

Mr. BALL. I have never made a careful investigation as to the cost of distribution, but rates there, I think, are no greater than those charged in other cities of like size.

Mr. HOWELL. Mr. President, I am very much pleased that the Senator from Delaware should have brought up this matter. I have quoted figures relative to the city of Omaha. I have here the rate sheet which states that the demand charge there for the first 200 horsepower is \$1.10. Senators

will remember that in Birmingham it is \$1 for total demand, while in Omaha it is \$1.10 for the first 200 horsepower; 90 cents for the next 200 horsepower; 70 cents for the next 200 horsepower; 50 cents for the next 200 horsepower; and 30 cents for all additional horsepower.

As to the energy charge, for the first 10,000 kilowatts it is 1.4 cents; for the next, 15,000 kilowatts, it is nine-tenths of a cent—that is, it is, as I remember, about \$50 for the first 25 kilowatts. After that it is seven-tenths of a cent.

The rate for power in Omaha, where they are only charging the people of that city \$2.20 for 40 kilowatts a month, is as low as it is in Birmingham, where they have water power and are not compelled to develop power by steam.

What I want to make clear is this: It may be possible to save 6,500,000 farmers in the United States 60 cents a year on 40,000 tons of fixed nitrogen under the terms of the pending substitute, or because of it, but that will stop the opportunity of relieving this country, including the farmers, of hundreds of millions of dollars of excess charges for electrical energy.

We have in our hands this great power, a talisman that can make possible a reduction of rates over a large section of this country by actual competition, if necessary, and elsewhere by potential competition and example.

Mr. President, with these possibilities before us, I feel that if Congress alienates for 50 years this unfathomed mine of wealth at Muscle Shoals, this great source of possible relief to our people, the time will come when the act will be looked upon as the crime of the Sixty-eighth Congress.

The PRESIDING OFFICER. The question is on the amendment of the Senator from South Carolina [Mr. SMITH] to the amendment of the Senator from Alabama [Mr. UNDERWOOD]. The yeas and nays have been ordered, and the Secretary will call the roll.

Mr. NORRIS. Mr. President, I do not care to delay the vote on the amendment to the amendment. I should like to vote to-day; but there are a number of Senators who have gone away under the impression that there would not be any vote taken to-day. I should like to inquire of the Senator from South Carolina as to his view.

Mr. SMITH. Mr. President, of course I should like to expedite this matter just as much as possible. I do not want to delay it for any reason in the world except for proper discussion, but there are quite a number of Senators absent now who have gone away under the impression that a vote on this amendment would not be taken before Monday. So far as I am individually concerned, if it may be done without adding unnecessarily to the delay of this proposed legislation, I should prefer that the pending question go over until Monday because at that time we will have a better opportunity to secure an expression from all those who are interested in this subject. Had not the impression gone forth that a vote on this amendment would probably not be reached to-day I should welcome a vote at this time. Of course, however, I have no control over it; but I would prefer, under the circumstances, if possible to wait until Monday before taking a vote.

Mr. UNDERWOOD. Mr. President, of course I do not know who has given out any indication that at half past 3 in the afternoon we are not going to vote on the pending amendment. Such a suggestion certainly has not come from me, and I do not suppose it has come from the leader on the other side of the Senate; I am sure it has not.

This bill has now been before the Senate for 10 days. The pending amendment is only one of many amendments to the bill. It has been discussed fully by the Senator from South Carolina, and, if he desires to discuss it further, I have no objection in the world to his doing so. It has been discussed by the chairman of the committee; it has been discussed by myself. It has been here for two days; full opportunity to debate the amendment has been afforded, and, unless we intend to go on blocking legislative business, I think the vote should be taken.

I have no desire for the pending amendment not to be fully and completely discussed, but there is legislation of vast importance waiting to be brought before the Senate. There are Senators on the floor who have been trying for the last week to secure consideration of the veto message of the President on a bill providing increased compensation for the letter carriers of America, but they are unable to do so because of the bill which is now before the Senate. There is also an order providing for the consideration of a most important matter which has been pending for some time. If we shall continue for a few days longer merely dragging the time away, it means that there will be no legislation before the Christmas holidays except this bill.

I have not raised my voice against any debate. As long as any Senator wants to stay in his place and debate this bill

I have no objection. That is in accordance with the rules of the Senate, and he is entitled to do so; but when those who are not favorable to it want to ask for an adjournment at 3 o'clock simply because some Senator has gone away, while I do not know whether those who went away are favorable or unfavorable to the bill that I proposed, I do know that we will not complete this legislation unless we are willing to attend to the business of the public. Further than that, I know that we will not take up the bill on Monday, because on Monday we have a memorial service for the late President Wilson, and I have no doubt that at the conclusion of the memorial service both the Senate and the House will adjourn out of respect to the late President; so these gentlemen are merely inviting the postponement of this vote until next Tuesday, and then probably a further postponement will be suggested. I do not know whether it is merely an effort to delay this bill or whether it is an effort to use this bill as a bumper to prevent other legislation from being considered; but I do think that with this matter pending we should have a vote.

Mr. CURTIS. Mr. President, I hope we shall have a vote on this amendment this afternoon. As the Senator has said, it is not likely that any work will be done on Monday. It is only half past 3, and we can very easily get through with this amendment this afternoon unless there are other Senators who desire to speak; and I hope we shall have a vote on it.

Mr. McKELLAR. Mr. President, I think we should have a quorum present, and I therefore suggest the absence of a quorum.

Mr. NORRIS. Mr. President, before the Senator makes that suggestion—

Mr. McKELLAR. I will withdraw it for the moment.

Mr. NORRIS. I do not want to let pass without notice any insinuation here that anybody is trying to block anything. I do not believe anybody is. I expected that we would have a final vote on this bill before this time, but I want to be fair. I think we all ought to be. We never have had a bill before the Senate at any time where the debate has been more completely confined to the questions connected with the bill. Nobody has been filibustering here.

I wish we could have gotten through before. I should be glad to get through to-night if we could; but, to be fair and honest with my fellow Senators I must say that nobody has undertaken to debate this bill unless he has talked directly to the point. Those who have spoken have not agreed with me a great many times, but the debate has been an honest, fair, and open one, and there has been no indication that anybody was trying to filibuster.

I should be glad to take up the veto message myself. Personally I should be willing to ask unanimous consent to lay aside this measure and take up the veto message, because I do not think that will take long; but I know that request would not be granted. I regret that anyone should even insinuate that there is intentional delay. The Senator from Alabama says, "What is the use of adjourning at 3 o'clock?" looking right at the clock, when the clock says 25 minutes to 4, leaving the impression that somebody here is not acting in good faith in trying to expedite this matter.

I want to say, Mr. President, that I should be glad to commence earlier and work later, and perhaps we shall have to do that. For one, I should be insisting on that if there were anything here to indicate that anybody is trying to filibuster or unreasonably delay action by the Senate. I do not believe such an insinuation ought to go, and I am not myself going to permit it to go, without some attention being called to it.

I am perfectly willing to vote on this amendment now. To my mind it is not of as great importance as some others; but I am going to be influenced somewhat by the wish and the will of the Senator who has proposed the amendment. If he is willing to vote, I am.

Mr. McKELLAR. Mr. President, in addition to what has just been so well said by the Senator from Nebraska, I might suggest that I think quite as much time has been taken upon one side of the bill as upon the other. It has been very generally debated on both sides. I think most Senators have confined themselves very closely to the subject, and I think the debate has done a wonderful lot of good.

I withhold my suggestion of the absence of a quorum still further for a moment.

Mr. SMITH. Mr. President—

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from South Carolina?

Mr. McKELLAR. I do.

Mr. SMITH. As the Senator from Nebraska [Mr. NORRIS] has said, and as doubtless the Senator from Alabama [Mr. UNDERWOOD] will confirm, this debate has been devoted entirely to the matter at issue. Every angle of it that appealed to the

different Senators has been discussed with reference to the main proposition.

In my opinion the question of what we propose to do with this project at Muscle Shoals is perhaps of greater importance than any other question that is going to come before the Senate at this session. It involves more than the mere outlay of the amount of money we have put in Muscle Shoals. Its relation to agriculture and to the national defense are matters of the most vital importance. The mere fact that war is not going on now is no reason why we should assume the rôle of the Arkansas traveler, who when it was raining could not shingle his house and when it was not raining he did not need the shingles.

The fact of the matter is that in the last analysis we are dependent upon a foreign source for our national defense. That was made painfully evident during the World War. Here is a proposition as to which we are reasonably assured by the scientists that if it is developed along the lines that the legislation intended should be followed will give, as improved methods are discovered and installed, all the basis of explosives we need; and along with that, *pari passu* with that, the very ingredient that is used as an explosive to defend the country is the prime element that is needed to produce the food that supports the country. Perhaps there is not in all the line of chemistry such a condition as that.

Now, we are called upon here to decide whether we are going to turn over this project to private interests under certain restrictions, or whether the Government is going to carry on, for the two prime concerns of the Government, the two things that are most vital to the Government—its defense in time of war and adequate physical support in time of peace. We have every reason to believe that we can develop at Muscle Shoals processes by which the entire amount of power produced within that territory, if economically utilized, may solve both problems.

This is not a mere academic discussion as to whether we shall adopt the proposition of the Senator from Alabama and leave with the Secretary of War the determination of the question as to whether that power shall be given to a private individual, that power being delegated to him, or whether we shall carry it on in connection with the most vital question that ever affected this Government. Shall we develop at Muscle Shoals sufficient processes to guarantee us in time of war an adequate supply of that which would defend us, and in times of peace an adequate amount of that which is essential for the fertilization of our soil?

It is not so much a quantitative question right now as it is a qualitative question. What can we do there to develop the process, and make sure and certain what we may do in the way of solving the two great, vital problems of any nation or country in the world—the enrichment of its soil and the protection of the people during times of war?

Therefore, there are some of us who believe that this question is of such vital importance that we ought to take all the time that is necessary so that Senators can decide without reference to party, without reference to any partisan feeling or sectional feeling, what we are going to do with a great national asset. The fact that it happens to be in Alabama does not mean that it is any less an asset of the United States of America. It is a gift to this country by the creative force that we ought to use for all the country.

I have said that this proposition of mine, which I have offered as an amendment to the bill of the Senator from Alabama, is the dividing line. It will bring sharply to issue the question as to whether we are going to delegate to private individuals the vital interests of this country, whether we are going to leave the defense of this country in the hands of private individuals to develop exigently as their personal interests may dictate, or whether the Government shall hold this great national asset and drive to one objective, which is the development of a process of using that power so that there will be no question as to adequate amount and adequate processes of national defense.

We have that question to decide here—whether we are going to delegate the ultimate defense of this country to private interests with a pitiful 40,000 tons of nitrogen annually, or whether we are going to determine whether or not we can produce at this plant a million tons annually if the Government requires it to defend itself. That is the question.

Nobody knows what is going to be the ultimate perfection of the process of fixing nitrogen from the air. We do know that the amount in the air is infinite, and that it is only a question of whether the ingenuity of our people will be able to perfect a process by which the vast amount of this ingredient necessary to protect our country may be fixed and used for

our defense. It is not good statesmanship, it is not patriotic, because dollars and cents are involved and it may redound to the enrichment of some companies, for us to turn this plant loose until we have assured the American people that the appropriation which was made to prove beyond cavil that we can get the ingredient necessary to defend ourselves has accomplished its purpose.

That is the question for us to decide.

It is not a question of a water-power company, and it is not alone a question of fertilization of the soil. It is a question of settling whether within our own domain we can develop and produce that which will protect us in time of need, in time of war.

Because of this fact that this is perhaps the most vital question that ever came before this body, I have suggested that my amendment marks the dividing point as to whether we are going, as the representatives of the people, to develop what we have begun to a point where we will demonstrate and perfect processes by which we can be independent of any foreign country for the basic elements of our defense, and know that we have not only the process but the power to make the process effective, or whether we are going to dedicate this great asset to use either as a power plant or as a semipower plant, and leave the country in doubt as to whether in time of war it can get an adequate supply of this absolutely indispensable ingredient.

It can not be considered a question of North, South, East, or West. It is a national question as to what we are going to do, whether we will produce, by our own ingenuity, that which we so vitally need, or whether we will depend upon Chile. It is up to us to decide that question, and in the amendment I have offered to the proposition of the Senator from Alabama is the sharp issue of whether we are going to leave the question of national defense to the very questionable attitude of a private corporation, or whether we, as the people charged with that responsibility, shall carry on.

As I said a moment ago, there are some who are interested in this as much as I am sure we all are, who were called away, and thought, perhaps, a vote would not be taken until Monday, and I would like to have them here. I am not trying to delay—

Mr. HARRISON. May I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Mississippi?

Mr. SMITH. I yield.

Mr. HARRISON. Does the Senator think it is fair to those of us who stay here, expecting a vote every minute of the day, that others should be encouraged to leave the Senate? Is that just right to those of us who stay here all the time?

Mr. SMITH. It is not worth while for the Senator from Mississippi to ask me any such question.

Mr. HARRISON. It is pretty hard to answer that question.

Mr. SMITH. It is not hard to answer. The Senator knows it is one of the commonest things that occurs here in the Senate, that where there is not undue delay, certain courtesies are extended. It is done all the time, and the attitude of the Senator on a question sometimes largely determines whether he thinks that is a proper extension of courtesy or not. The Senator from Mississippi knows that as well as I do, and he knows it is a thing that is done every year.

Mr. HARRISON. If the Senator has made that kind of an agreement with somebody who has left, does he not think it would be fair to the rest of us to let us know whether we can leave, too, and enjoy ourselves?

Mr. SMITH. I have made an agreement with no one, and the Senator from Mississippi is begging the question when he intimates that I have done so. I simply heard it said that Senators were called away, thinking that perhaps on account of the importance of the question we would not reach a vote until Monday. No great delay would be occasioned if we were to postpone the vote until Tuesday, because, even if the Underwood substitute is agreed to, the Senator from Nebraska doubtless will offer his amendment, and debate will come then on the question as to the features involved in the Underwood substitute.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. CURTIS. I ask the Senator if, in case we recess after having a short executive session, he would agree that all debate be considered as closed on this particular amendment and that we vote on it when we meet Tuesday morning at 12 o'clock?

Mr. SMITH. I do not know whether others care to debate it or not, but so far as I am concerned I have said all I care to say on the subject. The matter is so plain to me, our duty is so manifest, that there is no question in my mind as to what

we ought to do. If it had been a pure question of a commercial project for making a profit, I do not know that I would have opened my mouth. But it was not. It involves the very issue of life and death, perhaps, to this country; and I am not going to delegate that power to any private corporation, so that we may be jeopardized in the future because I did not do my duty, when it was positively stated in the initial bill, and reiterated in this measure, that we were attempting to provide for the national defense. Our need for doing something was made painfully evident in the last war, so that we had to call the Allies together and mutually create a fund to buy nitrate of soda and distribute it amongst the Allies in order to carry on the war against the German Empire.

Mr. REED of Missouri. Mr. President, I want to suggest to the Senator a unanimous-consent agreement, under which on Tuesday next at not later than 2 o'clock—Monday, I understand, being otherwise occupied—we shall vote on his amendment. If we agree to vote at 2 o'clock, it will leave two hours for discussion if anyone wants to discuss the amendment, but I suggest that at not later than 2 o'clock on Tuesday we shall vote.

Mr. SMITH. That will be all right; but suppose we agree to meet at 11 on Tuesday, so as to give three hours. I would be perfectly willing to agree to that.

Mr. REED of Missouri. Very well. I will propose the following unanimous-consent agreement—

Mr. HARRISON. Does not the Senator think it better to limit the time of Senators, then, to 10 minutes, or 5 minutes, so that one Senator could not take all the time?

Mr. REED of Missouri. I ask unanimous consent that on Tuesday, December 16, at not later than 2 o'clock, we shall vote upon what is known as the Smith amendment, and that no Senator shall speak more than once nor longer than 10 minutes upon the amendment.

Mr. SMITH. That is agreeable to me.

Mr. UNDERWOOD. That is, during that time?

Mr. REED of Missouri. Certainly.

Mr. SMITH. Certainly; and that when the Senate takes a recess on Monday it agree to meet at 11 o'clock.

Mr. REED of Missouri. I have included that.

Mr. SMOOT. I do not think that should go in. A number of us are working very hard on bills which are very important, so that we can not be in the Chamber at 11 o'clock, and when the 10-minute speeches begin I would like to be here.

Mr. SMITH. I suggest to make the hour of voting 3 o'clock, and that would give us three hours if we meet at 12.

Mr. SMOOT. I have no objection to that.

Mr. REED of Missouri. Then I propose that at not later than 3 o'clock on the calendar day of Tuesday, December 16, the Senate shall proceed to vote upon what is known as the Smith amendment, or any amendments thereto, and that upon Tuesday no Senator shall speak more than once or longer than 10 minutes upon the Smith amendment.

Mr. UNDERWOOD. Or upon any subject before us.

Mr. REED of Missouri. Or upon any other subject.

The PRESIDENT pro tempore. The Secretary will report the proposed unanimous-consent agreement.

The reading clerk read as follows:

It is agreed by unanimous consent that on the calendar day of Tuesday, December 16, 1924, at not later than 3 o'clock p. m., the Senate shall proceed to vote without further debate upon the amendment of Mr. SMITH to House bill 518, and that no Senator shall speak more than once or longer than 10 minutes upon said amendment or upon any other subject.

Mr. CURTIS. Prior to 3 o'clock.

Mr. REED of Missouri. Let it read, "and prior to the final disposition of said amendment no Senator shall speak more than once or longer than 10 minutes."

The PRESIDENT pro tempore. The Secretary will again report the proposed agreement.

The reading clerk read as follows:

It is agreed by unanimous consent that on the calendar day of Tuesday, December 16, 1924, at not later than 3 o'clock p. m., the Senate shall proceed to vote without further debate upon the amendment of Mr. SMITH to House bill 518, and prior to the vote no Senator shall speak more than once or longer than 10 minutes upon said amendment or upon any subject.

Mr. REED of Missouri. Strike out "upon said amendment" and all the rest of it, and let it conclude "shall speak more than once or longer than 10 minutes."

Mr. SMITH. That is all right.

The PRESIDENT pro tempore. The Secretary will again read the tentative agreement.

The reading clerk read as follows:

It is agreed by unanimous consent that on the calendar day of Tuesday, December 16, 1924, at not later than 3 o'clock p. m., the Senate shall proceed to vote without further debate upon the amendment of Mr. SMITH to House bill 518, and prior to the vote no Senator shall speak more than once or longer than 10 minutes.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent agreement? The Chair hears none, and it is so ordered.

The agreement was reduced to writing as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, by unanimous consent, that on the calendar day of Tuesday, December 16, 1924, at not later than 3 o'clock p. m., the Senate will proceed to vote, without further debate, upon the amendment of Mr. SMITH to the bill, H. R. 518, relating to the disposal of Muscle Shoals, etc., and that on said calendar day and prior to the vote no Senator shall speak more than once or longer than 10 minutes.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened.

PROPOSED INVESTIGATION OF THE NAVY

Mr. KING. Mr. President, I move that Senate Resolution 272, directing the Committee on Naval Affairs to investigate the future use of navy yards and personnel in naval construction, and so forth, which was submitted by me on December 4, 1924, and ordered to lie on the table, be taken from the table and referred to the Committee on Naval Affairs.

The motion was agreed to.

REUBEN R. HUNTER

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 353) for the relief of Reuben R. Hunter.

Mr. JONES of New Mexico. Mr. President, I move that the Senate disagree to the amendment of the House, request a conference with the House on the disagreeing votes, and that the Chair appoint conferees on the part of the Senate.

The motion was agreed to, and the President pro tempore appointed Mr. CAPPER, Mr. SPENCER, and Mr. BAYARD conferees on the part of the Senate.

GIFT BY ELIZABETH SPRAGUE COOLIDGE TO THE LIBRARY OF CONGRESS

Mr. PEPPER. From the Committee on the Library I report back favorably with an amendment the joint resolution (S. J. Res. 152) to accept the gift of Elizabeth Sprague Coolidge for the construction of an auditorium in connection with the Library of Congress, and to provide for the erection thereof, and I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The amendment was to add two sections at the end of the joint resolution, as follows:

SEC. 4. Should other gifts be proffered applicable to the perfection or equipment of the proposed structure for its intended uses, the Architect of the Capitol may, with the concurrence of the Librarian and approval of the Joint Committee on the Library, accept and apply them, any moneys so accepted being deposited with the Treasurer of the United States, credited to the special fund, and disbursed as provided herein for the original gift.

SEC. 5. No contract shall be entered into or obligation incurred for the design, construction, or equipment of the structure in excess of the moneys actually available from the total of such gifts.

So as to make the joint resolution read:

Resolved, etc., That the offer of Elizabeth Sprague Coolidge, communicated by the Librarian of Congress and set out in the following language, to wit:

"In pursuance of my desire to increase the resources of the music division of the Library of Congress, and especially in the promotion of chamber music, for which I am making an additional provision in the nature of an endowment, I offer to the Congress of the United States the sum of \$60,000 for the construction and equipment in connection with the Library of an auditorium, which shall be planned for and dedicated to the performance of chamber music, but shall also be available (at the discretion of the Librarian and the chief of the music division) for any other suitable purpose, secondary to the needs of the music division."

be, and the same is hereby, accepted.

SEC. 2. The Treasurer of the United States is hereby authorized to receive from the said Elizabeth Sprague Coolidge the above sum of \$60,000, to receipt for it in the name of the United States of America,

and to credit it on the books of the Treasury Department as a special fund dedicated to the purpose stated, and subject to disbursement for such purpose upon vouchers submitted by the Architect of the Capitol as provided in section 3.

Sec. 3. The Architect of the Capitol is hereby authorized and directed, in consultation with the Librarian of Congress and subject to the approval of the Joint Committee on the Library, and within the limit of the sum available, to prepare or contract for the preparation of plans for the proposed auditorium and, within such limit, to construct or contract for the construction of such auditorium on land within or appurtenant to the Library, and to purchase in the open market the necessary equipment therefor; and upon proper vouchers to draw upon the said special fund for the expenses of such plans, construction, and equipment.

Sec. 4. Should other gifts be proffered applicable to the perfection or equipment of the proposed structure for its intended uses, the Architect of the Capitol may, with the concurrence of the Librarian and approval of the Joint Committee on the Library, accept and apply them, any moneys so accepted being deposited with the Treasurer of the United States, credited to the special fund, and disbursed as provided herein for the original gift.

Sec. 5. No contract shall be entered into or obligation incurred for the design, construction, or equipment of the structure in excess of the moneys actually available from the total of such gifts.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

RECESS

Mr. CURTIS. I move that the Senate take a recess, the recess being under the order previously made, until Monday at 11.50 o'clock a. m.

The motion was agreed to; and (at 4 o'clock and 10 minutes p. m.) the Senate took a recess until Monday, December 15, 1924, at 11.50 o'clock a. m.

Frederick D. Gardner, Forest Grove.

J. Clyde Martin, Grants Pass.

Gaylord G. Godfrey, Independence.

Willis E. Everson, Waldport.

PENNSYLVANIA

Clarence G. Young, Bristol.
H. George Marburger, Denver.
Samuel Y. Wissler, Ephrata.
John M. Kurtz, Honey Brook.
Grant Umberger, Langhorne.
Enos A. Freed, Souderton.
Lincoln G. Nyce, Vernfield.

SOUTH CAROLINA

Silas C. Arnold, Central.
Benjamin T. Frierson, Conway.
George R. Hudson, Williston.

UTAH

Paul G. Johnson, Grantsville.
Heber J. Sheffield, Jr., Kaysville.
David T. Lewis, Spanish Fork.

WYOMING

Frank A. Beard, Chugwater.
John H. Mantle, Kemmerer.
Louis E. Eaton, Torrington.

WITHDRAWAL

*Executive nomination withdrawn from the Senate December 13
(legislative day of December 10), 1924*

PROMOTION IN THE ARMY

INFANTRY

Col. Russell Creamer Langdon, Adjutant General's Department, November 28, 1924, with rank from July 1, 1920. The nomination was submitted to the Senate December 3, 1924.

HOUSE OF REPRESENTATIVES

SATURDAY, December 13, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Most gracious Heavenly Father, in grateful recognition of our dependence upon Thee, we wait in Thy presence to say our prayer; do Thou condescend to hear us. We seek Thy guidance that we may walk worthy of our vocation and live well to-day. May all personal interests be lost in the needs and demands of our country. Everywhere may the hearts of selfish men be melted into the spirit of brotherly love and Christian charity. Bless all our homes with purity and sweetness, and may we ever be sensitive toward their sanctities. Lead us to understand that Thy moral and spiritual ideals are the working plans for the higher life of man, and the best that we can do apart from them is in vain. Help us to live our lives in the spirit of the high-minded citizen, generous, untiring, dutiful, and fearless of danger, and hopeful of good. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

Sundry messages in writing from the President of the United States, by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had, on December 8, approved and signed the following bill:

H. R. 6426. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

NAVAL APPROPRIATION BILL

Mr. FRENCH, by direction of the Committee on Appropriations, reported the bill (H. R. 10724) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1926, and for other purposes (Rept. No. 1044), which was read a first and second time, and, with the accompanying report, was referred to the Committee of the Whole House on the state of the Union and ordered printed.

Mr. GARRETT of Tennessee reserved all points of order.

Mr. LAGUARDIA. Mr. Speaker, I ask the consideration at this time of House Resolution 365, reported from the Judiciary Committee.

Mr. BEGG. Mr. Speaker, I make a point of order on the request.

Mr. BLANTON. I make the point of order, Mr. Speaker, we have no quorum.

Mr. LONGWORTH. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, when the following Members failed to answer to their names:

[Roll No. 8]

Allgood	Drewry	Lee, Ga.	Rogers, N. H.
Anderson	Eagan	Lindsay	Rosenbloom
Bacon	Fairchild	Lineberger	Sanders, N. Y.
Barkley	Fish	Linthicum	Schall
Beedy	Fitzgerald	Logan	Sherwood
Berger	Fredericks	McLaughlin, Nebr.	Smithwick
Black, Tex.	Frothingham	Madden	Snell
Bloom	Gallivan	Magee, Pa.	Speaks
Boylan	Geran	Manlove	Stalker
Britten	Gifford	Mead	Sullivan
Browne, N. J.	Goldfelter	McClintock	Sweet
Buckley	Goldsbrough	Michaelson	Swoope
Burdick	Graham	Miller, Ill.	Tague
Byrnes, S. C.	Guyer	Mills	Thompson
Carter	Harrison	Mooney	Tilson
Casey	Hill, Md.	Morehead	Tinkham
Coller	Howard, Nebr.	Morin	Tucker
Clague	Jacobstein	Nelson, Wis.	Tydings
Clark, Fla.	Jeffers	Newton, Minn.	Vale
Cooper, Ohio	Johnson, Wash.	Nolan	Vare
Corning	Johnson, Ky.	O'Brien	Vinson, Ga.
Croll	Johnson, W. Va.	O'Connor, N. Y.	Wainwright
Crowther	Johnson, S. Dak.	O'Sullivan	Ward, N. Y.
Cummings	Kahn	Oliver, N. Y.	Ward, N. C.
Curry	Kelly	Paige	Weller
Davey	Kendall	Parker	Welsh
Davis, Minn.	Kent	Patterson	Williams, Mich.
Dempsey	Kless	Perlman	Winslow
Dickinson, Iowa	Kincheloe	Porter	Wolf
Dickstein	Knutson	Quayle	Woodrum
Dominick	Kubz	Ransley	Wurzbach
Doyle	Langley	Reed, W. Va.	Zihlman
Drane	Larson, Minn.	Rogers, Mass.	

The SPEAKER. Two hundred and ninety-eight Members have answered to their names, a quorum.

Mr. LONGWORTH. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

INITIAL EMBARGO PROMULGATED BY THE SECRETARY OF THE INTERIOR ON DECEMBER 5, 1896

Mr. HUDSPETH. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record on the subject of reclamation and to print a certain document prepared by Mr. Hamele, the assistant solicitor of the department.

The SPEAKER. The gentleman from Texas asks unanimous consent to extend his remarks in the Record and to print with them a certain document. Is there objection?

There was no objection.

Mr. HUDSPETH. Mr. Speaker and gentlemen of the House, many inquiries have been made concerning the initial embargo promulgated by the Secretary of the Interior, on December 5, 1896, against the use of the waters of the upper Rio Grande for irrigation purposes, and as showing the reasons for said embargo and the justness thereof, as my mind conceives the fairness and justness thereof, I herewith submit, as a part of my remarks, one of the ablest historical briefs I have ever read, fully and with accuracy and fairness portraying the facts—and all the facts—connected therewith, by that splendid and able authority on reclamation laws, Hon. Ottamar Hamele, special attorney representing the Bureau of Reclamation before the Rio Grande Commission.

Every Member of this House will be amply repaid if he will give this document a most exhaustive and careful perusal.

The brief is as follows:

THE EMBARGO ON THE UPPER RIO GRANDE

(By Ottamar Hamele, special attorney representing the Bureau of Reclamation before the Rio Grande Commission)

FIRST SETTLEMENTS IN RIO GRANDE VALLEY

Spanish explorers under Coronado, moving easterly from the Pacific, reached the Valley of the Rio Grande before the middle of the sixteenth century. They found the Pueblo Indians irrigating fields of wheat, corn, fruit, and flowers from the waters of this river and its tributaries. The acequias then in use indicated great age, and suggested the existence of a prehistoric people of substantial population.

The Ysleta Church below El Paso and the Juarez Church across the river, probably date back to the middle of the sixteenth century. The city of Juarez, Mexico (formerly called Paso del Norte) was an important town in the year 1600. Its diversion from the Rio Grande (Acequia Madre) quite likely was constructed more than 350 years ago.

The first attempts of the Spaniards to colonize the Valley of the Rio Grande were carried on from Juarez as a base. Santa Fe was made the capital of New Mexico in 1605. Barnabito was founded about the year 1700 and Albuquerque in 1706. Permanent settlement

in the San Luis Valley in Colorado was not begun until after 1850. The town of Conejos was founded by Mexicans in 1835, and the Mormons established Manassa in 1878.

PIONEER IRRIGATION DEVELOPMENTS

As already stated, the Acequia Madre at Juarez is probably 350 years of age. The rights under the Ysleta, San Elizario, and Socorro ditches at El Paso are quite ancient. Each permanent white settlement in the Rio Grande Valley represents at least one diversion substantially as of the date of the settlement. In addition to these were the earlier irrigation rights of the Pueblo Indians.

The first half of the last century saw a considerable extension of irrigation in this region. The El Paso city ditch (formerly Ponce acequia) was built in 1827. In the Mesilla Valley, in New Mexico, the Dona Ana ditch was constructed in 1844, the Las Cruces ditch in 1849, and the Mesilla ditch in 1850. In the San Luis Valley in Colorado, the People's Canal on Culebra Creek has an appropriation dating from 1852.

EXTENT OF IRRIGATION PRIOR TO 1880

Baron von Humboldt, who visited Juarez in 1806, wrote as follows regarding that region:

"Travelers are in the habit of taking a short rest at Paso del Norte (Juarez) in order to lay in provisions so as to proceed on their way to Santa Fe. The country around El Paso included splendid fields comparable with the best in Andalusia. The land is sown with corn and wheat; the vines bear excellent grapes preferable even to those of New Biscay, and the gardens yield an abundance of European fruit such as peaches, apples, and pears. As the soil is very dry, an irrigating canal brings water from the Rio Grande to El Paso." (Travels of Humboldt, Vol. IX, p. 265, German edition.)

Maj. William Emory, of the United States Army, who explored the Rio Grande in 1852-1854, described Juarez and vicinity (the El Paso Valley) as a "continuous vineyard," and stated that an area extending for 20 miles on both sides of the river was in cultivation.

In 1850 this area consisted of approximately 25,000 acres on the Mexican side supporting a population of about 20,000, and approximately 15,000 acres on the American side with a population of about 10,000. It is estimated that 550 second-feet of water were diverted for this irrigation.

In the same year there were irrigated from the Rio Grande in the Territory of New Mexico approximately 183,000 acres, demanding the use of about 5,600 second-feet of water, and there were irrigated from the Rio Grande in the State of Colorado approximately 122,000 acres requiring about 3,700 second-feet of water. Of the area in New Mexico about 10,000 acres were irrigated in the Rincon Valley, and about 31,000 in the Mesilla Valley, just north of El Paso.

COMPLAINTS FROM MEXICO

In the early eighties of the last century complaints began to be made on behalf of irrigators in Mexico, to the effect that irrigation in the United States had been increased to such an extent as seriously to deplete the water supply used for centuries on the lands in the vicinity of Juarez. The diversions particularly complained of were those in the San Luis Valley in Colorado. These complaints, voiced at first by individual landowners, later were taken up by the Government of Mexico with our State Department at Washington. It was contended by the Mexican authorities that the diversions in the United States were in violation of the treaty of Guadalupe Hidalgo of February 2, 1848 (9 Stat. 22), and that damages amounting to upward of \$35,000,000 had been sustained by the citizens of Mexico. It was suggested that a dam be constructed across the Rio Grande to provide the water to which the lands in Mexico were entitled.

General Stanley, of the United States Army, commanding the Department of Texas, in his official report dated September 12, 1889, says on this subject:

"Our relations with our Mexican neighbors upon the long line of the Rio Grande have been kindly, although they are a good deal excited over what they deem the violation of their riparian rights through our people taking all the water of the Rio Grande for the irrigation of the San Luis Valley, which leaves the Rio Grande a dry bed for 500 miles. The question is one that must be settled by the State Department, and thus far there has been no call for military force. The remedy for this water famine and consequent ruin to the inhabitants of the Rio Grande Valley must be found in storage reservoirs, so easy of construction, one in the canyon opposite Taos and the other in the canyon near and north of El Paso."

CONCURRENT RESOLUTION OF APRIL 29, 1890

There ensued several years filled with bickerings over this matter. Americans became interested from a financial standpoint in the proposed international dam, and bills to provide for its construction by the United States were introduced in Congress. A bill of this character (S. 1644-II. R. 3924) introduced in the Fifty-first Congress (1889) provoked considerable discussion. The agitation culminated in the

passage on April 29, 1890, of a concurrent resolution authorizing the President to enter into negotiations with the Government of Mexico for the purpose of remedying the difficulties existing between the two countries on account of the depleted water supply in the Rio Grande. Under treaty of March 1, 1889 (26 Stat., 1512) there was created an International Boundary Commission to pass on matters affecting the common boundaries of the two countries on the Rio Grande and the Colorado, but this commission was not authorized to consider the question of the depleted water supply, as has been frequently erroneously stated. A copy of the concurrent resolution of April 29, 1890, marked Exhibit A, is attached hereto.

THE RIO GRANDE DAM & IRRIGATION CO.

For several years immediately following the passage of the concurrent resolution of April 29, 1890, little or nothing was done by our Government to carry out the purpose of the resolution. In the meantime sections 18, 19, 20, and 21 of the statute of March 3, 1891 (26 Stat., 1095), authorizing rights of way over the public lands for canals, ditches, or reservoirs, was enacted into law, and on February 1, 1895, by approval of the Secretary of the Interior under said act, a private concern known as The Rio Grande Dam & Irrigation Co. secured a right of way over public lands to construct a large irrigation dam across the Rio Grande near Elephant Butte, in New Mexico, about 120 miles above the city of El Paso. Sections 18, 19, 20, and 21 of the right of way act of March 3, 1891, are marked Exhibit B and attached hereto. The dealings of the Government with The Rio Grande Dam & Irrigation Co. will be referred to later.

MORE COMPLAINTS FROM MEXICO

The activities of the Rio Grande Dam & Irrigation Co. led to renewed efforts on the part of the Mexican authorities to secure action from this Government under the concurrent resolution of April 29, 1890. It was realized that those in control of a large private dam across the Rio Grande in New Mexico would be able still further to reduce the water supply available for the Mexican lands. Also, it was assumed that if the proposed developments of the Rio Grande Dam & Irrigation Co. were carried out it would be infeasible to construct the proposed international dam at El Paso. Under date of October 21, 1895, the Mexican minister, M. Romero, sent a vigorous letter to Secretary of State Richard Olney, urging action under the concurrent resolution. A copy of this letter, marked "Exhibit C," is attached hereto.

OPINION OF ATTORNEY GENERAL HARMON

By letter dated November 5, 1895, the Secretary of State transmitted to Attorney General Judson Harmon a copy of the Mexican minister's letter of October 21, 1895, referred to the concurrent resolution of April 29, 1890, and requested answers to the following questions:

"(1) Are the provisions of article 7 of the treaty of February 2, 1848, known as the treaty of Guadalupe Hidalgo, still in force so far as the river Rio Grande is concerned, either because never annulled or because recognized and reaffirmed by article 5 of the convention between the United States and Mexico of November 12, 1884?

"(2) By the principles of international law, independent of any special treaty or convention, may Mexico rightfully claim that the obstructions and diversions of the waters of the Rio Grande, in the Mexican minister's note referred to, are violations of its rights, which should not continue for the future, and on account of which, so far as the past is concerned, Mexico should be awarded indemnity?"

On December 12, 1895, the Attorney General rendered an opinion, which is to be found in volume 21, Opinions Attorney General, at page 274. The following is the syllabus of the decision as found in the report:

"Article VII of the treaty of February 2, 1848, between Mexico and the United States, known as the treaty of Guadalupe Hidalgo, is still in force, so far as it affects the Rio Grande.

"The taking of water for irrigation from the Rio Grande above the point where it ceases to be entirely within the United States and becomes the boundary between the United States and Mexico is not prohibited by said treaty.

"Article VII is limited in terms to that part of the Rio Grande lying below the southern boundary of New Mexico, and applies to such works alone as either party might construct on its own side.

"The only right the treaty professed to create or protect with respect to the Rio Grande was that of navigation. Claims against the United States by Mexico for indemnity for injuries to agriculture alone, caused by scarcity of water resulting from irrigation ditches wholly within the United States at places far above the head of navigation, find no support in the treaty.

"The rules, principles, and precedents of international law impose no duty or obligation upon the United States of denying to its inhabitants the use of the water of that part of the Rio Grande lying entirely within the United States, although such use results in reducing the volume of water in the river below the point where it ceases to be entirely within the United States.

"The fact that there is not enough water in the Rio Grande for the use of the inhabitants of both countries for irrigation purposes does not give Mexico the right to subject the United States to the burden of arresting its development and denying to its inhabitants the use of a provision which nature has supplied, entirely within its own territory. The recognition of such a right is entirely inconsistent with the sovereignty of the United States over its national domain."

AGREEMENT OF MAY 6, 1896

While the Attorney General's opinion of December 12, 1895, held that the complaints of the Mexican authorities were not justified either under treaty rights or under the rules of international law, the State Department apparently took the position that the United States was under a moral obligation to make good the depleted water supply of the Mexican lands.

On May 6, 1896, an agreement was made by Secretary of State Richard Olney, representing the United States, and the Mexican minister, M. Romero, representing the Mexican Government, under which Col. Anson Mills and Señor Don F. Javier Osorono, members of the International Boundary Commission, provided by the treaty of March 1, 1889, were directed to investigate and report as soon as practicable upon the following three questions:

"1. The amount of water of the Rio Grande taken by the irrigation canals constructed in the United States of America.

"2. The average amount of water in said river, year by year, before the construction of said irrigation canals and since said construction—the present year included.

"3. The best and most feasible mode, whether through a dam to be constructed across the Rio Grande near El Paso, Tex., or otherwise, of so regulating the use of the waters of said river as to secure to each country concerned and to its inhabitants their legal and equitable rights and interests in said waters."

JOINT COMMISSION REPORT OF NOVEMBER 25, 1896

Pursuant to the agreement of May 6, 1896, the joint commission therein named proceeded to consider and report upon the three questions set forth in that agreement. The commission's report bears date November 25, 1896.

On question No. 1, relative to the amount of water taken from the Rio Grande by irrigation canals constructed in the United States, the commission reported as follows:

"From the very elaborate statistical report of Civil Engineer Follett the commission find that prior to 1880 there were in Colorado 511 canals taken from the Rio Grande and its tributaries, irrigating about 121,000 acres of land; that this number of canals and amount of land irrigated has kept increasing year by year, many of the canals being enlarged during the same period, so that the number of canals at this date has increased to 925, irrigating 318,000 acres of land; and that in New Mexico there were, prior to 1880, 563 canals taken from the Rio Grande and its tributaries, irrigating 183,000 acres of land, and at the present time there are 603 canals, irrigating 186,000 acres of land.

"These results show an aggregate of 1,074 canals taken out in Colorado and New Mexico prior to 1880, and 1,528 taken from the river and its tributaries at this date, showing an increase of 454 canals and of 196,000 acres irrigated in the State of Colorado and Territory of New Mexico. This shows quite accurately the increase for the past 16 years. There are no reliable records available showing the increase in the preceding years, but they were doubtless on a more rapidly increasing ratio.

"It will also be observed that the greatest increase during these 16 years was in the State of Colorado, the number of canals and acres irrigated remaining almost stationary in New Mexico for that period; but this is easily accounted for by the fact that the appropriation of water in Colorado has rendered such a scarcity in New Mexico that little further increase of canals and acreage was profitable.

"It is evident to the commissioners that as the flow of water in the Rio Grande had not only become scarce at El Paso, but high up in New Mexico prior to 1888 or 1889, any increase of water used in Colorado would diminish materially the flow at El Paso during the irrigation season."

Relative to the second question, concerning the average amount of water in the Rio Grande year by year, the commission reported as follows:

"There are no records or testimony available which will enable the commissioners to determine this question entire with any degree of accuracy. The first record of the flow of the river here at El Paso was taken in 1889, the driest year up to that date, the river being dry as far above as Albuquerque, N. Mex., and no water passing El Paso for four months during the year, embracing August, September, October, and November. There is no tradition of such scarcity of water prior to this date—1889—the river only being dry once in about seven years, and then only for a short period in the latter part of the summer.

"For the 11 months prior to March 31, 1890, the flow of the river at El Paso was 425,000 acre-feet. This includes the long drought of 1889, before mentioned. For the year ending March 31, 1891, the flow was 1,100,000 acre-feet. For the year 1892 the flow at El Paso was 1,850,000 acre-feet. For the year 1893 the flow was 875,000 acre-feet.

"During a part of this time measurements at Embudo in the Rio Grande near the Colorado line showed that the flow at that point was greater than at El Paso, there being no increase in the flow from Embudo to El Paso. This fact is mentioned to show that the supply of water both in New Mexico and in the valley of El Paso depends, for the greater part, upon that of its headwaters in Colorado.

"An examination of the old canals in use in the El Paso Valley some 30 years ago convinces us that those on the Mexican side had a capacity of about 300 second-feet, and that those on the United States side had a capacity of about 250 second-feet.

"Many of these for the past five years have been constantly dry, and all of them have been dry for a great part of the irrigating season three years out of the five past.

"The foregoing is a condensed compendium of the large mass of information and statistics taken by our engineers, from which we form the following conclusions:

"That the flow of the river at El Paso has now been decreased by the taking of water for irrigation by canals constructed in the United States of America about 1,000 second-feet for 100 days annually, equal to 200,000 acre-feet of water.

"It will be observed that this loss is distributed through the summer flow, which at best was not always sufficient before the diminution took place during dry seasons.

"It should be understood that the great mass of these waters both before the construction of the canals and since consists of flood waters carried down the river unused, being utterly unavailable without large reservoirs to hold it for the season of irrigation, the maximum flow lasting but a few days, running as high as 16,000 second-feet, generally before the irrigation season fully sets in, and an average flood of about 5,000 second-feet during about 40 or 50 days in April and May."

On the third question, respecting the most feasible mode of regulating the use of the waters of the Rio Grande, so as to secure to each country an equitable right to the use of the waters, the commission reported as follows:

"The joint report of the engineers develops a feasible method of building a dam across the Rio Grande near El Paso, about 3 miles above, and impounding a large mass of the flood waters in a lake some 15 miles long by about 3½ miles wide, which it is believed by the commission will so regulate the use of the waters of said river as to secure to each country concerned and to its inhabitants their legal and equitable rights and interests in said waters, and neither they nor the commissioners have been able to discover any other feasible mode of consuming these ends.

"The joint commission is of the opinion that the present flow of the river is sufficient to maintain the reservoir as projected, but insufficient to maintain it and at the same time maintain the projected reservoir 120 miles above El Paso, in New Mexico, known as the Elephant Butte dam and reservoir. One of these projects, in the opinion of the commission, must give way to the other, or at least, if both are built, that at Elephant Butte must in some way be restrained from using water already appropriated by the citizens of the El Paso Valley, both Mexicans and Americans, and a method provided in case they violate these restraining rules for a prompt and efficient legal remedy for the parties injured.

"It is the opinion of the joint commission that Mexico has been wrongfully deprived for many years of a portion of her equitable rights in the flow of one-half of the waters of the Rio Grande at the time of the treaty of Guadalupe Hidalgo; and if there were no other evidence of that fact than the records and measurements above referred to, it is apparent to the eye of any visitor to the locality, where can be witnessed the dying fruit trees and vines, the abandoned fields and dry canals for the greatest portion that has heretofore been cultivated; and while we are considering the equitable rights of Mexico this is also true of the United States side, where almost the same abandonment and destruction of former prosperous farms may be witnessed.

"The joint commission is of the opinion that the impounding of this large body of the flood waters of the Rio Grande would not only effectually remedy the existing troubles regarding the equitable division of the waters of said river between the two countries, but would make it feasible to control the flow in the river so that it will be practically constant and uniform and prevent the erosions and avulsions which have heretofore ren-

dered the boundary line between the two countries so uncertain, unstable, and vexatious. It is certain that this effect will result as far down the river as the mouth of the next important tributary, the Concho River, of Mexico, and that the restraint of the torrential flow will, in a great degree, remedy the erosions and avalanches below the mouth of the Concho to the Gulf."

The commission recommended that the two Governments enter into a treaty to provide for a final settlement of all questions, past and future, regarding the distribution of the waters of the Rio Grande. It proposed that the United States defray all of the cost of the dam, estimated at \$2,317,113.36; that an equitable distribution of the waters from the dam be made between the two countries, and that Mexico relinquish all claims for indemnity for the unlawful use of water in the past.

On the subject of interference with the water supply on the upper river, the commission recommended that the United States—

"in some way prevent the construction of any large reservoirs in the Rio Grande in the Territory of New Mexico, or in lieu thereof, if that be impracticable, restrain any such reservoirs hereafter constructed from the use of any waters to which the citizens of the El Paso Valley, either in Mexico or in the United States, have right by prior appropriation, and provide some legal and practicable remedy and redress, in case such waters should be used, to the citizens of both countries."

The complete text of the joint commission's report of November 25, 1896, with copies of other related papers, will be found in Senate Document No. 229, Fifty-fifth Congress, second session, 1898. Copies of additional papers on the general subject appear in Senate Document No. 154, Fifty-seventh Congress, second session, 1903.

STATE DEPARTMENT REQUESTS EMBARGO

On August 4, 1896, while the joint commission was considering the Mexican complaints in accordance with the concurrent resolution of April 29, 1890, and the agreement of May 6, 1896, the Mexican minister again addressed the Secretary of State on the subject, forwarding a petition calling attention to the distressing situation on the Mexican side of the Rio Grande, and stating that the efforts of the two Governments to remedy the condition would be fruitless if, in addition to the 40 dams in Colorado, the Rio Grande Irrigation & Land Co. (Ltd.), successor to the Rio Grande Dam & Irrigation Co., should be permitted to construct a dam across the river at Elephant Butte, N. Mex. The communication from the Mexican minister was referred to Col. Anson Mills, of the joint commission, who reported thereon under date of November 17, 1896. This report was transmitted by the Secretary of State to the Secretary of the Interior by letter dated November 30, 1896. The latter communication suggested that an investigation be made of the rights of the Rio Grande Irrigation & Land Co. (Ltd.) and that the Secretary of the Interior decline to grant additional rights of way over public lands for dams and reservoirs under the act of March 3, 1891. A copy of the letter of November 30, 1896, is marked "Exhibit D" and attached hereto.

INITIAL EMBARGO OF DECEMBER 5, 1896

Following the suggestion of the Secretary of State made in letter of November 30, 1896, the Secretary of the Interior on December 5, 1896, addressed a letter of that date to the Commissioner of the General Land Office directing the suspension of action on all applications for rights of way for irrigation purposes over public lands in the Rio Grande Basin in Colorado and New Mexico. By letter dated December 19, 1896, the Secretary of the Interior reported this action to the Secretary of State and commented upon the rights of the Rio Grande Dam & Irrigation Co. A copy of the order of December 5, 1896, marked "Exhibit E" and a copy of the letter of December 19, 1896, marked "Exhibit F" are attached hereto. The order of December 5, 1896, has been modified six times, as will hereafter appear.

FIRST MODIFICATION OF EMBARGO, JANUARY 13, 1897

The Pecos River, flowing through eastern New Mexico, is a tributary of the Rio Grande and was included in the blanket order of December 5, 1896. However, its waters reach the Rio Grande at a point below the irrigable area in the vicinity of Jaurez and therefore could not affect the question under discussion. This fact was brought to the attention of the Secretary of the Interior by letter of January 11, 1897, from the Secretary of State, a copy of which letter, marked "Exhibit G," is attached hereto. Accordingly, on January 13, 1897, the order of December 5, 1896, was modified by the Secretary of the Interior so that it would not apply to the tributaries of the Rio Grande which empty into that river below the point where it becomes the international boundary. A copy of the order of January 13, 1897, marked "Exhibit H," is attached hereto.

NEGOTIATIONS FOR TREATY MEET DIFFICULTY

In letters of December 19, 1896, December 29, 1896, and January 5, 1897, from the Mexican Minister M. Romero to Secretary of State Olney the former expressed approval of the joint commission's report of November 25, 1896, and in letter dated January 30, 1897, the Mexican Minister transmitted to our State Department a draft of proposed

treaty following the recommendations of the report of the joint commission, which draft had been approved by the Mexican Government. The position of the United States was expressed in the following paragraph taken from letter of January 4, 1897, from Secretary Olney to the Mexican Minister—

"In preparing to enter into negotiations the department has found the subject embarrassed by greatly perplexing complications arising out of reservoir dams, etc., either already built or authorized through the concurrent action of the Federal and State authorities. Just what legal validity is to be imputed to such grants of authority, or in what way structures completed or begun are to be dealt with, are questions under careful investigation and which must be disposed of before the United States will be in a condition to negotiate."

NAVIGABILITY OF THE RIO GRANDE

The letter of January 11, 1897, from the Secretary of State to the Secretary of the Interior (Exhibit G), in addition to suggesting that the embargo be lifted from the Pecos River, also suggested that the Rio Grande was a navigable river, and that before approving rights of way for dams in the Rio Grande Basin the Secretary of the Interior should assure himself that the erection of such dams would not in any manner interfere with navigation. By letter dated January 13, 1897, the Secretary of State addressed the Secretary of War on the subject of the Rio Grande Dam & Irrigation Co., and suggested that the Secretary of War secure from the Attorney General an opinion as to whether the proposed dam of the company could be constructed without the sanction of the Secretary of War, as directed by the river and harbor act of July 13, 1892 (27 Stat. 88, 100). A copy of the letter of January 13, 1897, marked "Exhibit I," is attached hereto. The Attorney General's opinion was requested by the Secretary of War on February 19, 1897, and again on April 8, 1897. Delay in the matter was caused by a change in national administration. On April 24, 1897, Attorney General Joseph McKenna approved an opinion of that date by Solicitor General Holmes Conrad. This opinion is reported in volume 21, Opinions Attorney General, at page 518. The following is the syllabus from the report:

"The Secretary of the Interior had no power under the act of March 3, 1891, providing for the location and selection of reservoir sites on the public lands of the United States and rights of way for irrigating ditches and canals, to grant a right to construct dams across the Rio Grande for the purpose of checking the flow of water and distributing it for irrigation purposes."

"The control and supervision of the navigable waters of the United States is vested in the Secretary of War."

"The remedy of the United States in case of the erection of a dam across navigable waters is by injunction under section 10 of the act of September 19, 1890, and if the dam has been constructed, also by criminal prosecution."

LITIGATION WITH RIO GRANDE DAM & IRRIGATION CO.

In accordance with the Attorney General's opinion of April 24, 1897, suit by the United States against the Rio Grande Dam & Irrigation Co. was filed in the District Court of the Territory of New Mexico, third district, May 24, 1897. The purpose of the suit was to enjoin the defendant from obstructing the flow of the waters and interfering with the navigable capacity of the Rio Grande, a navigable river, in violations of acts of Congress and contrary to treaty with Mexico. The bill was dismissed by the trial court, and this decision was affirmed by the Territorial supreme court (9 N. Mex. 392). The United States Supreme Court reversed the decree and remanded the cause with directions for "an inquiry into the question whether the intended acts of the defendants in the construction of a dam and in appropriating the waters of the Rio Grande will substantially diminish the navigability of that stream within the limits of present navigability, and if so, to enter a decree restraining those acts to the extent that they will so diminish." (See U. S. v. Rio Grande Dam & Irrigation Co. (1899) 174 U. S. 690.)

Again, in the trial court the cause came in for hearing, and again a decree against the Government was entered and later affirmed by the Territorial supreme court. Again, the United States Supreme Court reversed the lower court and remanded the case with "direction to grant leave to both sides to adduce further evidence." (See U. S. v. Rio Grande Dam & Irrigation Co. (1902) 184 U. S. 416.)

For a third time the suit was placed on the docket of the New Mexico trial court. The Government amended its complaint, alleging that the statutory period of five years for construction required by the right of way act of March 3, 1891, had run, the requirement had not been met, and the rights, if any, the company had acquired were forfeited. Upon this new allegation the trial court found for the Government, and its decree was thereafter affirmed by the Territorial supreme court (13 N. Mex. 386) and by the United States Supreme Court (See Rio Grande Dam & Irrigation Co. v. U. S. (1909) 215 U. S. 266.) It will be noted that this litigation covered a period of over 12 years. Incidentally, the successors of the Rio Grande Dam & Irrigation Co.—

British interests—are now attempting to secure against the United States in an international tribunal an award of damages because they were prevented from carrying out their proposed irrigation enterprise.

BILLS IN CONGRESS

While the litigation between the United States and the Rio Grande Dam & Irrigation Co. was in progress, various bills providing for the construction of an international dam at El Paso and the distribution of the waters therefrom were introduced in Congress. Typical of these was the bill (S. 3894-H. R. 9710) introduced in 1900. A copy of this bill, marked "Exhibit J," is attached hereto. On December 19, 1900, the Senate Committee on Foreign Relations reported this bill favorably and recommended that it be passed. (See S. Rept. No. 1755, 56th Cong., 2d sess.) However, the bill was not enacted. New Mexico interests were strongly opposed to the plan for an international reservoir at El Paso, as such a reservoir would inundate a large irrigable area in the Mesilla Valley in New Mexico and prevent a much desired further development of that region.

THE NATIONAL IRRIGATION ACT

On June 17, 1902, the national irrigation act became a law (32 Stat. 388). Under this act the Secretary of the Interior was authorized to use certain moneys from public lands to construct and maintain irrigation works in 16 designated States and Territories, of which the Territory of New Mexico was one. The State of Texas was not included in the list, as there were no public lands in that State.

The new United States Reclamation Service in the Geological Survey, organized under said act, began investigations on the Rio Grande March 1, 1903, and the survey of a reservoir site in the vicinity of Elephant Butte was completed in August of that year. Borings for the foundations of the dam were begun in October, 1903, and completed in February, 1904. (See Second Annual Report U. S. Reclamation Service, p. 377; Third Annual Report, pp. 95, 395.) Under date of June 3, 1904, the Mexican minister, M. de Azpiroz, brought the claims of Mexico to the attention of the State Department again, urgently requesting the providing of a water supply or the payment of damages. In letter dated June 27, 1904, from Secretary of State John Hay to Secretary of the Interior Ethan Allen Hitchcock, reference is made to the letter of June 3 from the Mexican minister, and it is suggested that the national irrigation act might be utilized to solve the difficulty. A copy of the letter of June 27, 1904, marked "Exhibit K," is annexed hereto.

PLANS FOR A RECLAMATION SERVICE PROJECT

On November 18, 1904, before the National Irrigation Congress held at El Paso, Engineer B. M. Hall, of the Reclamation Service, presented a paper dealing with Government irrigation on the Rio Grande. He compared the plan for an international dam at El Paso, as proposed in the joint commission's report of November 25, 1896, with the plan for a Federal dam at Elephant Butte in New Mexico. The following is taken from his paper:

"As mentioned above, Mr. Follett estimates that about 40,000 acres of land had prior rights under the old canals in El Paso Valley and were deprived of irrigation by the act of American citizens on the headwaters, and that something more than one-half of this 40,000 acres lay on the Mexican side of the river. As the restoring of these ancient water rights is the primary object of the proposed expenditure of \$2,317,113.36, the cost of project would be \$57.92 per acre. However, it will be shown further along in this paper that the proposed reservoir could be made to irrigate 55,000 acres in El Paso Valley, which would put the cost per acre at \$42.12, provided the estimate of the commission is a correct one. There is every reason for believing this estimate too low, but aside from the monetary cost per acre for the land to be irrigated, there is another item of cost to be considered. The reservoir would cover 25,565 acres of good valley land with mud and water and would cause marshes to form in the low, flat valley at the head of the lake amounting to perhaps 15,000 acres additional, making a total destruction of about 40,000 acres of land in the Mesilla Valley, which is just as near to El Paso, and just as valuable as any of the land that would be irrigated.

"While the published report of the commission and its engineers plainly sets forth the fact that increased irrigation in Colorado caused shortage of water in Mexico, Texas, and New Mexico, their recommendations not only leave New Mexico out of all the benefits to be derived from a project inaugurated for the purpose of making up this shortage, but give part of her territory to Mexico, cover up another part of it by the proposed reservoir, and distinctly ask that the Government shall prevent the construction of any other large reservoir on the Rio Grande in the territory of New Mexico.

"The only reasonable explanation of these extraordinary recommendations lies in the probable fact the commission had no alternative plan for consideration, and thought the plan recommended was the only possible plan that could be adopted for restoring the water to which Mexico laid claim by virtue of

ancient prior use. Indeed, they were confronted at the time with the prospect of an Elephant Butte Dam in New Mexico, not under Government management, but to be constructed, owned, and operated by a stock company of private capitalists, whose plans contemplated the construction of a comparatively low dam without sufficient storage capacity for irrigating a large area above, and having a surplus for Mexico. At that time the United States Government had no reclamation service. Now that conditions have completely changed and there is an alternative plan which claims to be able to accomplish just as much for Mexico and a great deal more for the United States, it becomes necessary to compare these two plans and choose between them. . . .

"The Elephant Butte Dam has the final advantage of being in New Mexico, and subject to the operations of the United States Reclamation Service. The project can be so planned that legislation by Congress can allow New Mexico and Texas to participate. But the extent and manner of this participation is a matter that must be arranged and decided on by Congress and the Department of State. All that the Reclamation Service can do at present is to make plans and estimates for work in the Territory of New Mexico that will not conflict with any action that may be taken by Congress and by the Secretary of State for restoring water to which El Paso Valley, in Texas and Mexico, has laid claim by virtue of ancient prior appropriation and continuous use."

CONGRESS AUTHORIZES CONSTRUCTION OF DAM

By act of February 25, 1905 (33 Stat., 814), Congress extended the provisions of the National Irrigation Act "to the portion of the State of Texas bordering upon the Rio Grande which can be irrigated from a dam to be constructed near Engle, in the territory of New Mexico, on the Rio Grande," and directed that "if there shall be ascertained to be sufficient land in New Mexico and in Texas which can be supplied with the stored water at a cost which shall render the project feasible and return to the reclamation fund the cost of the enterprise, then the Secretary of the Interior may proceed with the work of constructing a dam on the Rio Grande as part of the general system of irrigation, should all other conditions as regards feasibility be found satisfactory." By act of June 12, 1906 (34 Stat., 259), the provisions of the National Irrigation Act were "extended so as to include and apply to the State of Texas."

TREATY OF MAY 21, 1906

Although the third and final decision of the United States Supreme Court in the Rio Grande Dam & Irrigation Co. case was not made until December 13, 1909, the third and final decision of the New Mexico trial court was rendered on May 21, 1903. Subsequent acts of the Federal Government apparently were based on the idea that the decision of May 21, 1903, would not be disturbed.

The negotiations which had been carried on between the United States and Mexico over a period of about a quarter of a century culminated in the treaty of May 21, 1906 (34 Stat. 2953), between the two countries. Under this treaty the United States agreed to deliver to Mexico 60,000 acre-feet of water per annum from the proposed Federal Elephant Butte Reservoir, while Mexico waived all claims for damages and all claims to any other water from the Rio Grande between the Acequia Madre, at El Paso, and Fort Quitman, Tex. A copy of the treaty, marked "Exhibit L," is attached hereto.

By act of March 4, 1907 (34 Stat. 1357), the sum of \$1,000,000 was appropriated from the Treasury toward the construction of the dam required by the treaty, the remaining cost of the dam to be paid from the reclamation fund and collected from the landowners under the Rio Grande project.

While the construction of a division—Leasburg Unit—of the Rio Grande irrigation project was authorized by the Secretary of the Interior on December 2, 1905, the construction of the Elephant Butte Reservoir was not authorized until May 23, 1910, and was not completed until May 13, 1916, 10 years after the treaty was signed.

THE RIO GRANDE FEDERAL IRRIGATION PROJECT

The Elephant Butte Dam, constructed by the Reclamation Service, is 1,585 feet long not including the spillway, 306 feet high from the bedrock foundation to the parapet, and contains 611,700 cubic yards of concrete masonry. In addition to the main structure it was necessary to build an earth-and-rock-fill embankment 2,000 feet long containing 165,700 cubic yards. The reservoir is 45 miles in length with an original storage capacity of 2,638,860 acre-feet of water. This reservoir supplies the 60,000 acre-feet of water provided by the treaty of May 21, 1906, for the irrigation of approximately 25,000 acres of land in the Republic of Mexico, and in addition is intended to irrigate approximately 83,000 acres of land in the Elephant Butte Irrigation district of New Mexico and approximately 67,000 acres of land in the El Paso County Water Improvement District No. 1 of Texas.

FEDERAL APPROPRIATIONS OF WATER FROM RIO GRANDE

By instrument dated January 23, 1906, and filed in the office of the Territorial engineer of New Mexico on the same day, the United States gave notice of appropriation of 730,000 acre-feet of water per annum from the Rio Grande for the proposed Government project. A copy of this notice, marked "Exhibit M," is attached hereto.

By instrument dated April, 1908, and filed in the office of the Territorial engineer of New Mexico on April 8, 1908, the United States gave notice of appropriation of all the unappropriated water of the Rio Grande for the said project. A copy of this notice marked "Exhibit N" is attached hereto.

SECOND MODIFICATION OF EMBARGO, MAY 25, 1906

By order dated May 25, 1906, the Secretary of the Interior modified the embargo on the upper Rio Grande so as to permit approval of rights of way over public lands for irrigation purposes initiated by actual field surveys based upon notices of appropriation of water filed under the laws of Colorado prior to March 1, 1903. This action was not taken until it had been approved by the State Department in letters of March 7, 1906, and May 22, 1906, to the Secretary of the Interior. A copy of the order of May 25, 1906, marked "Exhibit O," is attached hereto.

THIRD MODIFICATION OF EMBARGO, JULY 10, 1906

On July 10, 1906, by letter of that date to the Commissioner of the General Land Office, the embargo was modified by providing that in the future all applications for rights of way should be submitted to the Director of the Geological Survey, "to ascertain whether they will conflict with the obligations of the United States under the treaty with Mexico, recently ratified, or with the Rio Grande or any other project of the Reclamation Service." A copy of the order of July 10, 1906, marked "Exhibit P," is attached hereto.

FOURTH MODIFICATION OF EMBARGO, SEPTEMBER 27, 1906

On September 27, 1906, with the approval of the State Department, the Acting Secretary of the Interior issued an order revoking all prior orders affecting the embargo on the upper Rio Grande in view of the settlement of the water-right question between the United States and Mexico by treaty of May 21, 1906. It was further ordered that all applications involving the use of the waters of the Rio Grande in Colorado and New Mexico should be submitted for a determination by the Geological Survey to ascertain whether favorable action thereon would interfere with any project of the Reclamation Service or with the obligations of the United States under the treaty. A copy of this order, marked "Exhibit Q," is attached hereto.

FIFTH MODIFICATION OF EMBARGO, APRIL 25, 1907

The obligations of the United States under the treaty, the fulfillment of which depended upon the construction and utilization of the Elephant Butte Reservoir, made it necessary for the Secretary of the Interior to determine a policy in dealing with applications for rights of way over the public lands for irrigation purposes, and on April 25, 1907, Secretary of the Interior J. R. Garfield approved a recommendation of the Reclamation Service providing that—

"until the development of irrigation on the upper Rio Grande, in the State of Colorado and the Territory of New Mexico, shall furnish sufficient data to determine the effect of the storage and diversion of water in that vicinity upon the water supply for the Engle Reservoir of the Rio Grande project, no further rights of way be approved which involve the storage or diversion of the waters of the upper Rio Grande and its tributaries, except applications of two kinds: First, those in connection with which there is a showing that the rights of the parties were initiated prior to the beginning of active operations by the Reclamation Service for the Rio Grande project, namely, March 1, 1903; second, applications which involve the diversion or storage of not exceeding 1,000 acre-feet of water per annum.

"When it becomes possible to determine the effect of the approved applications upon the water available for storage for the Rio Grande project it may be possible to allow the use of rights of way to a greater extent than is now proposed."

A copy of the order of April 25, 1907, marked "Exhibit R," is attached hereto.

SIXTH MODIFICATION OF EMBARGO, MARCH 2, 1923

By letter dated March 2, 1923, the Director of the Reclamation Service reviewed the history of the embargo and recommended that that service be authorized to—

"negotiate for the release of specific areas of public land for purposes of water storage under conditions that will best conserve and utilize the water resources and will protect vested rights in all parts of the Rio Grande Basin, such negotiations to be subject to the approval of the Secretary of the Interior, and, prior to such approval, to be subject to the scrutiny of all interested parties."

This recommendation was approved by Secretary of the Interior Albert B. Fall on the date of the letter. A copy of this letter, marked "Exhibit S," is attached hereto.

RIGHTS OF WAY IN COLORADO WHICH HAVE BEEN APPROVED

While the embargo applies to New Mexico as well as to Colorado, there are few irrigation possibilities in the former State that could conflict with the embargo. From a compilation made from the records of the General Land Office in February, 1923, it appears that since the embargo went into effect irrigation rights of way over public lands in the Rio Grande Basin in Colorado have been approved by the Government as follows:

Applicant:	Capacity, acre-feet
Alta Lake Reservoir	414
Balmon Reservoir	40
Botofur Reservoir	8
Bristol Head Reservoir (2)	569
Clemons & Biesler ditch	
Cole Reservoir	19
Colton Creek Alr Line ditch	
Colton Creek Reservoir	76
Continental Reservoir	38,196
Cove Lake Reservoir	10,683
Davis Bros. ditch	
Dear Lake Reservoir	203
Haton Reservoir	95
Lost Lake Reservoir	194
Pouge Reservoir	260
Pond Lily Reservoir	142
Regan Reservoir	1,375
Rio Grande Reservoir & Ditch Co.	48,567
Road Canyon Reservoir	915
San Antonio Reservoir. (See Alta Lake.)	
San Isabel Reservoir (2)	451
San Jose ditch No. 2	
San Luis Valley Reservoir	3,283
Santa Maria Reservoir. (See Rio Grande.)	
Short Creek Reservoir	112
Silver Blance Reservoir	184
Swift Co. Reservoir	139
Tabor ditch No. 1	
Tabor ditch No. 2	
Taos Valley Canal	
Terrace Reservoir	13,000
Wild Cherry Reservoir	684
Total	114,609

OBJECTIONS TO THE EMBARGO

Frequently, since the embargo was made effective in 1896, protests have been filed against its continuance. These have come principally from landowners in the San Luis Valley, in the State of Colorado, where the burden of the embargo is most keenly felt.

On the part of the complainants it has been urged (a) that the embargo is a restriction on the use of water and is in conflict with the enabling act of March 3, 1875 (18 Stat. 474), under which Colorado was admitted to the Union; (b) that the right of way act of March 3, 1891 (26 Stat. 1095), makes a grant, and the Secretary of the Interior has no authority to withhold this grant, as demanded by the embargo; and (c) that diversions in Colorado will not adversely affect the Government project.

On the other hand, the United States contends (a) that the enabling act of March 3, 1875, reserves to the Federal Government full authority over its public lands; (b) that the right of way act of March 3, 1891, gives the Secretary of the Interior a discretion to refuse to approve an application for a right of way when in his opinion it is contrary to the public interest to do so; and (c) that as a condition precedent to the approval of any application it must appear clear that the Government project will not be injured thereby. The subject is discussed at some length by First Assistant Secretary Pierce in the Wagon Wheel Gap Reservoir case (39 L. D. 104).

RIO GRANDE COMMISSION

Complaints against the embargo finally brought forth the suggestion that a commission should be named to make a study of the water supply and draft a form of compact between the States affected under which an equitable allocation of the use of the waters of the Rio Grande would be made to each State. This would follow the precedent of the Colorado River compact signed at Santa Fe, N. Mex., November 24, 1922.

On March 12, 1923, the State of New Mexico enacted a law (N. Mex. Sess. Laws, 1923, p. 175) authorizing the appointment of a representative on such a commission. Under this act the governor appointed Mr. J. O. Seth, an attorney at law, of Santa Fe, N. Mex. A copy of the statute, marked "Exhibit T," is attached hereto.

On March 20, 1923, the State of Colorado enacted a statute (Colo. Sess. Laws, 1923, p. 702) for a similar purpose, and under its authority the governor appointed Mr. Delph E. Carpenter, an attorney at law of Greeley, Colo., to represent that State. A copy of the act, marked "Exhibit U," is attached hereto.

In December, 1923, President Coolidge named Mr. Herbert Hoover as the representative of the United States on the Rio Grande Commission.

It is anticipated that at the January, 1925, session of the Texas Legislature the governor of that State will be authorized to name a representative on the commission.

Dated November 11, 1924.

EXHIBIT A

(Copy of concurrent resolution of April 29, 1890)

Concurrent resolution concerning the irrigation of arid lands in the valley of the Rio Grande River, the construction of a dam across said river at or near El Paso, Tex., for the storage of its waste waters, and for other purposes.

Whereas the Rio Grande River is the boundary line between the United States and Mexico; and

Whereas by means of irrigating ditches and canals taking the water from said river and other causes the usual supply of water therefrom has been exhausted before it reaches the point where it divides the United States of America from the Republic of Mexico, thereby rendering the lands in its valley arid and unproductive, to the great detriment of the citizens of the two countries who live along its course; and

Whereas in former years annual floods in said river have been such as to change the channel thereof, producing serious avulsions and oftentimes and in many places leaving large tracts of land belonging to the people of the United States on the Mexican side of the river and Mexican lands on the American side, thus producing a confusion of boundary, a disturbance of private and public titles to lands, as well as provoking conflicts of jurisdiction between the two Governments, offering facilities for smuggling, promoting the evasion and preventing the collection of revenues by the respective countries; and

Whereas these conditions are a standing menace to the harmony and prosperity of the citizens of said countries, and the amicable and orderly administration of their respective Governments; Therefore,

Resolved by the Senate (the House of Representatives concurring), That the President be requested, if in his opinion it is not incompatible with the public interests, to enter into negotiations with the Government of Mexico with a view to the remedy of all such difficulties as are mentioned in the preamble to this resolution, and such other matters connected therewith as may be better adjusted by agreement or convention between the two Governments. And the President is also requested to include in the negotiations with the Government of Mexico all other subjects of interest which may be deemed to affect the present or prospective relations of both Governments.

EXHIBIT B

(Sections 18, 19, 20, and 21 of the act of March 3, 1891 (26 Stat. 1095), entitled "An act to repeal timber-culture laws, and for other purposes," granting a right of way through the public lands and reservations of the United States for the use of canals, ditches, or reservoirs.)

SEC. 18. That the right of way through the public lands and reservations of the United States is hereby granted to any canal or ditch company formed for the purpose of irrigation, and duly organized under the laws of any State or Territory, which shall have filed or may hereafter file with the Secretary of the Interior a copy of its articles of incorporation and due proofs of its organization under the same to the extent of the ground occupied by the water of the reservoir and of the canal and its laterals, and 50 feet on each side of the marginal limits thereof; also the right to take from the public lands adjacent to the line of the canal or ditch, material, earth, and stone necessary for the construction of such canal or ditch: *Provided*, That no such right of way shall be so located as to interfere with the proper occupation by the Government of any such reservation, and all maps of location shall be subject to the approval of the department of the Government having jurisdiction of such reservation, and the privilege herein granted shall not be construed to interfere with the control of water for irrigation and other purposes under authority of the respective States or Territories.

SEC. 19. That any canal or ditch company desiring to secure the benefits of this act shall, within 12 months after the location of 10 miles of its canal, if the same be upon surveyed lands, and if upon unsurveyed lands within 12 months after the survey thereof by the United States, file with the register of the land office for the district where such land is located a map of its canal or ditch and reservoir; and upon the approval thereof by the Secretary of the Interior the same shall be noted upon the plats of said office, and thereafter all such lands over which such rights of way shall pass shall be disposed of, subject to such right of way. Whenever any person or corporation in the construction of any canal, ditch, or reservoir injures or damages the possession of any settler on the public domain, the party committing such injury or damage shall be liable to the party injured for such injury or damage.

SEC. 20. That the provisions of this act shall apply to all canals, ditches, or reservoirs heretofore or hereafter constructed, whether constructed by corporations, individuals, or association of individuals, on the filing of the certificates and maps herein provided for. If such ditch, canal, or reservoir has been or shall be constructed by an individual or association of individuals, it shall be sufficient for such individual or association of individuals to file with the Secretary of the Interior and with the register of the land office where said land

is located a map of the line of such canal, ditch, or reservoir, as in case of a corporation, with the name of the individual owner or owners thereof, together with the articles of association, if any there be. Plats heretofore filed shall have the benefits of this act from the date of their filing, as though filed under it: *Provided*, That if any section of said canal or ditch shall not be completed within five years after the location of said section, the rights herein granted shall be forfeited as to any uncompleted section of said canal, ditch, or reservoir to the extent that the same is not completed at the date of the forfeiture.

SEC. 21. That nothing in this act shall authorize such canal or ditch company to occupy such right of way except for the purpose of said canal or ditch, and then only so far as may be necessary for the construction, maintenance, and care of said canal or ditch.

EXHIBIT C

(Letter from the Mexican minister, M. Romero, to Secretary of State Richard Olney)

LEGATION OF MEXICO,
Washington, October 21, 1895.

MR. SECRETARY: I have addressed your department on various occasions, communicating the instructions which I have received from my Government to endeavor to secure the adoption of an arrangement designed to remedy the evils which are suffered by the inhabitants of the Mexican bank of the Rio Grande from Paso del Norte to a distance of about 200 kilometers below.

Paso del Norte and the adjacent region down the river are situated in the center of the dry zone and consequently can not depend upon the rains for their agricultural operations, but are obliged to depend upon irrigation. From a report of the Weather Bureau at El Paso, Tex., dated August 25, 1894, a copy of which is herewith inclosed, it appears that the total rainfall registered from August 15, 1893, to August 14, 1894, was 4.97 inches, or next to nothing at all.

The city of Paso del Norte has been in existence for more than three hundred years, and during (almost) all that time its people have enjoyed the use of the water of the Rio Grande for the irrigation of their lands; and as that city and the districts within its jurisdiction did not need more than 20 cubic meters of water per second, which is almost an infinitesimal portion of the amount of water which flowed down the river, even in times of the severest drought, they had sufficient water for their crops until about ten years ago, when a great many trenches were dug in the State of Colorado (especially in the St. Louis Valley) and in the Territory of New Mexico, through which the Rio Grande and its affluents flow. The volume of water thus taken has so greatly diminished that which is brought by the river to Paso del Norte that, when the rains are not very abundant, there is a scarcity of water from the 15th of June of one year till the month of March of the next, which is the very time when water is most needed for the crops.

In the year 1894 the river became dried up entirely by the 15th of June, and only when it rained in New Mexico was there any water in it, and that lasted, of course, for but a short time. In that year the farmers were unable to raise any Indian corn, vegetables, or grapes, and the scarcity of water was such that even the fruit trees began to wither.

This state of things has naturally reduced the price of the land, which was good until that time, to an extremely low figure, and has diminished the population of that region very considerably. In 1875 there was at Paso del Norte, Zaragoza, Tres Jacales, Guadalupe, and San Ignacio, a population of about 20,000, which, in 1894, was reduced to half that number. Farms no longer produced enough to support their owners, and the situation of the people is wretched in the extreme, because, as they are unable to raise vegetables or other articles necessary to support life, they are obliged to send for them a distance of from 500 to 1,000 miles, their cost being thus increased while the people's means of paying for what they need are greatly diminished.

The United States Congress recognized the serious injury suffered by the Mexicans in a concurrent resolution approved April 29, 1890, whereby it recommended to the President of the United States to enter into negotiations with the Mexican Government with a view to deciding upon such means as might tend to remedy the difficulties occasioned by the scarcity of water in the Rio Grande from the point where it serves as the boundary between Mexico and the United States of America.

The Mexican Government, to which the United States minister in Mexico communicated the aforesaid resolution in pursuance of the instructions of his Government, authorized me to take steps here to secure the arrangement proposed in the resolution, and I so informed the Department of State in a note dated October 26, 1893. It has not, however, thus far been possible to make much progress in this matter.

The Government of Mexico thinks that according to Article VII of the treaty of Guadalupe Hidalgo of February 2, 1848, the inhabitants of one country can not, without the consent of the other, build any

works that obstruct or impede navigation in international rivers, and nothing could impede it more absolutely than works which wholly turn aside the water of those rivers. It is true that Article IV of the treaty of Mesilla of December 30, 1853, annulled Article VII of the treaty of Guadalupe Hidalgo, but at the same time it left its stipulations in force, as far as the Rio Grande is concerned, from the point where that river begins to be the boundary line between the two countries, and, moreover, by Article V of the convention of November 12, 1884, the right of both countries to that river was again recognized, and it was again stipulated that one could not construct any works that obstructed navigation therein without the consent of the other.

From a report of the Assistant Quartermaster General addressed to the General in Chief of the United States Army and dated Brazos de Santiago, Tex., September 5, 1850, it appears that Captain Lowe, United States Army, ascended it with a vessel, reaching a point several kilometers above Paso del Norte, which shows that it was navigable at that time.

Still, even supposing, without admitting it, that the Mexican Government's interpretation of the treaties were not well founded, and even if there were no stipulation on this subject between the two countries, the principles of international law would form a sufficient basis for the rights of the Mexican inhabitants of the bank of the Rio Grande. Their claim to the use of the water of that river is incontestable, being prior to that of the inhabitants of Colorado by hundreds of years, and, according to the principles of civil law, a prior claim takes precedence in case of dispute.

The circumstance that that river serves as the boundary between the two countries, and that it is consequently an international river, gives it a special character, which considerably restricts the freedom and rights of the inhabitants of both banks, and does not permit them to construct works that reduce the volume of water in the river to such an extent that it is no longer navigable, and even, at last, is dried up entirely.

I should fear to cast a reflection upon your knowledge of such matters if I were to quote the various doctrines laid down by writers on international law which are applicable to the present case and which support my asseverations.

These considerations, and the terrible situation in which the inhabitants of Paso del Norte and the neighboring districts now are, render the Government of Mexico exceedingly desirous to conclude an arrangement with that of the United States on this subject as speedily as may be possible; and I therefore repeat the request which I have verbally made on several occasions, viz, that the antecedents may be examined, and that the necessary steps may be taken to effect an arrangement with the Government of Mexico that will facilitate the fulfillment of international obligations and remedy existing evils as far as possible.

Be pleased to accept, etc.

M. ROMERO.

EXHIBIT D

(Letter dated November 30, 1896, from Secretary of State Richard Olney to Secretary of the Interior D. R. Francis)

DEPARTMENT OF STATE,
Washington, November 30, 1896.

The honorable the SECRETARY OF THE INTERIOR.

SIR: I have the honor to invite your attention to the inclosed copy of a letter dated November 17, 1896, and accompanying papers from Col. Anson Mills, of the United States Army, who is a member of a joint commission appointed by the United States and the Republic of Mexico to report upon the best and most-feasible mode—whether by a dam across the Rio Grande River near El Paso, Tex., or otherwise—of so regulating the use of the waters of the Rio Grande River as to secure to each country and its inhabitants their legal and equitable rights and interests in said waters for irrigation purposes.

This examining board was appointed in pursuance of a concurrent resolution of Congress, approved April 29, 1890, which recites the fact that by reason of the irrigating ditches and canals leading from the upper waters of the Rio Grande in the State of Colorado and Territory of New Mexico, an insufficient quantity of water remains in the river to irrigate the land adjacent to the river after it leaves New Mexico, thereby rendering the lands arid and unproductive, to the great detriment of the citizens of both countries who live along the Rio Grande below the line of New Mexico. The resolution then authorizes the President to enter into negotiations with the Government of Mexico with a view to remedying this condition. I inclose a copy of the resolution.

The duty imposed upon this board of examiners was to ascertain—

- (1) The amount of water taken from the Rio Grande by the irrigation canals constructed in the United States.
- (2) The average amount of water in said river year by year before the construction of said irrigation canals and since their construction.

(3) The best and most practicable mode of regulating the use of the waters of the Rio Grande so as to secure to each country and to the border landowners on both sides of the river their legal and equitable rights and interests in said waters.

August 4 last the Mexican minister to the United States transmitted to this department a copy of a petition forwarded by the inhabitants of the city of Paso del Norte, Mexico, calling attention to the distressing situation in the towns on the Mexican side of the Rio Grande caused by the immoderate use of the waters of the river for irrigation purposes by the adjacent owners in the United States above the boundary line. This petition states that the efforts of the two Governments to remedy this condition will be fruitless if, in addition to the 40 dams already existing in Colorado, the Rio Grande Irrigation & Land Co. (Ltd.) should be permitted to construct, as it proposes, a dam across the Rio Grande at Elephant Butte, N. Mex. The Mexican minister said that his Government regarded this petition as well founded, and requested the United States to adopt such measures as may be in its power to put a stop to the works undertaken by the Rio Grande Irrigation & Land Co. (Ltd.) until the effect of that company's proposed works upon the practicability of the international scheme could be considered by the examining board and determined upon to the satisfaction of the two Governments. A copy of the Mexican petition was sent to Colonel Mills for his suggestions. The inclosed letter of November 17, 1896, to which your attention is invited, is his reply.

Colonel Mills says that the proposed dam and reservoir of the Rio Grande Irrigation & Land Co. (Ltd.) is located about 125 miles above El Paso, and that it will be useless at that distance to furnish water for irrigation in the vicinity of El Paso and below. He says, furthermore, that he is informed that the same company has on file in the Interior Department applications for two additional dams and reservoirs—one at Rincon, N. Mex., about 100 miles above El Paso, and another at Fort Seldon, about 60 miles above; also that at the latter place a man named Ernest Dale Owen has applied for permission to erect a dam and reservoir.

It is understood that the Rio Grande Irrigation & Land Co. (Ltd.) acquired its right to build the reservoir it is now constructing from a corporation existing under the laws of New Mexico under the name of the Rio Grande Dam & Irrigation Co., to which company the right of way for the construction of the storage dam at Elephant Butte was granted by the Secretary of the Interior February 1, 1895, under the provisions of the act of March 3, 1891.

Colonel Mills gives it as his opinion that the probable flow of water in the river will be sufficient to supply the proposed international reservoir after deducting for all the small reservoirs now in operation and likely to be constructed above, but that the flow will not be sufficient to supply the proposed international reservoir and allow for the supply of the proposed reservoir of the Rio Grande Irrigation & Land Co. (Ltd.) at Elephant Butte or any other reservoirs upon the same scale, and that the scheme of building an international reservoir will have to be abandoned unless the completion of the works proposed by the Rio Grande Irrigation & Land Co. (Ltd.) and by Owen is prevented. Colonel Mills' letter suggests that the rights obtained from the United States by the Rio Grande Irrigation & Land Co. (Ltd.) may be subject to conditions in favor of the rights of those who live below, which, on a proper showing, might enable the Secretary of the Interior to cancel the grant made to that company. The other applications for permission to build reservoirs for storage of the waters of the Rio Grande mentioned by Colonel Mills have not, it is assumed, yet been finally acted upon.

The circumstances being as above stated, I desire to suggest the propriety of declining to grant any additional rights to build dams and reservoirs as applied for—certainly until the negotiations now pending between Mexico and the United States have reached a final conclusion. I desire also to suggest that an investigation may be made of the rights already granted to the Rio Grande Irrigation & Land Co. (Ltd.) and of any acts or proceedings done by that company by virtue of such rights, with a view to ascertaining whether there is any legal power to cancel those rights, and, if the power exists, whether it can be exercised without injustice to the parties directly and indirectly interested in that enterprise.

With a request for your earliest practicable attention to this matter,

I have the honor to be, sir, your obedient servant,

RICHARD OLNEY.

EXHIBIT E

(Order, dated December 5, 1896, of the Secretary of the Interior, placing the embargo on the upper Rio Grande)

DEPARTMENT OF THE INTERIOR,
Washington, December 5, 1896.

THE COMMISSIONER OF THE GENERAL LAND OFFICE.

SIR: Your office is hereby directed to suspend action on any and all applications for right of way through public lands for the purpose

of irrigation by using the waters of the Rio Grande River or any of its tributaries in the State of Colorado or in the Territory of New Mexico until further instructed by this department.

Very respectfully,

D. R. FRANCIS, *Secretary*.

EXHIBIT F

(Letter dated December 19, 1896, from the Secretary of the Interior to the Secretary of State)

DEPARTMENT OF THE INTERIOR,
Washington, December 19, 1896.

The honorable the SECRETARY OF STATE.

SIR: I have the honor to submit, in response to your communication of November 30, the inclosed paper, prepared under the direction of the Assistant Attorney General, which fully sets forth the claims and contentions of the Rio Grande Dam & Irrigation Co., and discusses at considerable length the laws of the State of Colorado and Territory of New Mexico relating to waters, and the acts of Congress and rulings of this department relating to irrigation.

The application of the Rio Grande Dam & Irrigation Co. was approved by my predecessor on the 1st day of February, 1895. In my opinion I have no right under the law to revoke this approval. It has been decided by the Supreme Court of the United States in the case of *Noble v. Union River Logging Railroad Co.* (147 U. S. 165) that the approval by the Secretary of the Interior of a right of way for railroad purposes over the public land can not be revoked by his successor, and upon the principle therein declared I deem it beyond my authority to revoke my predecessor's approval of the map filed by the Rio Grande Dam & Irrigation Co.

Assuming that I had such power, I submit to you whether or not the exercise of it would be proper in view of the opinion of the Attorney General of your department under date of December 12, 1895. (21 Op. Att. Gen., p. 274.)

It is not the duty of this department to protect the citizens of the United States against unlawful appropriation of the waters of the States and Territories by the inhabitants thereof, and if no treaty obligations of the Government are involved, I do not believe that I should assume to interfere.

Since the receipt of your communication, complaints have been made to this department by parties now having applications for irrigation privileges pending for the vacation of my order of December 6 upon the ground that the effect of such order is to imperil their rights by subordinating them to the claims of persons who may hereafter, for lawful or nefarious purposes, enter lands along the rights of way applied for. Very grave inconvenience would arise if such claims are filed, and I therefore submit for your consideration whether or not there is further need for continuing the suspension heretofore declared.

Immediately upon receipt of your communication I addressed to the Commissioner of the General Land Office directions that he suspend all applications for right of way through the public lands for the purposes of irrigation by using the waters of the Rio Grande River or any of its tributaries in the State of Colorado or the Territory of New Mexico until further instructed by this department. A copy of said order is hereto attached.

Very respectfully,

D. R. FRANCIS, *Secretary*.

EXHIBIT G

(Letter of January 11, 1897, from the Secretary of State to the Secretary of the Interior)

DEPARTMENT OF STATE,
Washington, January 11, 1897.

SIR: In your letter of December 19, 1896, relative to the reservoir which the Rio Grande Dam & Irrigation Co., or another corporation claiming the rights of that company, intends to build at Elephant Butte, N. Mex., you informed me that you had, in compliance with my suggestion of November 30, 1896, directed the Commissioner of the General Land Office to suspend action on any and all applications for right of way through public lands for the purpose of irrigation by using the waters of the Rio Grande River or any of its tributaries in the State of Colorado or in the Territory of New Mexico until further instructions from you. The request of this department, upon which your order was based, was made at the suggestion of Col. Anson Mills, a copy of whose letter, dated October 29, 1896, was transmitted to you October 31 of that year.

The attorneys of parties who have made application to your department for the approval of rights of way to build dams and reservoirs on the Pecos River have made verbal complaint to this department that the order has been applied by the General Land Office to the river Pecos, as well as to the tributaries of the Rio Grande which join that river above El Paso. Upon receipt of this complaint

I made inquiry of Colonel Mills as to whether his request that action be suspended on all applications for permits to build additional dams across the Rio Grande or its tributaries was intended to apply to the Pecos, and whether the building of additional reservoirs on that river would affect the plan which this department has under consideration of building an international reservoir at El Paso. He has replied, under date of January 7, 1897, that he had not intended to stop the granting of permits for reservoirs on the Pecos or on any stream which empties into the Rio Grande below the proposed location of the international reservoir. He does not believe that further use of the waters of the Pecos for irrigation purposes will affect the international question pending between the United States and Mexico, as that river falls into the Rio Grande at a point where the diminution of its waters will have little, if any, perceptible effect upon the volume passing downward from that point.

I have the honor, therefore, to suggest that the order to the Commissioner of the General Land Office, referred to in your letter to me of December 19, 1896, be limited in its application to the tributaries of the Rio Grande which pour into that river above the point where it becomes the boundary between the United States and Mexico, and that it be no longer applied to applications for dams and reservoirs on the Pecos.

There is another phase of this question which, it has occurred to me, may have an important bearing upon the rights of parties now applying for permission to erect dams across the Rio Grande, and also upon the international question involved. I have information which indicates that the Rio Grande River in some parts above the international boundary line is and has been used as a waterway for navigation between the United States and Mexico and possibly between the State of Colorado and the Territory of New Mexico. If it be true that this stream in its natural condition is capable of use for the transportation of commerce between two States of the Union or between the United States and a foreign country, the river is a navigable water of the United States and as such subject to the laws of Congress enacted for the maintenance, protection, and preservation of the navigable waters of the United States. One of the principal matters of complaint by Mexico is that the diversion of the upper waters of the Rio Grande for irrigation purposes has affected the usefulness of that stream as a waterway for commerce.

The Attorney General, in his opinion of December 12, 1895 (21 Op. 274), held that the river was not navigable above the boundary in the sense of the treaty between the United States and Mexico; but the question here is whether it is navigable within the meaning of the laws of the United States. The conditions of navigability within the meaning of our statutes are well defined in the decisions of the Federal courts. Many of these are referred to in 10 Op. Att. Gen. 101.

If the Rio Grande River is in the part under consideration a navigable water of the United States, the question arises whether the erection of the proposed dams across it will not interfere with its navigability and bring those dams within the prohibition of the statutes enacted for the preservation of navigable waters. I refer particularly to the act of September 19, 1890, sections 7 and 10 (26 Stat. L. 426), and to the act of July 13, 1892, section 3 (27 Stat. L. 110). It is true that the enforcement of these statutes devolves primarily upon the Secretary of War and that at first view it may not appear to be a part of the duty of the Secretary of the Interior to take care of the navigability of the streams on the public lands, but in a case where the act of the Secretary of the Interior approving the right of way to build a dam across a river on the public lands may operate, as it must if the river is a navigable water of the United States, as a grant of Executive sanction to a proceeding which is in violation of law, it would seem to be the duty and within the jurisdiction of the Secretary of the Interior to ascertain before sanctioning the erection of the dam whether it would constitute an obstruction to a navigable water of the United States and be within the prohibition of the statutes.

As the erection of the dams under consideration is now the subject matter of a complaint of the Government of Mexico, I feel it my duty to lay this question before you in order that you may determine in the first place whether you have the power and, in the second place, whether it is a part of your duty to withhold approval of the pending applications for rights of way to build dams across the Rio Grande River and its tributaries above the boundary line until the applicants have satisfied you that the river in the part affected by these dams is not a navigable water of the United States or that the dams will not interfere with the navigation of the river. It must be observed that the obstruction to navigation may result not only from the intervention of the dams across the course of the river but also from the diversion of the waters, leaving an insufficient quantity below the dam for the purposes of navigation.

I have, etc.,

RICHARD OLNEY.

EXHIBIT H

(Order, dated January 13, 1897, of the Secretary of the Interior, modifying the embargo on the upper Rio Grande)

DEPARTMENT OF THE INTERIOR,
Washington, January 13, 1897.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

SIR: By departmental letter of December 5, 1896, you were directed to suspend action on all applications for right of way for irrigation purposes by the use of the waters of the Rio Grande or any of its tributaries in Colorado or New Mexico till further instructed.

I now hereby modify the above order by limiting its application, so far as the tributaries of the Rio Grande are involved, to those tributaries which empty into that river above the point where it becomes the boundary between the United States and Mexico.

Very respectfully,

D. R. FRANCIS, Secretary.

EXHIBIT I

(Letter dated January 13, 1897, from the Secretary of State to the Secretary of War)

DEPARTMENT OF STATE,
Washington, January 13, 1897.

The honorable the SECRETARY OF WAR.

SIR: August 4, 1896, the Mexican minister in Washington presented to this department the inclosed petition from Mexican citizens in and about Paso del Norte, Mexico, protesting against the immoderate use of the waters of the Rio Grande River and its tributaries by residents of Colorado and New Mexico. The Mexican minister called attention to article 7 of the treaty of Guadalupe Hidalgo, of February 2, 1848; to article 1, last clause, of the treaty of December 30, 1853; to article 3 of the convention of November 12, 1884; and to article 5 of the convention of March 1, 1889, between the United States and Mexico, and relying upon those treaty provisions, requested that the United States Government prevent the erection and operation of a dam by a company known to the complainants as the Rio Grande Irrigation Co., at Elephant Butte, N. Mex., about 125 miles above Paso del Norte, designed to store all the surplus waters of the river and turn it into irrigating ditches and canals.

The complaint of Mexico was sent August 8, 1896, to Col. Anson Mills, of the United States Army, who was then engaged, under the direction of this department, in an investigation of the volume of water in the Rio Grande and the feasibility of a plan under consideration by both Governments of erecting an international reservoir. Colonel Mills reported November 17, 1896, the erection of the dam at Elephant Butte and of other dams below there, which the same company contemplated building, would stop practically all the water coming into the Rio Grande above those points. The complaint and Colonel Mills's report were referred to the Secretary of the Interior November 30, 1896, with a view to ascertaining whether there was any legal power to cancel the rights claimed by the said Irrigation company, and if the power to cancel existed, whether it could be exercised without injustice to the parties directly or indirectly interested in the enterprise. The Secretary of the Interior had been previously requested to suspend temporarily all applications for rights of way to build dams across the river in all pending cases. December 5, 1896, he suspended the applications not already approved, but in a letter of December 19, said, with reference to the dam at Elephant Butte to be built by the corporation referred to in the Mexican complaint, the proper name of which is "The Rio Grande Dam & Irrigation Co.," that his predecessor had approved the application of that company for a dam and reservoir at Elephant Butte, and that he had no power to revoke his predecessor's action. The law under which the Secretary of the Interior acts in approving rights of way and maps for dams and reservoirs on public lands is contained in sections 18 to 21 of the act of March 3, 1891. (26 Stat. L. 1095, 1101, and 1102.)

The Secretary of the Interior is, for the reason above given, powerless to intervene or inquire further into the lawfulness of the proposed dam across the Rio Grande at Elephant Butte. The act of July 13, 1892 (27 Stat. L. 88-100), provides, however, in section 3, amending section 7 of the act of September 19, 1890:

"That it shall not be lawful to build any wharf, pier, dolphin, boom, dam, weir, breakwater, bulkhead, jetty, or structure of any kind outside established harbor lines, or in any navigable waters of the United States where no harbor lines are or may be established, without the permission of the Secretary of War." * * *

As the proposed erection of this dam across the Rio Grande at Elephant Butte has given rise to an important and international question, I have the honor to inquire whether the parties engaged in this enterprise, or others whose rights they enjoy, have obtained from you, as Secretary of War, the permission required by the act first above quoted. If your permission has not been obtained for the placing of

this obstruction across the Rio Grande River, I have the honor to request that you will ascertain whether the river in the parts which will be affected by the dam and the diminution of the volume of water consequent upon its erection is not a navigable water of the United States within the meaning of the statutes above quoted, so as to make your sanction a necessary prerequisite to the lawful erection of the dam. I have received information tending to show that the Rio Grande River is navigable for commercial purposes between the United States and Mexico, and possibly between the State of Colorado and the Territory of New Mexico. It probably will not float water craft of great size, but I understand that it has been used in the timber commerce of the country, and is, in its natural state, capable of regular, periodical, if not perennial, use as a waterway for commercial traffic between the two States of the Union or between the United States and a foreign country. If that be true, the river is a navigable stream of the United States within the meaning of the laws for the protection of such waters.

In case it should be ascertained as a fact that the Rio Grande Dam & Irrigation Co., or persons exercising the rights obtained by that company, are without the permission required by the act of July 13, 1892, building or about to build a dam across a navigable river of the United States in a manner that will obstruct or impair the use of that river as a highway for commerce between the United States and a foreign country, or between States of the Union, I have the honor to request that you will adopt such measures as are most effective to open the river and keep it open to such navigation as it is naturally capable of affording for commercial traffic between the States or between any portion of the United States and Mexico.

Section 10 of the act of September 19, 1890, is a general provision enforceable in the courts under the direction of the Attorney General of the United States, and his aid would necessarily be invoked by you should you determine to put this provision of law in force against the Rio Grande Dam & Irrigation Co.'s obstruction of the river at Elephant Butte. In this connection I desire to call your attention to an opinion of the Attorney General delivered December 12, 1895 (20 Op. Atty. Gen. 274), in which he holds that the Rio Grande is not a navigable river above a point 150 miles below Paso del Norte in so far as the treaty obligations of the United States with Mexico are concerned. He did not consider the question whether the river where it lies wholly in the United States is a navigable water of the United States within the meaning of the Federal Statutes. This latter question is, I believe, a new one, dependent upon facts not yet fully ascertained, facts which I have no doubt your department can readily obtain and furnish to the Attorney General in case they, in your opinion, justify or require the intervention of his office.

To put you in a more complete possession of the facts relating to the dam at Elephant Butte, I inclose copy of the letter of the Secretary of the Interior, dated December 19, 1896, referred to above, and of the accompanying report of the assistant attorney general for the Interior Department. From these papers it appears that the Secretary of the Interior has acted upon the assumption that the Rio Grande River above the boundary line is not a navigable river of the United States, without requiring proof or otherwise ascertaining that it is not navigable.

I have the honor to be, sir, your obedient servant,

RICHARD OLNEY.

EXHIBIT J

(Bill to provide for an international dam and distribution of waters of Rio Grande, introduced in Congress in 1909)

A bill to provide for the equitable distribution of the waters of the Rio Grande River between the United States of America and the United States of Mexico and for the purpose of building an international dam and reservoir on said river at El Paso, Tex.

Whereas the Republic of Mexico has made reclamation of the United States to the Secretary of State, through its legation in Washington, for a large indemnity for water alleged to have been taken and used by the citizens of the United States in Colorado and New Mexico, on the headwaters of the Rio Grande to which citizens of Mexico had right by prior appropriation, in violation of the spirit of article 7 of the treaty of peace of Guadalupe Hidalgo; and

Whereas an investigation directed jointly by the State Departments of the two Republics and carried out by the International Boundary Commission, organized under the convention of March 1, 1889, discovered the fact that the flow of the river has gradually diminished for the past 15 years in an increasing ratio, so that the ordinary summer's flow in the lower river is inadequate to supply the wants of irrigation, domestic, and other purposes, as has been supplied in previous years; and

Whereas a remedy has been proposed by the two Governments for this deficiency by impounding in an international dam and reservoir near the boundary line between the two Republics the annual flood waters of the spring season, which are greatly in excess of the wants

of irrigation, domestic, and other purposes in those seasons, such waters to be equitably distributed between the two Republics; and

Whereas it was afterwards discovered that other like projects of large dams and reservoirs were contemplated above said proposed international dam and reservoir; and

Whereas the two Governments jointly directed the International Boundary Commission hereinbefore mentioned to investigate and report upon the feasibility of the project; and

Whereas said commission reported that, in their judgment, the project was feasible, but that the flow was insufficient for more than one reservoir; and

Whereas the two Governments were unable to agree upon the construction of said proposed international dam and reservoir until some method of restraining the building and use of other dams and reservoirs which would destroy the usefulness of said proposed international dam and reservoir has been devised; Now therefore be it

Enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That nothing in the acts of March 3, 1891, January 21, 1895, February 26, 1897, and May 11, 1898, shall be so construed as to authorize the appropriation and storage of the waters of the Rio Grande or its tributaries in the Territory of New Mexico, to which others have right by prior appropriation, and every person and every corporation which shall be guilty of thus unlawfully appropriating and storing said waters in this act mentioned shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding \$5,000 or by imprisonment (in the case of a natural person) not exceeding one year, or by both such punishments, in the discretion of the court. The unlawful appropriating and storing of water in this act mentioned may be prevented, and the dam, reservoir, or other means used for impounding the water may be removed by the injunction of any circuit court exercising jurisdiction in any district in which said water may be appropriated or stored, and proper proceedings in equity to this end may be instituted under the direction of the Attorney General of the United States.

SEC. 2. That the Secretary of State is hereby authorized to proceed with the consummation of the proposed treaty between the United States of America and the United States of Mexico, and if the United States of Mexico shall accept the construction of the proposed dam and reservoir, with the conditions that the flood water impounded by it shall be equally distributed between the two countries as liquidation of all past and future claims for water appropriated in the past or to be appropriated in the future by citizens of the United States otherwise than by impounding it in large dams and reservoirs in New Mexico, then the Secretary of State is further authorized to proceed with the construction of said dam and reservoir according to the plans and specifications submitted in the report of the International Boundary Commission, as published in Senate Document No. 229, Fifty-fifth Congress, second session, and the sum of \$2,317,113.36 is hereby appropriated for that purpose.

EXHIBIT K

(Letter dated June 27, 1904, from the Secretary of State to the Secretary of the Interior)

WASHINGTON, D. C., June 27, 1904.

MY DEAR MR. SECRETARY: I have this day sent you a copy of a note from the Mexican ambassador in relation to the diversion of the waters of the Rio Grande. It has been informally suggested that a practical solution of this question might be accomplished under the national irrigation act.

I am informed that the engineers of the Hydrographic Bureau of the Geological Survey have already made some examination of the Rio Grande drainage basin with a view to devising some plan to provide a water supply for the irrigation of all the lands of the valley. I am also informed that the reservoir site known as Elephant Butte has been set aside as a reclamation project. It has been suggested that by establishing the main storage reservoir at Elephant Butte in New Mexico and a secondary reservoir near El Paso to catch the surplus flood waters and back up the overflow of the river, which is said to be heavy and perpetual, a sufficient supply of water can be obtained for irrigation in New Mexico, Texas, and Mexico. It has occurred to me that you might be able under the national irrigation act to provide an ultimate solution of the question presented by the Mexican ambassador. If so, I should be happy to cooperate in accomplishing that desirable object. I have accordingly transmitted to you a copy of the note of the Mexican ambassador, and have asked for any suggestion which you may be pleased to make in order to aid the department in making an answer to the ambassador's note.

Sincerely yours,

HON. ETHAN ALLEN HITCHCOCK,
Secretary of the Interior.

JOHN HAY.

EXHIBIT L

(Treaty between the United States of America and the United States of Mexico, dated May 21, 1906 (34 Stat. 2953), concerning irrigation from the Rio Grande)

The United States of America and the United States of Mexico being desirous to provide for the equitable distribution of the waters of the Rio Grande for irrigation purposes, and to remove all causes of controversy between them in respect thereto, and being moved by considerations of international comity, have resolved to conclude a convention for these purposes and have named as their plenipotentiaries:

The President of the United States of America, Elihu Root, Secretary of State of the United States; and

The President of the United States of Mexico, His Excellency Señor Don Joaquín D. Casasus, ambassador extraordinary and plenipotentiary of the United States of Mexico at Washington;

Who, after having exhibited their respective full powers, which were found to be in good and due form, have agreed upon the following articles:

"ARTICLE 1. After the completion of the proposed storage dam near Engle, N. Mex., and the distributing system auxiliary thereto, and as soon as water shall be available in said system for the purpose, the United States shall deliver to Mexico a total of 60,000 acre-feet of water annually in the bed of the Rio Grande at the point where the headworks of the Acequia Madre, known as the Old Mexican Canal, now exist above the city of Juarez, Mexico.

"ART. 2. The delivery of the said amount of water shall be assured by the United States and shall be distributed through the year in the same proportions as the water supply proposed to be furnished from the said irrigation system to lands in the United States in the vicinity of El Paso, Tex., according to the following schedule, as nearly as may be possible:

	Acre-feet per month	Corresponding cubic feet of water
January.....	0	0
February.....	1,000	47,480,400
March.....	5,400	257,837,600
April.....	12,000	522,720,000
May.....	12,000	522,720,000
June.....	12,000	522,720,000
July.....	8,180	356,320,800
August.....	4,370	190,357,200
September.....	3,270	142,441,200
October.....	1,090	47,480,400

"In cases, however, of extraordinary drought or serious accident to the irrigation system in the United States the amount delivered to the Mexican Canal shall be diminished in the same proportion as the water delivered to lands under said irrigation system in the United States.

"ART. 3. The said delivery shall be made without cost to Mexico, and the United States agrees to pay the whole cost of storing the said quantity of water to be delivered to Mexico, of conveying the same to the international line, of measuring the said water, and of delivering it in the river bed above the head of the Mexican Canal. It is understood that the United States assumes no obligation beyond the delivering of the water in the bed of the river above the head of the Mexican Canal.

"ART. 4. The delivery of water as herein provided is not to be construed as a recognition by the United States of any claim on the part of Mexico to the said waters; and it is agreed that in consideration of such delivery of water Mexico waives any and all claims to the waters of the Rio Grande for any purpose whatever between the head of the present Mexican Canal and Fort Quitman, Tex., and also declares fully settled and disposed of, and hereby waives, all claims heretofore asserted or existing, or that may hereafter arise or be asserted, against the United States on account of any damages alleged to have been sustained by the owners of land in Mexico by reason of the diversion by citizens of the United States of waters of the Rio Grande.

"ART. 5. The United States in entering into this treaty does not thereby concede, expressly or by implication, any legal basis for any claims heretofore asserted or which may be hereafter asserted by reason of any losses incurred by the owners of land in Mexico due or alleged to be due to the diversion of the waters of the Rio Grande within the United States; nor does the United States in any way concede the establishment of any general principle or precedent by the concluding of this treaty. The understanding of both parties is that the arrangement contemplated by this treaty extends only to the portion of the Rio Grande which

forms the international boundary, from the head of the Mexican Canal down to Fort Quitman, Tex., and in no other case.

"ART. 6. The present convention shall be ratified by both contracting parties in accordance with their constitutional procedure, and the ratifications shall be exchanged at Washington as soon as possible."

In witness whereof the respective plenipotentiaries have signed the convention both in the English and Spanish languages and have thereunto affixed their seals.

Done in duplicate at the city of Washington this 21st day of May, 1906.

EXHIBIT M

(Notice of appropriation of 750,000 acre-feet of water per annum from the Rio Grande, filed by the United States in the office of the Territorial engineer of New Mexico on January 23, 1906)

DEPARTMENT OF THE INTERIOR,
UNITED STATES RECLAMATION SERVICE,
Carlsbad, N. Mex., January 23, 1906.

Mr. DAVID L. WHITE,
Territorial Irrigation Engineer, Santa Fe, N. Mex.

DEAR SIR: The United States Reclamation Service, acting under authority of an act of Congress known as the reclamation act, approved June 17, 1902 (32 Stat. 358), proposes to construct within the Territory of New Mexico certain irrigation works in connection with the so-called Rio Grande project. The operation of the works in question contemplates the diversion of water from the Rio Grande River.

Section 22 of chapter 102 of the laws enacted in 1905 by the Thirty-sixth Legislative Assembly of the Territory of New Mexico, an act entitled "An act creating the office of Territorial irrigation engineer, to promote irrigation development and conserve the waters of New Mexico for the irrigation of lands, and for other purposes," approved March 16, 1905, reads as follows:

"Whenever the proper officers of the United States authorized by law to construct irrigation works shall notify the Territorial irrigation engineer that the United States intends to utilize certain specified waters, the waters so described and unappropriated at the date of such notice shall not be subject to further appropriations under the laws of New Mexico, and no adverse claims to the use of such waters, initiated subsequent to the date of such notice, shall be recognized under the laws of the Territory, except as to such amount of the water described in such notice as may be formally released in writing by an officer of the United States thereunto duly authorized."

In pursuance of the above statute of the Territory you are hereby notified that the United States intends to utilize the following-described waters, to wit:

A volume of water equivalent to 750,000 acre-feet per year, requiring a maximum diversion or storage of 2,000,000 miner's inches, said water to be diverted or stored from the Rio Grande River at a point described as follows:

Storage dam about 9 miles west of Engle, N. Mex., with capacity for 2,000,000 acre-feet, and diversion dams below in Palomas, Rincon, Mesilla, and El Paso Valleys, in New Mexico and Texas.

It is therefore requested that the waters above described be withheld from further appropriation and that the rights and interests of the United States in the premises be otherwise protected as contemplated by the statute above cited.

Very truly yours,

B. M. HALL,
Supervising Engineer.

EXHIBIT N

(Notice of appropriation of all the unappropriated water of the Rio Grande, filed by the United States in the office of the Territorial engineer of New Mexico on April 8, 1908)

DEPARTMENT OF THE INTERIOR,
UNITED STATES RECLAMATION SERVICE,
Phoenix, Ariz., April —, 1908.

Mr. VERNON L. SULLIVAN,
Territorial Engineer, Santa Fe, N. Mex.

DEAR SIR: Claiming and reserving all rights under our former notice of January 23, 1906, addressed to David L. White, Territorial engineer of New Mexico, which said notice advised him of the intention of the United States to use the waters of the Rio Grande for the purpose of irrigation, and is now filed in your office, I do now hereby give you the following notice in addition to said former notice and supplemental thereto:

The United States, acting under authority of an act of Congress, known as the reclamation act, approved June 17, 1902 (32 Stat. 358), proposes to construct within the Territory of New Mexico certain irrigation works in connection with the so-called Rio Grande project. The operation of the works in question contemplates the diversion of the water of the Rio Grande River.

Section 40 of chapter 49 of the laws enacted in 1907 by the Thirty-seventh Legislative Assembly of the Territory of New Mexico, an act entitled "An act to conserve and regulate the use and distribution of the waters of New Mexico; to create the office of Territorial engineer; to create a board of water commissioners, and for other purposes," approved March 19, 1907, reads as follows:

"Whenever the proper officers of the United States authorized by law to construct works for utilization of waters within the Territory, shall notify the Territorial engineer that the United States intends to utilize certain specified waters, the waters so described, and unappropriated, and not covered by applications or affidavits duly filed or permits as required by law, at the date of such notice, shall not be subject to a further appropriation under the laws of the Territory of New Mexico for a period of three years from the date of said notice, within which time the proper officers of the United States shall file plans for the proposed work in the office of the Territorial engineer for his information, and no adverse claim to the use of the water required in connection with such plans, initiated subsequent to the date of such notice, shall be recognized under the laws of the Territory, except as to such amount of water described in such notice as may be formally released in writing by an officer of the United States thereunto duly authorized: *Provided*, That in case of failure to file plans of the proposed work within three years, as herein required, the waters specified in the notice given by the United States to the Territorial engineer shall become public water, subject to general appropriations."

In pursuance of the above statute of the Territory you are hereby notified that the United States intends to utilize the following-described waters, to wit:

All the unappropriated water of the Rio Grande and its tributaries, said water to be diverted or stored from the Rio Grande River at a point described as follows:

Storage dam about 9 miles west of Engle, N. Mex., with capacity for 2,000,000 acre-feet, and diversion dams below in Palomas, Rincon, Mesilla, and El Paso valleys in New Mexico and Texas.

It is therefore requested that the waters above described be withheld from further appropriation and that the rights and interests of the United States in the premises be otherwise protected as contemplated by the statute above cited.

Very truly yours,

LOUIS C. HILL,
Supervising Engineer.

EXHIBIT O

(Order dated May 25, 1906, of the Secretary of the Interior, modifying the embargo on the upper Rio Grande)

DEPARTMENT OF THE INTERIOR,
Washington, May 25, 1906.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

SIR: In a letter of January 25, 1906, to the department, Mr. F. C. Goudy, president of the Rio Grande Reservoir & Ditch Co., made complaint that the proposed construction of a reservoir by the company in Colorado for reclamation purposes and the procuring of a right of way therefor is being prevented by the Government.

In a report of February 26, 1906, on this letter the Director of the Geological Survey recommended that—

"If there be no objection on the part of the State Department, at whose instance the order of December 5, 1896, was made, the same be modified to permit the approval of rights of way for irrigation purposes on the tributaries of the Rio Grande which were initiated by actual field surveys based upon notices of appropriation of water filed under the laws of Colorado prior to March 1, 1903."

The Acting Secretary of State, in a letter of March 7, 1906, to the department, stated that—

"The Department of State approves the recommendation of the Director of the Geological Survey modifying the order of suspension in accordance with the request of the Rio Grande Reservoir & Ditch Co."

In a letter of the 22d instant to the department the Acting Secretary of State has extended the approval covered by the letter of March 7, supra—

"so as to include all companies or applicants whose rights of way for irrigation purposes on the tributaries of the Rio Grande . . . were initiated by actual field surveys based upon notices of appropriation of water filed under the laws of Colorado prior to March 1, 1903."

In view of the foregoing the departmental order of December 5, 1896, directing you to suspend action on all applications for right of way through the public lands for purposes of irrigation by using the waters of the Rio Grande or any of its tributaries in Colorado or New Mexico, and the order of January 13, 1897, modifying the original order so far as the tributaries of the Rio Grande are concerned by

limiting its application to tributaries emptying into the Rio Grande above the point where it becomes the boundary between the United States and Mexico, are hereby modified so as to exclude from their operation all applications for right of way covered by the approval in the letter of the 22d instant from the Acting Secretary of State, quoted above.

The letter of Mr. Goudy is transmitted herewith.

Very respectfully,

E. A. HITCHCOCK, *Secretary.*

EXHIBIT P

(Order, dated July 10, 1906, of the Acting Secretary of the Interior, modifying the embargo on the upper Rio Grande)

DEPARTMENT OF THE INTERIOR,

Washington, July 10, 1906.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

SIR: In departmental letter of May 25, 1906, to you, departmental orders of December 5, 1896, and January 13, 1897, were modified so as to exclude from their operation all applications for rights of way through the public lands for purposes of irrigation by using the waters of the Rio Grande or any of its tributaries in Colorado and New Mexico initiated by actual field surveys based on notices of appropriation of water filed under the laws of Colorado prior to March 1, 1903, such modification being favored by the Acting Secretary of State in a letter of May 22, 1906, to the department.

In view of this modification of the orders mentioned you are directed that in acting on this class of applications, now on file or that may be filed hereafter in your office, to submit them to the Director of the Geological Survey to ascertain whether they will conflict with the obligations of the United States, under the treaty with Mexico, recently ratified, or with the Rio Grande or any other project of the Reclamation Service, and to transmit the reports of the director, with the applications, when they are submitted, for departmental action.

Very respectfully,

THOS. RYAN,

Acting Secretary.

EXHIBIT Q

(Order, dated September 27, 1906, of the Acting Secretary of the Interior, modifying the embargo on the upper Rio Grande.)

DEPARTMENT OF THE INTERIOR,

Washington, September 27, 1906.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

SIR: In a letter of the 24th instant to the department, the Acting Secretary of State has stated, with respect to applications for right of way through public lands for purposes of irrigation by using the waters of the Rio Grande or any of its tributaries in Colorado and New Mexico, that the Department of State perceives no reason for the further suspension of action on any application of such character.

He has stated further that the intent of the original departmental order of suspension dated December 5, 1896, was to conserve the interests of the Mexican Government in the waters of the Rio Grande pending an agreement between the United States and Mexico on the question, and that such an agreement has been reached and is embodied in the treaty signed May 21 last, by which the United States obligates itself to deliver to the Mexican Government 60,000 acre-feet of water annually.

He has accordingly recommended that the order of December 5, 1896, and all modifying orders be rescinded, thus removing so far as the Department of State is concerned, all restrictions on the consideration of applications involving any enterprise of a character which, on investigation by the Reclamation Service, is found to be not prejudicial to the treaty interests of Mexico.

In view of this recommendation the departmental order of December 5, 1896, and the several modifying orders are hereby revoked, and it is hereby directed that before any applications involving the use of the waters mentioned in Colorado and New Mexico are submitted for final departmental action by you they be first submitted to the Director of the Geological Survey to ascertain whether favorable action thereon would interfere with any project of the Reclamation Service or with the obligations of the United States under the treaty of May 21, 1906, with Mexico.

Very respectfully,

THOS. RYAN,

Acting Secretary.

EXHIBIT R

(Order dated April 25, 1907, of the Secretary of the Interior, modifying the embargo on the upper Rio Grande)

DEPARTMENT OF THE INTERIOR,
UNITED STATES RECLAMATION SERVICE,

Washington, D. C., April 22, 1907.

The honorable the SECRETARY OF THE INTERIOR.

SIR: The situation on the Rio Grande requires careful consideration and determination of policy by the Secretary. Briefly stated, the conditions are these:

The United States has entered into a treaty with Mexico, proclaimed by the President on January 16, 1907, by which it is agreed that the United States shall deliver to Mexico 60,000 acre-feet of water at the head of the Mexican canal near El Paso. In order to carry out this part of the treaty Congress has appropriated by act approved March 4, 1907, the sum of \$1,000,000 toward the construction of a dam on the Rio Grande, this being assumed to furnish water for 25,000 acres, at \$40 per acre. The total estimated cost of this project, including the dam, will be \$7,200,000, of which amount \$200,000 has been set aside and is now being used in the construction of subsidiary works, notably, a diversion dam above Las Cruces, N. Mex. The remaining amount—\$6,000,000—must be obtained from the reclamation fund.

It is estimated that for this expenditure of \$7,200,000 it will be possible to irrigate 180,000 acres at \$40 per acre. Deducting the 25,000 acres in Mexico, this leaves 155,000 acres in New Mexico and Texas to refund the \$6,200,000. By storing all the water of the Rio Grande, including storm floods, this acreage can be supplied. If the flow of the stream is notably diminished the area to be served will be correspondingly reduced and the cost per acre increased. This increase of cost will probably be at the expense of the lands in the United States, as Congress has already made the appropriation for the building charge to comply with the terms of the treaty.

The headwaters of this river are in the State of Colorado, surrounding the San Luis Valley. For several years after December 5, 1896, the Department of the Interior refused to grant rights of way for reservoirs or canals on these headwaters because of the effect on the international problem below. The departmental order was first modified May 25, 1906, to permit approval in cases where the applicants made a showing of priority over the United States. After the Senate had advised the ratification of the treaty on July 10, 1906, these orders of the department were revoked and the Reclamation Service was required to pass upon each case as to conflict with the treaty or the Rio Grande project. Most of the older cases have been reported on favorably by the Reclamation Service. In some of the cases, especially the later ones, the conditions involved some doubt as to the advisability of approval and the questions of policy to be considered by the department were reported to the General Land Office for submission to the department when the cases were presented for your consideration.

Recently a few exceptions have been made as to small reservoirs located high in the mountains where it appeared that the construction of works would not interfere notably with the supply of water which could be had in the lower reservoir. In view of the fact, however, that the treaty above mentioned has been concluded and an appropriation has been made by Congress for constructing the works in part, it appears probable that any considerable extension of the reservoir system at the headwaters may interfere with the plans of the Government.

Wide publicity has been given to the fact that the department has in a few cases permitted the location of small reservoirs on the headwaters of the Rio Grande. As a result a considerable number of applications are being made for other reservoir sites. If it were practicable to lay down a general rule by which the smaller of these sites could be approved, the results would probably be beneficial, but a practical difficulty arises in the possibility of defining the limits between the large and small projects. It is unquestionably true that if all of the large projects on the headwaters of the river which are planned by private parties could be actually constructed the water supply for the Government reservoir would be to a large extent cut off. It is important, therefore, to have a general rule which can be applied to all cases.

RECOMMENDATIONS

I therefore recommend that the department lay down the general policy that until the development of irrigation on the upper Rio Grande in the State of Colorado and the Territory of New Mexico shall furnish sufficient data to determine the effect of the storage and diversion of water in that vicinity upon the water supply for the Engle Reservoir of the Rio Grande project no further rights of way be approved which involve the storage or diversion of the waters of the upper Rio Grande and its tributaries, except applications of two kinds; first, those in connection with which there is a showing that the rights of the parties were initiated prior to the beginning of active operations by the Reclamation Service for the Rio Grande project, namely, March 1, 1903; second, applications which involve the diversion or storage of not exceeding 1,000 acre-feet of water per annum.

When it becomes possible to determine the effect of the approved applications upon the water available for storage for the Rio Grande project, it may be possible to allow the use of rights of way to a greater extent than is now proposed.

Very respectfully,

F. H. NEWELL.

APRIL 25, 1907.

Approved:

J. R. GARFIELD, *Secretary.*

EXHIBIT S

(Order, dated March 2, 1923, by the Secretary of the Interior, modifying the embargo on the upper Rio Grande)

DEPARTMENT OF THE INTERIOR,
UNITED STATES RECLAMATION SERVICE,
Washington, D. C., March 2, 1923.

THE SECRETARY OF THE INTERIOR,

MY DEAR MR. SECRETARY: In the hearings on the problems of the Colorado River held in San Diego December 12, 1921, the Reclamation Service was criticized by the delegate from Colorado for the attitude of the United States concerning the reservation of public lands in Colorado for the protection of the water supply of the Rio Grande. In reply to his remarks you made the following rejoinder:

"It may be that the Reclamation Service has been dilatory in not having ascertained and reported heretofore that there was sufficient water falling within that basin to fill the Elephant Butte Reservoir and to enable us to perform our international obligations and our obligations to the prior users below that reservoir and yet to release certain of the waters in the State of Colorado—it may be that they have been dilatory, as I say, in the performance of that duty. I have suggested as much myself, and it shall be my pleasure to see that at an early date a report is made upon this proposition."

In response to your wishes thus expressed I have the honor to make the following report concerning this question:

The policy of the department in regard to the approval of rights of way for the use of public lands in the Rio Grande drainage was initiated upon a request of the Department of State through the Department of Justice on December 5, 1896, in pursuance of which the Secretary of the Interior directed suspension of applications for rights of way upon public lands for irrigation purposes by the use of waters of the tributaries of the Rio Grande entering it above where it becomes the international boundary. Soon after the organization of the Reclamation Service a study of the situation was made which resulted in recommendation for the construction of Elephant Butte Reservoir. The treaty with Mexico regarding the furnishing of 60,000 acre-feet for the Mexican lands was proclaimed January 16, 1907.

A letter from Director Newell to the Secretary of the Interior, dated April 22, 1907, was closed with the following recommendations:

"RECOMMENDATIONS"

"I therefore recommend that the department lay down the general policy that until the development of irrigation on the upper Rio Grande in the State of Colorado and the Territory of New Mexico shall furnish sufficient data to determine the effect of the storage and diversion of water in that vicinity upon the water supply for the Eagle Reservoir of the Rio Grande project, no further rights of way be approved which involve the storage or diversion of the waters of the upper Rio Grande and its tributaries, except applications of two kinds; first, those in connection with which there is a showing that the rights of the parties were initiated prior to the beginning of active operations by the Reclamation Service for the Rio Grande project, namely, March 1, 1903; second, applications which involve the diversion or storage of not exceeding 1,000 acre-feet of water per annum.

"When it becomes possible to determine the effect of the approved applications upon the water available for storage for the Rio Grande project, it may be possible to allow the use of rights of way to a greater extent than is now proposed."

These recommendations were approved by the Secretary of the Interior on April 25, 1907.

The recommendation and the accompanying letter indicate that the purpose of the reservation of the lands in Colorado was to protect the water supply of the Rio Grande project as a whole, including prior rights in the United States and Mexico and extension of irrigation as contemplated by the construction of the Elephant Butte Reservoir.

The filings of the Reclamation Service upon the waters of the Rio Grande for storage and use in New Mexico, Texas, and Mexico were designed to cover all the waters of the river at that time unappropriated and to include, of course, such waters as had been appropriated by the lands included within the project. Information at that time indicated, and subsequent experience has confirmed, the fact that the Elephant Butte Reservoir of the large capacity constructed is sufficient to control and store the flood waters of the Rio Grande in all years except a few extraordinary floods of rare occurrence, which may be partially wasted; also that the amount of water that can thus be conserved and beneficially used is insufficient to supply all of the lands that might be reached with those waters. Or, in other words, that needs of the available lands exceed the water supply made available by the reservoir.

An important fact in this connection is that the dependable low water and ordinary flow of the river have long been appropriated and used for irrigation in Colorado and New Mexico above the Elephant Butte Reservoir, and nothing important remained for appropriation for the Elephant Butte project excepting freshets and floods, which could

not be intercepted and used commercially above this point without storage. Obviously such waters can not be made available except by large storage works.

The appropriation of these waters for the use of the Rio Grande project has been diligently followed by the expenditure of public funds in the construction of reservoir, diversion works, canal, and distribution systems, and the consequent drainage systems, with a total investment of over \$10,600,000 therein by the United States. Probably an equal amount has been invested by the settlers in clearing, leveling, and otherwise improving suitable for appropriate use the lands to utilize this water supply. So far as the formalities and the diligence of construction are concerned, the rights of the United States and of the settlers on the project have not been and can not be questioned.

The diversion and use of the dependable natural flow of the river and its tributaries has been so complete in Colorado and northern New Mexico that it may be stated broadly that any further feasible extension of such diversions can not materially cripple the water supply of the Rio Grande project unless accompanied by storage of the flood waters at or above such diversion.

The treaty with Mexico guarantees the delivery of 60,000 acre-feet of water annually at the diversion dam near El Paso for use in Mexico. The records indicate a dependable supply from the Elephant Butte Reservoir of 720,000 acre-feet annually, or twelve times the amount required to fulfill the treaty. A general knowledge of the basin indicates that there is no practical possibility of so depleting the supply that the Elephant Butte Reservoir could not receive and conserve sufficient of the flow of the river to fulfill the obligations of the treaty. If the entire shortage were imposed upon the American lands in the Rio Grande project. Any material decrease in the amount available for storage would react upon the project and cause a loss to the water users due to the deficiency in the water supply.

In view of the above the question resolves itself about as follows: Is it legal, and if legal, advisable, for the Secretary of the Interior to decline to approve the use of the public lands for storing and diverting for irrigation the waters of the Rio Grande, for the purpose of protecting the water supply of the lands developed under the Elephant Butte Reservoir in New Mexico and Texas?

It may be physically possible in some cases to store and use the waters of the upper Rio Grande without the use of public lands, but the opportunities for such development on exclusively private lands are believed to be few and meager and not seriously to affect the main question. It is possible to build storage reservoirs on the upper Rio Grande and its tributaries that would intercept sufficient flow to deplete materially the supply of the Elephant Butte Reservoir, and that the waters thus stored could be used for irrigation below such storage and above Elephant Butte.

There are, of course, legal means, by injunction and otherwise, by which the valid rights of the irrigators under the Elephant Butte Reservoir may be protected, but these are slow of operation, and to depend upon them may be an injustice to possible investors in storage works who might undertake storage works in good faith if such were approved by the Secretary of the Interior, and later find their investment wasted for lack of valid rights to the necessary water.

The above questions of law and of policy are of so fundamental a character that they demand consideration and decision directly by the Secretary of the Interior. It may, however, be in order for this office to venture a few suggestions.

It is believed that the best use of the waters for irrigation is the proper object of the policies and proceedings of this service, and such use must be determined at any given time with full consideration of existing legal and physical conditions. Practically complete appropriation of the dependable flow of the river was accomplished many years before the construction of the Elephant Butte Reservoir, and no material increase of the use of the river could be feasibly accomplished except by the provision of large storage works. Manifestly, to be complete and make the best use of the water supply, these works must be constructed at a point low enough to intercept practically all the drainage of the river which could not be otherwise conserved. The Elephant Butte site was selected as one which combined this advantage of location with the physical condition that at no other place in the basin could a reservoir of sufficient capacity be constructed to intercept the flow of all the unappropriated waters above the Mesilla Valley. Had the reservoir been built at such higher point as White Rock Canyon or above, many large and important tributaries, such as the Gila, Puerco, and numerous other streams would have continued to waste large quantities of water which are intercepted and conserved at the Elephant Butte site.

In order to make such a large reservoir commercially feasible it is necessary that it receive the benefits of practically all of the unappropriated waters, and these were accordingly appropriated for such use.

Even though the wisdom of the construction of the Elephant Butte reservoir might be questioned by some, the situation now is that the investment has been made and is a physical success. The lands are served and are developed. To take away its water supply would not only violate existing moral and legal rights but would destroy large investments in proportion to the magnitude of the deprivation.

On the other hand, it is manifestly wise and just to encourage any developments that may be carried out in the basin above that will not materially deplete the supply of the reservoir or otherwise jeopardize the interests it has built up. Extensive studies have been made by the Reclamation Service, as well as by the Geological Survey, the State of New Mexico, and other public and private agencies, and these have developed the fact that large areas now or formerly irrigated in Colorado and New Mexico have produced underground conditions where large bodies of land have been deprived of their fertility by the rise of ground water, and hundreds of thousands of acres are for this reason now unavailable for cultivation from this cause, although most of the area is still available for grazing, and some of it produces a low grade of coarse hay.

More than half a million acres of land in the San Luis Valley, Colo., and various small valleys in New Mexico require expensive drainage systems to bring back their fertility.

These water-logged lands now discharge immense quantities of water into the air through evaporation, a part of which would be conserved by proper drainage systems and returned to the streams, because, with the lower ground water, the natural evaporation from those lands would be decreased. If such drainage works were carried out in Colorado and the water returned to the stream and not used locally, it would follow down the stream, and unless diverted would increase the supply to the Elephant Butte reservoir. It would, however, pass by many small ditches which divert water from the river, and during the irrigation season most of it could be diverted by these ditches, and in dry times all of it. It would be extremely difficult to distinguish this from other waters of the river and to prevent its diversion by such ditches.

The valley lands in New Mexico which have been cultivated in the past are largely in need of drainage works also, and the proper drainage of these lands would also conserve much water now lost and convey it into the river, where, if not intercepted, it would flow into the Elephant Butte Reservoir. The drainage of practically all of the land in Colorado and New Mexico would be available as inflow to the Elephant Butte Reservoir at all times outside of the irrigation season, unless storage works so located as to intercept such waters were provided.

No Government authority has any right or power to interfere with the vested rights of the irrigators under the Elephant Butte Reservoir or elsewhere. These rights, whatever they are, can be, and if necessary will be, defended in the courts by the people most interested; that is, the farmers themselves. But it is believed that the Secretary of the Interior, as the head of the Reclamation Service, is in a position to assist in the full development and conservation of the water resources of this basin without local interest, bias, or prejudice and that much can be done in the way of encouraging such development and removing jeopardy from investments made for this purpose.

It is believed that under present conditions the department would be justified, with the approval of the interests below, in assuring prospective investors in Colorado and northern New Mexico that they would be protected in the storage of waters in the same quantity that the construction of drainage works might deliver water into the river at a point low enough to insure its flow into the Elephant Butte Reservoir. Each individual project should be worked out after careful study of the local, physical, and other conditions surrounding it. But the announcement of this general principle, it is believed, would remove some of the timidity of proposed investors, either public or private.

The effect of an approval by the Secretary of an application for irrigation right of way under the act of March 3, 1891 (26 Stat. 1095), upon the interests of the United States under the reclamation law has not been decided by the courts. The view has been expressed that as the regulations require applications to be accompanied by evidence of ample water right the Secretary's approval may commit the Government to a recognition of the validity of the water right claimed in connection with the application, with a possible estoppel of the United States to assert any water right in conflict therewith. Accordingly any approval of right of way as herein suggested should be carefully guarded by a reservation of all rights claimed by the United States for the Rio Grande project and for the Mexican lands under the treaty.

RECOMMENDATION

It is recommended that this office be authorized to negotiate for the release of specific areas of public land for purposes of water storage under conditions that will best conserve and utilize the water resources and will protect vested rights in all parts of the Rio Grande Basin—such negotiations to be subject to the approval of the Secretary of the Interior, and, prior to such approval, to be subject to the scrutiny of all interested parties.

Respectfully,

A. P. DAVIS, *Director.*

Approved:

ALBERT B. FALL, *Secretary.*

EXHIBIT T

(New Mexico act of March 12, 1923, authorizing representation on Rio Grande Commission)

An act providing for the appointment of a commissioner on behalf of the State of New Mexico to negotiate a compact or agreement respecting the use, control, and disposition of the waters of the Rio Grande River and for other purposes (S. B. No. 104 (as amended); approved March 12, 1923)

Be it enacted by the Legislature of the State of New Mexico—

SECTION 1. The Governor of the State of New Mexico shall, with the advice and consent of the Senate, appoint a commissioner who shall represent the State of New Mexico upon a joint commission, to be constituted as hereinafter provided for the purpose of negotiating and concluding a compact or agreement fixing and determining the rights of the signatories to the use, control, and disposition of the waters of the Rio Grande River, and of the streams tributary thereto, excepting as to all waters appropriated to the use appurtenant and necessary to the full and complete operation of the Rio Grande project in southern New Mexico, being an irrigation project constructed by the United States Reclamation Service: *Provided*, That settlers and land-owners under said project shall not be put to any additional expense by reason of the passage of this act.

Said joint commission shall include either:

(a) Commissioners for the States of Colorado and New Mexico, and a duly authorized representative of the United States of America; or

(b) Commissioners for the States of Colorado and New Mexico: *Provided, however*, That any such compact or agreement shall not become operative and shall not bind any of the signatories thereto, unless and until the same shall have been ratified and approved by the legislature of each of the signatory States and by the Congress of the United States.

SEC. 2. The Governor of the State of New Mexico shall notify the Governor of the State of Colorado of the appointment of the commissioner for New Mexico pursuant to the provisions hereof. The commissioner for New Mexico shall commence the performance of his duties upon receipt of notice by the Governor of New Mexico from the Governor of Colorado of the appointment of a commissioner for said State, and unless the Governor of Colorado shall have officially communicated notice of such appointment to the Governor of New Mexico on or before October 1, 1924, the appointment of the commissioner for New Mexico hereunder shall cease and determine without further act.

SEC. 3. When the commissioner for New Mexico shall enter upon the performance of his duties he shall be furnished such engineering, legal, stenographic, and other assistants as may be necessary or essential to the proper performance of his duties, and it shall be the duty of the State engineer and his deputies to aid and assist the commissioner for New Mexico whenever requested by him so to do.

SEC. 4. The compensation of the commissioner for New Mexico, and of his assistants, shall be fixed by the governor and attorney general, and the State of New Mexico shall pay all necessary traveling and other expenses incurred in the performance of the duties of the commissioner and his assistants both within and without the State of New Mexico, and also all other necessary costs, charges, and expenses hereunder, including the payment of an equitable portion of the costs and expenses of any such joint commission. Such compensation and expenses shall be paid monthly, upon vouchers approved by the governor and attorney general, by warrants drawn by the State auditor.

For the purpose of carrying out the provisions of this act there is hereby appropriated out of the water reservoir for irrigation purposes income fund the sum of \$5,000, or so much thereof as may be necessary.

SEC. 5. The commissioner for New Mexico shall have full authority to make any and all investigations of the Rio Grande River and the drainage area thereof, of the conditions obtaining upon said stream, and of the present and future needs relative to the use, control, and benefit of the waters of said stream, and to make such other investigations as may be necessary to the proper performance of his duties hereunder, and said commissioner shall have the authority to administer oaths and to examine and require the attendance of witnesses.

EXHIBIT U

(Colorado act of March 20, 1923, authorizing representation on the Rio Grande Commission)

An act providing for the appointment of a commissioner on behalf of the State of Colorado to negotiate a compact or agreement respecting the use, control, and disposition of the waters of the Rio Grande River, and for other purposes

Be it enacted by the General Assembly of the State of Colorado—

SECTION 1. The Governor of the State of Colorado shall appoint a commissioner who shall represent the State of Colorado upon a joint commission, to be constituted as hereinafter provided, for the purpose of negotiating and concluding a compact or agreement fixing and deter-

mining the rights of the signatories to the use, control, and disposition of the waters of the Rio Grande River, and of the streams tributary thereto. Said joint commission shall include either:

(a) Commissioners for the States of Colorado, New Mexico, and Texas, and a duly authorized representative of the United States of America; or

(b) Commissioners for the States of Colorado and New Mexico and a duly authorized representative of the United States of America; or

(c) Commissioners for the States of Colorado and New Mexico: *Provided, however,* That any such compact or agreement shall not become operative and shall not bind any of the signatories thereto unless and until the same shall have been ratified and approved by the legislature of each of the signatory States and by the Congress of the United States.

SEC. 2. The Governor of Colorado shall notify the Governors of the States of New Mexico and Texas of the appointment of the commissioner for Colorado pursuant to the provisions hereof. The commissioner for Colorado shall commence the performance of his duties upon receipt of notice by the Governor of Colorado from the Governor of either of the States of New Mexico or Texas of the appointment of a commissioner for said State, and unless at least one of said States shall have named its commissioner and shall have officially communicated notice of such appointment to the Governor of Colorado on or before October 1, 1924, the appointment of the commissioner for Colorado hereunder shall cease and determine without further act.

SEC. 3. When the commissioner for Colorado shall enter upon the performance of his duties he shall be furnished such engineering, legal, stenographic, and other assistants as may be necessary or essential to the proper performance of his duties, and it shall be the duty of the State engineer and his deputies, the division engineer of irrigation division No. 3, and the water commissioners whose districts are included within said irrigation division to aid and assist the commissioner for Colorado whenever requested by him so to do.

SEC. 4. The compensation of the commissioner for Colorado and of his assistants shall be fixed by the governor, and the State of Colorado shall pay all necessary traveling and other expenses incurred in the performance of the duties of the commissioner and his assistants, both within and without the State of Colorado, and also all other necessary costs, charges, and expenses hereunder, including the payment of an equitable portion of the costs and expenses of any such joint commission. Such compensation and expenses shall be paid monthly, upon vouchers approved by the governor, by warrants drawn for the payment thereof upon the State treasurer by the State auditor in the ordinary manner, out of any funds appropriated under the provisions of an act entitled "An act to enable the State of Colorado to protect the waters of its natural streams and to maintain the right of appropriation and use of such waters for beneficial purposes within this State, and making an appropriation therefor of the first class" or out of any appropriation of the first class made for the protection of the waters of the State.

SEC. 5. The commissioner for Colorado shall have full authority to make any and all investigations of the Rio Grande River and the drainage area thereof, of the condition obtaining upon said stream and of the present and future needs relative to the use and benefit of the waters of said stream, and to make such other investigations as may be necessary to the proper performance of his duties hereunder, and said commissioner shall have authority to administer oaths and to examine and require the attendance of witnesses.

SEC. 6. The general assembly hereby finds, determines, and declares that this act is necessary for the immediate preservation of the public peace, health, and safety.

SEC. 7. In the opinion of the general assembly an emergency exists; therefore this act shall take effect and be in force from and after its passage.

Approved, March 20, 1923.

A PROJECT TO ESTABLISH A PARK IN THE SOUTHERN APPALACHIAN MOUNTAINS

Mr. TEMPLE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a report that was made last night to the Secretary of the Interior on the subject of a national park in the Southern Appalachian Mountains.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD for the purpose indicated. Is there objection?

There was no objection.

Mr. TEMPLE. Mr. Speaker, it gives me pleasure to bring to the attention of the Members of the House, in accordance with a suggestion made to me by Doctor Work, Secretary of the Interior, the report made to him last evening by the Southern Appalachian National Park committee, together with a few introductory sentences prepared in the Interior Department concerning the committee and the work for which it was created.

The Southern Appalachian National Park Committee was appointed by Secretary Work, of the Interior Department, last February for the purpose of choosing the most typically scenic area in the East as a national park. The membership was composed of outstanding experts on parks and students of outdoor life. It included: W. A. Welch, chief engineer and general manager of the Palisades Interstate Park of New York and New Jersey; Harlan P. Kelsey, former president of the Appalachian Mountain Club of Boston, and a well-known landscape architect; William C. Gregg, a prime mover of the National Arts Club of New York and a student of recreational development through parks and a director of the National Park Association; Glenn S. Smith, acting chief topographic engineer of the Geological Survey and representing the Secretary of the Interior on the committee, and as chairman, Hon. H. W. TEMPLE, Member of the House of Representatives from Pennsylvania. All of the members served without remuneration. The report of the Southern Appalachian National Park Committee in full follows:

"The members of the committee appointed by you and designated as the Southern Appalachian National Park Committee, in accordance with your instructions, have spent the past eight months investigating the southern Appalachian Mountain region with a view of determining whether areas exist of sufficient size, containing scenery of such grandeur, and at the same time typical of the region, which are suitable to be considered as a site for a national park.

"Nature calls us all, and the response of the American people has been expressed in the creation, so far, of 19 national parks. All but one are west of the Mississippi River. The two-thirds of our population living east of the Mississippi has contented itself with a few State parks, not knowing that in the southern Appalachian Ranges there are several areas which fill the definition of a national park, because of beauty and grandeur of scenery, presence of a wonderful variety of trees and plant life, and possibilities of harboring and developing the animal life common in the precolonial days but now nearly extinct.

"It has not been generally known that eastern parks of national size might still be acquired by our Government. The committee has been impressed with the amount of interest manifested in all sections of the East in the proposed establishment of a national park in the southern Appalachian region, and this interest has resulted in numerous requests that the committee inspect various areas. Many of these requests pertained to localities that have abundant scenic features, but which are not of sufficient size to warrant their being considered for a national park. Every effort has been made to consider carefully the merits of the various proposed sites, and wherever there was evidence that an area seemed to justify the committee in making a personal inspection, visits have been made either by the committee as a whole or by a delegation from it. Many of the areas in these mountains having unquestionable national-park features are now in the national forests under Government control and so available for recreational use; the committee is not disposed to suggest a change in their present status.

"We inspected the northern part of Georgia whose fine mountains blend with the highland region of southern North Carolina. We ascended Mount Mitchell and viewed the splendid Black Mountain Range north of Asheville. We went over carefully the Grandfather Mountain region, which for our study included the beautiful country from Blowing Rock to remarkable Linville Gorge. We responded to the call of the poet—to see Roan Mountain if we would really see the southern Appalachians. We went to Knoxville and from there to the tops of "The Big Smokies," which carry on their crest the boundary line between North Carolina and Tennessee. We went into Virginia to inspect that portion of the Blue Ridge on the east side of the Shenandoah Valley, which extends from Front Royal to Waynesboro. Some members of the committee also visited Cumberland Gap, southern West Virginia, northern Alabama, and eastern Kentucky. Several areas were found that contained topographic features of great scenic value, where waterfalls, cascades, cliffs, and mountain peaks with beautiful valleys lying in their midst gave ample assurance that any or all of these areas were possible for development into a national park which would compare favorably with any of the existing national parks in the West. All that has saved these near-by regions from spoliation for so long a time has been their inaccessibility and the difficulty of profitably exploiting the timber wealth that mantles the steep mountain slopes. With rapidly increasing shortage and mounting values of forest products, however, we face the immediate danger that the last remnants of our primeval forests will be destroyed, however remote on steep mountain side or hidden away in deep, lonely cove they may be.

"The conditions in the East where all land is held in private ownership, as compared with those existing in the West when national parks were created from Government-owned lands, has

made our problem a difficult one. The density of population, together with the commercial development in progress or in prospect, often practically prohibited the selection of areas of great natural beauty which if located remote from such development would have been seriously considered.

"It is the opinion of the committee that a park in the East should be located, if possible, where it will benefit the greatest number, and it should be of sufficient size to meet the needs as a recreational ground for the people not only of to-day but of the coming generations. The committee therefore decided that no site covering less than 500 square miles would be considered. This eliminated a large number of proposed areas and allowed the committee to concentrate its efforts on a few that appeared to be possible sites on account of their size, location, and favorable scenic features. These sites have therefore been thoroughly examined.

"The committee laid down a few simple requirements for its guidance in seeking an area which could be favorably reported to you for the possible consideration of Congress:

"1. Mountain scenery with inspiring perspectives and delightful details.

"2. Areas sufficiently extensive and adaptable so that annually millions of visitors might enjoy the benefits of outdoor life and communion with nature without the confusion of overcrowding.

"3. A substantial part to contain forests, shrubs, and flowers, and mountain streams, with picturesque cascades and waterfalls overhung with foliage, all untouched by the hand of man.

"4. Abundant springs and streams available for camps and fishing.

"5. Opportunities for protecting and developing the wild life of the area, and the whole to be a natural museum, preserving outstanding features of the southern Appalachians as they appeared in the early pioneer days.

"6. Accessibility by rail and road.

"We have found many areas which could well be chosen, but the committee was charged with the responsibility of selecting the best, all things considered. Of these several possible sites the Great Smokey Mountains easily stand first, because of the height of mountains, depth of valleys, ruggedness of the area, and the unexampled variety of trees, shrubs, and plants. The region included Mount Guyot, Mount Le Conte, Clingmans Dome, and Gregory Bald, and may be extended in several directions to include other splendid mountain regions adjacent thereto.

"The Great Smokies have some handicaps which will make the development of them into a national park a matter of delay; their very ruggedness and height make road and other park development a serious undertaking as to time and expense. The excessive rainfall also—not yet accurately determined—is an element for future study and investigation in relation both to the development work, subsequent administration, and recreational use as a national park.

"The Blue Ridge of Virginia, one of the sections which had your committee's careful study, while secondary to the Great Smokies in altitude and some other features, constitute, in our judgment, the outstanding and logical place for the creation of the first national park in the southern Appalachians. We hope it will be made into a national park and that its success will encourage the Congress to create a second park in the Great Smokey Mountains which lie some 300 miles distant southwest.

"It will surprise the American people to learn that a national park site with fine scenic and recreational qualities can be found within a three-hour ride of our National Capital and within a day's ride of 40,000,000 of our inhabitants. It has many canyons and gorges with beautiful cascading streams. It has some splendid primeval forests, and the opportunity is there to develop an animal refuge of national importance. Along with the whole southern Appalachians, this area is full of historic interest; the mountains looking down on valleys with their many battle fields of Revolutionary and Civil War periods and the birthplaces of many of the Presidents of the United States. Within easy access are the famous caverns of the Shenandoah Valley.

"The greatest single feature, however, is a possible skyline drive along the mountain top, following a continuous ridge and looking down westerly on the Shenandoah Valley from 2,500 to 3,500 feet below, and also commanding a view of the Piedmont Plain stretching easterly to the Washington Monument, which landmark of our National Capital may be seen on a clear day. Few scenic drives in the world could surpass it.

"We therefore recommend the creation of a national park in the part of the Blue Ridge Mountains of Virginia above described and shown approximately on the accompanying map.

"We have not attempted to estimate the cost of acquiring this area, as we are not sure that it falls within the scope of our committee's work. We suggest, however, that a spirit of constructive cooperation on the part of the State of Virginia and among some

of the large landowners of this region with whom we have been in touch promises reasonable prices and perhaps a number of donations.

"We suggest that if Congress thinks favorable of this proposed park site, a commission be appointed to handle the purchase and to solicit contributions and to arrange condemnation proceedings if the State of Virginia deems it wise. The creation of such a park may well be made contingent on a limited total land cost."

ROBERT J. OWENS, A PROHIBITION AGENT

Mr. LAGUARDIA. Mr. Speaker, I press my motion for consideration of House Resolution 365, reported by the Committee on the Judiciary December 11.

The SPEAKER. The gentleman from New York demands the right to call up as a matter of privilege a resolution, which the Clerk will report by title.

The Clerk read as follows:

House Resolution 365, requesting the Secretary of the Treasury to furnish to the House of Representatives certain information regarding Robert J. Owens, a prohibition agent.

Mr. BLANTON. Mr. Speaker, I reserve a point of order.

Mr. BEGG. I make the point of order, unless the gentleman desires to be heard.

Mr. DYER. Mr. Speaker, I make the point of order that the gentleman's motion is not in order. The Committee on the Judiciary has given consideration to this resolution. The gentleman from New York [Mr. LAGUARDIA] appeared before the committee, and the committee unanimously reported adversely on the resolution, and under the rules of the House the gentleman is not privileged to call it up, not being a member of the Committee on the Judiciary.

Mr. LAGUARDIA. Mr. Speaker, may I be heard on the point of order?

The SPEAKER. The Chair will hear the gentleman from New York.

Mr. SANDERS of Indiana. Mr. Speaker, my understanding is if there are any additional points of order, they ought to be made at the same time. There are additional points of order from those suggested.

Mr. DYER. There are, but I make that one on behalf of the Committee on the Judiciary.

Mr. LONGWORTH. Mr. Speaker, I desire to make an additional point of order. I can make it now or later.

The SPEAKER. The gentleman can state his point of order now.

Mr. LONGWORTH. I make the point of order, Mr. Speaker, that even if it was in order for a Member other than a member of the Judiciary Committee to call up this resolution as a privileged matter, the resolution is not in fact privileged, because on line 4 it asks for the reason and cause, which involves a matter of opinion. I make that further point of order.

Mr. SANDERS of Indiana. And the additional point of order that on yesterday, by unanimous consent, the House fixed the procedure for to-day and there was no exception made. This is not a matter of personal privilege, certainly, but just a question of legislative procedure, and having fixed the procedure for to-day this is not privileged in advance of the other matter.

The SPEAKER. The Chair would first like to hear the gentleman on the point of order raised by the gentleman from Missouri.

Mr. LAGUARDIA. The resolution of inquiry was introduced December 1, and on December 11 was reported by the Committee on the Judiciary with an adverse report. The rules, Mr. Speaker, clearly give a privileged status to resolutions of this kind. The rule has been in existence since 1879, and it has been repeatedly held that a resolution of inquiry calling upon the head of a department for facts is a privileged resolution and so provided and repeatedly held under the rules of the House.

Mr. SANDERS of Indiana. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SANDERS of Indiana. I would like to ask the gentleman to cite the rule which makes that provision.

Mr. LAGUARDIA. The gentleman is familiar with the rules, and he will find in sections 834 and 835 of the Manual the authority I have cited. It has been repeatedly held that the committee has eight days within which to make a report, and that during that period of eight days it is not privileged to move to discharge the committee. But any time after the eight-day period the Member introducing the resolution may move the discharge of the committee, and since 1870 that has been held to be privileged.

On July 15, 1892, where a premature motion for the discharge of a committee was made the Speaker held that it was not privileged during the eight-day period, but once it is reported its consideration is privileged, and in the failure of the committee to report within the eight-day period a motion to discharge the committee is privileged. If a motion to discharge a committee after the eight-day period is privileged, surely a report of the committee for consideration is likewise privileged, and the fact that it is an adverse report should not take from the resolution its privileged character.

On the other hand, in reply to the point of order made by the gentleman from Missouri, if only a member of the committee may move for consideration, and as we have in this case an adverse report, that in and of itself would destroy the purpose of the rule, because if only a member of the committee can move for consideration and you have an adverse report of the committee, it stands to reason that the resolution would never be called up.

Mr. LONGWORTH. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. LONGWORTH. The gentleman would not deny that it would be within the province of the Committee on Rules to make it in order.

Mr. LA GUARDIA. No.

Mr. LONGWORTH. The gentleman stated that it would be impossible to consider it, but it stands in the same position as any other bill or resolution.

Mr. LA GUARDIA. I think the gentleman would find great difficulty in finding any instance where the Committee on Rules has ever brought in a rule for the consideration of a resolution under these circumstances.

Mr. LONGWORTH. If the gentleman would appear before the Rules Committee and present a good case, as I am sure he always does, he would get the rule.

Mr. LA GUARDIA. I am inclined to think that the gentleman from Ohio is not serious in making that suggestion. I think, Mr. Speaker, under the rules and precedents my motion at this time is clearly in order.

Mr. CRAMTON. Mr. Speaker—

The SPEAKER. Is the gentleman in favor of or against the point of order?

Mr. CRAMTON. I am in favor of the points of order only in part.

The SPEAKER. The Chair is ready to rule.

Mr. CRAMTON. Unless the Chair is going to overrule all the points of order, I want to be heard.

The SPEAKER. The Chair will hear the gentleman.

Mr. CRAMTON. Mr. Speaker, I am not interested in the subject matter of the resolution. I am willing to assume that the action of the Judiciary Committee is entirely correct. I am, however, somewhat jealous of the protection of the rights of Members and the protection of the rights of minorities with reference to resolutions of inquiry. If it should be held that the point of order made by the gentleman from Missouri is correct, as I understand his point of order, it means to do away with the right which a minority heretofore has had with reference to resolutions of inquiry. I do not believe that is desirable.

The point of order of the gentleman from Missouri, as I understand, is that a report having been made upon the resolution, that report having been adverse, that no one now can call up that resolution and the report on it except a member of the committee. I am not sure whether he makes the point that any report being made, the resolution is not entitled to privileged consideration. I am not sure how far his point went. I do not see where they get the authority for the statement that no one but a member of the committee can call up the resolution in view of an adverse report. The procedure adopted in the last session with reference to the discharge of a committee from consideration of measures only applies to bills and joint resolutions and does not apply to resolutions of inquiry, which is simply a House resolution. The only provision of the rules that has to do with this subject is as follows:

All resolutions of inquiry addressed to the heads of executive departments shall be reported to the House within one week after presentation.

Under that rule has grown up the practice of the House giving to the resolution of inquiry a privileged status. All that the rule definitely requires is that the committee shall report, but the report of the committee is an idle ceremony unless it does lead to possible consideration by the House. If it is to be held that the resolution itself when reported has no privilege, then it is easy to see how a majority in this House can entirely put the lid on resolutions of inquiry. The majority in the House having control of the Rules Committee,

having a majority on the committees, can secure an adverse report, we will say, upon a resolution of inquiry. Is it to be understood that that adverse report absolutely prevents the getting up of a resolution for a vote by the House?

Mr. BEGG. Mr. Speaker, will the gentleman yield?

Mr. CRAMTON. In a moment. If it is to be so held, then a minority no longer can get a vote in this House upon a resolution of inquiry perhaps addressed to an administration that is politically opposed.

Mr. BEGG. Conceding the resolution to be a privileged resolution, does the gentleman contend that the privilege carries to every Member in the House?

Mr. CRAMTON. Absolutely. I have not been able to find anything to the contrary, and it would be strange, indeed, if a man who introduces a resolution shall be held to lose the right to call it up in this House—a right equal to that of any other Member—unless there is something explicit in the rules to that effect, and there is not.

Mr. BEGG. Mr. Speaker, will the gentleman yield further?

Mr. CRAMTON. I want first to answer the gentleman's first question.

Mr. BEGG. That is sufficiently answered—that the gentleman believes that. That being true, let us say that on the calendar there is an appropriation bill, which is privileged, on next Monday or Tuesday. What is the difference between the appropriation bill and this resolution, so far as the rights of the membership of the House are concerned, other than the committee membership? Would the gentleman contend that if he had an appropriation bill in hand, which had the right of way on Tuesday next, and for some reason or other did not want to call it up, that I, as a nonmember of the committee, could call it up before the House?

Mr. CRAMTON. That has nothing more to do with the pending situation than has the old question of how old is Ann. The rule that applies to the present situation is the one that I have just read with reference to resolutions of inquiry and which does not apply to bills generally. There is a rule that provides that when there is an adverse report upon any bill, that bill shall lie upon the table, unless within three days some Member of the House—not only a member of the committee, but some Member of the House—asks to have that bill put on the calendar, where it belongs, and any Member of the House has the right to have that bill put on the calendar, notwithstanding an adverse report. I ask the gentleman from Ohio to show me a line here that restricts to a member of the committee the right to call up a bill on which there has been an adverse report.

Mr. BEGG. And I answer the gentleman in this way: That has nothing to do with it. The gentleman from New York [Mr. LA GUARDIA] had a perfect right under the rules to put his bill on the calendar, even though adversely reported.

Mr. CRAMTON. Where is there in the rules any statement restricting to a member of the committee the right to call up a bill or resolution on which there is an adverse report?

Mr. BEGG. The adverse report does not give it any higher privilege than would a favorable report.

Mr. CRAMTON. Where is there anything in the rules to give to a member of a committee any right that the gentleman from New York does not have?

Mr. BEGG. And I ask the gentleman where there is anything in the rules that gives them the right?

Mr. CRAMTON. I say that he has the right that goes with the introducer of a bill, which is at least equal to the right of any other Member of the House, and the only rule that I know of—and I am not at all infallible; I thought I could get some enlightenment from the gentleman—is that which provides that when an adverse report is presented on a bill that bill shall go to the table, unless within three days any Member of the House puts it on the calendar; but if there is any restriction as to the rights of the gentleman I think it is incumbent upon those who allege such restrictions to point them out. In the absence of them, if they are to hold that an adverse report from a committee on a resolution of inquiry shall deny to its introducer an opportunity to get a vote of this House upon the resolution, then you have done away with that outlet, which has been in this House historic as to the protection of the rights of the minority. The precedents are not numerous as to the rights of any Member to call up a resolution of inquiry after there has been a report, regardless of whether that report is favorable or adverse. I do not find any difference in the rules in the situation whether the report of the committee on a resolution of inquiry is favorable or adverse. I do not understand there is any difference in the situation. I can see that there may be a question in the minds of some as to whether a resolution of inquiry, having been reported either favorably

or adversely, then takes a privileged status in the House that would enable anyone to call it up for consideration as a privileged matter. The rule is very vague. This is a matter very largely of the practice of the House which has grown up rather than of express language in the rule. Logically it would seem an idle ceremony to require a committee to report within seven days and then not give any opportunity for consideration of the report after it should be made. If it was intended to give this a privileged status, it was necessary to insist upon an early report, and that having been done, that should not throw away that privilege by not giving consideration to the resolution.

The precedents are not numerous, because generally this has come up when the committee has refused to report, but in 1892, under Mr. Speaker Crisp, the Speaker overruled a point of order made upon a motion to discharge the committee in a certain matter, and in doing so "held that the duty to report within one week carried with it the right to report at any time during that period and, if delayed, the right to report at any time thereafter, and consequently the right of consideration when reported."

So, Mr. Speaker, I repeat. I am not concerned about the resolution. I assume that I shall not vote for it if it comes up for consideration, but I do not want a ruling that will put an end to any opportunity of Members or of a minority to call upon the administrative heads for information.

Mr. SANDERS of Indiana. Will the gentleman yield?

Mr. CRAMTON. I will.

Mr. SANDERS of Indiana. In the precedent cited by the gentleman was it an adverse or favorable report?

Mr. CRAMTON. There was no report.

Mr. SANDERS of Indiana. I thought the gentleman cited a case where there was—

Mr. CRAMTON. There was no report, but there was a motion to discharge the committee and consider the bill. But let me suggest this, Mr. Speaker: If a motion for consideration is not privileged, then when you join that motion which is not privileged with the motion to discharge which is held to be privileged, the whole thing would necessarily fall as not being privileged. If it is assumed that there is no privilege of consideration and only a privilege of securing a report, then you could not join that in one privileged motion.

Mr. SANDERS of Indiana. Is the gentleman able to cite any precedent where an adverse report has been made and held to be privileged?

Mr. CRAMTON. I will ask the gentleman from Indiana, who is one of the best authorities in the House, equal to my friend from Ohio who could give me no information on this point, where is there in the rules any provision restricting to a member of a committee the right to call up a bill or resolution to which there has been an adverse report?

Mr. SANDERS of Indiana. I would say to the gentleman there is not anything in the rules giving the right to anybody, and certainly there being no affirmative giving the right to anybody there would be no exception for such an imaginary rule, and I want to know if the gentleman will answer the question which I have propounded to him?

Mr. CRAMTON. Let us have it in the light of what information has been imparted.

Mr. SANDERS of Indiana. Can the gentleman state to the Chair any precedent where it has been held where an adverse report was made by a committee on a resolution of inquiry where the Chair held that the report has a privileged status and could be brought up as a privileged matter?

Mr. CRAMTON. I can not, but it is absolutely immaterial because the purpose of the resolution of inquiry, its very nature, is to be used by the minority. The majority in harmony with the administration can generally get their information, but if you are to hold that an adverse decision of a committee of this House shall prevent the House itself from having the right to decide the question, then you have done away with the resolution of inquiry. It has been urged that no one but a member of the Committee on the Judiciary can call this up. That is the first point, and I have demonstrated here by the evidence of these well-versed gentlemen that there is nothing to that point of order, that the committee reporting a bill adversely have done all that they can do, and that the right to call up that measure is not restricted to them now.

The SPEAKER. The Chair would like to have the authority in reference to that; the Chair has no authority on that point.

Mr. CRAMTON. As to what?

The SPEAKER. As to the fact that when there is an adverse report only members of the committee can call it up.

Mr. CRAMTON. I have been trying to get that information. There is nothing in the rule.

The SPEAKER. The Chair understood the gentleman to say that he had proven there was nothing on that point.

Mr. CRAMTON. I understand I have proven there is nothing on that point. I do not understand that there is anything in the rule giving to a member of the committee any right in reference to a bill or resolution on an adverse report which right is not shared with every other Member of the House.

The SPEAKER. Is there any other rule that gives such a right to any other bill?

Mr. CRAMTON. I may have overlooked some rule, but the only rule I find in reference to an adverse report—

The SPEAKER. The Chair means a report that was adverse. Where is there any rule that gives any member of the committee the right to call it up and not a Member outside of the committee?

Mr. CRAMTON. The precedents are that a man who introduces a resolution can call it up, and that right never has been challenged.

The SPEAKER. After an adverse report?

Mr. CRAMTON. Generally the motion is to discharge the committee and consider it, and I have not found any exact precedent to cover the case, any case where the right to consideration has been passed upon without a motion to discharge. Whether it is a favorable or adverse report is immaterial. There may be a chance to argue whether any Member has a privileged right to call it up after it has been reported. But if it should be held that a privileged right to consideration does not exist, then why should there be, first, a provision in the rule to require a report which could not be brought before the House? And, secondly, if it is not privileged, how could a joint motion to discharge the committee and call up a bill for consideration, to have both joined in one privileged motion, and both when joined together repeatedly sustained as privileged?

Mr. BLANTON. Will the gentleman yield for a question?

Mr. CRAMTON. I will.

Mr. BLANTON. If the gentleman from New York failed within three days to move to place this adverse report on the calendar, did not that bill go on the table, did not this whole matter go on the table?

Mr. LAGUARDIA. Mr. Speaker, permit me to say that "the gentleman from New York" has not failed to put it on the calendar.

Mr. BLANTON. But he has not moved within three days.

Mr. LAGUARDIA. Yes; I have.

Mr. CRAMTON. It was reported yesterday.

Mr. BLANTON. He has not moved to put it on the calendar. He has no right to move consideration.

Mr. CRAMTON. That is with reference to a bill, not a resolution.

Mr. BLANTON. They occupy the same status.

Mr. LONGWORTH. Mr. Speaker, it seems to me, on the other point of order, that this discussion is beside the mark if this resolution is not privileged. In my view it is clearly not privileged. This is not a resolution merely of inquiry, to ascertain certain facts, which is the only thing that gives it privilege. It asks for very much more than facts. For instance, in the very first sentence it asks for the "reason and cause for the dismissal of Robert J. Owens." Now, the words "reason and cause" plainly ask for information. It is a matter of discretion, discretion exercised with reference to the dismissal. And further along it asks for "proof for the legality of the possession of the said liquor," and so forth. Proof of legality is plainly a question involving the judgment of various men, the opinions of various men. This goes far beyond a resolution asking for facts. It is not a privileged resolution.

Mr. DYER. Mr. Speaker, will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. DYER. I will say to the gentleman from Ohio that the report filed by the Committee on the Judiciary contains a letter from the Secretary of the Treasury giving all the information, no doubt, available or possible, even, under the resolution voted up for consideration and sent to the Secretary.

Mr. LONGWORTH. Certainly. The word "reason" involves more than a mere detail of fact. It involves an opinion, questions of judgment, far more than any mere statement of fact.

Mr. GARRETT of Texas. Mr. Speaker, will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. GARRETT of Texas. I will ask the gentleman if the words "reason and cause," called for in the resolution of inquiry, were not words simply descriptive of the documentary evidence they wanted from the department?

Mr. LONGWORTH. The gentleman's reason for doing or not doing a particular thing might be a very different reason

from mine. His might be right and mine might be wrong. This can not be a question of fact—the reason for dismissal. The gentleman might have thought that his reasons were such and such, while mine might be otherwise. It goes clearly beyond an inquiry as to facts.

Mr. LA GUARDIA. Mr. Speaker, in reply to the point raised by the gentleman from Ohio [Mr. LONGWORTH], I am sure he can not seriously urge upon the Speaker that the wording in any resolution asking for "the reason or the cause" of the discharge of an employee, an act which had been accomplished, is asking for an opinion. The discharge in this case is something that has happened, and the resolution inquires for the reason and cause which resulted in the conduct of the department, not what they believe. Was this man disobedient? Did he violate the law? Just what was the "cause and reason" for the dismissal? The resolution asks for any reason that is in their possession that goes to the dismissal of this particular employee. There is no other way in the English language to frame a question to ascertain the cause of the dismissal of an employee. It is the same as asking for a bill of particulars on an indictment in a criminal action or a complaint in a civil action. You ask in such a case for the cause and reason, and the overt acts are stated in reply. That is what this resolution does, and nothing more. This inquiry asking for the cause and reason is nothing else than asking for a bill of particulars concerning the discharge of the employee named in the resolution.

Mr. DENISON. Mr. Speaker, will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. DENISON. This calls for proof of the legality of the act of an officer. That calls for argument.

Mr. LA GUARDIA. There is no such question involved in my resolution calling upon the Secretary of the Treasury for this information.

Mr. DENISON. It says "the legality of the possession of the said liquor."

Mr. LA GUARDIA. I am not charging that the Secretary of the Treasury had any liquor.

Mr. DENISON. You are asking for the proof that the law requires, as to the character of the proof; what proof they had upon which the legality of the possession of the liquor was based.

Mr. LA GUARDIA. Exactly. Matter of proof presented is a matter of fact.

Mr. HOCH. Mr. Speaker, will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. HOCH. If the words "reason and cause" signify simply cause, then what is the meaning of these words on line 6, "facts, evidence, and proof of the legality of the possession of the said liquor," upon which the action was based?

Mr. LA GUARDIA. The gentleman, as a lawyer, knows that this is not asking for a conclusion or an opinion, but simply demanding the facts upon which an act was based.

Mr. HOCH. If that is all, why did not the gentleman simply say, as in paragraph 1, "the facts and evidence upon which the dismissal of Mr. Robert J. Owens was based"?

Mr. LA GUARDIA. The facts and the evidence would be limited to certain acts and conduct on the part of the department. The consideration of these facts as the reason for dismissal is all limited to matters of fact. It does not call for an opinion or a conclusion. The point of order raised that this resolution itself now is not privileged simply shows the hopelessness of the argument of the gentleman who raised the point of order, first, that it could not be called up by anybody but the committee. Now, they are relying upon this last point of order, that it is not privileged in itself, to prevent its consideration.

Mr. TINCHER. Mr. Speaker, will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. TINCHER. What is the meaning of these words, "and proof of the legality of the possession of the said liquor"?

Mr. LA GUARDIA. The gentleman knows that under the law, when liquor is seized, the burden of proof establishing the legality of possession is upon the owner. Now, there must have been some evidence or proof to justify the return of this liquor within 24 hours after the seizure. That is what my resolution calls for. [Cries of "Vote!"]

The SPEAKER. It seems to the Chair that this question is rather academic. It is certainly so if what the gentleman from Missouri [Mr. DYER] states is the fact, that in the report are given the full reasons of the department. But it is none the less to be decided.

Three points of order are made. As to the day, the Chair finds that the order yesterday was simply that bills on the Private Calendar, reported from the Committee on Claims,

be in order for consideration to-morrow. It seems to the Chair that does not prevent the consideration of other privileged business, if the House so desires.

The second point of order is: Can it be brought up by the gentleman from New York [Mr. LA GUARDIA], he not being a member of the committee which made the report? This rule was adopted in 1880, and when it was first reported by Mr. Randall it simply provided that any motion of inquiry should be referred to a committee. Then it was contended by some Members that there should be some constraint on that committee, and, therefore, the addition was made that such committee should report within one week, and since then, without any special provision in the rule, it has been held that if the committee did not report within that week the Member who offered the resolution should have the right to bring it up as a matter of privilege. There is no special reason, given in any decision the Chair has been able to find, for establishing that right, but the Chair supposes it is to compel the committee to do its duty. It is logical, if the committee does not do its duty, that the House should have the right, without the action of the committee, to immediately proceed to consider the subject. But there is nothing in the rule which provides what shall be done when the committee does report, and consequently it has been held that such a report is privileged, and, it seems to the Chair, it must stand just like any other privileged report of a committee. The Chair can see no reason for any difference in the privilege, whether it is adverse or whether it is favorable. But the Chair is unable to see any reason why this case should be held by decision to be different from all other cases. It is always held that the only person who can bring up a bill is the Member authorized by the committee. There are some privileged bills now on the calendar which are subject to be brought up, but nobody can bring them up except the member of the committee authorized to do so, and in the absence of any expression in the rules or of any precedents by a decision the Chair does not feel authorized to hold that there is any different right in this case than in any other case.

Then as to the point that is made by the gentleman from Ohio [Mr. LONGWORTH], the rulings have been continuous that such a resolution must call simply for the facts and not for opinions. It does seem to the Chair that calling for the reason why the act was done is calling for an opinion by the official who performed that act. It is asking his motive. Of course, the language could be drawn so as to ask the facts on which he based his action, but to ask the motive and the reason of his action, it seems to the Chair, also makes this resolution subject to the point of order. So the Chair sustains the point of order.

SETTLEMENT OF THE INDEBTEDNESS OF THE REPUBLICS OF POLAND AND LITHUANIA

Mr. CRISP. Mr. Speaker, by direction of the Committee on Ways and Means I present two privileged reports from that committee for reference to the calendar, one recommending the settlement of the indebtedness of the Republic of Poland to the United States of America and the other recommending the settlement of the indebtedness of the Republic of Lithuania to the United States of America.

The SPEAKER. The gentleman from Georgia presents two privileged reports from the Committee on Ways and Means, which the Clerk will report.

The Clerk read as follows:

Report to accompany the bill H. R. 10650, to authorize the settlement of the indebtedness of the Republic of Lithuania to the United States of America.

The SPEAKER. Referred to the Union Calendar.

The Clerk read as follows:

Report to accompany the bill H. R. 10651, to authorize the settlement of the indebtedness of the Republic of Poland to the United States of America, and for other purposes.

The SPEAKER. Referred to the Union Calendar.

CLAIMS ON THE PRIVATE CALENDAR

Mr. EDMONDS. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House for the further consideration of claims upon the Private Calendar.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House for the consideration of claims upon the Private Calendar, with Mr. SANDERS of Indiana in the chair.

WILLIAM J. OLIVER

Mr. EDMONDS. Mr. Chairman, when we closed the House last night we had under consideration Private Calendar No.

133, H. R. 3122. I ask for the further consideration of that bill at this time.

Mr. MILLER of Washington. Mr. Chairman, may I ask whether any bills of any character, except those reported by the Claims Committee, will be considered at to-day's session?

The CHAIRMAN. The order is that claims on the Private Calendar be in order for consideration on Saturday.

Mr. MILLER of Washington. And none reported by the War Claims Committee will be considered at to-day's session is the understanding?

The CHAIRMAN. The Chair does not recall what the Record shows.

Mr. BLANTON. Mr. Chairman, I make the point of order that the order asked for by the majority leader was that bills reported by the Claims Committee on the Private Calendar should be in order, and that would exclude bills reported by the War Claims Committee.

Mr. CHINDBLOM. Mr. Chairman, I make the point of order that we are acting under the order of the House made to-day, and that was that the House resolve itself into the Committee of the Whole House for the consideration of bills from the Committee on Claims on the Private Calendar. Whatever may have been prior orders, we are now acting under that order made to-day.

The CHAIRMAN. The Chair thinks that the point made by the gentleman from Illinois [Mr. CHINDBLOM] is well taken. The motion was made that the House resolve itself into the Committee of the Whole House for consideration of claims on the Private Calendar, and upon that suggestion the Chair will respond to the parliamentary inquiry of the gentleman from Washington by stating that they are the only ones that will be considered by the Committee of the Whole House at this sitting. The Chair will call the gentleman's attention to the fact that that applies only to this sitting and does not necessarily apply to the entire day.

Mr. BLANTON. Mr. Chairman, a parliamentary inquiry, if the Chair will permit. The order agreed upon by the majority leader yesterday was, "Mr. Speaker, * * * I ask unanimous consent that bills reported from the Committee on Claims be in order for consideration to-morrow." That limited bills that could be considered to-day to those which were reported by the Committee on Claims, and none other. That was the order that was agreed upon by the House and made in order yesterday.

The CHAIRMAN. The Chair thinks that was the order. Of course, at the present time, as pointed out by the gentleman from Illinois [Mr. CHINDBLOM], irrespective of any order, we are operating upon the motion carried by the House to which there was no point of order directed, and that motion operates and binds the Committee of the Whole House so far as the present sitting is concerned.

Mr. EDMONDS. Mr. Chairman, last evening when the committee rose I had half an hour's time coming to me out of my time, which I had reserved. I will now yield as much time as he may need out of that time to the gentleman from Oklahoma [Mr. THOMAS] to continue his discussion of the bill that is before the House.

Mr. THOMAS of Oklahoma. Mr. Chairman and gentlemen of the committee, what I shall have to say will be in supplementing what I had to say on yesterday. I do not take the floor for the purpose of making a speech, but only for the purpose, if possible, of assisting the committee in arriving at a just conclusion in relation to this claim.

I desire to call the attention of the committee to a peculiar proposition, that the Congress is the only tribunal that a citizen can go to in a case of this kind. When a citizen has been injured by his Government or by its agents, there is no court that he can go to and claim redress. He must depend upon the Congress of the United States. In this case, whether Mr. Oliver has been injured or not, is a question for this jury to determine, and in this particular case the Congress is the jury.

Briefly I want to call attention to the conditions that prevailed around Mr. Oliver and his plant at the time this injury was alleged to have been done. Mr. Oliver, in Knoxville, Tenn., had a prosperous manufacturing plant. He was engaged in both commercial manufacturing and munitions making or manufacturing. Because, as he claims, of the injury that was done him at this time the plant he had then is now in idleness. It has been dismantled, and it is a bankrupt concern. Mr. Oliver at that time had a railroad in operation in Tennessee. He had paid something like \$700,000 for this railroad in its building. When he was done the injustice that he claims was done him these properties were taken over and put in the hands of a receiver and finally into bankruptcy.

His railroad was sold for \$50,000 and his manufacturing plant did not sell for enough to pay the obligations existing against it.

Mr. COLLINS. Will the gentleman yield?

Mr. THOMAS of Oklahoma. Gladly.

Mr. COLLINS. If any damage was done, it seems to me it was done the Oliver Manufacturing Co. Why should this claim be payable to W. J. Oliver?

Mr. THOMAS of Oklahoma. The testimony shows that Mr. Oliver was practically the sole owner of the stock of the company, and Mr. Oliver having suffered damage personally in addition to his financial damage, the committee thought it would be right that any judgment rendered in his favor by the Congress should be made to Mr. Oliver personally and not to the corporation.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. THOMAS of Oklahoma. Yes.

Mr. LAGUARDIA. What is there to prevent the corporation bringing in a claim for damages later on?

Mr. THOMAS of Oklahoma. Any claim that the corporation might bring in must be brought before the Congress, and the Congress having heard and adjudicated the claim of Mr. Oliver, I think we can be safe in assuming that with such careful considerations of claims as we have upon the Claims Committee of this House the corporation would not get very far in prosecuting a claim of that kind.

Mr. LAGUARDIA. There is no provision in the bill that covers all claims of all of these concerns.

Mr. THOMAS of Oklahoma. I think you are right so far as the bill is concerned.

Mr. TAYLOR of Tennessee. If the gentleman from Oklahoma will allow me to interrupt, I would suggest that the corporation is now out of business and has been wound up.

Mr. LAGUARDIA. It is out of existence now?

Mr. TAYLOR of Tennessee. Yes.

Mr. COLLINS. But the damage was done to the corporation, as I understand it, and not to Mr. Oliver, and yet the bill is for the relief of some one who was not damaged.

Mr. THOMAS of Oklahoma. Mr. Oliver suffered the entire damage that was done to the corporation.

Mr. STEPHENS. Is it not a fact that Mr. Oliver was the corporation?

Mr. THOMAS of Oklahoma. In effect that is true.

Mr. LAGUARDIA. That could not be legally true, of course.

Mr. BLANTON. Will the gentleman yield?

Mr. THOMAS of Oklahoma. Yes, sir.

Mr. BLANTON. If I understood the gentleman correctly yesterday, the gentleman stated that within a few days after the taking over of the property by the Government Mr. Oliver was struck by a truck and injured.

Mr. THOMAS of Oklahoma. That is correct.

Mr. BLANTON. That was not a Government truck; that was a private truck.

Mr. THOMAS of Oklahoma. The record is silent on that proposition.

Mr. BLANTON. But, as a matter of fact, within the knowledge of the gentleman, that was a private truck.

Mr. TAYLOR of Tennessee. It was a private truck.

Mr. BLANTON. It was a private truck, so the gentleman from Tennessee [Mr. TAYLOR] says. I understood the gentleman further to say that intermittently since then Mr. Oliver has been in such a mental condition he did not know what was going on from time to time; is that the case?

Mr. THOMAS of Oklahoma. At different times; that is correct.

Mr. BLANTON. Then, if that is the case, how does the gentleman know, and how does the gentleman from Tennessee [Mr. TAYLOR] know, and how does the committee know that this alleged \$8,000 worth of Liberty bonds have never been returned to Mr. Oliver?

Mr. THOMAS of Oklahoma. I will answer that question by saying the records are conclusive, and there is nothing suggested to the contrary, that these bonds have not been returned to Mr. Oliver or his agents. At the time when he was ill and injured, and suffering in the hospital, he had agents, of course, representing him, and if these bonds had been returned the records would have so shown.

Mr. BLANTON. If Mr. Oliver has had a lapse of memory, which occurs frequently when a man is in such a condition as he is reported to be in, how is he now able to tell you, if he did lose \$8,000 in bonds, that they have not been returned to him? He at some time may have hypothecated them or used them or sold them and now has a lapse of memory concerning same—how are we to determine when he is subject to inter-

mittent loss of memory, that these bonds have not been returned to him? How do we know but that he has used them?

Mr. THOMAS of Oklahoma. It is my opinion, and I think the evidence is conclusive, that these bonds have not been returned; that Mr. Oliver suffered the loss of the bonds and in the sum of \$8,000.

Mr. RAMSEYER. Will the gentleman yield?

Mr. THOMAS of Oklahoma. Yes.

Mr. RAMSEYER. I would like to ask the gentleman how much weight are Members supposed to give to the letter from the Secretary of War incorporated in this report. Is it to be given weight as a reliable and truthful statement?

Mr. THOMAS of Oklahoma. I think so.

Mr. RAMSEYER. On page 5 in the second paragraph of the report the Secretary of War says:

During the recent war the United States entered into three shell-manufacturing contracts with the William J. Oliver Co. and one additional supplemental contract for overruns or excess production under an original contract. All of these contracts were fully performed. All shell manufactured to the total amount covered by contract were received and accepted by the United States, the full contract price paid therefor, and subsequently claim settlements were negotiated between the Oliver Manufacturing Co. and the Government for extras, increased facilities, etc., amounting to approximately \$66,000 in addition to the contract price of the shell and including practically the full amount of every item claimed at the time.

Mr. THOMAS of Oklahoma. Answering that proposition I will say that Mr. Oliver's claims were submitted in two classes—class A and class B. In class A there were three items covering three contracts that he had with the Government. The committee decided after considering these three items that because they were covered by contract claimant should come to Congress and ask the privilege of going into the Court of Claims.

Mr. RAMSEYER. Is it true or not that every claim for extras of the Oliver Manufacturing Co. presented to the department has been settled?

Mr. THOMAS of Oklahoma. No; that is not true. At a later date the claims were referred to the department, when Mr. WAINWRIGHT was Assistant Secretary. Mr. WAINWRIGHT turned them down because they were not filed in time. All claims under the Dent Act were to be filed by June 30, 1919. These claims were not filed during that time.

Mr. RAMSEYER. That is a different proposition. The claims that you claim in this bill would not be considered anywhere except in Congress, and the gentleman stated yesterday that the Government took charge of this plant in October, 1918, and did not return the plant until February, 1920; that it was under the charge of Government agents, and because it was under the charge of Government agents the expense of making the shells was greatly enhanced. Now, the Secretary of War says in the third paragraph on page 5:

On October 4, 1918, during the progress of work under these contracts, Mr. Oliver was arrested by agents of the Department of Justice as a result of charges said to have been instigated by labor representatives, alleging conspiracy to defraud the Government by the making of defective shell and certain overt acts in pursuance of such conspiracy. Mr. Oliver and other executives of the plant were placed under arrest and books and records of the company were seized. The Oliver Manufacturing Co. designated a trustee to carry on the business of the company, who continued in charge until approximately March 1, 1919, by which time the contracts had been completed. The claim settlements mentioned above were negotiated either by the trustee or other authorized representatives of the corporation.

That is, the contract the Oliver Co. had with the Government was completed March 1, 1919. Of course, the Government had no further interest in it. So it seems that the claim made here yesterday that the Government continued after that in charge of the plant is absolutely without foundation and is contrary to the statement of the Secretary of War. I do not see how we can go on the assumption that the Secretary sent a letter to the committee full of inaccurate statements. If I had time I would like to read other parts of the report.

Mr. THOMAS of Oklahoma. The testimony shows that on the 4th of October this plant was surrounded by soldiers, entered by deputy marshals, accompanied by Army officials and the district attorney. Mr. Oliver was arrested and with 11 of his foremen taken to the customhouse. While there under arrest in the presence of the Army officials representing the Ordnance Department of the Government they did agree on a trustee. Mr. Oliver was placed in a position where he had to accept the suggestion of the Ordnance Department and the district attorney.

Mr. RAMSEYER. Who named the trustee?

Mr. THOMAS of Oklahoma. The district attorney and agents of the Ordnance Department of the Government.

Mr. RAMSEYER. The Secretary of War says positively that the corporation named the trustee.

Mr. THOMAS of Oklahoma. I want to read from the hearings, page 23. This is from the testimony of Mr. Oliver himself.

Mr. BLANTON. Mr. Chairman, this bill as introduced seeks to pay out \$1,438,000. We surely ought to have a quorum here to consider this matter, and I make the point of order that there is no quorum present. I think the whole membership should hear the discussion.

The CHAIRMAN (Mr. CHINDBLOM). The gentleman from Texas makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and four Members present, a quorum.

Mr. THOMAS of Oklahoma. Mr. Chairman, on page 23 of the hearings we have the following language taken from the contract of trusteeship itself. In the trusteeship there is this provision:

For sufficient and satisfactory reasons between the parties and those in interest, the president of the said W. J. Oliver Manufacturing Co. hereby agrees that during the term of this trust agreement he will not have or assume any direction or control over the operation of said plant or to interfere with the trustee in any manner in his operation of said properties, under the terms of this agreement, and will refrain from going in or on the premises covered by this contract.

Later on in the testimony we have the following conditions surrounding the making of the contract:

Now, I will ask you, Mr. Oliver, what were the conditions under which you signed this trust agreement?

Mr. OLIVER. There were a number of Army officers in the room and I was under arrest, and I had to do anything they wanted me to do.

Mr. HUMPHREY. What, if anything, did they say they would do if you did not sign it?

Mr. OLIVER. They said, "Sign, you ———; you will not need any of this when we get through with you."

Mr. HUMPHREY. What did they say they would do if you did not sign this?

Mr. OLIVER. They arrested me.

Mr. HUMPHREY. I mean, what did they say, if anything, they would do with your plant if you did not sign?

Mr. OLIVER. They had the plant. They had the men there with drawn pistols, 35 deputy marshals in the room.

Mr. RAMSEYER. Right there, if I may interrupt the gentleman, does the gentleman claim that that happened the day that he was arrested?

Mr. THOMAS of Oklahoma. The record shows that this contract was entered into the afternoon of the day of his arrest. It appears this trusteeship agreement had been worked out in the minds, if not on paper, of those responsible for this atrocity.

Mr. RAMSEYER. He said certain Army officers stood there and made him do this. Did the committee get the names of those officers and subpoena them as witnesses?

Mr. THOMAS of Oklahoma. The record can be had on that proposition, but it makes no difference so far as I can see what the names were. If these Army officers were there with drawn revolvers, as the evidence shows, what their names were is inconsequential and immaterial. We did not get their names.

Mr. RAMSEYER. If we had the names, their testimony would corroborate either Mr. Oliver or the Secretary of War.

Mr. EDMONDS. Mr. Chairman, if the gentleman will permit, we are not proposing in this bill to pay anything that has already been paid. We are proposing to pay the difference occasioned by the trusteeship in the cost of the manufacture of the shells. In other words, the \$101,000 is the difference of \$3.25 per shell in the cost of the manufacture between what Mr. Oliver would have manufactured them for, or was manufacturing them for, at the time they took the plant over and what they cost under the management of the trusteeship.

Mr. RAMSEYER. I assume that there is a conflict in the evidence before the House as to whether this trustee was appointed by the corporation or by the Government. The Secretary of War said that this trustee was appointed by the corporation. Therefore, for anything that happened under him certainly you could not hold the Government liable.

Mr. EDMONDS. But it will be remembered that this man was appointed trustee by force, not by the desire of the corporation. The corporation was bound, of course, to protect this property, but the War Department insisted upon the appointment of the trustee.

Mr. RAMSEYER. That statement again is sharply contradicted by the Secretary of War.

Mr. EDMONDS. The Secretary of War had nothing to do with that. The Department of Justice had that in hand.

Mr. MORTON D. HULL. Mr. Chairman, will the gentleman yield for a question?

Mr. EDMONDS. The gentleman from Oklahoma has the floor.

Mr. THOMAS of Oklahoma. I yield.

Mr. MORTON D. HULL. I would like to know how the gentleman determines what it would have cost.

Mr. EDMONDS. By the actual cost in the books.

Mr. MORTON D. HULL. What it would have cost?

Mr. EDMONDS. We have to take his performance before that and what it was costing him at the time he was making them.

Mr. STEPHENS. They have the statement of an expert accountant.

Mr. MORTON D. HULL. But the loss was due to his absence from the business.

Mr. EDMONDS. As I understand the matter, the production went away down.

Mr. MORTON D. HULL. His absence was due to the accidents that happened to him, was it not?

Mr. EDMONDS. Not at all. They would not allow him to go on the property.

Mr. TINCHER. Does not the agreement provide that he shall not have anything to do with this business during the time that they were there?

Mr. THOMAS of Oklahoma. Certainly.

Mr. TINCHER. They barred him from his business.

Mr. THOMAS of Oklahoma. Answering the question of the gentleman from Iowa [Mr. RAMSEYER], I want to make it clear that this bill is not seeking to recover any damages that could have arisen from the contract itself. The Secretary of War has settled all damages arising under the contract. The Secretary of War said that if there be additional damages, those damages are up to Congress, that he can not consider them because he had not jurisdiction, and it is that particular class of damage that can not be considered by the Secretary of War that Mr. Oliver is presenting to the Congress.

Mr. GILBERT. Mr. Chairman, if the gentleman will yield, answering the gentleman from Iowa, it does not seem to me to make any difference who named this trustee, whether Mr. Oliver or the Government. If the trustee was unnecessarily and unjustly forced upon this man, and this loss as a consequence was sustained, it is really immaterial who had the naming of the trustee.

Mr. THOMAS of Oklahoma. Answering the suggestion made by the gentleman from Texas that Mr. Oliver was injured and as a result of his injury he could not claim damages from the Government, the record shows that Mr. Oliver was going to the courthouse from his home some 2 miles in the country, over a road which probably had no sidewalk upon it; he was walking in the road; that in going to the courthouse he got out of the way of one automobile, but stepped in the way of a truck. This truck struck him on the head. For many months he lingered between life and death. He survived. His physical body has been wrecked. His mind at times, at least, has been injured.

When Mr. Oliver came before the committee he could only come by the assistance of a cane and an attendant. I understand his condition now is worse than then. From a man physically sound and mentally alert at that time, through this incident he has been rendered a man physically broken and rendered mentally, I might say, unfit. Now, had it not been for this transaction he would not have been in the road; had he not been in the road he would not have been hit by this truck, and had he not been hit by the truck he would not have been injured as he is to-day.

Mr. DOWELL. Will the gentleman yield?

Mr. THOMAS of Oklahoma. I will.

Mr. DOWELL. Does the gentleman believe that this House can consider the question that this man was a wreck and prosecuted for something of which we may concede he was not guilty, and by reason of things pending at the courthouse he got on the street and was run over by a truck, and that therefore the Government should pay by reason of the negligence of somebody for that injury?

Mr. THOMAS of Oklahoma. Mr. Oliver has not contended before this committee that he should be compensated for injury. It is only the question—

Mr. DOWELL. No; but the gentleman is making that as a reason why this should be paid, because if it had not been for this this accident would not have been.

Mr. THOMAS of Oklahoma. I did not so intend. I was only answering the gentleman from Texas that Mr. Oliver was

mentally deficient, and possibly during some of his mental confusion he may have received some of the bonds back from those who took them.

Mr. TINCHER. Will the gentleman yield?

Mr. THOMAS of Oklahoma. I will.

Mr. TINCHER. I understand it is proposed to pay Mr. Oliver in this bill the amount which cost this plant extra to manufacture these shells by reason of taking it away from him and turning it over to the Government, and the gentleman is mentioning the fact of his injury in defense of the intimation, perhaps, that he would not need the money here because of the injury or should not recover because he might have done something which he did not remember.

Mr. THOMAS of Oklahoma. Let me say further on this point before yielding. I realize this is not in that class of claims which could be presented upon the written code. I realize that neither the Government nor the State can be sued without their consent. I realize when a Government, National or State, arrests a man under a charge and presents its case in court and that case fails, the fact that the man was arrested and damaged gives no claim against the State or Government. But, gentlemen, this is a war-time proposition. It is not in that class of cases that might arise in peace times, for in peace times no owner or manager of a company would be taken, a cordon of cavalry thrown around his place of business, his property placed in the hands of an agent not appointed by the confiscating power. That only occurs in war times. This is a war-time case, and such a one I have not seen before.

Mr. BURTNESS. Will the gentleman yield?

Mr. THOMAS of Oklahoma. I will.

Mr. BURTNESS. I am a little curious to ascertain this. The person placed in charge of this plant I believe was named McCoy?

Mr. THOMAS of Oklahoma. That is the name in the record.

Mr. BURTNESS. Who was he?

Mr. THOMAS of Oklahoma. He was the man selected or agreed upon by the Ordnance Department, the district attorney, and the bankers of Knoxville, Tenn.

Mr. BURTNESS. Was he a banker in Knoxville?

Mr. THOMAS of Oklahoma. If my memory serves me, he was a banker there.

Mr. BURTNESS. Was he a banker that the Oliver Co. had been doing business with?

Mr. THOMAS of Oklahoma. I could not say on that proposition.

Mr. BURTNESS. Mr. Oliver, page 6 of the testimony says this in answer to a question put to him by his own attorney, Mr. Humphrey.

He was a banker that I was doing business with. He was put in with the consent of the Government officials.

If you read Mr. Oliver's testimony correctly apparently Mr. McCoy was selected by the corporation and the Government consented to his selection rather than selected by the Government and consented to by the Oliver people.

Mr. THOMAS of Oklahoma. I have just read the testimony, and it is for the committee to determine for themselves whether such appointment would have been made had this been in peace time rather than war time.

Mr. BURTNESS. Does the gentleman know whether or not the creditors of the Oliver Co. were willing for Mr. McCoy's selection as trustee?

Mr. THOMAS of Oklahoma. There is no record of that as far as I know.

Mr. BURTNESS. Who was Mr. Humphrey who appeared before the committee?

Mr. THOMAS of Oklahoma. If I am correctly advised he was for a long time an honored member of this body and at the time mentioned was acting in behalf of Mr. Oliver as his attorney in presenting his claim before the committee.

Mr. BURTNESS. On page 2 of Mr. Oliver's statement appears the following:

On the day following, October 5, 1918, in order to prevent the War Department from commandeering the plant and taking exclusive control and charge of the same, and in order to protect, as they believed, the commercial business of said plant, as well as to facilitate the carrying out of Government contracts, and upon the urgent solicitation of the largest creditors of said manufacturing company, said company made a deed of trust appointing William J. McCoy as trustee, and turned over to said trustee the plant and business of every kind and character connected therewith.

Now, that is a fair summary of the testimony, in so far as the turning of the plant over to the trustee is concerned.

Mr. BYRNS of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of Oklahoma. I yield to the gentleman from Tennessee.

Mr. BYRNS of Tennessee. As the gentleman from Kentucky [Mr. GILBERT] very pertinently suggested a while ago, it seems to me it makes no difference who appointed the trustee, whether he was appointed by the company or by the Government with the consent of the company. The fact of the appointment of the trustee was made necessary by the unwarranted action of the Government, regardless of who appointed him. If the Government had not taken over this plant the appointment of a trustee would not have been necessary.

Mr. THOMAS of Oklahoma. I will just say in conclusion that the claims submitted to the committee embrace numerous items. The total of the claims is something like \$1,400,000. The committee in considering these items decided that many of them could not be considered or recommended for the consideration of the Congress. The committee came to the conclusion that certain of these claims should be embodied in a jurisdictional bill giving Mr. Oliver the right to go into the Court of Claims. The committee picked out three items which it was willing to recommend for the consideration of this Congress.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. THOMAS of Oklahoma. I ask unanimous consent, Mr. Chairman, to proceed for five additional minutes.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired. The gentleman from Oklahoma [Mr. THOMAS] asks unanimous consent to proceed in his own time for five minutes. Is there objection?

There was no objection.

Mr. THOMAS of Oklahoma. The first item was the loss occasioned because of the increased cost of production of these shells. The testimony shows that when the plant was taken over by the Government there were 31,300 shells yet to be made, and that the cost of producing these shells increased \$3.25 per shell under Government supervision over and above the cost under Mr. Oliver's supervision, and by multiplying the 31,300 by \$3.25 you derive the amount of the first item. We recommend that that element of damage be allowed.

The second element is for the loss of Liberty bonds that were taken away and not returned. Mr. Oliver is clearly entitled to be reimbursed for the loss of those Liberty bonds, in the sum of \$8,000. That is item No. 2.

Mr. ROMJUE. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of Oklahoma. Yes.

Mr. ROMJUE. May I inquire of the gentleman were those bonds registered?

Mr. THOMAS of Oklahoma. The record does not state that they were registered.

Element No. 3 was the loss of salary. The record shows that Mr. Oliver was drawing \$50,000 a year salary from this company as president and managing officer and that he had been drawing that sum for some time. The record shows that at about this time Mr. Oliver was offered \$100,000 for his services by a shipbuilding company in Florida and that at the request of the War Department, or officers thereof, he turned that offer down. He was receiving \$50,000 per annum. That is \$4,158 per month. The record shows that he was deprived of the possession of his property for something like 14 months, during which time he did not receive his salary. It was for the loss of salary that item No. 3 covers, figured for the time he was deprived of same. Those three items—the loss in the manufacture of the shells, the loss of the Liberty bonds, and the loss of his salary—make up the amount recommended by the committee.

Mr. HUDSPETH. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of Oklahoma. Yes.

Mr. HUDSPETH. Does not the record also show that when the Government took over this man's plant he was a wealthy man and had all this property and that now he is a hopeless invalid and is not worth a dollar in the world?

Mr. THOMAS of Oklahoma. Yes.

Mr. BLANTON. Does the gentleman dissent from this statement made by Secretary Weeks?

In order to remove any misapprehension that might be occasioned by the language of this bill I feel constrained to point out that the plant was not seized or held by the War Department. Mr. Oliver and his associates were arrested, the plant was searched, and certain records were seized by officials of the Department of Justice, but the Oliver Manufacturing Co. retained possession of the plant and operated

it under the immediate direction of a trustee appointed by the company. Officers of the Ordnance Department remained at the plant in an advisory capacity during operation by the trustee, just as they had been at the plant in the same capacity prior to Mr. Oliver's arrest.

Does the gentleman dissent from that?

Mr. THOMAS of Oklahoma. The committee takes the view that while the War Department did not seize the plant, it was seized under the order of the Department of Justice by deputy marshals who were under the Department of Justice. The committee takes the view that it is immaterial what department took charge of the plant. Possession was taken by the Department of Justice at the instance of the War Department.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

Mr. BLANTON. Mr. Chairman, I ask that the gentleman from Oklahoma may have two minutes more.

Mr. KETCHAM. Make it five minutes.

The CHAIRMAN. Five additional minutes is asked for. Is there objection?

There was no objection.

Mr. BLANTON. I would like to ask the distinguished gentleman from Oklahoma this question: The Government claims that whatever it did, it did it believing that this man was engaged in a conspiracy to manufacture defective shells. Here is what the Secretary of War says:

It is possible that the arrest and prosecution of Mr. Oliver was characterized by incidents that gave rise to justifiable criticism and that financial loss may have resulted therefrom.

The department holds, the Secretary of War holds, that whatever criticisms were made of Mr. Oliver and his friends were justifiable. What does the gentleman say as to that?

Mr. THOMAS of Oklahoma. The worst thing that is shown against Mr. Oliver is this: When these shells were made it was necessary to put a thin disk of lead between the outer shell and the inside contents, and when the supply of these disks ran out it became a question whether to lay off the men until a further supply of disks could be obtained or continue in operation by making his own disks. Mr. Oliver, with the consent of the Government inspectors, obtained the equipment necessary to make his own disks, and by means of those appliances he cut out the disks himself. That is the worst thing that was brought out against Mr. Oliver as to the manufacture of "defective shells."

Mr. KETCHAM. Mr. Oliver was engaged in filling a contract for the manufacture of 100,000 shells, and he had 60,000 shells completed and 30,000 yet to complete. Does the testimony in the record show any evidence at any point of any difference in the character of the shells manufactured before and after the time the shells were seized?

Mr. THOMAS of Oklahoma. Everything that was done was done under the inspection of agents of the Ordnance Bureau.

Mr. BOX. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. BLANTON. Mr. Chairman, in order that the gentleman may be heard, I make the point of no quorum. It is very evident there is no quorum present.

The CHAIRMAN. The gentleman from Texas makes the point of order there is no quorum present. The Chair will count. [After counting.] One hundred and seven gentlemen are present, a quorum.

Mr. BOX. Mr. Chairman and gentlemen of the committee: The facts in this case are many and much confused. I especially request that Members permit me to proceed until I have finished my effort to state the facts to the House and thereafter, if I have time, I shall be glad to make an effort to answer any question.

This is just such a state of facts as is most difficult to deal with. They are foggy, inconsistent, broken in every way, and of the kind that it is most difficult to ascertain and properly estimate. If I as an attorney were called upon to inquire into the facts in this case and to ascertain them and report upon them satisfactorily, I think the time required would be measured by months. I am the only member of the committee objecting to the payment of the claim, but it seems to me positively absurd to propose to pay this money on this claim upon the showing made.

The claim grows primarily out of labor troubles which began in Mr. Oliver's plant something like a year and a half before his arrest. There had been a strike; a labor man had been

assaulted on the premises or somewhere about them. There was a suit, I believe, against Mr. Oliver for \$25,000 damages, in some manner connected with that. Then came the making of a large number of complaints by certain employees of Mr. Oliver, apparently with the advice and assistance of the attorney representing the local labor union, resulting finally in his arrest. Then on the day of his arrest, when the plant was seized for the time being, or the next day, Mr. Oliver, probably because of his arrest and because of the urgent insistence of creditors, executed a deed of trust turning his plant over to a trustee to operate it. Then four or five days afterwards, or within 30 days—some of the statements are that it was within 30 days and some 4 or 5 days, but I think it is about 34 days—Mr. Oliver suffered a personal injury. The only theory on which the Government can be held liable for his personal injury is that he had a complaint lodged against him and was going to the courthouse to appear before the commissioner on the hearing. While he was in the road going to the courthouse to answer this complaint some person, to your committee unknown, ran over him with a truck and seriously injured him, since which time it is said, I think correctly, he has been a physical wreck and, to a large extent, a mental wreck; he has been paralyzed. That condition began within either 4 or about 34 days after his arrest.

The concern was financially. It had not paid a dividend since 1913. Mr. Oliver was indebted to the plant. He was its principal stockholder. I think these facts are not shown in the report, but papers in the files in the case show that he held all but about 5 shares of about 575 shares, of \$100 each, issued by the corporation.

There was a claim first made of \$1,438,095.61, and my judgment is that all of it is as well established as any of it.

First, I call your attention to the fact that the concern was heavily indebted; that Mr. Oliver was merely a stockholder in it, the principal stockholder, and its president and general manager. I suggest to you as business men and as lawyers that Mr. Oliver has no right to any of the proceeds of that corporation or any of its assets until upon liquidation its general creditors, to say nothing of the holders of bonds secured by mortgages, have received their compensation.

The gentleman who presented this bill proposed that the corporation be paid \$1,438,095.61. The committee has amended it, providing this proposed payment of \$170,757.86 to Mr. Oliver, the principal stockholder of this insolvent corporation, which passed into the hands of a trustee the next day because of these difficulties and because of the urgent insistence of creditors—that trustee being a banker, Mr. McCoy, connected with the bank where the company did business.

To indicate how complicated, confused, and difficult of ascertainment the state of the concern's affairs has been and is in, I call your attention to the fact that \$44,101.62 has been incurred as auditors' fees in efforts to straighten out the affairs of that concern.

Three or four different firms of auditors, whose fees amounted to that, have been engaged in efforts to ascertain and state its condition, so tangled were its affairs. I only mention that to show you the utter absurdity of a committee sitting for two or three hours and hearing a few ex parte statements and then undertaking, at the expense of the Treasury of the United States, to make good the items of damages involved in the bill as amended and reported by the committee.

Mr. BEEDY. Will the gentleman yield?

Mr. BOX. I would like very much to yield, but I have to decline because I want to finish my statement, and then I will try to yield to every gentleman.

There were outstanding, according to the record, at some time since then—I do not know that they were outstanding at that time, but there were outstanding more than \$110,000 worth of bonds. My information is that the amount of these bonds was \$300,000, but the record shows merely that the amount of them was more than \$110,000. I read from the testimony of the auditor, Mr. Smethurst, on page 44 of the hearings:

As a matter of fact, I do not think the creditors will get anything, because there is a bond issue outstanding, and the plant when offered for sale only brought an offered price of \$110,000, which will not pay the bond issue outstanding, let alone any creditors or anything for Mr. Oliver himself.

Then it owes attorneys' fees and auditors' fees. I must take the time of the House to call attention to some of these.

There is another item that we did not get in—the fees of Richard Smethurst & Co., \$17,152.99. They have not been paid, and neither have these engineers' fees of \$15,000.

That appears on page 45 of the hearings. On page 43 the statement is made that the firm of Lindsay, Young & Young has a claim of \$10,000, \$1,000 of which, one member of the firm said, had been paid.

That is enough to illustrate to you gentlemen the fact that you are dealing with a bankrupt corporation; whatever the cause of this bankruptcy may have been you are now dealing with the affairs of a bankrupt corporation, whose creditors are entitled to all its assets—first, under the mortgage, and next under their rights as creditors—before any stockholder is entitled to anything.

Mr. Oliver had elected to do business under the advantages which the incorporation of his business gave him, and he has not the right to come here now and say, "Though I did business as a corporation, though this was a corporation subject to all the laws and giving me as a stockholder of that corporation all the benefits of incorporation, I now ask that its affairs, its interests, and the rights of its bondholders and creditors be ignored, and that Congress strike out all compensation to the corporation and pay it to me personally."

Another thing that makes it sound ridiculous to me, with all respect to all the other members of my committee, is that Mr. Oliver himself was indebted to the corporation at that time to the extent of something like \$60,000. He owed it. Its creditors shall recover nothing, but these claims due it, at least chiefly, shall be paid to him, its insolvent debtor. I do not know the exact amount, but he was indebted to it in a very large amount. I read from page 42 of the hearings and again from a statement made by Mr. Smethurst:

Mr. Oliver was paid during 1918 the sum of \$44,849 for salary at the rate of \$50,000 per year as president and general manager of the company up to the date of his arrest, except for which it is evident his salary would have readily offset his liabilities to the company, which under the circumstances became a total loss, amounting to \$61,032.86.

I read from the statement of Auditor Smethurst:

He never received any interest on such payments and drew no dividends except one of 9 per cent paid in 1913. The balance finally due the company represents the difference between such advances and countercharges which accrued later in connection with work performed by the company for some of Mr. Oliver's various other interests. (Hearings, p. 43, top.)

Now, he owed it and the corporation lost his services, and because it did not collect the debt Congress is asked to pay him what he owed the corporation in this salary item.

I may not get to the salary item again, and there is another reason why the Treasury of the United States ought not to pay this item. I am anticipating, but I do not want to omit it. This salary is to be paid to Mr. Oliver for what he would have earned as its president thereafter. His wages would have gone on his indebtedness, and it is claimed that the man was injured within 4 or 34 days thereafter and rendered incapable of attending to his business. That because thereof the company failed to collect the \$61,032.86 which he would have paid in services at the rate of \$50,000 per year. That disability is the excuse they give in the hearing for not being bound by their settlement with the War Department; that he had no capacity to handle business and did not know anything about it, and that is true. It is pathetic. But how are you going to say that he is entitled to that \$61,000, even if it had been coming to him instead of going to the corporation, on the theory that he would have earned it, except upon the theory that the Government is liable for the acts of an unknown party on the street or on the road in running over him and injuring him. Mr. Oliver was going to court, it is true, but certainly the Government is not liable because a man is injured going to court in a Federal proceeding. The theory that it is liable for the injury so suffered is the only basis for any claim of liability against the Government of the United States for the salary item.

There were some \$8,000 worth of Liberty bonds and stamps in Mr. Oliver's possession at the time they seized his company's plant. I pause here long enough to say that in the manner in which this is presented, upon this ex parte showing, there were some very high-handed things done there. If this ex parte consideration of it is to bind us, nobody would stand ready to apologize for a lot of things that were done.

Somebody, after Mr. Oliver left his plant, got his bonds and stamps. Who? The trustee, his banker, suggested by him and the creditors, and we will say by those participating in the seizure, whoever they were, took charge the next day. A letter from the Department of Justice shows that soon thereafter—I

would like to have that letter, if the chairman of the committee will permit—we have got very little information from the Department of Justice. There has been an effort made to get it, but information is shy.

Mr. EDMONDS. They are ashamed of it. They do not want to give it to us.

Mr. BOX. They ought to give it. There are a lot of papers that should be now in the custody of the Department of Justice which would help us. I read from the letter of the Attorney General's department to the chairman of the committee:

Shortly after the hearings on the search warrant case before the United States commissioner on November 30, 1918, counsel for the defendants entered into a written stipulation that the records and the property which had been seized under the warrant might be retained by the Government and used before the grand jury in all criminal prosecutions.

I do not offer this for any purpose except to show you why I do not see any clear proof as to who got Mr. Oliver's and the corporation's \$8,000 worth of bonds. It may have been a thief in his office; it may have been a thief connected with the group sent there by the Department of Justice. They may have been lost through the lapse of his memory, they may have gone in some other way, or they may have gone into the hands of this trustee.

Mr. TAYLOR of Tennessee. Will the gentleman yield?

Mr. BOX. I can not yield, and the gentleman will understand why. I will try to answer any questions later, but I do not know that I will have the time.

Mr. TAYLOR of Tennessee. This would be a very appropriate time.

Mr. BOX. But this record does not show that anybody connected with the Government got them. The record shows that numbers of people had opportunities to get them. It shows that people whom he placed in charge or helped to place in charge were in charge. If we allow this, we do it on the theory that every doubt must be resolved against the Government and every uncertain and unknown factor must by presumption be charged to the Government.

The bill consists of three items. The next is the item of \$61,032.86 for salary, that I have mentioned and already discussed—the salary that Mr. Oliver was giving to the corporation in payment of his debt to it, and which it lost, and therefore the Government should pay Mr. Oliver.

The next item is \$101,725, loss on shells claimed to have cost more, and shown in an ex parte manner to have cost more, because they were manufactured under the jurisdiction or administration of the trustee, his banker, appointed by creditors and by him and others. The record also shows that this was on a contract which, as has been stated here many times, was between him and the War Department, which contract and claims for damages arising from it were presented to the War Department on a claim for adjustment and a sum of some \$66,000 paid and a full release from the company obtained.

I call your attention to a letter of Secretary of War Weeks in the majority report at page 5:

All shell manufactured to the total amount covered by contract were received and accepted by the United States, the full contract price paid therefor, and subsequently claim settlements were negotiated between the Oliver Manufacturing Co. and the Government for extras, increased facilities, etc., amounting to approximately \$66,000 in addition to the contract price of the shell and including practically the full amount of every item claimed at the time.

Owing to the fact that full, complete, and final claim settlements had been negotiated and accomplished between the War Department and the Oliver Manufacturing Co., and the United States had received a final discharge from all claims and obligations of every nature arising out of the contract, it was considered that the War Department had no jurisdiction to entertain an additional claim arising out of the contract, and, of course, the War Department would have no jurisdiction to consider any claim for damages predicated upon the arrest or prosecution of Mr. Oliver.

Mr. LaGUARDIA. Will the gentleman yield?

Mr. BOX. I will have to decline to yield.

The \$101,725 ought not to be paid, first, because it ought not to be paid to Mr. Oliver in any event, and next, it ought not to be paid because the items that constitute it and the manner in which it was computed are not shown. The items of this settlement between Mr. Oliver and the Government are not shown. What items were charged and what were not, whether he got credit for this increase in cost or a part of it in his settlement with the War Department are not shown. All those

facts are left in such a state of doubt and uncertainty that those of us who feel responsible for the manner and amount in which we adjudicate claims and appropriate the Government's money do not feel that the facts justify such an award. In the next place, it is shown that these claims arising out of this contract were presented to the Government for settlement just as we said they should go. Oh, there is confusion I grant you; there is fog and some uncertainty; but there is no doubt that the whole matter of this contract and claims under it went to the War Department for settlement and full relief obtained. How do we know what entered into that? Where do we get justification for saying that we should pay him another \$101,725, notwithstanding the fact that the Government paid him \$66,000 in that settlement above the contract price, we do not know for what, but now we will pay Mr. Oliver \$101,725 more on account of that contract, notwithstanding the settlement it and he or the representatives of his concern made. There you are.

It is only fair to say that there is a contention throughout the record that Mr. Oliver should not be bound by this settlement. On page 46 of the hearings my colleague, Judge THOMAS, of Oklahoma, then apparently understanding this part of the case as I have it in mind, asked this question:

Just a question right there. The Government has settled, has it not, with the company for its liability in all of the contracts it had with Mr. Oliver or his company?

Mr. Smethurst answered:

Yes, sir.

Mr. THOMAS then asked:

And the claim you are presenting is a claim against the Government because of the illegal and wrongful act of the Government and its agents against Mr. Oliver as the owner and manager of his company, is that correct?

Then Mr. Smethurst said:

Not entirely—

He then mentioned some things to which I want to call your attention. At the bottom of page 46, the last paragraph under the title "Errors in law," it is said:

The contractor was not advised of his rights and settlement was entered into in accordance with a claim filed by the trustee who was appointed under the direction of the Ordnance Department.

Remember that Mr. Oliver and his creditors had at least a leading part in naming and constituting that trustee.

I have an idea that there are thousands of men holding war claims in the United States who can say that they "were not advised of their rights."

Uncle Joe Cannon, in discussing a bunch of war claims that came up here, dangerous and very threatening because of those to follow, said:

If you open up this class of demands you will have claims enough to patch hell a mile.

[Laughter.]

Now, gentlemen, if you open this settlement made through the War Department under the Dent Act, which fixed the time within which the claims should be presented, where are you going to end? How many more like this will come trooping in here saying, "You considered Mr. Oliver's claim and paid it, and Mr. Oliver was only a stockholder; now consider mine."

Another reason they give why the settlement should not bind, as claimed by Mr. Smethurst, "they were unable to present the facts at that time." (Hearings, p. 47.) There is another excuse why the settlement with the War Department should be reopened by special act of Congress. "Errors in findings of facts." (Hearings, p. 47.) That is another reason for opening up this settlement, because they committed some error in findings of facts. It is very easy for attorneys to insist that an error of fact was made in order to get a claim or case reopened. The auditor was laboring to overcome the force of the question asked by my colleague, Judge THOMAS. These are the results of that effort. Then Mr. Oliver's attorney speaks up and says:

I want to make plain to the Government that while these contracts were settled we do not think that Mr. Oliver was bound by them; but all of these items are additional and what we would have a right to have taken under consideration under the Dean Act. (Hearings, p. 47.)

That is what the attorney said about it. They should know more than the overworked Members of Congress, who get only three hours to delve into these old records. I am not alone when I tell you that I have read these old records until I have the headache.

The whole amount was made up of three items—\$8,000 worth of bonds, \$61,000 salary, and \$101,000 in damages on a contract which I have discussed.

Now, gentlemen, there are other considerations in connection with this. If you should conclude that you are to unsettle the War Department settlement: If you should conclude that you ought to pay the \$61,000 that Mr. Oliver owed the corporation and that he did not pay it because he got hurt; If you should conclude that the item of \$8,000 is one that you could safely allow as damages, then I ask you to consider with me two or three other suggestions in connection with the claim. First, the items of damage I mentioned are the result of a series of calamities that befell Mr. Oliver. In the first place, beginning about a year and a half before this and while his plant was engaged in the manufacture of shells for the Italian Government, serious labor trouble arose. This is not a case of joint torts. You can not charge the United States with all this liability, including what somebody did a year and a half before anyone in the service of the Government had any connection with it.

You can not award him, as I take it, damages because of the personal injuries. I want you now to listen to an account of the labor troubles. Mr. Chairman, I ask that the Clerk read from the record the portion which I have had marked.

The CHAIRMAN. Without objection the Clerk will read. There was no objection, and the Clerk read as follows:

STATEMENT OF MR. HAL H. CLEMENTS

Mr. CLEMENTS. At the time of and for a number of years prior to the seizure of the Oliver plant, I was the official attorney for the Central Labor Union of Knoxville, which is the parent labor body of all of the rest of the labor unions of the city, as you gentlemen probably have had occasion to find out in politics.

Some months prior to the seizure of the Oliver plant, there was a determined drive, not only in Knoxville, but all over the United States, on the part of organized labor, to organize each and every industry, and they were really taking advantage of war conditions to carry out their program.

Several months prior to the time when the Oliver plant was actually seized I was approached by an organizer for the machinists' union, by the name of Matt J. Robinson, whose home was at that time in Chattanooga, Tenn., or at least his headquarters were there.

Before Matt Robinson came to Knoxville there had been an organizer there by the name of Gilmore, who had made some effort to organize the Oliver plant and had failed. Gilmore later committed suicide in a hotel in another city.

Matt Robinson came to me and said that he wanted me to meet him and a number of the employees of the Oliver plant at my office for the purpose of taking certain affidavits from them in regard to the way the business was being conducted at the Oliver plant.

I met these gentlemen and prepared, in legal form, affidavits setting out the fact that they claimed that Mr. Oliver was manufacturing shells in violation of his contract; in other words, that he was making defective shells.

The federation held a banquet that night at the Atkin Hotel, and I remember that I was toastmaster on this occasion. I mention that fact because at that time I delivered to this representative of the Department of Labor, or, rather, Mr. Robinson delivered, in my presence, these affidavits, which were taken by him to Washington and turned over, so he stated, or were to be turned over to the Department of Labor.

Mr. W. T. Kennerly, who was at that time United States district attorney, and with whom I am on most intimate terms—I was before, and have been since, as a brother lawyer—has stated enough to me since that time for me to know and state that that was the real beginning of the trouble, which finally culminated in the seizure of the Oliver plant.

Mr. CLEMENTS. These affidavits set out the fact that there were additional lead disks being placed in the shells, as I recollect—it has been a good many years ago—and there were certain sand holes, or something, that they were welding up, in violation of the Government rules, etc., in some of the cast-iron shells.

I do not remember all of the various things stated in the affidavits, but from what I have learned since, I think that later the Department of Justice must have received these first affidavits; in other words, the Department of Labor must have referred them to the Department of Justice, and they sent certain secret service officers and other Government agents, who did not have anything to do with me, and whose presence I did not know of at the time, and have only learned since, and that they probably took additional affidavits, which were probably much stronger than the original affidavits taken by me.

Mr. HUMPHREY. Do you remember well enough to state whether or not the affidavits charged a crime against Mr. Oliver, if the statements were true?

Mr. CLEMENTS. Yes; they charged that he was secretly defrauding the Government, or words to that effect, by making defective shells.

I want the record to show that, as a result thereof, Mr. Oliver and I became estranged, and I am here now feeling that he has been done a great injustice. I am here without hope of any reward, as a volunteer, not paid counsel, but to try to right a wrong that I think has been done him, and of which I was an interested party as a lawyer.

Mr. SEARS. Do you think that any of those men came there for the purpose of carrying out a preconceived plan?

Mr. CLEMENTS. I do not know about that, Judge. Those organizers who came there were strangers to me, of course, and simply came to my office, because I was the official attorney of the Central Labor Union of Knoxville. Probably they made inquiry, and found out, and that is the reason they came to me.

Mr. CLEMENTS. Let me add this to my statement: I do know that Mr. Oliver discharged a man by the name of Leek and his son, and these men were very bitter in their attitude toward Mr. Oliver and probably helped work out a good deal of this evidence.

AFFIDAVIT OF T. A. WRIGHT

While the manufacture of high-explosive shells for the Ordnance Department of the United States Government was going on, and, in fact, while the Italian shells were being manufactured, the Oliver Manufacturing Co. was at many times greatly annoyed by labor troubles and disputes, not coming from within the factory but by agitators or people who apparently were moved by bad motives, interfering with the labor organization of the William J. Oliver Manufacturing Co. The plant was kept, however, fairly free of troubles of this kind during the year 1917, until some time near the middle of the summer of that year, when strenuous efforts were made, as was believed at the time, to seriously handicap the plant in its operations by agitators from the outside, and Mr. Oliver, the head of the Oliver Manufacturing Co., in resisting this apparently incurred very serious enmity of a number of these agitators and leaders in the movement to handicap and interfere with operations of the plant, as then understood.

All of this culminated in the early part of October, 1918, when, without warning and when the plant was operating to a high degree of efficiency, warrants were sworn out through the Department of Justice, and a number of deputy marshals, together with a platoon of soldiers, went to the place of the William J. Oliver Manufacturing Co., closed the plant against any of the employees leaving it for a considerable time and anyone from the outside entering the plant, and arrested Mr. Oliver and nine of his principal foremen on a charge of sabotage and fraud, as stated in these warrants. After some little time I went to the plant as attorney for the company and found this condition of affairs existing, and found the deputy marshal engaged in seizing and taking into their control and away from the plant all the records and files of the same, correspondence, books, etc., and also taking into their possession and control some 400 or more of the practice cast-iron shells, all of which were removed to the custom-house here in Knoxville.

Mr. BOX. Mr. Chairman, this is a grievous state of affairs. I refer to the occurrences shown by what the Clerk has just read and to others which I have mentioned, consisting of personal quarrels, strife, assault or alleged assault against labor men, suit for damages for personal injuries brought against Mr. Oliver because thereof; indeed, a protracted series of labor troubles extending over a year and a half. The corporation had not paid a dividend since 1913, which was the only one it ever paid. It was heavily in debt. It had "largest" creditors, who insisted on its executing a deed of trust naming Mr. McCoy, who was connected with its local bank, as trustee and placing the plant and business in his charge on the day of or the day following the seizure. The trusteeship caused much of the loss. The receivership following later caused more of it.

Another element that entered into it is the personal injury, to which I have referred. We can not award judgment or make an appropriation to satisfy a demand for personal injuries on that account. I have heretofore insisted that the Government of the United States ought not to be held liable for any criminal prosecution. We have not had all of the facts from the Department of Justice. There has been a call for them, and the response has been regrettably brief—very unsatisfactory. They have not been satisfactory to me. They give you no information. If an outrage has been committed by that department, the facts should not be concealed. Certainly they should not be withheld in aid of an effort to get money out of the

Government on an unjustified demand. So that we have the personal injury and the labor trouble and the prosecution. There is no joint tort there. It is true that they all entered into a general result, but so do all disconnected misfortunes. There has not been any joint tort here which would make the United States liable for all damages Mr. Oliver or his corporation claims to have suffered. If you conclude that you ought to hold the United States liable on this ex parte presentation, you will have great difficulty in ascertaining, even approximately, how much of the damages resulted from any one of the several causes.

There was labor trouble for a year and a half, with strikes, discharges, personal assault, a damage suit for personal injuries, several affidavits against Mr. Oliver charging the fraudulent manufacturing of defective shells; finally came the arrest, followed immediately, or on the next day, by the execution of a deed of trust for the benefit of creditors. Then came the personal injuries. Later came a receivership. If my colleagues on the committee are thoroughly familiar with the facts, as I would expect them to be, they would tell you that those \$300,000 worth of bonds were placed after this seizure. Creditors after the seizure evidently did not think him ruined, if they extended new credit. If the bonds merely funded old indebtedness, then it had heavy old indebtedness. Whether the bonds were placed then or at some other time, all of the assets of the corporation belong to these creditors now. I know I am correct about that; the House can express its own views when it votes.

These facts are very voluminous. I have not been able to present them all as I would like to have presented them. I have the right to extend, and I shall add some matters that I have omitted, but this is substantially all of the case which I can present now. Neither my information nor the statements which I and my colleagues of the committee can make to the House is sufficient to enable its membership to pass intelligently on the claim; but I have given you the best statement the limitations of circumstances will permit.

Mr. BOWLING. Mr. Chairman, will the gentleman yield?

Mr. BOX. Yes.

Mr. BOWLING. I would like to ask the gentleman perhaps a half dozen questions for my own information.

Mr. BOX. The gentleman will be very lucky if he is able to answer one of them.

Mr. BOWLING. At the time of this seizure was this a going concern?

Mr. BOX. It was, according to what I gather from the record.

Mr. BOWLING. Was this strike the proximate cause of Mr. Oliver's arrest?

Mr. BOX. I think the strike was not. I believe that the grievance, the trouble with labor, the trouble with the labor agitators caused the complaint and the prosecution and ultimately resulted in the arrest.

Mr. BOWLING. If I understand the reading by the Clerk, he was arrested at the instance of these labor agitators. If I am correct in that assumption, was Mr. Oliver responsible for his own arrest in any way?

Mr. BOX. The labor agitators, according to the affidavit, made complaints, and the witness Clements, then the attorney for the union, expressed the opinion, in which the gentleman from Texas shares, that that was the beginning of this trouble. I think there were other affidavits. I think there was an investigation by the United States Secret Service at the time, and that all of it together culminated finally in this arrest.

Mr. BOWLING. He was indicted and charged with some offense which was finally dismissed upon hearing in the courts?

Mr. BOX. Yes; but not all unsuccessful criminal prosecutions are from bad motives or even without probable cause.

Mr. BOWLING. Were all of those charges upon which he was finally dismissed included in the charge that he was making defective ammunition down there?

Mr. BOX. I do not know of any other charge except that and the things incident to it.

Mr. BOWLING. The gentleman stated in his remarks that this concern went into bankruptcy.

Mr. BOX. If I stated it in that way, let me make a correction. The concern, at the instance probably of the Government, and certainly of the creditors, executed a deed of trust and turned the plant over to Mr. McCoy, the local banker, who became the trustee.

Mr. BOWLING. About how long after this seizure was it until this concern became bankrupt?

Mr. BOX. If the gentleman may express his personal conviction, based on all his investigation, he thinks that it was at that time seriously involved. The record indicates that

there was later a receivership. At first this trustee and the administration by him, and later a receiver and a great volume of attorney fees and receiver fees and many things like that. The gentleman, as a practicing lawyer, knows how those things accumulate about an insolvent corporation.

Mr. BOWLING. I have just one other question, and I thank the gentleman very much for his indulgence. Does the record show these Liberty bonds in question were seized at the time the place was raided?

Mr. BOX. To be exactly accurate, the gentleman from Texas is not clear on that. He knows Mr. Oliver testified he had the bonds there in the office at that time and has never seen them since. If he is in error about the substance of the testimony, he would be glad to have any Member correct his statement.

The CHAIRMAN. The time of the gentleman has expired.

Mr. EDMONDS. Mr. Chairman, can we get some understanding with regard to the time on this bill?

Mr. BLANTON. Well, I want considerable time on it, because I have given close study to this case.

Mr. EDMONDS. How much time does the gentleman desire—15 minutes?

Mr. BLANTON. We helped the gentleman to get to-day with the understanding there should be liberal debate.

Mr. EDMONDS. I want to be liberal.

Mr. BLANTON. Let us proceed along under the rules of the House; the rules of the House are all right.

Mr. WINGO. May I inquire of the gentleman when he expects to get a vote; this week or next week?

Mr. EDMONDS. It looks like next week.

Mr. McREYNOLDS. Mr. Chairman and gentlemen of the committee, I have listened for some time very attentively to the argument of the distinguished gentleman from Texas. I am sure that he did not wish to be unfair, but many of the deductions which the gentleman makes from this testimony I feel are unwarranted; and, permit me to say, he is one of the most conscientious members of our committee, in whom we all have great confidence and for whom we have great respect; but he is so conscientious about many of these claims and he is so much interested with the fear that the Government will not be properly treated that he has often grown suspicious of their consideration. I was very much surprised to hear his complaint on yesterday when he was almost calling in question the revival of the old rule of this House giving Friday for the consideration of claims. I remember that several members of the committee, the gentleman from Tennessee being one of them, requested at the last term that we be given a hearing of these claims other than by unanimous consent that have been reported out of committee. When a claim is reported out of the committee I feel like that claimant is entitled to the consideration of that claim before this House upon its merits, and I am very glad indeed that they have given us opportunity to consider these claims. I feel that the House gave due consideration to the claims on yesterday, although I did not agree with them on some; but these matters are to be decided by the House, and there is no imputation of wrongdoing whenever the House decides as they see proper. This case before you is very important. It is a very important claim, and, according to my ideas after due and proper consideration of it, it is but a small amount of what should really be allowed. The distinguished gentleman a few minutes ago made the statement that when this company was taken over by the Government—or leaving that impression—that it was heavily involved.

I can not see the testimony in this record from which he can draw such conclusion. For the first part of the argument he cited you to the record in reference to these bonds, and later, about 20 minutes later, after that had time to soak in, he stated that perhaps those bonds were placed in this company that had gone into the hands of a receiver.

Mr. BOX. Will the gentleman yield?

Mr. McREYNOLDS. Certainly—

Mr. BOX. I read—

Mr. McREYNOLDS. Do not read.

Mr. BOX. I want to say the record shows evidently Mr. Oliver was heavily indebted to the plant himself at that time.

Mr. McREYNOLDS. I will come to that.

Mr. BOX. Can I ask one question more?

Mr. McREYNOLDS. Perhaps I should show the gentleman the same courtesy and say, wait until I get through.

Mr. BOX. I shall do so.

Mr. McREYNOLDS. I claim that the record in this case does not show that this concern was heavily involved at the time this property was taken over, but the record does show that it was a going concern, and that he was discounting his bills at the time this property was taken. Another peculiar

argument—that the labor organizations were responsible for Mr. Oliver's arrest and therefore the damages incurred were so connected between the Government and the labor organization that there is no chance for this body to do justice in this case. If there was trouble with the labor organizations, and there was, and they had been fired by Mr. Oliver, then those people who signed this affidavit, the Government officials, was it not more incumbent upon them to be a little more careful about the consideration of the class of evidence upon which they were put out and these warrants which practically and absolutely ruined this man?

It was in war time. There was labor trouble. This record shows that in the room of the officials of the Government at a hotel, Mr. Snyder being present, these men who had been discharged by Mr. Oliver were brought together and there these affidavits were made, and that it was upon these affidavits later that the Government issued the warrant that caused this arrest.

Now, was there probable cause at the time for the arrest of Mr. Oliver? Was that arrest based upon sufficient facts warranting a reasonably prudent man to issue this warrant and take charge of that plant? What is the answer? Justice McCall, from Memphis, came there and tried this case, an indictment with 26 counts presented by the Attorney General, and after a week's presentation the judge from the bench dismissed 23 of these counts and the Attorney General nol-prossed the other three.

Does that show that there was a probable cause for taking charge of the plant?

In this record is this:

A few days later these discharged employees met with Captain Avery, chief of ordnance, stationed at the Oliver plant, and Trazzere, who was at the head of the Military Intelligence Bureau, stationed at Atlanta, and a man by the name of J. S. Snyder, who was connected with the Government service in some way, at the rooms of Captain Avery at the St. James Hotel in Knoxville, where the discharged employees made statements that they had been discharged for joining the union, and also referred to certain irregularities carried on by Oliver and his superintendents at the plant.

That is from the record, pages 16 and 17.

I say that these officials of the Government, knowing the conditions that existed with reference to the labor trouble, ought to have been more careful about acting upon affidavits made by those people.

The facts are these, that they came there and took charge of Mr. Oliver's plant without any knowledge on his part that that would be done. With no notice they surrounded the plant, and rushed in while Mr. Oliver was sitting at his desk and arrested him, and not only him, but also nine of his superintendents or foremen in that plant.

The question is raised as to whether or not those \$8,000 of stamps and Government bonds were taken. The proof shows that they were there in Mr. Oliver's desk, and that these men, in charge of these officials, came in and took charge and emptied the desk of everything and took this property. That is what happened, gentlemen.

Now to give you, gentlemen, a very clear and concise statement of just what occurred at this arrest and the putting in of Mr. McCoy as trustee, I want to read to you that portion of the testimony of Hon. T. A. Wright which the gentleman from Texas did not have read, showing what occurred when Mr. McCoy was appointed trustee.

Mr. HUDSPETH. Mr. Chairman, will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. HUDSPETH. Who was Mr. T. A. Wright?

Mr. McREYNOLDS. Hon. T. A. Wright at that time was one of the most prominent men in east Tennessee. He has since died. He was an attorney. I knew him personally. Almost every man in his portion of Tennessee knew him.

Mr. BULWINKLE. That is on page 64 of the hearings.

Mr. McREYNOLDS. Yes; pages 64 and 65. Here is the part of the testimony of Mr. Wright that I referred to. He first describes the situation in that portion of the testimony that was read, and then he continues his statement of what was occurring. He says:

My recollection is that that was October 4, 1918. After the bond was made, or about the time they were completed, I learned that the control of the plant, and, in fact, the entire operation there, had been taken charge of by the district ordnance department of Cincinnati. There were present Mr. G. S. Haydock, of the ordnance department, Cincinnati; also, Mr. Lampson, as I recall, and, I think, Major McClellan, and some four or five others—Army officers—who had apparently taken part in the seizure of the plant. I understood from Mr. Haydock, who was, according to my understanding at the

time, the assistant to Mr. Harrison, of the district ordnance department at Cincinnati, that the plant had been commandeered and would be taken over and operated, so far as the shell manufacturing department of it was concerned, for the use and benefit of the Ordnance Department of the Government.

I was in conference with Mr. Haydock and his associates, including these Army officers, most all of the remainder of the day of October 4—if that was the correct date, and I think it was—and which conference was renewed on the morning of October 5. I pointed out to the ordnance and Government officials that the William J. Oliver Manufacturing Co. was not only engaged in manufacturing or machining high-explosive shells, but that there was a very large foundry also being operated by the company, and also a very large machine shop, wherein many castings and other foundry products were being made for public utilities and various industries, the running of which was quite essential to the successful prosecution of the war, and that especially in the machine shop or car part of the plant of the William J. Oliver Manufacturing Co. the company was making a very large number of cars, and especially mining cars, which it was delivering to the coal operators of east Tennessee and Kentucky, and that if the plant was commandeered by the Government, and it used it only for the purpose of machining the shells for the United States Government, that they would close down a half or more of the entire operations of the plant, which would be extremely injurious and detrimental to the coal operators of the country, and would tend to prevent or greatly decrease the coal production of the sections referred to, and perhaps other sections, and would prove very detrimental to the United States Government.

The fact of it, gentlemen, is that only about one-third or one-half of this foundry was taken up with the manufacture of shells; but when the Government took charge they proposed to run only the shell department, and they did run the shell department.

Mr. Wright says in this statement that he insisted that it would be of great damage to this company if they were not allowed to run the commercial side of it. He continues:

I was advised by the representative of the Ordnance Department who then had charge of the plant that they would not expect to operate any part of it except that part which was engaged in the machining of shells and preparing them for use, and we then negotiated for some considerable time to see if we could not allow the William J. Oliver Manufacturing Co. to continue to use its foundry and machine shops and all that part of it not engaged in the manufacture and preparation of these shells for the Ordnance Department and to continue its operation of these departments. Many objections were found to this on the part of the Government representatives, and, among other things, they declined and refused to allow Mr. William J. Oliver or any of the other nine defendants, who were, as stated, the principal foremen, to go into or about the plant, and after negotiating practically all day it was finally agreed by Mr. Haydock and his associates that if some person who would be satisfactory to them could be secured to act as trustee that they would agree for the William J. Oliver Manufacturing Co. to transfer or turn over to such trustee the entire plant of the company and all of its operations, and through this trustee they would permit the operations of the shell department to be continued, provided they were allowed to designate and name a man to have charge of these operations under this trustee, and that they would permit this trustee to continue to operate the other departments of the William J. Oliver Manufacturing Co. plant.

Mr. F. L. Fisher, of the East Tennessee National Bank, was present part of the time and participated in some of the conferences held, and after finding that this was the best and perhaps the only thing that could be done to prevent the entire plant being commandeered and used only for the operation of the shell department under the Ordnance Department, we advised the directors of the William J. Oliver Manufacturing Co. that it was the only thing that could be done to prevent not only the entire destruction, as it seemed to us, of the William J. Oliver Manufacturing Co., but to also prevent very serious loss to the Federal Government in having this very large, well-equipped, and successfully operated plant from being shut down upon all character of work that it was doing, except the manufacture of shells, which I do not think occupied much over one-third, if any more, of the entire plant.

The directors, you will notice—not the creditors, but the directors—were advised. And permit me to say right there that the proof in this case shows that Mr. Oliver owned practically all of that stock, all except, as the gentleman from Texas says, about \$500 of the stock. Under the laws of Tennessee for a man to be a director in a corporation of this character he must have some stock, and of course Mr. Oliver, it is to be presumed, had placed that stock in their hands although it was his, for the purpose of complying with the law and having them serve as directors.

Mr. COLLINS. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. COLLINS. He does not own that stock now, does he?

Mr. McREYNOLDS. Who does not own it?

Mr. COLLINS. I say he does not.

Mr. McREYNOLDS. I understand there is no stock.

Mr. COLLINS. I understand; but it is in the hands of a receiver, and if any money is due anybody it is due to the corporation, is it not?

Mr. McREYNOLDS. The fatal blow which was given was to W. J. Oliver, the owner of that concern. He is the man they crept up on at this time and took charge of his property and ruined his credit and ruined his name, of course, under those conditions.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. LAGUARDIA. Does the corporation owe any money now?

Mr. McREYNOLDS. From this statement, I presume it does. I understand that after it went into the hands of the trustee—it first went into the hands of a trustee and then into the hands of a receiver later—that these bonds and this indebtedness were incurred afterwards. But they were dealing with the trustee at the time, and it afterwards went into the hands of a receiver.

Mr. LAGUARDIA. The corporation has not been liquidated, has it?

Mr. McREYNOLDS. I do not know whether it has or not.

Mr. TAYLOR of Tennessee. Yes; it has.

Mr. SCHAFER. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. SCHAFER. I note the report says that—

On the 4th day of October, 1918, the Oliver Manufacturing Co.'s plant, situated at Knoxville, Tenn., was of the physical value of approximately \$1,500,000.

Where were those figures obtained?

Mr. McREYNOLDS. I shall have to ask the gentleman from Oklahoma [Mr. THOMAS], who made the report, to answer the gentleman.

Mr. EDMONDS. That was testified to in the hearings.

Mr. McREYNOLDS. I think the auditor employed gave those figures in his testimony, but I am not sure.

Mr. SCHAFER. Was it testified in the hearings as to what value was placed upon the plant, what physical value, for the purpose of an assessment for taxes?

Mr. McREYNOLDS. I do not know whether it was put in in that way, but there are figures in here showing that there was a valuation placed upon it of \$1,400,000. How they reached that figure I do not know. Now, further, Mr. Wright says in this affidavit that after much effort on his part he succeeded in getting the directors to agree to the proposition of making Mr. McCoy the trustee. So it went into the hands of a trustee because there was nothing else they could do. The Government proposed to operate only a part of that plant, which, as I stated, was only one-third or one-half, and naturally they wanted to get full operation, if possible, but with the understanding that W. J. Oliver and none of these other men should go around that plant taking away the men who had carried out these contracts and who had made it a going concern. Some one asked whether it was a going concern. It was a going concern at the time it was taken over, and the proof shows it was not only a going concern but that Mr. Oliver was discounting his bills at that time.

Mr. BURTNESS. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. BURTNESS. In any of the documents presented to the committee was any balance sheet included showing the condition of the business immediately before the arrest, or shortly before the arrest, so we could get at the net worth of the concern?

Mr. McREYNOLDS. I will state to the gentleman that there is nothing of that kind in the report.

Mr. BURTNESS. I know there is nothing in the printed hearings bearing on that, but I noticed there were a lot of documents filed but not printed, and I wondered whether those documents contained any such information.

Mr. McREYNOLDS. There might be such information in some of the documents.

Mr. BURTNESS. Does the gentleman know how much the concern owed at the time the arrest was made?

Mr. McREYNOLDS. I do not.

Mr. BURTNESS. We have been advised as to the physical valuation of the plant; and if we had an inventory of the personal property on hand and knew approximately what the

plant owed, we would be able to judge what Mr. Oliver's interest in the plant was.

Mr. McREYNOLDS. I could only judge from this statement, and I presume, naturally, being a big operator, he had perhaps a line of credit with the banks in order to carry on his business, and it appears from the proof he was discounting his bills and had already collected from the Italian Government \$1,000,000 for shells he had made for that Government.

Mr. LAGUARDIA. If it were a going concern at the time of the arrest, was there any effort made to ascertain its going value?

Mr. McREYNOLDS. At that time?

Mr. LAGUARDIA. Yes.

Mr. McREYNOLDS. I believe there is an estimate of \$1,400,000.

Mr. LAGUARDIA. Of going value?

Mr. McREYNOLDS. I do not know, but I do not think that much.

Mr. BURTNESS. That was the physical valuation of the plant.

Mr. McREYNOLDS. Now, attention has been called to the letter written by the Secretary of War. The letter of the Secretary of War is not inconsistent, if you take it as a whole. In the first part of the statement which was read by the gentleman from Texas it was said that these matters have been settled. Those were the matters that were ex contractu matters. But I am unable to place the same construction on the sentence which the other gentleman from Texas read; that is, the sentence read from the letter written by the Secretary of War. Now, the first part of Mr. Weeks's letter deals with those matters which the committee has not allowed, and the auditor in his statement says that there was no item passed on by the Secretary of War which is claimed in this claim. But the committee did not allow those matters which should have been settled by the Secretary of War. This sentence was read by the gentleman from Texas [Mr. BLANTON]:

It is possible that the arrest and prosecution of Mr. Oliver was characterized by incidents that gave rise to justifiable criticism and that financial loss may have resulted therefrom.

What was subject to justifiable criticism? Not, as I construe it, that Mr. Oliver was subject to justifiable criticism, but that the Government in making the arrest was subject to justifiable criticism and that financial loss may have resulted therefrom. So you see the letter written by Secretary of War Weeks is not inconsistent, and it is not inconsistent with the allowance of this claim, because he does not express himself on those matters over which he did not have jurisdiction.

Mr. WATKINS. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. WATKINS. Does the gentleman know the amount paid by the Government on claims ex contractu in the settlement by the War Department with the Oliver people?

Mr. McREYNOLDS. I only know what this report shows; that according to those statements they paid \$66,000 more than the contract price. Those are the matters arising out of the contract.

Mr. WATKINS. This claim, stripped of everything and brought down to its last analysis, really means giving money to Mr. Oliver in the way of damages for malicious prosecution. Is not that just about what it means?

Mr. McREYNOLDS. No, sir; it does not. Here are the facts and here is what we insist upon:

The Government has wrongfully and without right, and even without probable right, taken charge of this plant, forced a trustee, conducted the making of shells under Mr. Snyder, placed there by the Ordnance Department, and in doing that and taking out the organization which Mr. Oliver had, men who were trained, it cost them \$3.25 more to make these shells than it did Mr. Oliver, and the Government settled at that price.

Mr. WATKINS. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. WATKINS. I understand from the letter of the Secretary of War that the War Department never did take possession of that plant and that it was retained in the possession of Mr. Oliver's people throughout.

Mr. McREYNOLDS. I have tried to make that plain. The Secretary of War could say that it was run by Mr. Oliver; that is, by the trustee, because the trustee was in charge; but by whom was the trustee named, and what caused him to be named, and under what conditions? Here are the statements.

Mr. WATKINS. The trustee was appointed by the company.

Mr. McREYNOLDS. Appointed by the company, of course; but at the suggestion of these men who had charge of the plant, to wit, the Government officers, and with the understanding that Mr. Snyder, a representative of the Government, would be in charge; and there is in this record a letter from Mr. Snyder, written to the ordnance department in Cincinnati on November 10, in which he signs himself "W. J. Oliver & Co., superintendent of the shell department." That shows you who was in charge.

Mr. COLLINS. Will the gentleman yield?

Mr. McREYNOLDS. Yes.

Mr. COLLINS. Will the gentleman vote for an amendment to this bill submitting this claim to the Court of Claims for adjudication?

Mr. McREYNOLDS. I will not. I will vote for a bill to bring other matters of this kind to the Court of Claims, but here is damage that has been done this man on account of the extra cost of these shells and on account of the \$8,000 which they took, not to speak of the estimated damage of \$150,000 which they did to his commercial plant, because it is said by one of these witnesses that it lost \$30,000 a month after they took charge.

Mr. RAMSEYER. Who took the \$8,000 of bonds, and were they registered or coupon bonds?

Mr. McREYNOLDS. That is not shown, but there is proof in the record that many of Mr. Oliver's employees had bought bonds and had failed to pay for them, and when they failed to pay for them he took them up. I presume, under those conditions, they were not registered. They were in his desk. What was in his desk was taken out upon the orders and by command of the men of the Army.

Mr. RAMSEYER. Then it is to be presumed that some of these deputy marshals who took the papers as agents of the Government stole them. Suppose the sheriff in your county should do the same thing, would the remedy of the person that is injured be against the county treasurer, to be reimbursed from public funds, or would his remedy be against the sheriff and his bondsmen for the value of the property which he took?

Mr. McREYNOLDS. That is not a similar question at all.

Mr. RAMSEYER. It is absolutely identical. If it was a deputy marshal, he is under bond and is responsible for the property he takes and is liable for any that he misappropriates.

Mr. McREYNOLDS. I just yielded for a question.

Mr. RAMSEYER. I would like to ask another question.

Mr. McREYNOLDS. Since the gentleman is going to make a speech, I do not believe I will yield to him.

Mr. RAMSEYER. I would like to ask the gentleman just one other question. Does not the letter of the Secretary of War go to the element of damage, which you claim amounts to \$101,000, when he says, on page 5 of the report, that they paid him everything he claimed on the contracts and in addition to that paid him \$66,000, which included practically the full amount of every item claimed at the time?

Mr. McREYNOLDS. Absolutely not, because this question arose afterwards.

Mr. RAMSEYER. Oh, no.

Mr. McREYNOLDS. That was on the contract, and this is for damages.

Mr. RAMSEYER. The \$66,000 was outside of the contracts.

Mr. McREYNOLDS. I think the Secretary of War makes that plain, if you will read the entire letter, wherein he says, toward the last of the letter, that these other claims he has not considered.

Mr. RAMSEYER. That is the claim for \$8,000 of Liberty bonds.

Mr. McREYNOLDS. The letter refers to these three claims.

Mr. RAMSEYER. That is the claim for \$8,000 of Liberty bonds and for salary. Of course, there are not any legal grounds for allowing anything there.

Mr. SCHAFER. Will the gentleman yield for a question about the bonds? What other testimony besides the testimony of Mr. Oliver is there to show there were \$8,000 worth of bonds?

Mr. McREYNOLDS. There is the testimony here of Mr. Jennings, I believe, who testified about that. He was the superintendent.

Mr. SCHAFER. And he knew that of his own personal knowledge?

Mr. McREYNOLDS. I do not know. I just know what his statement was.

Mr. SCHAFER. In view of the statements of the proponents of this bill as to the mental and physical condition of Mr. Oliver, does the gentleman think the committee could place a great deal of weight on his testimony unless it is pretty well corroborated?

Mr. McREYNOLDS. On Mr. Oliver's testimony?

Mr. SCHAFER. Yes.

Mr. McREYNOLDS. I would think so from the report of the subcommittee. Having seen him and knowing him and having heard him testify, I think they could place confidence in what he has said.

Gentlemen, I am not going to take up more of your time, but I do feel that these items should be paid by the Government. I think this was one of the most outrageous procedures or occurrences that ever took place in this country. When they can seize a man's plant, destroy him and destroy his property, which has meant the destruction of his mind and body, in a free American country, I say that this country is a country of conscience, and while he has no right to go to the courts, they will not permit their citizens to be treated in this way without compensation.

Mr. BURTNESS. Will the gentleman yield for a couple of questions on matters that have not been covered?

Mr. McREYNOLDS. Yes.

Mr. BURTNESS. This plant, as I understand it, has been sold in some way or other since these occurrences?

Mr. McREYNOLDS. It went into the hands of a trustee and I presume it has been sold. The gentleman from Tennessee [Mr. TAYLOR], who lives in this district, would know about that, and I will yield to Mr. TAYLOR to answer you.

Mr. BURTNESS. Does the gentleman know what it was sold for?

Mr. TAYLOR of Tennessee. One hundred and ten thousand dollars, and was bought in by the bondholders.

Mr. BURTNESS. Do you know how much the general creditors of the corporation have received on their claims?

Mr. McREYNOLDS. I have no knowledge of that whatever.

Mr. BURTNESS. Is it the contention that the creditors have been taken care of or not?

Mr. McREYNOLDS. I think not from this proof.

Mr. BURTNESS. If the creditors have not been taken care of, on what theory did the committee amend the bill so that the sum regarded as fair is to be paid to Mr. Oliver personally instead of to the creditors of the corporation?

Mr. McREYNOLDS. I understand that this indebtedness, which caused the company to go into the hands of a receiver, occurred after it went into the hands of the trustee, and this blow was a direct blow at Mr. Oliver when he had it as a going concern, when he was making money, and when he was able to pay everything and more than he owed.

Mr. BURTNESS. Would it not be a direct blow at the creditors of the corporation?

Mr. McREYNOLDS. It would if they had it at that time, but they dealt with the trustee.

Mr. BOX. Will the gentleman yield?

Mr. McREYNOLDS. I will.

Mr. BOX. I want to call the gentleman's attention to the statement of Mr. Humphrey on page 2 of the hearings:

And upon the urgent solicitation of the largest creditors of said manufacturing company said company made a deed of trust—

And so forth.

Mr. McREYNOLDS. I am thoroughly familiar with Mr. Humphrey's statement. That statement of Mr. Humphrey was made to the committee. What I read was from the testimony of Asbury Wright, the lawyer.

Mr. BOX. And the gentleman says that Mr. Humphrey's statement is not correct?

Mr. McREYNOLDS. Not as I understand it.

Mr. BLANTON. Mr. Chairman, for the information of the committee, I ask the Clerk to read an amendment which I propose to offer.

The Clerk read as follows:

Proposed amendment by Mr. BLANTON: Page 1, line 3, strike out all after the enacting clause and insert in lieu thereof the following:

"That the Court of Claims be, and it is hereby, authorized to hear and determine the claim against the United States of William J. Oliver, for himself individually and for the equities inuring to him as the former president and principal owner of the stock of the corporation, the William J. Oliver Manufacturing Co., of Knoxville, Tenn., and of such corporation itself, now dissolved, and to award to him such damages, if any, as he may have actually incurred, based solely upon actual loss sustained, if any, without interest, resulting directly and proximately from the seizure of the business of said corporation in October, 1918, and the restraint thereafter held by the Government upon such property, which exceeds, if it does do so, payments heretofore made by the Government. But no remuneration shall be allowed for wrongful arrest, if any, of the person of said William J. Oliver. All questions of law, equity, and fact are hereby expressly submitted to said Court of Claims for adjudication."

Mr. BEGG. Mr. Chairman, I reserve a point of order against that.

Mr. BLANTON. It has not yet been offered. Mr. Chairman and gentlemen, this is one of the most remarkable cases that has ever been brought before this Congress. If the facts presented to this committee in the record are true, it is an indictment against two big governments. First, it is an indictment against the Government of the United States, and second, it is an indictment against every labor union in it and its officers. If labor union organizers and a few disgruntled employees in a plant where 1,100 other satisfied nonunion men are working to produce war munitions for American soldiers to defend the civilization of the world, without any justification whatever therefor, can make the Government of the United States forcibly take charge of a man's plant, turn him out, turn all of his foremen out, take charge of all of his personal property, and ruin him, then I say it is an awful indictment against the Government.

Mr. UNDERHILL. Was not that done in Massachusetts in the case of Smith & Wesson and in Georgia in Columbus, and many other cases?

Mr. BLANTON. That is just exactly what made me stand here on this floor during the war and protest against such union tactics and thereby incur the enmity of a great man that has just passed beyond to-day. It was because of that fact that I incurred the enmity of a great man, Samuel Gompers, and he was a great man, because for 46 years he led the organized labor unions of this country and in many respects led them ably. I differed with him on many questions, but after all I had a very high regard indeed for his many good qualities. There are no differences now between myself and this great man who to-day has gone beyond. I freely forgive all injuries.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. I did want to complete my discussion of the bill without further diversion.

Mr. SCHAFER. The gentleman made a statement in which I think he has strayed from the real facts when he prefers an indictment against labor unions. Does not the gentleman realize that these men who made the affidavits which were turned over to the Department of Justice were nonunion employees of the Oliver Manufacturing Co.?

Mr. BLANTON. Oh, the gentleman from Wisconsin has not read the record. Mr. Clements, of Knoxville, Tenn., who admits that he used these affidavits to bring on all this trouble, was a leader of all the labor unions in the State of Tennessee. He was a union leader and he said he took these affidavits—

Mr. SCHAFER. Will the gentleman yield further?

Mr. BLANTON. In just a moment. He said he knew at the time he took them that it was calculated to force the unionization of this plant against the will of the man who owned it, and that they had been trying to unionize it but could not do it, and it never was unionized.

The gentleman from Massachusetts [Mr. UNDERHILL] speaks of the Smith & Wesson plant. That plant was manufacturing munitions of war for the Government. It was furnishing the Smith & Wesson revolvers for a little over \$17 apiece and worked upon the open-shop plan. The men were satisfied, they were being paid higher wages than they ever drew before in their lives. The labor agitators were trying to force Smith & Wesson to unionize the plant, and they would not do it. There was such a pressure brought to bear upon the United States Department of Labor at Washington that through it the Government went to Smith & Wesson and said, "You have got to unionize. We are not going to have any trouble here." Smith & Wesson said, "Here is our plant, you can take it, you can take us, you can take everything we have, but you can not take our principle, we do not believe in a closed shop." The Government then took their plant away from them and unionized it. Instead of the Government afterwards getting the revolvers at \$17 apiece they had to pay \$33 apiece for them. Oh, I could tell the gentleman lots of things if I had time.

Mr. SCHAFER. Will the gentleman yield now?

Mr. BLANTON. In one minute. I want the gentleman to take the evidence of this great labor leader at Knoxville, Tenn., Mr. Clements. I want him to read it, and if that is not an indictment against labor-union agitators I never read one stronger. But I am not discussing unions just now.

I am discussing the equities of this case, Mr. Chairman. What are the equities of the case? If the Government took this plant wrongfully and if it caused the ruin of this man financially, the ruin of his health, breaking him down, it ought to pay him, and I am not going to stand here in the way of a proper adjudication. Talk about us adjudicating this case!

It is foolishness. What do we know about the facts? Every time a man gets up here to speak for the claimant and we ask him some questions he replies that he does not know. No one here knows all of the facts. Who of you knows the facts in this case? Nobody. We ought to send this case to the Court of Claims and confer jurisdiction, and let them hear and determine it properly. Let Mr. Oliver present his testimony to a fair-minded court. Let him present his equities and let the Government present its side of the matter and let that court of fair-minded judges, as they are, pass on the equities of the case and render a righteous judgment. Who is afraid of that? I am not.

Mr. WATKINS. If that agreement were not entered into under duress, would not the fact that the Government and Mr. Oliver, or its representatives, had entered into an agreement extinguish all matters of dispute and prevent him from going before the Court of Claims?

Mr. BLANTON. I think there are some equities in this case that ought to be heard before a court. Just because these labor leaders attempted to force this plant to be unionized and because Mr. Oliver would not do it, and because he was an open-shop man, I am not taking sides with him. I am an open-shop man, it is true, and I believe in it as a principle, but I am not for paying Mr. Oliver unless he is entitled to it.

Mr. DEAL. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. DEAL. If, as has been stated, the closing of that shop, the seizure, was due to the agitation of labor unions, does the gentleman not think that it was the duty of the Government to have protected its property rather than to have seized and destroyed it?

Mr. BLANTON. Of course it was. The Government ought to have done it. If I had been the Secretary of Labor, I would have gone down there and told those union agitators to stand back and let this man run his business, and I would have told them, "If you have not anything to do while war is going on except to agitate here and cause trouble, then I shall send you over to the trenches of France and let you fight for your country."

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. The gentleman will please not divert me. I want to discuss this case. Did the Government coerce Mr. Oliver? Let us see what he says about it himself. Let us see not what he said the day before yesterday, or some six years after the transaction, but let us see what he said about the time or just a few years after that time. What actually occurs and what is said and done by a defendant shortly after the transaction in question, before his mind has time to cool is called *res geste* in the case. And the defendant is permitted to rehearse it on the trial. Then much credence is given to it. Great weight is given to it. It is the *res geste* of the transaction. What was in the mind of Mr. Oliver before he filed his claim? Mr. Edmonds here, chairman of this committee, before this claim was filed sent him a telegram congratulating him on the outcome of his case when it was dismissed, and Mr. Oliver wrote back quite a long article, which Mr. Edmonds had published in the *Manufacturers' Journal*.

Let us read it and see what Mr. Oliver says about what the Government did, and let us see what Mr. Oliver then said about bonds being in the sum of \$8,000 and about whether or not the Government took them away. And what does he then say about this man who was put in charge? Was it a man put in there by the Government, or was it a man that he agreed to put in there at the instance of his own corporation? Here is this statement, signed by Mr. Oliver himself, that passed through the hands of the chairman of the committee, who has kindly permitted me to use it. Mr. Oliver says:

A company of soldiers was brought from Chattanooga. The United States marshal and all of his deputies, the district attorney, and other agents of the Department of Justice and the Ordnance Department all came down in a body, deprived us of every means of communication, cut our telephone wires, placed men with drawn revolvers at the office and plant entrances, seized and stuffed into mail pouches, sacks, waste baskets, etc., our valuable office books, papers, and records, and a number of them went through the plant and sought certain of the employees who had made affidavits secretly but who had not been discharged, and with their assistance went to the different locations in the plant where parts of shell and other evidence which had been prepared in support of their evidence was hidden.

We were not given a receipt at that time for the papers, records, shells, and other material taken from the plant, but after application had been made at the preliminary hearing, which was never finished on account of my injury, we were permitted to review these papers and

other things in their possession, or at least those that had not been removed by them; and our factory stock book, minute book, some Liberty bonds, and war-savings stamps have never been accounted for, and of course they deny their seizure.

"Some" bonds and "some" war-savings stamps have never been accounted for, but he said that even then the Government denied their seizure. Has not the Government the right to still deny that seizure?

Mr. EDMONDS. That was written two or three years ago. Mr. BLANTON. That is what I say. It was written quite a while before he filed this claim in Congress. Does he write our friend the chairman of the Committee on Claims that he had \$8,000 worth of bonds lost? No. He said there were some bonds missing, but he says even then that the Government denied the seizure of them.

Mr. TAYLOR of Tennessee. The gentleman would not expect the Government officials to admit their seizure, would he?

Mr. WATKINS. They would admit it if they pay this claim.

Mr. RAMSEYER. What is the gentleman reading from?

Mr. BLANTON. From a signed statement of Mr. W. J. Oliver, the claimant, which he voluntarily made and sent to our chairman, in response to a congratulatory telegram, long before he ever filed a claim.

Mr. RAMSEYER. I see it is printed.

Mr. BLANTON. The chairman, Mr. EDMONDS, let a manufacturer's journal have it to print, and Mr. Oliver made it, knowing it would be so printed. I want to read a little part of it.

Mr. BEGG. If the gentleman will yield, does the gentleman think the facts in that newspaper article, he knowing it was to be printed, that using the term "some" ought to work against him in his statement?

Mr. BLANTON. Does the gentleman from Ohio believe that because he used the word "some" we ought to give him \$8,000?

Mr. BEGG. That all depends upon the proof of loss.

Mr. BLANTON. He has not proven it yet to my satisfaction and belief, and I have seen everything that any man here has seen in the record. Why can not we leave this for the court to settle? Why can not we have these things adjudicated on evidence and not on theoretical possibilities? Why are we not doing this man full justice by saying, "You have not got any claim against the United States legally. You can not go to the Court of Claims and sue, but nevertheless we will let you do it. We will confer jurisdiction on the Court of Claims and let you and your attorneys go there and have the processes of the court and bring your witnesses there and let them be sworn and let the court hear the testimony and render a righteous judgment as to what you are entitled to under the facts in the case." What more could you ask? Are we going to sit here and decide these cases on "may be so"? I never repeat anything I overhear, and call names, but when my friend from Texas [Mr. Box] got up here to begin his argument against this case I heard an awfully good friend of ours, a fine man, get up and say, sotto voce, "If I am going to vote for this bill I have got no business to sit here and listen to Box's argument that may change my decision"; and he got up and walked out [laughter], got up and walked out, and he is going to vote for a bill and does not want to be convinced that it is not right.

Of course, he laughed when he said that, but he is out now and a friend right here near me heard him when he said that. What are you going to do in a case like that? If you pass this bill giving this man \$170,000, as provided for in this committee amendment, do you know what is going to happen? It will go across the hall here, and it will probably come back to us and have a paragraph here containing not \$170,000 but \$1,438,000, as claimed in the bill, and there is not one of us who can force a rehearing of this matter before our colleagues, and it will be passed without further argument and the money paid.

Mr. WEFALD. Will the gentleman yield?

Mr. BLANTON. I yield to my friend because I notice he is on my side of the aisle.

Mr. WEFALD. At present.

Mr. BLANTON. I am satisfied if he keeps on it.

Mr. WEFALD. I want to see if I understood the gentleman from Texas [Mr. Box] correctly. Am I to understand that this concern was practically insolvent at the time of the seizure?

Mr. BLANTON. No; I do not think Mr. Box went that far. He is a very fair man.

Mr. WEFALD. Wait until I make my statement.

Mr. BLANTON. He said Mr. Oliver owed a large amount of money to his corporation.

Mr. WEFALD. I say it was my impression gathered from his remarks, and I was listening very attentively.

Mr. BLANTON. The gentleman did not understand it correctly.

Mr. WEFALD. I find one of the items that the committee feels it should reimburse for is an item of \$61,000.

Mr. BLANTON. For salary.

Mr. WEFALD. Based upon salary.

Mr. BLANTON. And that is foolish.

Mr. WEFALD. It is \$50,000.

Mr. BLANTON. I will not entertain that proposal at all.

Mr. WEFALD. Let me make my statement or ask the question. I want to know—the gentleman says he examined all of the records—if there was anything in the record to show, if the concern that was in that financial condition, that a man was entitled to draw a salary of \$50,000 a year? I ask the question, and I would like an answer.

Mr. BLANTON. I will try to answer the question. Our friends, who were behind this claim in pushing it, seem to think it is a circumstance in favor of this man that he was drawing from the W. J. Oliver Corporation \$50,000 a year and have argued that that was a great big thing in his favor during the war. I think it is a circumstance against him. I think in war time when a man owns a corporation—and they admit he practically owned it all himself—that when he owns it and he is making munitions for the Government at a time when contracts were made by the Government allowing cost plus 10 per cent as the profit a man should get, that he should agree to pay himself \$50,000 a year—and he is the only man to decide that question that he is to allow himself \$50,000 a year, and in war times—he was asking a great deal from the Government. There is not a man on God's earth who is worth \$50,000 a year, especially during war time.

I want to say this, that at the very first opportunity that I get I am going to vote for a measure which in war times will give the President of the United States the right to draft every man he wants, to draft every bit of material he wants, and all the money and property he wants, and to draft labor, and tell them where he wants them to work, and if a man gets up and rebels against it shoot him against the wall. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. EDMONDS. Mr. Chairman, I would like to ask the gentleman two questions. One is, Does he not think that during the war the men who got \$50,000 a year did better service than the men who got \$1?

Mr. BLANTON. I think that some of the men who got \$1 a year cost the Government more money than if they had been paid \$50,000 a year.

Mr. EDMONDS. The second question is this, whether the undue and enlarged activity around Knoxville, Tenn., in regard to the Oliver plant by the intelligence department and other activities of the Government drew all the men away from the aircraft plants out in Ohio and let things go on the way they did?

Mr. BLANTON. I am not prepared to answer that. I do not know.

Mr. KETCHAM. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. KETCHAM. Does the gentleman think it is quite a fair statement to make, questioning this man's patriotism for having drawn this unusual salary, in view of the fact that the record shows, I believe, that he was offered \$100,000 by another concern, and at the request of the Government he remained on the job to see this shell contract through?

Mr. BLANTON. Well, I think he deserved much credit for turning down that offer, but I do not think he deserves as much as the gentleman believes he does. Probably the very busy concern that offered him \$100,000 was operating on this cost-plus 10 per cent basis, as was done in some places where the cantonments were being constructed, where contractors were telling the men to work only an hour a day or two hours a day, and that it was all right, and that there was more money in it for them, and that it would make the jobs last longer. That was going on all over the country; not only in one place, but all over the country. The President could not keep it down. Human nature asserts itself, the average greed of human kind. That is what the President had to contend with. It was not the President's fault. Some of his apparent friends turned out to be enemies. He could not depend upon them—Republicans and Democrats alike. They were grasping all over the country. He had confidence in them, but they did not measure up to the standard that he gave them credit for.

Mr. KETCHAM. I would like to ask the gentleman another question.

Mr. BLANTON. Yes.

Mr. KETCHAM. In view of the fact that the record shows that after this man's leadership in the direction of that plant was given over to the trustee the cost of these shells was increased \$3.25 each, does the gentleman think his characterization of Mr. Oliver is quite fair?

Mr. BLANTON. I will say that whenever the Government takes over anything it costs more. It was so with the railroads. I knew it would be. It costs me nearly twice as much now to go to Texas as it used to cost before the war.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. SCHAFER. How about the Post Office Department? If the Government did not own and operate the Post Office Department what would it cost to-day?

Mr. BLANTON. The gentleman is diverting me again. I would like to yield. I sit here with the gentleman from Wisconsin and with the gentleman from Minnesota, and we differ on some labor questions, but we are, notwithstanding that, good friends all the time. I appreciate them, and I believe they appreciate me in the work I am trying to do.

Mr. WEFALD. I do.

Mr. BLANTON. There is no very great antagonism between any of us in this House. We disagree only on a few fundamentals. But I am discussing this particular case now. Shall we sit here as a court and jury, without any witnesses, without testimony, and try this case, and give a man \$170,000 or \$1,430,000—which could be done by another body—or should we send the case to a court, where a righteous verdict would be rendered under the rules of law and equity?

Mr. WEFALD. I want to say that I think the gentleman from Texas is one of the most useful Members on the floor of this House.

Mr. BLANTON. While I do not deserve that tribute, I thank the gentleman.

Mr. WEFALD. The gentleman said something about the labor unions and the efforts of those men to unionize the shop. I would like to know whether you think that the fact that these union men knew that this man was drawing \$50,000 a year might not have had something to do with their attempt to unionize the shop?

Mr. BLANTON. Yes. He set a bad example for them; there is no question about that. But I want to say that human nature is such that, as the gentleman knows, there are labor-union leaders right now that are drawing salaries of almost as much. Did the gentleman know that? They are drawing salaries away up in high figures. That is the reason why bricklayers in Chicago are demanding \$25 a day. It is because some of the officers of the unions are drawing big salaries of \$25,000 a year.

Mr. WEFALD. But none of them make \$50,000 a year, and they are performing a very useful service.

Mr. STEVENSON. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. STEVENSON. I agree with the gentleman, and I indorse entirely his statement a while ago, that if the Government owes this man anything it ought to pay him, and you make provision for payment in your amendment. But if we owed this man something six years ago, why do you deny him the interest on it? If the Government owed him something six years ago, why do you impose that limitation?

Mr. BLANTON. Because it is bad for the Government ever to pay a man for a tort, any kind of a tort. It is bad policy, and the law recognizes that. Under the law you can not recover from the Government for a tort by the Government. You ought not to include that in allowing for a claim. If Mr. Oliver's claim is based upon the facts he presents, he will get enough money from the judgment of the Court of Claims to relieve him very materially and make him feel pretty well satisfied, now that the war is over.

Mr. STEVENSON. Then the idea of the gentleman's amendment is that we are saying to the Court of Claims they are not to allow interest, but we are serving notice on them that they can put enough on the claim to cover interest? Is that not about it?

Mr. BLANTON. No. As I said the other day, I am acquainted with the personnel of this court. The judges are fair-minded men; they are unusually fair-minded men of high integrity and high purpose. They are going to do what is right, and at the same time I believe they are going to protect the people's Treasury. The President had confidence in them when he appointed them, and we have confidence in them. It is a court created to pass upon these matters; so let us send this claim to it and have it pass on it.

Mr. UNDERHILL. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. UNDERHILL. Will the gentleman let us decide here whether we will send it to the Court of Claims or whether we do not desire to do so, but pass upon it as reported by the committee?

Mr. BLANTON. I am going to do that in five minutes, if I am not interrupted, and after I make one or two other statements.

Mr. WATKINS. Will the gentleman yield to me for a question?

Mr. BLANTON. I will yield for one more question.

Mr. WATKINS. I agree somewhat with the Secretary of War wherein he says this claim is in the nature of damages for malicious prosecution. If the gentleman does not agree with that, I would like to know if he can understand why the committee drew a bill in which it pays to one identity, William J. Oliver, a certain sum of money for the holding of property of another identity, the William J. Oliver Manufacturing Co. Did the gentleman hear my question?

Mr. BLANTON. I regret that my attention was diverted by the chairman of the committee, who was privately asking me some questions.

Mr. WATKINS. I will repeat it. I agree somewhat with the Secretary of War that this claim is in the nature of allowing damages for malicious prosecution, for which, the chances are, Mr. Oliver could not recover damages if he went into court. If that is not true, then why does the committee draw a bill giving to one identity, William J. Oliver, in person, a sum of money which really ought to go to the William J. Oliver Manufacturing Co. for the benefit of creditors?

Mr. BLANTON. Well, I will answer the gentleman. The committee seemingly wants to pay him for what they think was his loss, first, in wages, amounting to \$50,000 a year; then they want to pay him for \$8,000 worth of bonds which they think he lost; and then they want to pay him because they say he owned all the property of the corporation, and, as a matter of fact, William J. Oliver was the corporation; then they want to pay him for these other things.

But I want to tell you something the gentleman does not know, and I am not telling any secrets, because when a Member of Congress finds out things which affect the people of the country it is not a secret; it is Government business. If you pass this bill and allow this money, you are not done with this case. Do you know what the committee is going to do? It is going to bring in another bill which will provide for the sending of his case, on another feature, to the Court of Claims, and allow him \$200,000 more. That is what they are going to do, and that is one of the very purposes and one of the very reasons that actuates me in offering this amendment to send it in the first instance to the Court of Claims and let them determine it from every angle and not here decide this matter by piecemeal.

Mr. BURTNESS. Will the gentleman yield?

Mr. BLANTON. I am going to yield this time, and then I want to read something which has never been read into the Record yet.

Mr. BURTNESS. My question pertains to your proposed substitute. Should the substitute be limited to the equitable rights of Mr. Oliver? Why should it not include any rights the corporation, as such, might have, so as to clear up everything?

Mr. BLANTON. The gentleman overlooks one feature of the amendment, which is that jurisdiction is conferred on the Court of Claims to hear the law, the equity, and facts of the case, both as to Mr. Oliver and his corporation.

Mr. BURTNESS. As I heard it read it referred to Mr. Oliver as president of the corporation. Why not give the same rights to the corporation as such?

Mr. BLANTON. Well, I have framed it in that way. The corporation is now defunct and that is the reason I drew it like I did; the corporation is dissolved.

Mr. BURTNESS. I think the corporation still exists as far as creditors are concerned.

Mr. BLANTON. No; the gentleman from Tennessee told us it was dissolved and was defunct. I want to read you one other paragraph and then I am done. Here is what Mr. W. J. Oliver himself says, not to-day, but several years ago, before he filed this claim, when it was fresh in his mind. They have asked who was Mr. Wright and what connection he had with Mr. Oliver, and here is what Mr. Oliver says:

Hon. T. A. Wright, of this city, met with the representatives of the Ordnance Department the day following the arrest and by persistent effort succeeded in having the plant put in charge of a trustee, acceptable to both the Government and to my interest, and in this way prevented them from actually taking possession of it.

He says that his attorney, Mr. Wright, went to them and had them appoint a trustee who was acceptable to him and in that way prevented them from actually taking over the plant. Now, don't you think that you should hear the War Department's side of this question? Before you reach any conclusion you ought to hear the Department of Justice's side of this question. If there is blame attaching to the Department of Justice, I want the Court of Claims to fix the blame and give this man the benefit of it in the way of remuneration for everything he has suffered in the way of his business relations with the Government, not for his arrest but for his business relations with the Government.

It has been said that the court down in Tennessee decided that the Government did not have any reason for arresting this man and taking charge of his property, and that he was blameless.

Here is the judgment of the court:

In the United States District Court at Knoxville, Tenn. United States of America v. W. J. Oliver et al.

There are 26 counts to this indictment, as to each of which each defendant pleads not guilty. The pleas placed on the Government the burden of proving the guilt of the defendants beyond a reasonable doubt. The Government has introduced all its evidence, at the close of which the defendants ask the court to direct a verdict of not guilty under every and each count of the indictment as to each of the defendants on the ground that the evidence, if true, does not establish their guilt or that of either of them beyond a reasonable doubt.

The presumption of law is that the defendants are not guilty, but are innocent of the offenses charged against them. This presumption is evidence in their favor, and they must be acquitted in the absence of substantial evidence, which, if true, meets and overcomes this presumption and so establishes their guilt.

For the purpose of this motion the evidence must be taken to be true, and in considering it it must be given the strongest construction against the defendants it will bear. The question then arises if when so considered does it, as a matter of law, prove the guilt of the defendant or either of them under all or either of the counts in the indictment beyond a reasonable doubt? Each of the first four counts charges the offense of conspiracy to defraud the United States and also alleges certain overt acts of the defendants done in furtherance of the purpose and object of each of the alleged conspiracies. There is no direct evidence of a conspiracy. That fact, like any other fact, may, and oftentimes is, conclusively established by circumstantial evidence. In such case the circumstances must be so strong as to exclude every reasonable hypothesis consistent with innocence. To state the rule another way, if the circumstances proven can be as reasonably reconciled with innocence as with guilt, then the law requires that it be reconciled with innocence. And again, if the circumstances be as consistent with innocence as with guilt, the defendant must be acquitted.

I think the circumstances in evidence in this case relied upon by the Government as proving the charges of conspiracy fall far short of meeting the requirements of the rule thus stated.

From like consideration, the evidence offered tending to prove the allegations in counts 5, 6, 7, 8, 9, 15, 16, 17, 18, 19, and 25, which charge the defendants with having done certain things specifically stated in those counts, with the intent to injure, interfere with, and obstruct the United States in prosecuting and carrying on the war in which it was engaged by the commission of the alleged unlawful acts, I think, also is as consistent with innocence as with guilt, and in the light of a presumption with innocence can be as reasonably reconciled with a conclusion of lawful intent as with a conclusion of unlawful intent.

The evidence is voluminous, and it would serve no useful purpose to review it here further than to say that many witnesses introduced by the Government testified, among other things, that while at work in the plant of the W. J. Oliver Manufacturing Co. under the direction of and with the defendants, they heard nothing and saw nothing that gave them reason to believe that the defendants, or either of them, intended by what they did or said that they were doing the things to which the witnesses testified with the intent to injure or interfere with or obstruct the United States in the prosecution of the war. By introducing these witnesses the Government said they were worthy of being believed.

For present purposes it is sufficient to say that the motion for a directed verdict in favor of all the defendants as to the first four counts of the indictment and also counts 5, 6, 7, 8, 9, 15, 16, 17, 18, 19, and 25 must be allowed, and the jury is directed to return verdicts of not guilty as to each of the defendants under each of the counts named, and that will be your verdict, so say you all.

The evidence is, at this time, as I think, such as requires the submission of the case to the jury on counts 10, 11, 12, 13, 14, 20, 21, 22, 23, 24, and 26, and as to these counts the motion is overruled.

MCCALL, Judge.

You will note that this judge mentioned almost a dozen counts which he said he was going to submit to the jury where he thought the facts in the case warranted a submission of them to the jury on those counts, and the very minute he rendered that decision the district attorney got peeved, I imagine. I have seen them get peeved when courts would sustain demurrers to indictments, and I have seen them come in and say, "Well, if the court is going to hold in that way, I will not go on any further with the case and will just nol-pros the balance of the counts." The record shows that is just what happened in this case. If you will read the succeeding judgment, you will find that as soon as the court attempted to submit these other counts in the indictment to the jury, the district attorney came in and nol-pros the balance, showing some peevishness, and would not submit the 11 counts to the jury for determination.

Now, gentlemen, I am not going to take up any more time. I hope my colleagues will see fit to do justice to both this man Oliver and to the Government, and they can do that only by submitting this case to the Court of Claims for hearing and determination.

I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

The CHAIRMAN. For what purpose does the gentleman from Pennsylvania rise?

Mr. EDMONDS. Mr. Chairman, I ask unanimous consent to close all debate in one minute.

Mr. LOZIER. I want half a minute.

Mr. LA GUARDIA. I want some time.

Mr. BOX. I object to closing debate in one minute.

Mr. WINGO. May I suggest to the gentleman that he had better find out whether he can pass the bill this afternoon. If it runs on much longer, we are going to find ourselves without a quorum.

Mr. EDMONDS. I ask unanimous consent that all general debate close in 10 minutes.

Mr. LA GUARDIA. Reserving the right to object, I am going to ask recognition, and I will be glad to limit myself to 10 minutes.

Mr. EDMONDS. Will the gentleman not limit himself to nine minutes and give the gentleman from Missouri one minute?

Mr. LA GUARDIA. Yes.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that general debate on this bill close in 10 minutes. Is there objection?

There was no objection.

Mr. LOZIER. Mr. Chairman, I am unwilling to vote to send this measure to the Court of Claims, because I think it bad policy to load the Court of Claims with bills and demands which we believe have no legal, ethical, or equitable foundation.

I am unwilling to vote for this measure because, when reduced to its last analysis, it calls for an allowance of \$61,000 for salary, when the undisputed facts show that the physical and mental condition of Mr. Oliver was such that he could not, during the time in question, have rendered any services of any kind or character or earned anything whatsoever.

I am unwilling to vote to reimburse claimant for the alleged \$101,000 damages, for the reason that the evidence shows that the Secretary of War made a settlement with Mr. Oliver's company, and the company executed a release in full settlement and discharge of all claims and damages.

I am unwilling to vote for the reimbursement on account of the alleged \$8,000 worth of Government bonds and war savings stamps, because there is no persuasive, or at least no convincing, evidence that he had that amount of bonds or savings certificates in his desk when the Government took possession of the factory, and for the additional reason that there is no evidence to show who, if anyone, appropriated those bonds, and for the still further reason that there is no well-considered precedent or sound public policy which will justify our appropriating money to reimburse some one for a tort or embezzlement of an agent or officer of the United States Government.

Mr. LA GUARDIA. Mr. Chairman and gentlemen, in passing upon bills from the Committee on Claims this House is very much in the position of an appellate court. The least we can do is to take the facts as presented by the committee and pass upon the law applicable to those facts, the matter of policy, of course, to be likewise considered.

Assuming all of the facts as contained in the majority report of the committee to be true, have they stated facts sufficient to

warrant this House in appropriating the sum asked for in the bill?

In the first place, as just stated by my colleague, the gentleman from Missouri [Mr. LOZIER], Mr. Oliver comes in and seeks equity. Some of us learned in law school that when you come into court seeking equity you should use hand Sapolio, I believe it is, before the court will grant equity.

It is undisputed that this corporation has many creditors with claims against it. Whether it has been liquidated or is insolvent or defunct makes no difference. If you award compensation to Mr. Oliver, these creditors can not reach that money.

If they had asked for compensation for the corporation by reason of the wrongful acts alleged, then the corporation would be confronted with two situations, one a general release signed by it and its proper authorized officials to the Government of the United States in payment of \$66,000; and, second, the lien of these creditors on any fund obtained from Congress. This is why the corporation is set aside, although it is admitted that Mr. Oliver owned all the stock of the corporation, and the claim is made by Mr. Oliver in personam.

Second, unfortunately Mr. Oliver was injured a few days after the seizure, but the Government had nothing to do with that, and we may properly disregard all of the damages flowing from the truck injury of Mr. Oliver at the time.

Third, it is not denied that this corporation was making defective shells at the time the Government stepped in. Whether the attention of the Government was brought by improper motives, by labor agitators or by anyone else, the fact remains it was making improper and defective shells, and the Government was justified in stepping in.

Mr. BYRNS of Tennessee. Where is the evidence the gentleman has of that fact? Is it not a fact that not a single shell that was manufactured by this company or corporation was ever rejected by the Government?

Mr. LAGUARDIA. It was my understanding, I will say to my colleague, that the shells were defective and a large amount of the shells were rejected. Is not that correct?

Mr. BYRNS of Tennessee. My understanding of the evidence is that there is no proof that this company was manufacturing defective shells and, on the contrary, it was thoroughly demonstrated later that it was not making defective shells.

Mr. LAGUARDIA. I will say to my colleague that after new specifications were presented to this corporation they complained that the specifications were impossible of compliance. That is in the record.

Mr. BYRNS of Tennessee. That does not prove that the company was doing anything wrong or was making defective shells.

Mr. TAYLOR of Tennessee. Will the gentleman yield?

Mr. BYRNS of Tennessee. I want to say, if the gentleman will pardon me, as I am just reminded by my colleague, the Secretary of War in his statement said that all the shells that were made were accepted and paid for.

Mr. TAYLOR of Tennessee. Every single, solitary shell was accepted. There was not a single defective shell.

Mr. LAGUARDIA. They were accepted and paid for up to October 4.

Mr. BLANTON. If the gentleman will yield, I want to correct one statement. The statement that Mr. Oliver sent to the chairman of the committee [Mr. EDMONDS] shows that all the shells were accepted except 2 per cent. Two per cent were rejected by the ordnance inspector.

Mr. LAGUARDIA. There surely was some question as to the quality of the shells. The factory was seized on October 4, 1918. On November 11, 1918, the armistice was declared. The trustee at that time could have elected to terminate his contract, but instead they continued to manufacture shells for several months. A part of the claim is for the difference in cost of manufacture under the operation of the trustee—not the Government—and the operation of Mr. Oliver himself—the difference in cost of production, which is nothing less than loss of profits, when they could have terminated and stopped the operation November 12, after the armistice.

Now, gentlemen, if this bill is passed at the next session you will have claims from the manufacturers of rotten rain-coats, manufacturers of defective shoes, manufacturers of defective airplanes, and every profiteering contractor whose contract has been canceled for any reason. They are all going to come in and claim reimbursement. That is something that we must bear in mind. You will recall that in the closing days of the session, when we passed an amendment to the Veterans' Bureau bill, some of us wanted to provide compensation for veterans suffering from tuberculosis from the date of affliction, and it was claimed on the part of many gentlemen of this

House that the Government did not have the money. The compensation was fixed in the bill from the time the act went into effect. Veterans suffering with tuberculosis for months, in some instances for over a year, were deprived of compensation which they did not receive owing to defects of the old law, and the new law passed for the purpose of doing justice to these suffering veterans would not even reach back and give them back allowance. Yet here it is intended not only to make up the difference in the cost of production, reimburse for alleged loss of Liberty bonds, pay for lost salary, but even to go so far as to provide in part "additional consequential costs and damages," as embracing as that item might be.

Gentlemen, I will concede that Mr. Oliver suffered the greatest wrong that is possible for an American to suffer—to be charged with defrauding the Government in time of war. But he has been vindicated by a jury, and it is difficult in the face of the adjustment made by the corporation with our Government after all this happened, to see how Mr. Oliver can be compensated further as an individual.

Do we want to establish now a precedent for compensation to every individual who is indicted for a Federal offense and acquitted by a jury? I sought to inquire from the gentlemen supporting this bill what had been done in the past six years to fix the responsibility for the alleged wrongful acts committed by the Government's agents in this case. On page 360 of yesterday's RECORD I put the question to my colleague the gentleman from Tennessee [Mr. TAYLOR], as follows:

Mr. LAGUARDIA. This bill and the compensation is based entirely, I take it, on the unjustifiable conduct of the Government. Has anything been done since 1918 to fix the responsibility, either in the Intelligence Department of the War Department or the Department of Justice, on the person or official who brought about this seizure?

Mr. TAYLOR of Tennessee. No; there has been nothing of that kind, of course.

Mr. LAGUARDIA. Somebody must have blundered if the gentleman's contention is correct.

I was then startled by the gentleman's reply which I read:

Mr. TAYLOR of Tennessee. We do not criticize the War Department and we do not criticize the Department of Justice; I think they were acting in good faith so far as they were concerned, but they were relying on misrepresentation by those German spies who were seeking not only in Knoxville at Oliver's plant but all over the country to wreck industry.

If there is no criticism of any department of the Government and if they acted in good faith there is no cause of action, legal or equitable, upon which Mr. Oliver can now claim damages.

I am inclined to believe that some one acted hastily. I will concede the terrible embarrassment and mental anguish suffered by Mr. Oliver at the time. But, gentlemen, if you stop to consider according to the evidence the financial condition of this company, the unfortunate accident to Mr. Oliver shortly after the Government stepped in, the fact that his company continued to manufacture shells when they could not have been compelled to do so after Armistice Day, and the important fact that there are still creditors with claims unpaid against this corporation, how can you justify your vote in giving Mr. Oliver the sum provided in this bill?

I repeat what I stated a few moments ago, that I dread the thought of the flow of bills that will follow if this one is approved by Congress. It was our belief and understanding in the Sixty-sixth Congress that we had provided the ways and means for settling all equitable claims against the Government, and the Members will recall that appropriations were provided generously for satisfying such claims. There were boards and commissions in the War Department and the Navy Department working for years in the settlement of these claims. Are we now and henceforth to consider every claim settled as in this case, or rejected by the departments after we provided the means for their adjustment? Claims will surely run into the hundreds of millions if every contractor who is dissatisfied with the settlement heretofore made or the rejection of his claim after all the facts have been considered will hear that they can get away with a bill of this kind.

In deference to the able argument made by the gentleman from Tennessee [Mr. TAYLOR], I will vote to give his constituent an opportunity to present this case to a court, but I conscientiously can not vote for the bill as it now stands or even if the committee amendments are approved. I serve notice now on my colleagues that I will scrutinize every single bill which will be brought in in this and the next Congress, and will do my one four hundred and thirty-fifth part to prevent a raid on our Treasury by dissatisfied, disgruntled war contractors.

The CHAIRMAN. The time of the gentleman from New York has expired. All time has expired, and the Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$1,438,095.61 to the William J. Oliver Manufacturing Co. and William J. Oliver for damages sustained by said company and said Oliver growing out of the seizure and holding by the Government of the William J. Oliver manufacturing establishment at Knoxville, Tenn.

The Clerk read the following committee amendment:

Page 1, line 5, after the word "of," strike out "\$1,438,095.61 to the William J. Oliver Manufacturing Co. and" and insert "\$170,757.86 to," and in line 8 strike out the words "by said company and said Oliver."

Mr. BLANTON. Mr. Chairman, I offer the following amendment as a substitute for the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. BLANTON: Page 1, line 3, strike out all after the enacting clause and insert in lieu thereof the following:

"That the Court of Claims be, and it is hereby, authorized to hear and determine the claim against the United States of William J. Oliver, for himself individually and for equities inuring to him as the former president and principal owner of the stock of the corporation, the William J. Oliver Manufacturing Co., of Knoxville, Tenn., now dissolved, and of such corporation itself, and to award to him such damages, if any, as he may have actually incurred, based solely upon actual loss sustained, if any, without interest, resulting directly and proximately from the seizure of the business of said corporation in October, 1918, and the restraint thereafter held by the Government upon such property which exceeds, if it does do so, payments heretofore made by the Government. But no remuneration shall be allowed for wrongful arrest, if any, of the person of said William J. Oliver. All questions of law, equity, and fact are hereby expressly submitted to said Court of Claims for adjudication."

Mr. BEGG. Mr. Chairman, I make a point of order that the amendment is not germane to the bill. It has been so decided a number of times, and I should be very glad to call the attention of the Chair to the precedents.

The CHAIRMAN. The Chair is inclined to think the gentleman from Ohio is correct, but he will hear the gentleman from Texas.

Mr. BLANTON. I want to call attention to the title of the bill itself. It is "For the relief of the William J. Oliver Manufacturing Co. and William J. Oliver, of Knoxville, Tenn." That is the subject matter of the bill.

The CHAIRMAN. The Chair is governed by the text of the bill itself and not the title.

Mr. BLANTON. Here is a bill which sets forth that it is for the relief of William J. Oliver and a corporation now defunct, that the Government did a wrongful act to him and his business and he suffered a loss. It seeks to remunerate Mr. Oliver according to law and equity for the wrongful act by the Government. It seeks by the committee amendment to pay Mr. Oliver \$170,000. The bill itself which the committee seeks to amend provides for the payment to Mr. Oliver of \$1,438,000. I want to submit to the Chair that there is a very wide discrepancy between what the bill seeks to pay Mr. Oliver in settlement of his claim and the amount the committee seeks to pay him by amendment. It is the difference between \$170,000 and \$1,438,000.

Now, what is my substitute? My substitute says that on this bill which seeks to pay him \$1,438,000, in lieu of the amendment which the committee offers to pay him \$170,000 I propose as a substitute to send the case for adjudication to the Court of Claims and let the court settle it according to law and equity. If that is not germane, if a settlement offered in some other way is not germane, I do not know anything about germaneness. The purpose of this bill is to settle a claim. Various means of settlement when proposed are germane.

In my 25 years around courthouses I have represented many litigants in cases where they had involved large sums of money. I have stood at a table in front of the court and before juries in the determination of cases, and I have sat around a table outside in a compromise. We sometimes reached a compromise in settlement very different from the pleadings and contentions before the court and the jury, and then had the court enter the compromise into a judgment. This is a proper compromise that I am proposing, of giving him a hearing in court instead of paying him \$1,438,000, as the bill proposes, or \$170,000, as the committee amendment proposes.

The CHAIRMAN. The Chair would like to hear the gentleman from Texas on the point of order.

Mr. BLANTON. Mr. Chairman, my mind is not as finely educated in parliamentary law as that of the distinguished Chairman, but I thought I was discussing the point of order. If I am not, I will submit the question without further argument to the Chair for his parliamentary mind to determine.

The CHAIRMAN. The point of order made by the gentleman from Ohio is that the amendment of the gentleman from Texas is not germane to the bill. The same question has arisen a number of times. In Hinds' Precedents, section 5851, it says that—

To a proposition to pay a claim an amendment proposing to send it to the Court of Claims was held not to be germane.

The specific question involved here was decided in the citation just given.

Mr. BLANTON. Mr. Chairman, would the Chair permit me to ask the gentleman from Ohio a question?

The CHAIRMAN. Relating to the point of order?

Mr. BLANTON. Yes.

The CHAIRMAN. Yes.

Mr. BLANTON. The gentleman from Ohio stands here as the administration's representative to protect the Treasury. Does he want to make the point of order here and force it to be sustained by the Chair, and let another body place in this bill \$1,438,000 to give this man when under the facts of the case there may be nothing due him? If he does, let him make the point of order.

Mr. BEGG. I say to the gentleman from Texas that the gentleman from Ohio is perfectly willing to proceed in order.

The CHAIRMAN. Further proceeding in the decision, the Chair directs attention to a decision by Chairman Campbell, on October 3, 1919, in which it was decided:

To a proposition to pay a claim an amendment to permit the claimant to sue the United States in the United States district court was held not to be germane.

In that decision the Chair cited with approval the former decision referred to by the Chair.

Based on those two decisions and upon the general principle that an amendment must be germane, the Chair sustains the point of order.

Mr. BURTNESS. Mr. Chairman, I offer the following amendment to the committee amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. BURTNESS: In the committee amendment strike out the figures "\$170,757.86" and insert in lieu thereof the figures "\$61,032.86."

Mr. BURTNESS. Mr. Chairman, the theory of the entire committee amendment, as I understand it, is this, that they are limiting or intending to limit the recovery in this case of the damages suffered by Mr. Oliver himself and not damages suffered by the William Oliver Manufacturing Co., on whose behalf, in part at least, the bill was introduced by the author. It seems to me that the items that have been recommended by the committee with reference to the loss of bonds and the item with reference to the loss to the corporation because it cost them more to manufacture these shells after the corporation was in the hands of the trustee are items which concern only the corporation as such and are not items which concern Mr. Oliver individually. I recognize also the force of the argument made by a number of Members who have spoken here, to the effect that, with reference to the items as to this additional cost, that has been fully settled by the War Department. I think if this bill is passed by this House it is largely because of the feeling of sympathy for Mr. Oliver personally and for the loss which he personally suffered.

Mr. BOX. Mr. Chairman, will the gentleman yield?

Mr. BURTNESS. Yes.

Mr. BOX. If Mr. Oliver was personally injured and incapacitated to attend to this business, even to present his claim to the War Department properly, as was contended here, upon what theory does the gentleman think he is entitled to the salary?

Mr. BURTNESS. I am frank to say to the gentleman that I doubt whether upon any legal theory he is entitled to the salary under any circumstances, but I am inclined to think that the sentiment of the House is such that the Members feel that this man was treated very harshly by the Government, and that his organization was, and I think there is a good deal of sympathy here for the condition in which this man finds himself at this time; and if by any stretch of the imagination it can be claimed that this injury which he suffered was the proximate cause, or if not the proximate cause the moral cause, due to the action of the Government in seizing the plant, due to the fact that he was asked by the district attorney to go to the

courthouse on that particular day, that it can be argued with at least some show of reasonableness that he lost his salary after that, and the committee, as I understand it, claims that the salary amounted to \$61,000 and odd, and it is upon that theory that I suggested the amount.

Mr. BOX. May I call attention to the fact that the auditor said that if Mr. Oliver had been permitted to work that the corporation would have been paid what he owed it in his services?

Mr. BURNES. Yes; I understand that that is really the situation, although the theory that the majority report is written on is the theory that Mr. Oliver actually lost this amount in salary. Of course, it is rather peculiar that that amount happens to be the figure that Mr. Oliver was owing to the corporation, and that is one of the peculiar things about this bill. I am frank to say that unless this bill is cut down to about the figure that within reason it may be claimed Mr. Oliver lost personally, I shall be inclined to vote against the bill.

Mr. BEGG. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. TINCHER. Mr. Chairman, I think the item in the bill allowing Mr. Oliver for the difference in the cost of manufacturing his shells is perhaps as just a matter as could be in a bill.

I do not think there is any record of our Government ever treating any citizen any worse than Mr. Oliver was treated. [Applause.] There was a written agreement demanding that he stay away from his business and let another man manage it. It was signed when he was surrounded by officers of the Government, and the statement was made in the room and undated that it was by force. They said to him, "You do it at once." They proceeded to manufacture shells at \$3.25 more than he manufactured them for after he had signed a written agreement to stay out of his own plant. You cut out that item and I do not understand that the Government is going to be fair. He has been treated so manifestly unfairly that I think that the American Congress should go on record as saying that we are willing to atone, in a way, not fully. This man was said to have been worth around a million dollars, and it is only proposed in this bill to give him \$170,000, and I want to say to my friend who offers this amendment I think, perhaps, the item he seeks to retain in the bill is the weakest item, and that is the salary item.

The CHAIRMAN. The question is on the amendment to the amendment offered by the gentleman from South Dakota.

Mr. BLANTON. Mr. Chairman, I offer a substitute for the amendment offered by the gentleman from South Dakota; that is, to strike out the "\$61,000" and insert in lieu thereof the following: "\$10,000, payable in monthly payments of \$57.50." I want to be heard when the Clerk reports the amendment.

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

Amendment by Mr. BLANTON to the amendment offered by Mr. BURNES: Strike out "\$61,032.86" and insert in lieu thereof "\$10,000, payable in monthly payments of \$57.50."

Mr. BLANTON. Mr. Chairman, whatever the Government did to Mr. Oliver it did it while the World War was in progress. During this same time, when we needed men over in the front-line trenches of France, the Government sent a little note to a splendid young man in my district, who was married, and said to him, "No matter how well qualified you are to conduct your private business and enjoy the proceeds of your earnings, you quit your business and your home and wife and family and your friends and go to France." And he did go and he did not come back, and he is in his poppy-covered grave there now; but to his little widow the Government granted \$10,000, which it pays to her in installments of \$57.50 a month.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. Why should we treat Mr. Oliver, of Knoxville, Tenn., any better than we do the little widow of the man who went to France?

Mr. SCHAFER. Will the gentleman yield there?

Mr. BLANTON. I will yield.

Mr. SCHAFER. I agree with the gentleman's statement.

Mr. BLANTON. But will not vote for my amendment?

Mr. SCHAFER. I will vote for it.

Mr. BLANTON. Good; I have at least one other vote for my amendment.

Mr. SCHAFER. But the gentleman neglected to mention one fact that the soldier, out of the \$1.25 a day, had to pay somewhere around \$7 or \$7.50 for insurance.

Mr. BLANTON. Yes; it was taken out; and also out of this salary of \$33 a month he had to have some more taken

out by the Government to keep up his little widow, because she was dependent upon him. Now, why make fish of one and fowl of another? Why not treat all alike? The great administration's watchdog of the Treasury [Mr. BROS.] would not let my amendment go through here to send this case to the Court of Claims to be adjudicated according to equity, the law, and the facts. This is one of the particular cases that he wants to go through for some reason, and a large sum be paid without proper adjudication.

Mr. SCHAFER. Will the gentleman yield there?

Mr. BLANTON. The gentleman from Ohio seemingly wants the House to grant \$170,000 to this man, and then he wants that bill to go to the other end of the Capitol, where somebody else will have the power and authority to change it, and put in \$1,438,000; and then it will come back here, and there is not a man here who can stop it.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes; but please do not take up all my time.

Mr. SCHAFER. The passage of this bill is carrying out the administration's so-called policy of economy, is it not?

Mr. BLANTON. I am not in a partisan mood right now. I am trying to be a statesman. [Laughter.] But I want to say this to the majority leader: His President has spoken for economy. His President believes in paying the just debts of this Government. His President wants every dollar to be paid to William J. Oliver that ought to be paid. But the President, I know, wants the matter to be adjudicated in a court on the basis of law and according to the rules of equity. I am going to make a motion for the committee to rise, and if my motion prevails it will stop the passage of this bill and give the absent Members an opportunity to find out something about it.

The CHAIRMAN (Mr. BURTON). The time of the gentleman from Texas has expired.

Mr. BLANTON. Mr. Chairman, I move that the committee rise, and I hope the majority leader will help us rise and let us come back here at some other time on this bill.

Mr. BEGG. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. BEGG. Did the Chair recognize the gentleman from Texas for that purpose?

The CHAIRMAN. The gentleman from Texas moves that the committee do now rise.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. BLANTON. I ask for a division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 14, noes 57.

The CHAIRMAN. The motion is lost.

Mr. BLANTON. Mr. Chairman, I make the point of order that there is no quorum present.

Mr. LONGWORTH. Mr. Chairman, I demand tellers.

The CHAIRMAN. Tellers are demanded. Those in favor of taking the vote by tellers will please rise and stand until they are counted.

Tellers were ordered, and the Chairman appointed Mr. LONGWORTH and Mr. BLANTON to act as tellers.

The committee divided; and the tellers reported—ayes 4, noes 82.

The CHAIRMAN. The question now is on the motion—

Mr. BLANTON. Mr. Chairman, I move that the committee rise. No; I will withdraw that motion and give the gentleman from Pennsylvania [Mr. EDMONDS] an opportunity to make that motion.

Mr. EDMONDS. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from Pennsylvania moves that the committee do now rise. The question is on agreeing to that motion.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. BLANTON. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 22, noes 51.

Mr. BLANTON. Mr. Chairman, I make a point of order on that vote. I made a motion to rise. It was defeated on a rising vote. The gentleman from Ohio [Mr. LONGWORTH] asked for tellers on the motion to rise. The committee, according to the tellers' report, decided not to rise, but there was not any quorum present. I had made a point of order that there was not any quorum present.

The CHAIRMAN. The gentleman from Texas is entitled to claim that there is not a quorum present, but the Chair can not be sure that all who were present voted.

Mr. BLANTON. I now make the point of order that there is no quorum present.

Mr. LONGWORTH. Let the Chair count.

The CHAIRMAN (after counting). One hundred and nine Members are present—a quorum.

Mr. EDMONDS. Mr. Chairman, I move that all debate on the bill and amendments thereto be now closed.

The CHAIRMAN. The gentleman from Pennsylvania moves that all debate on the bill and amendments thereto be now closed.

Mr. BLANTON. I make a point of order against that motion, that it is not in order when we are considering the bill under the five-minute rule; that it is not in order at this time as to other amendments that may be offered to this bill. It has always been so held that when there is a legitimate amendment to be offered it is not in order to move to close debate. I call the attention of the Chair to what happened in the consideration of the war resolution. In that debate Mr. Speaker Clark held that so long as there were members in the Committee of the Whole seeking to offer legitimate amendments a motion to close the debate was not in order.

Mr. BEGG. Mr. Chairman, I wish to call the Chair's attention to the fact that we are proceeding under the five-minute rule. We have just completed reading a paragraph, and it is customary—and it is done every day—to close debate on a paragraph and amendments to a paragraph.

Mr. BLANTON. This is an entire bill.

Mr. BEGG. It is all one section, and it is not an unusual motion to make. I will call the attention of the Chair to the fact that we are proceeding at the present time under the five-minute rule, and when operating under the five-minute rule, after five minutes' debate or five words of debate, it is in order to close debate on that paragraph and all amendments thereto; and that was the gentleman's motion, as I understand.

The CHAIRMAN. The Chair will state that this is decided by section 6 of Rule XXIII:

The committee may, by the vote of a majority of the members present, at any time after the five minutes' debate has begun upon proposed amendments to any section or paragraph of a bill, close all debate upon such section or paragraph or, at its election, upon the pending amendments only (which motion shall be decided without debate); but this shall not preclude further amendment, to be decided without debate.

There is but one section in this bill, and it seems to the Chair the motion, so far as closing debate is concerned, is in order.

The question was taken, and the motion was agreed to.

The CHAIRMAN. The question now is on the substitute motion of the gentleman from Texas for the committee amendment.

The question was taken, and the Chair announced that the yeas appeared to have it.

Mr. BLANTON. Mr. Chairman, I demand a division, and, Mr. Chairman, may I have the substitute read again for the benefit of those Members who have just come in?

The CHAIRMAN. Without objection, the substitute will be again read.

There was no objection.

The substitute was again read.

The committee divided; and there were—ayes 6, noes 74.

So the substitute was rejected.

Mr. BLANTON. Mr. Chairman, I offer a substitute for the Burtness amendment, striking out \$61,032.82 and inserting in lieu thereof \$75,000.

The CHAIRMAN. The Chair calls attention to the fact that there is a limit to the right of amendment, and the substitute seems to the Chair beyond the right of amendment.

Mr. BLANTON. Mr. Chairman, may I offer this to the Chair? There is a main proposition, an amendment, and a substitute always in order on every proposition.

The CHAIRMAN. The Chair would rather err on the side of giving a chance to offer a substitute. If the gentleman has a substitute ready he may present it. What is the substitute?

Mr. BLANTON. The Clerk has it.

The CHAIRMAN. The Clerk will report the substitute.

The Clerk read as follows:

Substitute offered by Mr. BLANTON for the amendment offered by Mr. BURTNESS: Strike out \$61,032.86 and insert in lieu thereof \$75,000.

The CHAIRMAN. The question is on agreeing to the substitute offered by the gentleman from Texas for the amendment offered by Mr. BURTNESS.

The question was taken, and the substitute was rejected.

The CHAIRMAN. The question now recurs on the amendment proposed by the gentleman from North Dakota [Mr. BURTNESS].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now recurs on the amendment proposed by the committee.

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The Clerk will report the second committee amendment.

The Clerk read as follows:

Page 1, line 8, strike out the words "by said company and said Oliver."

The CHAIRMAN. The question is now on agreeing to the second committee amendment.

The question was taken, and the amendment was agreed to.

Mr. EDMONDS. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose, and the Speaker resumed the chair.

The SPEAKER. The House will be in order.

Mr. BLANTON. Mr. Speaker, I make a point of no quorum.

The SPEAKER. Will the gentleman withhold that for a moment?

Mr. BLANTON. I prefer to make it at this time, if the Speaker will hold it in order.

Mr. GARRETT of Tennessee. Mr. Speaker, I make the point of order that it is not in order to make that point at this time. The House has no official knowledge of the fact that the committee has risen until the Chairman of the Committee of the Whole has reported to the Speaker.

The SPEAKER. The Chair has stated that the House will be in order. The Chair appreciates the question of propriety which the gentleman makes, but the Chair does not think he is entitled to hold that the House is not in session.

Mr. GARRETT of Tennessee. But, Mr. Speaker, there is a slight transitory period between the Speaker taking the chair and the Chairman of the Committee of the Whole reporting, and I think there is nothing in order in that period until the Chairman of the Committee of the Whole has reported. No constitutional propositions are involved and no rights are lost. It is the transitory period of the Committee of the Whole passing back into the House.

Mr. CRAMTON. Mr. Speaker, might I suggest that if the gentleman from Tennessee is right and if it is his theory that nothing is in order until we have the report of the Chairman of the Committee of the Whole, that if the Chairman of the Committee of the Whole left the room the House would not even be able to adjourn, in that extreme case.

Mr. GARRETT of Tennessee. Well, there is no reasonable probability of any such thing as that ever occurring. Of course, we can think of many absurd things that might happen, but that is one that will probably never occur.

The SPEAKER. The Chair finds, he regrets to say, there are precedents which hold that if the point of no quorum is made the Chair can not receive the report of the Chairman of the committee.

Mr. BLANTON. Mr. Speaker, I insist upon the point of order.

The SPEAKER. The gentleman from Texas makes the point of order there is no quorum present. It is clear there is no quorum present.

Mr. LONGWORTH. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, when the following Members failed to answer to their names:

[Roll No. 9]

Ackerman	Butler	Dickstein	Gallivan
Aldrich	Byrnes, S. C.	Dominick	Gambrell
Anderson	Campbell	Doyle	Garber
Andrew	Carew	Drewry	Garner, Tex.

Mr. LONGWORTH. Mr. Speaker, is it permissible to interrupt the announcement by making a parliamentary inquiry?

The SPEAKER. The Chair will make the announcement. Two hundred and eleven Members have answered to their names; not a quorum.

Mr. LONGWORTH. Mr. Speaker, a parliamentary inquiry. In case a motion to adjourn was carried, when would this bill be next in order? Would it be in order on the next day upon which claims were considered?

The SPEAKER. The next day upon which claims were in order.

ADJOURNMENT

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 25 minutes p. m.) the House, in accordance with the order previously made, adjourned until Monday, December 15, 1924, at 11.30 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

726. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of waterway between Peconic Bay and Jamaica Bay, N. Y.; to the Committee on Rivers and Harbors.

727. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Bayou Lacombe, La.; to the Committee on Rivers and Harbors.

728. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Double Creek, N. J.; to the Committee on Rivers and Harbors.

729. A letter from the Secretary of the Federal Board for Vocational Education, transmitting statement showing the names of officers of the vocational education and civilian vocational rehabilitation divisions of the Federal Board for Vocational Education who traveled on official business from Washington to points outside the District of Columbia during the fiscal year 1924, with their official titles, total expenses charged to the United States under each case; to the Committee on Appropriations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. CRISP: Committee on Ways and Means. H. R. 10650. A bill to authorize the settlement of the indebtedness of the Republic of Lithuania to the United States of America; without amendment (Rept. No. 1045). Referred to the Committee of the Whole House on the state of the Union.

Mr. CRISP: Committee on Ways and Means. H. R. 10651. A bill to authorize the settlement of the indebtedness of the Republic of Poland to the United States of America, and for other purposes; without amendment (Rept. No. 1046). Re-

ferred to the Committee of the Whole House on the state of the Union.

Mr. FRENCH: Committee on Appropriations. H. R. 10724. A bill making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1926, and for other purposes; without amendment (Rept. No. 1044). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. WINSLOW: A bill (H. R. 10722) to provide for retirement for disability in the Lighthouse Service; to the Committee on Interstate and Foreign Commerce.

By Mr. FREDERICKS: A bill (H. R. 10723) to provide for the construction of a dam on the Colorado River for the purpose of river regulation and control, and for other purposes; to the Committee on Flood Control.

By Mr. FRENCH: A bill (H. R. 10724) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1926, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. AYRES: A bill (H. R. 10725) to amend the Federal reserve act; to the Committee on Banking and Currency.

By Mr. COLTON: A bill (H. R. 10726) conferring jurisdiction on the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Creek Indians may have against the United States, and for other purposes; to the Committee on Indian Affairs.

By Mr. LEHLBACH: A bill (H. R. 10727) placing certain positions in the Postal Service in the competitive classified service; to the Committee on the Civil Service.

By Mr. McFADDEN: A bill (H. R. 10728) to amend the Federal farm loan act and the agricultural credits act of 1923; to the Committee on Banking and Currency.

By Mr. SPEARING: A bill (H. R. 10729) authorizing the construction of additional hospital facilities for the port of New Orleans, La., and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. COLTON (by request): A bill (H. R. 10730) to authorize the consolidation of corporations having franchises to operate street cars in the District of Columbia; to the Committee on the District of Columbia.

Also (by request), a bill (H. R. 10731) to establish uniform car rates and class rates for the transportation of freight by railroad carriers in commerce between the States; to the Committee on Interstate and Foreign Commerce.

Also (by request), a bill (H. R. 10732) to prohibit conspiracies to monopolize commerce between the States; to the Committee on Interstate and Foreign Commerce.

Also (by request), a bill (H. R. 10733) to exclude certain foreign publications from second-class mailing privileges, to increase second-class postal rates, and for other purposes; to the Committee on the Post Office and Post Roads.

Also (by request), a bill (H. R. 10734) to provide for the disposition of merchant vessels owned by the Government; to the Committee on the Merchant Marine and Fisheries.

Also (by request), a bill (H. R. 10735) to amend sections 3513 and 3515 of the Revised Statutes prescribing the weights of the silver and minor coins of the United States; to the Committee on Coinage, Weights, and Measures.

Also (by request), a bill (H. R. 10736) to rectify, coordinate, and simplify the weights and measures of the United States; to the Committee on Coinage, Weights, and Measures.

By Mr. O'CONNOR of Louisiana: A bill (H. R. 10737) authorizing the Secretary of Commerce to construct and equip a light vessel for the Passes at the entrances to the Mississippi River, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. TEMPLE: A bill (H. R. 10738) to provide for the securing of lands in the southern Appalachian Mountains for perpetual preservation as a national park; to the Committee on the Public Lands.

By Mr. BRITTEN: A bill (H. R. 10739) to authorize the Secretary of the Navy to proceed with the construction of certain public works at the naval air station, Pensacola, Fla.; to the Committee on Naval Affairs.

By Mr. COLTON (by request): A bill (H. R. 10740) for the promotion of commerce, the provision of revenue, and the reduction of the public debt; to the Committee on Banking and Currency.

By Mr. JAMES: Joint resolution (H. J. Res. 308) authorizing the Secretary of War to loan cots, bedding, and camp equipment, not including tentage, for use of the Modern Woodmen of America Foresters at their national quadrennial encampment to be held at Milwaukee, Wis., in June, 1925; to the Committee on Military Affairs.

By Mr. McKEOWN: Joint resolution (H. J. Res. 309) proposing an amendment to the Constitution of the United States fixing the terms of Members of Congress; to the Committee on Election of President, Vice President, and Representatives in Congress.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ARNOLD: A bill (H. R. 10741) granting an increase of pension to Bethena Starkey; to the Committee on Invalid Pensions.

By Mr. BEGG: A bill (H. R. 10742) granting an increase of pension to Millie Burton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10743) granting an increase of pension to Mell A. Jones; to the Committee on Invalid Pensions.

By Mr. BELL: A bill (H. R. 10744) granting an increase of pension to William H. Duncan; to the Committee on Invalid Pensions.

By Mr. CAREW: A bill (H. R. 10745) granting a pension to Harriet I. Gardner; to the Committee on Invalid Pensions.

By Mr. DEAL: A bill (H. R. 10746) for the relief of G. Ferlita; to the Committee on Claims.

By Mr. GIBSON: A bill (H. R. 10747) granting an increase of pension to Mersilvia A. Quaid; to the Committee on Invalid Pensions.

By Mr. GILBERT: A bill (H. R. 10748) granting a pension to Claud F. Dunn; to the Committee on Pensions.

Also, a bill (H. R. 10749) granting a pension to Maude Grinstead; to the Committee on Pensions.

Also, a bill (H. R. 10750) granting a pension to Sallie A. Hooper; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10751) granting a pension to Mary Million; to the Committee on Pensions.

By Mr. HAWLEY: A bill (H. R. 10752) for the relief of Horace G. Wilson; to the Committee on Claims.

By Mr. HUDSON: A bill (H. R. 10753) for the relief of Charles H. Reed; to the Committee on Military Affairs.

By Mr. HULL of Iowa: A bill (H. R. 10754) to reimburse certain fire insurance companies the amounts paid by them for property destroyed by fire in suppressing bubonic plague in the Territory of Hawaii in the years 1899 and 1900; to the Committee on Claims.

By Mr. KEARNS: A bill (H. R. 10755) granting an increase of pension to Anna McCann; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10756) granting an increase of pension to Lucinda D. Woods; to the Committee on Invalid Pensions.

By Mr. LOGAN: A bill (H. R. 10757) granting an increase of pension to James O. Ladd; to the Committee on Invalid Pensions.

By Mr. McKENZIE: A bill (H. R. 10758) granting an increase of pension to Helen Underwood; to the Committee on Invalid Pensions.

By Mr. MILLIGAN: A bill (H. R. 10759) granting a pension to Mahala D. Heriford; to the Committee on Invalid Pensions.

By Mr. PRALL: A bill (H. R. 10760) for the relief of Robinson Newbold; to the Committee on Claims.

By Mr. RUBEN: A bill (H. R. 10761) granting a pension to Anna Lee Adams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10762) granting a pension to Anna Hudson; to the Committee on Invalid Pensions.

By Mr. SINCLAIR: A bill (H. R. 10763) for the relief of William Lentz; to the Committee on Military Affairs.

By Mr. WILLIAMS of Michigan: A bill (H. R. 10764) granting a pension to Evvah A. Dickson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10765) granting an increase of pension to Katherine Whitaker; to the Committee on Invalid Pensions.

By Mr. WOODRUFF: A bill (H. R. 10766) granting an increase of pension to Eva Briggs; to the Committee on Invalid Pensions.

By Mr. MOORE of Illinois: Resolution (H. Res. 381) to pay Minnie Conway, widow of William Conway, late laborer of the House of Representatives, a sum equal to six months' salary and \$250 for funeral expenses; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3195. By the SPEAKER (by request): Petition of the Susan B. Anthony Foundation, Washington, D. C., favoring distribution by Congress of literature dealing with the perils of the narcotic question; to the Committee on Printing.

3196. By Mr. ANDREW: Petition of the Virginia State Chamber of Commerce, advocating the federalization of the Cape Cod Canal, Mass.; to the Committee on Interstate and Foreign Commerce.

3197. Also, petition of the Massachusetts Department of the Army and Navy Union, United States of America, favoring the immediate enactment of House bill 5934, the so-called Knutson bill, proposing to increase the pensions of Civil and Spanish War veterans and their widows and children; to the Committee on Pensions.

3198. By Mr. BIXLER: Petition of residents of Sheffield, Pa.; and vicinity, opposing compulsory Sunday observance laws, etc.; to the Committee on the District of Columbia.

3199. Also, petition of residents of Youngsville, Irvine, and Warren, opposing Sunday observance laws, etc.; to the Committee on the District of Columbia.

3200. Also, petition of residents of Youngsville and Warren, in Warren County, Pa., opposing compulsory Sunday observance laws; to the Committee on the District of Columbia.

3201. By Mr. GALLIVAN: Petition of Hon. James M. Curley, mayor of the city of Boston, Mass., recommending extension of the Air Mail Service to Boston, Mass.; to the Committee on the Post Office and Post Roads.

3202. By Mr. GARBER: Petition of the National Industrial Traffic League, New York City, N. Y., expressing its opposition to statutory rate making; to the Committee on Interstate and Foreign Commerce.

3203. Also, petition of citizens of Gate and Knowles, Okla., opposing the passage of Senate bill 3218; to the Committee on the District of Columbia.

3204. By Mr. GIBSON: Petition of citizens of Jamaica, Windham County, Vt., protesting against the passage of compulsory Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3205. By Mr. GREEN: Petition of Soren C. Chrestensen and others, of Atlantic, Iowa, in opposition to Senate bill 3218; to the Committee on the District of Columbia.

3206. Also, petition of H. M. Robinson and others, of Council Bluffs, Iowa, in opposition to Senate bill 3218; to the Committee on the District of Columbia.

3207. By Mr. JOST: Petition of retired Federal postal employees, praying for passage of House bill 8202; to the Committee on the Civil Service.

3208. By Mr. SHREVE: Petition of Erie Tent, No. 1, the Maccabees, Erie, Pa.; Erie Lodge, No. 327, Knights of Pythias, Erie, Pa.; Harriet V. Gridley Auxillary, Army and Navy Union, Erie, Pa.; and John Braden Post, No. 488, Grand Army of the Republic, North East, Pa., that pension of Civil War veterans be increased to \$72 per month, their widows to \$50, those that are totally disabled to \$125, and that these increase ratings include veterans of Indian wars and their widows; that the Knutson bill (H. R. 5934) be passed by Congress, providing for increase in pensions for veterans of Spanish War, Philippine Insurrection, China relief expedition, and their widows; to the Committee on Pensions.

3209. By Mr. STRONG of Pennsylvania: Petition of residents of Indiana County, Pa., opposed to the compulsory Sunday observance bill and any other national religious legislation; to the Committee on the District of Columbia.

3210. By Mr. TAYLOR of West Virginia: Petition of Z. M. Trowbridge and 59 others, against the enactment of Senate bill 3218; to the Committee on the District of Columbia.

3211. By Mr. TILLMAN: Petition of citizens of Arkansas against the passage of Senate bill 3218; to the Committee on the District of Columbia.

SENATE

MONDAY, December 15, 1924

(Legislative day of Wednesday, December 10, 1924)

The Senate met at 11.50 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Ferlis	McKellar	Shortridge
Bayard	Fess	McKinley	Simmons
Brookhart	Fletcher	McNary	Smith
Broussard	Frazier	Mayfield	Smoot
Bruce	George	Means	Spencer
Bursum	Glass	Metcalf	Stanfield
Butler	Greene	Moses	Stanley
Capper	Hale	Neely	Sterling
Caraway	Harrell	Norbeck	Trammell
Copeland	Harris	Norris	Underwood
Couzens	Harrison	Oddie	Wadsworth
Cummins	Hedlin	Overman	Wash. Mont.
Curtis	Howell	Pittman	Warren
Dial	Jones, N. Mex.	Ralston	Watson
Dill	Jones, Wash.	Randsdell	Weller
Edge	Kendrick	Reed, Pa.	Wills
Edwards	Keyes	Robinson	
Ernst	King	Sheppard	
Fernald	Ladd	Shipstead	

Mr. SHIPSTEAD. I desire to announce that my colleague, the senior Senator from Minnesota [Mr. JOHNSON], is necessarily absent on account of illness in his family.

The PRESIDENT pro tempore. Seventy-three Senators having answered to their names, there is a quorum present.

Mr. CURTIS. I am advised by the Sergeant at Arms of the House that they would like to have the Senators leave at 5 minutes after 12 for the joint meeting of the two Houses. I therefore move that the Senate take a recess—

Mr. SMOOT. I ask the Senator from Kansas to yield to me that I may submit two reports from the Committee on Finance.

Mr. CURTIS. Very well; I yield to the Senator from Utah.

DEBT SETTLEMENTS WITH LITHUANIA AND POLAND

Mr. SMOOT. Mr. President, I have two bills to report from the Finance Committee which must be passed and become a law before the first of the year. One provides for the settlement of our debt with Poland, the other for the settlement of our debt with Lithuania. I ask leave to report them favorably from the committee, and if there is no objection, I think they can be passed before we go to the House.

Mr. ROBINSON. Mr. President, I understand that the settlements provided for with respect to the nations just mentioned are practically the same as that heretofore made with Great Britain.

Mr. SMOOT. They are substantially the same as that made with the British Government.

Mr. ROBINSON. I have no objection to the passage of the bills.

Mr. NORRIS. Before consent is given for their consideration, let us see what the bills are. Let them be read.

Mr. ROBINSON. Let the bills be reported.

Mr. SMOOT. Mr. President, I report back favorably without amendment from the Committee on Finance Senate bill 3554, authorizing the settlement of the indebtedness of the Republic of Lithuania to the United States of America, and I submit a report thereon (Rept. No. 811). I ask for the immediate consideration of the bill.

Mr. NORRIS. Mr. President, as far as I am concerned, I do not care for the reading of this bill if it is stated by the chairman of the committee that the settlement is just the same as the settlement we made with Great Britain.

Mr. SMOOT. It is approximately the same. The only question is as to the first payment. The principal of the debt was \$4,981,628.03 and the interest to June 15, 1924, amounted to \$1,049,918.94, making the total obligation \$6,031,546.97. They paid in cash on September 22, 1924, \$1,546.97, and the bonds which will be issued will amount to \$6,030,000.

Mr. NORRIS. Is the rate of interest to be the same as that fixed in the case of Great Britain?

Mr. SMOOT. The rate of interest for 10 years will be 3 per cent, and after that 3½ per cent.

Mr. NORRIS. Just the same?

Mr. SMOOT. Just the same as with Great Britain, and it is the same with regard to Poland.

The PRESIDENT pro tempore. The Senator from Utah has asked for the immediate consideration of the bill which he has just reported from the Committee on Finance. Is there objection?

There being no objection, the bill (S. 3554) to authorize the settlement of the indebtedness of the Republic of Lithuania to the United States of America was considered as in Committee of the Whole, and it was read, as follows:

Be it enacted, etc., That the settlement of the indebtedness of the Republic of Lithuania to the United States of America made by the World War Foreign Debt Commission and approved by the President upon the following terms and conditions is hereby approved:

The amount of the indebtedness to be funded, after allowing for cash payments made by Lithuania, is \$6,030,000, which has been computed as follows:

Principal amount of obligations to be funded, \$4,981,628.03. Interest accrued thereon from June 30, 1919, to June 15, 1924, at the rate of 4½ per cent per annum, \$1,049,918.94. Total principal and interest accrued and unpaid as of June 15, 1924, \$6,031,546.97. Paid in cash by Lithuania September 22, 1924, \$1,546.97. Total indebtedness to be funded into bonds, \$6,030,000.

The principal of the bonds shall be paid in annual installments on June 15 of each year up to and including June 15, 1986, on a fixed schedule, subject to the right of the Government of the Republic of Lithuania to make such payments in three-year periods. The amount of the first year's installment shall be \$30,000, the annual installments to increase until in the sixty-second year the amount of the final installment will be \$227,000, the aggregate installments being equal to the total principal of the indebtedness to be funded into bonds.

The Government of the Republic of Lithuania shall have the right to pay off additional amounts of the principal of the bonds on any interest date upon 90 days' advance notice.

Interest on the bonds shall be payable semiannually on June 15 and December 15 of each year at the rate of 3 per cent per annum from June 15, 1924, to June 15, 1934, and thereafter at the rate of 3½ per cent per annum until final payment.

The Government of the Republic of Lithuania, at its option, upon not less than 90 days' notice, shall have the right to pay up to one-half of the interest accruing between June 15, 1924, and June 15, 1929, on the \$6,030,000 principal amount of bonds first to be issued, in bonds of Lithuania dated and bearing interest from the respective dates when the interest to be paid thereby becomes due, with maturities arranged serially to fall on each June 15, in the succeeding years up to June 15, 1986, substantially in the manner provided for the original issue of bonds and bearing the same rates of interest and substantially the same in other respects as such original issue of bonds.

Any payment of interest or of principal may be made, at the option of the Government of the Republic of Lithuania, in any United States Government obligations issued after April 6, 1917, such obligations to be taken at par and accrued interest.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SMOOT. From the Committee on Finance I report back favorably without amendment Senate bill 3553, authorizing the settlement of the indebtedness of the Republic of Poland to the United States of America, and submit a report thereon (Rept. No. 810). I ask for immediate consideration of the bill, and I will make just a brief statement regarding it.

The principal owing us from Poland was \$159,666,972.39. The interest to December 15, 1922, at 4½ per cent, just the same rate the English paid, was \$18,898,053.60, and the total owing on December 25, 1922, was \$178,565,025.99, and they paid cash on November 14, 1924, \$5,025.99.

The amount of the indebtedness funded into bonds will be \$178,560,000. The payments are to run for 62 years, just the same as in the case of Great Britain, and for the first 10 years the interest is to be 3 per cent, and after that 3½ per cent.

Mr. NORRIS. I would like to inquire of the Senator from Utah about the first payment, and also the payment made by the Government of Lithuania.

Mr. SMOOT. The payments made were just to make the amounts to be issued in bonds even.

Mr. NORRIS. I was wondering why they happened to pay the odd number of cents.

Mr. SMOOT. That is the reason.

Mr. NORRIS. In order to make the balance due an even number of dollars?

Mr. SMOOT. Yes; so that the bonds could be issued in an even amount.

Mr. NORRIS. These amounts were paid in cash?

Mr. SMOOT. They were all paid in cash.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill (S. 3553) authorizing the settlement of the indebtedness of the Republic of Poland to the United States of America was considered as in Committee of the Whole, and it was read, as follows:

Be it enacted, etc., That the settlement of the indebtedness of the Republic of Poland to the United States of America, made by the World War Foreign Debt Commission and approved by the President upon the following terms and conditions, is hereby approved:

The amount of the indebtedness to be funded, after allowing for cash payments made by Poland, is \$178,560,000, which has been computed as follows: Principal amount of obligations to be funded,

\$159,666,972.39. Interest accrued and unpaid thereon to December 15, 1922, at the rate of 4½ per cent per annum, \$18,898,032.60. Total principal and interest accrued and unpaid as of December 15, 1922, \$178,565,025.99. Paid in cash by Poland November 14, 1924, \$5,025.99. Total indebtedness to be funded into bonds, \$178,560,000.

The principal of the bonds shall be paid in annual installments on December 15 of each year up to and including December 15, 1984, on a fixed schedule, subject to the right of the Government of the Republic of Poland to make such payments in three-year periods. The amount of the first year's installment shall be \$560,000, the annual installments to increase until in the sixty-second year the amount of the final installment will be \$9,000,000, the aggregate installments being equal to the total principal of the indebtedness to be funded into bonds.

The Government of the Republic of Poland shall have the right to pay off additional amounts of the principal of the bonds on any interest date upon 90 days' advance notice.

Interest on the bonds shall be payable semiannually on December 15 and June 15 of each year at the rate of 3 per cent per annum from December 15, 1922, to December 15, 1932, and thereafter at the rate of 3½ per cent per annum until final payment.

The Government of the Republic of Poland shall have the option with reference to payments on account of principal and/or interest falling due on or before December 15, 1929, under the terms of the agreement to make the following payments on the dates specified: June 15, 1925, \$500,000; December 15, 1925, \$500,000; June 15, 1926, \$750,000; December 15, 1926, \$750,000; June 15, 1927, \$1,000,000; December 15, 1927, \$1,000,000; June 15, 1928, \$1,250,000; December 15, 1928, \$1,250,000; June 15, 1929, \$1,500,000; December 15, 1929, \$1,500,000; total, \$10,000,000; and to pay the balance, including interest on all overdue payments at the rate of 3 per cent per annum, in bonds of Poland, dated December 15, 1929, bearing interest at the rate of 3 per cent per annum from December 15, 1929, to December 15, 1932, and thereafter at the rate of 3½ per cent per annum, such bonds to mature serially on December 15 of each year up to and including December 15, 1984, substantially in the same manner and to be substantially the same in other respects as the bonds of Poland received at the time of the funding of the indebtedness.

Any payment of interest or of principal may be made, at the option of the Government of the Republic of Poland, in any United States Government obligations issued after April 6, 1917, such obligations to be taken at par and accrued interest.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHANGE OF REFERENCE

On motion of Mr. JONES of Washington, the Committee on Commerce was discharged from the further consideration of the bill (S. 3663) to amend section 7 of an act entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," approved March 1, 1911, and it was referred to the Committee on Agriculture and Forestry.

JOINT RESOLUTIONS INTRODUCED

Mr. SMOOT introduced the following joint resolutions, which were severally read the first time, and, by unanimous consent, the second time, and referred to the Committee on Finance:

S. J. Res. 154. Joint resolution providing for the filling of a proximate vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress; and S. J. Res. 155. Joint resolution providing for the filling of a proximate vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress.

MEMORIAL SERVICES FOR THE LATE WOODROW WILSON

The PRESIDENT pro tempore. The hour having arrived for the joint session of the House and the Senate, the Senate will proceed to the Hall of the House of Representatives, and on the conclusion of the joint session it will reassemble in its Chamber.

Thereupon (at 12 o'clock and 3 minutes p. m.) the Senate, preceded by its Sergeant at Arms, the President pro tempore, and the Secretary, proceeded to the Hall of the House of Representatives.

At 1 o'clock and 45 minutes p. m. the Senate returned to its Chamber, and the President pro tempore resumed the chair.

Mr. SWANSON. Mr. President, as a further mark of respect to the memory of Woodrow Wilson, I move that the Senate do now adjourn.

The motion was unanimously agreed to; and the Senate (at 1 o'clock and 45 minutes p. m.) adjourned until to-morrow, Tuesday, December 16, 1924, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

MONDAY, December 15, 1924

The House met at 11 o'clock and 30 minutes a. m. The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O hear us, our blessed, Heavenly Father, at the threshold of the day's duties. May the words of our mouths and the meditations of our hearts be acceptable in Thy sight, O Lord, our Strength and our Redeemer. Establish the work of our hands: the work of our hands establish Thou it. Amen.

The Journal of the proceedings of Saturday, December 13, 1924, was read and approved.

RECESS

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent that the House stand in recess subject to the call of the Speaker.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the House stand in recess subject to the call of the Speaker. Is there objection?

There was no objection.

Accordingly, at 12 o'clock and 5 minutes p. m., the House stood in recess subject to the call of the Speaker.

MEMORIAL SERVICES FOR WOODROW WILSON

The program of arrangements by the joint committee of the House and the Senate follows:

PROGRAM OF ARRANGEMENTS

The Capitol will be closed on the morning of the 15th day of December, 1924, to all except Members and officers of Congress.

At half past 10 o'clock the east door leading to the rotunda will be opened to those to whom invitations have been extended under the concurrent resolution of Congress, and to those holding tickets of admission to the galleries.

The Hall of the House of Representatives will be opened for the admission of those who have invitations, who will be conducted to the seats assigned to them, as follows:

The President of the United States and his Cabinet will occupy seats in front of and on the left of the Speaker.

The Chief Justice and Associate Justices of the Supreme Court will occupy seats in front of and on the right of the Speaker.

The retired General of the Armies will be seated on the left of the Speaker.

The ambassadors and ministers of foreign governments will occupy seats on the left of the Speaker in section A—west.

The former Vice President and Senators will occupy seats back of the President and his Cabinet and the Supreme Court, and on the east and west side of the main aisle.

Governors of the several States will occupy seats on the right of the Speaker in section A—east.

Representatives will occupy seats on the east and west side of the main aisle and back of the Senators and governors of the several States.

The executive gallery will be reserved exclusively for the family of the President, the families of the Cabinet and of the Supreme Court, and the invited guests of the President.

The diplomatic gallery will be reserved exclusively for the families of the ambassadors and ministers of foreign governments. Tickets thereto will be delivered to the Secretary of State.

The House of Representatives will be called to order by the Speaker at 12 o'clock.

The Marine Band will be in attendance at half past 11 o'clock.

The Senate, five minutes after 12 o'clock, will proceed to the Hall of the House of Representatives.

The ambassadors and ministers will meet at half past 11 o'clock in the Ways and Means Committee room in the Capitol and be conducted to the seats assigned to them in section A, on the left of the Speaker.

The President pro tempore of the Senate will occupy the Speaker's chair.

The Speaker of the House will occupy a seat at the left of the President of the Senate.

The Secretary of the Senate and the Clerk of the House will occupy seats next the presiding officers of their respective Houses.

The other officers of the Senate and of the House will occupy seats on the floor, at the right and left of the Speaker's chair.

The chairmen of the joint committee of arrangements will occupy seats at the right and left of the orator, and next to them will be seated the officiating clergymen.

Prayer will be offered by the Rev. James Shera Montgomery, Chaplain of the House of Representatives.

The presiding officer will then present the orator of the day.
The benediction will be pronounced by the Rev. J. J. Mulr, Chaplain of the Senate.

CLAUDE A. SWANSON,
ISAAC BACHARACH,
Chairmen Joint Committee.

The Doorkeeper, Mr. Bert W. Kennedy, announced:
The President pro tempore and the Senate of the United States.

The Chief Justice and the Associate Justices of the Supreme Court of the United States.

The ambassadors and ministers of foreign governments.

The President and the members of his Cabinet.

The PRESIDENT pro tempore of the Senate. The two Houses of Congress with their invited guests are assembled to render our tribute to the memory of a great man, a great President, a great patriot, a towering figure in the history of mankind. We will be led in prayer by the Chaplain of the House of Representatives, Doctor Montgomery.

The Rev. James Shera Montgomery, D. D., Chaplain of the House of Representatives, offered the following prayer:

Almighty God, we would say, "Thy will be done." We are humbled amid Thy manifold mercies. We would find peace in the love and simplicity of the divine Teacher of men. Do Thou help us to behold marvelous things out of Thy law and qualify us to obey its precepts. We are grateful for our country's blessing and for the power and might of many of her noblest sons. They have turned our eyes to high ideals and may they spur us to deeds of valor. With the deepest reverence, bathed in the heart's emotion, we now wait in memory of one whose superb statesmanship guided our country through the earth's greatest conflict. He has honored her the world over. He studied her history; he learned her lessons; he knew her value and loved her always. We bless Thee for a life so full of teaching and renown. Consider and remember her, O Lord, the one who never failed. Bless her with many years and happy days and with the sweet consciousness of having ministered in heavenly love and devotion. God bless our flag—the harbinger of universal peace, the standard of humanity, and the symbol of liberty. O God, bless our flag. Amen.

The PRESIDENT pro tempore of the Senate. The committee of the Congress has invited Edwin Anderson Alderman, president of the University of Virginia, to deliver an address on this occasion. It is my privilege to present Doctor Alderman.

MEMORIAL ADDRESS IN HONOR OF THE LATE PRESIDENT WILSON

Dr. Edwin Anderson Alderman delivered the following address:

In his oration in memory of the first Athenians who fell in the Peloponnesian War, Pericles commended the fitness of the Athenian public funeral, but doubted the wisdom of any speech, declaring that where men's deeds have been great they should be honored in deed only, and that the reputation of many should never depend upon the judgment or want of it of one, and their virtue exalted or not, as he spoke, well or ill. I can, in some faint measure, comprehend what was passing in the mind of the great Athenian as I stand here to-day in this Chamber which has often resounded with his own lucid eloquence, to seek to make clear in brief speech the character and achievements of Woodrow Wilson, the twenty-eighth President of the United States.

In the case of a statesman, all experience warns us not to attempt to fix his final place in history until the generation that knew him and loved him, or hated him, shall have passed away and a new generation, to whom he was not a familiar figure, shall have come upon the stage, capable of beholding him with eyes undimmed by emotion and judging him with minds unclouded by prejudice or by passion. Loyalty and duty and reverence none the less urge us to set down, while memory is clear and events are fresh, what we know of men upon whom their fellow men placed great burdens of power, to whom whole races and nations turned in moments of peril and disaster, and upon whose decisions, from time to time, rested the courses of history. Woodrow Wilson was such a man; and in such a spirit I undertake to discover the sources of his power and to perceive the bases of his far-shining fame, more widespread about the earth in his lifetime than the fame of any of his predecessors in office, and more interwoven into the fabric of civilization than any of those who have gone before him, save Washington, the founder of the Republic, Jefferson, the fountain of its idealism, and Lincoln, the exemplar of its magnanimity and the preserver of its internal unity.

The presidential office constitutes one of the glories of the framers of our Government and the presidential succession a miracle of good fortune in the hazard of democratic politics and a constant tribute to the sober instincts of popular judgment. The makers of the Constitution apparently forgot their fear of tyranny when they created the Presidency and seemed to proceed on the principle that if you place immense authority in a man's hands you kill his greed for usurpation and awake in him a magic capacity and a solemn purpose to transform his weaknesses into strength and his unworthiness into worthiness.

Some American Presidents have been commonplace men, but none of them has ever betrayed his trust or stained his honor; and from George Washington to the present hour the line of American Presidents have surpassed in character, ability, and devotion any line of kings and prime ministers known to me in modern history. They have not always been scholars. Indeed, few of them have been scholars, but when chosen—and the method of their choice sometimes bewilders the reflective and grieves the judicious—they have dug out of their latent forces and brought to bear upon their awful tasks such common sense, strong wills, noble industry, uprightness of purpose, that the great office still wears a more than imperial quality to enrich the imagination and to enlist the faith of mankind.

It would have been wiser to intrust this task of interpretation to one closer to Woodrow Wilson, when he was the head of the State and his will shaped the destinies of men. Such was not my privilege. My qualifications are of a simpler and a more unpretentious nature. I studied the shorter catechism, a drastic, bracing, moral tonic, with him in the Presbyterian Church of which his father, Joseph R. Wilson, was pastor, in the old city of Wilmington, N. C., my birthplace, where from time to time Thomas Woodrow Wilson would appear at home from college, to my younger eyes a tall, slender youth of curious homeliness, detachment, and distinction.

As a child, sitting in the pew of my father, who was an officer in that church, and looking into the finely molded face of Joseph R. Wilson and listening to the words he spoke, I had my first perception that beauty and music and power to move even young hearts lay in the English tongue when fitly joined to substantial thought and serious eloquence; and he has remained to me, as he did to his famous son, through the discipline of a generation of sermons, a standard of good preaching to which it is a delight and a comfort now and again to repair. The world owes a great debt to Joseph R. Wilson; for though the son studied under many masters, none influenced him so strongly as his father, who bred in him an impatience of dullness and diffuse thinking, a precise sense of word values, a scorn of priggishness and formal piety, the power to proceed straight to the core of a subject under discussion, and to utter measured thoughts with a vigor and beauty that in later days, and on a grander stage, was destined to awaken the pride of his countrymen and to command the attention of the world.

I do the day's work at the University of Virginia, where Woodrow Wilson "learned the law and the reason thereof." It came to pass that we were associated in the task of training American youth, and I became his friend by reason of the ties that bind men together in such endeavor; and further, because I thought I saw in him, in a new era in the evolution of American democracy, a promise of liberal leadership and of sympathy that never slept for the disadvantaged men who bear the burdens of the world. The sturdiest romantic tradition of American public life has been the rise into power and fame of the youth who struggled up to his heights from humble and unlovely beginnings. The career of Woodrow Wilson is no part of such tradition, for his racial inheritances and cultural opportunities were about as strong and fine as an American youth can have. His forbears for eight generations belonged to the Scotch race, perhaps the most active of the intellectual aristocracies which govern the United States, modified in the direction of a kindling imagination and a quickened joy of life and battle by Celtic admixture and residence. His parents, his ancestors on both sides, and his associates on all sides were religious men and women of Presbyterian faith.

He was the son, as I have said, of a Presbyterian minister of such distinction that it was in his house that the Southern Presbyterian Church was organized when the Civil War came to rend even the religious life of the Nation. His mother was the daughter of a Presbyterian minister, in Carlisle, England. He married, in his young manhood, the daughter of a Presbyterian minister. His grandfather, Thomas Woodrow, for whom he was named, was a learned, doughty servant of God, and his

uncle, James Woodrow, was a modern-minded Presbyterian minister, who, in his day, upheld stoutly against the allegation of heresy itself the banner of liberal thought and religious tolerance. His elementary and undergraduate education were under Presbyterian influences and in Presbyterian colleges—Davidson College, North Carolina, and Princeton, the college of New Jersey. Later, at the University of Virginia, in the study of law, and at Johns Hopkins University, in the study of politics and jurisprudence, he was to broaden his training and to establish a just claim as the most carefully educated man whom the people of this democracy, somewhat wary of learning and fearful lest intellectual subtlety dull the edge of common understanding, ever dared to place at the head of the Government.

Chester A. Arthur, Grover Cleveland, and Woodrow Wilson, alone, of our long presidential line, issued out of the preacher's home into public life. Cleveland and Wilson may be called the direct contributions of the Presbyterian manse to the Nation's service; and it is not without significance that the only two great successes, since 1860, of the Democratic Party, in which they now rank as titular saints, were achieved under their leadership. They were quite dissimilar in background and qualities, as a curious fate which opposed them to each other, face to face, in dour antagonism in later life made very clear, but alike in the firmness of their wills, the fixity of their conclusions, and the sensitiveness of their consciences. Surely, the great religious faith that sent forth these two American Presidents is justified of its children.

Woodrow Wilson was born in Virginia in the year 1856, in the middle period of the nineteenth century, and, with the exception of his undergraduate years at Princeton, the first 29 years of his life were passed in five Southern States, in the study of literature, history, and jurisprudence. He did not obtain at any of the colleges in which he studied a high reputation as a technical scholar. There surrounds his college career a legend of mature culture, an impression of pursuing a steadfast aim in realms of thought not included in the curriculum, an air of self-reliance untouched by eccentricity or exclusiveness; for he could be gay and charming with the choicest of his fellows, and bold and assertive enough in the rough and tumble of college affairs. He had a way, even in youth, of moving amid the things of the mind and of demeaning himself in the society of books as if they had always been friends of his and he knew where he was going with them. The habit of respecting his mind and using it sternly and reverently clung to him throughout life. The sum of the college tradition about him is, that he was a high-minded, proud-spirited, reflective, ambitious youth, never sturdy of body, eager to learn about men and affairs, and intent upon putting learning to use in action. The era in which he grew to manhood and the mood of the society in which his formative years were passed did much to fashion his ideals and to determine his ambitions.

The echoes of the great debate over the nature of the Union filled the air, and the towering figures of Calhoun and Webster yet dominated the imagination of opposing political schools. His early youth was passed away from, yet in the midst of, the tumult of the war which lay inherent in the logic of that debate. I am loath to praise any war, for all war is the collapse of human reason; but no sincerer war than this has occurred in human history. It was a war of ideals, of principles, of loyalty to ancient axioms of freedom, held dearer than life by both sides. The influence of the Civil War upon the youth of the man who was destined to be the Commander in Chief of all the forces of the undivided Republic in the greatest war of all time illustrates alike the calmness of his own mind and the sincerity of the mighty struggle itself. His people, postrevolutionary in American origin, had become southern in sentiment. He records, with deep feeling, how the passing sight of the grave face and regnant figure of Robert E. Lee, long after the war, stirred the emotions of his young heart; but there was developed in him no fierce passion of sectionalism, but rather a stern and cool will to comprehend the historic forces at play within American life, and to direct those forces toward the fulfillment of the longings of democratic society.

He was of the group of young southern-born men who knew the contributions of the South to American history, who had no apologies to offer for its part in the great struggle, enabled by so much valor and self-sacrifice, but who felt that the South must again become whole-heartedly a part of the Federal Union it had done so much to establish. He saw about his hearthstone the faces of grim men who were subjected to such a test of manhood as our poor human nature has seldom been forced to endure. They were not men of the broadest

social imagination, but they were men of intense and romantic loyalties to causes, and of an elevation of thought about the State as something to love and serve, and not something to batten on or to profit by. War did not unfold to him in his far southern home any of its marching splendors and waving banners. He saw only the filthy backwash of war, its ruin and its bitterness, cities in ashes, ignoramuses in power, revenge in action, and great leaders led away to imprisonment and obloquy.

It is true, that he had heard the civil struggle ended upon a sweet, clear note of "charity to all and malice to none"; and nothing in his life shows the balance of his mind better than his quiet perception of the fact that to his youth a challenge had come to help complete unfinished social and moral tasks, unpoisoned by hate and unwasted by vengeance. It might well have been within the Almighty's inscrutable purpose to give such a man such a preparation and such a social background for a supreme far-off test, when a distraught world would have sore need of the man of faith and will who would see clearly and reason accurately, and who would not falter or turn back when once he had set his feet upon a path.

Woodrow Wilson was 29 years old when he quit the formal life of a college student. One may treat as negligible the single year he spent vainly seeking to use a mind absorbed in the philosophy of law and its application to government, in the gainful practice of that profession. The span of his life was yet to stretch over 37 years, and he was to spend 25 of those years in teaching American youth politics and government in four different institutions of learning—Bryn Mawr College, Wesleyan College, Johns Hopkins University, Princeton University. Thus the man who was to be intrusted with the most stupendous administrative task in American history, spent three-fourths of his life as student, teacher, educational administrator, and writer of books. It was not the training adapted to equip for his work a prophet of force or a master of political intrigue; Ulysses would not have prescribed it for Tele-machus nor Machiavelli for his prince, but I fancy that all of us who hold the democratic faith will one day be grateful for these studious, reflective years in the life of Woodrow Wilson, when he pondered over the comparative merit of forms of government and modes of culture, when his practical mind, with its adventurous and romantic passion for action received unfolding for a mighty purpose.

It was in the still air of these laborious days that he reflected how to get things done after the fashion of his dreaming; when he nurtured enthusiasm for men and saw himself as their servant, when looking deep into the life of the social organism, he saw that not ideas, but ideals, conquered men's souls; when he learned calmness from Wordsworth, concentration of energy from Walter Bagehot, and with Edmund Burke discovered the real difference between a statesman and a pretender in the circumstance that one lives by the way and acts on expediency, the other lives on principles and acts for immortality; when he came to see faith as life's most substantial heroism and finally, pursuing a lonely road, gained a wide, luminous view of this world, as a world ordered of God, moved by the tides of His spirit, and thus laid the basis of a fame, which one day

Full high advanced

Shone like a meteor streaming to the wind.

Woodrow Wilson was the first professional teacher to pass almost directly from the classroom to the White House. Thousands of Americans to-day recall with gratitude his high gifts as a teacher; and as a fellow teacher, I would care to commemorate that element of his enduring service to his countrymen. To me and to the hosts of those who teach in this land, those quiet, busy years at Princeton, as a teacher, characterized by great personal happiness in a home of culture, of intense charm, energy, and growing insight, seem to constitute his real golden age. Large classes flocked to his lecture hall to applaud his varied knowledge, and to gain from him new phases of life and truth. There was beauty in the cadences of his voice and power to arouse and persuade the intellect in the clarity and orderliness of his talk, brightened by bland humor and tingling wit. When he entered upon the presidency of Princeton, a new aspect of his qualities appeared. It was clear that he had thought deeply of the meaning of education and of universities, as molding forces in a democracy. The problem of education was to him the problem of enriching the Nation's life with minds of maturity, integrity of character, and social sympathy. "What a man ought never to forget with regard to a college," he once said at Swarthmore, "is that it is a nursery of honor and principle."

He inaugurated new principles of educational contact, which now lie at the core of the development, not alone of his own university, but of all institutions of liberal culture in his country.

A dramatic struggle, marked by unusual phases of bitterness and ill will, characterized his administrative career at Princeton. Universities are little worlds in themselves; and, like the greater world about them, have a way of refusing to be reformed, and of preferring to be let alone, or to be reborn into new aims and processes, only under tremendous pressure and the passage of slow time. The total effect on him of all this academic warfare was the hardening of his resolution, the acquisition of formidable political skill to gain his ends, the arousing of his passion for democracy, and the fixing of his purpose to rescue universities from material control. He was born to fight for the goodness which is at the heart of things, and this ideal quickly grew into an objective of freedom which caught the eye of the Nation at the precise moment, when a great tide of liberal hope and opinion was flowing in and over a generation of self-satisfaction and contentment with things as they are. Unlike most cultivated southerners of his generation, Woodrow Wilson had the impulse to write as well as to talk, and became a writer of eminence, fit to claim a place in the literature of his country along with Jefferson, Madison, Lincoln, and Roosevelt.

At 29, he published his first book, *Congressional Government*, a postgraduate thesis, revealing the actual operations of our Government, and outlining, with a touch of genius, his theory of the wisest and most efficient relation of the Executive to Congress. This book contained a definite system of political philosophy which he put into practice, and to which he clung till the end of his career. In this respect, a likeness to Thomas Jefferson appears, for each of them had developed before he entered office a definite theory of government and applied its doctrines to the solution of national problems. A series of seven volumes on political and historical subjects—*Congressional Government*, *A Study in American Politics*; *The State—Elements of Historical and Practical Politics*; *Division and Reunion*; *George Washington*; *A History of the American People*; *Constitutional Government in the United States*; and four volumes of literary and social studies—*An Old Master* and *Other Political Essays*, *Mere Literature and Other Essays*, *Free Life*, *The New Freedom*, *When a Man Comes to Himself*—came from his pen in these days. It is impossible to read these books without concluding that the guiding motive of all his studies pointed toward political life and the goal of political office.

The opportunity to enter politics seemed worlds away to the man who was writing "mere literature" of this quality in 1895—

There is more of a nation's politics to be got out of its poetry than out of all its systematic writers upon public affairs and constitutions. Epics are better mirrors of manners than chronicles; dramas often-times let you into the secrets of statutes; orations stirred by a deep energy of emotion or resolution, passionate pamphlets that survive their mission because of the direct action of their style along permanent lines of thought, contain more history than parliamentary journals. It is not knowledge that moves the world, but ideals, convictions, the opinions or fancies that have been held or followed; and whoever studies humanity ought to study it alive, practice the vivisection of reading literature, and acquaint himself with something more than anatomies which are no longer in use by spirits.

In the year 1910, Woodrow Wilson withdrew from university direction and entered active politics. His last service to education was an effort, far from successful, to give to American universities what he considered a democratic regeneration in spirit, and to bring it about that the "voices of common men should murmur in their corridors." His first political declaration was an avowal that the time had come to reconceive the liberties of America, to break the dominance of cliques and machine, to confer on candidates for high office power and responsibility for leadership, to secure for all men a fairer adjustment of human relationships; and, further, that he was entering the field of politics in a new era, with no pledges to bind him and no promises to hinder him. Upon such a platform he was elected Governor of New Jersey, and in that office, and through his policies and principles, set forth in public speeches, this historian of his country, this southern-born Scotch-Irish Presbyterian teacher, an awkward circumlocution but a deadly definition of stubborn idealism, became, in 1912, the nominee of the Democratic Party for President, received a great majority in the Electoral College, and became President of the United States on March 4, 1913.

In 1916, he was renominated and reelected in the very midst of the greatest crisis in the secular history of mankind. I am

conscious that I am summing up, in bald sentences, revolutionary transformations in the career and fortunes of an American citizen such as have seldom happened to any man in our annals, and never before to the teacher or scholar—the nearest approach in breathless action being the transfer of Abraham Lincoln from a Main Street, second-story, law office to unimagined burdens of authority. Both stories will forever enrich and adorn the epic of democracy.

Woodrow Wilson once said that the true teacher or the true artist or historian must always work for the whole impression. Working in this spirit, I can not, at this time and place, attempt even to enumerate the legislative measures which, under his leadership, went forward in the Sixty-third Congress; but I venture to claim that no such well-thought-out program of financial, social, and industrial reform, no such inspiring spectacle of governmental efficiency and concentrated energy, no such display of fearless devotion to public interests, moving high above the plane of partisan advantage or of private gain, has been spread before the eyes of this generation as is afforded by the list of enduring enactments which crowned the accession to power of Woodrow Wilson; and I set up the further claim, that a President had come upon the great scene, at a time of one of those strange failures of government to redress public grievances, who had not only the will and purpose to change the note of industrial life in the Nation, and to halt the domination of American politics by its privileged financial interests, but also the sense of direction and skill to carry to some sort of fulfillment a policy of practical emancipation from materialism, and the restoration of equality of opportunity. The Congress that furnished the teamwork in this memorable period of legislative energy, was admirable and intelligent; but leadership lay in the President, not by use of patronage or by social amenities, but by the steady drive of intellectual force which his opponents, within and without his party, could not resist.

The new President concluded his first inaugural with these words:

The Nation has been deeply stirred; stirred by a solemn passion, stirred by the knowledge of wrong, of ideals lost, of government too often debauched and made an instrument of evil. The feelings with which we face this new age of right and opportunity sweep across our heartstrings like some air out of God's own presence, where justice and mercy are reconciled and the judge and the brother are one. We know our task to be no mere task of politics, but a task which shall search us through and through, whether we be able to understand our time and the need of our people, whether we be indeed their spokesman and interpreters, whether we have the pure heart to comprehend and the rectified will to choose our high course of action. This is not a day of triumph; it is a day of dedication. I summon all honest men, all patriotic, all forward-looking men, to my side. God helping me, I will not fail them, if they will but counsel and sustain me!

Passionate sincerity shines out of these moving words. It was a spiritual moment in our history. Men were looking at life with kinder and juster eyes. A new spokesman of humanity had appeared in our politics, with a will and a purpose and a program. An eager and a nipping air seemed to blow away the atmosphere of materialism which had in varying degree hung over the Capital since Lincoln's day. Not since Jefferson had a leader with such a program dwelt at Washington. If in 17 months a World War had not come to turn the thoughts of mankind to the defense of civilization itself, it is not immoderate to believe that the great reforms already inaugurated would have been followed by others equally vital, and the domestic policy of the Nation ordered in accordance with the best liberal thought of modern, self-governing communities.

But war came, apparently falling out of the blue, like some tragic drama of the high gods, upon a busy and peaceful people, bent upon working out here in a favored land some scheme of life by which every man should have liberty, without hindrance, to be what God made him. In reality, there had arrived the moment of explosion of confined passions and forces long gathering through the ages, the awful fruitage of centuries of human greed and incompetence, of malignant nationalistic ambitions, of scientific progress diverted from high ends to purposes of destruction, of vain and feeble puppets in places of power, of a European polity based on fear and balance of power, rather than reason and concert of action. In the twinkling of an eye, our gain-getting age became a brawling age of terror and revolution, to be thought of hereafter as the end of an old epoch and the beginning of a new epoch in human annals.

It has been often predicted that this greatest drama in history must needs be one day really written as a drama by some

Æschylus who will paint the darkening sky, the rushing of the wind, the tension of the time, as catastrophe leaped to catastrophe, the movements of the bewildered antagonists amid the muttering of the storm and the lightning. In such a drama alone could one hope to find a just portrait of the peace-loving figure of the American scholar President, as he lifts his shoulders to the burdens, seeks to readjust his mind and nature absorbed in purposes of new freedom for common men to the tasks of the dreadful hour, and with tragic loneliness and patience grapples with events.

I saw President Wilson for the last time in the fullness of his strength on the evening of April 2, 1917. He was standing at this desk, speaking the momentous words which were to lead this democracy into war, and to teach to all free peoples, then bewildered and depressed, the meaning of the conflict, and to lift up their hearts. All mankind was his audience. The air of this Hall was tense with emotion, and the dullest sensed the historic significance of the great scene. There were then etched into my mind, in lines never to be erased, the face and form and manner of Woodrow Wilson—the lithe figure, the bony structure of the forehead, the lean, long visage as of a Covenantant, somber with fixed purpose. The culture of generations was in his tones, the scholar's artistry in his words, the inheritance of a gentleman's breeding in his manner, and calm courage in his discerning eyes. I was somehow reminded of the unbending lineaments and figure of Andrew Jackson, whom Woodrow Wilson resembled physically; and, in the very soul of him, morally exhibiting the same grim resolution, as of a stranger to the fear that weaklings feel.

The direction of American affairs, as the Republic swept into the current of the Great War, was in the hands of a liberal statesman, bred of democracy, firm of will, jealous of his country's honor, gifted with power to argue with cogency, capable of seeing far ahead the movements of social progress, incapable of fear, unmoved by passion or greed of conquest, intent upon justice, dreaming of peace and the righting of immemorial wrongs. I do not intend a résumé of the events of the two years and eight months intervening between the onset of war and the entrance of America into the struggle, but rather an analysis of what Prof. L. P. Jacks, a thoughtful English scholar to whom I am indebted for a better understanding of Woodrow Wilson, once called the "war mind" of Woodrow Wilson. To have taken any other primary step than the issuance of a declaration of neutrality in August, 1914, would have been the act of a madman or a superman, and Mr. Wilson was merely the trustee of the most powerful country on earth hitherto dedicated to the tradition of its own nonintervention in foreign affairs and the noninterference of European nations in cis-Atlantic problems.

The country was unfamiliar with European complications and unaware of the new international position decided for them, in Theodore Roosevelt's words, by fate and the march of events. Even the intellectuals who grasped the truth that the war was a conflict between two opposing schools of civilization would have been shocked by any other initial policy than the policy of neutrality. Military glory as an end in itself held no lure for President Wilson and no power to confuse his judgment, as his course in Mexico and his Mobile declaration had shown. I have little doubt as to where lay his sympathies from the first hour of the conflict, but he was not the man in a position of vast responsibility to be swayed by sympathy or prejudice or self-interest. Rather, he was the man, careless of fleeting judgments, to seek the position of moral responsibility imposed upon the United States and to so place its power at the service of mankind that other ages would hold it in grateful remembrance. I have read the speeches of President Wilson from the beginning of the war to its end, and I find in them an amazing strength and unity. I am not troubled by the inconsistency of his early advocacy of peace and his later proclamation of "force to the limit," for there is no inconsistency.

As Lincoln, with supreme wisdom, planted his policy not on slavery but on union, Woodrow Wilson, with a similar greatness, tied his policy to the idea that the United States, the most powerful of all States, should be a servant, a minister, a friend, not a master among the nations. Never before in the history of mankind has a statesman of the first order made the humble doctrine of service to humanity a cardinal and guiding principle of world politics. As long as he thought this principle was best served by neutrality, we kept out of the war. The long series of diplomatic papers, the patience that endured the barbarism of the *Lusitania* and bore without flinching the contumely of foes and the misgivings of friends may justly be thought of as mere incidents in the evolution of this great

idea. When at last the insolent brutality of the renewal of submarine warfare taught him that force alone could advance his doctrine, he took us into war. His much-derided Notes to the Imperial German Government deserve rank among the enduring documents of international history, and constitute one of the most decisive arguments ever addressed to the conscience of civilization, to illustrate the solemn hesitation that ought to mark the course of rulers who carry nations into war, to give proof that in such a collapse of civilization at least one nation should retain its poise, and to unite his countrymen while he taught the world.

When on March 5, 1914, before the war, in discussing the Panama tolls, he said:

We are too big, too powerful, too self-respecting a Nation to interpret with too strained or refined a reading the words of our own promises, just because we have power enough to give us leave to read them as we please—

he made clear all that subsequently possessed his mind. When a year later he said:

We do not want anything that does not belong to us. Is not a Nation in that position free to serve other nations?

he revealed the heart of his policy; and so when, on the memorable night of April 2, he asked Congress to acknowledge a state of war, it was to a crusade, not to a war, that his statesmanlike policy had brought his countrymen; and they could not doubt that the diplomatic victory was his, the moral victory was his, that a mighty people were behind him, that the leadership of mankind rested where democracy on a continental scale had begun, in the American Republic.

In December, 1916, the President had sought through a statement by each side of its war aims to discover if any basis of peace might be found. This inquiry exhibited diplomatic genius of the first order, for it enraged the Germans and aided the Allies to consolidate their moral position before the world. The great achievement was obscured for a moment by a storm of obloquy from superheated patriots who misread the grim humor and misinterpreted his precise language when he declared that all sides, according to their own general statement to their own people, had the same aims.

Again, on January 22, 1917, Mr. Wilson for the last time sought mediation in a speech in which he defined the fundamental conditions of a permanent peace. No greater state paper than this exists in the records of modern states. The result of this masterstroke was to bring us nearer war, but also nearer to lasting peace, to establish him still more closely as the one dispassionate voice of mankind, and again to bring upon him an outburst of condemnation for his noblest pre-war utterance in which he used, but explained none too skillfully, the phrase "peace without victory," by which he meant that only a reconciled Europe could be a tranquil and stable Europe, and that community of power must succeed balance of power.

Still preoccupied with the thought of lasting peace, Mr. Wilson appeared before the Congress in the early winter of 1918, at the darkest moment of the allied fortunes and formulated 14 points of peace. These generalizations were almost revolutionary in their scope and idealism and ultimately formed the general basis of the peace to be drafted; but they carried, too, a political adroitness aiming directly at putting an end to the fighting. They planted new seeds of aspiration and new hopes of justice between nations in the minds of men; and it is not easy to ostracize such ideas. Its timeliness, as well as its strength, gives to this document a place among the great charters which have marked the progress of mankind. Our other great papers, the Declaration, the Farewell Address, Virginia Bill of Rights, the Constitution, were local or continental in their application. This paper, and the complementary addresses following it, aimed at nothing less than to endow the broken and weary nations with a new order and a new life. Desperate peoples for an hour looked into the shining face of Hope, and had sight of an old heaven and a new earth, arising out of horror, but ennobled by the self-sacrifice of millions. In Burke's vivid phrase, he was now the Lord of the Ascendant; his speeches had the strength of battalions along the front of battle; his voice was the voice of free peoples; and all over the earth, in the great capitals, among the tribes of the desert, in the islands of the sea, men felt the molding of his thought and sensed the grandeur of his aims.

The conversion of American energies into war energies, the transformation of the American spirit and philosophy of life into war spirit and war philosophy, the actual throwing into the furnace of modern war, across 3,000 miles of sea, the re-

sources of men and money and resolution of the American people, takes rank among the greatest practical enterprises of mankind. It may well be conceded that mistakes were made and that judgments went wrong; but "it is the grim silence of facts that counts." Military experts impartially chosen, not political generals, commanded armies in this war. No congressional committees, as in former wars, directed its strategy and confused its processes. No serious bickerings or scandals or conflicts marred the unity of its course. Far-seeing fiscal and economic legislation gave steadiness to the Nation in the vast undertaking. Men and materials flowed to the armies in the field. The genius of the Army and Navy displayed itself in war. The genius of the President struck down the enemy morale and laid the foundations of peace. No democracy in history and few autocracies have ever given such an exhibition of efficient cooperation or earned such triumphant success.

The logic of events, to which Wilson's matchless skill in exhortation and argument had contributed so much, now decreed that in 10 months ancient dynasties would abdicate and flee, and that under American leadership the mighty war would come to an end, an armistice would be declared, and a peace conference come into being. Long generations hence we shall warm our hearts at the fire of the glory that then shone about this Republic, won for it by the steadfast mind of its President, the unity of its people, the disinterestedness of its purposes, and the valor of its youth unafraid to die.

On December 12 the *George Washington*, steaming through long lines of gray battleships over a gray sea amid the roar of guns and shoutings, dropped anchor at Brest, and an American President, for the first time, appeared in Europe to take part in a parliament of nations assembled to determine for years to come the course of history. Whether he should have gone at all, or only once, or by whom he should have been accompanied is a sea of fascinating but futile conjecture, upon which I shall not embark. Woodrow Wilson was not a master of manipulating men or of dramatizing himself, but a master, and in some sense, a slave of ideas and ideals. It seemed to him that it was his moral responsibility, under God, to go to Europe, heedless of the rocks ahead of him and the whirlpools behind him. It was a fearful responsibility to assume, for all the peace congresses of civilization, from Westphalia and Vienna to Paris, had satisfied nobody and had generally broken their creators. This Congress was the gigantic legatee of the failures of all past congresses, and in none of these congresses of the past did any one man ever occupy a position of such terrible greatness.

I am sure Aristotle's fine summary of tragedy must often have visited his mind as his ship wended her way across the seas—

Tragedy, in its pure idea, shows us a mortal will engaged in an unequal struggle with destiny, whether that destiny be represented by the forces within or without the mind. The conflict reaches its tragic issue when the individual perishes; but, through his ruin, the disturbed order of the world is restored and the moral forces reassert their sway.

Three underlying ideas and purposes, all born of American daring and American experience, guided his mind and drove him on. The first was faith in the whole kindling length and logic of democracy itself; faith in men, faith in the supremacy of spiritual force, given new sacredness by what he saw about him of suffering and death. The second was the essential democratic idea of the right of men everywhere to determine their own affairs. The third was the idea of cooperation of peoples, the partnership of opinion among democratic nations, which once had welded discordant States in a new world into a Federal Union, and might again weld discordant peoples in an old world into a parliament of man.

For six months, at the Congress of Paris, in an alien air surcharged with cynicism and suspicion, almost single-handed he fought for these principles, buoyed and sustained in the first period of his struggle by high tides of hope and faith that surged up to him out of the bruised hearts of peoples who trusted him to lead them over the failure of brute force into God's peace, and in the second period buffeted by the ebb tides of fading enthusiasm, of disintegrating unity, of selfish dominion, and ancient fears.

He had gone to Paris with the "fourteen points of peace," accepted alike by his Allies and by the Central Powers, as the basis for the coming settlement. The "fourteen points" lived in his mind as a doctrine of international justice and the League of Nations was an integral part thereof, conceived as the medium to interpret and administer those principles of justice, and to introduce into the relations of modern states the idea of organic international cooperation based on reason. No man could have achieved this program in its entirety, or secured a

perfect peace of justice at Paris. Statesmanship of the most transcendent form could not have diagnosed, much less healed, that tremendous ailment of the world. The Versailles treaty, though a huge advance over any one of the five great treaties since Westphalia in sympathy and counsel with the peoples concerned, in the redress of bitter wrongs, in consideration for the weak, and thought of the future, proved to be not God's peace. It was a peace shot through with the fear and resentment of suffering and ill-used men; a settlement corrupted by previous bargains among the allied powers made under the lure of traditional policies and the stern necessities of war and inconsistent with the high purpose of the charter which Wilson had presented for the guidance of the Congress.

When the odium of nations and races began to beat upon him because he could not perform a task beyond mortal achievement, Wilson saw himself confronted with the alternative of world-wide chaos and disintegration, or an imperfect peace with the League of Nations. He could not, with his vast sense of political and social institutions, postpone by headstrong and willful conduct the normal and peaceful ordering of men's lives.

Woodrow Wilson was not a revolutionist. Political reform by "red ruin and the breaking up of laws" was not in his blood. He chose the League of Nations, surrendering, in the anguish of compromise, such portions of his doctrine of international justice as he could not get. I am of those who believe that he gained more than he sacrificed at Versailles, and I know that he alone among mortal men could have salvaged out of that sea of passion the League of Nations, the bravest and most reasonable effort to rationalize national relations in political history. The statement sometimes made that he fell beaten down by the superior adroitness and intelligence of his European colleagues is a piece of analysis entitling its author to a high place in any hierarchy of inferior minds. What was liberal in the Versailles treaty Wilson's faith and courage helped to put there. What was reactionary he fought against to the limit of his strength, and accepted only to gain an instrument which he believed had in it power to purge and correct.

He had the heart to match the moral hopes of mankind against their passions. He sought to give the twentieth century a faith to inspire it and to justify the sacrifice of millions of lives; and if there was failure, in Jan Smuts' words, it was humanity's failure. To make him, the one undaunted advocate of those hopes, the scapegoat of a world collapse, is to visit upon him injustice so cruel that it must perish of its own unreason. Therefore, I do not envisage Woodrow Wilson as a failure as he came back to these shores bearing in his hands the covenant of the league and the imperfect treaty itself. I envisaged him rather as a victor and conqueror as he returned to America, untouched by sordidness or dishonor, unsurpassed in moral devotion, and offering to his country leadership in the broadest and worthiest cause in all the story of human struggle for a better life. What statesman in the history of world adjustment in defense of a code of shining, if unattainable, idealism, had ever borne himself more stoutly or battled with such foes or achieved, with so little support at home or abroad, so astounding a result?

When President Wilson first sailed for Europe in December, 1918, American sentiment, irrespective of party, generally approved his declared purpose to incorporate in the treaty of peace some sort of league covenant. The heart of the time was then in tune with the age-old dream. The President of the United States had a right to assume that the American people were behind him on the League of Nations, notwithstanding the adverse verdict of the electorate on his general policies. Eight years before, in 1910, in his Nobel lecture, Theodore Roosevelt himself said:

It would be a master stroke if those great powers honestly bent on peace would form a league of peace, not only to keep the peace among themselves, but to prevent, by force if necessary, its being broken by others. The man or statesman who should bring about such a condition would have earned his place in history for all time and his title to the gratitude of all mankind.

A list of eminent Americans of all parties then in line with that pronouncement in 1918 would be an illuminating contribution to the higher impulses of that era.

When he returned, a different spectacle met his eyes. The great cause for which he had even then given his life had become confused with a group of political policies given by his enemies the generic name of Wilsonism, and about this raged the wrath, despair, and hatred of the overstrained time. The

tired warrior of the common good, who had kept the faith, fought the fight, and won a victory, instead of hearing the acclaim of his own people, "Well done, thou good and faithful servant," saw himself ringed about with foes of mind to rend and destroy him.

I can not give time here to determining whether Wilson himself was to blame, in tactical judgment alone, or how much he was to blame for the change in American opinion; nor do I deny that honest men opposed the league and the treaty; nor do I undertake the task of apportioning with nice justice the responsibility for the caldron of heat and "sweater'd venom" of deadlock and indecision, of partizanship and passion, in which for weary months this largest question of modern times boiled and bubbled. Other ages will make that solemn appraisal. I may be permitted the reflection that something less of malice in the hearts of his enemies, and something more of compromise in his own heart, and something more of political genius and firm purpose in the hearts of those who held the faith, and there might have been another world!

I have lately been reading, and I wish all of his countrymen might one day quietly read, the 30 speeches made by the President on that fateful western tour, which he undertook in September, 1919, in order to secure from the American people the stamp of approval which he desired for his work in Europe, and which the American Senate was unwilling to give. There is no series of political speeches, made under circumstances of such strain, in our annals attaining a higher level of oratory and exposition. He was forewarned, as he fared forth, that his life might be the forfeit of his enterprise. He replied, "I would forfeit my life to attain the end I seek," and he meant it; for he was incapable of melodramatic pose, and the consecration of that statement runs like a thread of gold through the sustained appeal.

Undeterred by the stabbing of physical pain and failing strength, Woodrow Wilson here reveals the scope and depth of his conviction that national isolation for America or any country is forever ended; that the outlawry of war is democracy's next great task; that suicide hovers over civilization in the present system of the relation of States and the present potentialities of destructive warfare; that the hour has struck for the creation of an instrument to gather behind it the organized manhood of the world, bent upon evolving a clearer international conscience, a firmer international law substituting reason for passion in human affairs, and that the covenant of the League of Nations is such an instrument. If mankind will but adapt it to its uses. This is the Wilsonism that the quiet justice of humanity will remember throughout the ages. But all this force and eloquence and martyrdom were to avail nothing. Woodrow Wilson fell stricken as if in battle at Pueblo, Colo., on September 25, 1919, and came home shorn of his unmatched strength to persuade and move the hearts of his countrymen.

The American Senate, in the plain discharge of its constitutional duty, discussed the treaty for a period of eight months, during five months of which period the President struggled against mortal illness, rejected it on March 20, and elected to remain outside the first organized scheme of international cooperation in modern history.

The last words spoken to the people at Pueblo by the President were these:

Now that the mists of this great question have cleared away, I believe that men will see the truth, eye to eye and face to face. There is one thing that the American people always rise to and extend their hand to, and that is the truth of justice, liberty, and peace. We have accepted that truth, and it is going to lead us, and through us the world, out into pastures of quietness and peace such as this world never dreamed of before.

The prophecy of the stricken advocate of reason has not yet come true. There are those who hope and believe that it will never come true. It is not seemly that I should here attempt any controversial discussion; but I should lack the courage of the man I seek to interpret if I did not, as an American citizen, cry out, even in this chamber, God grant that it may come true, and gain new authority to protect mankind against its imminent dangers!

It is commonly said that the historic rank of Woodrow Wilson is wrapped up in the destiny of the covenant; that if it fails, his rank will be merely that of one more radiant spirit whose reach exceeded his grasp, and if it succeeds, his apotheosis in history is secure. I find the formula too glib and automatic for the forces and ideas it presumes to envelop.

Apotheosis and immortality are weighty words that ill fit our poor flesh, so foredoomed to the iniquity of earthly oblivion; but surely the fame of Woodrow Wilson does not rest upon an instrument the orderly growth of which into final usefulness may so change its structure and modify its form as to cause it to become another and an even better instrument. It depends upon an unconquerable idea, so greatly conceived and set forth, that it must continue to grow, and is now growing, into new and finer form, and his fame must grow with it into whatever bright renown it may attain.

Posterity will be eager to have knowledge of the personality and the salient qualities of a statesman set apart to play such a rôle in the world's affairs. I shall picture him as I knew him—not the Wilson whom mankind will remember as the stern war leader of a mighty nation; but another Wilson, known to me—a Wilson of sprightliness and humor and handsome courtesy, of kindly countenance and fascinating conversation with power to "beguile you into being informed beyond your worth, and wise beyond your birthright." The sensitive shyness and reserve that clings to men who can not capitalize their personal advantages to win friends, clung to him. Intimacies were sacred relations to his spirit, but these intimacies could not overflow into inveterate amiability. He did not wear his heart on his sleeve for daws to peck at; but tenderness governed his demeanor with those he trusted; and he wore about him a quiet grace of dignity.

Woodrow Wilson was a deeply religious man. Men who do not understand the religious spirit need not even try to understand him. No man in supreme power in any nation's life, since Gladstone, was so profoundly penetrated by the Christian faith. He was sturdily and mystically Christian. He took God Almighty in earnest as the Supreme Reality, and he carried Him into his home and saw His immanence and guidance in private and public life. He had the habit of prayer, and he read and reread the English Bible. Through all his speeches flamed the glory of an insistent belief that morality and politics should march hand in hand. Many of his tendencies, perhaps the most of them that occasioned debate and censure, sprang from his pragmatic belief in God. There was actually such a thing as God's will to this man; and when he thought he had divined that will, he knew the right, the absolute right, and he was prepared to stand on that, if friends deserted him or he parted company with friends, if applause came or if the blow fell. "Interest divides men; what unites them is the common pursuit of right," was one of his great utterances, and not unlike the stout-hearted old mediæval bishops, he stood ready to wield sword or bludgeon if the foe showed his face. "God save us from compromise," "Let's stop being merely practical, and find out what's right," were phrases often on his lips.

It was the Christian philosophy at work in his spirit that placed him almost instinctively on the side of the common man and against the privileged and the powerful. Wilson could be, and sometimes was, aloof and unrelenting to this or that friend or foe; but mankind, in the mass, never failed to soften his spirit and awaken his emotions. He would have gone to the stake to protect mankind, as a whole, from tyranny and injustice; but the ambitions of any individual man, even a friend, stirred him slightly. His greatest defect as a leader of men was this shrinking from human contacts at close range. When he had proved the rightness of his case and stated it boldly, a strange, moral fastidiousness and loyalty to the overlordship of reason prevented him from seeking to win men to his side by talking it over in whispers or by sweet and soothing persuasiveness. As Augustine Birrell said of Carlyle, "It seemed to him to be his duty to teach, not to tickle mankind." This inhibition left him a master of ideas, but not a master of using men, and substituted admiration and respect for love and enthusiasm in the nature of the mass of his followers.

Wilson evoked no such popular devotion as did Henry Clay or James G. Blaine or Theodore Roosevelt. Men of his prophetic quality rarely do. Edmund Burke once said of Charles James Fox, with a deep sigh, "He was made to be loved." That sigh often, no doubt, stirred in Woodrow Wilson's heart. He was a selfless man in so far as personal glory or profit was concerned. It was "perfection, not renown" that allured him. It was God's praise, not men's praise that gave him strength. The ambition which drove him to preeminence was the ambition to create new ideals or to reilluminate old, neglected ones. Intellectually he does not belong with Kant or Burke or Hamilton or John Marshall; but he had a brain of high order, functioning in a different atmosphere and a broader field, a

brain which worked straight and quick; and he suffered ill, fools and those of untidy minds. I should call his greatest mental gifts the power to look into the future, to assemble facts, to marshal his propositions in due order, to generalize fairly, and to state his interpretations with such terseness and soundness that they sank into minds that listened.

As an Executive, he was not an incarnation of action like Napoleon or Roosevelt. The lightning decision was not after his manner; but his industry was tireless, his judgment of men sound, and his mind did its own thinking, and men could not frighten or deceive or cajole him. The possession of a tenacious memory enabled him to keep the whole before him, to dispense with threshing around, and to dread irrelevance and bombast. No dogmatism or abruptness controlled his relations to men who approached his problem from the same angle. He gave his entire trust to those who worked with him, defended them against injustice, and upheld them against slander or misrepresentation.

The world used to be full of people busy in discerning, imagining, and cataloging the faults of Woodrow Wilson. Dogmatist and hermit, rhetorician and pacifist, egocentric and ingrate, dreamer and drifter were some of the milder coinages of his more civil and restrained enemies. Well, he had his faults. I am not here to portray or to defend his faults. Some of them were protective devices to conserve physical strength, and others lay buried deep in the impulses in his blood; but inhibitions born of pride and courage and high ambition are such as nations learn to forget and to forgive, and even to love and cherish. Posterity is incurious about the minor faults of its heroes. England does not concern itself with the flaws of Nelson and William Pitt. Men do not remember Andrew Jackson's stubbornness and prejudice. They recall only the fury and fire of his purpose to preserve the Federal Union.

His countrymen will not forever remember the volubility and histrionic arts of Theodore Roosevelt, but they will never let die the memory of the valiant force of him penetrating the Nation's spirit, increasing the sum of its energies, awakening youth to high adventure, and stridently proclaiming the glory of upright living. They do not tattle about Washington's blazing profanity at Monmouth, but see his stately figure riding into the storm of battle beneath the tattered flag of a new nation he would fain bring into the world. They do not whisper about Lincoln's choice of companions or his taste in anecdotes or his cunning in politics; but they read incised on white marble walls the sacred poems which his literary genius has left to posterity, behold him in the night watches correcting his mistakes and using even his humility as a sword with which to carve out the victory of his cause. And so it will be with Woodrow Wilson in the long perspective of the years. The destiny in his blood decided that he should possess—

The unconquerable will
And courage never to submit or yield
And what is else, not to be overcome.

His ambition to serve his country was as intense as Cromwell's. It was not easy for him to forget or to forgive. The pride of righteousness sometimes froze the more genial currents of his soul, but he was willing to die, and did die to guarantee to humble men a fairer chance in a juster world, and therefore the savage assaults of his enemies will shrivel into the insignificance of Horace Greeley's editorials against Lincoln's policies, or the futility of the early century pamphleteers against Thomas Jefferson as iconoclast and antichrist, and his mere detractors will themselves either attain a repellent fame as detractors of greatness or else they will pass out of memory and no one will ask

Who or what they have been
More than he asks what waves
Of the midmost ocean have swelled,
Foamed for a moment and gone.

The four closing years in the life of Woodrow Wilson were harsh, unheroic, uninspiring years in public affairs, such as generally follow the emotional climaxes of war, and it is a commonplace to describe them as years of personal tragedy to him. A vast disillusionment, a chaos miscalled peace, a kind of shamefacedness and cynicism in the recollection of its dreams, and faith in the triumph of moral ideals, seemed to hold the Nation and the world in its grasp. As far as Woodrow Wilson himself was concerned, it is well perhaps not to confuse the bodily pain, the palsied side, and all the cold

malignities of the time with the essential meaning of those years. Adversity had been wanting in his career, and now it was come upon him, and he was to have acquaintance with its sublime refinement, and the country was to gain knowledge of its power to smite the hearts of just men with love for the baffled fighter who had known none too much of popular affection in his career of self-reliant conquest.

He carried his head high in the dying days of his public service, omitting no duty his strength could bear, meeting the gracious courtesy of his successor at the end with an equal courtesy, as they rode away from the White House, so deeply associated in American history with memories of sorrow and pain, as well as pomp and power, while unseen of human eyes to each of them alike, "tragedy with sceptered pall comes sweeping by."

In the days left to him as the first private citizen of the Republic, unlike Burke, he did not waste his strength in windy opposition or factious controversy. He wrote no memoirs. "With my historical sense, how could I be my own biographer," he said. He exploited in no way his wide fame, uttered no complaint, suffered no pity, displayed no vainglory. It was as if a great gentleman, "weary of the weight of this unintelligible world," sought his peace at last in a quiet home luminous with love and perfect care, and shut out at last from the noises and the storm. From this sanctuary, day by day, it was given him to behold the processes of his own immortality, as simple men and women gathered about his home and perceived in his wan image the poignant symbol of their great days and the historic link forever binding them to noble enthusiasms.

The very depth and dignity of his silence won through to the imagination of men, and when he spoke, the world stood at attention heartened to have knowledge that his high hopes for mankind were undimmed, and that there was no faltering in that firm faith of his that liberty guided by reason and not by force was the contribution of his century to human advancement. I doubt not that regrets visited his mind for lost opportunities that might have been better used as he reviewed the pageant of his life in these long sequestered days; but a durable satisfaction must needs have fortified his soul, that even the devil's advocate must bear witness that—

He had loved no darkness,
Sophisticated no truth,
Allowed no fear.

A grace which his heart craved came in the exaltation and excitement of the vision of a valiant new generation on the march, intent to light its torches at the still burning fire of his purpose to substitute for the arbitrament of war and death the reign of law, to restore to the land of his love and his loyalty its surrendered ascendancy, and to guarantee to the principles he had fought for eternal validity. The puzzle and complex of his dual nature seemed at last to fall into a mold of simplicity and consistency. "We die but once, and we die without distinction if we are not willing to die the death of sacrifice. Honor and distinction come only as rewards for service to mankind." Thus Woodrow Wilson had spoken in the days of his strength to high-hearted American youth, and now he could of right claim the supreme distinction as his very own! And so even as death enfolded him in its shadows, men paused in their busy lives and came to comprehend that a man of great faith had lived in their era akin in heart and blood to John Milton and John Hampden, Mazzini, and Luther, that a prophet had guided their country and stirred the heart of mankind in an hour of destiny, and that an incorruptible liberal aflame with will to advance the slow ascent of man had joined those whom men call immortal and stood among that high fellowship,

Constant as the Northern Star
Of whose true, fixed, and lasting quality,
There is no fellow in the firmament.

[Applause.]

The PRESIDENT pro tempore of the Senate. The Chaplain of the Senate will pronounce the benediction.

The Rev. J. J. Muir, Chaplain of the Senate, pronounced the benediction as follows:

May the grace of God which passeth all understanding guard our hearts and minds and grant unto us at this time and all times the consciousness of His grace, and may the love of God and the fellowship of the Holy Spirit be with us now and always. Amen.

The PRESIDENT pro tempore of the Senate. The purpose of the assembly having been accomplished, it will be dissolved. Thereupon the President and his Cabinet, the Diplomatic Corps, the Chief Justice and the Associate Justices of the Supreme Court, and the Senate retired.

EXPIRATION OF RECESS

The recess having expired, at 1 o'clock and 42 minutes p. m. the Speaker resumed the chair and called the House to order.

ADJOURNMENT

Mr. LONGWORTH. Mr. Speaker, as a further mark of respect to the memory of the late President Wilson, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 43 minutes p. m.) the House adjourned until to-morrow, Tuesday, December 16, 1924, at 12 o'clock noon.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BARBOUR: A bill (H. R. 10767) providing for Federal inspection, under rules and regulations to be promulgated by the Secretary of Agriculture, of all manufactured canned food products to be marketed in interstate commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. HAYDEN: A bill (H. R. 10768) authorizing an appropriation for road and bridge construction within the Hopi Indian Reservation, Ariz.; to the Committee on Indian Affairs.

Also, a bill (H. R. 10769) authorizing an appropriation for the construction of a fence on the east boundary of the Papago Indian Reservation, Ariz.; to the Committee on Indian Affairs.

By Mr. HILL of Washington: A bill (H. R. 10770) granting certain lands to the State of Washington for public park and recreational grounds, and for other purposes; to the Committee on the Public Lands.

By Mr. SALMON: A bill (H. R. 10771) authorizing the acquisition of land and suitably marking the site of the Battle of Franklin, Tenn.; to the Committee on Military Affairs.

By Mr. TAGUE: A bill (H. R. 10782) to amend the act entitled "An act to provide revenue, to regulate commerce in foreign countries, and to encourage the industries in the United States, and for other purposes," approved September 21, 1922; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARBOUR: A bill (H. R. 10772) for the relief of Dean Rhoads; to the Committee on Military Affairs.

By Mr. KEARNS: A bill (H. R. 10773) granting an increase of pension to Emily J. Cunningham; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10774) granting an increase of pension to Clorinda Moore; to the Committee on Invalid Pensions.

By Mr. KIESS: A bill (H. R. 10775) granting an increase of pension to Evelina C. Gross; to the Committee on Invalid Pensions.

By Mr. LAGUARDIA: A bill (H. R. 10776) granting a pension to Edith Bolling Wilson; to the Committee on Pensions.

By Mr. O'CONNELL of New York: A bill (H. R. 10777) for the relief of Frances E. Martin; to the Committee on Claims.

By Mr. ROGERS of New Hampshire: A bill (H. R. 10778) granting an increase of pension to Lutheria Bachelder; to the Committee on Invalid Pensions.

By Mr. SNELL: A bill (H. R. 10779) granting a pension to Cecil C. Cardinal; to the Committee on Invalid Pensions.

By Mr. THOMAS of Kentucky: A bill (H. R. 10780) granting a pension to Francis Payne; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10781) granting an increase of pension to John William Stringer; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII,

3212. Mr. O'CONNELL of New York presented a petition of the metal trades department of the American Federation of Labor, to make adequate provision for the building up and maintaining a well-balanced Navy based on the treaty ratio, which was referred to the Committee on Naval Affairs.

SENATE

TUESDAY, December 16, 1924

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Our Father, the author and giver of life, we look unto Thee this morning grateful for the manifold mercies with which Thou hast crowned our days. We humbly beseech Thee, as we turn to the duties awaiting immediate attention, that we may be guided by Thy heavenly wisdom to know Thy will and to follow in the paths of duty, recognizing the higher authority as indicated by Thyself who has to do with the affairs of men. Be very near and gracious to each, answer the prayers for our country, and glorify Thyself in and through the Nation. We humbly ask in Jesus Christ's name. Amen.

The reading clerk proceeded to read the Journal of the proceedings of the legislative day of Wednesday, December 10, 1924, when, on request of Mr. JONES of Washington and by unanimous consent, the further reading was dispensed with and the Journal was approved.

READJUSTMENT OF POSTAL SALARIES AND RATES

Mr. STERLING. Mr. President, accompanying the draft of the bill reclassifying salaries and readjusting the rates on certain classes of mail matter there is a letter from the Postmaster General giving some analysis of the bill and the grounds upon which the bill is based. I ask that the letter be printed in the RECORD and referred to the Committee on Post Offices and Post Roads.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The letter is as follows:

POST OFFICE DEPARTMENT UNITED STATES OF AMERICA,
OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., December 12, 1924.

HON. THOMAS STERLING,
United States Senate.

MY DEAR SENATOR STERLING: In compliance with your request for the suggestions of the Post Office Department as to the sources from which may be derived revenues approximately aggregating the additional cost the department would be compelled to meet in the event of the passage of the bill increasing the pay of post-office employees, I transmit herewith the following in the form of a bill, which will, in the judgment of the department, meet the desired end. It will be observed that the suggestions affect every class of mail on which the department now sustains a loss, as revealed by the result of the cost ascertainment just completed by direction of Congress, except foreign mails, and it is the purpose to distribute these with due regard to equity.

By practice of every economy possible consistent with good service and by reason of the gradual increase in the volume of business, the department has been slowly approaching the point where its receipts would balance its expenditures. According to departmental estimates the postal pay bill will add approximately \$68,000,000 to the annual expenditures and it is at once obvious that the money to meet this must come from somewhere. The question is whether it shall be assessed against the general taxpayer or whether it shall be obtained by providing increased rates for mail now carried at a loss. It is my belief that the latter is the correct method.

Inasmuch as these suggestions are based upon the conclusions arrived at by the cost ascertainment, I desire to say that I have implicit faith in their accuracy. It has been made by some of the most efficient and experienced experts in the Postal Service and has later been most carefully analyzed by two of the best known firms of expert accountants in the country, and both the accountants and the department are prepared to explain and defend it if attacked.

The loss incurred by fourth-class mail, or parcel post, is much less than had been popularly believed. Most extravagant statements have been repeatedly made concerning the deficit incurred through carrying parcel post, but the figures demonstrate these exaggerations. In submitting the rates proposed herewith, the department proceeds upon the theory that while the handling of this class of mail is a very useful and in fact indispensable feature of the Postal Service, it is, nevertheless, commerce and should be regarded as such when it comes to making rates for carrying it. Fourth-class mail is made up of commodities and not of intelligence. It should pay its full way and leave a slight margin of safety sufficient to provide for unforeseen changes. The loss sustained on this class of mail closely approximates \$7,000,000. In order to wipe this out and provide the margin referred to, the department suggests increases amounting to about \$12,000,000. However, after the cost of the salary bill is

added to the expense of the department, the proportional share chargeable to fourth class will practically balance this margin.

Third-class mail consists largely of circulars and of direct mail advertising. It has to some extent the treatment of first-class mail. Concerning it, it is the view that, like parcel post, it also should pay its way and leave a slight margin. The loss on this class is \$16,000,000. It is proposed to increase receipts by \$18,000,000 by means of the new schedule of rates herein proposed.

First-class mail as a whole yields a profit in excess of \$80,000,000, but the postal card feature of it is carried at a loss of about .45 of a cent on each card. It is proposed to cover this by increasing the price of postal cards to 1½ cents. There will be those who will regard this as much more difficult of accomplishment than the department believes will prove the case. Postal cards are principally used by those who buy them in considerable numbers and employ them in sending out notices of various kinds and the individual sales are not nearly so numerous as is popularly believed. By this means we estimate added revenues of \$12,500,000.

Second-class mail consists entirely of publications, newspapers, and periodicals, and the loss on it is placed at \$74,712,000. Notwithstanding this, the recommendation for increases on second class calls for \$19,876,000. One million of this is expected to be derived from newspapers mailed by individuals and not by the publishers.

In holding the increase on this class within the limits named the department has been governed by numerous considerations. It has been the traditional policy of the Government to give publications the benefit of low rates, recognizing them as distributors of general information. It always has and still does recognize the desire of the public for daily news and current information and reading matter. The increases proposed will apply to the advertising pages of both newspapers and magazines, with a slight increase on the reading portion of magazines.

About \$4,000,000 is estimated from registered letters and about \$3,500,000 from money orders, on which under present rates there are very substantial losses. These features are more or less in the nature of banking transactions and may be fairly so regarded, but the rates fixed can not be so large as to make them greater than those charged by the banks and express companies for a similar service, and it is believed that the sums are as large as can be justified.

On insurance and collect-on-delivery services increases of \$3,058,000 and \$1,103,000, respectively, are estimated for.

The total increases provided by the rates in this bill are estimated to yield \$96,390,750.87 and will approximately cover the \$68,000,000 estimated as the cost of the bill S. 1898, providing the increased schedules for the pay of employees.

The department will be glad through the Postmaster General, and still better through the experts of the department, to give to your committee any further information desired.

Very truly yours,

HARRY S. NEW,
Postmaster General.

POSTAL RATES ON SECOND-CLASS MATTER

Mr. SMOOT. I have been asked to have printed in the RECORD several articles on the matter of second-class postal rates. I make that request.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The articles are as follows:

(From the Editor and Publisher, New York, December 6, 1924)

HOT SENATE FIGHT TO FOLLOW POSTAL REPORT CREDITING BIG DEFICIT TO SECOND CLASS—BRUNT OF HEAVY LOSSES CHARGED TO NEWSPAPERS AND MAGAZINES—ALLOCATION OF COSTS QUESTIONED—REPORT CARRIES NO RECOMMENDATION AND IS OPEN TO INVESTIGATION IN COMMITTEE MEETING—GENERAL NEW DEFENDS ACCURACY OF REPORT

(By J. Bart Campbell)

Postmaster General Harry S. New sent to Congress this week a report on the cost of handling the several classes of mail which, in so far as it concerned second-class matter, amazed newspaper and magazine publishers, and is said, according to close observers, to have created the biggest rumpus that the Post Office Department has witnessed in years.

The first important fact in the report is that the department lost nearly \$40,000,000 in 1923, its revenues totaling \$534,413,171.78, against expenditures of \$574,218,873.96.

Second-class mail, according to the report, paid into the Government \$31,214,425.47 and cost \$103,927,294.14, the startling alleged deficit being \$74,712,868.67.

Parcel post returned revenues, according to the report, of \$120,649,662.42, and this class of Postal Service is represented as having cost the department \$127,556,416.24, a loss of only \$6,916,753.82.

The remarkable alleged deficit charged to second-class mail is the bone of contention.

How were those figures arrived at? What items of postal expense were charged against second-class matter, what against parcel post and other divisions?

It is known that the matter was carried to the White House, that the Postmaster General stood firmly behind the postal officials who made up the figures, and that he insisted upon sending the report to Congress, although the allocations of cost were being hotly disputed.

There is a persistent report in Washington that General New and President Coolidge are not in agreement on the report as it was submitted to Congress. It is carefully pointed out at the White House that the report is not an administration document but a congressional report made as a result of a Senate resolution. As Editor and Publisher indicated last week, the responsibility for acting on the report or making any recommendation with it as a basis will rest with the Senate.

General New by no means indicates that there is any division of view among administration officials as to the proper allocation of postal charges in the report.

That a fight will be made in the Senate there is not the slightest doubt. Hearings before the Senate Post Office Committee are expected to air the whole matter of whether the charges made against second-class matter, showing it to lose the Government \$74,712,868.67 in a single year, were properly ascertained, or whether other classes of mail matter, particularly parcel post, were favored in their showing by arbitrary allocation of cost charges.

General New and his subordinate officials are expected to stand firmly for their report, aided by two firms of certified public accountants who were called in to check the report and approve it.

Postmaster General New's report shows daily and weekly newspapers are charged \$68,301,054.55, or 64.48 per cent of the total expenditures for second class. Daily newspapers are assigned 43.69 per cent of the total expense, as the cost of handling this class of mail was estimated at \$46,273,540.09. The weekly newspapers are charged with \$22,027,514.46, or 20.79 per cent of the total cost of second-class matter.

The report asserts publications listed as scientific, agricultural, religious, fraternal, or trade journals cost the Government \$20,464,473.59, or 19.49 per cent of the total second-class expenditures. The so-called popular magazines are included under a heading "all other publications," and the department states these periodicals are charged with \$13,449,813.96, or 12.70 per cent of the total cost of second-class mailings.

Another subclass of second-class publications, known in the report as "transient," are assigned \$3,611,706.19, or 3.41 per cent of the total second-class costs. "Transient" is a term assigned to publications not made up at the offices of publishers, but which are given to the Post Office Department for delivery.

The Postmaster General states the deficit on fourth class, or parcel post, amounts to \$6,916,753.82. Some time ago the then Postmaster General, Hubert Work, sent a communication to the Interstate Commerce Commission stating parcel post had grown from 4 per cent in 1911 to approximately 65 per cent of the total volume of the mails.

The report assigns second-class matter \$34,375,097.11 as its share of rural delivery charges. The daily newspapers are charged \$18,019,508.42 and the weekly newspapers \$10,904,179.69. Scientific, religious, trade journals, etc., cost the Government \$3,658,472.49 in the rural mails, and the "transient" papers \$215,969.89. "All other publications" \$1,576,965.62, according to the report.

The daily newspapers are assessed \$8,425,454.93 out of a total of \$9,823,048.17 chargeable to second class under the item "Railway Post Office."

Mr. Joseph Stewart, who signed the report as executive assistant to the Postmaster General, states: "This amount is apportioned to the subclasses of second class on ratios of volumes of the respective subclasses of second class distributed during the statistical period in railway post office space."

In the general post-office overhead the daily newspapers are charged \$9,447,754.49 out of a total of \$34,252,175.33. The weekly newspapers are assessed \$8,455,954.04; scientific, agricultural, trade, etc., publications, \$9,862,502.89; "all other publications," \$4,383,060.05; "transient" publications, \$2,102,902.92.

An analysis of the expenditures under "transportation" shows the daily newspapers are charged \$14,182,699.21 out of a total of \$27,621,743.59. The weekly newspapers are assessed \$1,731,145.34; scientific, agricultural, trade, etc., publications, \$4,694,606.28; "transient" publications, \$941,319.51; "all other publications," \$5,471,973.25.

There is considerable speculation as to when or how Congress may act on the report which has apparently become inextricably interlocked with the most question of when or how postal employees are to get the promised fattening of their pay envelopes.

The Washington Times this week set forth clearly the prevailing situation when it stated:

"An attempt will be made in the Senate to override the presidential veto of the postal wage bill granting salary increases amount-

ing to \$68,000,000 to 800,000 postal workers throughout the United States. Approximately 4,000 Washington men and women who work at the City Post Office and at the Post Office Department are anxiously following this measure, the passage of which would be an acceptable Christmas gift, inasmuch as the increases average \$240 a year."

Senator WALTER EDGE, of New Jersey, chairman of the Joint House and Senate Post Office Committees which drafted the salary bill, made it plain that he will try to starve off immediate overriding of the President's veto, but also made it plain he will favor overriding of the veto rather than see the measure lost.

"I had several talks with President Coolidge regarding the postal pay bill."

Chairman EDGE said—

"I know he vetoed it because it did not raise revenue to provide for the increases. I am hopeful that he will be amicable to the overriding of the veto. However, through the introduction of a separate bill which will increase postal rates to the extent of \$43,000,000 per annum, this is within \$20,000,000 of the amount necessary to pay the increased salaries.

"I do not agree with the plan to incorporate revenue-producing provisions in the increased salary bill. We have never coupled these two items before, and I think that all salaries should be absorbed in the same manner as in the past.

"Why destroy the vetoed postal increased wage bill, after it has gone nine-tenths of the way, by inserting some revenue-producing clauses which may not be accepted?"

Chairman EDGE said that he is hopeful that the Senate leaders will agree not to act on the veto until after the cost ascertainment report has been forwarded to Congress by the Postmaster General. "With the cost ascertainment report in hand," Senator EDGE said, "we will be able to draft a separate revenue producing bill and put it through immediately following the enactment of the one now before the Senate."

In short, it is the intention of Chairman EDGE to secure the early enactment of the postal wage increase bill in a manner which will not embarrass President Coolidge. He feels that if the separate revenue producing bill is introduced before the veto is overridden, that the President will let it be known that he is now reconciled to the measure which he vetoed in the dying days of the last session.

The increased wage bill for postal workers probably has had more unified support both in the House and Senate than any other bill of its kind ever before introduced. When joint hearings were held on the wage bill between 300 and 400 Senators and Congressmen personally appeared before the committee at the behest of their constituents and unqualifiedly let it be known that it had their hearty support.

Postmaster General New's report has been ordered printed by the Senate, which means at least two weeks in the Government Printing Office, and no action by the Senate can come until after the Christmas holiday.

This is the first cost ascertainment report made to Congress in a decade and is the one to which President Coolidge referred in his veto of the postal salary bill on June 7 last.

The postal salary bill which the President vetoed would add approximately \$68,000,000 to the annual expenditures of the Government.

The last official ascertainment of the cost of carrying and handling the mails was made by the Post Office Department in 1909 and was carried forward by the Hughes Commission in 1911. Much of the data obtained for that ascertainment was from the special weighings of the mails of 1907 authorized by Congress. Since the findings of the Hughes Commission extensions of estimates have been made by the department from time to time, but have become unsatisfactory because of radical changes in the condition of the service, both with reference to increased expenditures and increases in the weight and volume of the mails as a whole, and of particular classes, which have radically affected their relations to each other.

Postmaster General New points out that the report is merely a fact finding statement. It does not make any recommendations whatever with respect to postage rates. That matter is left in the hands of Congress.

SUMMARY OF REMARKABLE FINDINGS IN POSTAL REPORT

The following table shows in detail the revenues and expenditures of the Post Office Department in each branch of the service in 1923, according to a report of Postmaster General New now before Congress:

Classes	Revenues	Expenditures	Gain or Loss
Paid first class.....	\$271,894,051.49	\$191,476,335.17	Gain
Postal savings.....	5,409,504.00	708,092.95	4,701,411.05
Total gain.....			85,119,127.37
Second class.....	31,214,425.47	105,927,294.14	Loss
Third class.....	43,844,940.77	60,136,516.25	16,291,575.48

Classes	Revenues	Expenditures	Gain or Loss
Fourth class.....	\$120,649,662.42	\$127,566,416.24	Loss
Franked matter.....		357,819.45	\$6,916,733.82
Penalty matter.....		6,214,131.44	357,819.47
Free for blind.....		27,315.29	6,214,131.44
Foreign.....	12,871,746.39	17,591,003.59	27,315.29
Receipts foreign mail transit.....	115,419.03		4,603,838.17
Money order.....	11,601,425.82	21,141,936.99	9,540,511.17
Registry.....	8,005,579.20	18,379,593.01	10,374,013.81
Special delivery.....	8,175,648.33	8,237,645.67	121,997.34
Insurance.....	7,185,771.14	8,331,730.60	1,145,959.46
Collect on delivery.....	4,079,143.35	5,904,580.74	1,825,437.39
Treasury savings.....		221,806.28	221,806.28
Total.....	525,047,317.41	572,282,220.81

Members of the postal committee of the American Newspaper Publishers' Association plan to hold a special meeting with Postmaster General New in Washington, D. C., December 9, Editor and Publisher learned this week. It is understood the postal cost report which has just been lodged with the Senate will be discussed.

L. B. Palmer, A. N. P. A. manager, declined to discuss the proposed meeting and refused to either affirm or deny that it was to be held.

J. D. Barnum, Syracuse Post-Standard, is postal committee chairman, and A. G. Newmyer, New Orleans Item, vice chairman.

[Editorial from the Editor and Publisher for December 13, 1924]

THE POSTAL CASE

The United States Post Office does not pay its way and there is no valid reason why it should. That is the key fact in the postal situation as revealed by the voluminous cost ascertainment report which the Postmaster General last week submitted to Congress, indicating a loss of \$40,000,000 for 1923.

Since the advent of Burleson the public mind has been confused and official Washington has been astray on the fundamental principles of post-office operation. The fact that it is a public accommodation, a business and social convenience, a public communications service, has been lost sight of in a vain pursuit of a totally false ideal.

Make the post office break even or pay a profit!

That standard has been set up to supplant the ancient, fundamental principle of public accommodation and good service at any reasonable cost. Confusion is the harvest.

The post office is not a commercial institution, created to make profit or necessarily pay its way. No business man would accept it as a safe private venture if he were compelled to conserve the social and business obligations which the public has for more than a century been encouraged to impose upon this branch of Government service. It would be a wild speculation. No private individual or corporation could do for the people, through postal service, what the Government may do and very well do. The year that the post office earns the least operating "profit" may very well be the most profitable year of its career, from the general viewpoint of public welfare. Corporations deal in the concrete elements of cost, revenue, and profit. Uncle Sam deals in elements of service, both direct and indirect, and regardless of expense when the cause is worthy.

Hence, all of the talk we have been hearing, and sometimes cheering, during the past 10 years of "great statesmanship," because in this or that political régime the post office was made to pay a "profit" on operations, has been absurd. It has dropped the curtain on the highest ideals of Government service. Whether the post office lost \$40,000,000 in last year's operations is of no more importance to the public than whether the Agricultural Department "lost" on every package of seed it handled, or cultured soil it examined, or hog remedies it experimented with. Did the Army show an operating profit? Did the Department of Justice close its books at the end of the year with a profit?

For 30 years, until 1911, the gross expenses of the post office exceeded revenues, and we were not in despair. Then politicians began to tell us that the post office was "just a great big business," which might be made to shower golden gains every year if operated by a simon-pure business man. When Burleson of Texas, whooped up this idea and finally made a "profit" of \$61,000,000 in 1918, he was acclaimed a business giant, in some quarters, but we know that he almost wrecked the machine.

In 1921 postal receipts were \$163,000,000 less than postal revenues. In 1922 the operating deficit was \$61,000,000. But the question on the lips of the public was not concerning these "losses," but con-

cerned inadequate, confused mail service. However, and it is queer, the theory persists that a postmaster is efficient according to his "profit" showing.

Postmaster General New tells us now that \$40,000,000 was "lost" last year and shows that second-class mail was largely responsible. There is a great ado about it. Congress is to consider the question of recommending increased rates. Something must be done. It appears, to make the business idea of the post office work out. Yet, there is no public demand for a superbusiness "success" of the post office.

According to the cost ascertainment figures second-class mail is costing more than three times the revenue paid in. The logic of "business" therefore calls for tripled rates.

The question of increased wages for postal employees is dragged in by the heels. It is supposed to be a trading point between the Postmaster General and the publishers. "How can we pay the employees living wages if we lose money on second-class mail?" The answer is: According to your figures, if you triple second-class rates you are still only "breaking even." If you add \$70,000,000 in wage increases to your operating deficit and expect the users of second-class privileges to yield their percentage you will multiply present rates seven or eight times.

But the big question is, Would there be any real equalization of the matter if you were to pass off to the public, in the form of increased cost of printed matter, your "problem" of deficit in postal operations?

Who paid the \$40,000,000 postal deficit in 1923?

The public, in the form of taxes.

Who paid the postal deficit of \$163,000,000 in 1921?

The public, in the form of taxes.

Did anyone hear of any complaint about it?

No; but we think we do remember some talk about incompetent service, and a zone system which had as an evil effect the segregation of public thought according to localities.

Many of the heaviest and largest circulating magazines are using express and railroad service, and multiple mailing points, to escape present rates and the abominable zone system. Those whose circulations warrant it have this way out. If postal rates are made excessive. Small publications, which can not sustain express delivery, will be the ones to pay. That fact may not be important because of any economic reason, but we believe that it hits at the very heart of this question. A post office, conducted as a business, would let the little minority expressions of public opinion perish. A great Government, recognizing the truth that it is minority opinion which is the very essence of the life of our form of government, would foster and encourage the small publication on terms equal to the great.

There are many valid elements to be considered. But the premise must be: The post office is a public institution, not for "profit" but for service.

[From the Editor and Publisher for December 13, 1924]

ONE HUNDRED AND FIFTY PER CENT RISE IN SECOND-CLASS RATES SEEN—ALL PUBLISHING INTERESTS "LINING UP FOR A FIGHT" AS NEW PROPOSES TO PLACE ADDED BURDEN ON NEWSPAPERS AND MAGAZINES IN BILL NOW BEING DRAFTED—CLAIM POSTAL REPORT "FILLED WITH ABSURDITIES"

(By J. Bart Campbell)

(By telegraph, to Editor and Publisher)

WASHINGTON, D. C., December 11.—Second-class postal rates would be increased between 100 and 150 per cent in the first and second zones, and in the other zones proportionately, to help meet the contemplated \$68,000,000 wage boost of postal employees, by a bill being drafted Thursday at the Post Office Department at the request of United States Senator THOMAS STERLING, chairman of the Senate Post Offices and Post Roads Committee.

One spokesman for the American Newspaper Publishers Association is authority for the statement the proposed legislation would involve an increase of "more than 75 per cent" in second-class rates.

The most direct estimate that could be obtained, however, placed the threatened increase at "about 100 per cent."

Postmaster General Harry S. New was understood to have singled out second-class rates for such a purpose on the basis of the Post Office Department's report on the ascertainment of mail costs which staggered newspaper and magazine publishers by its glaring exaggerations and inconsistencies when it was sent to the Senate last week.

It was reported authoritatively Mr. New figured the handling of second-class mail as shown by the report to represent a deficit of about 250 per cent. Conceding if an attempt were made to increase second-class rates to meet completely such an alleged deficit many newspapers and magazines would not only be driven out of the mails, but some of them would face actual bankruptcy. Mr. New is said to have decided on the supposed 250 per cent being cut in about half to arrange for an approximate increase which, in his judgment, would help overcome

partly the reported deficit and add considerably to the pay of postal employees at the expense of newspaper and magazine publishers.

Mr. New's latest proposal in particular and the report on the ascertainment of mail costs in general have apparently created a strong new alignment of the newspaper and magazine publishing interests which promises a solidarity in their front lines not existing before the whole situation was described by Editor and Publisher last week.

The Postmaster General received Wednesday at the Post Office Department leading representatives of the American Newspaper Publishers' Association and kindred organizations who included: A. L. Miller, Battle Creek, (Mich.) Enquirer-News, representing the Inland Daily Press Association; Charles E. Jenkins, Farm Journal, Philadelphia, representing the Agricultural Publishers' Association; V. S. Hayden, executive secretary of the latter; Cranston Williams, of the Southern Newspaper Publishers' Association; Howard Davis, New York Herald-Tribune; Urey Woodson, Owensboro (Ky.) Messenger; Jerome D. Barnum, Syracuse (N. Y.) Post-Standard.

The entire situation was threshed out thoroughly with Mr. New, who is understood to have admitted the bill he was having drafted to provide the long agitated wage increase for postal employees was certain to meet with stiff opposition, but who insisted newspaper publishers in particular had invited just such a situation by advocating the proposed wage boost in their news and editorial columns before revenue for the purpose was in sight.

After their conference with the Postmaster General the representatives of the newspaper publishing interests foregathered in the office of Elisha Hanson, Washington spokesman for the American Newspaper Publishers' Association, for a protracted meeting. On Thursday Mr. Hanson announced the interests he represented were "lining up for a fight," and made it plain Mr. New had been so informed.

Mr. Hanson explained further that representatives of his interests had completed a preliminary examination of some of the so-called schedules accompanying the report on the ascertainment of mail costs and had discovered a "number of absurdities which convinced them the report was not a true representation of actual conditions."

Mr. Hanson, who as secretary to United States Senator MARSHALL MCCORMICK, of Illinois, became versed thoroughly in post-office appropriations and similar matters, declared the representatives of the newspaper publishing interests were agreed second-class rates had already been stretched to a point "beyond saturation," and the Post Office Department's report evidently "shed no real or accurate light upon postal conditions."

Mr. Hanson also stated the examination of the report was still under way, and in a few days the interests he spoke for would probably make a more extended explanation of their position. He indicated clearly, however, enough had been learned from the report already to justify the opinion the report was by no means what the Post Office Department had reported it to be.

As foreshadowed previously by Editor and Publisher, the proposed postal wage increase legislation has become inextricably interwoven with the mail-costs report, and the two will unquestionably become the center of one of the hottest legislative battles Congress has witnessed in years.

It was further pointed out while the new postal wage increase measure Mr. New is having drafted will probably embrace all classes of mail, including parcel post, second-class rates will be by far hardest hit if such legislation is to be enacted.

Representatives of the American publishers' conference have already gone on record as being opposed to the mail-costs report as largely "pure bunk" and, with the American Newspaper Publishers' Association and kindred organizations now in the front-line trenches, some hot-shot is sure to be poured into both the proposed Sterling-New bill and the mail-costs report upon which it is being based, once the entire subject is gone into thoroughly before the Senate Post Offices and Post Roads Committee, to which it will undoubtedly be referred.

A peculiar phase of the situation is that President Coolidge has not yet indicated approval of either the report or the proposed bill that is expected to emerge from it. Apparently the whole matter is to be threshed out between Congress and the Post Office Department in compliance with White House intimations that the President does not desire to interfere in what may be regarded now as a congressional situation.

It is known the President is desirous of having a postal pay increase bill worked out on a "scientific basis," so there will be no necessity for Congress to override his veto of the still-pending Edge bill.

It was learned in the judgment of administration leaders of the Senate and House the President will probably have his wish, although the danger point has not by any means yet been passed.

In the meantime the obvious effort of certain Members of the Senate and House to justify the proposed legislation, and the palpable move of the Post Office Department to bolster up its mail-costs report, at the expense of the newspaper and magazine interests principally, can no longer be camouflaged.

POSTAL CRISIS DEMANDS PUBLISHERS ACT NOW—S. E. THOMASON,
AMERICAN NEWSPAPER PUBLISHERS' ASSOCIATION CHIEF

Enactment of the legislative program will drive newspaper country circulation out of the mails, S. E. Thomason, president of the American Newspaper Publishers' Association, warned his colleagues in a statement given to Editor and Publisher before his return to Chicago Thursday. Immediate action by publishers to change the intentions of Congress is imperative, Mr. Thomason indicated in his message, which follows:

The postal committee of the American Newspaper Publishers' Association, together with officers and directors of the association and representatives of the Southern and Inland Daily Press Associations, met with Postmaster General New in Washington December 10. In a frank statement the Postmaster General informed them of the fact that American newspapers are threatened with a legislative program at the present short session of Congress which, if carried through, will prove to be one of the most serious blows ever dealt by Congress to the distribution of newspapers outside of the metropolitan centers.

The cost finding report, which the joint congressional committee and the Post Office Department have been working on for three years, was filed with Congress last week. According to this report, 75 per cent of the annual loss of the Post Office Department is attributable to second-class mails.

The publishers Wednesday pointed out that the most casual study of the report disclosed serious errors in the allocation of expenses against second-class mails, and they took direct issue with the conclusions reached, but Mr. New replied that the report, in the opinion of the Post Office Department, was correct, and that it would necessarily be made the basis for increased mail rates in all classes of mail on the assumption that the postal salary increases might be carried over the President's veto by the present Congress. Mr. New outlined to the American Newspaper Publishers' Association committee that increases of almost 100 per cent in the first four zones would be necessary to provide the revenues for higher wages.

It appears certain that a bill will shortly be introduced in Congress for increased zone rates along the lines of the Postmaster General's recommendations.

These increases, if made law, will be ruinous to the country circulations of all newspapers now distributed by mail. If these rates become effective, newspapers are confronted with the practical necessity of a complete revision of delivery methods in the country. It means a practical withdrawal of newspapers from the mails, having in mind that newspapers have almost no circulation outside the fourth zone, and that publishers using the mails outside of the fourth zone will have to bear practically no increased rates.

The situation appears to be intolerable. The American Newspaper Publishers' Association is analyzing the cost finding report, and its fallacies will be made apparent to Congress, but unless daily and weekly newspapers, large and small, are immediately made alive to the dangers of the present situation we are all faced with the necessity of devising a new method of distribution to country readers. We will not be able to afford the mails.

PENSIONS AND INCREASE OF PENSIONS—CONFERENCE REPORT

Mr. BURSUM. Mr. President, I submit a conference report on the disagreeing votes of the two Houses on the amendments of the Senate to House bill 6941. The report is in order at this time under Rule XXVII, and I move that the Senate proceed to its immediate consideration.

The motion was agreed to, and the Senate proceeded to consider the conference report, which was read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6941) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent children of soldiers and sailors of said war, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 79 and 100.

That the House recede from its disagreement to the amendments of the Senate numbered 1 to 78, inclusive, and 80 to 99, inclusive, and agree to the same.

H. O. BURSUM,
DAVID I. WALSH,
BERT M. FERNALD,

Managers on the part of the Senate.

CHAS. E. FULLER,
RICHARD N. ELLIOTT,
SAMUEL E. COOK,

Managers on the part of the House.

Mr. HARRISON. Mr. President, will the Senator from New Mexico state what is the conference report?

Mr. BURSUM. The conference report is on a pension bill which passed both Houses of Congress. It was not acted upon during the last session on account of the filibuster which occurred in this Chamber. The report is one which is unanimously agreed to by the conferees on the part of both Houses. This is the first opportunity I have had to submit it.

Mr. DIAL. Mr. President, this is a bill which passed at the last session and went to conference, and the conference report was not then agreed to on account of congestion of business at the end of the last session. To my mind, the time has come when this kind of bill ought not to be permitted to pass. It is called, I believe, the omnibus pension bill. The law as it exists takes care of all people who are properly entitled to a pension, and we should content ourselves with following the general law. The custom has grown up in Congress of allowing bills to come in every year for increased pensions and to put people on the roll who are not entitled under the general law to draw pensions. It occurs to me at this long distance after the Civil War that everybody who was entitled to a pension has been placed on the regular roll long since.

Instead of coming here and increasing pensions we should endeavor to decrease the pensions. We have had another war, and there are other people who have to be taken care of. I very much fear, indeed, I believe, that many names appear upon the pension roll who are in no wise entitled to a pension. The Congress has resolved itself into a sympathetic society. We have people all the time looking over the country who were on the other side in the Civil War, bringing some alleged needy case here to submit to a sympathetic committee simply because that person's ancestor's name was on the Civil War roll. It is not right. It is not moral. It tends to make Bolsheviks out of the people of our country.

Under the law as it now stands every person whose name was on the northern roll for 90 days, irrespective of the condition of his health and irrespective of his means, draws a pension whether they were in danger or not in danger. They each draw a pension of \$50 a month. During the last session of Congress a bill passed the Senate and the House giving those people \$72 a month. The President of the United States saw proper to veto the bill, and I am glad to say we sustained the veto. Now, in order to get around the principles of that veto we are asked here to pass an omnibus pension bill. Everyone perhaps has some one's name there who gets a benefit, but it is not right to legislate in that way merely because we are interested in some individual.

The bill even gives a pension to the children of some man whose name was on the Civil War roll for a certain length of time, not necessarily 90 days, but who was able to connect back in some way with the Civil War. The neighbor of that person may be in desperately distressed circumstances and drawing no pension, and when he sees this person handed out a generous allowance by the Government he becomes dissatisfied with the law of our country. The practice ought to be stopped. I fear that Senators do not consider these matters as carefully as they should. It seems that they all get stage fright when the word "pension" is mentioned. If I had my way the bill would not pass. I hope the President of the United States will veto it and put us to thinking and let the country realize how we dish out the money here to favorites. The time has come when it ought to stop. There is no excuse for it. Year before last we paid out \$263,000,000 in pensions, the largest sum that has been paid out since the Civil War, and now with all the expenses of the recent World War on us with the bonuses and other expenses we should attempt to reduce instead of increasing Civil War pensions.

I reiterate that this kind of legislation ought to be stopped. It ought not to be continued. Senators ought to unite in killing any such bill as this. I know it is almost hopeless to attempt to say anything or to get the attention of anybody, but I hope the taxpayers of the country will realize the great injustice that is being perpetrated upon them through these various pension bills. This is an excuse or merely a means to evade the general law, which is very liberal toward disabled Civil War veterans, and that is as far as the bounty of the Government ought to go. I hope, Mr. President, the Senate will even now at this late hour reject the conference report and kill the bill.

Mr. BURSUM. I ask that the conference report be agreed to. The PRESIDENT pro tempore. The question is upon agreeing to the conference report.

The report was agreed to.

PETITIONS AND MEMORIALS

Mr. FERRIS presented a petition of sundry veterans of the Spanish-American War and of wives and widows of veterans of that war, all of Grand Rapids, Mich., praying for the passage of House bill 5934, the so-called Knutson bill, providing increased pensions for veterans of the Spanish war and their dependents, etc., which was referred to the Committee on Pensions.

He also presented memorials of sundry citizens of Big Rapids, Muskegon, Grant, Hillman, Long Lake, Hale, Omer, Twining, Flint, Turner, Standish, Stanwood, and Mecosta, all in the State of Michigan, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. COPELAND presented the memorial of C. S. Longacre, general international secretary of the Religious Liberty Association, of Takoma Park, D. C., and 101 other citizens of Brooklyn and Long Island, N. Y., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. DILL presented a memorial (numerously signed) of sundry citizens of Touchet, Spokane, Rockford, Penawawa, Ellensburg, Thorp, Cle Elum, Camas, and Vancouver, all in the State of Washington, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. BROOKHART presented the memorials of Harry W. Long and sundry other citizens of Davenport; of Linda Nelson and sundry other citizens of Ruthven; of J. A. Webster and sundry other citizens of Woodburn; of W. M. Robinson and sundry other citizens of Council Bluffs; and of William Philpott and sundry other citizens of Albia, all in the State of Iowa, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. SPENCER presented a memorial (numerously signed) by sundry citizens of Carthage, Mo., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. WILLIS presented the memorial of Rev. V. A. Joseph and 31 other citizens of Dayton, Ohio, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented the memorial of W. H. Cowdery, of Cleveland, Ohio, remonstrating against the passage of the so-called Hay-Quesada treaty, proposing to cede the Isle of Pines to Cuba, which was referred to the Committee on Foreign Relations.

REPORTS OF COMMITTEES

Mr. PEPPER, from the Committee on the Library, to which was referred the joint resolution (H. J. Res. 257) providing for the procurement of a design for the use of grounds in the vicinity of the Mall by the United States Botanic Garden, reported it without amendment.

Mr. LADD, from the Committee on Commerce, to which was referred the bill (S. 3428) authorizing the construction of a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky., reported it without amendment and submitted a report (No. 812) thereon.

He also, from the same committee, to which was referred the bill (S. 3545) granting the consent of Congress to the Huntington & Ohio Bridge Co. to construct, maintain, and operate a highway and street-railway toll bridge across the Ohio River, between the city of Huntington, W. Va., and a point opposite in the State of Ohio, reported it with amendments and submitted a report (No. 813) thereon.

REPORTS FROM THE COMMITTEE ON CONTINGENT EXPENSES

Mr. KEYES. Mr. President, from the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably three resolutions. I feel that there will be no opposition to them, and I therefore ask unanimous consent for their immediate consideration.

The PRESIDENT pro tempore. The resolution will be received and read in order.

MAY RONSAVILLE

Mr. KEYES, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 280, submitted by Mr. SHORTBRIDGE on the 8th instant, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay out of the contingent fund of the Senate to May Ronsaville, daughter of Robert H. Maguire, late an employee of the Senate, under the Sergeant at Arms, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

HEARINGS BEFORE COMMITTEE ON THE LIBRARY

Mr. KEYES, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 281, submitted by Mr. PEPPER on the 8th instant, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on the Library or any subcommittee thereof is hereby authorized during the Sixty-eighth Congress to send for persons, books, and papers, to administer oaths, and to employ a stenographer, at a cost not exceeding 25 cents per 100 words, to report such hearings as may be had in connection with any subject which may be before said committee, the expense thereof to be paid out of the contingent fund of the Senate; and that the committee or any subcommittee thereof may sit during the sessions or recesses of the Senate.

GEORGEANNA GETCHELL

Mr. KEYES, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate Resolution 282, submitted by Mr. WALSH of Massachusetts on the 9th instant, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay out of the contingent fund of the Senate to Georgeanna Getchell, widow of Edwin P. Getchell, late a messenger in the employ of the Senate, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

TERMS OF DISTRICT COURT IN SOUTH CAROLINA

Mr. OVERMAN. From the Committee on the Judiciary I report back favorably without amendment the bill (S. 3509) to change the time for the holding of terms of court in the eastern district of South Carolina. I call the attention of the Senator from South Carolina [Mr. DIAL] to the bill.

Mr. DIAL. Mr. President, I ask unanimous consent for the present consideration of the bill just reported by the Senator from North Carolina from the Committee on the Judiciary. It merely proposes to change the time for holding court in the eastern district of South Carolina. It is a local matter, and I think there can be no objection to it.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That section 5 of an act entitled "An act to amend an act entitled 'An act to amend an act entitled 'An act to provide for the appointment of a district judge, district attorney, and marshal for the western district of South Carolina, and for other purposes,' approved September 1, 1910, so as to provide for the terms of the district court to be held at Spartanburg, S. C.," approved March 4, 1923, be, and the same is hereby, amended by changing the times for the terms of the District Court for the Eastern District of South Carolina, so as to read as follows:

"SEC. 5. That the terms of the District Court for the Eastern District of South Carolina shall be held at Charleston on the second Monday in October, the third Monday in January, and the fourth Monday in May; at Columbia on the first Monday in November and the third Monday in March; at Florence on the first Monday in December and the fourth Monday in April; and at Aiken on the fourth Monday in September and the third Monday in February.

"Terms of the district court of the western district shall be held at Greenville on the first Tuesday in April and the first Tuesday in October; at Rock Hill, the second Tuesday in March and September; at Greenwood, the first Tuesday in February and November; at Anderson, the fourth Tuesday in May and November; and at Spartanburg, on the third Tuesday in February and second Tuesday in December.

"The office of the clerk of the district court for the western district shall be at Greenville, and the office of the clerk of the district court for the eastern district shall be at Charleston.

"This act shall take effect on the 1st day of July next ensuing its passage."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXTENSION OF TERM OF THE FOREIGN DEBT COMMISSION

Mr. SMOOT. From the Committee on Finance I report favorably without amendment the bill (S. 3493) to amend an act entitled "An act to create a commission authorized under certain conditions to refund or convert obligations of foreign governments held by the United States of America, and for other purposes," approved February 9, 1922, as amended February 28, 1923, and I ask unanimous consent for the present consideration of the bill.

Mr. OVERMAN. Will the Senator from Utah kindly state the object of the bill?

Mr. SMOOT. I will say to the Senator that the bill proposes to extend for two years the life of the World War Foreign Debt Commission, which was constituted February 9, 1922.

Mr. OVERMAN. I have no objection to that.

Mr. BORAH. Does the Senator from Utah ask unanimous consent for the immediate consideration of the bill?

Mr. SMOOT. I do. It merely proposes to extend the life of the commission for two years.

Mr. BORAH. Would the Senator from Utah object to letting the bill go over for a day?

Mr. SMOOT. No.

Mr. BORAH. I ask that the bill may go over.

The PRESIDENT pro tempore. The bill will go over.

Mr. BORAH subsequently said. Mr. President, the Senator from Utah [Mr. Smoot] a few moments ago asked that the bill reported by him from the Finance Committee proposing to extend the life of the Foreign Debt Funding Commission be considered. I then objected. I merely wanted to ask a question of the Senator from Utah, and, perhaps, if he may answer at the present time, there will be no objection to the consideration of the bill. I should like to know if there is any definite proposition before the commission upon the part of France with reference to the settlement of the French debt?

Mr. SMOOT. I will gladly answer the Senator's question. There is no definite proposition from France in regard to the settlement of her debt to the United States.

Mr. BORAH. Has there ever been?

Mr. SMOOT. There has never been, Mr. President.

Now, Mr. President, if there is no objection to the consideration of the bill, I ask unanimous consent that it may be considered and acted upon at this time.

The PRESIDENT pro tempore. The Senator from Idaho withdraws his objection to the request of the Senator from Utah for unanimous consent for the present consideration of the bill. Is there objection to its present consideration?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3493) to amend an act entitled "An act to create a commission authorized under certain conditions to refund or convert obligations of foreign governments held by the United States of America, and for other purposes," approved February 9, 1922, as amended February 28, 1923, which was read, as follows:

Be it enacted, etc., That the act of February 9, 1922, as amended, creating and establishing the World War Foreign Debt Commission, be, and hereby is, further amended so that section 4 of said act of February 9, 1922, shall read as follows:

"SEC. 4. That the authority granted by this act shall cease and determine at the end of two years from February 9, 1925."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REGENTS OF THE SMITHSONIAN INSTITUTION

Mr. SMOOT. From the Committee on Finance I report favorably without amendment the joint resolution (S. J. Res. 155) providing for the filling of a proximate vacancy in the Board of Regents of the Smithsonian Institution of the class other than Members of Congress. I ask unanimous consent for the present consideration of the joint resolution. It merely provides for the reappointment of Judge Gray, of Delaware, as a member of the Board of Regents.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved, etc., That the vacancy in the Board of Regents of the Smithsonian Institution of the class other than Members of Congress, which will occur on February 25, 1925, by reason of the expiration of the term of George Gray, of Delaware, be filled by the reappointment of said George Gray for the ensuing term.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SMOOT. From the Committee on Finance I report favorably without amendment the joint resolution (S. J. Res. 154) providing for the filling of a proximate vacancy in the Board of Regents of the Smithsonian Institution of the class other than Members of Congress. I ask unanimous consent for the present consideration of the joint resolution, which provides for the reappointment of Mr. Robert S. Brookings, of Missouri, as a member of the Board of Regents of the Smithsonian Institution.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved, etc., That the vacancy in the Board of Regents of the Smithsonian Institution of the class other than Members of Congress, which will occur on January 6, 1925, by reason of the expiration of the term of Robert S. Brookings, of Missouri, be filled by the reappointment of said Robert S. Brookings for the ensuing term.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time and passed.

READJUSTMENT OF POSTAL SALARIES AND RATES

Mr. STERLING introduced a bill (S. 3674) reclassifying salaries of postmasters and employees of the postal service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, and for other purposes, which was read the first time by its title.

Mr. ASHURST. Mr. President, with reference to the bill just introduced I make a point of order.

The PRESIDENT pro tempore. The Senator from Arizona will state his point of order.

Mr. ASHURST. The Senator from South Dakota [Mr. STERLING] has just introduced a bill. I object to its second reading at this time, and, therefore, it can not be referred to a committee to-day. At the appropriate time I will explain why I object, but I can not do so now under the rule.

The PRESIDENT pro tempore. The position of the Senator from Arizona is correct. The bill has been read merely the first time.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CARAWAY:

A bill (S. 3670) granting a pension to Isaac Pierce (with accompanying papers); to the Committee on Pensions.

By Mr. BROOKHART:

A bill (S. 3671) granting an increase of pension to Charles J. Smith (with accompanying papers); to the Committee on Pensions.

By Mr. HARRELD:

A bill (S. 3672) to provide for exchanges of Government and privately owned lands in the additions to the Navajo Indian Reservation, Ariz., by Executive orders of January 8, 1900, and November 14, 1901; to the Committee on Indian Affairs.

A bill (S. 3673) to reimburse certain fire insurance companies the amounts paid by them for property destroyed by fire in suppressing bubonic plague in the Territory of Hawaii in the years 1899 and 1900; to the Committee on Claims.

By Mr. BRUCE:

A bill (S. 3675) to amend the Judicial Code by adding a new section to be No. 274D; to the Committee on the Judiciary.

By Mr. COPELAND:

A bill (S. 3676) for the relief of Harry Newton; to the Committee on Naval Affairs.

By Mr. BORAH:

A bill (S. 3677) to extend the time for making expenditures and for filing annual proof on desert-land entries; to the Committee on Public Lands and Surveys.

By Mr. JONES of Washington:

A bill (S. 3678) granting certain lands to the State of Washington for public park and recreational grounds, and for other purposes; to the Committee on Public Lands and Surveys.

By Mr. STANFIELD:

A bill (S. 3679) to transfer to the classified civil service postmasters in charge of the post offices of the first, second, and third class; to the Committee on Civil Service.

A bill (S. 3680) to extend the time for final entry on desert-land grants; to the Committee on Public Lands and Surveys.

By Mr. McKINLEY:

A bill (S. 3681) granting an increase of pension to Effie Fatheree; to the Committee on Pensions.

By Mr. SHORTRIDGE:

A bill (S. 3682) for the relief of M. Barde & Sons (Inc.), Portland, Oreg.; to the Committee on Claims.

By Mr. WADSWORTH:

A bill (S. 3683) to amend the seventieth article of war; to the Committee on Military Affairs.

A bill (S. 3684) for the relief of the New Jersey Shipbuilding & Dredging Co.; to the Committee on Claims.

By Mr. CURTIS:

A bill (S. 3685) for the relief of Elizabeth Jane Ann West; to the Committee on Claims.

A bill (S. 3686) granting an increase of pension to Juna Powell (with accompanying papers);

A bill (S. 3687) granting a pension to Isabelle Raber (with accompanying papers);

A bill (S. 3688) granting a pension to Belle Cochran (with accompanying papers);

A bill (S. 3689) granting an increase of pension to Alice Browning (with accompanying papers);

A bill (S. 3690) granting a pension to Helen M. McCauley (with accompanying papers);

A bill (S. 3691) granting an increase of pension to Esther Dunlap (with accompanying papers);

A bill (S. 3692) granting an increase of pension to Julia Martin (with accompanying papers);

A bill (S. 3693) granting a pension to Ida Overman (with accompanying papers);

A bill (S. 3694) granting a pension to James Hogan (with accompanying papers);

A bill (S. 3695) granting a pension to Eugene S. Mattoon (with accompanying papers); and

A bill (S. 3696) granting a pension to Rosa E. Postel (with accompanying papers); to the Committee on Pensions.

By Mr. PEPPER:

A bill (S. 3697) for the relief of Percy S. Ransom; to the Committee on Claims.

ELECTION OF PRESIDENT AND VICE PRESIDENT

Mr. JOHNSON of California. Mr. President, I introduce a joint resolution, proposing a constitutional amendment, and with the permission of the Senate, I wish to occupy about three minutes in explaining its purpose.

I seek by the amendment to avoid a situation with which recently we became familiar. I endeavor to preclude the contingency by which a presidential election would be, under the mode now designated by the Constitution, ultimately determined in the House of Representatives. I propose to do it by amending the Constitution so that a plurality rather than a majority of the electors shall elect. I would prefer, Mr. President, the majority mode, but, weighing the advantages and the disadvantages, understanding, as we did in the past few months, the influence upon the people of the suggestion of throwing a presidential election into the House of Representatives, I feel that we may safely intrust to a plurality of the electoral college the election of a President of the United States rather than suffer the ills and uncertainties of the present method.

I do not like the plan of presidential succession which has been suggested by some gentlemen wherein an individual who has not been selected by any number of our people, an official who holds his office merely as an official and would not under any other circumstances be chosen President, might be designated for an indefinite time as President. In such a contingency the selection would represent neither party nor principles nor policies nor any considerable number of the electorate at all.

So I present the proposed constitutional amendment in the hope that the matter may be discussed and that we may arrive at a just solution of it. It is the only feasible amendment that appears at the moment, this I present, providing that a plurality of the Electoral College shall elect a President of the United States, just as a plurality of our voters elect our presidential electors and the various officials in the different States.

I may say parenthetically that I should prefer that the President of the United States be elected by a direct vote of the people and by a majority of the people themselves. That, however, seems not to be feasible nor possible at the present time; but now, when the subject is fresh in our minds, when we understand the arguments that may be made concerning the

presidential succession, and when the possibilities have been painted to us in the fashion that they have painted in the past few months; when fresh in our minds is the description of the evils which may arise by the succession going into the House of Representatives for determination, I do hope that we at least attempt to remedy the situation and not allow it to rest in abeyance until another presidential election. I therefore introduce the joint resolution proposing this constitutional amendment and ask that it may be referred to the Judiciary Committee.

The joint resolution (S. J. Res. 156) proposing an amendment to the Constitution of the United States relative to the election of President and Vice President was read twice by its title and referred to the Committee on the Judiciary.

AMENDMENTS TO MUSCLE SHOALS BILL

Mr. BRUCE submitted sundry amendments and Mr. McKELLAR submitted an amendment intended to be proposed by them to House bill 518, the so-called Muscle Shoals bill, which were severally ordered to lie on the table and to be printed.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. McNARY submitted an amendment intended to be proposed by him to House bill 10020, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

Umatilla Rapids project, Oregon: For investigations of the feasibility of irrigation by gravity or pumping, water sources, water storage, and related problems on the Columbia River and its tributaries, and for cooperative and miscellaneous investigations of the feasibility of reclamation projects, including personal services in the District of Columbia and elsewhere, and incidental expenses, the unexpended balance of this appropriation contained in the act of March 4, 1923 (42 Stat. p. 1540), is hereby reappropriated and made available for 1926.

To be inserted at the proper place in the bill.

MEMORIAL ADDRESS ON WOODROW WILSON

Mr. SWANSON. I ask unanimous consent to have printed as a public document the wonderful speech made yesterday by Doctor Alderman at the memorial services for the late President Wilson.

The PRESIDING OFFICER (Mr. WILLIS in the chair). In the absence of objection that order will be entered.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on December 13, 1924, the President had approved and signed the following acts:

S. 116. An act to amend section 196 of the Code of Law for the District of Columbia;

S. 933. An act to provide for the examination and registration of architects and to regulate the practice of architecture in the District of Columbia; and

S. 1343. An act to authorize the widening of Fourth Street, south of Cedar Street NW., in the District of Columbia, and for other purposes.

RECLASSIFICATION OF POSTAL SALARIES—VETO MESSAGE

Mr. ASHURST. Mr. President, I ask the indulgence of the Senate whilst I give reasons for my objection to the second reading of the bill introduced by the able Senator from South Dakota [Mr. STERLING]. I have an affection for the Senator from South Dakota, who is soon to leave us. He has to his credit excellent work, to which he and his constituents may point with pride; but the greatest episode in his senatorial career is that, single-handed and alone, he has prevented the Senate of the United States from exercising its constitutional right and from performing its constitutional function in reconsidering and voting upon S. 1898, the bill "reclassifying salaries of postmasters and employees of the Postal Service."

The veto message came to the Senate on the 7th day of last June. Manifestly we could not proceed to a reconsideration of that bill until the Journal clerk had entered the veto message upon the Journal; hence, tediously and accurately inscribing each word carefully, so that the entire message might be entered upon the Journal, the clerk did his whole duty; but before he could perform that duty the hour arrived for final adjournment, on June 7 last, and, because of the diligence, prudence, and care of the clerk, the veto message of the President went over for six months. Now that the veto message has been entered upon the Journal, there is nothing to prevent the Senate from exercising its constitutional privilege and performing its duty.

I must hurry along, because I could not to-day, under the rule, make a long speech. I seize this opportunity to draw

the attention of the country to the services of the Senator from South Dakota [Mr. STERLING]. It so happens that I agree with him on some public questions, but I disagree with him in his attempt, which has thus far been successful, to compel the Senate of the United States to agree with his demand that a motion to rerefer must be made before he will permit a vote on the veto message. No other Senator in my time has had the temerity to demand that the Senate shall make terms with him before he will permit the Senate to vote upon a veto message.

Mr. President, the Christmas holidays will soon be here and the veto of the postal bill remains undisposed of. Like peripatetic volcanoes in constant eruption, during the recent elections many Senators of the majority went about promising that as soon as the Senate met in December you would vote on the veto message on the postal salary bill. Make good on that promise. You split the ears of groundlings, you filled the earth and sky with loud speeches, promising that the first thing that would be done when Congress convened would be to have a vote on this veto message.

The Republican Party to-day sits prettily and cynically, triumphant. One of the greatest victories in its history crowned its efforts at the recent elections. All it had to do during the campaign was to sound the alarm and a golden stream of revenue poured into its coffers to pay rents, pay clerks, expenses, and pay for propaganda. The Democrats suffered a crushing defeat. We were obliged, instead of expanding, to restrict the expenses of our national committee and finally to take modest quarters. Sound the alarm to the favored interests and your coffers overnight overflow. You have a huge surplus in your treasury. We have a huge deficit. You are to-day triumphant, victorious; but remember how sinisterly fate deals with political parties and with men. Remember with what startling frequency she reinstates the vanquished. Sitting now so cynically at the pinnacle of the greatest victory of your career, I will give you a word of friendly warning: Unless you make good on your promises you will be convicted in the public mind of having been guilty of a flagrant disregard of the use of words during the campaign, and I know it would wound your feelings very much to be convicted upon that charge.

Therefore, in order that we may know how many in this Chamber are in favor of proceeding to a vote on this veto message, I shall soon move—and that is a privileged motion—to proceed to the reconsideration of this postal bill and veto message. One of the most cynical expressions that ever fell from the lips of a President fell from the lips of Calvin Coolidge in this veto message when he said, in substance, "We can not afford to pay larger salaries to these postal employees." He thereby put profit above human service.

Let me say to the President that the post offices are not conducted for profit; they are conducted to transport letters and papers for the people. The public schools of the United States are not conducted for money profits; our profits there are informed, educated young ladies and young gentlemen, far above money profits.

The national parks, the lungs of the country, are not maintained for profit. They are maintained so that the people may there regain and recreate their exhausted strength. The Navy is not maintained for money profit; the Army is not maintained for money profit.

The postal employees, in rain and in sunshine, in storm and in fair weather, without default, delay, or neglect, bring to us the messages of business and messages of consolation. We should be prompt, quick to vote upon this message. The dignity, the courage, of the Senate is in question by further delays. There is not a man here but who knows that if the veto message on the soldiers' bonus had been allowed to be delayed seven or eight days, mythology would have during that period destroyed any hope of passing the soldiers' compensation over the veto. So in the past few days I have given myself the pleasure of rereading mythology.

Therefore, Mr. President, I move that the Senate proceed to consider the veto message on the bill for the reclassification of postal salaries, S. 1898, and upon that I ask for the yeas and nays.

Mr. STERLING. Mr. President, as against the motion made by the Senator from Arizona, I make the point of order that it is in violation of the unanimous-consent agreement.

The PRESIDENT pro tempore. The Chair has given a great deal of consideration to the proper procedure in a matter which is reasonably sure to arise, and the Chair is of the opinion that the motion is in order. The Chair therefore overrules the point of order.

Mr. McKELLAR. I call for the yeas and nays upon the motion.

The yeas and nays were ordered.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Ferris	McKellar	Shortridge
Ball	Fess	McKinley	Simmons
Bayard	Fletcher	McNary	Smith
Borah	Frazier	Mayfield	Smoot
Brookhart	George	Means	Spencer
Broussard	Glass	Metcalf	Stanfield
Bruce	Greene	Moses	Stanley
Butler	Hale	Neely	Sterling
Capper	Harrell	Norbeck	Swanson
Caraway	Harris	Norris	Trammell
Copeland	Harrison	Oddie	Underwood
Couzens	Heflin	Overman	Wadsworth
Cummings	Howell	Pepper	Walsh, Mass.
Curtis	Johnson, Calif.	Phipps	Walsh, Mont.
Dale	Jones, N. Mex.	Pittman	Warren
Dahl	Jones, Wash.	Ralston	Watson
Dill	Kendrick	Ransdell	Wheeler
Edge	Keyes	Reed, Mo.	Willis
Edwards	King	Reed, Pa.	
Ernst	Ladd	Sheppard	
Fernald	McCormick	Shipstead	

Mr. CARAWAY. I wish to announce that my colleague [Mr. ROBINSON] is ill. I will let this announcement stand for the day.

The PRESIDENT pro tempore. Eighty-one Senators have answered to the roll call. There is a quorum present. The question is upon the motion of the Senator from Arizona [Mr. ASHURST].

Mr. CURTIS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. CURTIS. Is the motion to proceed to the consideration of the bill, or to pass the bill over the President's veto?

The PRESIDENT pro tempore. The motion, stated in the language of the Chair, is that the Senate proceed to the reconsideration of Senate bill 1898.

Mr. STERLING. Then, Mr. President, if it is in order at this time—I did not quite understand the motion—I move that the bill vetoed by the President, together with the veto message of the President, be referred to the Committee on Post Offices and Post Roads.

Mr. HARRISON. Mr. President, a parliamentary inquiry.

Mr. NORRIS. I make a point of order against the motion of the Senator from South Dakota.

The PRESIDENT pro tempore. The Senator from Nebraska will state the point of order.

Mr. NORRIS. The point of order is that his motion is out of order until the Senate has decided whether or not it will proceed to consider the bill.

The PRESIDENT pro tempore. The Chair is of the opinion that the motion made by the Senator from Arizona must first be disposed of, and that then the motion made by the Senator from South Dakota will be in order.

Mr. STERLING. Very well. It was just a question as to whether or not I should make that motion at the present time or not. I will wait, then, until the disposition of the pending motion.

The PRESIDENT pro tempore. The question is upon the motion of the Senator from Arizona [Mr. ASHURST] to proceed to the consideration of the bill and message, on which the yeas and nays have been ordered.

The reading clerk called the roll.

Mr. NORRIS. I desire to announce that the senior Senator from Wisconsin [Mr. LA FOLLETTE] is detained from the Senate by a slight illness. If he were present, he would vote "yea" on this question.

Mr. CARAWAY. I wish to announce that my colleague [Mr. ROBINSON] is detained from the Senate by illness. If present, he would vote "yea."

Mr. HARRISON. I desire to announce that my colleague [Mr. STEPHENS] is unavoidably absent on account of sickness. If present and permitted to vote, he would vote "yea."

I desire further to announce that the senior Senator from Rhode Island [Mr. GERRY] is unavoidably absent, and that if present, he would vote "yea."

Mr. McNARY. I desire to announce the absence of the junior Senator from Idaho [Mr. GOODING] on account of sickness. If he were present and voting, he would vote "yea."

Mr. SHIPSTEAD. I desire to announce that my colleague [Mr. JOHNSON of Minnesota] is necessarily absent on account

of illness in his family. If he were present and voting, he would vote "yea."

Mr. GLASS (after having voted in the affirmative). I have a general pair with the Senator from Connecticut [Mr. McLEAN], but, understanding that he would vote as I have voted on this question, I permit my vote to stand.

Mr. JONES of Washington. I desire to announce that the senior Senator from West Virginia [Mr. ELKINS] is paired with the senior Senator from Oklahoma [Mr. OWEN].

The roll call resulted—yeas 51, nays 30, as follows:

YEAS—51

Ashurst	Frazier	McKinley	Shortridge
Bayard	George	McNary	Simmons
Brookhart	Glass	Mayfield	Smith
Bronssard	Harris	Neely	Stanfield
Caraway	Harrison	Norris	Stanley
Copeland	Heflin	Overman	Swanson
Couzens	Howell	Pittman	Trammell
Cummins	Johnson, Calif.	Ralston	Underwood
Dill	Jones, N. Mex.	Ransdell	Wadsworth
Edge	Jones, Wash.	Reed, Mo.	Walsh, Mass.
Edwards	Kendrick	Reed, Pa.	Walsh, Mont.
Ferris	Ladd	Sheppard	Wheeler
Fletcher	McKellar	Shipstead	

NAYS—30

Ball	Ernst	McCormick	Smoot
Borah	Fernald	Means	Spencer
Bruce	Fess	Metcalf	Sterling
Butler	Greene	Moses	Warren
Capper	Hale	Norbeck	Watson
Curtis	Harrell	Oddie	Willis
Dale	Keyes	Pepper	
Dial	King	Philips	

NOT VOTING—14

Bursum	Gooding	McLean	Stephens
Cameron	Johnson, Minn.	Owen	Weller
Elkins	La Follette	Robinson	
Gerry	Lenroot	Shields	

So Mr. ASHURST's motion was agreed to.

The PRESIDENT pro tempore. The Chair lays before the Senate the bill (S. 1898) reclassifying salaries of postmasters and employees of the Postal Service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, and for other purposes, and the question is, Shall the bill pass, the objections of the President to the contrary notwithstanding?

Mr. HARRISON. On that I ask for the yeas and nays.

Mr. STERLING. I move that the bill, together with the message of the President, be referred to the Committee on Post Offices and Post Roads.

Mr. NORRIS and Mr. HARRISON addressed the Chair.

The PRESIDENT pro tempore. The Senator from South Dakota has the floor until he yields.

Mr. STERLING. In connection with my motion, I wish to be heard.

Mr. HARRISON. Will the Senator yield for one moment?

Mr. STERLING. I will yield for a question.

Mr. HARRISON. I merely wanted to serve notice that I desire to offer an amendment to the motion. Will the Senator permit it to be read now, so that it will be before the Senate?

Mr. STERLING. I yield for that purpose.

The PRESIDENT pro tempore. The Secretary will read the proposed amendment.

The reading clerk read as follows:

I move that the motion of the Senator from South Dakota be amended by adding the following instructions, namely, that the said committee be instructed to report the same back immediately with the recommendation that the bill be passed over the President's veto.

Mr. STERLING. Mr. President, in making this motion to refer the bill, together with the veto message, to the committee—

Mr. NORRIS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state his inquiry.

Mr. NORRIS. I ask the Chair whether, during the morning hour, a motion to refer a bill to a committee is debatable?

The PRESIDENT pro tempore. The Chair is of the opinion that the motion is debatable, unless some rule of the Senate can be pointed out to the contrary. But the Chair desires to say, having studied this question somewhat, that the amendment proposed by the Senator from Mississippi is not in order and could not be received. That has been decided a great many times.

Mr. STERLING. Mr. President, in moving to refer this bill, together with the message of the President, at this time—

Mr. HARRISON. Mr. President—

Mr. STERLING. I decline to yield.

Mr. HARRISON. The Chair was merely making an observation and not making a ruling on the proposition, I hope. I would like to be heard. The amendment has not been offered yet. I only served notice that it would be offered.

The PRESIDENT pro tempore. That is the present view of the Chair.

Mr. HARRISON. I hope I can convince the Chair he is wrong in his observation.

The PRESIDENT pro tempore. The Senator from South Dakota is recognized.

Mr. STERLING. Mr. President, let me repeat, in making this motion to refer the bill and the veto message to the Committee on Post Offices and Post Roads I thought, and still think, that I was proceeding in the most natural and logical way, under all the circumstances of the case.

The bill was vetoed by the President, and in his very able and comprehensive veto message, he stated the grounds fully for his veto of the bill. They were very clearly and succinctly stated, and it seems to me they are such grounds as under the circumstances ought to appeal to every Senator. We are well aware of the policy of economy advocated by the President of the United States and we are well aware of the fact—I need not recur to the evidence of it—of the approval of the public of that policy of economy. But let the vote at the late election say whether or not the President's great policy meets with the approval of the people of the United States.

A part of that program of economy is involved in a consideration of the postal salary bill. The cost of increasing the salaries, as the President pointed out in his message and as the examination made by the Post Office Department will show, is approximately \$68,000,000. Under a policy of retrenchment and reform, when the administration is trying to relieve the people of the excessive burdens of taxation under which they have been groaning for many years, it is proposed by the bill to increase the burden upon the people by taxation for this purpose to the extent of \$68,000,000 annually. Is there need of it, Mr. President? Is there need of it in the first place from the standpoint of the employees of the Postal Service of the Government? I submit that question to the candid consideration of Senators. What is needed, if anything, is not a general increase of salaries all along the line in the Postal Service, but a readjustment of salaries, the making of a differential in the salaries of post-office employees so that those living in the great cities of the United States and who feel the high cost of living more than those living elsewhere, might receive compensation adequate to their needs rather than that there should be a general increase. I mean by that to say that there is no urgent necessity existing at the present time for a general increase in postal salaries. What are the facts?

Mr. NORRIS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from South Dakota yield to the Senator from Nebraska?

Mr. NORRIS. I wish to make a point of order and I do that because the Chair in deciding in answering my parliamentary inquiry invited reference to a rule. I make the point of order that the motion is not debatable, and I cite the Chair to section 7 of Rule VII, on page 13, as follows:

The Presiding Officer may at any time lay, and it shall be in order at any time for a Senator to move to lay, before the Senate, any bill or other matter sent to the Senate by the President or the House of Representatives, and any question pending at that time shall be suspended for this purpose. Any motion so made shall be determined without debate.

Mr. STERLING. The motion has been determined and was determined without debate. The question of the reconsideration of the President's veto of the bill was decided without debate. What I am discussing is the motion made to refer to the committee, and that is debatable.

The PRESIDENT pro tempore. The Chair probably will have to announce his view in regard to the amendment of the Senator from Mississippi, and that will be held in reserve, but that the present motion is in order and is debatable the Chair has no doubt.

Mr. STERLING. Mr. President, while I have presented a bill this morning which provides for exactly the same salaries as the bill vetoed by the President, yet I think it is worth while to call the attention of the Senate to the question of the urgency of the need of the enactment of legislation, and in this connection to the fact that beginning in 1918 and running to 1920, inclusive of those two years, there have been three material increases in the salaries of all postal employees, averaging in each increase over \$200 and averaging in the three increases made within that period of time, a period of two years, over \$600 throughout the entire Postal Service. Until now

the average salary received is, I think, in excess of \$1,800 for the rural carriers, for the city carriers, and for the clerks. For the supervisory officials the average, of course, is more than that.

How does that average compare with the salaries received by other employees in the Federal service? Take the salaries of those who range now between \$1,040 or \$1,140 and \$2,040, embracing, as those figures do between those limits, the great body of fiscal, administrative, and clerical employees now in the Government service? As compared with the salaries of postal employees, their salaries average about \$1,540. Is there an urgent need that the rural carrier now, taking the country over, who is now getting in excess of \$1,800, shall receive any very material increase, not to say whether or not it might be reasonable to grant such an increase—not to say that, but is there such an urgent necessity that we are now justified in voting upon the people of the United States \$68,000,000 annually to be raised by general taxation? I can not think there is.

As I said in the beginning, what we need more than a general increase is a readjustment, so that we shall make a differential between those who are employed in the great cities, and where the cost of living is so high, and the other employees who are not so situated.

Mr. REED of Missouri. Mr. President, will the Senator yield for a question?

Mr. STERLING. I yield for a question.

Mr. REED of Missouri. The Senator has just stated that this \$68,000,000 increase must be paid out of general taxation. Are we to understand that the Senator is not going to present a bill to raise the money in another way by increasing postal rates?

Mr. STERLING. The bill has already been presented. I want to call attention to it a little later.

Mr. ASHURST. Mr. President, I rise to a point of order, a point of order which I make with reluctance and regret; but, of course, every Senator knows of the unanimous-consent agreement entered into yesterday which provides specifically—

That on said calendar day no Senator shall speak more than once or longer than 10 minutes.

With reluctance and regret I make the point of order, but the learned Senator from South Dakota began to speak at 1 o'clock p. m., and it is now 11 minutes after 1. He yielded 1 minute to the Senator from Nebraska, and he has exhausted his 10 minutes. I therefore make the point of order.

The PRESIDENT pro tempore. Does the Senator make the point of order that the question is not debatable?

Mr. ASHURST. No. But no Senator under our unanimous-consent agreement entered into on Saturday last shall speak prior to 3 o'clock more than 10 minutes. I ask that the clerk read the unanimous-consent agreement.

The PRESIDENT pro tempore. The Chair is of the opinion that the unanimous-consent agreement does not apply to the pending question.

Mr. ASHURST. I ask that the clerk read it. It says, "on that calendar day."

The PRESIDENT pro tempore. The clerk will read the unanimous-consent agreement.

The principal legislative clerk read as follows:

Ordered, by unanimous consent, that on the calendar day of Tuesday, December 16, 1924, at not later than 3 o'clock p. m., the Senate will proceed to vote, without further debate, upon the amendment of Mr. SMITH to the bill H. R. 518, relating to the disposal of Muscle Shoals, etc., and that on said calendar day and prior to the vote no Senator shall speak more than once or longer than 10 minutes.

Mr. CURTIS. Mr. President, that was intended entirely for the Muscle Shoals bill when it comes before the Senate, and that bill will not be laid before the Senate until 2 o'clock under the rule.

Mr. ASHURST. But the unanimous-consent agreement says "on that calendar day."

The PRESIDENT pro tempore. The Chair will rule that the unanimous-consent agreement just read does not apply to the debate now proceeding.

Mr. REED of Missouri. Mr. President, I wish the Chair would indulge me a moment until I call his attention to a fact. I proposed the unanimous-consent agreement, and it was expressly stated at the time on the floor that the agreement ought to be so phrased as to prevent anybody getting the floor and taking up the time of the Senate with a long discussion. It was the sense of the Senate, as I understood the sense of the Senate at that time, that on this day we were to shut off debate on any question except within the limit of 10 minutes.

Now, if that were not true, then the unanimous-consent agreement would have resulted in no protection whatever for the discussion of the Smith amendment, because any Senator upon any other question could rise at any time and take as long as he wanted to.

The PRESIDENT pro tempore. The Chair does not so understand it. At 2 o'clock the Muscle Shoals bill will be laid before the Senate.

Mr. REED of Missouri. Let me call the attention of the Chair to a further matter. There was even a request preferred that the Senate should meet at 11 o'clock in order to allow three hours of discussion of the particular amendment which is here known as the Smith amendment. We all understood that. Then, in lieu of agreeing to meet at 11 o'clock and to vote at 2 o'clock, which was the original proposition, the agreement was modified so that we should vote at 3 o'clock, leaving three hours for the discussion of this amendment. Now, if the Chair shall rule, as he now is inclined to do, that the two hours, which constitute the morning hour, could be taken up in one speech upon another subject, the entire purpose of stipulating three hours of debate on the Smith amendment would be defeated. That was not the understanding of the Senate; at least it was not as I understood it.

The PRESIDENT pro tempore. The Chair desires to state that the Senate could very easily have avoided this situation by refusing to take up the veto message of the President and the bill to which the message refers. The Senate, however, chose to take up the bill, and the Chair knows of no way by which debate upon the bill can be prevented until 2 o'clock.

Mr. ASHURST. Mr. President, will the Chair indulge me in a question?

Mr. SMITH. I wish to make one statement in reference to what the Senator from Missouri [Mr. REED] has said. The specific question having been raised as to whether or not we should confine debate to this particular amendment, it having been suggested that some Senator might debate some other question and debate it at length, the agreement entered into was that we would in the 10-minute speeches not confine debate to the amendment alone, but that if any Senator got the floor and wanted to speak on another subject, he should be confined to the 10 minutes, regardless of what subject he was speaking on. That was the unanimous-consent agreement which was entered into.

The PRESIDENT pro tempore. The Chair does not so understand.

Mr. SWANSON. Mr. President, it seems to me that the Chair ought to rule that the agreement was made with the understanding that Senators knew that a motion of the kind which has been made was in contemplation. Consequently the unanimous-consent agreement was entered into with a full knowledge of the rules of the Senate, which permitted to be made motions of the character of the one which has been made at this time. Therefore, to avoid extended discussion on motions of this character, which were known to be in order, the unanimous-consent agreement states "on said calendar day." When did the calendar day start? It started at 12 o'clock, and the time for debate extended until 3 o'clock. The unanimous-consent agreement does not specify debate on any motion in connection with Muscle Shoals. It is evident that the unanimous-consent agreement was made under the impression that a motion such as the one which has been made might prevail and be before the Senate during the morning hour. In order to eliminate extended discussion during the morning hour and during the transaction of routine morning business, the unanimous-consent agreement distinctly refers to debate "on said calendar day."

The PRESIDENT pro tempore. Did the Senator from Virginia have in mind that this subject would arise during the morning hour?

Mr. SWANSON. Mr. President, it is presumed that in entering into the unanimous-consent agreement some Member of the Senate knew that this motion would be in order; and so as to prevent delay and time being consumed on motions that were in order, and Senators knowing of this motion in reference to a consideration of the President's veto message being in order, the debate was limited to 10-minute speeches. When a unanimous-consent agreement is made it must be construed as having had in contemplation a knowledge of the rules of the Senate which permit a motion like this. In order to prevent a long debate on this motion when made, the unanimous-consent agreement states that it shall apply "on said calendar days."

A suggested previous unanimous-consent agreement referred to amendments and the bill, but this unanimous-consent agree-

ment, in order to prevent this very situation arising and time being consumed provides that the 10-minute rule shall apply "on said calendar day."

Mr. REED of Missouri. Mr. President, if the Chair please, and if the Senator from Virginia will pardon me, let me read the colloquy which occurred at the time the unanimous-consent agreement was entered into. I omit the preliminary part of it, and read as follows:

Mr. REED of Missouri. Then I propose that at not later than 3 o'clock on the calendar day of Tuesday, December 16, the Senate shall proceed to vote upon what is known as the Smith amendment, or any amendments thereto, and that upon Tuesday no Senator shall speak more than once or longer than 10 minutes upon the Smith amendment.

Mr. UNDERWOOD. Or upon any subject before us.

Mr. REED of Missouri. Or upon any other subject.

The PRESIDENT pro tempore. The Secretary will report the proposed unanimous-consent agreement.

The reading clerk read as follows:

"It is agreed by unanimous consent that on the calendar day of Tuesday, December 16, 1924, at not later than 3 o'clock p. m., the Senate shall proceed to vote without further debate upon the amendment of Mr. SMITH to House bill 518, and that no Senator shall speak more than once or longer than 10 minutes upon said amendment or upon any other subject."

Or upon any other subject.

Mr. CURTIS. Prior to 3 o'clock.

Mr. REED of Missouri. Let it read, "and prior to the final disposition of said amendment no Senator shall speak more than once or longer than 10 minutes."

The PRESIDENT pro tempore. The Secretary will again report the proposed agreement.

The reading clerk read as follows:

"It is agreed by unanimous consent that on the calendar day of Tuesday, December 16, 1924, at not later than 3 o'clock p. m., the Senate shall proceed to vote without further debate upon the amendment of Mr. SMITH to House bill 518, and prior to the vote no Senator shall speak more than once or longer than 10 minutes upon said amendment or upon any subject."

Then this occurred—

Mr. REED of Missouri. Strike out "upon said amendment" and all the rest of it and let it conclude "shall speak more than once or longer than 10 minutes."

Mr. SMITH. That is all right.

Mr. STERLING. Mr. President—

Mr. REED of Missouri. In other words, when we struck out those words we left the absolute inhibition; there was no use saying anything about the Smith amendment or any other proposition if Senators were to be limited absolutely to 10 minutes. I say the colloquy that took place in the Senate and the language of the unanimous-consent agreement in view of that colloquy can not be mistaken. The Senator from Alabama [Mr. UNDERWOOD] sat here determined that his bill should not be put aside by improvident discussion of other measures; we were stipulating here for discussion on this amendment, and 10 minutes was the ultimate that any Senator was to consume of the time, to the end that we might get to a vote. I say that if the President pro tempore will read that colloquy, it makes perfectly plain our understanding that no Senator was to stand up here this morning and take up the time of the Senate in an hour or two-hour speech during the morning-hour discussing some other question.

Mr. STERLING. Mr. President, I suppose we shall have to be governed by the unanimous-consent agreement itself and not by the colloquy that preceded the entering into that unanimous-consent agreement. As printed on the calendar the agreement itself reads:

Ordered, by unanimous consent, that on the calendar day of Tuesday, December 16, 1924, at not later than 3 o'clock p. m., the Senate will proceed to vote, without further debate, upon the amendment of Mr. SMITH to the bill H. R. 518, relating to the disposal of Muscle Shoals, etc., and that on said calendar day and prior to the vote no Senator shall speak more than once or longer than 10 minutes.

No reference is made to any other subject at all in the unanimous-consent agreement. Now, Mr. President, it still seems to me that—

The PRESIDENT pro tempore. The Senator from Arizona has made a point of order, and it is necessary for the Chair to dispose of it. The Chair understands the unanimous-consent agreement to apply only to the bill which has been pending before the Senate. The Chair regrets very much that this difference of opinion has arisen, but there is an easy way to correct the Chair if he is in error.

Mr. McKELLAR. Mr. President, I appeal from the decision of the Chair.

The PRESIDENT pro tempore. The Senator from Tennessee appeals from the decision of the Chair.

Mr. McKELLAR. And on that appeal I ask for the yeas and nays.

The PRESIDENT pro tempore. The yeas and nays are demanded. [A pause.] The demand as yet is not sufficiently seconded.

Mr. STERLING. Mr. President, is the appeal from the decision of the Chair a debatable question? I think it is.

The PRESIDENT pro tempore. The Chair understands that it is a debatable question.

Mr. STERLING. I have the floor, Mr. President.

Mr. ASHURST. Mr. President, it is true the question is debatable, but it will only be debatable for a moment. I move to lay the appeal on the table.

Mr. CURTIS. The Senator from South Dakota has the floor.

Mr. STERLING. I have the floor; nor have I yielded it.

Mr. ASHURST. I withdraw my motion.

The PRESIDENT pro tempore. The question is, Shall the decision of the Chair stand as the judgment of the Senate?

Mr. STERLING. Mr. President, the question being debatable, I believe I have the floor and I may discuss that question.

The PRESIDENT pro tempore. When a point of order is made it must be disposed of notwithstanding the fact that a Senator has the floor. The Chair holds that the demand for the yeas and nays is sufficiently seconded, and the clerk will call the roll.

The reading clerk called the name of Mr. ASHURST.

Mr. CURTIS. Mr. President—

Mr. ASHURST, responding to his name, voted in the negative.

The PRESIDENT pro tempore. The Senator from Kansas.

Mr. CURTIS. Mr. President, I understood the Chair to say that the question of the appeal from the decision of the Chair was debatable, and I call attention to the fact that a Senator had addressed the Chair.

Mr. SWANSON. I make the point of order that the roll call can not be interrupted.

Mr. CURTIS. I had the floor and no Senator had answered at the time I addressed the Chair.

Mr. McKELLAR. The Senator from Arizona [Mr. ASHURST] had answered.

The PRESIDENT pro tempore. The Senator from Kansas addressed the Chair before any Senator had answered to his name.

Mr. CURTIS. I addressed the Chair before any Senator had answered to the roll call. The Chair has ruled, as the Senator from Kansas understands, that the question of the appeal is debatable, and the Senator from South Dakota has the floor to debate that question.

The PRESIDENT pro tempore. The Chair is of the opinion that the question of order is debatable on an appeal from the decision of the Chair. That has been held, the Chair thinks, many times.

Mr. REED of Missouri. But if the Chair please, the Chair ordered the roll be called and the Senator from Arizona [Mr. ASHURST] answered to his name.

The PRESIDENT pro tempore. The Chair, on the contrary, understands that the Senator from South Dakota insisted upon proceeding before the Senator from Arizona had answered to his name.

Mr. REED of Missouri. The Record will show that the Chair ordered the roll to be called and the Senator from Arizona distinctly answered when his name was called. Now the roll call is in progress.

Mr. SWANSON. It is a question of fact, and the Record will show.

The PRESIDENT pro tempore. The Chair will ask the Reporter or ask the clerk whether the Senator from Arizona had answered to the roll call before the Chair was addressed by the Senator from South Dakota.

Mr. CURTIS. Mr. President, the Senator from Kansas also addressed the Chair before the Senator from Arizona answered to his name.

The PRESIDENT pro tempore. The Chair does not remember whether the Senator from Arizona answered before the Senator from Kansas addressed the Chair.

Mr. REED of Missouri. Let the Record be read.

The PRESIDENT pro tempore. The Chair is informed that the Senator from Kansas addressed the Chair before the Senator from Arizona answered to his name; so the Senator from South Dakota will proceed.

Mr. STERLING. Mr. President, upon the question of the appeal from the decision of the Chair I have very little to say. The understanding on the part of the Senator from South Dakota was that the Senator from Tennessee [Mr. McKELLAR] had withdrawn his motion.

Mr. McKELLAR. Oh, no. I have not withdrawn my motion. The Senator from Arizona [Mr. ASHURST] withdrew the motion he made, but my appeal is before the Senate.

Mr. STERLING. Very well.

I was proceeding, Mr. President, to discuss the question of the urgent need for an increase of the salaries of post-office employees.

Mr. SMITH. Mr. President, I rise to a point of order.

Mr. STERLING. And I want to suggest—

The PRESIDENT pro tempore. The Senate will be in order.

Mr. SMITH. I rise to a point of order. I should like to inquire of the Chair whether on the appeal from the decision of the Chair the debate must not be confined to the subject before the Senate, namely, whether or not the Chair shall be sustained?

The PRESIDENT pro tempore. The debate ought to be confined to the subject before the Senate, but, unfortunately, it is not the custom of the Senate so to confine the debate.

Mr. SMITH. I thought the Chair had ruled a moment ago that it must be confined to the question.

The PRESIDENT pro tempore. The Chair has no power to enforce a suggestion of that kind, no matter how wise it may be.

Mr. STERLING. Mr. President, while I was not present in the Senate Chamber nor in the city of Washington either during the consideration of the postal salary bill, I know of one difficulty, at least, that confronted the subcommittee, as well as the full committee, and that was as to whether or not means could be provided, without a general tax, with which to pay increased salaries.

For a long time prior to the consideration by the committee of the postal salaries bill, the Post Office Department, in conjunction with special experts employed by the Joint Postal Commission, were engaged in the work of cost ascertainment to endeavor to find accurately and precisely the cost of handling, carrying, and distributing the different classes of mail.

Mr. BRUCE. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from South Dakota yield to the Senator from Maryland?

Mr. STERLING. I yield to the Senator for a question.

Mr. BRUCE. I thank the Senator. I wish to ask whether it is or is not true that the representatives of the postal employees affected by this bill desire the bill to be referred to the Committee on Post Offices and Post Roads. The statement was made by the Senator from New Jersey [Mr. EDGE] a few days ago, not once but, as I recollect, twice, that it was the desire of the representatives of the postal employees, to whom this bill relates, that the bill should be referred to the Committee on Post Offices and Post Roads, as I recollect, or some other committee. Now, is that or is not that true? I ask because I want to vote on the merits of this proposition.

Mr. STERLING. Replying to the Senator from Maryland, I understand that it is. I can not speak from personal knowledge with reference to the entire service, but as to one particular branch of the service—the Rural Carrier Service—a representative of that branch told me that they were quite satisfied that the bill should be referred to the Committee on Post Offices and Post Roads, with the idea that that committee would bring out a bill for the increase of salaries, as in the vetoed bill, and which would also provide the means by which the salaries should be paid.

Mr. EDGE. Mr. President, will the Senator yield?

Mr. STERLING. I yield.

Mr. EDGE. If I correctly understood the statement of the Senator from Maryland, he stated that he had understood the Senator from New Jersey to have made such a statement in the course of his remarks. The Senator from Maryland must be entirely mistaken. I am quite sure that in the course of any of my remarks I have in no way implied, directly or indirectly, as the sponsor of the bill or as representing in any way the wishes of representatives of the postal organizations, that they desired the bill to be referred to the Committee on Post Offices and Post Roads; and I am waiting at this moment, if opportunity is afforded and the Senator from South Dakota has concluded, to oppose the motion he has made.

Mr. ASHURST. Mr. President—

Mr. BRUCE. The Senator from Maryland may have misunderstood, but on this side of the Chamber it was distinctly

understood that the Senator from New Jersey meant to say that the representatives of the postal employees were in favor of the reference of this bill to that committee. I suppose the question could be settled by a reference to the Record.

Mr. EDGE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from South Dakota yield; and if so, to whom?

Mr. STERLING. I yield.

The PRESIDENT pro tempore. To whom?

Mr. STERLING. I yield for a question.

The PRESIDENT pro tempore. The Chair does not know whether the Senator from South Dakota is yielding to the Senator from Maryland or to the Senator from New Jersey.

Mr. BRUCE. The Senator was so kind as to say that he would yield to me.

Mr. STERLING. I have yielded to the Senator from Maryland, and if he is through with his inquiry I yield to the Senator from New Jersey.

Mr. BRUCE. I want to vote on the merits of this proposition without any secondary consideration whatsoever; and I, as one Member of the Senate, should like to be dealt with with perfect frankness so far as it is concerned. It is a disagreeable task to me.

Mr. STERLING. I have given the Senator from Maryland my answer.

Mr. BRUCE. Yes; the Senator has, and I do not think I have a right to ask anything more.

Mr. STERLING. I may say, in addition to what I have already said, that I think the post-office employees generally will be quite reconciled to this disposition of the bill when they understand that it is the intention of the Senator who introduced the bill this morning to push the matter just as rapidly as possible in committee.

Mr. EDGE. Mr. President, will the Senator yield to me now?

The PRESIDENT pro tempore. Does the Senator from South Dakota yield to the Senator from New Jersey?

Mr. STERLING. I yield to the Senator from New Jersey.

Mr. EDGE. There is not a possible chance for a misunderstanding as to what the Senator from New Jersey said; and if the Senator from Maryland will give me his attention for a moment, I am sure that he will clearly understand my presentation. The Record will clearly set it forth as well.

I stated, when the Senate some four or five days ago had before it the requested unanimous-consent agreement which provided for a consideration of this matter on February 2, as I recall, giving an opportunity for the committee in the interim to consider a revenue bill, but in no way referring the veto message or the bill to the committee, but keeping that in its same preferred position on the table, that that met the unanimous approval of all the representatives of the Postal Association at a meeting I had attended a few hours before.

Mr. BRUCE. Of course, the Record will speak for itself, but I am not prepared at the present time to say that that is not a perfectly correct version of what happened.

Mr. ASHURST. Mr. President, will the Senator from South Dakota yield to me for a moment just to make a short statement?

Mr. STERLING. I yield to the Senator from Arizona for that purpose.

Mr. ASHURST. In view of the fact that I made the motion, I think I ought to say that so far as I have been able to observe the Senator from New Jersey [Mr. EDGE] has moved with manful candor and commendable frankness and diligence in every way with his bill, and I congratulate him. He has done a man's work; he has shown himself to be a capable legislator; and if the bill can not be voted upon, no blame can be laid at the door of the esteemed Senator from New Jersey [Mr. EDGE], because he has done all that can be done to hurry a vote on this bill.

Mr. STERLING. I join with the Senator from Arizona in that testimony to the efforts of the Senator from New Jersey in regard to it. He has on every occasion when he could, I think, asked that this matter be taken up and considered by the Senate.

Mr. President, a moment ago I was speaking about the efforts at cost ascertainment. I stated that officials of the Post Office Department, together with experts recommended by the Senate Committee on Post Offices and Post Roads, have been at work, I think, for at least six months last past, if not longer, trying to ascertain the cost of handling, distributing, and carrying different classes of mail matter. One difficulty encountered by the committee who framed the bill which was vetoed by the President was that they did not have any report before them on cost ascertainment. It was

waited for, it was expected, almost up until the time the bill was introduced here in the Senate, but was not forthcoming. It was a long and a tedious work, requiring great care and great scrutiny on the part of the persons engaged in that work; and so, being desirous that the bill should pass at the last session of Congress, it was presented without any cost ascertainment having been made. Meanwhile, Mr. President, and very lately, too, a report has been made by the persons engaged in the Post Office Department and other experts and accountants showing the cost of carrying the different classes of mail.

This morning I had inserted in the RECORD, without reading, a letter from the Postmaster General, which letter accompanied the draft of a bill increasing the rates on certain classes of mail matter, and I want to call attention to some of the provisions of that letter:

In compliance with your request for the suggestions of the Post Office Department as to the sources from which may be derived revenues approximately aggregating the additional cost the department would be compelled to meet in the event of the passage of the bill increasing the pay of post-office employees, I transmit herewith the following in the form of a bill, which will, in the judgment of the department, meet the desired end. It will be observed that the suggestions affect every class of mail on which the department now sustains a loss, as revealed by the result of the cost ascertainment just completed by direction of Congress, except foreign mails, and it is the purpose to distribute these with due regard to equity.

By practice of every economy possible consistent with good service and by reason of the gradual increase in the volume of business the department has been slowly approaching the point where its receipts would balance its expenditures. According to departmental estimates, the postal pay bill will add approximately \$68,000,000 to the annual expenditures, and it is at once obvious that the money to meet this must come from somewhere. The question is whether it shall be assessed against the general taxpayer or whether it shall be obtained by providing increased rates for mail now carried at a loss. It is my belief that the latter is the correct method.

Inasmuch as these suggestions are based upon the conclusions arrived at by the cost ascertainment, I desire to say that I have implicit faith in their accuracy. It has been made by some of the most efficient and experienced experts in the Postal Service and has later been most carefully analyzed by two of the best-known firms of expert accountants in the country, and both the accountants and the department are prepared to explain and defend it if attacked.

The loss occurred by fourth-class mail, or parcel post, is much less than had been popularly believed. Most extravagant statements have been repeatedly made concerning the deficit incurred through carrying parcel post, but the figures demonstrate these exaggerations. In submitting the rates proposed herewith the department proceeds upon the theory that while the handling of this class of mail is a very useful and, in fact, indispensable feature of the Postal Service, it is, nevertheless, commerce and should be regarded as such when it comes to making rates for carrying it. Fourth-class mail is made up of commodities and not of intelligence. It should pay its full way and leave a slight margin of safety sufficient to provide for unforeseen changes. The loss sustained on this class of mail closely approximates \$7,000,000. In order to wipe this out and provide the margin referred to, the department suggests increases amounting to about \$12,000,000. However, after the cost of the salary bill is added to the expense of the department the proportional share chargeable to fourth class will practically balance this margin.

Third-class mail consists largely of circulars and of direct mail advertising. It has to some extent the treatment of first-class mail. Concerning it, it is the view that, like parcel post, it also should pay its way and leave a slight margin. The loss on this class is \$16,000,000. It is proposed to increase receipts by \$18,000,000 by means of the new schedule of rates herein proposed.

First-class mail as a whole yields a profit in excess of \$80,000,000, but the postal-card feature of it is carried at a loss of about 0.45 of a cent on each card. It is proposed to cover this by increasing the price of postal cards to 1½ cents. There will be those who will regard this as much more difficult of accomplishment than the department believes will prove the case. Postal cards are principally used by those who buy them in considerable numbers and employ them in sending out notices of various kinds, and the individual sales are not nearly so numerous as is popularly believed. By this means we estimate added revenues of \$12,500,000.

Second-class mail consists entirely of publications, newspapers, and periodicals, and the loss on it is placed at \$74,712,000. Notwithstanding this, the recommendation for increases on second class calls for \$10,876,000. One million of this is expected to be derived from newspapers mailed by individuals and not by the publishers.

In holding the increase on this class within the limits named, the department has been governed by numerous considerations. It

has been the traditional policy of the Government to give publications the benefit of low rates, recognizing them as distributors of general information. It always has and still does recognize the desire of the public for daily news and current information and reading matter. The increases proposed will apply to the advertising pages of both newspapers and magazines, with a slight increase on the reading portion of magazines.

About \$4,000,000 is estimated from registered letters and about \$3,500,000 from money orders, on which under present rates there are very substantial losses. These features are more or less in the nature of banking transactions and may be fairly so regarded, but the rates fixed can not be so large as to make them greater than those charged by the banks and express companies for a similar service, and it is believed that the sums are as large as can be justified.

Mr. HARRISON. Will the Senator yield?

Mr. STERLING. For a question.

Mr. HARRISON. I suggest to the Senator that we have now about 11 minutes before 2 o'clock, when this matter will go over. Will he not permit a vote to be taken on his motion now?

Mr. STERLING. I would like to discuss the matter a little further—

Mr. HARRISON. The Senator then does not want a vote to-day?

Mr. STERLING. Because there are some very important features of this question which I have not yet had time to discuss because of the interruptions of Senators.

Mr. HARRISON. I had hoped that the Senator would accept our cooperation to get a vote on his proposition.

Mr. STERLING. No—

Mr. HARRISON. He does not want a vote to-day?

Mr. STERLING. I want to present the matter a little more fully before a vote is reached. I continue the reading:

On insurance and collect-on-delivery services increases of \$3,058,000, and \$1,103,000 respectively, are estimated for.

The total increases provided by the rates in this bill are estimated to yield \$60,390,750.87 and will approximately cover the \$68,000,000 estimated as the cost of the bill S. 1898 providing the increased schedules for the pay of employees.

The department will be glad through the Postmaster General, and still better through the experts of the department, to give to your committee any further information desired.

I call attention again, Mr. President, to what seems to me to be a challenge on the part of the Postmaster General himself, where he says that this cost ascertainment has been made by some of the most efficient and experienced experts in the Postal Service, and has later been most carefully analyzed by two of the most expert firms of expert accountants of the country, and both the accountants and the department are prepared to explain and defend it if attacked.

Mr. WILLIS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from South Dakota yield to the Senator from Ohio?

Mr. STERLING. I yield to the Senator from Ohio.

Mr. WILLIS. I am interested in the reference the Senator makes to this detailed information which, it seems to me, would be of the very greatest importance in the consideration of this question. Has that been printed in documentary form so that it is available to Senators? The Senator has been reciting it with great ability, but we have had no opportunity to read it.

Mr. STERLING. I can not say, but I do not think all the detailed information has yet been furnished to the Senate. I presented a report several days ago, and I am not sure that even that report has been printed; but the detailed information, or at least a great deal of it, is in the form of an appendix which properly goes with the report of the Postmaster General on the cost ascertainment.

Mr. WILLIS. If the Senator will further yield, it seems to me that it is exceedingly important that before we pass upon this question finally we shall have opportunity to examine that information. I personally have sought to get copies of this document, but they are not available. Yet we are urged to act upon this question, when the report has been made, but in such form that no one is able to get it in order to read it.

Mr. STERLING. Mr. President, I can read the summary and conclusions of the department with reference to the various classes of mail, and I was about to proceed to do that when the Senator from Ohio asked me the question. This is prepared at the Post Office Department, giving the revenues and expenditures with reference to each class of mail, the loss, and the gain. In the case of first-class mail the gain is \$80,417,716.32. Notwithstanding that gain on the part of

first-class matter, we are \$39,000,000 behind in the Postal Service, all told, or have that much of a deficit. Add \$68,000,000 more, and you have a deficit of \$107,000,000.

What is there about this matter of mail service? It is a service for the most part for which the people of the country gladly pay, a service rendered by the Government, and it ought to be self-sustaining. I am satisfied that the common sentiment of the people would stand in favor of such increases as would make the Postal Service pay its way.

Mr. EDGE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from South Dakota yield to the Senator from New Jersey?

Mr. STERLING. I yield.

Mr. EDGE. This may help the Senator to consume the time, but in the interest of accuracy, if I understood the Senator's statement a moment ago, he said that there was a deficit of some \$39,000,000. I read from the annual report of the Post Office Department presented early in December, as I recall it:

As a result the annual deficit amounted to only \$14,428,137, a reduction of \$9,601,000 from the deficit resulting from the previous year's operations.

In other words, that the department had reduced a deficit, as I recall it, of some \$150,000,000 four years ago, to approximately \$14,000,000 the past year, simply through the ordinary advance of business.

Mr. WILLIS. Mr. President—

Mr. STERLING. I yield.

Mr. WILLIS. If the Senator will permit me to ask a question of the Senator from New Jersey, what was the document which the Senator was reading?

Mr. EDGE. I was reading from a review of the Postmaster General's report in a morning newspaper printed, I think, on December 1. I have not the date on my clipping. It is an article merely reviewing the report. It says:

Postmaster General New Informa President Coolidge in his annual report made public to-day—

Then it goes on to note those figures.

Mr. WILLIS. Mr. President, if the Senator from South Dakota will permit—

Mr. STERLING. Certainly.

Mr. WILLIS. The newspaper clipping from which the Senator reads is, of course, interesting, but I chance to have here the statement made by the President, which is an official document, I suppose, and in his message he uses this language, in part:

For the fiscal year 1923 the postal revenues were \$32,000,000 less than the cost of the service that year.

All of which illustrates what I have suggested upon this floor, that we ought to have opportunity to get at these facts instead of relying, as the Senator from New Jersey does, upon a newspaper résumé or something which Senators have not had an opportunity to examine.

Mr. EDGE. Mr. President, the Senator from New Jersey will not rely on newspaper clippings when he has the floor in his own time to discuss the financial situation of the Post Office Department; but in passing it might be interesting to the Senator from Ohio and the Senator from South Dakota—I again clip from a newspaper, which I think is absolutely accurate—to know that the postal revenues of the past year jumped 7.53 per cent, while the expenditures to take care of this growing business increased only 5.4 per cent, showing the steady increase of income over expenditures in the Post Office Department.

Mr. STERLING. The table I have before me, Mr. President, gives the revenues and expenditures for the fiscal year 1923, and the deficit, according to these figures, is \$39,805,702.18.

Mr. WILLIS. Will not the Senator have that table printed in full in the RECORD?

Mr. STERLING. I am going to quote from it. On second class the loss is \$74,712,868.67. On third class the loss is \$16,291,575.48. On fourth class, which would include parcel post, the loss is \$6,916,753.82. On franked matter there is a loss of only \$357,819. On penalty matter there is a loss of \$6,214,131.44. On foreign matter there is a loss of \$4,603,838.17.

Mr. CARAWAY. May I ask the Senator a question?

Mr. STERLING. I yield for a question.

Mr. CARAWAY. Of course, there are always some services the Government renders which do not result in any monetary return. The thing I wanted to ask the Senator was this, if he did not think the Government could very well afford to carry a loss, while enabling the farmer to reach the markets by the use of the parcel post, and the newspapers and periodicals to

reach the people. As I understood, there is a provision in the Senator's proposed bill to increase the zone rates, is there not?

Mr. STERLING. Yes; slightly to increase the zone rates.

Mr. CARAWAY. Inasmuch as the Government is not a business institution, does it owe to the man living in the remotest corner the same service that it does to the man who lives within 15 feet of the Capitol? In other words, would it not be a discrimination against people living farther from the centers of population to penalize them by increasing the postal rate on newspapers, magazines, and things upon which they must rely for their information?

MUSCLE SHOALS

The PRESIDENT pro tempore. The morning hour has expired. The Chair lays before the Senate House bill 518.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. HARRIS obtained the floor.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Clerk will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fernald	Ladd	Shipstead
Ball	Ferris	McKellar	Shortridge
Bayard	Fess	McKinley	Simmons
Borah	Fletcher	McNary	Smith
Brookhart	Frazier	Mayfield	Smoot
Broussard	George	Means	Spencer
Bruce	Glass	Metcalf	Stanfield
Bursum	Gooding	Moses	Stanley
Butler	Greene	Neely	Sterling
Capper	Hale	Norbeck	Swanson
Caraway	Harrell	Norris	Trammell
Copeland	Harris	Oddie	Underwood
Couzens	Harrison	Overman	Wadsworth
Cummins	Heflin	Pepper	Walsh, Mass.
Curtis	Howell	Phipps	Walsh, Mont.
Dale	Johnson, Calif.	Pittman	Warren
Dial	Jones, N. Mex.	Ralston	Watson
Dill	Jones, Wash.	Ransdell	Wheeler
Edge	Kendrick	Reed, Mo.	Willis
Edwards	Keyes	Reed, Pa.	
Ernst	King	Sheppard	

The PRESIDING OFFICER (Mr. WILLIS in the chair). Eighty-two Senators having answered to their names, there is a quorum present. The question is on the amendment offered by the Senator from South Carolina [Mr. SMITH] to the substitute proposed by the Senator from Alabama [Mr. UNDERWOOD], on which the yeas and nays have been ordered. The Senator from Georgia [Mr. HARRIS] is recognized.

Mr. HARRIS. Mr. President, there is no difference of opinion among Senators about the development of Muscle Shoals for national defense, but there is a very great difference among us as to what shall be done with this great power when it is not needed for war purposes. Heretofore the bills that have passed Congress have provided for Government operation during war times and for the manufacture of fertilizer, or, rather, of nitrate, during peace times, to be supplied to farmers at cost.

During the last war Germany discovered that our weakest point was in the matter of nitrate. We were dependent upon a foreign country—Chile—to supply this. We are the only Government in the world of any size that is really dependent upon another country in that respect. So we are all in agreement that the project should be developed to produce nitrate for the manufacture of munitions during war. Muscle Shoals was selected by a board of Army officers appointed by the President, upon the recommendation of the Secretary of War, and without any favoritism whatever. It is the greatest power that can be utilized for this purpose east of the Mississippi River and away from the seacoast where it could not be exposed to attack. The bills that have passed heretofore have not only taken care of national defense but have protected the farmer. As I understand the pending bill it does not do that, and the amendments which I and others have offered to give preference to the farmers in the sale and distribution of fertilizers manufactured at

Muscle Shoals were objected to by the Senator from Alabama [Mr. UNDERWOOD] and have been defeated.

I had hoped that I might be able to vote for the Underwood bill, and still hope that it may be amended so that I may do so. Objection to the amendment offered by the Senator from South Carolina [Mr. SMITH], which I shall support, has been made on the ground that President Coolidge would probably veto it.

I do not think there is anything in the President's message that can be construed in that way. He stated that he favored a desirable lease, but failing in that he urged the Government to develop the power. The Smith amendment is not one providing for Government operation. It simply provides for the Government to develop the best way to manufacture nitrate so as to manufacture fertilizers cheaper in time of peace and for the manufacture of munitions during war, and then the property can be leased. It is not intended by the Smith amendment, as I understand it, to have Government operation permanently. I am opposed to Government operation as a rule, but there is no more of Government operation involved in the Smith amendment and the Government developing a way to get cheap and abundant nitrate in time of war and peace than there is in the Government developing the submarine or aircraft or in building and maintaining the Panama Canal. There is no difference whatever in the two propositions. Neither one involves Government operation—both are for national defense.

One objection I have to the Underwood bill is the defeat of an amendment I introduced, which allowed the farmers to have the preference or rather allowed the Secretary of Agriculture to distribute the fertilizer to the farmer. As I understand, the bill of the Senator from Alabama, unless it is amended, instead of being a benefit to the farmers of the South in giving them cheaper fertilizer, a lease could be made under the bill to the Fertilizer Trust, who could raise the price of fertilizers to the farmers. The Federal Trade Commission investigated the Fertilizer Trust and found that a few companies fixed the price, or rather controlled the price and the other smaller companies followed. There is nothing in the Underwood bill as I see it that would prevent half a dozen of the large fertilizer corporations from leasing the property, and instead of lowering the price of fertilizer to the farmer they could raise it and the farmers would be helpless.

The same thing is true in the matter of power. I have an amendment which I shall offer to prevent leasing it to any power corporation that would come in competition with the Muscle Shoals plant, because, just as in the case of the Fertilizer Trust, as I have suggested, the power companies in that section could get control of the property by a lease, and instead of it being a benefit to our people and lowering the cost of power, they could raise the price to the consumers. I have an amendment that will allow them to lease the power at a price lower than other corporations if necessary. The reason I shall offer such an amendment is this: Suppose we have to lease this surplus power to the Alabama Power Co. and the other power companies, if they had a surplus of power at times from their own plant they would not take the Government surplus power. They would sell their own power and leave ours to go to waste. During the rainy season there would be twice as much power as at other times. I think we ought to be protected and we ought not to allow one of the power companies in competition with us to take the property for that reason.

The Senator from Alabama objected to another amendment of mine which I think very important. It could be used to prevent the transferring of the lease of the property to the Fertilizer Trust or the Power Trust. My amendment provided that no lease made under this act could be transferred to another without the consent of our Government. No one in leasing a one-story building on a back street for 50 years would fail to reserve the right to cancel that lease if it should get in the hands of undesirable persons, and yet the Senator from Alabama objected to that provision being placed in the bill relating to the lease of Muscle Shoals when on this plant so much depended for our national defense. We know that at one time a foreign corporation was trying to get control of the property and trying, through their agents, to interfere with the leasing of it to others. They have been open in their opposition.

I am going to discuss the price of the cotton, because that concerns New England and the western people as it does my own section. The high cost of labor makes it absolutely necessary for us to have cheaper fertilizer to meet the competition of the world in the production of cotton. England for two years has put a tax on every bale of cotton used by her cotton factories and is using that money in her colonies where they

have cheap labor to develop the production of cotton. The time is not far distant when they are going to take from the South the monopoly of cotton raising which we now have unless we can get cheaper fertilizers. We can not compete with those people, because their labor and many other things are cheaper than ours. When that time comes the purchasing power of the South is going to be so reduced that New England and the farmers of the North, as well as the farmers of the West, who sell us their products are going to feel it very severely. When the South can not raise cotton at a profit, the New England cotton mills will be compelled to go out of business, and other manufacturing companies will have to reduce their production, as they will be unable to find customers to take the place of the people of the South. When the southern people fail to raise cotton they will have to plant grain, much of which they buy from the West. If the western farmers should lose their market in the sale of wheat in the South, they would have a large surplus on hand and the price would go below the cost of production, as it always does when there is an overproduction. The North and West are interested in cheap fertilizer in the South and the cheap production of cotton as much as our section is.

The present President of the United States, the preceding President of the United States, Mr. Harding, and I think also President Wilson, recommended the St. Lawrence Canal. One of the reasons for urging that project was to get lower freight rates to help the wheat growers of the West. That was the principal argument used. I believe that project is coming rapidly, and if that is true, why should not the Senators from that section of the country favor the development at Muscle Shoals in peace time to help the cotton growers down in my section of the country? It is just as important to help agriculture in the South as it is to help it in the North or the West.

I shall not take longer time to discuss this matter, Mr. President, but I want to call the attention of the Senate to the importance of cotton to the United States. Except for the gold brought into our country in payment of cotton exported from the South our gold reserve now would not be much more than one-half of what it is. The southern cotton growers compete with the world, and it is necessary to have cheap fertilizer to raise it at a profit, as much of the land is wearing out. In two-thirds of the South where cotton is produced fertilizer is an absolute necessity, and they will have to raise other crops unless we can get cheaper fertilizer to use in connection with the growing of cotton. There can be no general prosperity in our country until the farmers are prosperous. When the farmer receives a good price for his products it helps all business trades and professions. We have too long neglected the needs of the farmer, and now is the time to begin by providing in this bill terms that will give the farmer cheaper fertilizer. The farmer gets less benefit from the protective tariff than anyone. He is taxed heavily because of the tariff and gets little benefit. Let us do justice to the farmer in this Muscle Shoals development. Regardless of anything, I shall continue my efforts to help the farmer in this matter and every other way possible. Let us amend this bill to give the farmer the preference under its terms.

THE PRESIDING OFFICER. The question is on the amendment proposed by the Senator from South Carolina [Mr. SMITH], upon which the yeas and nays have been ordered.

Mr. DIAL. Mr. President, the Senate has before it a big question with which to deal, but I do not think the solution of it is so hard as it has been appearing to the Senate. The time has come when it is necessary for us to act, and it is not mainly for us to shirk the issue.

There are only four things which we can do in reference to the pending legislation.

The first thing we can do is to do nothing; to let the water run over the dam and go to waste and to return nothing into the Treasury of the United States for the large outlay of money which the Government has already made on the Muscle Shoals property. I do not think that is practical. The second proposition is to let the Government operate the property; the next proposition is to let the Government lease the property; and the fourth is to sell the property.

I do not suppose that any of us, or at least many of us, would advocate developing Muscle Shoals if the Government had not already undertaken the work, but we have the property. I am almost unalterably opposed to Government going into business; I feel that such operation has always failed and always will fail in connection with business enterprises; in fact, that is not the function of government. But, Mr. President, we erected this plant for the purpose of procuring nitrates in time of war. Having done that, and the Govern-

ment needing nitrates—and it will need more hereafter—I think we should hold on to the property and should demonstrate whether nitrates can successfully be made there, and at what cost.

Personally I should like to see every horsepower of which Muscle Shoals is capable of developing used in the manufacture of fertilizer to be sold to the farmers of this country at a cheap price.

I do not believe we could pass that kind of a bill, nor do I believe that the President of the United States would approve it. I favor manufacturing nitrates and proving that we can do so, putting this country in the same position as are the other great countries of the world in this respect, so that we may have them in time of war in case we should need them. I favor manufacturing nitrates even if it should cost more than it now cost to procure them elsewhere.

However, Mr. President, after all that shall have been done, we should then utilize the property for the greatest good to the greatest number. Almost all of us occupy different positions, representing different States. I presume that some Senators here would not care to have the Government put any more money into Muscle Shoals. I do not blame the Senators from Alabama for wanting the power there developed utilized in Alabama to build up that great State, to create employment for the people, to build property for taxation, and so forth; I do not blame Senators in the adjoining and near-by States for recommending that the surplus power be transmitted to their States so that their people may get some of the benefit of the property; but, Mr. President, we represent first the people of the United States; that is our first duty, and I feel that the Government should hold onto this property and should put it in such shape that we can manufacture nitrates at any time we may need them.

It does seem to me that the proposal of the Senator from Alabama is about the best that we can agree upon. I am not particularly enthused over that, but I believe it is about the best and most practical proposition which we can get enacted into law. Under it the lessee, if we can get one, will be compelled to make a large quantity of nitrates in the next few years, which can be employed in the manufacture of fertilizer and be sold. The demonstration of the ability to do that I feel would be worth a great deal to the people of this country. Whether or not the results will prove of sufficient magnitude seriously to affect the price of fertilizer, I very much question; but that can be decided later.

Mr. President, if the property should be sold—and that was in the mind of the President of the United States when he recommended a long-term lease or sale—perhaps none of this power would be put to the use of making nitrates and other ingredients of fertilizer. Therefore our section would lose all the benefits along that line.

Mr. President, unless Congress shall act before final adjournment of the present session, it is said that the Secretary of War will lease this property or sell the power for manufacturing purposes and allow it to be transmitted to wherever that can be done. That, however, is not an easy proposition. As I understand, the Government has not provided a pole line, has not provided the great transformers that would be necessary to "step up," as the electricians call it, this power from the voltage which has been created to the voltage which will have to be transmitted. It will be a tremendous expense to do that, and that will have to be provided for. One can not sell power as he can sell a carload of wheat or a carload of bacon. Preparation has to be made for the transmission of power, and arrangements have to be made at considerable expense by the purchaser, the consumer. He will have to expend money in order to convert his machinery so that it may be driven by electricity instead of by steam. So it is not a question of a day or of a year, but it is a question of a long time before a potential customer will consent to entail the large expense which will be necessary to convert his power from one kind of drive to another. Such a customer would want to know that he would have some assurance of a long-time contract, or certainly a contract for a reasonable time in which to get the use of this power in order to justify such a transversion of his method of operations. Therefore, I repeat, it is not an easy matter at all. The hands of the Secretary of War would in a great measure be tied, the water would be running to waste, and the Government would get no return upon it.

I think the time has come when we ought to act. We have had this property for a long time, and the question of its disposition has been debated and considered for several years. Each Senator should make up his mind. I am frank to say that I would be glad, if all of the power to be developed is not to be converted into the manufacture of fertilizer, to have

the surplus power transmitted, and I would be glad to have some of it transmitted to my State in order to help build up industries there.

It does not do to say that the Government is going to sell the property to some power company. I have no interest in any power company that would transmit this power, and I have no interest in any great company at all and am not the spokesman for them; but I have no ill will against power companies which have put their money into dams and into machinery and have turned water into electricity and thereby saved thousands and millions of tons of coal for future generations. Those organizations should not be criticized without cause but, on the other hand, should be encouraged. If it is not proposed to lease the power to some company, to whom would we lease it? It can not be leased to a merchant or a lawyer, but will have to be leased to some one who is prepared to transmit the power and to handle it or to some one who will prepare to do so.

We have public utilities commissions in all of the Southern States that would regulate the distribution of the power and regulate the charges to be made for its use. Therefore I can see nothing else to do but to go along and act on the matter. The time has come to act, and there is no good reason why we should want further information and delay. We should use it now and depend upon greater developments in the future to convert more of the power into munitions in case we have need of them.

As I understand, after the lessee, if we can get one, has used a certain proportion of the power in the manufacture of nitrates, he will have a right to transmit the remainder of the power; but there is a provision that such excess power may be recalled in time of need for the manufacture of nitrates.

Mr. President, I am glad the controversy is drawing to a close. I hope we may dispose of the bill and put this magnificent property to use, so that the Government may begin to get some return upon its splendid investment and the people of that section of the United States may receive some benefit from it.

THE PRESIDING OFFICER. The time of the Senator from South Carolina has expired.

Mr. McKELLAR. Mr. President, I am going to take only a few moments of the time of the Senate. The Senator from South Carolina [Mr. DIAL] has said "let us regulate the use of this property in the hands of the corporation to which it is going to be leased"; and yet the Senator cast his vote against any regulation except that of the Alabama Public Utilities Commission.

Mr. DIAL. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. DIAL. The public utilities commissions of the various States would regulate it.

Mr. McKELLAR. There can be no regulation outside of the State of Alabama until the power gets out of the State, so that primarily the Senator wants the Alabama Public Utilities Commission to regulate it. Let us see how they will regulate it. In the city of Cleveland a municipally owned plant sells 40 kilowatt hours of electricity for \$1.20. The cities of Bessemer, Birmingham, and Montgomery, Ala., are supplied with electric energy from water power, which was originally given by the Government, at a cost of \$3.06 for 40 kilowatt hours in comparison with the charge of the Cleveland municipally owned plant of \$1.20. So the charge is nearly three times as much under the regulation of the Alabama Public Utilities Commission as it is in Cleveland, Ohio.

By the way, let me say that the Government of the United States has already dealt in an exceedingly kindly manner with the Alabama Power Co. It gave them one of the greatest water powers in this country, and, as I remember, gave it to them perpetually, in 1912, when the Coosa Dam act was passed. That company has the right for all time to generate water power. It is regulated by the Alabama Public Utilities Commission, and the Alabama Public Utilities Commission is regulating it by permitting that water-power octopus to charge nearly three times as much as is charged for electricity generated by steam power in another city.

Mr. President, when the Senate the other day voted down, at the request of the senior Senator from Alabama [Mr. UNDERWOOD], the proposal to retain the power in the Government to regulate this great project if it shall be leased, they destroyed absolutely any good that could come from that plant by putting it in the hands of a lessee. We all know that to be the case. I want to say that, in my judgment, if this company shall obtain the plant, even under the stringent provisions in this bill, not only will the price of water power not

come down but there will be no fertilizer manufactured for the farmers of the country. What will happen will be that they will find that it is impracticable to manufacture fertilizer; so there will not be any manufactured, and the Alabama Power Co. will continue to generate current at a price fixed by the Alabama Public Utilities Commission, which will be about three times as much as it ought to have.

Everybody who is familiar with the situation in Alabama knows that the Alabama Power Co. to-day is charging nearly three times as much for current created by water power as it ought to charge even for current created by steam power.

Mr. DIAL. Mr. President—

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from South Carolina?

Mr. McKELLAR. Yes; I yield to the Senator from South Carolina.

Mr. DIAL. Does the Senator think there is enough demand in Alabama to consume all the power, or would they have to transmit some of it to other States—to the Senator's State or mine?

Mr. McKELLAR. If the Alabama Power Co. has determined to use this power in building up the three towns around the shoals, as it looks as though it has, it is probable that all the power that is developed will be used there. In addition to that, under the provisions of this bill the Tennessee River will not be opened to navigation, which is a very important matter. Dam No. 3 will not be built, reservoirs along the Tennessee River will not be built, the power will not be completely and properly produced, and the river will not be opened to navigation. It is an important thing for the navigation of that great river to be opened up. It is an important thing to produce as much power as this water will afford. It can not be done under this bill. It will not be done under this bill. This bill simply provides for turning over this property, without adequate compensation, to a power company that has not dealt fairly with the people of Alabama or anywhere else up to this date, and I hope the amendment offered by the Senator from South Carolina may be agreed to. It ought to be agreed to.

Mr. HEFLIN. Mr. President, I want Senators on this side, especially the southern Senators, to know exactly what they are doing when they vote for the amendment of the Senator from South Carolina [Mr. SMITH].

I regard the adoption of his amendment as the final blow toward defeating our purpose to manufacture fertilizer at Muscle Shoals. I want Senators to realize that we are in grave danger of having the President veto the bill. I do not think there is the slightest doubt that he would veto the bill if the amendment of the Senator from South Carolina should be adopted.

The President is not going to consent to have all the power developed at Muscle Shoals used for the manufacture of fertilizer. The Underwood bill as amended—and I want the Senator from Tennessee to bear this in mind—does not say that "if practicable" they shall make fertilizer. It directly and specifically orders them to make fertilizer, 40,000 tons of fixed nitrogen, which would equal the total amount of Chilean nitrates used annually by the farmers of the United States.

Let Senators bear that in mind when they are voting for the proposition of my good friend from South Carolina. I know that he does not want to do what I believe his amendment will do—kill this fertilizer proposition. However, I am convinced that if his amendment is adopted, the President will veto it just as soon as it reaches him; and then my good friends on this side from the South can hug to their souls the flattering unction that they have killed the opportunity to compel the manufacture of fertilizer at Muscle Shoals. If the amendment is adopted and the President vetoes the bill, as he will, Secretary Weeks would lease the Muscle Shoals property and all chance of getting fertilizer for the farmer will have been deliberately thrown away.

I voted for the amendments of my good friend from Georgia [Mr. HARRIS]. I wanted to see them adopted, but the Senate did not adopt them. I trust he will vote against this amendment, because I believe it is killing the thing that he and others of us on this side have been trying to do; and surely we on this side, whose people in the South are sorely afflicted by the burdensome prices of the fertilizer trust, can unite our forces and stand together at this hour for the relief of our people.

The Senator from Tennessee [Mr. McKELLAR] has fought against just such a proposition as that contained in the amendment of my good friend from South Carolina. He has from the beginning ably and enthusiastically opposed the Norris bill. Why is it that the Senator from Nebraska [Mr. NORRIS] and the Senator from Iowa [Mr. BROOKHART], who have

always been against our plan of compelling the manufacture of fertilizer at Muscle Shoals, are now supporting the Smith amendment? Oh, Mr. President, it is plain to me that if we of the cotton-growing South really want cheap fertilizer for the farmer, we should vote against this amendment and vote for the Underwood bill, which has the Ford fertilizer provision in it, and put it through. That is the only sure chance that we have. The President will sign it, because he has indicated in his message to Congress that he would sign a bill that used a portion of the power for making fertilizer; and here you are in the Smith amendment proposing to use all of the power at Muscle Shoals to make fertilizer. It seems to me we all ought to know that the President will not sign the bill if it contains such a provision; and when we over here are dividing on this vital matter we are killing the very thing that the Senators from South Carolina and Tennessee have advocated here for three years, and that I and my good friend from Georgia have advocated. Three-fourths of us on this side have been strong for the Ford offer, and that offer contained the same provision that the Underwood bill now contains for making fertilizer for our farmers at Muscle Shoals, and yet when we come to a final showdown on this all-important question to our southern farmers we find ourselves divided—drifting apart—and, strange to say, with such an opportunity at hand to serve our people.

We lack foresight, unity of purpose, and concerted action. My good friend from Tennessee offered an amendment here which I think would take out of the hands of a State the right to control power coming into the State. I do not think he intended that and I fear that he did not fully understand the full effect of his amendment. I voted against his amendment. I want each State to determine what it shall do with this power when it comes into the State. I am a strong believer in the rights of the State.

I have not any pride of authorship in regard to any amendment. If I had offered a dozen amendments, and they had not been agreed to, I would support the bill if I thought it was the best thing in sight, as I know this bill is. The Senator from South Carolina [Mr. SMITH] and myself, and the Senator from Louisiana [Mr. RANDELL] and others signed a minority report in which we said that we did not think Muscle Shoals was a place for the Government to experiment with the manufacture of fertilizer. Here it is. I have it in my hand. Now we are turning around and some of us are back tracking and undertaking to set up the very thing that all of us condemned in our position in support of the Ford offer.

Let me say this in conclusion to my good friends on this side: Henry Ford's offer was in favor of the farmer. The Underwood bill embodies in it the very fertilizer provisions of the Ford offer. In fact, as amended, it is better and stronger in that particular, because the Ford offer said they would manufacture fertilizer, "if practicable, upon demand." We have stricken that out, and this bill says "shall" manufacture it, and then some gentlemen express doubt of being able to get fertilizer under it. Can the English language be clearer and stronger than that which requires fertilizer to be made at Muscle Shoals?

Let us understand and let the farmers of the South understand just what we are doing here to-day. We have the opportunity to manufacture fertilizer at Muscle Shoals under private control as Ford intended to do it, or we have it in our power to put this Government into this business in competition with individual enterprise and effort.

I am on the side of individual enterprise. I do not want the Government going into business in competition with the citizen, and I do not want any socialistic program to go through. I am standing where I have always stood, fighting as best I can the battle of the farmers of the country. I want them to have cheaper fertilizer. The 40,000 tons of fixed nitrogen provided for in this bill, let me repeat, is equal to all the Chilean nitrate that comes into the United States annually—I mean that which is used by the farmers.

Mr. President, it pains and grieves me to see this division amongst the Senators from the South when the opportunity is at hand to deliver our people from the high and burdensome prices of fertilizer under which they have so long suffered. This is the only great water-power development we have had. Here is an opportunity to use it for supplying nitrates to the Nation in time of war and cheap fertilizer to our farmers in time of peace.

I beg of you to fling away petty differences and join hands with us about a common center for the good of the Government and the farmers of the South.

Mr. SMITH. Mr. President, I shall not take even 10 minutes in what I have to say.

The Senator from Alabama [Mr. HEFLIN] and every other Senator on this floor will bear testimony that I have spent about 16 years in the Senate trying to do what I could for the benefit of the agricultural interests of this country. Therefore I am not now open to the charge of intending to do anything detrimental to their interests. It may be that my judgment is at fault, but my purpose is not.

The Senator from Alabama says that the President would veto this bill if my amendment should prevail, which is simply to take from the Underwood bill one of the alternatives that are in it. If the Senator from Alabama is correct, then the bill is not sincere, and the President's support of it is not sincere. There is a provision in it which says that if a lessee can not be found, then the other alternative shall be taken, namely, a Government corporation to carry on operations there. If the Senate in its judgment says: "You, Mr. President, have said that the bill in its present state is agreeable to you; we after mature consideration believe that we ought to eliminate the idea of leasing," and he vetoes the bill in that form, he convicts himself of condemning one proposal and using it as a mere inducement for getting over the other. There is no escape from that conclusion. You put it there simply as an inducement for us to vote, when the intent and purpose, as announced by the Senator from Alabama, is to lease it.

I have come here with the proposition that it is perhaps the most sacred function of our Government, and certainly the greatest duty of this body, to provide for the national defense, not in any piecemeal way, but by demonstrating at Muscle Shoals whether a sufficient quantity and quality of nitrogen can be produced to liberate this great, proud country from dependence on a little strip of country on the west coast of South America. Now, that we are on the threshold of the realization of the purpose of the original bill enacted in 1916, namely, that the Government should take that water power or water powers and there produce sufficient explosive material to protect this country against the frightful condition in which she found herself in 1917—now that we are on the threshold of doing that thing you propose to back track and turn over all the water-power potentialities of this country to the experimentation of a few individuals whose primary interest necessarily is in that which would produce the greatest reward to them, namely, power; and even the bill of the Senator from Alabama proposes that whatever nitrogen is produced shall be sold at a certain percentage of profit to the party producing it, no matter what it costs. Therefore it is a cost-plus measure, with no promise of any help to the farmer.

The junior Senator from Alabama [Mr. HEFLIN], who has stood by me from time to time in the fight for the betterment of the condition of the farmer, has sadly mistaken the intent and purpose of this legislation and has gone far afield on the small inducement of 40,000 tons of fixed nitrogen, when the department tells us that there are processes already past the empirical stage by which they can take nitrate plant No. 2 and by the installation of the new process produce with 10,000 horsepower what it now takes 100,000 horsepower to produce.

That being true that plant, in place of producing 40,000 tons, will produce, with the same horsepower, 400,000 tons, and that 400,000 tons would be equivalent to the nitrogenous content of the 8,000,000 tons now used by the American farmer. Does the Senator from Alabama propose that it should be limited to 40,000 tons because it should be immediately available? Would the 40,000 tons of nitrogen there produced at 8 per cent profit relieve the farmers of this country and fulfill the hopes that they have had that it would be demonstrated at Muscle Shoals that the thirty-odd million tons of nitrogen free in the air can be fixed at such a price and in such a form that the burden which they bear now may be relieved?

My amendment proposes that the Government shall use the entire possibilities at Muscle Shoals for the relief of the Government in time of war and for solving the problem of adequate fertilization in times of peace, with no delegation to a private corporation until the Government has demonstrated what it has there for national defense and what it has for leasing.

We do not know what we would lease now, except that we would lease about \$200,000,000 worth of the Government's property and there is a proposition here to lease it under certain fractional requirements. Let us carry on until the farmers of this country know the possibilities there, both for the defense of their country and for the production of foodstuffs for America. My proposition does not bind us to Government ownership. It does bind us to carry on until we know what we have there to be leased.

Senators stand here and attempt to put me and any Senator who proposes to vote for my amendment in the position of joining forces, wittingly or unwittingly, with those who would deny this country the benefits which would be afforded along the line of agriculture and defense. The proposition I have made is whether or not we shall delegate at this stage of discovery and production the fulfillment of that for which we have established this plant, namely, to determine whether it is possible to produce enough explosives to protect this country in time of war, and have the same ingredient that does that enrich our land in the interim, during this production; to turn it over to the farmers of this country, not at 8 per cent, but at the cost, during that period.

Mr. UNDERWOOD. Mr. President, at this point in the record, assuming that the farmers know, or think they know, what they want, I send to the desk a resolution in regard to Muscle Shoals, passed by the National Grange, favoring a lease of these properties, and ask that it be printed in the Record.

The PRESIDING OFFICER. Without objection, that order will be made.

The resolution is as follows:

Resolved, That the National Grange favors the leasing of Muscle Shoals on the most favorable terms obtainable, which should require that nitrates be manufactured for commercial fertilizer purposes and that the plant be kept available for the Government at all times as a general emergency; but that no lease be granted for a longer period than 50 years and not in harmony with the water power act.

Mr. UNDERWOOD. I also send to the desk a letter under date of this morning from the American Farm Bureau Federation, stating that they favor the so-called Underwood bill, the proposal now before the Senate, and ask that that be printed in the Record.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The letter is as follows:

AMERICAN FARM BUREAU FEDERATION,
Washington, D. C., December 15, 1924.

MY DEAR SENATOR UNDERWOOD: The American Farm Bureau Federation is not, and never has been, interested in Muscle Shoals as a water-power development solely for the production of electric power for public utilities distribution to a favored locality. The primary interest of the American farmers in Muscle Shoals is cheaper fertilizer materials, a result that will benefit the entire Nation. At last the group who have advocated Government operation of the Muscle Shoals development have been forced to show their hand and admit that their main purpose is to operate Muscle Shoals for power production and that they are not deeply interested in the production of fertilizer.

This attitude taken by those advocating Government operation confirms and strengthens the position the American Farm Bureau has taken in advocating the private operation of Muscle Shoals under certain restrictions that protect the public interest.

These restrictions are: The manufacture of a minimum of 40,000 tons of nitrogen annually; the limitation of profit of fertilizer manufacture to a maximum of 8 per cent; the complete development of the entire Muscle Shoals project at this time; the use of Federal money at 4 per cent interest in constructing the development; the adoption of the amortization plan for returning capital investment.

To secure the economic production of fertilizer materials at Muscle Shoals has been the main purpose of the American Farm Bureau Federation in advocating the Muscle Shoals development. This can be best accomplished by private operation under suitable regulation, and is not guaranteed to us by those advocating Government operation of the Muscle Shoals development.

Because of the turn that the Muscle Shoals controversy has taken in the last few days it becomes necessary for us to again call upon the friends of the fertilizer-using farmers in the United States Senate to give to us the last chance we may have to secure cheap fertilizer materials from Muscle Shoals by voting to give the authority to have this plant leased for private operation in the manufacture of fertilizer materials; and if no such offer is forthcoming, that the same restrictions and regulations shall apply to Government operation of Muscle Shoals as we are insisting shall apply to any lease for private operation.

Very truly yours,

AMERICAN FARM BUREAU FEDERATION,
E. B. REID,
Acting Washington Representative.

Mr. UNDERWOOD. Mr. President, on Saturday last the Washington Herald printed a libelous editorial charging me with crimes and misdemeanors because I supported this bill. I will not discuss that question further now, except to say this, that at that time I said I knew there was a lobby behind the

opposition to this bill, and I felt assured that ulterior motives prompted the writing of that editorial.

To-day I have the proof as to a part of the lobby, at least. I have in my hand a bulletin issued by the National Fertilizer Association from their Washington office, at 540 Woodward Building, Fifteenth and H Streets NW. The bulletin is signed by Mr. John I. Tierney, who styles himself "assistant to the president" of the association. It is Bulletin No. 146, and it bears date December 13, 1924, the hour and day that this libelous editorial was given to the public.

Now, I ask my friends, especially those from the South, who say that they want to serve the farmer in making fertilizers and that this bill would not accomplish that, to read the letters which came in their mail this morning from the American Farm Bureau Federation, a copy of which I have had printed in the Record, favoring the so-called Underwood bill, and the resolution which I have asked to have printed in the Record from the National Grange, favoring a leasing proposition such as I have proposed, and then listen to the tale of the enemy.

The National Fertilizer Association is the association in which the various fertilizer companies of the United States join themselves together to do such work as may build up the association and lift the prices; and the farmers of America have always regarded this association as the Fertilizer Trust, the head of it, the controlling influence of the Fertilizer Trust. I ask you to listen to what they have to say. When you listen to the reading of it you will see where the editorial came from, and the motive behind the editorial which attacked me on Saturday last:

(540-541 Woodward Building, Fifteenth and H Streets NW. John I. Tierney, assistant to the president)

WASHINGTON OFFICE THE NATIONAL FERTILIZER ASSOCIATION,
Washington, D. C., December 13, 1924.

[Bulletin No. 146]

MUSCLE SHOALS

With the support of the administration influence behind him Senator Underwood is driving through his Muscle Shoals bill, and at present writing it looks as though he will command a majority when final vote is taken in the Senate. The bill as it stands is little if any improvement over the Ford bill and, so far as the fertilizer industry is concerned, it is fully as objectionable.

The first part of the bill would turn all the properties over to a lessee at an annual rental of 4 per cent on the total sum of money expended in the building and construction of Dam No. 2, which will be about \$50,000,000, making the rental \$2,000,000 a year.

Assuming that the Alabama Power Co. will be the lessee—

This is where the Alabama Power Co. came in. It was given out to the opponents of the bill to charge that the Alabama Power Co. was going to be the lessee. You hear the master's voice—

Assuming that the Alabama Power Co. will be the lessee, and it is openly charged on the floor of the Senate that such is the case, and, in fact, that the Underwood bill is in reality an Alabama Power Co. bill, there will be available to the company, according to Senator HOWELL, upward of 250,000 primary horsepower. The bill imposes no limitations upon the rates which may be charged for the power beyond the control which would be exercised by the State utilities commissions. In consideration of this favorable power contract the lessee is to be required to produce 10,000 tons of fixed nitrogen the third year of the lease, 20,000 tons the fourth year, 30,000 tons the fifth year, and thereafter 40,000 tons a year. It is stipulated that this nitrogen shall be converted into fertilizer, mixed or unmixed, and in the debates Senator UNDERWOOD has assured his colleagues that the 40,000 tons of nitrogen would be converted into 2,000,000 tons of mixed fertilizer. This is a fanciful picture, which careful reading of the bill does not warrant, but it is one of the main arguments that Senator UNDERWOOD has employed during the week that has passed.

In the event no lease can be executed under the terms of the bill, it is provided that a Government corporation shall be created with a Government guaranteed bond issue of \$50,000,000, and the same requirements as to nitrogen production are to apply in the case of the corporation. A limitation of 8 per cent profit on the fertilizer operation is provided for, but that, of course, is meaningless, as all the experts have testified that nitrogen production at plant No. 2 would be carried on at a loss.

Debate began on December 3 and seems to be growing stronger with the passing of each day. Undoubtedly the opposition is gaining in numbers, and the longer discussion proceeds the better chance there is to hold off the Underwood bill. On the other hand, administration Senators have received word that it would be very acceptable to pass the bill and get it out of the way. In fact, the chief dan-

ger of the bill's passing is due to the weariness of Senators who have listened to Muscle Shoals debates for more than four years and who have not the inclination to study the subject so that they might vote intelligently upon it.

Listen to this:

The writer has interviewed many Senators during the last week and has been assured that opposition will be carried to the last ditch. It is suggested that southern members, especially, wire their Senators to protest against this menace to the fertilizer industry. At the present time there are nearly a score of amendments pending on the measure, and the Senators who are hoping to prevent the power company's gaining this valuable property promise to make full exposition of the purposes of the bill.

The balance of the bulletin is about other matters. It is signed by John I. Tierney, who styles himself "assistant to the president."

Senators, there is no doubt about the meaning of this proposition. The representatives of the great farm organizations and the organizations themselves assembled have declared in favor of the development of this great plant for the production of nitrogen for national defense and for fertilizer.

The PRESIDING OFFICER (at 3 o'clock). The time of the Senator from Alabama has expired. All time for debate has expired. The yeas and nays have been ordered on the pending amendment to the amendment.

SEVERAL SENATORS. Let it be read.

The PRESIDING OFFICER. The amendment proposed by the Senator from South Carolina [Mr. SMITH] to the substitute submitted by the Senator from Alabama [Mr. UNDERWOOD] will be read.

The reading clerk read as follows:

On page 3 strike out line 1 down through line 2, on page 6, and insert in lieu thereof the following:

"SEC. 3. In order to supply the United States Government with nitrogen for uses by it in time of war, and in order to produce nitrogen and balanced commercial fertilizers for the national needs in time of peace, the properties enumerated in the first section of this act shall be developed and utilized to their fullest capacity. It shall be the duty of the Secretary of War and of the corporation organized under authority of section 4 to develop and utilize all such properties primarily for the production of nitrogen for war and commercial fertilizer purposes and to produce balanced fertilizers for agricultural and commercial purposes. The Secretary of War and the corporation may make such secondary uses of the properties and power as are not inconsistent with the primary purpose of this act."

On page 6, line 3, strike out "Sec. 7" and insert in lieu thereof "Sec. 4."

On page 10, line 25, strike out "3, and 4" and insert in lieu thereof "and 3."

On page 15, line 17, strike out "Sec. 8" and insert in lieu thereof "Sec. 5."

On page 16, line 1, strike out "Sec. 9" and insert in lieu thereof "Sec. 6."

On page 16, line 6, strike out "Sec. 10" and insert in lieu thereof "Sec. 7."

On page 16, line 11, strike out "Sec. 11" and insert in lieu thereof "Sec. 8."

The PRESIDING OFFICER. The roll will be called on agreeing to the amendment to the amendment.

The reading clerk proceeded to call the roll.

Mr. NORRIS (when Mr. LA FOLLETTE's name was called). I desire to state that the senior Senator from Wisconsin [Mr. LA FOLLETTE], whose absence I announced on a former call of the roll, if present, would vote "yea" on this question. On this vote he is paired with the senior Senator from Arkansas [Mr. ROBINSON]. As I understand it, if the senior Senator from Arkansas were present, he would vote "nay."

The roll call was concluded.

Mr. SHIPSTEAD. I desire to announce that my colleague [Mr. JOHNSON of Minnesota] is necessarily absent on account of illness in his family. He is paired with the Senator from Rhode Island [Mr. GERRY]. If the junior Senator from Minnesota were present and permitted to vote, he would vote "yea." If the Senator from Rhode Island were present and voting, I am informed that he would vote "nay."

Mr. GLASS (after having voted in the affirmative). I have a general pair with the Senator from Connecticut [Mr. McLEAN], who is unavoidably absent. Therefore I feel compelled to withdraw my vote.

Mr. ELKINS (after having voted in the negative). I transfer my pair with the Senator from Oklahoma [Mr. OWEN] to the Senator from Maryland [Mr. WELLER] and let my vote stand.

The result was announced—yeas 32, nays 49, as follows:

YEAS—32			
Asbust	Harrell	Neely	Shipstead
Borah	Harris	Norbeck	Simmons
Brookhart	Howell	Norris	Smith
Copeland	Johnson, Calif.	Overman	Swanson
Conzans	Jones, N. Mex.	Pittman	Trammell
Dill	Kendrick	Ralston	Walsh, Mass.
Frazier	McKellar	Ransdell	Walsh, Mont.
Gooding	Mayfield	Sheppard	Wheeler
NAYS—49			
Ball	Edwards	King	Smoot
Bayard	Elkins	Ladd	Spencer
Broussard	Ernst	McKinley	Stanfield
Bruce	Fernald	McNary	Stanley
Bursum	Ferris	Means	Sterling
Butler	Fletcher	Metcalf	Underwood
Capper	George	Moses	Wadsworth
Caraway	Greene	Oddie	Warren
Connors	Hale	Pepper	Watson
Curtis	Harrison	Phipps	Willis
Dale	Healin	Reed, Mo.	
Dial	Jones, Wash.	Reed, Pa.	
Edge	Keyes	Shortridge	
NOT VOTING—14			
Cameron	Johnson, Minn.	McLean	Stephens
Fess	La Follette	Owen	Weller
Gerry	Lenroot	Robinson	
Glass	McComick	Shields	

So Mr. SMITH's amendment to Mr. UNDERWOOD's substitute was rejected.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Alabama [Mr. UNDERWOOD] as modified.

Mr. HARRISON. On that I demand the yeas and nays.

The yeas and nays were ordered.

Mr. NORRIS. Mr. President, if we are ready to vote on this question and Senators who have prepared some amendments do not care to offer them, I have some observations I want to make. Unless they offer their amendments before this vote is taken as between the Underwood amendment and the Norris substitute, their amendments will be out of order. I do not want to interfere with anybody's amendment.

Mr. WALSH of Montana. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Montana?

Mr. NORRIS. I am going to yield the floor if some one wants to offer an amendment.

Mr. WALSH of Montana. Some days ago I presented an amendment to the amendment offered by the Senator from Alabama. If my amendment to the amendment is now in order I move its adoption.

Mr. BRUCE. Mr. President—

The PRESIDING OFFICER (Mr. MOSES in the chair). Does the Senator from Montana yield to the Senator from Maryland?

Mr. WALSH of Montana. I yield for a question.

Mr. BRUCE. I would like to present some amendments to the Underwood substitute.

Mr. WALSH of Montana. I yield to the Senator for the purpose of presenting his amendments.

The PRESIDING OFFICER. The amendments submitted by the Senator from Maryland will be received and lie on the table. The Senator from Montana offers an amendment to the amendment proposed by the Senator from Alabama, which will be reported.

The READING CLERK. Strike out section 10 and in lieu thereof insert:

SEC. 10. That as a condition of any lease, entered into under the provisions of this act, every lessee hereunder which is a public-service corporation, or a person, association, or corporation developing, transmitting, or distributing power under the lessee either immediately or otherwise, for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State in which the service is rendered or the rate charged. That in case of the development, transmission, or distribution, or use in public service of power by any lessee hereunder or by its customer engaged in public service within a State which has not authorized and empowered a commission or other agency or agencies within said State to regulate and control the services to be rendered by such lessee or by its customer engaged in public service, or the rates and charges of payment therefor, or the amount or character of securities to be issued by any of said parties, it is agreed as a condition of such lease that jurisdiction is hereby conferred upon the commission created by the act of Congress approved June 10, 1920, upon complaint of any person aggrieved or upon its own initiative, to exercise such regulation and control until such time as the State shall have

provided a commission or other authority for such regulation and control: *Provided*, That the jurisdiction of the commission shall cease and determine as to each specific matter of regulation and control prescribed in this section as soon as the State shall have provided a commission or other authority for the regulation and control of that specific matter.

SEC. 11. That when said power or any part thereof shall enter into interstate or foreign commerce the rates charged and the service rendered by any such lessee, or by any subsidiary corporation, the stock of which is owned or controlled directly or indirectly by such lessee, or by any person, corporation, or association purchasing power from such lessee for sale and distribution or use in public service shall be reasonable, nondiscriminatory, and just to the customer and all unreasonable discriminatory and unjust rates or services are hereby prohibited and declared to be unlawful; and whenever any of the States directly concerned has not provided a commission or other authority to enforce the requirements of this section within such State or to regulate and control the amount and character of securities to be issued by any of such parties or such States are unable to agree through their properly constituted authorities on the services to be rendered or on the rates or charges of payment therefor, or on the amount or character of securities to be issued by any of said parties, jurisdiction is hereby conferred upon the said commission, upon complaint of any person aggrieved, upon the request of any State concerned, or upon its own initiative to enforce the provisions of this section, to regulate and control so much of the services rendered, and of the rates and charges of payment therefor as constitute interstate or foreign commerce and to regulate the issuance of securities by the parties included within this section, and securities issued by the lessee subject to such regulations shall be allowed only for the bona fide purpose of financing and conducting the business of such lessee.

The administration of the provisions of this section, so far as applicable, shall be according to the procedure and practice in fixing and regulating the rates, charges, and practices of railroad companies as provided for in the act to regulate commerce, approved February 4, 1887, as amended, and that the parties subject to such regulation shall have the same rights of hearing, defense, and review as said companies in such cases.

In any valuation hereunder for purposes of rate making no value shall be claimed or allowed for the rights granted by this act or under any lease executed thereunder.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Montana [Mr. WALSH] to the amendment. The Senator from Montana is recognized.

Mr. UNDERWOOD. I do not desire to interrupt the statement of the Senator from Montana, but I wish to ask him a question concerning his amendment, which I can do now, and he can answer when he makes his speech.

Mr. WALSH. I yield to the Senator from Alabama.

Mr. UNDERWOOD. Instead of proposing the Federal water-power amendment as it was proposed the other day in full the Senator from Montana has proposed a part of it. I wish to ask the Senator if I clearly understand his proposal. Under the first part of section 10, which I take it should be renumbered as it is placed in the bill, although that is not material, there is provided a regulation of intrastate commerce in electrical power until a State commission shall take over the matter.

Mr. WALSH of Montana. The Senator is quite right as to that.

Mr. UNDERWOOD. But after a State commission takes charge of the matter, then there is no further regulation, as I understand, under the Senator's proposal?

Mr. WALSH of Montana. That is the substance of section 10.

Mr. UNDERWOOD. Under section 11, which relates to interstate commerce, if I understand that correctly—and I ask the Senator for information, because I may be mistaken—when the electrical power passes the State line of Alabama, then it is subject to regulation by the Federal Government?

Mr. WALSH of Montana. Not unless the States which are concerned are themselves unable to agree on the regulation.

Mr. UNDERWOOD. Now, we may lessen the debate, because I have no objection to Federal regulation if a State itself will not provide regulation. My amendment now provides for State regulation. Will the Senator from Montana make that clear to me? If that shall be made clear, I shall have no objection to his amendment.

Mr. WALSH of Montana. Mr. President, that is the purport and substance of the amendment proposed. It will be recalled that this subject was considered, reconsidered, and thrashed out; that every aspect and phase of the matter was considered in connection with the general water-power legislation; and

after much debate and the expression of many conflicting opinions this was the consensus of the opinion of both Houses with respect to the matter of the regulation of the rates of the water-power companies. I can see no reason whatever for not applying exactly the same rules with respect to the sale of power from the Muscle Shoals property as obtains under the general water power act for the sale of power from properties subject to that act.

The amendment which I propose strikes out section 10 of the so-called Underwood substitute, which provides for State regulation, but contains exactly the same provision. I will read it for the information of the Senate. I will say that I have followed the very language of the water power act, except that it will be recalled that in the instrument evidencing the rights of the person with whom the Government deals in that case he is called the licensee, while in the pending bill he is called the lessee. The Underwood amendment refers to "said commission," and I insert instead of "said commission" the words "the commission created by the act of Congress approved June 10, 1920." Those are substantially the only changes in section 10, and are the only changes in section 11 except such as I shall hereafter state.

Mr. UNDERWOOD. Section 10 is very clear to me. Under it, if the State appoints a commission to operate, the matter will come under the State law; but section 11 is what I should like the Senator to make clear to me.

Mr. WALSH of Montana. If the Senator will pardon me, I will read section 10 of my amendment, so as to call attention to the authority therein given to the States to regulate, because the Senator from North Carolina [Mr. OVERMAN] felt some apprehension on that subject. Section 10 of my amendment reads as follows:

Sec. 10. That as a condition of any lease entered into under the provisions of this act every lessee hereunder which is a public-service corporation, or a person, association, or corporation developing, transmitting, or distributing power under the lessee either immediately or otherwise, for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State in which the service is rendered or the rate charged.

So that gives full power to the States. The amendment continues:

That in case of the development, transmission, or distribution, or use in public service of power by any lessee hereunder or by its customer engaged in public service within a State which has not authorized and empowered a commission or other agency or agencies within said State to regulate and control the services to be rendered by such lessee or by its customer engaged in public service, or the rates and charges of payment therefor, or the amount or character of securities to be issued by any of said parties, it is agreed as a condition of such lease that jurisdiction is hereby conferred upon the commission created by the act of Congress approved June 10, 1920, upon complaint of any person aggrieved or upon its own initiative, to exercise such regulation and control until such time as the State shall have provided a commission or other authority for such regulation and control.

I observe there is a typographical error in the printed amendment at that point. After the word "commission" the word should be "or" instead of "of," as printed in the amendment, so as to read "a commission or other authority for such regulation and control." The amendment continues:

Provided, That the jurisdiction of the commission shall cease and determine as to each specific matter of regulation and control prescribed in this section as soon as the State shall have provided a commission or other authority for the regulation and control of that specific matter.

That contemplates the regulation and control within a particular State.

Mr. UNDERWOOD. If the Senator will allow me, I will suggest that that section relates practically entirely and only to Alabama, as this plant is located in Alabama.

Mr. WALSH of Montana. I presume that is correct.

Mr. HARRISON. That would apply to my State, for instance, if the power were sold in that State, would it not, the same as it applies to Alabama when the power is sold in Alabama?

Mr. UNDERWOOD. I am not sure about that. That is the reason I have asked the question of the Senator from Montana.

Mr. WALSH of Montana. Now we will pass to the consideration of section 11.

Mr. UNDERWOOD. Section 11 undoubtedly would relate to Alabama, Georgia, Tennessee, and the surrounding States. Of course, Alabama has its commission, and section 10 means nothing so far as Alabama is concerned. Section 11 relates to the adjoining States. That is what I wanted the Senator to make clear.

Mr. WALSH of Montana. I am not so sure it does not relate to Alabama. I have here the Alabama statute which leaves us in some considerable doubt as to whether there is any power of regulation in the commission of the State of Alabama. However, that is a matter of no particular consequence.

Mr. UNDERWOOD. Of course, the Alabama commission is regulating it; but if it is not regulating it, it is within the power of the legislature to adopt a regulation. So that is not material.

Mr. WALSH of Montana. The Alabama statute contains the following provision:

Sec. 5. Limitations: None of the provisions of this act shall apply to the generation, transmission, or distribution of electricity, to the manufacture or distribution of gas, to the furnishing or distribution of water, or to the production, delivery, or furnishing of steam for heat or power by a producer who is not otherwise a utility, for the sole use of such producer, or for the use of tenants of such producer, nor shall they apply to any person not otherwise a utility who manufactures and supplies such products to a utility for its use or distribution without participation by such manufacturer in such use or distribution. * * *

Mr. UNDERWOOD. I will say to the Senator I understand that provision of the statute, and that relates to certain corporations, such as furnace companies and steel mills which supply their own businesses with power, light, and heat, but the public utilities that serve the public are regulated; so that is not material.

Mr. WALSH of Montana. Of course, if the producer of power does not sell it, it would not be under the regulatory power of the commission, because there would be nothing for it to regulate, but if it sells it—

Mr. NORRIS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Nebraska?

Mr. NORRIS. I will wait until the Senator finishes his sentence.

Mr. WALSH of Montana. If it regulates at all, it must, of course, regulate the rates under which the power is sold.

Mr. NORRIS. I am moved to interrupt the Senator by the statement he has just made. As I understand the Senator's amendment, it does not change the so-called Underwood substitute in any particular if the lessee utilizes all the power for his own use in any business in which he might be engaged?

Mr. WALSH of Montana. It does not touch that at all.

Mr. NORRIS. In other words, if Muscle Shoals were leased to some one and the lessee utilized all of the surplus power in his own individual business or the corporation in its own manufacturing business, the amendment of the Senator would not touch it any more than does the substitute which he seeks to amend.

Mr. WALSH of Montana. It would not. It was not intended to reach that.

Mr. NORRIS. I wanted to be sure. As I read it, I thought that was the result. But so as to make certain of the intention, suppose the lessee did lease it, let us say to a subsidiary company, and that subsidiary company used all the power in its own business, would the Senator's amendment have any effect in a case of that kind?

Mr. WALSH of Montana. I should think not.

Mr. NORRIS. It would not be material in that case what the rates charged were.

Mr. WALSH of Montana. That is quite right. The subsidiary company would merely figure that in as one of its fixed charges.

Mr. NORRIS. Yes.

Mr. WALSH of Montana. And would regulate the prices of its products accordingly.

Mr. NORRIS. If it were purely a subsidiary company, owned by the lessee, the subsidiary company would not care whether the rate was high or low.

Mr. WALSH of Montana. Not a bit.

Mr. NORRIS. It would be just taking it out of one pocket and putting it in the other.

Mr. WALSH of Montana. Exactly.

Mr. NORRIS. There is not any intention, on the part of the Senator, at least, in the amendment that he has offered to provide for any regulation whatever, either as to service or as to

the cost, if the lessee retains all of the power for his or its own individual use?

Mr. WALSH of Montana. No; this amendment is not intended to reach such a condition as that at all, but that is to be taken care of—

Mr. HARRISON. Mr. President—

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Mississippi?

Mr. WALSH of Montana. I will yield in just a moment. If it is to be taken care of at all, it is to be taken care of by some other provision. For myself I am unable to see how it can be taken care of except by regulating the price that may be charged for the product of the subsidiary company. I did not want to go into the question of regulating the prices of commodities that are produced by the power thus developed.

Mr. NORRIS. I do not care to lead the Senator to a phase of the case that his amendment does not apply to, and that he does not care to debate; but his own suggestion has led me rather to make another inquiry, if the Senator will permit me. Assuming that it is true, as has been claimed by Senators in the debate, that the lessee here would be getting a great amount of power for a good deal less than its real value—in other words, that this would be somewhat of a bonanza, a subsidy—does not the Senator think that there ought to be some power with somebody in official authority to regulate rates in that case? It would hardly be right, it seems to me, for the Government of the United States in effect to give a subsidy to a manufacturer in some particular business, giving him cheaper power than any of his competitors would get at a less rate than that power is worth, and thus result in giving such lessee a subsidy.

Mr. WALSH of Montana. I must say to the Senator that I have not given that matter sufficient study to feel justified in answering the Senator's question categorically. It would lead us into a very wide field. For instance, upon very modest terms, as you read the statute, the Government gives a piece of agricultural land to a man, and upon very modest terms it gives a piece of mineral land to a man—\$5 an acre for a quartz claim, and \$2.50 an acre for a placer-mining claim. Whether or not that would justify fixing the price of copper that might be extracted from the claim is a question upon which probably we would differ. Heretofore we have fixed the terms upon which the grantee or concessionaire gets the property of the United States, and we take the chances on the results.

Mr. NORRIS. I am moved to suggest to the Senator that in my humble opinion his illustration hardly explains away the importance of the question that I have asked him.

Mr. WALSH of Montana. I appreciate, of course, if the Senator will pardon me, that there is a great deal of difference between giving a man a piece of undeveloped land and giving him a property in which the Government has already invested \$130,000,000.

Mr. NORRIS. Oh, yes. There are thousands of placer mines; there is only one Muscle Shoals. A placer mine is wild and undeveloped; the lessee goes out and hunts it and develops it; but we have developed Muscle Shoals, and have invested hundreds of millions of the taxpayers' money in it.

Mr. WALSH of Montana. Yes; but it might be answered that although there is only one Muscle Shoals there are many other sources of power. The Keokuk Dam is only a short distance away.

Mr. NORRIS. There are many other sources of power, but there is no other that I know of that the Government now owns and in which it has invested so many millions of the taxpayers' money.

Mr. WALSH of Montana. I realize that difference.

Mr. HARRISON. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Mississippi?

Mr. WALSH of Montana. I yield to the Senator from Mississippi.

Mr. HARRISON. Does this amendment do anything more, and was it the intention of the author that it should do anything more, than to make the Federal water power act, so far as rates were concerned, apply to the particular situation there?

Mr. WALSH of Montana. That was my express purpose. I took out the provisions of the water power act which deal with the subject of rates.

Mr. HARRISON. And there is nothing in it except that, and that alone?

Mr. WALSH of Montana. That is all that I understand to be in it.

Mr. GEORGE. Mr. President—

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Georgia?

Mr. WALSH of Montana. I yield to the Senator from Georgia.

Mr. GEORGE. I have offered an amendment which provides that the surplus power—that is, all power not used for the manufacture of nitrates for explosives in war time, or of nitrates for commercial purposes in peace time—shall be sold for distribution. If that amendment should become a part of the bill, then the amendment which the Senator proposes would take charge of that electric energy or power when sold for distribution, would it not?

Mr. WALSH of Montana. Yes; I should say so. But, if the Senator will permit me, it seems to me that that matter was taken care of by a clause in section 5 which appears on page 5:

The lease shall also provide the terms and conditions under which the lessee may sell and dispose of the surplus electric power created at said plants.

Mr. GEORGE. I think so; but there is no condition that the surplus power shall be sold for distribution.

Mr. WALSH of Montana. No.

Mr. GEORGE. That is what I had in mind, and I think it is the situation that the Senator from Nebraska contemplated.

Mr. WALSH of Montana. The two would be entirely consistent.

Mr. UNDERWOOD. Mr. President, unless the Senator desires to proceed, I do not think I have any issue with him; and if the Senate would like to push the bill along, as I understand from the Senator that all there is in this proposal is to have the power of regulation by the Government in the event that the State does not regulate—

Mr. WALSH of Montana. That is section 10; and section 11 provides for regulation by the commission in interstate commerce if the States involved do not agree.

Mr. UNDERWOOD. My purpose in the bill—and I have an amendment in it—is to have State regulation. If a State is not willing to assume regulation, then I have no objection to Federal regulation; and, so far as I am concerned, I am willing to raise no objection to the amendment.

Mr. HARRIS and Mr. COPELAND addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Montana yield; and if so, to whom?

Mr. WALSH of Montana. I yield the floor, in view of the statement made by the Senator from Alabama.

Mr. HARRIS. Mr. President, I should like to ask the Senator from Montana a question. The other day I sent to the desk an amendment, which I will read, and I want to ask the Senator a question about it:

Nothing in this act shall prevent the surplus power not required under the terms of this act for the manufacture of nitrogen for fertilizer from being sold at a rate lower than that being charged by other companies, individuals, or corporations. In the distribution of this surplus power no discrimination shall be made in favor of any territory.

I wonder if the Senator's amendment will cover that. I should like to submit this case: Suppose we have a surplus power and are dependent upon the transmission lines of the power company near there, and they can sell only a small part of it, and they should say to us, "We do not want that power; we will sell our power." If we had reserved the right to sell at a lower rate than they did, they, of course, would sell our power rather than have us compete with them and put up our own lines.

Mr. WALSH of Montana. I will say to the Senator that I think these two amendments perhaps will harmonize, and yet I am not entirely satisfied that they will, for I dare say that the statutes of some States would prevent a power company from selling its power at a rate lower than the rate fixed by the utilities commission, because, as the Senator well knows, that is one method of driving a competitor out of business. So I am not sure that such an amendment as that would not be incompatible with the amendment giving to the State commission the power to regulate the rates.

Mr. HARRIS. What I was trying to prevent was putting ourselves under a State commission so that we would not be allowed to compete with other independent companies. I wanted the Government to be independent, if necessary, and sell at a lower rate than the other power companies, so that we will have so much more power than the others; and I think, in the matter of making the lease, that it would be a good thing to have that in it. I think it would help the Government to make the lease.

Mr. WALSH of Montana. I should think that if that were done, if the amendment offered by the Senator were adopted after the amendment offered by myself, his amendment would control, and it would give the corporation the right to sell its power at a rate below that fixed by the regulatory body; and to that extent it would militate against the policy of the State statute, which is that the rates should be fixed the same for all, so that one can not drive the other out of business.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Farrell, one of its clerks, announced that the House had passed the following-entitled joint resolution and concurrent resolution, in which it requested the concurrence of the Senate:

H. J. Res. 310. A joint resolution authorizing payment of salaries of the officers and employees of Congress for December, 1924, on the 20th day of that month; and

H. Con. Res. 35. A concurrent resolution providing for the printing of 25,000 copies of the proceedings on the occasion of the Woodrow Wilson memorial exercises.

HOUSE JOINT RESOLUTION REFERRED

The joint resolution (H. J. Res. 310) authorizing payment of salaries of the officers and employees of Congress for December, 1924, on the 20th day of that month, was read twice by its title and referred to the Committee on Appropriations.

CREDENTIALS

The PRESIDING OFFICER (Mr. Moses in the chair). If the Senator from Montana will permit the Chair, the Chair lays before the Senate the certificate of election of CHARLES L. McNARY, of Oregon, which, under the statute, will be read, printed in the Record, and ordered to be filed.

The credentials were read and ordered to be placed on file, as follows:

CERTIFICATE OF ELECTION

STATE OF OREGON,
EXECUTIVE DEPARTMENT.

To all to whom these presents shall come, greeting:

Know ye, that it appearing from the official canvass of the vote cast at the general election held within and for the State of Oregon on Tuesday, the 4th day of November, A. D. 1924, that CHARLES L. McNARY, of Marion County, State of Oregon, received the highest number of votes cast for the office of United States Senator in Congress at said general election:

Now therefore I, Walter M. Pierce, Governor of the State of Oregon, by virtue of the authority vested in me under the laws of the State of Oregon, do hereby grant this certificate of election and declare said CHARLES L. McNARY, of Marion County, State of Oregon, to be duly elected to the office of United States Senator in Congress of the State of Oregon for the term of six years.

In testimony whereof I have hereunto set my hand and caused the seal of the State of Oregon to be hereunto affixed.

Done at the capitol at Salem, Oreg., this 29th day of November, A. D. 1924.

[SEAL]

By the governor:

WALTER M. PIERCE, Governor.

SAM A. KOZER, Secretary of State.

Mr. KENDRICK presented a certificate of the Acting Governor of the State of Wyoming certifying to the election of F. E. WARREN as a Senator from that State for the term commencing on the 4th day of March, 1925, which was read and ordered to be filed, as follows:

CERTIFICATE OF ELECTION

THE STATE OF WYOMING,
EXECUTIVE DEPARTMENT.

Whereas, according to the official returns of a general election held in the State of Wyoming on the 4th day of November, A. D. 1924, regularly transmitted to the office of the secretary of state and duly canvassed by the State board of canvassers, it appears that F. E. WARREN was lawfully elected United States Senator of the State of Wyoming:

Therefore I, Frank E. Lucas, Acting Governor of the State of Wyoming, do hereby certify that F. E. WARREN is duly elected United States Senator of the State of Wyoming for the term of six years from the 4th day of March, A. D. 1925.

In witness whereof I have hereunto set my hand and caused the great seal of the State to be hereunto affixed. Given at Cheyenne, the capital, this 10th day of December, A. D. 1924, and of the independence of the United States the one hundred and forty-ninth.

[SEAL]

By the acting governor:

F. E. LUCAS.

F. E. LUCAS, Secretary of State.

THE ALASKA RAILROAD

The PRESIDING OFFICER laid before the Senate a report of the Secretary of the Interior, submitted, pursuant to law, relative to proceeds from the sale of surplus and obsolete material and equipment during the fiscal year ended June 30, 1924, in connection with the operation of railroads in the Territory of Alaska, which was referred to the Committee on Territories and Insular Possessions.

MEMORIAL ADDRESS ON WOODROW WILSON

The PRESIDING OFFICER. The Chair lays before the Senate a concurrent resolution from the House of Representatives, which will be read.

The concurrent resolution (H. Con. Res. 35) was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That there shall be compiled, printed with illustrations, and bound, as may be directed by the Joint Committee on Printing, 25,000 copies of the oration delivered by Dr. Edwin Anderson Alderman in the House of Representatives during the exercises held in memory of the late President Woodrow Wilson on December 15, 1924, including all the proceedings and the program of exercises, of which 8,000 copies shall be for the use of the Senate and 17,000 copies for the use of the House of Representatives.

Mr. SWANSON. I ask that the Senate agree to the concurrent resolution.

The concurrent resolution was considered by unanimous consent and agreed to.

PAY OF EMPLOYEES

Mr. WARREN. Mr. President—

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Wyoming?

Mr. WALSH of Montana. I yield to the Senator from Wyoming?

Mr. WARREN. From the Committee on Appropriations I report back favorably without amendment a joint resolution and ask unanimous consent for its present consideration.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. J. Res. 310) authorizing payment of salaries of the officers and employees of Congress for December, 1924, on the 20th day of that month, which was read, as follows:

Resolved, etc., That the Secretary of the Senate and the Clerk of the House of Representatives are authorized and directed to pay to the officers and employees of the Senate and House of Representatives, including the Capitol police, the legislative drafting service, and employees paid on vouchers under authority of resolutions, their respective salaries for the month of December, 1924, on the 20th day of that month.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17, on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. COPELAND. Mr. President—

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from New York?

Mr. WALSH of Montana. I yield to the Senator.

Mr. COPELAND. I would like to ask the Senator from Montana a question. In the laws of Alabama prescribing the authority and powers of the Alabama Public Service Corporation there is this limitation:

Sec. 5. Limitations: None of the provisions of this act shall apply to the generation, transmission, or distribution of electricity, to the manufacture or distribution of gas, to the furnishing or distribution of water, or to the production, delivery, or furnishing of steam for

heat or power by a producer who is not otherwise a utility, for the sole use of such producer or for the use of tenants of such producer, nor shall they apply to any person not otherwise a utility who manufactures and supplies such products to a utility for its use or distribution without participation by such manufacturer in such use or distribution.

Would the amendment submitted by the Senator from Montana give protection to the users of electricity or power developed under these circumstances?

Mr. WALSH of Montana. If there is any particular regulation not covered by the statute of the State of Alabama, that power of regulation would be in the water power commission under this amendment.

Mr. COPELAND. So, if there is any weakness here or any failure of protection by reason of this particular provision in the law, the amendment proposed by the Senator would afford such protection?

Mr. WALSH of Montana. That is my belief.

Mr. HEFLIN. Mr. President, I send to the desk a telegram addressed to me by the public utilities commission of my State and ask to have it read.

The PRESIDING OFFICER. Without objection, the Secretary will read the telegram.

The reading clerk read as follows:

MONTGOMERY, ALA., December 15, 1924.

Hon. J. THOMAS HEFLIN,

Congress Hall Hotel, Washington, D. C.:

Answering references in Senate to Alabama's public utility laws we submit our law is comprehensive and is effectively administered. The inferences and insinuations that this commission is not actively functioning in protection of the public interest are untrue, unfounded, and unjust. Sharp differences have arisen between this commission and the Alabama Power Co., and such differences have been settled upon commission's terms. Please read this telegram into the RECORD.

ALABAMA PUBLIC SERVICE COMMISSION,

By A. G. PATTERSON,

H. F. LEE,

F. P. MORGAN,

Members.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Montana [Mr. WALSH] to the substitute of the Senator from Alabama [Mr. UNDERWOOD].

Mr. WADSWORTH. Mr. President, I did not take part in the discussion which took place at the time an amendment very similar to this was before the Senate, offered by the Senator from Oregon [Mr. McNARY]. My recollection is that in general terms he proposed that the lessee should be regulated just about as is now proposed it shall be regulated under the amendment of the Senator from Montana.

Mr. UNDERWOOD. If the Senator will allow me, the Senator from Oregon proposed the insertion of the whole water power act.

Mr. WADSWORTH. When applicable.

Mr. UNDERWOOD. That carried with it the amortization of this dam, and this dam does not have to be amortized, because it belongs to the Government.

Mr. WADSWORTH. Therefore it would not apply.

Mr. UNDERWOOD. It might have applied, and that would have made an additional charge. Then there was another amendment, offered by the Senator from Tennessee [Mr. McKELLAR], which left out the part of the amendment which allows it to go to the States.

Mr. WADSWORTH. I am aware of that.

Mr. UNDERWOOD. I will say to the Senator from New York that I think the provision in the substitute authorizing State regulation is sufficient, but I do not care to contest what seems to me to be substantially the same thing.

Mr. WADSWORTH. Here is the difference, as I see it. I may be wrong; I must confess that I have never made a careful study of the Federal water power act. The amendment offered by the Senator from Montana would impose upon a lessee of the power, for example, at Muscle Shoals, the regulatory power of the Federal Government, or of the States, as the case may be, under the terms of the Federal water power act; but would not impose it upon the Government corporation which may be organized under the terms of the amendment of the Senator from Alabama.

I do not know what the pleasure of the Senate is in a matter of this sort, but as I read it now, if the amendment of the Senator from Alabama shall be adopted, and the Government later on shall establish a Government corporation, and operate the power plants, and distribute and sell electric power

through that corporation, there will be no regulation over it at all.

Mr. UNDERWOOD. The Senator means as it stands?

Mr. WADSWORTH. No; I am speaking now of the amendment of the Senator from Montana, which I understand the Senator from Alabama is about to accept.

Mr. UNDERWOOD. I will say to the Senator from New York that that proposition did not enter my mind.

Mr. WADSWORTH. The Senator's section 10 preserves regulatory power, as I read it, even over a Government corporation.

Mr. UNDERWOOD. It does, and I think that should be the case. I am in accord with the Senator.

Mr. WADSWORTH. Then we have quite a situation.

Mr. UNDERWOOD. I did not have that in mind, and I suppose the Senator from Montana desires that the power shall be regulated if the Government sells it.

Mr. WALSH of Montana. No; I had not thought of that for a moment. The idea of a State regulating the rates to be charged by a Government corporation seems to me so utterly contrary to fundamental principles that I did not imagine anyone ever thought that section 10 in its operation would be applicable to a Government corporation, notwithstanding its general language.

Mr. UNDERWOOD. Mr. President—

The PRESIDING OFFICER. The Senator from New York has the floor. To whom does he yield?

Mr. WADSWORTH. I yield to the Senator from Alabama for a question.

Mr. UNDERWOOD. I will say to the Senator that I agree with him. I think that in the sale of this power in the States, whether it is by the Government corporation or not—which is a corporation and not the Government—it should be subject to the same regulations as if the lessee had it.

Mr. WADSWORTH. Mr. President, I might emphasize the idea just expressed by the Senator from Alabama, and which I rose to express myself, by reminding the Senate of the state of affairs, which I think will be about like this: If the Government, through a corporation created by itself under the terms of the Underwood amendment, is to operate this entire project—that is, operate both the chemical industry side and the power distribution and sale side—I assume, and my assumption is based upon the testimony of a very large majority of the witnesses, the chemical industry side will have to be supported financially for several years to come, especially if they are going to produce 40,000 tons of nitrates every year, by the power and distribution side of the project. It is inevitable, unless we are going to have crazy men in charge of the Government's corporation, that the corporation will endeavor to make all the money it can out of power in order to finance and support the chemical industry side, and having some acquaintance with the representatives of the Government and with their habits of dominating a situation, I for one am not willing to trust a Government corporation in a situation of that kind.

I believe it is perfectly possible under a situation of that kind, if we are going to have Government operation—and, incidentally, I am opposed to that—to build up here a Frankenstein which can extend its arms across these States and do anything it wants just because it is the Government, or represents the Government in corporate form.

Original section 10 of the Underwood amendment reads as follows—

Mr. WALSH of Montana. Mr. President—

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Montana?

Mr. WADSWORTH. May I read this clause first?

The surplus power not required under the terms of this act for the manufacture of nitrogen or fertilizer, when sold or used, shall be subject to the laws, rules, and regulations relating to the sale and use of electric power in the several States in which said power is used.

If that is not the situation, we might add to that section words to the effect that it shall be subject to the laws of the United States and of the several States. But if we are going to put the Government into business it ought to conduct its business just as fairly and just as squarely in its relation to citizens as every private corporation is compelled to do.

Mr. WALSH of Montana. Mr. President, the Frankenstein metaphor is an interesting one. I understood that the peculiar characteristic of the real Frankenstein was that the creator was unable to destroy it, but this particular Frankenstein is a sort of a Frankenstein which the creator can destroy any time it sees fit to do so. It can regulate its prices

and its charges; it can direct its operations just exactly as it sees fit.

I do not think a Federal corporation engaged in an operation of this kind should be regulated by any State authority. The State authority might actually put it out of business by putting burdensome exactions upon its operation, those operations being involved in the national defense.

The Senator contemplates just exactly such a condition of things. He thinks that the chemical end of the thing will end in disaster under Government operation, or at least that the resources from the sale of power will have to be utilized for the purpose of holding up the chemical end of the enterprise; in other words, that we will have to rely upon the revenue we derive from the sale of power in order to keep going in the production of the fixed nitrogen for fertilizer in time of peace and for the production of explosives in time of war. In other words, he is going to let the Government, in the production of nitrogen for the national defense, be impeded and obstructed in its operations by State regulations concerning the disposition of power.

Mr. President, if that is the view which ought to be taken by the Senate, with which I do not concur at all, it will be very easy, when this amendment is adopted, for the Senator from New York to add a section to the effect that "the foregoing section shall also apply to the disposition of power by the Federal corporation provided for in the act."

Mr. WADSWORTH. May I ask the Senator his object in striking out section 10 instead of perfecting it in that way?

Mr. WALSH of Montana. As I have indicated, all there is in section 10 is the regulation by State authority of the sale and use of the power, and that is applicable only, of course, to the case of the disposition of the power by the lessee.

Mr. UNDERWOOD. Section 10 applies to the corporation.

Mr. WALSH of Montana. Section 10 by its terms applies to either the lessee or the corporation.

Mr. WADSWORTH. Yes, it does.

Mr. WALSH of Montana. I did not intend that it should apply to the Federal corporation. I think that is fundamentally wrong; but, of course, many may differ with me. But we may adopt this, making this regulation apply to the lessee, and then the sense of the Senate would be tested out by another amendment, which the Senator from New York apparently would like to have adopted, that these provisions shall also apply to the corporation the creation of which is provided for in the bill.

Mr. WADSWORTH. My suggestion was that section 10, as it now stands in the Underwood amendment, could be amended with the greatest simplicity by adding the words "Federal Government," or words to that effect, in next to the last line. Then the Federal laws as well as the State laws would apply to the regulation of any body, Government corporation or otherwise, that would sell power to the customers at Muscle Shoals.

Mr. REED of Missouri. Mr. President, it seems to me to be an undefendable position that the Government should spend a large amount of money to build public works for the purpose of manufacturing fertilizer or selling power, or both, and that the Government should then relinquish its right, while it is the owner of the property and operating it, to control the rates. That would be to say that the Federal Government can make all this expenditure and then, by adverse rulings of State authorities, it might be hampered in the development of its project.

Why do we have State boards to fix rates and regulate, and so forth? The basic thought is that here is a selfish private interest; that it comes into a position of more or less monopolistic control; and that therefore the only protection of the people is to have a Government agency fix the charges and rates. Accordingly, in the various States we have set up public commissions of different kinds for that purpose. But that is because the public is upon the one side and a selfish private interest upon the other side, and the selfish private interest has a more or less perfect monopoly, and hence is in a position to make exactions.

That is not the case here. I am speaking now of that situation which would arise if the Government should continue to operate the property. We propose to set up a public agency of our own, an arm, if you please, of the Federal Government itself, which in turn is controlled by the Congress, and yet we propose to say that we can not trust that public agency to do justice, and hence we will have it supervised by other public agencies appointed by the States. We would have two kinds of public control. That to my mind would be an anomaly and an absurdity. It is a direct challenge

by the Congress of the United States itself of its own discretion, its own authority, and its own wisdom.

Moreover, the natural effect would be to have the States constantly engaged in an interference with this public utility in an effort to reduce rates in their own States, and unlike the situation which arises where there is a private control and ownership constantly on the defensive, we would find the Federal Government probably not in a position to so well set forth and look after its rights as a private company would be. I think that is too clear for debate.

I want, however, to call the attention of the Senator from Montana to the amendment which he has proposed and to ask him whether or not it does not in the last analysis meet with the difficulty which I have just discussed. I am not certain that I am right. I am directing the Senator's attention to it. It proposes:

That as a condition of any lease, entered into under the provisions of this act, every lessee hereunder which is a public-service corporation, or a person, association, or corporation developing, transmitting, or distributing power under the lease either immediately or otherwise, for sale or use in public service, shall abide by such reasonable regulation of the services to be rendered to customers or consumers of power, and of rates and charges of payment therefor, as may from time to time be prescribed by any duly constituted agency of the State in which the service is rendered or the rate charged.

That is to say, if the Government owning this property seeks to lease the property, instead of naming in the lease the terms and conditions upon which the property is to be leased and reserving to the Federal Government, the owner, a regulatory right, we propose to transfer that right of regulation to the boards of the various States. In effect are we not committing the same error that we would in the instance I first discussed? In the first instance, we own the property, and we propose while owning and operating the property to permit an interference with the rates we fix by the public service commissions of the various States. In the second instance when we go to lease the property, instead of fixing the terms and conditions of control in the lease so that we reserve them to ourselves, we turn that power over to the public service commissions of the various States. So that when we make our lease the man or the company who signs it knows in advance that it will not be regulated by the Federal Government, but will be regulated by the various State boards or commissions, and accordingly it will bid less for the lease and give a less favorable lease than it would if it was subject to control by an arm of the Federal Government which would act upon all of its properties in the same manner.

I am not certain that I have made myself clear, but it seems to me there is little difference between the two propositions.

Mr. WALSH of Montana. Mr. President—

Mr. REED of Missouri. Will the Senator permit me to finish my statement so he may clearly understand my point?

It seems to me when the Federal Government embarked on this great undertaking it had in mind two things. One, of course, was the creation of a power that would make nitrates that could be used in time of war. The other was the hope that we would make some fertilizer to be used in time of peace. But no thoughtful man on this floor ever had the idea, in my judgment, that we were to make fertilizer unless that business could be made a success, or that we would make nitrates in time of war unless we could really develop some kind of plan that would in a practicable way make those nitrates. Accordingly it must have been in everybody's consideration that this great plant would be utilized for the benefit of the people of the United States.

We are confronted with that situation to-day. Talk as we please, and assert as much as may be asserted, there is no man who can say with any degree of positiveness that it is not possible that the effort to make fertilizer may be a great economic failure and utterly impracticable, and there is no man, I think, who can say with absolute certainty that we can manufacture nitrates at this plant, even for use in time of war, except at an enormous expense. I hope all the hopes of all the friends of fertilizer and of nitrates will be realized, but I think there are very few men here who would be willing to invest their own money in that kind of a venture upon the showing now made.

That being the case and those being the considerations, it seems to me it is the business of the United States to take this great plant, to put it under an efficient management, to use a reasonable amount of money in order to demonstrate the nitrate proposition. If it can be demonstrated so that it be-

comes an economic success, then the whole question is answered, because it will be continued on account of its profitable character.

If, upon the other hand, it should turn out to be a failure, of course this mighty water power ought to be employed for the benefit of the people of the country. It is our business to conserve it, to hold it within our own hands in one form or another. That might possibly be done by a lease. It might possibly be better done by a direct Government manipulation. But in either event, I say that the Federal Government ought to maintain a complete dominance and control. If it leases the property, it ought to retain the right to fix rates for this Congress or for some agency appointed by this Congress. I have no such faith in public service commissions as to make me willing to turn over to State boards the right to regulate rates either up or down in an enterprise owned by the public at large of the United States. I do not desire to criticize those boards, especially since a telegram came here couched in insulting language and challenging the truthfulness of Senators, a telegram that never should have been permitted to go into the Record, because it reflected upon a Senator.

Mr. McKELLAR. What was that? I was out at the time, apparently.

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Tennessee?

Mr. REED of Missouri. The Senator had better look at the telegram, and he can make up his mind better in that way.

Mr. McKELLAR. I was not aware it had been put in the Record. I thank the Senator for calling my attention to it. I will look it up now.

Mr. REED of Missouri. I have known public service commissions to make mistakes, grievous mistakes, both in establishing rates entirely too high and again in establishing rates entirely too low. When did it happen to the Congress of the United States, which represents all of the people of the United States and which is a mere trustee for the time being along with the President of the United States of this great governmental investment, that it became wise to turn any part of the control or management of that great property over to the agencies of the State? Nor does it make any difference in my judgment whether we control the property and manage it and operate it ourselves, or whether we do it through a lease, because I call attention to the fact that if we lease it, and make the lessee subject to the control of the States instead of retaining that control for ourselves, then the whole enterprise will suffer in the same way from any unjust interference on the part of the State authorities as it would if we still owned it. The Senator arose, but I wished to complete what I had to say in order that he might get my thought.

Mr. WALSH of Montana. Mr. President, there is no doubt of the resemblance between the two cases, but the distinction I think is clear enough. In the case supposed—that is, the case to which the amendment offered by me is addressed—the Government leases the property; a private corporation or a private individual takes it over. As disclosed by the inquiries addressed to me by the Senator from Nebraska [Mr. NORRIS], if such a corporation itself utilizes all of the power in industrial operations conducted by itself, the amendment does not affect the operation; but if that corporation itself becomes a public utility corporation, and itself engages in supplying the public generally with electricity, if it constructs transmission lines and itself acts as its distributing agency, or if it sells and disposes of its power to such a distributing agency, it then becomes subject to the regulatory power.

I did not want to introduce into this discussion the question, which was very spiritedly debated in connection with the Federal water power act, of Government regulation of rates and conditions of operation as contrasted with the State regulation. It will be remembered that when we had the water-power legislation under consideration there was no inconsiderable body which stoutly insisted that the power to fix the rates to be charged by any licensee under that act should be retained by the Federal Government, but the overwhelming sentiment of the Congress was that that would be unwise, and chiefly because, the city of Washington being distant some 3,000 miles from some sections of the country—it is 2,500 miles from my own locality—it would be difficult, if not impossible, to get speedy, inexpensive, and satisfactory hearings away down here in the city of Washington, but rather that these matters should be regulated locally. At that time the opinion was very general at least that investors would be very much more desirous of investing in such properties if the rates were subject to regulation only by the State authorities and not by Federal authority or agency here in the city of Washington.

So I do not apprehend, as the Senator suggests, that better terms could be secured from a lessee if in the disposition of the power to a subordinate that subordinate were subject to regulation by some authority here in Washington rather than by the State authority. As a practical proposition, I believe that better terms could be secured from the lessee if the power distributed by him through sublessees or otherwise should be subject to the regulation in the matter of the rates by the local authorities than by the Federal authorities; and I speak what I think was the general conviction at the time the water-power legislation was under consideration. I apprehend that if it were now proposed to make all of those rates, by whomsoever the power should be distributed, subject to regulation by Federal authority a very stout opposition would be aroused, and I did not want to renew that controversy.

Mr. President, the situation is not exactly the same, because, as heretofore indicated, we are not turning over to the lessee, if the property should be leased, simply an undeveloped power site as is the case under the water power act. We are turning over not only the site but we are turning over a plant on which the Government has already expended an enormous amount of money; but in principle it is exactly the same. The power site, however, in the case of many of the power sites which come under the jurisdiction of the Federal Government is a thing of very great value.

In some instances, perhaps, such sites have as great value as the money that will be required to be expended for their development which is furnished by the licensee, as he is designated under the water power act. So in principle the two are practically the same and present exactly the same problem, only the proportion which is put in by the Government is greater in this case than in the other. I apprehend that a very strenuous opposition would be aroused against the proposal to introduce into this measure a policy of having the rate controlled in the city of Washington here, while in the case of all other powers developed under the water power act the control rests in the local authorities.

Mr. BROUSSARD. Mr. President, will the Senator from Montana yield to me?

Mr. WALSH of Montana. I yield.

Mr. BROUSSARD. I should like to ask the Senator from Montana a question concerning his amendment. First, I call his attention to this language in his amendment—

and whenever any of the States directly concerned has not provided a commission or other authority to enforce the requirements of this section within such State or to regulate and control the amount and character of securities to be issued by any of such parties or such States are unable to agree through their properly constituted authorities on the services to be rendered or on the rates or charges of payment therefor, or on the amount or character of securities to be issued by any of said parties, jurisdiction is hereby conferred upon the said commission—

I understand that language to mean, I will say to the Senator from Montana, that if the State has no regulatory commission the Federal commission shall regulate.

Mr. WALSH of Montana. Yes.

Mr. BROUSSARD. If the State has such a commission, then the State would regulate within its jurisdiction; but here is a provision to the effect that if the "States are unable to agree through their properly constituted authorities on the services to be rendered, or on the rates or charges of payment therefor, or on the amount or character of securities to be issued by any of said parties, jurisdiction is hereby conferred upon the said commission." I wish to follow that up with what I understand to be the proviso governing all water-power plants under the Federal water power act. The last part of section 10 contains this proviso:

Provided, That the jurisdiction of the commission shall cease and determine as to each specific matter of regulation and control prescribed in this section as soon as the State shall have provided a commission or other authority for the regulation and control of that specific matter.

I do not understand that under the Federal water power act as to any plant which is relieved of the jurisdiction of a Federal commission any condition is imposed except that the State shall assume jurisdiction over the matter. There is nothing, so far as I am informed, under the Federal law which requires as an additional condition that the State within which it is doing business must agree with another State on the outside in order to relieve it of the jurisdiction of the commission. In other words, as I understand the meaning of the amendment, it places the Muscle Shoals plant in an entirely different class from all other plants carrying on the same line of business under the Federal laws, because, not—

withstanding that the State within which it is doing business has assumed control, and therefore the Federal commission shall have withdrawn its jurisdiction as to Muscle Shoals, there is an additional condition proposed to be imposed, namely, that the commission of the State of Alabama must agree with the commissions of the States adjoining it in order to deprive the Federal commission of jurisdiction. I do not know that I have made myself clear.

Mr. WALSH of Montana. I think so; but the Senator is confused because he has read the proviso in section 10 in connection with the provisions of section 11. The Senator is in error in thinking that there will be any distinction whatever between the operation under this language and the operation in the case of a property developed under the provisions of the water power act. Both sections 10 and 11 of the amendment are taken from the water power act. Exactly the condition to which the Senator adverts as occurring under this act occurs now under the water power act.

Mr. BROUSSARD. As I understand, I may say to the Senator from Montana, the water power act imposes the single condition that unless the State assumes jurisdiction over the matter the power of the Federal commission shall attach.

Mr. WALSH of Montana. Yes. Section 10 of this amendment is a reproduction of section 19 of the water power act; section 11 of the amendment is a reproduction of section 20 of the water power act.

Mr. BROUSSARD. Then the verbiage in section 11 of the Senator's amendment is the same as it is in the water power act?

Mr. WALSH of Montana. It is the same as that in section 20 of the water power act.

Mr. BROUSSARD. Requiring the authorities of the adjoining States to agree as to rates?

Mr. WALSH of Montana. Exactly.

Mr. BROUSSARD. That is what I desired to know.

Mr. WALSH of Montana. Yes, the two sections are taken from the water power act. I will also say for the further information of the Senator and those who are interested that section 10 of the amendment and section 19 of the water power act contemplate the case of the State in which the power is actually generated. Section 11 contemplates the case of the power being transmitted from that State to another State.

The Senator can very readily understand that there will then be a competition among the States into which the power is carried to get that power in order to induce industrial establishments to come within their States rather than within the adjacent States. This power is likely to be carried through three or four or five States. We will suppose that it is carried into the State of Tennessee and into the State of Kentucky. If Kentucky establishes a rate lower than the rate established in the State of Tennessee, the industrial plants will establish themselves along the border within the State of Kentucky, and accordingly there will be a competition among the regulatory commissions of the various States to reduce the rates in their particular States. In that situation of affairs it becomes necessary, as the Senator will see, to have some kind of uniformity in the rates through all the States which the power traverses; and if in those conditions the States are unable to agree upon the rates which should obtain, then the Federal commission interposes and fixes the rates. That is the condition to which section 11 of the amendment and section 20 of the water power act apply.

EXECUTIVE SESSION

Mr. CURTIS. Mr. President, it is not likely that we can reach a vote on the pending amendment to-night and, as a short executive session is desired, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 4 o'clock and 35 minutes p. m.) the Senate took a recess until to-morrow, Wednesday, December 17, 1924, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 16, 1924

COMPTROLLER OF THE CURRENCY

Joseph W. McIntosh, of Illinois, to be Comptroller of the Currency, in place of Hon. Henry M. Dawes, resigned.

COMMISSIONER OF IMMIGRATION

John B. McCandless, of Pennsylvania, to be commissioner of immigration at the port of Philadelphia, Pa.

UNITED STATES DISTRICT JUDGE

Charles A. Boynton, of Texas, to be United States district judge, western district of Texas, vice William R. Smith, deceased.

POSTMASTERS

FLORIDA

Harry W. Thurber to be postmaster at Lake Worth, Fla., in place of Rex Holley, removed.

GEORGIA

Thomas A. Bulloch to be postmaster at Ochlocknee, Ga., in place of E. A. Sills, deceased.

Edith A. Herrington to be postmaster at Millen, Ga., in place of G. G. Brinson. Incumbent's commission expired July 28, 1923.

Henry C. Hays to be postmaster at Mansfield, Ga., in place of H. C. Hays. Incumbent's commission expired June 4, 1924.

Walter L. Turner to be postmaster at Lagrange, Ga., in place of W. L. Turner. Incumbent's commission expired July 28, 1923.

Minnie Parker to be postmaster at Fairburn, Ga., in place of Paul Latimer. Incumbent's commission expired June 4, 1924.

George M. Greely to be postmaster at Decatur, Ga., in place of B. M. Shive, resigned.

John W. Moore to be postmaster at Crawford, Ga., in place of J. W. Moore. Incumbent's commission expired February 4, 1924.

Minnie E. Nance to be postmaster at Arlington, Ga., in place of W. J. Roberts. Incumbent's commission expired September 28, 1922.

ILLINOIS

Nicholas F. Stellen to be postmaster at McHenry, Ill., in place of T. J. Walsh. Incumbent's commission expired June 5, 1924.

MASSACHUSETTS

Andrew J. Maguire to be postmaster at Randolph, Mass., in place of W. L. Hickey. Incumbent's commission expired February 4, 1924.

MICHIGAN

Joseph D. Norris to be postmaster at Turner, Mich., in place of R. P. Eymmer, resigned.

Samuel Perkins to be postmaster at Norway, Mich., in place of J. C. Wickstrom. Incumbent's commission expired September 13, 1922.

NEBRASKA

J. Lyndon Thornton to be postmaster at Fairbury, Nebr., in place of Daniel Kavanaugh. Incumbent's commission expired June 4, 1924.

NEW JERSEY

Philip E. Rockafellow to be postmaster at Stockton, N. J., in place of P. E. Rockafellow. Incumbent's commission expired June 5, 1924.

WEST VIRGINIA

Jerome Akers to be postmaster at Kenova, W. Va., in place of G. A. Porter. Incumbent's commission expired June 5, 1924.

Lewis E. Winston to be postmaster at Ethel, W. Va., in place of J. M. Cress, resigned.

WISCONSIN

Eugene S. Tradewell to be postmaster at Antigo, Wis., in place of Edward Cody. Incumbent's commission expired August 29, 1923.

Frank C. O. Muenich to be postmaster at Argyle, Wis., in place of S. E. Nelson, declined.

Jay E. Lundmark to be postmaster at Balsam Lake, Wis., in place of H. W. Radcliff. Incumbent's commission expired March 22, 1924.

Minnie B. Dixon to be postmaster at Bristol, Wis., in place of M. B. Dixon. Office became third class July 1, 1922.

Andrew Crahen to be postmaster at Brooklyn, Wis., in place of Andrew Crahen. Incumbent's commission expired August 29, 1923.

Rudolph Zimmer to be postmaster at Hilbert, Wis., in place of Joseph Marx. Incumbent's commission expired June 5, 1924.

Otto J. Ahnert to be postmaster at Kewaunee, Wis., in place of M. J. Rice. Incumbent's commission expired August 29, 1923.

Frank Wachter to be postmaster at Melrose, Wis., in place of P. B. Bartlett. Incumbent's commission expired March 22, 1924.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 16, 1924

POSTMASTERS

ILLINOIS

William D. Garriss, Dowell.

NEW YORK

Leslie E. Daniels, Chaumont.
Edward J. Murphy, Forestport.
George C. Myer, Highland Falls.
Harmon A. Ranous, Minetto.

PENNSYLVANIA

Harold C. Fry, Camp Hill.
Alexander G. Dunlap, Delta.
Maxwell L. Byerly, Embreeville.
Thomas M. Brown, Glen Rock.
Jennie S. Curren, Gordon.
Ward P. Landis, Hummelstown.
Christian S. Clayton, Huntingdon Valley.
Ellen M. Brown, Kelson.
William W. Robertson, Mount Carmel.
Claude S. Yeager, Orwigsburg.
Bertha C. Eshleman, Pequea.
William K. Pearce, Rutledge.
Charles S. Mayhugh, South Mountain.
David L. Bly, Watstown.
Annie Smith, Waverly.
Norman H. Koch, Weatherly.
Boies M. Boyer, Weissport.

RHODE ISLAND

Alfred Lacaille, Anthony.
Charles D. Carlin, Conimicut.
Bertha M. Brayton, Hope.
William F. Caswell, Jamestown.
Louis G. Picard, Natick.
Harry A. Bartlett, North Scituate.
John A. Hazard, Warwick.

WEST VIRGINIA

Mary B. Carman, Bethany.
John V. Taft, Nutter Fort.
Roy C. Glick, Pemberton.
Benjamin F. McGinnis, Pennsboro.
Earle Reger, Weston.

HOUSE OF REPRESENTATIVES

TUESDAY, December 16, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father, who art in heaven, be not far away, for we would speak to Thee. Thou hast not forgotten us; having loved us, Thou wilt surely love us to the end. We thank Thee for this miracle of Thy mercy! Continue to create in us the noblest conceptions of life, character, and duty. Throughout our broad land give righteous truth power and victory. Keep us in the serene faith of its progress and destiny. In all things may we gain in knowledge, in wisdom, and in all other virtues that make good men and wise citizens of our Republic. In the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

SALARIES OF EMPLOYEES FOR DECEMBER, 1924

Mr. MADDEN. Mr. Speaker, I ask unanimous consent for the present consideration of House Joint Resolution 310, authorizing payment of salaries of the officers and employees of Congress for December, 1924, on the 20th day of that month, which I send to the desk and ask to have read.

The Clerk read as follows:

House joint resolution (H. J. Res. 310) authorizing payment of salaries of the officers and employees of Congress for December, 1924, on the 20th day of that month

Resolved, etc., That the Secretary of the Senate and the Clerk of the House of Representatives are authorized and directed to pay to the

officers and employees of the Senate and House of Representatives, including the Capitol police, the legislative drafting service, and employees paid on vouchers under authority of resolutions, their respective salaries for the month of December, 1924, on the 20th day of that month.

Mr. MADDEN. Mr. Speaker, this is the usual holiday resolution which provides for paying the employees of the legislative branch of the Government. If we do not pass it at this time, they will not be able to get their pay before the holidays begin.

The SPEAKER. Is there objection to the present consideration of the resolution.

There was no objection.

The SPEAKER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MADDEN, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, Mr. FENN was granted leave of absence for one week on account of important business.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate had disagreed to the amendment of the House of Representatives to the bill (S. 353) for the relief of Reuben R. Hunter, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. CAPPER, Mr. SPENCER, and Mr. BAYARD as the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3553. An act to authorize the settlement of the indebtedness of the Republic of Poland to the United States of America:

S. 3554. An act to authorize the settlement of the indebtedness of the Republic of Lithuania to the United States of America; and

S. J. Res. 152. Joint resolution to accept the gift of Elizabeth Sprague Coolidge for the construction of an auditorium in connection with the Library of Congress and to provide for the erection thereof.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6941) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that they this day had presented to the President of the United States for his approval the following bills:

H. R. 8687. An act to authorize alterations to certain naval vessels and to provide for the construction of additional vessels; and

H. R. 7052. An act for the relief of Geston P. Hunt.

DANIEL SHAW WILLIAMSON

The SPEAKER laid before the House the following message from the President of the United States, which was read and referred to the Committee on Foreign Affairs:

To the Congress of the United States:

I transmit herewith a report from the Secretary of State in relation to the claim presented by the British Government for indemnity on account of death of Daniel Shaw Williamson, a British subject, at East St. Louis, Ill., on July 1, 1921. I recommend that Congress authorize an appropriation and that an appropriation be made to effect a settlement of this claim in accordance with the recommendation of the Secretary of State.

CALVIN COOLIDGE.

THE WHITE HOUSE,

Washington, December 13, 1924.

REPORT OF GOVERNOR GENERAL OF THE PHILIPPINE ISLANDS (H. DOC. NO. 485)

The SPEAKER also laid before the House the following message from the President of the United States, which was read and, with the accompanying documents, referred to the Committee on Insular Affairs and ordered printed:

To the Congress of the United States:

As required by section 21 of the act of Congress approved August 29, 1916 (39 Stat. 545), entitled "An act to declare

the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands." I transmit herewith, for the information of the Congress, the Report of the Governor General of the Philippine Islands, including the reports of the heads of the departments of the Philippine Government, for the fiscal year ended December 31, 1923.

I concur in the recommendation of the Secretary of War that this report be printed as a congressional document.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 13, 1924.

PERRY'S VICTORY MEMORIAL COMMISSION

The SPEAKER also laid before the House the following message from the President of the United States, which was read and referred to the Committee on Military Affairs:

To the Congress of the United States:

I transmit herewith the Fifth Annual Report of the Perry's Victory Memorial Commission, dated December 1, 1924, which was submitted to the Secretary of the Interior, pursuant to section 5 of the act entitled "An act creating a commission for the maintenance, control, care, etc., of the Perry's Victory Memorial on Put in Bay Island, Lake Erie, Ohio, and for other purposes," approved March 3, 1919 (40 Stat. 1322-1324).

CALVIN COOLIDGE.

THE WHITE HOUSE, December 13, 1924.

INDEBTEDNESS OF THE REPUBLIC OF POLAND

Mr. CRISP. Mr. Speaker, by direction of the Committee on Ways and Means, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 10651, which is a bill approving the settlement of the indebtedness of Poland to the United States. Pending that I ask unanimous consent that the Senate bill (S. 3553) upon the same subject, which has just passed the Senate and has been messaged over to the House, be considered in lieu of the House bill, that the bill be considered in Committee of the Whole, and that there be one hour of general debate, 30 minutes to be controlled by myself and 30 minutes to be controlled by the chairman of the committee, the gentleman from Iowa [Mr. GREEN].

Mr. HAWLEY. Mr. Speaker, will the gentleman yield?

Mr. CRISP. Yes.

Mr. HAWLEY. Is the Senate bill identical with the House bill?

Mr. CRISP. The only difference is that in the House bill the Committee on Ways and Means amended the bill as drafted by the Treasury Department by naming by number the executive document which contains the report of the President, and the report of the commission thus identifying the executive document and making it a part of the bill. The Senate bill which has been passed is exactly the bill as drafted by the Treasury Department, and it is identical with the bills this Congress has heretofore passed approving the settlement of the indebtedness with England, with Finland, and with Hungary.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the Senate bill be substituted for the House bill.

Is there objection?

Mr. GARNER of Texas. Mr. Speaker, I reserve the right to object, and ask the Speaker this question: If we give unanimous consent to consider the Senate bill in lieu of the House bill, would I waive the right to make the point of order because the bill originated in the Senate? I want to call the attention of the Chair to the provisions of this bill, and the point of order is that if the Senate bill is to be considered, that the Senate did not have authority under the Constitution to originate it.

The SPEAKER. The Chair is inclined to think that the gentleman would waive the point of order if he granted unanimous consent.

Mr. GARNER of Texas. I do not want to interfere with the passage of this legislation, but I am anxious to have the Speaker pass on the question as to whether or not the Senate had the right to originate this legislation. I think I can point out to the Chair conclusively that this is revenue legislation, that it changes the amount to be received by the Government and the policy of the Government from what the present law provides. I merely have to say to the Speaker that he refers these bills to the Committee on Ways and Means, realizing that they are revenue bills. This proposition changes the basis of settlement from what is now due the Government under the law to what this contract provides. I do not think the Senate

had a right to originate the legislation under the Constitution. I am advised by the gentleman from Georgia [Mr. CRISP] that section 7, Article I, of the Constitution provides that all revenue bills must originate in the House of Representatives, and this is undoubtedly a revenue measure. One reason I call attention to this is that my attention has been called to a little error that was made in the last day of the last session of Congress, which is very unfortunate but for which probably no one is particularly to blame. A revenue bill did originate in the Senate, was passed by the Senate, sent to the House of Representatives, and was passed by the House of Representatives without its ever having been referred to a committee even. So far as I can, I must assert the constitutional right of this body to consider first all questions pertaining to the revenue of the Government; and if it is necessary to object, unless I can get a ruling of the Speaker otherwise, I shall be compelled to object to the request of the gentleman from Georgia.

Mr. GARRETT of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. GARNER of Texas. Yes.

Mr. GARRETT of Tennessee. If the gentleman will permit, I think it involves a question much more serious than merely the question of pride that might exist. If I am correct in my recollection, just a few years ago the Supreme Court of the United States held unconstitutional an act because it did originate in the Senate, being in the nature of a revenue act. If this be in violation of the Constitution, it might get into the courts and be a matter of grave trouble. I think the gentleman from Texas acts wisely in objecting to the request.

Mr. GREEN. Mr. Speaker, if the gentleman will permit, I think I can suggest a way of disposing of this matter. I think this point of order, Mr. Speaker, is too important and serious to be decided at this time, and I realize how important the principle is that the gentleman from Texas has in mind, and therefore I am going to ask my friend from Georgia to withdraw his request that the Senate bill be substituted for the House bill, and let us proceed with the House bill to which I presume there will be no objection.

Mr. CRISP. Of course, I heartily acquiesce in the suggestion of the chairman of my committee. I appreciate the majority trusted me with the handling of the matter, and therefore I ask unanimous consent that the House bill be considered in the House as in Committee of the Whole House on the state of the Union, and that there shall be one hour general debate, 30 minutes to be controlled by myself and 30 minutes by the chairman of the Ways and Means Committee.

Mr. GARNER of Texas. If I may have the permission of the gentleman from Georgia, there are a number of countries that have to be dealt with in these settlements. This is the fifth, I believe. There were some, I do not recall the number now, that we deal with as a whole. Now, this is a very important matter and it will arise in the future in the same way it has arisen now if the Senate undertakes to make these settlements. I wish the Chair would find it convenient to examine into the question thoroughly and render an opinion, if need be, so the Senate may be informed as to the opinion of the Presiding Officer of the House or as speaking for the House itself in the premises.

Mr. GREEN. Whatever time is yielded to me I expect to yield to the distinguished gentleman from Ohio [Mr. BURTON]; as far as I know, no one else on this side wants any time for general debate. How much time does the gentleman from Ohio desire?

Mr. BURTON. Not more than 15 minutes. But possibly questions or something might make it necessary for me to occupy more time.

The SPEAKER. The gentleman from Georgia asks unanimous consent that this bill be considered in the House as in Committee of the Whole House on the state of the Union and that there shall be not exceeding an hour's debate, half to be controlled by himself and half by the gentleman from Iowa. Is there objection?

Mr. BLANTON. Reserving the right to object, in order to ask a question, I want to ask the distinguished gentleman from Georgia if this settlement is within the authorization made by the Congress?

Mr. CRISP. The settlement, of course—yes; it is within the authorization of the Congress.

Mr. BLANTON. Does it go beyond it?

Mr. CRISP. No; it does not. Congress authorized the commission to enter into negotiations and make a settlement to be submitted for approval to the Congress, and that is what this bill now seeks, to have the congressional approval of the settlement. And I will say to the gentleman that the substance of both of these settlements of Poland and Lith-

naia are based on the settlement with Great Britain, and I do not think there is any substantial change.

Mr. BLANTON. And does not enlarge its terms at all or make—

Mr. CRISP. Only as to Poland by giving Poland the right to pay a definite sum for five years instead of paying the full amount, the rate of interest on her bonds being the same.

The SPEAKER. Is there objection to the request of the gentleman from Georgia? [After a pause.] The Chair hears none. As to the comment made by the gentleman from Texas [Mr. GARNER] the Chair will be glad to give the subject his attention. The Chair also thinks it is fair to the House that the Chair should state that the bill to which the gentleman refers, which passed the last day of the last session, was brought to the attention of the Chair, and the Chair regrets to state that he thinks that was a bill that was clearly beyond the jurisdiction of the Senate. It came up in the last hurried hours of the session. It was brought to the attention of the Chair and the attention of several Members of the House, but in the haste of the moment no one thought of questioning that it should originate in the House and it unfortunately passed and it was signed by the President, or otherwise the Chair would have ruled.

Mr. GARNER of Texas. I am satisfied it was an oversight, but I am anxious in the presentation of legislation for these settlements with the Nation that this House should advise the Senate as to our views as to the constitutionality of the method pursued in the passage of these bills.

Mr. CRISP. Mr. Speaker, may I suggest to the Speaker one thing? I am sure he already knows it, but in considering them it should be remembered that these bills are supposed to settle the indebtedness that the Government now has, drawing 5 per cent interest, I think. They are now past due. The bill reduces the rate of interest from 5 per cent to 3 and 3½ per cent.

PRINTING THE MEMORIAL ADDRESS ON LATE PRESIDENT WOODROW WILSON

Mr. GARRETT of Tennessee. Mr. Speaker, will the gentleman yield before the bill is taken up?

Mr. CRISP. Yes.

Mr. GARRETT of Tennessee. I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Tennessee asks unanimous consent for the present consideration of the resolution, which the Clerk will report.

The Clerk read as follows:

House Concurrent Resolution 35

Resolved by the House of Representatives (the Senate concurring), That there shall be compiled, printed with illustrations, and bound, as may be directed by the Joint Committee on Printing, 25,000 copies of the oration delivered by Dr. Edwin Anderson Alderman in the House of Representatives during the exercises held in memory of the late President Woodrow Wilson on December 15, 1924, including all the proceedings and the program of exercises, of which 8,000 copies shall be for the use of the Senate and 17,000 copies for the use of the House of Representatives.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

INDEBTEDNESS OF THE REPUBLIC OF POLAND

The SPEAKER. The gentleman from Georgia [Mr. CRISP] is recognized for 20 minutes.

Mr. CRISP. Mr. Speaker, the bill has not yet been read.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 10651) to authorize the settlement of the indebtedness of the Republic of Poland to the United States of America, and for other purposes

Be it enacted, etc., That the settlement of the indebtedness of the Republic of Poland to the United States of America made by the World War Foreign Debt Commission and approved by the President upon the terms and conditions as set forth in Senate Document No. 169, Sixty-eighth Congress, second session, is hereby approved in general terms as follows:

The amount of the indebtedness to be funded, after allowing for cash payments made by Poland, is \$178,560,000, which has been computed as follows: Principal amount of obligations to be funded, \$159,066,972.39; interest accrued and unpaid thereon to December 15,

1922, at the rate of 4¼ per cent per annum, \$18,898,053.60; total principal and interest accrued and unpaid as of December 15, 1922, \$178,565,025.99; paid in cash by Poland November 14, 1924, \$5,025.99; total indebtedness to be funded into bonds, \$178,560,000.

The principal of the bonds shall be paid in annual installments on December 15 of each year up to and including December 15, 1984, on a fixed schedule, subject to the right of the Government of the Republic of Poland to make such payments in three-year periods. The amount of the first year's installment shall be \$560,000, the annual installments to increase until the sixty-second year the amount of the final installment will be \$9,000,000, the aggregate installments being equal to the total principal of the indebtedness to be funded into bonds.

The Government of the Republic of Poland shall have the right to pay off additional amounts of the principal of the bonds on any interest date upon 90 days' advance notice.

Interest on the bonds shall be payable semiannually on December 15 and June 15 of each year at the rate of 3 per cent per annum from December 15, 1922, to December 15, 1932, and thereafter at the rate of 3½ per cent per annum until final payment.

The Government of the Republic of Poland shall have the option with reference to payments on account of principal and interest falling due on or before December 15, 1929, under the terms of the agreement, to make the following payments on the dates specified:

June 15, 1925, \$500,000; December 15, 1925, \$500,000; June 15, 1926, \$750,000; December 15, 1926, \$750,000; June 15, 1927, \$1,000,000; December 15, 1927, \$1,000,000; June 15, 1928, \$1,250,000; December 15, 1928, \$1,250,000; June 15, 1929, \$1,500,000; December 15, 1929, \$1,500,000; total, \$10,000,000, and to pay the balance, including interest on all overdue payments at the rate of 3 per cent per annum, in bonds of Poland, dated December 15, 1929, bearing interest at the rate of 3 per cent per annum from December 15, 1929, to December 15, 1932, and thereafter at the rate of 3½ per cent per annum, such bonds to mature serially on December 15 of each year up to and including December 15, 1984, substantially in the same manner and to be substantially the same in other respects as the bonds of Poland received at the time of the funding of the indebtedness.

Any payment of interest or of principal may be made, at the option of the Government of the Republic of Poland, in any United States Government obligations issued after April 6, 1917, such obligations to be taken at par and accrued interest.

Mr. CRISP. Mr. Speaker and gentlemen of the House, I am very glad to present to you for your approval a bill authorizing a settlement made by the Foreign Debt Funding Commission with the Republic of Poland, which settlement has been sanctioned by the President of the United States and which you are now asked to ratify. I may say that there will follow this bill one approving a funding of the indebtedness of Lithuania to the United States.

I know you are impatient for the settlement of all of these foreign debts, and I may say to you that each member of the World War Foreign Debt Commission is also anxious for all of them to be funded. I know I am.

The Foreign Debt Commission, gentlemen, has many almost insurmountable barriers to overcome. This foreign indebtedness is not such a case as one where one citizen or one corporation is indebted to another, and if the debtor does not pay the creditor can go into court and get a judgment and recover his money. There are only two ways by which a foreign debt can be settled; one is by voluntary payment, and the other by arbitrament of arms; and no sane man or woman in the United States wants this Government to pursue the latter course. To me it is unthinkable. Therefore the only way your commission can act in these matters is through diplomatic channels, presenting to the foreign nations the fact that this Government is anxious for the settlement of their indebtedness; and I assure you this has been done and is being done by the Foreign Debt Funding Commission.

Now, as a member of that commission it would be improper for me to go into details as to what occurred in the executive sessions of the commission. But I do feel that when any settlement has been made and you are called upon to act upon it you, as Members of Congress, representing the taxpayers of the Nation, are entitled to full knowledge of all the facts that led the commission to recommend the settlement. I assure you, as long as I am on the commission, I shall frankly and freely tell you, my colleagues, of anything that has transpired and that I think is pertinent to the question of whether or not you will vote to ratify any settlement made by the commission. I do not believe protracted or acrimonious discussion relative to our foreign indebtedness is for the best interests of the country. I do not believe it is conducive to the maintenance of cordial, friendly relations between this country and

our European debtors. Therefore I shall not myself engage in any lengthy discussion of it.

I do want to say to you, notwithstanding what you may have read in the press, that France has made no concrete, definite proposition to this Government relative to funding her indebtedness. I have been a member of the commission for two years and during that period no representative of the French Government has appeared before the commission. A few weeks ago the French ambassador had several conversations with Secretary Mellon, who is the chairman of the World War Debt Commission, and Secretary Mellon very courteously called a meeting of the debt commission and apprised us of the substance of those conferences. I do not consider I am at liberty to go into the details as to what transpired, but I can say to you that the French ambassador merely sought to ascertain how the commission would view certain proposals. There was no definite proposition made, no suggestion made for the funding of the indebtedness of France to the United States that for a moment would be accepted by this country. The suggestions were of such a nature that they did not meet with the approval of the Debt Funding Commission, and certainly did not meet with mine, so that there is nothing definite pending as to the settlement of the French indebtedness with the United States.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. CRISP. I yield this time, and then I will ask gentlemen to let me first make my statement. Then I will answer questions.

Mr. BLANTON. Does the gentleman from Georgia know whether the French ambassador was specially authorized by his Government to make any overtures of any kind?

Mr. CRISP. Of course, I assume that he was or he would not have conferred with the Secretary of the Treasury.

Concluding my statement, I may say to you that the Debt Funding Commission is earnestly hoping that France will almost immediately, if not instantaneously, through her duly authorized representatives, make to the Debt Funding Commission a definite proposition for the settlement of the French indebtedness, for the Debt Funding Commission is most anxious to have the French indebtedness funded.

Now, a good deal has been said in the newspapers as to the actions and discussions in England relative to the statement that was broadcast to the effect that France was making a proposition to settle her indebtedness to the United States. Now, gentlemen, I want to say to you that I have respect and admiration for His Britannic Majesty's Government. The English Government has always observed all of its obligations and agreements, whether those agreements were by treaty to aid an ally in defense against an unjust war or whether it was to pay her financial obligations. Great Britain is our largest creditor. Right after the armistice, or within a reasonable time thereafter, Great Britain entered into negotiations with this Government to fund her indebtedness.

Negotiations were concluded, and the present Premier of England, Mr. Baldwin, as Chancellor of the Exchequer, conducted the negotiations for Great Britain, and England has met every payment under the terms of that agreement. [Applause.] She was the first nation, being our greatest debtor, to fund her indebtedness. I think she is entitled to our highest respect and admiration.

I may say in passing that Great Britain to-day pays the highest taxes of any nation on earth. Great Britain will keep her covenant and pay every cent she owes the United States.

Now, it is perfectly natural that Great Britain should desire to have France settle with her, and Great Britain is doing exactly as you or I would do if we had a debtor who was proposing to settle with some of his creditors—you and I would want to take steps to see that our indebtedness was also paid. Many people have been put into the bankruptcy court for trying to give preference to some creditors over others.

Now England is in no wise interfering or attempting to interfere with any settlement this country may make with France. She has no right to do it, and I, in common with all the citizens of the United States, would resent such an unjustifiable interference with us in the conduct of our own affairs. England simply wants to have her own indebtedness also settled, and I don't think she is censurable in the least for pursuing that course. It is the duty of every government to protect its own interests and to look after the welfare of its own citizens, and this alone I conceive to be England's object.

I believe a just, honorable, and fair basis for the settlement of all our foreign indebtedness is the English settlement, and I do not see how our debtors can ask for or expect more liberal terms. [Applause.] The Congress of the United States has approved that basis of settlement; the country has acquiesced

in it, and it is honorable and generous on our part. We hold the notes of these debtor nations for the principal due, with 5 per cent interest, and all of the obligations are long since past due. We all know the nations can not pay those colossal sums at once, so the generous Government of the United States has agreed to fund them over a period of 62 years and has reduced the rate of interest from 5 to 3 and 3½ per cent, and I do not see how any of our foreign debtors could ask more liberal terms. And speaking to you, my colleagues, I say to you I will not, either as a member of the Debt Commission or as a Member of this House, vote to settle the indebtedness of any of these other countries in any way which will substantially vary from the basic settlement made with Great Britain. [Applause.]

Now I am going to discuss, so as to try to save time, the bill now before the House and also the one which will follow, approving the settlement of the indebtedness of Lithuania. The settlement with Lithuania is on all fours with the settlement made with Great Britain, so there is not much to be said about it.

The bill you are now called upon to consider, settling the indebtedness of Poland, is substantially the same; it in no material way varies and does not lose the United States one cent over what it is receiving under the British settlement. The only difference is that for the first five years Poland is required to pay only \$10,000,000 in cash. Under the terms of the agreement the remainder of principal and interest due during those five years in excess of \$10,000,000 can be paid in bonds of Poland. Poland is a new Republic and weak financially. Since the armistice she has been engaged in war; Poland's economic condition is bad, her revenue does not meet her expenditures, and she is a young, struggling Republic. Therefore the commission agreed to recommend to you that for the first five years she pay \$10,000,000 and give her bonds for the remaining part of the principal and interest due for those five years, those bonds to draw the same rate of interest as the original bonds, to wit, 3 and 3½ per cent. The only deviation from the British settlement is for the first five years. She pays \$10,000,000 in cash and then gives her bonds for the remainder which would be due the United States within those five years, and the bonds draw the same rate of interest as the original bonds held by our Government. Therefore there is no variation from the British settlement in principle, in substance, in results, or in the amount of money to be collected and received. They are only allowed a little longer time, and the deferred payments draw interest. Now, that is the only difference or variation between the settlements made with Great Britain and Poland, and, in fact, that is no variation or deviation.

Under the terms of this bill the amount to be funded is \$178,560,000. The amount of the principal due to the date of funding, December 15, 1922, is \$159,666,972.39, and on that principal interest is computed at 4½ per cent up to the date of funding, the amount of interest due at the date of funding being \$18,898,053. On November 4 Poland paid \$5,025,99, which leaves the amount of principal and interest to the date of funding, December 15, 1922, \$178,560,000. Poland is to give her bonds for this sum. The debt is amortized to cover 62 years, and this is the way the debt of Great Britain was amortized. For the first 10 years they are to pay 3 per cent interest, and during the remaining time they are to pay 3½ per cent interest, just as the English settlement provided. The indebtedness is to be paid in gold coin of the present weight and fineness, or it can be liquidated by the surrender to this Government of any of the United States bonds issued after April 6, 1917, the Government accepting its own bonds at par and accrued interest. Surely no one can object to that, for the bond and obligation of the United States is worth 100 cents on the dollar anywhere in the world. [Applause.] For the first three years half of the amount due can be funded for one year, the postponed payment to draw interest.

The United States has been officially advised by the Republic of Poland that the President and ministers of Poland have ratified this settlement, so the only thing necessary to make it conclusive is congressional action ratifying it. It is important that such action be taken at once, for the minister of Poland at Washington, who represents his Government, is duly authorized by it to execute bonds in behalf of Poland provided the matter is closed before the 1st of January, 1925. His authority to act for his Government in the premises ceases then, and unless the matter is disposed of before that date a delay will be necessary for the Polish ambassador to receive additional authority from his Government to act.

Now, gentlemen, I think that covers the whole situation. The Lithuanian bill is exactly as the British bill. The only

difference in the Polish agreement is as to the deferred payments, and I am sure you will agree that it is no deviation in substance from that of Great Britain. I believe, all things considered, you will be glad to give your approval to this settlement, and I hope as each one of these debts is settled it will be notice to all the other debtors of the United States of America that America expects them to keep their honest and legal obligations; that they should take steps to at once fund their indebtedness to the United States and begin payments on the same, so that the United States Government can reduce the

taxes of its already overburdened taxpayers who are being taxed to pay the interest on United States bonds sold to raise the money loaned to our debtors. [Applause.]

At the suggestion of my colleague on the Debt Funding Commission, Senator BURTON, of Ohio, I am attaching hereto, under the leave granted me to extend my remarks, a statement showing in detail the amounts owing to the United States by the foreign governments. Also, attached is a copy of the agreement made by the Foreign Debt Funding Commission with the Republic of Poland:

Obligations of foreign governments held by the United States Treasury, together with interest accrued and remaining unpaid thereon, as of the last interest period prior to or ending with November 15, 1923

Country	Obligations representing cash advanced under Liberty bond acts		Obligations received from the Secretary of War and the Secretary of the Navy on account of sales of surplus war material (act of July 9, 1918)		Obligations received from the American Relief Administration on account of relief supplies furnished (act of Feb. 25, 1919)

¹ No interest due on Nicaraguan notes until maturity, as is also the case of certain Belgian obligations aggregating \$2,284,151.40.

² Interest has been paid as it became due.

³ Agreement providing for refunding of these obligations as to both principal and interest executed, subject to approval of Congress, on May 1, 1923. Bonds of Finland amounting to \$9,000,000 will be delivered to the Treasury in exchange for the obligations now held if the agreement is approved.

⁴ Refunding bonds received under terms of agreement concluded pursuant to the act of Congress approved Feb. 9, 1922, as amended by act of Congress approved Feb. 28, 1923.

AGREEMENT MADE THE 14TH DAY OF NOVEMBER, 1924, AT THE CITY OF WASHINGTON, DISTRICT OF COLUMBIA, BETWEEN THE GOVERNMENT OF THE REPUBLIC OF POLAND, HEREINAFTER CALLED POLAND, PARTY OF THE FIRST PART, AND THE GOVERNMENT OF THE UNITED STATES OF AMERICA, HEREINAFTER CALLED THE UNITED STATES, PARTY OF THE SECOND PART.

Whereas Poland is indebted to the United States as of December 15, 1922, upon obligations in the aggregate principal amount of \$159,666,972.39, together with interest accrued and unpaid thereon; and

Whereas Poland desires to fund said indebtedness to the United States, both principal and interest, through the issue of bonds to the United States, and the United States is prepared to accept bonds from Poland upon the terms and conditions hereinafter set forth:

Now, therefore, in consideration of the premises and of the mutual covenants herein contained, it is agreed as follows:

1. Amount of indebtedness: The amount of the indebtedness to be funded, after allowing for cash payments made or to be made by Poland, is \$178,560,000, which has been computed as follows:

Principal amount of obligations to be funded.....	\$159,666,972.39
Interest accrued and unpaid thereon to December 15, 1922, at the rate of 4½ per cent per annum....	18,898,027.60
Total principal and interest accrued and unpaid as of December 15, 1922.....	178,565,000.00
To be paid in cash by Poland November 14, 1924.....	5,025.00

Total indebtedness to be funded into bonds..... 178,560,000.00

2. Repayment of principal: In order to provide for the repayment of the indebtedness thus to be funded, Poland will issue to the United States at par, as of December 15, 1922, bonds of Poland in the aggregate principal amount of \$178,560,000, dated December 15, 1922, and maturing serially on each December 15 in the succeeding years for

62 years, in the amounts and on the several dates fixed in the following schedule:

December 15—

1923	\$560,000
1924	925,000
1925	950,000
1926	975,000
1927	1,000,000
1928	1,025,000
1929	1,050,000
1930	1,075,000
1931	1,100,000
1932	1,125,000
1933	1,150,000
1934	1,200,000
1935	1,225,000
1936	1,250,000
1937	1,275,000
1938	1,300,000
1939	1,325,000
1940	1,350,000
1941	1,400,000
1942	1,450,000
1943	1,500,000
1944	1,550,000
1945	1,600,000
1946	1,675,000
1947	1,750,000
1948	1,825,000
1949	1,900,000
1950	1,975,000
1951	2,075,000
1952	2,200,000
1953	2,300,000
1954	2,400,000
1955	2,500,000
1956	2,600,000
1957	2,700,000
1958	2,800,000
1959	2,900,000
1960	3,000,000
1961	3,100,000
1962	3,200,000
1963	3,300,000
1964	3,400,000
1965	3,500,000
1966	3,600,000
1967	3,700,000
1968	3,800,000
1969	3,900,000
1970	4,000,000
1971	4,100,000
1972	4,200,000
1973	4,400,000
1974	4,600,000
1975	4,800,000
1976	5,000,000
1977	5,200,000
1978	5,400,000
1979	5,600,000
1980	5,800,000
1981	6,000,000
1982	7,400,000
1983	8,200,000
1984	9,000,000
Total	178,560,000

Provided, however, That Poland, at its option, upon not less than 90 days' advance notice to the United States, may postpone any payment falling due as hereinabove provided, except those falling due on or before December 15, 1929, hereinafter referred to in paragraph 4 of this agreement, to any subsequent June 15 or December 15 not more than two years distant from its due date, but only on condition that in case Poland shall at any time exercise this option as to any payment of principal, the payment falling due in the next succeeding year can not be postponed to any date more than one year distant from the date when it becomes due unless and until the payment previously postponed shall actually have been made, and the payment falling due in the second succeeding year can not be postponed at all unless and until the payment of principal due two years previous thereto shall actually have been made.

All bonds issued or to be issued hereunder to the United States shall be payable to the Government of the United States of America, or order, shall be issued in such denominations as may be requested by the Secretary of the Treasury of the United States, and shall be substantially in the form set forth in the exhibit hereto annexed and marked "Exhibit A." The \$178,560,000 principal amount of bonds first to be issued hereunder shall be issued in 62 pieces, in denominations and with maturities corresponding to the annual payments of principal hereinabove set forth.

3. Payment of interest: All bonds issued or to be issued hereunder shall bear interest, payable semiannually on June 15 and December 15 in each year, at the rate of 3 per cent per annum from December 15, 1922, to December 15, 1932, and thereafter at the rate of 3½ per cent per annum until the principal thereof shall have been paid.

4. Method of payment: All bonds issued or to be issued hereunder shall be payable, as to both principal and interest, in United States gold coin of the present standard of value or, at the option of Poland, upon not less than 30 days' advance notice to the United States, in any obligations of the United States issued after April 6, 1917, to

be taken at par and accrued interest to the date of payment hereunder: Provided, however, That with reference to the payments on account of principal and/or interest falling due hereunder on or before December 15, 1929, Poland, at its option, may pay the following amounts on the dates specified:

June 15, 1925	\$500,000
Dec. 15, 1925	500,000
June 15, 1926	750,000
Dec. 15, 1926	750,000
June 15, 1927	1,000,000
Dec. 15, 1927	1,000,000
June 15, 1928	1,250,000
Dec. 15, 1928	1,250,000
June 15, 1929	1,500,000
Dec. 15, 1929	1,500,000

Total..... 10,000,000

and the balance, including interest on all overdue payments at the rate of 3 per cent per annum from their respective due dates, in bonds of Poland dated December 15, 1929, bearing interest at the rate of 3 per cent per annum from December 15, 1929, to December 15, 1932, and thereafter at the rate of 3½ per cent per annum until the principal thereof shall have been paid, such bonds to mature serially on December 15 of each year up to and including December 15, 1934, substantially in the manner provided in paragraph 2 of this agreement, and to be substantially similar in other respects to the bonds first to be issued hereunder.

All payments, whether in cash or in obligations of the United States, to be made by Poland on account of the principal or interest of any bonds issued or to be issued hereunder and held by the United States, shall be made at the Treasury of the United States in Washington or, at the option of the Secretary of the Treasury of the United States, at the Federal Reserve Bank of New York, and if in cash shall be made in funds immediately available on the date of payment, or if in obligations of the United States shall be in form acceptable to the Secretary of the Treasury of the United States under the general regulations of the Treasury Department governing transactions in United States obligations.

5. Exemption from taxation: The principal and interest of all bonds issued or to be issued hereunder shall be paid without deduction for, and shall be exempt from, any and all taxes or other public dues, present or future, imposed by or under authority of Poland or any political or local taxing authority within the Republic of Poland, whenever, so long as, and to the extent that beneficial ownership is in (a) the Government of the United States, (b) a person, firm, or association neither domiciled nor ordinarily resident in Poland, or (c) a corporation not organized under the laws of Poland.

6. Payments before maturity: Poland, at its option, on any interest date or dates, upon not less than 90 days' advance notice to the United States, may make advance payments in amounts of \$1,000 or multiples thereof, on account of the principal of any bonds issued or to be issued hereunder and held by the United States. Any such advance payments shall first be applied to the principal of any bonds which shall have been issued hereunder on account of principal and/or interest accruing between December 15, 1922, and December 15, 1929, and then to the principal of any other bonds issued hereunder and held by the United States, as may be indicated by Poland at the time of the payment.

7. Exchange for marketable obligations: Poland will issue to the United States at any time, or from time to time, at the request of the Secretary of the Treasury of the United States, in exchange for any or all of the bonds issued or to be issued hereunder and held by the United States, definitive engraved bonds in form suitable for sale to the public, in such amounts and denominations as the Secretary of the Treasury of the United States may request, in bearer form, with provision for registration as to principal, and/or in fully registered form, and otherwise on the same terms and conditions, as to dates of issue and maturity, rate or rates of interest, exemption from taxation, payment in obligations of the United States issued after April 6, 1917, and the like, as the bonds surrendered on such exchange. Poland will deliver definitive engraved bonds to the United States in accordance herewith within six months of receiving notice of any such request from the Secretary of the Treasury of the United States, and pending the delivery of the definitive engraved bonds will deliver, at the request of the Secretary of the Treasury of the United States, temporary bonds or interim receipts in form satisfactory to the Secretary of the Treasury of the United States within 30 days of the receipt of such request, all without expense to the United States. The United States, before offering any such bonds or interim receipts for sale in Poland, will first offer them to Poland for purchase at par and accrued interest, and Poland shall likewise have the option, in lieu of issuing any such bonds or interim receipts, to make advance redemption, at par and accrued interest, of a corresponding principal amount of bonds issued or to be issued hereunder and held by the United States. Poland agrees that the definitive engraved bonds called for by this paragraph shall contain all such provisions and that it will cause to be promulgated all such rules, regulations, and orders as shall be deemed necessary or desirable by the Secretary of the Treasury of the United States in order to

facilitate the sale of the bonds in the United States, in Poland, or elsewhere, and that if requested by the Secretary of the Treasury of the United States it will use its good offices to secure the listing of the bonds on the stock exchange in Warsaw.

8. Cancellation and surrender of obligations: Upon the execution of this agreement, the payment to the United States of cash in the sum of \$5,925.99, as provided in paragraph 1 of this agreement, and the delivery to the United States of the \$178,560,000 principal amount of bonds of Poland first to be issued hereunder, together with satisfactory evidence of authority for the execution of the agreement and the bonds on behalf of Poland by its envoy extraordinary and minister plenipotentiary at Washington, the United States will cancel and surrender to Poland, at the Treasury of the United States in Washington, the obligations of Poland in the principal amount of \$159,666,972.39, described in the preamble to this agreement.

9. Notices: Any notice, request, or consent under the hand of the Secretary of the Treasury of the United States shall be deemed and taken as the notice, request, or consent of the United States and shall be sufficient if delivered at the Legation of Poland at Washington or at the office of the Minister of Finance in Warsaw; and any notice, request, or election from or by Poland shall be sufficient if delivered to the American Legation at Warsaw or to the Secretary of the Treasury at the Treasury of the United States in Washington. The United States in its discretion may waive any notice required hereunder, but any such waiver shall be in writing and shall not extend to or affect any subsequent notice or impair any right of the United States to require notice hereunder.

10. Compliance with legal requirements: Poland represents and agrees that the execution and delivery of this agreement and of the bonds issued or to be issued hereunder have in all respects been duly authorized and that all acts, conditions, and legal formalities which should have been completed prior to the making of this agreement and the issuance of bonds hereunder have been completed as required by the laws of Poland and in conformity therewith.

11. Counterparts: This agreement shall be executed in two counterparts, each of which shall have the force and effect of an original.

In witness whereof Poland has caused this agreement to be executed on its behalf by its envoy extraordinary and minister plenipotentiary at Washington, thereunto duly authorized, and the United States has likewise caused this agreement to be executed on its behalf by the Secretary of the Treasury, as chairman of the World War Foreign Debt Commission, with the approval of the President, all on the day and year first above written, subject, however, to the approval of Congress, pursuant to the act of Congress approved February 9, 1922, as amended by the act of Congress approved February 28, 1923, notice of which approval, when given by Congress, will be transmitted in due course by the Secretary of the Treasury of the United States to the legation of Poland at Washington.

THE GOVERNMENT OF THE
REPUBLIC OF POLAND,

[SEAL.] By WLADYSLAW WRÓBLEWSKI,
Envoy Extraordinary and Minister Plenipotentiary.

THE GOVERNMENT OF THE
UNITED STATES OF AMERICA,

For the Commission:
[SEAL.] By A. W. MELLON,
*Secretary of the Treasury and Chairman of
the World War Foreign Debt Commission.*

Approved:
CALVIN COOLIDGE,
President.

Mr. CRISP. Mr. Speaker, how much time have I left?
The SPEAKER. The gentleman has used 22 minutes.

Mr. CRISP. Mr. Speaker, I am going to yield the remainder of my time to the gentleman from Alabama [Mr. HUDDLESTON], and I would like to ask the chairman of my committee [Mr. GREENE] whether he would prefer that the gentleman from Alabama use his time now or wait until after the chairman has used some time?

Mr. GREENE. I would prefer that the gentleman from Alabama proceed at this time.

Mr. CRISP. Then I will yield 10 minutes to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Speaker, I believe it can not be too often reiterated that America did not enter the World War in partnership with any other nations.

As a coincidence other nations were at war with Germany. It was a coincidence fortunate for us and for them. Their causes for war were not our causes. Their war aims were not our war aims. We owed them no duty to enter the war. We did not enter the war because we owed them the duty to enter. We did not enter the war because of sympathy with them in their efforts or their war aims. America entered the war for her own reasons and for her own causes and for her own na-

tional purposes. There were groups which were moved by racial feeling and social and commercial interests, but to the extent that they remembered other nations they forgot their own country.

The main and chiefest of our war purposes was to secure for ourselves the freedom of the seas, the right to travel the highways of the world in pursuit of our peaceful purposes and trade with all the nations. That had been fundamental in American policy from the very beginning. It was for the violation of that right that we declared war upon Germany. It is a strange fact that although we were victors in the war, although we won the freedom of the seas upon the battlefields, we lost it at Versailles. It was the one particular subject which it was not permitted to us even to discuss in writing the treaty. Nothing better illustrates than that fact that our war aims were not the aims of the other nations and that they were not our partners in the war, for they thwarted us in our chief aim.

We did not owe the other nations at war with Germany any duty to lend them money or to furnish them supplies for their civilian inhabitants or for their armies. We did not do so in recognition of any duty that we owed them. We loaned them money and furnished them supplies because it served our national interests to do so. They did not borrow because they were fighting our battles. They were fighting their own battles. They borrowed the money not to enable them to stay in the field to fight for America, but that they might stay in the field to fight for themselves.

Many of our people, out of the exuberance of sentimentality and love for romance and for rhetoric, from time to time have spoken of those who were at war with Germany at the same time with ourselves in terms of sympathy and of favoritism and lauding their aims and purposes, and many for themselves have chosen to assume the posture that we failed in some duty we owed to civilization and ourselves by not entering the war at some earlier time. It can not be said too often that we owed the other nations no duty whatsoever. They fought for themselves, we for ourselves. It served our national purposes to lend them money, and it served them exceedingly well to borrow it in the time of their distress. Let us have done with posturing!

We should carry to the nations that owe us the definite and distinct message that we expect them to pay their debts, irrespective of the fact that at the time of the loan they were engaged against an enemy which was our enemy. [Applause.] We must urge upon them that they disrobe themselves of the false garment that they were in some way battling for America before we chose to enter the war. It was primarily their war; none of them were wholly without fault in causing it. The fundamental causes of war were complicated questions of European jealousies and balances of power, racial and religious antagonisms, and the desire upon the part of the great commercial nations to secure for themselves trade advantages and exclusive commercial opportunities for the purpose of adding to their own wealth as nations and to advance the selfish interests of their citizens—matters in which America had no interest and with which we were not concerned. Let us have done with this false attitude that America had neglected her duty in not entering the war or that America owed the allied nations some duty which we did not perform.

They owe us some money, which they borrowed when they needed it badly. The duty is upon them to pay, unless they choose to put themselves before the world as those who refuse to pay honest debts.

As for myself, I feel that our position is identical with that of any creditor dealing with his debtors. He has, without asking leave, a right to be merciful if he wills. He has a right to discriminate at discretion among his debtors. He has a right to collect from them according to their ability to pay and according to terms that they are able to meet.

The nations of the world are not upon an equal economic footing. Some are much better able to pay than others. The people of Great Britain are taxed heavily, as the gentleman from Georgia [Mr. CRISP] has pointed out, but the reason for that is that they are able to pay the taxes. They are able to pay heavy taxes because they have great wealth. That is their affair and not ours.

There are nations to which loans were made that should never have been permitted to borrow from us. It was a blunder to lend to them. It did not aid or serve our cause to advance them money. Some of the loans were made even after the war was over. Nevertheless, they owe us and some of them are only remotely able to pay and some will perhaps never be able to pay in full. There is no reason, in common sense nor in our duty to other debtors, why we should

not extend, to poor nations and those who are unable to pay in full, terms which they can meet. There is no reason in common sense nor in our duty to other nations why we can not give terms to one nation better than those given to others. Let me say, in all frankness, in the American commercial vernacular, it is nobody's business what terms we give to our debtors. We may give such terms as we choose. [Applause.]

Mr. WAINWRIGHT. Will the gentleman yield for a question?

Mr. HUDDLESTON. May I first finish this statement and then I will be pleased to yield.

I hope it will not be thought ungracious of me, nor as showing lack of respect and admiration for the great man who was eulogized in this Chamber on yesterday, to say that the monumental blunder of statesmanship of modern times, and perhaps of all times, was in allowing this country to go to war in association with other nations thereby putting ourselves at the mercy of our associates, without some definite understanding as to their war aims and what those nations were seeking to accomplish. Our great leader did not fail as a diplomat at Versailles. He did all there that man could have done. The failure was far back of that—when we entered the war without requiring the other nations to whose cause we thereby inevitably committed ourselves to renounce their secret agreements, to clean themselves of their entanglements, and to declare what their war aims really were, so that there might be a meeting of minds, both before and during the war, which might have been written into the treaty of Versailles.

Mr. GREEN. Mr. Speaker, in the limited time left to me I will yield to the gentleman from Ohio [Mr. BURTON] such time as he may desire.

Mr. BURTON. Mr. Speaker and my colleagues, I can not agree with the gentleman from Alabama [Mr. HUDDLESTON] that our entrance into the Great War was a mere coincidence or because of the assertion of special rights of our own. When the impartial judgment of history is made up it will be to the effect that this war was a conflict between freedom on the one side and despotism on the other [applause], between justice and peace and the power of might and of the sword. And so our joining with England, with France, with Belgium, with Italy in this great struggle was because their cause was our cause. [Applause.]

If the power of the Kaiser had prevailed and his army had driven the allied armies to the sea, I firmly believe that here in the New World an army would have been formed mighty enough to have entered the contest and emerge from the conflict undefeated. For we certainly would have been driven to take such a course for the protection of our own rights, in case our allies had been overpowered, against the movement which threatened liberty and all the best possessions of the human race.

That does not mean that the obligations incurred by the respective nations should not be paid. Do not let me be understood for a moment as favoring a cancellation of these obligations. The reasons for that position, I at another time and in another place set forth very fully, and while I do not wish to take the time of the House, I ask unanimous consent that some remarks of mine made in the city of London, on the 26th of September, 1922, and published in the London Times, may be inserted with my remarks, also that an editorial appearing in the London Times on the same date be inserted.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the Record by printing the articles referred to. Is there objection?

There was no objection.

The following is the material to which reference is made:

[From the London Times, September 27, 1922]

ALLIED DEBTS—STANDPOINT OF AMERICA—DISARMAMENT AND PEACE

Mr. THEODORE E. BURTON, an ex-Senator of the United States of America and a Member of the House of Representatives, who is also a member of the commission appointed by the United States Government to deal with the funding of the Allies' debts to America, was entertained at luncheon at the Hotel Cecil yesterday by the American Chamber of Commerce in London. Mr. BURTON, during a visit of some weeks' duration to Europe, has attended the conference of the Inter-parliamentary Union in Vienna and has been studying present conditions in continental countries generally. He will leave England on his return to the United States within the next fortnight.

In the absence of Mr. G. M. Cassatt, the president of the chamber, Mr. G. K. Weeks (of the National City Bank of New York), a director of the chamber, occupied the chair, and among the guests were Sir

Robert Horne, M. P., Chancellor of the Exchequer; Sir A. Shirley Bann, M. P.; Sir Felix Schuster; Mr. H. L. Symonds, the chairman of the council of the London Chamber of Commerce; Mr. H. A. Payne, joint permanent secretary of the Board of Trade; Mr. E. C. Granfell; Sir G. Faish; and Mr. G. Roberts, M. P.

The chairman said that the members of the American Chamber of Commerce showed by their presence that they were not of those Americans who believed in a policy of isolation for the United States. They realized that it was impossible for any nation in this generation to separate itself from participation in international affairs, and, realizing that, they were prepared to pay tribute to the wise statesmanship of their distinguished guest, ex-Senator BURTON, in crossing the Atlantic in order to study the problems of reconstruction and finance and the political conditions which were bound up in the task of bringing the world back to a more normal and healthy existence. They were greatly favored in having among their guests the Chancellor of the Exchequer and a number of directors of some of the most important British banks, who had gathered to hear Mr. BURTON speak on the foreign relations of the United States and on the Allies' debts.

Mr. BURTON said:

"It affords me sincere pleasure to meet so representative a gathering of citizens of the two great English-speaking nations. This is my sixteenth visit to old London; the first was made 42 years ago. In the meantime, I have had occasion to see a growth in this metropolis equaling that of many of the younger cities in the New World. At the same time the visitor can recognize old-time landmarks and a gratifying continuance of the attractions characteristic of the long ago. To-day I think I can render no more important service than by speaking frankly of relations between the United States and European nations. I am giving the American viewpoint, and it is my intention to speak very plainly. I am prompted, in some degree, to do so by the friendly, but sometimes immaturely considered, statements which have been made by visitors from my native land during the last few months. I do not claim any more genuine Americanism than they, but speak as one for many years familiar with currents of popular opinion and having a disposition to employ greater freedom of expression. Let it be understood that whatever I may say is said upon my own responsibility, rather than as a member of the so-called Debt Commission or as a Member of Congress.

AMERICA AND THE LEAGUE OF NATIONS

"The question is asked, 'Why has America kept aloof from the League of Nations and other international movements in recent years?' Certainly we did not keep aloof when the great struggle between autocracy and popular government impelled us to take up arms in 1917, nor have we been lacking in those measures, public or private, which tend to relieve the suffering of humanity in a war-torn world. In a recent attendance upon the sessions of the League of Nations at Geneva, I must confess that I was disappointed by the absence of reference to our activities in the line of international benevolence. It was stated that it was very difficult to aid Russia. England had generously given some £250,000, and had conditionally offered another £100,000. The fact was overlooked, however, that notwithstanding that we had many needy at home, and feared that aid to Russia under the present régime would promote a political control altogether alien from our ideas, \$20,000,000 were appropriated by the Congress of the United States for the suffering and starving in the Volga Valley. This appropriation, reinforced by private agencies, it may be confidently asserted, saved millions of lives. In the discussion at the same gathering of measures for the advancement of peace and for lessening the burdens of militarism, only a passing reference was made to the recent Conference for Limitation of Armaments at Washington. The spirit which prompted the call for that conference was intensely practical. While idealistic conceptions were at no time absent, it was thought best to undertake nothing more than that in which there was assurance of success. Disarmament on land was regarded as impracticable at the time, and it was thought best to deal with the competition of navies. The number of participating countries was limited to nine, each having an especial interest in the questions to be considered. The calling of a general conference was avoided because of the delay, the complications, and the clash of conflicting interests which must inevitably result. Unstinted praise is due to the representatives of other nations for the spirit of concession which they manifested, and for their readiness to abandon cherished ambitions. Of none is this more to be emphasized than in the case of the delegates from the British Empire, headed by Mr. Balfour.

"The reasons for a certain degree of aloofness on the part of the United States are not far to seek. Let us name some of them. First, our geographical isolation. This creates a tendency to be politically as well as geographically distinct from the rest of the world. Second, a prevalent conviction among the early founders of the Republic that in their great experiment, based on liberal ideas and popular control, we were confronted by a disposition on the part of other nations not altogether friendly. It was believed that in Europe combinations were formed and ambitions and antagonisms existed, participation in which

we should sedulously avoid. Thus, as stated by Washington, permanent alliances were opposed, and entangling alliances were condemned by John Adams and Thomas Jefferson. This tradition—and it is more than that—still survives and retains a very strong hold upon the American people. Third, an economic fact creates an exceptional condition, in that the United States, in a degree beyond, no doubt, any other country in the world, is self-sufficient in the supplies for the maintenance of her population. Our domestic trade far and away surpasses our foreign trade, and in the investment of capital and our manifold activities, internal development has thus far absorbed the attention of the great majority of the people.

A UNITED STATES OF EUROPE

"We have 48 States possessed of an unlimited variety of resources and capabilities, and among them there is unhampered freedom of intercourse. In 1861 a division was sought by the attempted secession of certain States. Had this attempt succeeded, the division would only have been temporary. Either the stronger would have subdued the weaker, or by amicable arrangement they would have gravitated toward unity. For fate had decreed that the United States were to be one geographical and political entity, with the promise of colossal wealth and power. This land, stretching from the lesser to the greater ocean, must be one country with one purpose and one destiny. How incalculable would be the benefit of a similar union to a large part of the continent of Europe organized on economic lines, within which, whatever the political boundaries or barriers, there might be free interchange of commodities. Such a Zollverein or economic United States in Europe would surely go far to remedy the distress now pressing upon the world. Before leaving this subject, it is hardly necessary to add that the people of the United States cherish a policy of peace, and there is constant apprehension lest any foreign entanglement or association might lead to war.

"All that has been said does not mean that our vision has not been broadened or that we shall refuse to play such part in movements for closer cooperation between countries in every continent under the sun so far as we can consistently with home interests and our settled convictions in regard to measures which promote the general welfare of all nations. But there is a prevalent impression on the other side of the Atlantic that much remains for Europe to do, such, for example, as settling the problems of reparation, and, may be, in the modification of treaties made, before the good offices of the United States could be altogether helpful. When the time is ripe, possibly another conference may be asked to convene at Washington to consider the economic conditions of the world. In the meantime it should be understood that whatever occurs in London or Constantinople, in far-off Peking or Bagdad, now awakens the keenest interest in the United States. The sacrifices of the Allies have not been forgotten. I remember most distinctly an address made at New York after America's entry into the war by Senator, now President, Harding. The audience rose to their feet and applauded when he said, in substance: 'If our Allies in western Europe, defeated and broken in spirit, should fall down in the contest, nevertheless, with grim determination, we would gather our forces on this side of the Atlantic to fight on in the cause in which they so valiantly engaged and continue in that contest until victory should be achieved and the heritage of freedom be preserved for our Allies and for us.'

ALLIES' DEBTS TO UNITED STATES

"There is another subject on which I will speak frankly. That is, upon the Allies' debts in the United States. I must say that the disposition of the people of the United States is to require the payment of these debts. It is not difficult to trace the reasons which have led to this conclusion. They are: First, a feeling that international credits, especially the debts of nations, have a certain degree of sanction, I may say, of sacredness. No one can exaggerate the importance of credit in the modern financial and industrial world. It renders the resources of those who do not engage in enterprise available for the benefit of all for the promotion of wholesome activity. Credit bridges the chasm between early and sometimes unpromising beginnings and the development of helpful enterprise. In brief, it renders the hopes of to-day the realizations of to-morrow. The cancellation or repudiation of debts would create not merely confusion and distrust in the financial world but—quite as dangerous—would seriously impair future development. The result would rest with special weight upon such a country as England, where for centuries past English currency and English obligations have been the very synonym of stability and of assurance of payment. Common fairness dictates that this record for meeting obligations should create no discrimination to her disadvantage.

"Another reason is that the amounts advanced to foreign countries were provided by loans obtained from the people, and that with no small degree of difficulty. The advances made were not from an abounding revenue but by the action of the United States in becoming a borrower alike with these debtors at the time. The burden of taxation is extremely heavy in our own country, and in proportion to the burdens existing before the late Great War the increase in national indebtedness has been far greater and in taxation quite as great as
